Today, about 8 percent of our steelmaking capacity is so outdated that industry experts have recommended it be shut down. Modernization for this portion of our steel mills would not be cost efficient. Industry has resisted innovative technologies such as continuous casting and direct reduction. Today, we produce only one quarter of our steel by continuous casting; Japan, produces 80 percent by continuous cast methods. Ten percent of our steel is still produced with open hearth furnaces; Japan no longer operates open hearth furnaces. Direct reduction, a technology developed and commercialized by American companies, accounts for two-thirds of the world's steelmaking grade DRI. Only 9 percent of this output is produced in the United States.

Our steel industry in its present condition cannot compete with foreign imports. Many blame high wages for our competitive disadvantage. Yet, the United Steelworkers signed a 3-year pact in March which offered management $3 billion in wage cuts.

In addition, the difference between labor rates in the United States has been deeply affected by the strength of the dollar abroad. The high exchange rates have lowered foreign wages in comparison to American ones. For example, at actual exchange rates, wages in the United Kingdom rose only 6 cents per hour between 1980 and 1982, from $8.21 to $8.27. If the value of the dollar had not increased relative to the British pound, the increase in hourly compensation in Great Britain would be greater than the increase in American wages, a $2.79 increase or 34 percent. In Belgium, steelworker wages are today ap-

proximately half of American wages, whereas in 1980, the wages were approximately equivalent. We cannot continue to place the blame on labor for our depressed steel industry.

Rather than modernizing, American industry is moving rapidly from its old plants to new pursuits. In late 1979, United States Steel closed its Youngstown, Ohio, works and 12 other steelmaking facilities. In the same year, it opened a joint venture shopping center in Pittsburgh, and invested in a world-scale chemical facility in Houston. Between 1975 and 1979, 37 percent of investment by United States Steel was in expansion and growth of non-steel sectors. One year after lobbying heavily for the accelerated depreciation allowances, United States Steel devoted its resources not to modernization, but to the acquisition—for $6 billion—of Marathon Oil Co. This year, after advocating quotas and import relief, United States Steel proposes to import 3.5 million tons per year of unfinished steel slabs from the subsidized British Steel plant in Ravenscraig, Scotland. The corporation claims it cannot afford the $1 billion needed to modernize the steelmaking end of its Fairless works plant near Philadelphia, Pa.

United States Steel is not the only steel company interested in diversification. National Steel has acquired three large savings and loan companies worth $6.9 billion. Republic Steel has expanded into the insurance business.

Congress cannot continue to provide tax breaks for an industry seemingly uninterested in modernization and competition. We must ask the steel companies to respond to import relief, to tax credits, to subsidized loans, with an active modernization program. Our role in doing so will be a positive one: a constructive effort at rebuilding our most basic industry.

Today, I am happy to join the gentleman from Pennsylvania (Mr. GAYDOS), chairman of the Steel Caucus in introducing the "Fair Trade in Steel Act of 1983." This bill reestablishes a Steel Tripartite Advisory Council composed of representatives of management and labor, the Secretaries of Commerce and Labor, the EPA Administrator and Members of Congress. It would also limit imports of carbon and specialty steel to 11 percent of domestic consumption and would limit iron ore imports to 14 million tons per year. Finally, the "Fair Trade in Steel Act of 1983" would provide needed import relief for the steel industry—but this relief would be contingent upon proof that the beneficiaries of this relief are engaged in verifiable modernization of the domestic steel industry. This legislation will reactivate the Steel Tripartite Committee, which worked quite effectively during the Carter administration.

Congress must enact tax credits which are strictly targeted to reinvestment in basic plant and equipment. Likewise any Federal loans must be predicated on commitments to retool.

Finally, the Congress can and must actively discourage steelmakers from abandoning plants and workers. Behind the unemployment figures are families whose lives are disrupted and communities whose tax bases are eroded by plant and mine closings. Studies of workers in automobile, steel and other industries showed that 6 years after a plant closing, these workers earned an average of 12- to 18-percent less than before the shutdown. This represents a lifetime loss of $40,000 per worker.

Communities suffer too. The closing of the Campbell Works, in Youngstown, Ohio, caused more unemployment than just the 4,100 steelworkers terminated. Another 3,600 jobs were lost in retail and other businesses. Wages lost by Campbell Works employees totaled $60 to $70 million and wages in other businesses in the same period were $63.5 million. The total cost to State, local and Federal Governments was $35 million in lost tax revenues and $35 million in benefits paid to the unemployed.

Modernization of old plants, rather than construction of new plants in new locations, is, in fact, more economically feasible for steel makers. While a new plant has a somewhat lower operating cost, expansion and modernization of existing plants has a lower capital cost—$60 cheaper per ton of finished steel. It is clearly in the best interest of our domestic steelmakers to cooperate with our efforts in Congress to revitalize the industry and will help revitalize our industrial heartland.

The National Employment Priorities Act of 1983, which I have cosponsored would encourage industries to stay in their plants and modernize them. H.R. 2847 would provide Federal assistance for businesses communities or workers to prevent plant closings by allowing access to loan capital. Business would be required to provide enough notice of closing to allow local governments, employees and small businesses to plan for and adjust to potential tax losses. In order to discourage unnecessary plant closings, businesses would be required to make severance payments, pay for health and welfare benefits and provide transfer rights to other facilities for laid off workers. Finally, this legislation would make Federal retraining available to all dislocated workers and authorize emergency assistance to local governments.

I believe that Congress must actively support the steel industry and its steel workers. However, as Congress works to renew our investment in the steel industry, we will—we must—ask for a reciprocal commitment by industry to retool and modernize. If Congress acts, and the steel industry responds, the Nation will benefit from a strong basic industry for our national security, jobless steelworkers will be reemployed and the domestic steel industry will be better able to compete fairly with foreign trade.●

● Mrs. MARTIN of Illinois. Mr. Speaker, first let me commend the gentleman from Pennsylvania, the chairman of the Steel Caucus and the other gentleman from Pennsylvania, the chairman of the executive committee for arranging this opportunity to talk about steel and trade. It is important that we discuss openly and fully the situation being faced by this vital industry.

In my district, Mr. Speaker, is one of the most efficient and up-to-date steel producing facilities in the country: Northwestern Steel & Wire. This company under the leadership of the Dillon family has for years been a very profitable corporation employing approximately 4,000 persons. It has the three largest electric furnaces in the world with a total capacity annually of about 2,400,000 net tons. In July 1982, the company began operating the largest continuous Bloom & Billet Caster in North America. They have undertaken in the past year modernization of their 12-inch mill. Other modernization projects are underway or are on hold pending a recovery in the steel industry. In fact, Northwestern Steel has spent $163.6 million on capital improvements during the past 5 fiscal years, all generated through the use of internal funds.

As is evident from the above information, Northwestern Steel is not an old, outdated, inefficient plant that cannot compete effectively. It has competed successfully, and its management continues to look to the future.

That future, however, has become, at best, uncertain. In fiscal year 1982, the company's net sales fell by 31 percent and shipments by 33 percent. The recession obviously accounted for a good portion of this decline, but even as we recover from that recession, the outlook continues to be bleak. The cause of this bleak outlook is due to the increase in unfairly traded foreign steel imports. These dumped or subsidized imports rob U.S. mills of much needed production volume, tend to suppress prices, and force domestic mills to produce at much lower, less efficient operating rates. We have many trade laws on the books to deal with dumping and subsidies, but the length of time that it takes to go through the procedures mean that relief can come too late, if indeed relief comes at all.

I wish now to read a letter received recently from President Peter Dillon of Northwestern Steel which makes a rather persuasive case for timely enforcement of current trade laws. I

think he and his management group which had input into his letter make a very valid point, and one on which both the Congress and the administration should take action.

NORTHWESTERN STEEL & WIRE CO.,
Sterling, Ill., April 15, 1983.

Hon. LYNN MARTIN,
Member of Congress, Longworth House Office Building, Washington, D.C.

DEAR REPRESENTATIVE MARTIN: The following rather extensive comments in my letter are in response to your correspondence of March 28, 1983 requesting an opinion of Congressman Murphy's reintroduction of the Fair Trade Act:

We are in a trade war, and all areas of our government are attempting to restructure agencies in an endeavor to consolidate and improve on administration trade policies and activities. Certainly Representative Murphy's Fair Trade Act attempts to honestly focus in on the problem and deserves support. However, it appears that his three-tiered quota on steel imports and a newly established Commission would address only one phase of the problem.

Let us explain. Last year U.S. steel companies filed more than 150 unfair trade cases. In the more than 90 dumping and subsidy cases filed against the European Community in January 1982 the cost of legal fees alone will run into millions of dollars. The money was spent with the hope that increased duties might cause exporters who are subsidized or who dump products to eliminate these practices. This has not happened. Even where cases were won and duties imposed, duties were not usually collected. For example, our government entered into a Suspension Agreement with Brazil allowing it to collect export taxes equal to the subsidies it provided to its industry. This Agreement allows the government of Brazil to switch monies from one pocket to another while the injury to the U.S. domestic industry continues. The effect is that additional subsidization is encouraged. Moreover, month after month of injury occurred before the U.S.-E.C. Arrangement, which settled the cases, was signed in October 1982. The settlement permitted the E.C. to avoid duties payment for past subsidies and the domestic industry received no recompense for injury suffered because of these practices. We came out of this experience realizing that our trade laws need substantial amendments to make them less costly, less cumbersome, less arbitrary, more expeditious, more effective, and fair to all.

The point of all this is that there are many areas to address, but the bottom line always comes up indicating the main problem with trade regulations is not in the laws themselves but in the lack of political will on the part of successive government officials charged with enforcing those laws. This administration won't do it, it won't even develop a coordinated government program to allow industry to regroup to efficient levels of operating. It won't develop a coherent package of programs that will tie-in domestic investment needs, national defense, strong industrial base, and trade policies that will benefit all American industry. Congress will have to do it. And, Representative Murphy is right, that GATT isn't capable of enforcing "free" trade.

What is needed is full and prompt law enforcement and firm political will on government's part. We personally believe that Senator Roth's Trade Reorganization Act of 1983 (S-121) that creates the Department of Trade to be headed by a Secretary and two deputies all holding the rank of Ambassador is the kind of legislation and clout we need, not only for steel, but for American industry to allow fair trade protection for the U.S. consumer, not protection for the importing countries.

I trust that the above comments by members of our management group will provide some valuable insight to this vexing problem which faces our industry. Your support of this legislation would be appreciated.

Appreciatively,

PETER W. DILLON, *President.*●

● Mr. COYNE. Mr. Speaker, those of us who are members of the Congressional Steel Caucus are aware of the concerns some Members of this House have about stricter enforcement of our trade laws so that American steel can prosper and grow.

Each of us wishes we lived in a more perfect world, one in which competition between nations was fair and subsidies, hidden or otherwise, did not skew the marketplace for steel.

All of us have heard the calls for a return to what some see as the halcyon days of a "free trade" America, a nation in which action on imports was unneeded.

Those calls have been made before, always with an allusion to the ideal of free trade, often without sufficient attention to the practice of the marketplace.

In another time, during a similar debate, Henry Clay made note of familiar arguments. He observed:

> The call for free trade is as unavailing as the cry of a spoiled child. It has never existed; it never will exist.

Reasonable men and women may differ as to whether free trade has ever existed. I would suggest that it would be difficult for a reasonable observer of the world economy to expect free trade to exist anytime soon when it comes to the steel industry. The widespread use of subsidies is well documented.

Proposing workable legislative measures to deal with the admittedly complex imported steel situation has been a primary purpose of the Congressional Steel Caucus. Monitoring enforcement of existing laws has been another.

Making sure that existing laws are enforced prompted the caucus to hold hearings with the Federal Highway Administration in March 1983 on the administration's temporary waiver of the "Buy America" provision of the Surface Transportation Act of 1982. The opposition to this waiver expressed by the caucus helped cause the administration to drop a $450,000 project threshold in May, thereby reducing the prospect for job loss due to waivers.

The use of steel in highway construction should not be underestimated as a source of jobs. According to a recent report by the General Accounting Office, compiled at the request of the Steel Caucus, steel accounts for $1.7 billion, or 8.1 percent, of the total project costs for Federal-aid highway projects from January 1979 through December 1981.

According to the report, "Foreign Source Procurement Funded Through Federal Programs by States and Organizations," foreign steel purchases by States for highway projects during that period totaled $63.2 million. Of that amount, $28.8 million was spent on foreign structural steel, 82 percent of which went for two projects, the Arkansas River Bridge and the Wisconsin Arrowhead Bridge, both of which used Japanese steel. These projects were able to meet the "Buy America" provisions of the law by proving that project costs would be reduced by 10 percent or more through a foreign steel purchase.

In several other instances, however, GAO investigators found apparent violations of the "Buy America" requirements. At this point, I would like to include in the CONGRESSIONAL RECORD the GAO findings on six highway projects in which contractors appear to have purchased foreign structural steel without meeting the conditions of the law:

State	Project cost	Foreign structural steel cost
North Dakota	$2,304,485	$465,700
North Dakota	485,741	244,658
North Dakota	696,861	185,620
Washington	4,499,273	25,344
Washington	1,029,563	2,226
Washington	670,847	900
Total		924,448

Source: GAO.

This report examined foreign source procurement by the Federal and State Governments in such programs as highway, municipal waste-water treatment, airports, urban mass transportation, rural electrification and local public works. Another report on the subject, due out this week, will include an update on the procurement policies of the Department of Defense. Recent reports indicate that Department, through the Defense Industrial Supply Center in Philadelphia, is considering awarding two contracts for the purchase of 7,100 tons of plate steel to a European producer. With this prospect in the offing, the upcoming GAO report should be interesting reading.

Mr. Speaker, steel employment in our Nation was 453,000 in 1979. The number employed in the industry dropped sharply to 289,000 by 1982. Pennsylvania, once the country's top steel producer, now ranks behind Indiana and Ohio. In the Pittsburgh area, where 90,000 worked in steel in July 1979, only 40,700 were employed in November of last year.

These harsh statistics are among the many reasons Congress must act to preserve a vital manufacturing industry. As economist Lester Thurow has noted:

The idea that America can give up on manufacturing (let the Japanese make the computers) and rescue ourselves with services (we will do the programing) is simply nonsense. In the long run, the people who build the hardware are going to dominate the software.

We have the capacity to have a healthy steel industry, one that exercises a dominant role in the world economy. I am pleased to support a measure introduced today by Mr. GAYDOS which recognizes this fact.

The Fair Trade in Steel Act of 1983 authorizes the President to establish a tripartite advisory council for the industry, composed of management, labor, and Government representatives. This council would advise the President and the Congress on pending steel problems. In addition, it would conduct research on trade, environmental, health, safety, tax, and readjustment issues.

The act would also impose, for a period of 5 years, quantitative restrictions on the import of carbon and specialty steel. No more than 11 percent of the total expected domestic consumption in these products could be imported in a given year. In order for the restriction to become effective, the Secretary of Commerce must find that those who benefit from the relief, namely American producers, are engaged in steel industry modernization. There would be no free lunch for companies seeking relief while failing to make efforts to become competitive.

I urge my colleagues to join me in sponsoring this important measure.●

● Mr. JONES of Oklahoma. Mr. Speaker, I want to thank the gentleman from Pennsylvania (Mr. GAYDOS) for taking this special order to discuss the need to modernize our industrial sector and the lack of capital formation in the steel industry.

During the last few years, the hue and cry that our Nation is losing the industrial battle for the future has become increasingly shrill. Economists have pointed out that, while many of our trading partners have benefited from American largesse in the past—like the Marshall plan—and built modern plants with advanced equipment, our basic industries have lost their competitive edge. Mr. Speaker, we can continue to worry about this problem, studying essays and analyses of the situation, while contemplating the niche the moribund American industrial base will have in future history books, or we can fight back. I believe that the time to study is over—the time to fight back is now. On June 28, 1983, I introduced legislation, H.R. 3434, the Work Opportunities and Renewed Competition Act of 1983, WORC, aimed at revitalizing our Nation's industrial base, where the need for capital is greatest and unemployment is highest. WORC is our first shot in the battle for the industrial future, a kind of domestic Marshall plan.

Many experts suggest that the future greatness of the American economy lies in the sole pursuit of high-tech industries. I have always shared the view that advanced technology will be an integral part of our industrial output for the foreseeable future. High-tech, however, is not a panacea. Millions of Americans work in our basic industries such as steel, automobiles, mining, transportation, and chemicals. Writing off basic industries will mean writing off millions of jobs, and the high technology sector cannot absorb most of those workers.

Furthermore, Mr. Speaker, this legislation is vital to all industries in our effort to regain a competitive edge vis-a-vis our foreign counterparts. Years of anemic productivity, sagging profits, protractedly high interest rates, and Government subsidies to foreign competitors have led to a decline in our ability to compete abroad. The call for trade restrictions to protect American industry from foreign competitors will make our industry less competitive, not more. Moreover, protectionism may also dissipate the fragile recovery we are experiencing globally. WORC will allow us to meet our competitors head-on with better products and technology.

WORC is also important to our national defense capabilities and will insure we are capable of quick expansion. We cannot rely on our trading partners to supply our needs in times of national emergency. We must turn around the decline in our aging basic industrial sector, to gain a beachhead in the industrial battle for the future.

Mr. Speaker, we are facing a crisis in the steel and industrial sector of our economy. Millions of Americans want to work and they are frustrated because our industries do not have the new tools to give them jobs. We can show the world a productive America again by putting those tools in their hands with the WORC bill.●

● Mr. BROWN of California. Mr. Speaker, today I would like to join the Steel Caucus in discussing its work and the problems surrounding our steel industry. The Steel Caucus is a congressional organization created as a forum to study and review the plight of our domestic steel companies, and I am proud to have been a member of the caucus and on the executive committee during its years of work in behalf of our domestic steel industry. It has again been a difficult year for this industry as the depressed world economy and high levels of steel imports have taken their toll on us.

To keep their workers employed, many foreign countries have subsidized their industries, offering their products at deflated prices in the international marketplace. This pricing, in conjunction with other advantages of lower wages and in some instances modernized plants, has played havoc with our domestic industry, both in the domestic market and internationally.

In order to combat this intense competition, the U.S. plants have carefully reviewed their own productivity and efficiency. Many have begun extensive upgrading and modernization programs. Some have found the financing of this type of effort prohibitive and have instead been forced to lay off workers in hopes of a future revival of the market. Others have opted to close down their plants entirely.

The Steel Caucus has been following these developments closely. In the area of specialty steel, it has repeatedly urged the administration to institute a limited, short-term restraint on subsidized products which have been flooding the U.S. market.

The many plant shutdowns, however, have not been problems so easily solved. The Steel Caucus has been looking into this area extensively, reviewing possible programs and alternatives which could be implemented to ease the burden caused to the many unemployed steelworkers.

Instead of completely closing down plants, there have been some creative compromises suggested. In my district, the Kaiser Steel Corp., located in Fontana, Calif., is an example of a company exploring an alternative solution, to keep at least part of its production lines open.

To show the extent the import problem has affected our markets, I would like to follow, chronologically, the factors leading to the reduction in Kaiser Steel's production, and the steps we have taken in Congress to assist them in their struggle to remain open.

BACKGROUND ON KAISER STEEL

In order to put the Kaiser Steel problem into perspective, it is necessary to review the different situations that have existed in the western steel market and the national steel market.

From January 1, 1969, through December 31, 1972, world steel trade was handled under a voluntary restraining order, VRO. This VRO set up an orderly marketing situation so that all countries could have a share of the market; national import penetration was 18.3 percent in 1971. The VRO was dropped owing to the threat of a lawsuit from the National Consumers Union claiming the VRO was inflating steel prices. However, this was a time of expansion and initially the market was not seriously affected.

By 1973 the national import figures were approximately 16 percent. How-

ever, on the west coast, imports were close to 38 percent. Because of this damaging increase, the late Congressman Pettis and I formed an early version of the Congressional Steel Caucus. In the beginning, the caucus was comprised of Western representatives concerned about the increase of imports in the West. Efforts by the caucus resulted in the inclusion of a provision in the 1974 Trade Act for determination of injury to an industry on a regional basis. This was the first time that subnational determinations in trade were made.

By 1974, the recession was resulting in decreased demand for steel. With a smaller world market, imports competition increased; more dumping of steel in this country occurred. The industry limped along and Kaiser Steel went ahead with its $250 million modernization program in an effort to remain competitive.

In 1977, national imports were 17.8 percent, yet west coast imports were 38 percent. The first antidumping case against the Japanese was upheld and the administration encouraged more cases to be filed, giving our negotiators a firmer hand. The importers responded with the plan, devised by French Minister Davigon, for the Organization for Economic and Cooperation and Development, OECD, countries to phase out their old production.

In 1978, the trigger price mechanism, TPM, went into effect. President Carter also announced a program with $500 million in loan guarantees for steel plant modernization. Steel imports reached a record high, with imports during February 1978, reaching 50 percent on the west coast.

Since the TPM was calculated on Japanese production and freight costs were a variable of the TPM levels, the west coast enjoyed the lowest TPM levels. In response, the Japanese imports soon dropped off, yet European imports increased drastically. During the first quarter of 1977, Japan comprised 84 percent of total imports while Europe held 5.3 percent. By the next year, Japan's portion of total imports had dropped to 56 percent while Europe's contribution rose to 24 percent.

In mid-1978, the California Legislature passed Joint Resolution 91, calling upon the Government to: First, strictly enforce the trade laws; Second, adjust the TPM to reflect the west coast's problem; and third, set up a State "Buy American" program.

Following this action by the California Legislature, I sponsored a meeting with the Congressional Steel Caucus to give Kaiser management and the steelworkers the opportunity to present their problems with the TPM to Congress. I submitted an article in the CONGRESSIONAL RECORD which reprinted the State joint resolution and called upon the Treasury Department to make the needed adjustments. I then sent a letter to the Special Trade Representative, Bob Strauss, asking him for restrictions on west coast imports of steel. Next, a letter was sent, signed by 20 other Congressmen, to the Treasury Department asking for TPM changes.

In early 1980, the TPM was suspended as frustrated steel companies filed antidumping petitions against steel importers. Shortly thereafter, to cut costs, Kaiser Steel laid off hundreds of steelworkers. I sent letters to the Secretaries of the Commerce and Labor Departments requesting their assistance in helping the dislocated steelworkers. The Commerce Department had earlier declared Fontana and the surrounding areas as a special impact area due to Kaiser's increasing layoffs. As a result, the area was eligible for special programs. The Labor Department had the trade adjustment assistance programs which included supplemental unemployment benefits and retraining funds for workers who lose their jobs as a result of imports. Unfortunately, only a fraction of the Kaiser workers were eligible for TRA benefits. Most of the money went to the depressed auto industry workers.

With the TPM eliminated, I sent a letter to the President asking him to establish a steel import monitoring system.

Finally, the antidumping charges against the European producers were upheld by Commerce and additional cases against Asian producers were filed. However, after all of this effort, the hard times for the U.S. steel industry persisted and the west coast, as always, bore the brunt of the problem. At present, imports enjoy approximately 22 percent of the national steel market and close to 50 percent of the west coast market.

After facing repeated losses, Kaiser Steel is currently phasing out its primary steel making operations. By the end of the year, its coke ovens and furnaces will be cold and most of the 8,000 workers employed by Kaiser during better times will be out of jobs. These people had expectations which I shared, expectations of a solid career with Kaiser Steel. In Congress, we worked to keep those jobs, but circumstance played against us. Even now, when there is such a need for retraining programs for these workers, we must fight to maintain the meager funding levels.

The remaining hope for Kaiser Steel is to find an alternative source of slabs to replace the production which used to come from its primary operations. Kaiser is engaged in negotiations concerning ownership of the plant and is looking for a source of slab steel for the mill. Unfortunately, this situation is similar to the one at the United States Steel Fairless plant and our people are getting caught in the attempts to block the arrangement there. Once again, those of us representing the west coast are faced with a unique situation.

However, the Steel Caucus is an effective forum for solving these problems and I have every confidence that we will come to an equitable solution. Kaiser Steel was closing its primary end out of necessity well before the decision was made to find another slab source, unlike the Fairless plant situation. The finding of a source of slabs for the mill at Fontana is essential in order to keep the remaining workers employed and I will work to that end.

These are not good times for our domestic steel industry. But at least there is a group in Congress working on behalf of America's steelworkers and the U.S. steel industry. The Steel Caucus has served to focus attention on the plight of the domestic steel industry and has worked toward solutions to their problems. I am confident that this work will pay off in a renewed steel manufacturing base in the United States.●

● Mr. RITTER. Mr. Speaker, I commend my colleagues from Pennsylvania, Mr. MURTHA, chairman of the House Steel Caucus, and Mr. GAYDOS, executive committee chairman of the House Steel Caucus, for their fine leadership and for requesting this special order to bring to light many of the concerns of the U.S. steel industry.

In the past weeks the House of Representatives has been debating the International Monetary Fund quota increase. Considerable concern has been expressed regarding foreign subsidization of commodities, particularly steel, and its impact on our domestic industry. If we wish to survive in the world steel market, we must address the problem of foreign subsidization of steel. A healthy domestic steel industry is not only critical in maintaining U.S. jobs, it is vital to a strong U.S. manufacturing economy and our national defense. However, little information is available for our Government to make appropriate assessment of loans to countries where steel is being subsidized.

On August 3, I offered an amendment to title III, the International Monetary Fund quota increases of H.R. 2957, the International Recovery and Financial Stability Act of 1983. This amendment was adopted by the House of Representatives and directed the National Advisory Council on International Monetary and Financial Policies to conduct a 12-month study on the impact on the U.S. steel industry of steel subsidies by nations who are borrowers from the International Monetary Fund. The Council must report to the President and both Houses of Congress its findings and make recommendations on appropriate action.

The National Advisory Council is responsible for U.S. participation in the international financial institutions. It coordinates the policies and practices of all agencies of the U.S. Government which make, or participate in making, foreign loans, or, which engage in foreign financial exchange or monetary transactions. The Council is made up of the Secretaries of the Treasury, State, and Commerce; the Chairman of the Board of Governors of the Federal Reserve System; and the President of the Export and Import Bank.

Smokestack industries can flourish if they modernize and labor and management work together. These industries provide high paying jobs and a market for high technology products. However, they will need an economic climate which does not contribute to the tendency of industrializing nations to treat steel as a showcase industry to be subsidized.

My amendment to H.R. 2957 calls attention to a thorny problem which impacts powerfully on present and future modernization of our American steel industry and will provide the administration, Congress, and the International Monetary Fund with appropriate decisionmaking data.

Addressing foreign subsidization of steel is one way to help make the steel industry competitive again; increasing opportunities to modernize the industry is another. I would like to take this opportunity in this special order to highlight an important piece of legislation that will go a long way to help the steel industry meet the challenge of modernization. As an original cosponsor of H.R. 3434, the Work Opportunities and Renewed Competition Act of 1983, I believe this legislation could provide significant investment toward modernization of our basic manufacturing industries. As the representative of this country's second largest steel company, I am aware of the kind of capital investment needed to revitalize our basic industries and make them competitive again.

Basic industries such as steel, autos, and railroads have not been able to take advantage of investment tax credits they have earned because they have not realized sufficient profit to use the credits to offset their tax liability. The Work Opportunities and Renewed Competition Act of 1983 unlocks these tax benefits by allowing companies with unused investment tax credits to obtain 85 percent of the value of their credits when reinvested in new plants and equipment. The restrictions on the types of investment are clear and the full value of the reinvestment tax credit must be paid back by 1990.

This bill offers new hope for the steel industry as well as other basic industries. And most important, it provides a means to make those industries more competitive and help put America back to work.

The steel industry is vital to our jobs, our manufacturing economy and our national defense. I believe the steel industry can meet the challenge of modernization and world competition with the proper economic climate. It is our job in Congress to help provide that proper economic climate.●

● Mr. ERDREICH. Mr. Speaker, I am pleased to join with many of my colleagues from the Steel Caucus to discuss the problems facing the steel industry and to examine ways in which Congress can perhaps respond to these pressing needs.

The problems facing the industry, I believe are clear. since 1974 approximately 200 steel facilities in the United States have been permanently shut down. Nationwide, 150,000 steelworkers are without jobs—over 10,000 in the Sixth District of Alabama which I represent.

Net losses for major integrated steel producers in this country surpased $3 billion last year and are expected to continue throughout this year. Over 60 percent of our production capacity remains idle, and imports have claimed 22 percent of our domestic market.

The industry further suffers from a lack of investment modernizaiton. The American Iron & Steel Institute estimates the industry would have to spend $60 bilion over the next decade to bring its facilities to world-class levels. In 1982, U.S. steelmakers spend $2.2 billion on modernization, while suffering a net loss of $3 billion.

Clearly, the industry is suffering decline, in part, from its own maturity, but is being heavily penetrated by imports as well. Doubling this problem is the fact that our industry's foreign competitors are subsidized. Their modern, efficient plants have been subsidized and their product hits the market at a lower price because it is subsidized. No doubt, government-aided competition has placed the U.S. industry at a considerable disadvantage not only on the world market, but in its own domestic market as well.

For this reason, in March of this year, I introduced H.R. 1384, the Unfair Foreign Competition Act of 1983 to allow American firms to seek damages in Federal court against foreign competitors who illegally sell their products in U.S. markets. Current remedies only allow our companies to file charges with the International Trade Commission, a time consuming and often unrewarding process.

Another measure which would provide some assistance to the industry is the establishment of a U.S. Department of Trade and Industry. Creation of such a department would provide needed organizational improvements and increase the consideration given to trade matters in U.S. foreign and domestic policymaking decisions.

Certainly, there are other forms of assistance that should and could be provided and I believe that it is imperative and these proposals be reviewed. Today, I was greatly encouraged to learn that the President agreed to meet with the officers of the executive committee of the Steel Caucus. I hope that this meeting will be the first of a series with the goal of revitalizing our industrial base. The strength of our basic industries is critical not only to the performance of our domestic economy, but is important to providing for our national security needs as well. The United States must have a strong steel industry and I am encouraged by the increased focus upon the industry and strongly urge that it continue.●

□ 2120

SOVIET INVASION OF CZECHOSLOVAKIA—A DAY OF SHAME

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, August 21 marks the 15th anniversary of the 1968 invasion of Czechoslovakia by the Soviet Union—an outrageous act of totalitarian oppression which again reminded the world that ideals of freedom and human dignity simply do not exist for the brutally cruel masters of the Kremlin.

The people of Czechoslovakia will again commemorate August 21 as a day of Soviet shame as will Americans who trace their ancestry to this captive nation. None of us as Americans must ever forget that a system of monstrous barbarity still rules in the captive nations and that all of us must continue our support for the Czechoslovak people in their just aspirations for self-determination and human dignity.

Mr. Speaker, at this point in the RECORD I wish to include a statement from the Czechoslovak National Council of America issued in commemoration of this sad day in the history of freedom-loving peoples everywhere.

The statement follows:

FREEDOM IS INDIVISIBLE

On this sad occasion of the fifteenth anniversary of the brutal Soviet-led invasion and occupation of peaceful and freedom-loving Czechoslovakia, we American citizens of Czech, Slovak and Subcarpatho-Ruthenian descent, again remind the entire world of this Soviet violation of key principles of international law incorporated into the Charter of the United Nations:

The brutal Soviet aggression and occupation:

(1) violated the sovereignty of a member state of the United Nations (Article 2, Section 1);

(2) was carried out in violation of Article 2, Section 4, which prohibits the use of mili-

tary force in the relations between individual members of the United Nations;

(3) violated the principle of self-determination of peoples (Article 1, Section 2);

(4) was in conflict with Article 2, Section 7, which prohibits outside intervention in matters essentially within the domestic jurisdiction of any state;

(5) was in conflict with a number of resolutions of the General Assembly of the United Nations, particularly with Resolution 2131 (XXI) adopted at the meeting of December 21, 1965, upon the Soviet Union's own motion, prohibiting any intervention in the domestic affairs of any state and guaranteeing its independence and sovereignty.

The continued Soviet occupation of Czechoslovakia is another crime against the right of a small country to determine its own destiny and aspirations. The invasion was an intervention by the forces of reactionary communism to prevent the Czechs and Slovaks from establishing their own social order that did not endanger anyone and sought to contribute to the building of bridges across the discords of a divided world and to lend aid to a better understanding and cooperation among all nations on the basis of true progress and humanity.

The people of Czechoslovakia have not resigned themselves to these aggressive plans of Moscow. The day of August 21, is being commemorated in Czechoslovakia as a Day of Soviet Shame in a mighty and disciplined resistance against Soviet pressure. We are joining our friends in Czechoslovakia in asking the entire civilized world to support the people of Czechoslovakia in their effort to achieve "the withdrawal of Soviet troops from Czechoslovakia."●

THE FORFEITED CONVEYANCE DISPOSAL IMPROVEMENTS ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. BROOKS) is recognized for 5 minutes.

● Mr. BROOKS. Mr. Speaker, the number of conveyances seized by Federal agencies because of their use in illegal activities has nearly tripled in recent years, from 3,526 in 1979 to 9,035 in 1981. This increase is the result of stepped up efforts to halt drug trafficking, illegal immigration, and the transporting of other forms of contraband. The cost of processing these seized conveyances has increased as their numbers have increased, and too often, because of limited resources, vitally needed law enforcement officers must be assigned to the purely administrative tasks associated with inventorying, storing and selling cars, boats, and airplanes forfeited to the Government.

A General Accounting Office report prepared for the Government Operations Committee, which I am releasing today, documents monetary losses due to serious problems with current Federal procedures for storing, forfeiting, and selling seized conveyances. GAO has determined that as of April 1982, Federal law enforcement agencies were holding over 4,518 seized conveyances—3,665 cars, 692 boats, and 161 airplanes—worth $82 million when seized. GAO's evaluation reveals, however, that due to lengthy forfeiture proceedings, inadequate security and a lack of maintenance, seized conveyances—plagued by deterioration, vandalism, and theft—frequently sell for only a fraction of their value at the time they were taken.

Mr. Speaker, today I am introducing the Forfeited Conveyance Disposal Improvements Act. This bill is designed to help avoid economic loss caused by the deterioration and theft of conveyances taken by the Government during law enforcement operations and to provide needed resources to Federal law enforcement agencies to pay for services involving these conveyances, such as their storage, maintenance, and sale.

Mr. Speaker, my bill will allow increased use of administrative forfeiture by raising the limitation on these proceedings to $100,000. Administrative proceedings now take an average of 8 months; judicial forfeitures, on the other hand, take an average of a year and a half. Greater use of the shorter, more efficient process will result in less economic loss due to depreciation and theft of this property. Increased use of administrative forfeitures will also help relieve our already overburdened Federal court system.

To assure that the rights of owners are protected, my bill includes provisions to require notice and full disclosure of the owner's rights, the nature of the procedures and alternative actions available at the owner's request. My bill also requires waiver of bond posting requirements if anyone who claims an interest is financially unable to pay the minimal $500 bond.

Further, my bill assures that adequate resources will be available to pay for storage, protection, maintenance and sale of seized conveyances by requiring that proceeds from their sale be deposited in two funds, established for use by the agencies responsible for the vast majority of seizures. One fund would be established for the Customs Service and one for agencies in the Department of Justice (the Immigration and Naturalization Service, the Drug Enforcement Administration, the Federal Bureau of Investigation, and the U.S. Marshals Service). Each fund would be available, subject to congressional appropriations, at a level not to exceed $10 million in any fiscal year.

Mr. Speaker, problems created because of the increased numbers of seized conveyances have been under study in the Congress for some time. We sought to deal with these and other issues last year in the Omnibus Crime legislation. That bill was approved by the 97th Congress, but vetoed by the President for reasons unrelated to this issue. Congressman Hughes, Chairman of the Judiciary Committee's Subcommittee on Crime has ongoing hearings dealing with these and other critical matters.

I am hopeful that the GAO study and my bill will be useful to the Crime Subcommittee as they seek to determine the best possible solution to these problems.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. LELAND) is recognized for 5 minutes.

● Mr. LELAND. Mr. Speaker, I ask that the record reflect how I would have voted on the following rollcall votes;

Rollcall 233, H.R. 1, Housing and Urban-Rural Recovery Act, July 13, the Bartlett amendment to allow the interest rates on Federal Home Administration insured mortgage loans to be negotiated between the lender and the buyer. I would have voted "no."

Rollcall 234, H.R. 1, Housing and Urban-Rural Recovery Act, July 13, the Wylie motion to recommit the bill to Banking, Finance, and Urban Affairs Committee with instructions to bar communities that place rent control on projects built after enactment from receiving Federal funds from a new $900 million multifamily rental housing production program. I would have voted "no."

Rollcall 235, H.R. 1, Housing and Urban-Rural Recovery Act, July 13, Passage of the bill to authorize $15.64 billion in fiscal 1984 for Federal housing programs and to establish a new $900 million multifamily rental housing production program. I would have voted "yes."

Rollcall 236, H.R. 2769, Caribbean Basin Initiative. Adoption of the rule (H. Res. 246) providing for House floor consideration of the bill to provide trade and tax preferences to the nations of the Caribbean region. I would have voted "no."

Rollcall 237, H.R. 2769, Caribbean Basin Initiative. Passage of the bill. I would have voted "no."

Rollcall 238, H.R. 2350, Health Research Extension Act. Adoption of the rule (H. Res. 208) providing for House floor consideration of the bill to authorize programs at the National Cancer Institute, National Heart, Lung and Blood Institute and other agencies through fiscal year 1986. I would have voted "yes."

Rollcall 239. H.R. 1398, daylight saving time. Coats amendment to allow States to exempt themselves from the additional 2 months of day-

light saving time. I would have voted "no."

Rollcall 240. H.R. 1398, daylight saving time. Passage of the bill to extend daylight-saving time by beginning it on the first Sunday in March rather than the last Sunday in April. I would have voted "no."

Mr. Speaker, I was out of town on official business, and was unable to vote. I thank the Chair for this opportunity to set the record straight.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Colorado (Mrs. SCHROEDER) is recognized for 5 minutes.

● Mrs. SCHROEDER. Mr. Speaker, I was absent on Friday, July 29. Had I been present I would have voted as follows:

Rollcall No. 289, "nay."
Rollcall No. 290, "nay."
Rollcall No. 291, "yea."
Rollcall No. 292, "yea."
Rollcall No. 293, "nay."
Rollcall No. 294, "nay."
Rollcall No. 295, "nay."
Rollcall No. 296, "yea."

EXPLANATION OF VOTES MISSED ON JULY 29 DUE TO DISTRICT BUSINESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Alabama (Mr. ERDREICH) is recognized for 5 minutes.

● Mr. ERDREICH. Mr. Speaker, on Friday, July 29, business in district caused me to miss three votes. Rollcall No. 294, the Conte amendment to recede from disagreement with the Senate amendment No. 65 and concur therein, was defeated by the House by a vote of 165 to 213. The RECORD reflects my pair against the amendment and I would have voted against the amendment had I been able to remain in Washington. On rollcall No. 295, a motion by Chairman WHITTEN to recede from its disagreement to the amendment of the Senate numbered 158, and concur therein, I would have voted "nay" as well. Finally, I would have voted "yea" on rollcall No. 296, approving House Concurrent Resolution 153.

Thank you, Mr. Speaker, and I regret that district commitments called me away from the business of the House.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman fron Florida (Mr. NELSON) is recognized for 5 minutes.

● Mr. NELSON of Florida. Mr. Speaker, due to official business on Friday, July 29, 1983, I missed three votes. If I had been present to vote, I would have voted "no" on rollcall vote 294; "no" on permitting Senators to increase their salaries and receiving honoraria income, rollcall vote 295, and "yes" on rollcall vote 296, House Concurrent Resolution 153, providing for August adjournment of the House and Senate.●

FROM HELSINKI TO MADRID

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. FASCELL) is recognized for 5 minutes.

● Mr. FASCELL. Mr. Speaker, 8 years ago today, the heads of state of 32 European nations, the Soviet Union, the United States, and Canada met in Helsinki, Finland, and affixed their signatures to the Final Act of the Conference on Security and Cooperation in Europe (CSCE). The Helsinki accord was the capstone of détente, a 40,000-word document covering nearly every aspect of East-West relations from military security to trade to cooperation in the humanitarian field. Most importantly, perhaps, the Helsinki Final Act elevated the issue of human rights to one of legitimate international concern. A government's treatment of its own citizens was acknowledged to have a bearing on that government's relations with other countries.

In early September, the foreign ministers of the same 35 nations, including Secretary of State Shultz, plan to convene in Madrid, Spain, to give their approval to a 36-page document which builds upon the foundations laid in Helsinki. The concluding document of the Madrid meeting, the result of nearly 3 years of deliberations, calls for new initiatives in the military security area, expanded economic cooperation, and renewed efforts to guarantee respect for human rights. Madrid also goes beyond the original Helsinki Pact by calling for cooperative ventures in some new areas such as the combat of international terrorism. At Madrid, as at Helsinki, the unanimous consent of all 35 states was required to adopt each and every word in the document.

The Madrid accord inches forward—ever so slowly and in small increments—the human rights commitments undertaken in Helsinki. After protracted negotiations, agreement was reached on new language in the area of religious freedom, minority rights, emigration, trade union rights, the dissemination of information, and improved working conditions for journalists. If these provisions are fully implemented, a significant improvement in the lives of countless men and women will occur. Yet, without faithful adherence to these new provisions, they will remain only hollow words, devoid of any relevance in a world of harsh reality. Unfortunately, the reality of life in the Soviet Union and other East European countries shows that there is a long way to go. Yet, the new commitments undertaken at Madrid give hope that some actual improvements may follow if for no other reason than the desire of Moscow to keep European détente alive.

The test of the Madrid meeting, in a very real sense, will be how these new agreements are honored in practice. Many of the provisions negotiated with great opposition from the Soviet Union, were designed to address the most difficult problems.

Surpassing the commitment in the Helsinki Final Act to respect the freedom of persons to "profess and practice" their religion, the Madrid document pledges the 35 nations to take the action necessary "to effectively ensure this right." Yet, repression of religious believers in the Soviet Union has increased in the last few years. Over 250 religious activists have been arrested since the Madrid meeting began in 1980. While the 20-year-old saga of the Vashchenko and Chmykhalov families has ended happily with their resettlement in the West, at least 30,000 of their coreligionists—members of unofficial Pentecostal and Baptist communities—continue their struggle to emigrate from the Soviet Union.

The Helsinki Final Act committed its signatories to "facilitate" freer movement of people and to deal with emigration requests in "a positive and humanitarian spirit." Western negotiators at Madrid succeeded in expanding those commitments. Requests to emigrate for the purpose of family reunification will be decided "favorably" and within 6 months according to the draft Madrid concluding document. Information on the procedures and regulations governing emigration will be readily available, and the fees charged in connection with emigration will be at a "moderate level in relation to the average monthly income." Applicants whose requests were not granted shall "be informed of their right to renew applications." Yet, during the Madrid meeting, the rates of Jewish, German, and Armenian emigration from the U.S.S.R. have plummetted to their lowest levels in this decade. Thousands of families are divided including at least a dozen Americans married to Soviet citizens. And many Jewish "refuseniks"—those who have been refused exit visas—have been given permanent refusals and told that they are forbidden to submit new applications.

Breaking new ground not covered at Helsinki, the Madrid accord recognizes the "right of workers freely to establish and join trade unions" and "the right of trade unions freely to exercise their activities and other rights." The participating states pledged to insure these rights as well. Yet, in Poland, the free trade union Solidarity remains outlawed with many of the union's top leadership and advisers imprisoned. In the Soviet Union, workers' rights advocates Aleksei Nikitin, Vladimir Gershuni, and Aleksandr Skobov are forcibly incarcerated in psychiatric hospitals for their efforts to establish independent trade unions. At least another 20 labor activists are in prison or in psychiatric institutions.

The recognition in the Helsinki Final Act of the right of everyone "to know and act upon his rights" spawned the formation of Helsinki monitoring groups throughout the Soviet Union. In the Madrid document, the legitimacy of such groups is acknowledged, albeit indirectly. The 35 nations "reaffirm that * * * organizations and persons have a relevant and positive role to play" in implementing the Helsinki and Madrid accords and they expressed their determination "to encourage genuine efforts to implement the final act." More importantly, the Madrid delegates committed their governments to "take the necessary action in their respective countries to effectively ensure" the right of the individual to know and act upon his rights. Yet, 52 members of the Helsinki monitoring groups in Moscow, Ukraine, Lithuania, Georgia, and Armenia, as well as members of the specialized affiliate groups on psychiatric abuse, invalids' rights, and the rights of religious believers are in Soviet prisons, labor camps or internal exile.

The father of the Helsinki monitors and founder of the Moscow group, Yuri Orlov, has already spent over 6 years in labor camp, half of his 12-year sentence. He suffers from tuberculosis and has been told repeatedly by his captors that he will never leave the camp alive. On July 10, in connection with the upcoming conclusion of the Madrid meeting, he began a hunger strike to protest the imprisonment of his fellow monitors and demand an amnesty for them.

Western delegations at Madrid frequently protested the treatment of Professor Orlov and his colleagues. Indeed, the Madrid meeting proved to be a valuable forum for the West to direct the glare of public opinion on Soviet misdeeds and to bring pressure to redress them. The invasion and occupation of Afghanistan, Soviet complicity in the military crackdown in Poland, and increased repression in the U.S.S.R. and Eastern Europe were forcefully and roundly condemned by Western delegations including the traditionally neutral countries. The whole catalog of Soviet human rights violations was thoroughly documented and deplored. In fact, CSCE is the only international body in which the U.S.S.R. has been subjected to such frank and frequent criticism of its human rights record. The next follow-up session, to be held in Vienna in 1986, will provide an additional opportunity to review the record and to see how well the words agreed on at Madrid were implemented.

Although it often seems futile, in light of blatant disregard for prior commitments, to agree to new undertakings, in the long and arduous struggle to promote universal respect for human rights, there is no alternative. The words of Madrid—coupled with the pledges of Helsinki—set standards by which to judge the behavior of the 35 countries. Words are the yardstick by which deeds are measured. The 35 nations could breathe new life into the Helsinki and Madrid provisions by practicing fidelity to those words instead of merely professing it. In the Madrid document, the participants "reaffirmed their commitment to the process of the CSCE and emphasized the importance of the implementation of all the provisions," including those on human rights. Let us commemorate the anniversary of the Helsinki Final Act today by reaffirming our commitment to hold the 35 signatory nations to their words.●

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. ACKERMAN) is recognized for 5 minutes.

● Mr. ACKERMAN. Mr. Speaker, due to official business in my district I was unable to be present during the consideration of House Concurrent Resolution 153 on Friday, July 29. Had I been here I would have voted "aye" on rollcall No. 296.●

A TRIBUTE TO REV. THEODORE GIBSON

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 5 minutes.

● Mr. PEPPER. Mr. Speaker, there comes along, every now and then one man or one woman who makes a difference in the life around them. Such individuals are blessed with a devine kind of eye that gives them the power to see beyond the reach of the vision of the many and the sensitivity to feel deeply the wrongs inflicted upon others. Such a person like the martyr who gives his life for his cause, seems to rise above his own self-interest, above pain and punishment and anguish, in his or her dedication to the service of interests much larger than his or her own. Such a man was the Rev. Theodore R. Gibson. Almost alone, Father Gibson lifted up black people to walk and work and eat and drink on a level with white people.

Almost alone Father Gibson defeated the McCarthy-like inquisition of the Florida Legislature aimed at breaking the strength of those who fought, like Father Gibson, for a better life for countless numbers of people. In doing so, Father Gibson had to bear the scorn and the denunciation of those who did not understand the meaning of liberty and freedom and human dignity and consitutional rights of others. He even subjected himself to the payment of a heavy fine and to incarceration in prison to halt this assault. He was saved from that fine and from imprisonment only by the decision of the U.S. Supreme Court. He had the courage to fight on in those dark days sustained only by his faith in God and his confidence that our judicial system would protect him as he fought to protect the constitutional rights of his fellow citizens.

When a black family chose, as allowed by law, to live in a white neighborhood and the family, daring to do this, was picketed and denounced, it was Father Gibson who invoked the law against such deprivation of the rights of citizens and had the disturbers arrested. This was another Father Gibson first. Slum clearance leading to the installation of sewage disposal, running water, and the removal of old houses for all citizens were other accomplishments in Coconut Grove brought about by Father Gibson. It was Father Gibson who led the fight for the integration of buses in Miami. It was Father Gibson who brought the black children into the white schools, who opened the city golf course, the beaches, parks, and hospitals in Dade County. It was Father Gibson whose wise and tactful initiative induced Walgreens, Woolworth, Kress, McCrory, W. T. Grant, Richards, and Sears to open their lunch counters to all races without incident.

Father Gibson stood strong, determined and brave, for those causes he believed to be right. He had the genius of moving oratory, the rare gift of a beautiful spirit; his vision reached into the tomorrows and into the highest echelons of life. He was a man with a purpose, with a cause, and with a tender conscience. This man who came up through the ministry and became, not only an heroic spiritual but political leader as well, has left an indelible mark of things being better for so

many of his fellow citizens where he lived and walked. In the memories of all who were privileged to know him will ever live the stalwart image of this good and great man. Truly does he merit the accolade which Anthony paid to the fallen Brutus upon the battlefield at Philippi when he said, "His life was gentle and the elements so mixed in him that nature might stand up and say to all the world, this was a man."●

GEORGE BRAND—OUTSTANDING JOURNALIST AND CITIZEN

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. PANETTA) is recognized for 5 minutes.

● Mr. PANETTA. Mr. Speaker, I would like to bring to the attention of my colleagues the retirement of one of the finest citizens of my State of California, and one of the finest men I have ever known—George L. Brand, the editor of the Telegram-Tribune in San Luis Obispo.

After serving as editor for 20 years, George is planning on a life of teaching and continued activity within the community. He leaves behind a newspaper of high professionalism, integrity, and journalistic excellence, attributes for which he holds a great deal of responsibility.

George was born in Santa Rosa, Calif., and served in the Marines during both World War II and the Korean war. He earned a political science degree from Occidental College while working as a reporter in Los Angeles. He joined Scripps newspapers in 1952, served as managing editor of the Redding Record-Searchlight for nearly a decade, and, in 1963, became editor of the Telegram-Tribune.

I became well acquainted with George when, in 1969, he took a 6-month leave of absence to serve as Director of Information for the Department of Health, Education, and Welfare. I also served at HEW during this period, and it was truly an honor and a pleasure not only to work with George but also to have him as a friend. That friendship persists to this day.

During his tenure as editor, George has been a leader in efforts to protect the environment of the beautiful area in which his newspaper is published. He has editorialized unceasingly on behalf of a ban on offshore oil and gas drilling in sensitive areas, he was successful in creating a sanctuary for egrets, herons, and other waterfowl in Morro Bay, he supported the expansion of the wilderness area of our Nation, and he continues to warn against the opening of the Diablo Canyon Nuclear Power Plant unless safety and waste dumping problems are dealt with.

In addition to his editorial responsibilities, George has been an active participant in efforts to protect the first amendment rights of the press, particularly regarding the need for the press to be able to obtain information to relay to the public. In addition, he has been active in various local and statewide newspaper organizations.

Mr. Speaker, I am proud to know George Brand, and I have been proud to have him as my friend. The people of the San Luis Obispo area are losing the journalistic services of a man who has informed them as well as anyone could have, who has challenged their ideas and helped to shape their views as well as anyone could have, and who has dedicated himself to their welfare. He is still a young man, and he still has a great deal to offer. I know my colleagues join me in wishing George Brand the best of luck in the future.●

PLIGHT OF THE DOMESTIC STEEL INDUSTRY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from West Virginia (Mr. MOLLOHAN) is recognized for 60 minutes.

Mr. MOLLOHAN. Mr. Speaker, I yield at this time to the gentleman from Pennsylvania (Mr. YATRON).

Mr. YATRON. I thank the gentleman for yielding.

Mr. Speaker, I want to commend my distinguished colleague, the gentleman from Pennsylvania (Mr. GAYDOS) for all of efforts and leadership in focusing the Nation's attention on this very compelling issue.

Mr. Speaker, I rise today to join with my colleagues to discuss an issue of such importance that it commands continued national attention. A vibrant domestic steel industry is essential to our industrial base and national security. A healthy steel industry is and will continue to be vital to a strong and prosperous America. Yet, despite this industry's crucial role, it continues to be subject to policies that threaten its very existence.

While economic recovery has finally begun to take hold in many sectors of our economy, recovery continues to elude the U.S. steel industry.

We have been working through the Steel Caucus and congressional committees to promote a legislative environment that will enable the steel industry to prosper and that will insure that competition with other producers is on a fair and equitable basis.

We must take these steps to maintain our capacity for steel production that is critical to the security of our Nation.

The continuing illegal and unfair trade practices of other nations still threaten the accomplishments of these efforts. The steel industry and its workers have taken important steps to improve the competitiveness of their industry.

I believe that all those who have made the courageous and difficult decisions necessary to enhance the productivity of the steel industry should be highly commended.

Still, the problem of imports, however, remains as insidious and compelling as ever.

How often have we come together to discuss this problem and how often has the response been incomplete and unsatisfactory. The time for discussion has long since passed, it is action and action now which is needed to insure that our steel industry can recover.

While the specialty steel industry recently received some import relief, the administration's decision was short of what is required to stem the flow of unfair inports.

Actions on imports threatening the carbon steel industry have also been inadequate to date.

We need to more vigorously explore reciprocity proposals as well as pursue effective quotas and address the concerns established by important trade cases.

The plans by United States Steel and Pittsburgh-Wheeling to import steel slabs and have them finished in this country is an alarming precedent. This type of negative solution points to the immediacy of our import problems and the need for more capital investment to make our plants competitive.

We must, therefore, explore ways to insure that the cost of capital for the steel industry is equal to that of those industries which can presently take advantage of the investment tax credit.

Clearly, increased capital investment and productivity is essential to the survival of this industry. Government policies should encourage recovery, not hamper it.

Many of us here today, have seen firsthand the damage which has occurred in the steel industry. In my district, my continued work with a major steel producer, Carpenter Technology Corp., has enabled me to become all too familiar with the hardships facing the industry and its workers.

I am hopeful that this special order will help to focus increased attention from this body, the administration, and the Nation, on the critical problems facing this industry.

Mr. MOLLOHAN. I thank the gentleman from Pennsylvania for his excellent statement.

Mr. Speaker, I want first of all to thank my good friends and colleagues from Pennsylvania, Mr. GAYDOS, Mr. MURTHA, and Mr. MURPHY, for arrang-

ing this opportunity to discuss the plight of the domestic steel industry, particularly in the context of today's international trade difficulties.

International trade has always involved high stakes and everyone who participates wants to come out a winner. Unfortunately, however, in the last few years the players have changed dramatically: instead of involving predominately private business enterprises, we increasingly see governments and government-subsidized companies participating in the international marketplace. But we in this country seem to have forgottern that rules change over time, and that our foreign trade policies must themselves change to accommodate new realities. We are now the only country in the world that affords open access to the high stakes international trade table and we even pay the ante for those who cannot afford it.

It is difficult for me to return to my home State of West Virginia, which has the highest unemployment of any State in the Nation, and which is heavily dependent upon the production of steel for its economic well-being and explain why we are providing loans to countries that subsidize industries that compete with our own.

My constituents ask me what have we done to protect American jobs from countries like Japan, Brazil, and South Korea that sell their products on the U.S. market at below-cost prices? Why, they want to know, are steel imports devouring over 20 percent of the U.S. steel market while our steel plants operate at 54 percent capacity and over 100,000 steelworkers are unemployed?

Frankly, I don't have much good news to tell them. In spite of the efforts of the Congressional Steel Caucus and individual Members of Congress, there is no concerted effort on the part of the administration to address the critical and growing problem of the decline of our basic industries.

Evidence of the continuing nature of the problem abounds. In spite of the much-heralded "recovery," just last week Wheeling-Pittsburgh Steel announced that it is negotiating an arrangement with Brazil to purchase semifinished slab. Brazil, under the terms of the proposal, will inject $40 million into Wheeling-Pittsburgh.

Brazil is a country that has been in the news a lot lately, and not for producing outstanding steel; for Brazil is one of those nations that is carrying an extensive debt. In fact, Brazil currently is steeped in a $90 billion debt. Most of that debt is owed to commercial banks—often American ones—and to the IMF—which has just requested that the United States increase its quota by 50 percent to over $8 billion. Brazil also subsidizes its steel industry. Thus American money is going to Brazil to pay for that country's steel production facilities, which compete with our own troubled industry. In other words, we are paying another country to drive us out of the steel industry.

Wheeling-Pittsburgh Steel is, unfortunately, not unique among steel companies for negotiating the purchase of semifinished slab from abroad. The steel industry in this country, as we all know, is in serious trouble and it is not surprising that it is turning to the best options it has available under current law. However offensive this may be to you and me, it is time for us to recognize that as elected Federal officials, we are in part responsible for the framework that drives companies like Wheeling-Pittsburgh to this alternative. Last year the industry lost $3.2 billion at a time when it desperately needs to modernize if it is to continue to compete in the international market.

I am a Congressman and not the president of a U.S. steel company, so I cannot presume to know whether purchasing slab from another country that subsidizes its steel industry is the best decision for the company. As a legislator, however, I do know that something is seriously wrong with our trade laws or the enforcement of those laws when one American steel company after another decides that it must purchase steel from abroad, thus jeopardizing more American jobs. I also know that we have a crisis on our hands if we continue to permit this to occur.

Perhaps part of the reason there is only a muted objection to these events is that steel and other basic industries are not as popular as they once were. There is a new kid in town and he is called high technology—our latest economic messiah. While this industry may promise solid earnings, they are not long-term earnings. Already, one computer company announced it was moving part of its production facilities overseas where costs are lower.

Do we have such a poor memory that we forget the essential role steel has played in American history? For over a century, steel plants have been supplying us with materials to construct railroads, bridges, ships, buildings, and later, cars and airplanes. When this country was dragged into war, steel played an integral part in preparing us for the task. Do we expect now in the 1980's that we have no further need of railroads, cars, planes, buildings, and roads? As we watch our infrastructure crumble, do we expect to rebuild without a domestic steel supply?

During the oil crisis in the 1970's, we quickly realized how much we depended upon foreign oil and how vulnerable we were to countries that sold us the oil. I we fail to take corrective action, soon we may relive that type of experience.

My concern is not bluff; there are currently 300 companies in 299 communities producing some type of steel product in this country today. Since 1974, however, over 200 facilities have been permanently shut down. Steel capacity, as I mentioned earlier, is just over 50 percent. Some aspects of the steel industry desperately need more modern equipment and techniques in order to remain competitive, yet since 1980 steel companies have been able to afford only half of the capital investments they anticipated.

Clearly we have a problem. Either we get up from the trade table and quit or we must modify our strategy so we succeed. The former choice is not a realistic alternative; we cannot sacrifice our basic industries when so much of our defense capabilities and fundamental domestic needs depend upon U.S. steel.

To protect our own interests, we must continue to manufacture steel—and every phase of the steel production process. We must stay in the game and we must win.

The challenge is a serious one, the stakes are high, but a country such as ours does not accept defeat.

What, then, should we do? As a first step, we should impose quotas on imported steel, thus giving our steel companies an opportunity to modernize. Today, I join other Members of the Steel Caucus in introducing legislation that imposes an 11 percent import limitation on total expected apparent domestic steel consumption per year for a period of 5 years. This legislation does not permit the steel companies to use this import protection as a means of earning more capital to invest in other industries. This quota will be imposed subject to the finding by the Secretary of Commerce that the quota's beneficiaries are in fact modernizing their plants.

Those of us who are concerned over the health of our basic industries should not be intimidated by the free trade rhetoric that is currently epidemic. Unfair foreign trade practices do exist—even the Reagan administration has agreed to impose quotas on specialty steel products in response to unfair foreign trade practices exercised on that industry. As we move from a domestic to an international economy, we must address the problem of foreign governments' subsidies of their industries. It is essential we not lose sight of the fact that subsidized trade is not free trade.

Due to the size of the American market and U.S. trade laws that encourage targeting by other nations, it

is not surprising that other countries are willing to subsidize their industries and sell their products here at a loss to capture a share of our market.

Quota legislation is an appropriate response to this problem because it leaves a share of the market open to foreign competition without further threatening American jobs. Without measures such as this legislation, domestic companies will continue to have to prove subsidy and injury in order to receive any remedial assistance from our Government, such as the imposition of quotas or countervailing duties. Unfortunately, as too many American companies have discovered, most of the facts necessary to prove subsidy and injury are in the hands of the foreign competitors. Thus quota legislation such as the bill introduced today is a necessary and positive step toward the revitalization of our basic industries.

Second, Congressman JONES has introduced legislation, which I have supported, to permit ailing industries, such as steel, to take advantage of their accumulated investment tax credits. With the massive losses of the steel industry over the last few years, the investment tax credits have been useless. Representative JONES' plan is to permit companies with unused tax credits to use the credits as a loan now, rather than waiting until they are again profitable to benefit from the credits.

Third, I propose we develop a rational and consistent national industrial policy.

As part of this policy, the Federal Government should provide research and development funds for basic industry to the same extent that we are currently providing research moneys for our new high tech industries. If we are going to succeed, we must be the best manufacturer of the product with the most modern technology available. It is too late for our steel companies to merely play "catchup"—we must leapfrog over our competitors to a better way of producing fine steel products.

We were once known as the best source of steel in the world, and we can be again if the Federal Government acknowledges its role to provide research assistance to an essential industry that will never fully recuperate without it.

In addition, there are broader issues we must address. The current exchange rates for some currencies, including our own dollar and the Japanese yen, place our products at a disadvantage. Overvaluation of the dollar makes our products comparatively expensive, while, for example, undervaluation of the yen makes Japanese products relatively less expensive and therefore more attractive.

Interest rates also remain unacceptably high, and are continuing to climb. We desperately need to synchronize our monetary and fiscal policies to permit a recovery at all ends of the economic scale.

We are today faced with a crisis in our basic industries. While we have focused on the steel industry today, it is but one of a host of industries that are similarly situated. We must act now or fold our hands and retreat into greater dependence upon the other nations. We must recognize there are new international trade rules and we must learn to play by those rules while continuing to compete fairly and in a manner consistent with our great heritage. We can succeed but we must act now.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. WORTLEY) to revise and extend their remarks and include extraneous material:)

Mr. DANNEMEYER, for 30 minutes, today.

Mr. DANNEMEYER, for 30 minutes, on August 2.

(The following Members (at the request of Mr. DYSON) to revise and extend their remarks and include extraneous material:)

Mr. ANNUNZIO, for 5 minutes, today.
Mr. GONZALEZ, for 30 minutes, today.
Mr. NICHOLS,
Mr. BROOKS, for 5 minutes, today.
Mr. WISE, for 60 minutes, today.
Mr. LELAND, for 5 minutes, today.
Mrs. SCHROEDER, for 5 minutes, today.
Ms. FERRARO, for 5 minutes, today.
Mr. ERDREICH, for 5 minutes, today.
Mr. NELSON, for 5 minutes, today.
Mr. FASCELL, for 5 minutes, today.
Mr. ACKERMAN, for 5 minutes, today.
Mr. PEPPER, for 5 minutes, today.
Mr. ALEXANDER, for 30 minutes, on August 2, 3 and 4.
Mr. PANETTA, for 5 minutes, today.
Mr. FRANK, for 60 minutes, on August 3.
Mr. PEASE, for 30 minutes, on September 13.

(The following Member (at his own request) to revise and extend his remarks and include extraneous material:)

Mr. MOLLOHAN, for 60 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. DAUB, prior to passage of H.R. 3677.

Mr. MORRISON of Connecticut and Mr. GILMAN, to revise and extend prior to the vote on H.R. 1646.

Mr. HUBBARD, during general debate on H.R. 1646 in the Committee of the Whole today.

Mr. PORTER, in opposition to House Resolution 256 during debate on that resolution today.

Mr. LEVIN of Michigan, during consideration of H.R. 3409.

Mr. DYSON, during consideration of H.R. 1643 today.

Mr. KOSTMAYER, during the special order of Mr. GAYDOS today.

(The following Members (at the request of Mr. WORTLEY) and to include extraneous matter:)

Mr. FIELDS.
Mr. MICHEL.
Mr. FRANKLIN.
Mr. MCGRATH.
Mr. CORCORAN.
Mr. HYDE.
Mr. GEKAS in two instances.
Mr. SMITH of New Jersey in two instances.
Mr. GREEN.
Mr. GRADISON.
Mr. ROTH.

(The following Members (at the request of Mr. DYSON) and to include extraneous matter:)

Mr. ANDERSON in 10 instances.
Mr. GONZALEZ in 10 instances.
Mr. BROWN of California in 10 instances.
Mr. ANNUNZIO in six instances.
Mr. JONES of Tennessee in 10 instances.
Mr. BONER of Tennessee in five instances.
Mr. LLOYD in five instances.
Mr. HAMILTON in 10 instances.
Mr. LIPINSKI.
Mr. BATES.
Mr. MARKEY in four instances.
Mr. RICHARDSON.
Mr. BOLAND in two instances.
Mr. ZABLOCKI.
Mr. VANDERGRIFF.
Mr. COYNE.
Mr. HUTTO.
Mr. DE LA GARZA.
Mr. TORRICELLI.
Mr. FORD of Michigan in two instances.
Mr. RANGEL.
Mr. ROWLAND.
Mr. GIBBONS.
Mr. DOWNEY of New York.
Mr. LEHMAN of California.
Mr. ERDREICH.
Mr. AKAKA.

ENROLLED BILL SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined

and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker pro tempore:

H.R. 3069. An act making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes.

ENROLLED JOINT RESOLUTION SIGNED

Mr. HAWKINS, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a joint resolution of the House of the following title, which was thereupon signed by the Speaker:

H.J. Res. 321. Joint resolution to proclaim a day of national celebration of the two hundredth anniversary of the signing of the Treaty of Paris.

BILL AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on July 29, 1983, present to the President, for his approval, a bill and a joint resolution of the House of the following titles:

H.R. 3069. An act making supplemental appropriations for the fiscal year ending September 30, 1983, and for other purposes.

H.J. Res. 139. An act to designate the week beginning June 24, 1984, as "Federal Credit Union Week."

□ 2140

ADJOURNMENT

Mr. MOLLOHAN. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 9 o'clock and 42 minutes p.m.), the House adjourned until tomorrow, Tuesday, August 2, 1983, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1642. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense articles to Saudi Arabia (Transmittal No. 83-48), pursuant to 10 U.S.C. 133b; to the Committee on Armed Services.

1643. A letter from the Chairman, Council of the District of Columbia, District of Columbia Act 5-60, "Cable Television Communications Act of 1981 Clarification Amendment Act of 1983," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

1644. A letter from the Secretary of Education, transmitting proposed final regulations for the Indian fellowship program, pursuant to section 431(d) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

1645. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense articles and services to Saudi Arabia (Transmittal No. 83-48), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1646. A letter from the Executive Secretary, Federal Reserve Employee Benefits System, transmitting the annual report for the plan for the year ending December 31, 1982, pursuant to 31 U.S.C. 9503(a)(B); to the Committee on Government Operations.

1647. A letter from the Clerk of the U.S. House of Representatives, transmitting his report pursuant to House Resolution 289 (H. Doc. No. 98-90); to the Committee on House Administration and ordered to be printed.

1648. A letter from the Clerk, U.S. Court of Claims, transmitting copies of the hearing officers' opinions and the opinion and report of the review panel concerning congressional reference cases nos. 5-74 and 2-75, pursuant to 28 U.S.C. 2509; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

[Omitted from the Record of July 29, 1983]

Mr. DINGELL: Committee on Energy and Commerce. H.R. 2453. A bill to amend the Board for International Broadcasting Act of 1973 to provide for radio broadcasting to Cuba; with amendments (Rept. No. 98-284, Pt. II). Referred to the Committee of the Whole House on the State of the Union.

[Submitted August 1, 1983]

Mr. HOWARD: Committee on Public Works and Transportation. H.R. 1761. A bill to amend title I of the Marine Protection, Research, and Sanctuaries Act of (Rept. No. 98-200 Pt. II). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. S. 46. A bill to revise, consolidate, and enact certain laws related to vessels and seamen as subtitle II of title 46, United States Code, "Shipping"; with an amendment (Rept. No. 98-338). Referred to the Committee of the Whole House on the State of the Union.

Mr. JONES of North Carolina: Committee on Merchant Marine and Fisheries. H.R. 2853. A bill to establish a National Oceans Policy Commission to make recommendations to Congress and the President on comprehensive national oceans policy; with an amendment (Rept, No. 89-339, Pt. I). Ordered to be printed.

REPORTED BILLS SEQUENTIALLY REFERRED

Under clause 5 of rule X, bills and reports were delivered to the Clerk for printing, and bills referred as follows:

Mr. UDALL: Committee on Interior and Insular Affairs. S. 64. A bill to establish the Irish Wilderness in Mark Twain National Forest, Mo., with an amendment; referred to the Committee on Agriculture for a period ending not later than 2 p.m., Monday, August 1, 1983 for consideration of such provisions of the bill and amendment as fall within the jurisdiction of that committee pursuant to clause 1(a), rule X (Rept. No 98-337, pt. I). Ordered to be printed.

SUBSEQUENT ACTION ON A REPORTED BILL SEQUENTIALLY REFERRED

Under clause 5 of rule X, the following action was taken by the Speaker:

Referral of S. 64 to the Committee on Agriculture discharged, referred to the Committee of the Whole House on the State of the Union, and ordered to be printed.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. BEREUTER:

H.R. 3724. A bill to amend the Internal Revenue Code of 1954 to extend for 1 year the provisions under which tax-exempt bonds may be issued for housing purposes; to the Committee on Ways and Means.

By Mr. BROOKS:

H.R. 3725. A bill to amend title 28, United States Code, the Controlled Substances Act, the Tariff Act of 1930, and the Immigration and Nationality Act to establish special funds for vessels, vehicles, and aircraft seized by certain Federal law enforcement agencies, and for other purposes; jointly, to the Committees on the Judiciary, Ways and Means, and Energy and Commerce.

By Mr. BROOKS (by request):

H.R. 3726. A bill to amend the act of May 27, 1955, to increase the effectiveness of domestic firefighting forces and to insure prompt and effective control of wildfires on Federal lands by permitting the use of firefighting forces of foreign nations and the reimbursement of such forces for costs incurred in fighting wildfires throughout the United States, and for other purposes; jointly, to the Committees on Government Operations and Foreign Affairs.

By Mr. DOWNEY of New York (for himself and Mr. GRADISON):

H.R. 3727. A bill to eliminate import quotas on sugar; to the Committee on Ways and Means.

By Mr. GAYDOS (for himself, Mr. MURTHA, Mr. REGULA, Mr. HILLIS, Mr. APPLEGATE, Mr. OBERSTAR, Mr. MOLLOHAN, Mrs. HALL of Indiana, Mr. BEVILL, Mr. COYNE, Mr. KOLTER, Mr. RAHALL, Ms. KAPTUR, Mr. MURPHY, Mr. WALGREN, Mr. YATRON, Mr. NOWAK, Mr. WILLIAMS of Ohio, and Mr. HARRISON):

H.R. 3728. A bill to provide for orderly trade in certain carbon and alloy steel and stainless steel products, to reduce unemployment, and for other purposes; to the Committee on Ways and Means.

By Mr. MAZZOLI (for himself, Mr. SAM B. HALL, JR., Mr. FRANK, Mr. CROCKETT, Mr. SMITH of Florida, Mr. LUNGREN, Mr. MCCOLLUM, and Mr. FISH):

H.R. 3729. A bill to amend the Immigration and Nationality Act to extend for 2 years the authorization of appropriations for refugee assistance, and for other purposes; to the Committee on the Judiciary.

By Mr. MONTGOMERY (by request):

H.R. 3730. A bill to transfer custodianship and operating responsibility for Pershing Hall in Paris, France, and provide for its administration as a memorial; to the Committee on Veterans' Affairs.

By Mr. VANDER JAGT:

H.R. 3731. A bill to extend temporary suspension of duties on certain clock radios until September 30, 1987; to the Committee on Ways and Means.

By Mr. WOLPE (for himself and Mr. VANDER JAGT):

H.R. 3732. A bill to amend the Tax Reform Act of 1969 with respect to the application of the excess business holding provisions to private foundations; to the Committee on Ways and Means.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII,

PRIVATE RESOLUTIONS

Mr. HYDE introduced a private resolution (H. Res. 294) to refer H.R. 3685 to the Chief Commissioner of the U.S. Claims Court, which was referred to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 765: Mr. BARTLETT, Mr. GRAMM, and Mr. BATEMAN.

H.R. 891: Mr. JONES of North Carolina and Mr. RAHALL.

H.R. 965: Mr. MCCANDLESS.

H.R. 1092: Mr. SCHAEFER.

H.R. 1315: Mr. KASTENMEIER, Mr. KEMP, Mr. LANTOS, Mr. MCEWEN, Mr. O'BRIEN, Ms. OAKAR, Mr. SCHAEFER, Mr. SLATTERY, Mr. TALLON, and Mr. WOLPE.

H.R. 1415: Mr. AKAKA.

H.R. 1417: Mr. NEAL, Mr. WEISS, Mr. WEAVER, and Mr. WISE.

H.R. 1543: Mr. TOWNS and Mr. STOKES.

H.R. 2225: Mr. NATCHER and Mr. BARTLETT.

H.R. 2490: Mr. CARPER.

H.R. 2564: Mr. BARNARD, Mr. CHANDLER, Mr. CHAPPELL, Mr. COATS, Mr. DANIEL, Mr. DANNEMEYER, Mr. DREIER of California, Mr. FAZIO, Mr. FORSYTHE, Mr. GINGRICH, Mr. GREGG, Mr. SAM B. HALL, JR., Mr. HAMMERSCHMIDT, Mr. HILER, Mr. HORTON, Mr. JENKINS, Mr. JONES of North Carolina, Mr. KEMP, Mr. KOGOVSEK, Mr. LEATH of Texas, Mr. LIVINGSTON, Mr. LUJAN, Mr. LUNGREN, Mr. MCCANDLESS, Mr. MARTIN of New York, Mr. MINISH, Mr. NIELSON of Utah, Mr. NEAL, Mr. PANETTA, Mr. PARRIS, Mr. PASHAYAN, Mr. RUDD, Mr. ROBERTS, Mr. SHELBY, Mr. SHUMWAY, Mr. STANGELAND, Mr. STENHOLM, Mr. WHITLEY, Mr. WON PAT, and Mr. VANDERGRIFF.

H.R. 2567: Mr. COELHO and Mr. BEREUTER.

H.R. 2817: Mr. MURTHA.

H.R. 2837: Mr. TALLON, Mr. D'AMOURS, Mr. AKAKA, Mr. CORRADA, Mr. CRAIG, Mr. HEFTEL of Hawaii, and Mr. HAMMERSCHMIDT.

H.R. 3081: Mr. RUDD and Mr. CHENEY.

H.R. 3112: Mr. LEVIN of Michigan.

H.R. 3292: Mr. BRITT.

H.R. 3362: Mr. BEREUTER.

H.R. 3387: Mr. EDWARDS of California, Mr. LEHMAN of California, Mr. JEFFORDS, and Mr. TORRICELLI.

H.R. 3408: Mr. FORSYTHE.

H.R. 3563: Mr. WON PAT, Mr. GINGRICH, Mr. KEMP, and Mr. STANGELAND.

H.R. 3586: Mr. ECKART, Mr. SEIBERLING, Mr. APPLEGATE, Mr. REGULA, Mr. LUKEN, Mr. DEWINE, Mr. WILLIAMS of Ohio, Ms. OAKAR, and Mr. STOKES.

H.R. 3591: Mr. GAYDOS and Mr. FRANK.

H.R. 3642: Mr. GRADISON, Mr. ROE, Mr. ACKERMAN, Mr. GREEN, Mr. FLIPPO, Mr. SAM B. HALL, JR., Mr. BEILENSON, Mr. D'AMOURS, Mr. MOLLOHAN, Mr. RUSSO, Mr. LAFALCE, Mrs. KENNELLY, Mr. LELAND, Mrs. BOXER, Mr. MATSUI, Mr. RICHARDSON, Mr. WYDEN, Mr. LENT, Mr. EMERSON, Mr. TALLON, Mr. CLARKE, and Mr. PEPPER.

H.R. 3643: Mr. CORRADA, Mr. BRITT, Mr. SPRATT, and Mr. BOEHLERT.

H.R. 3678: Mr. MOLINARI and Mr. AUCOIN.

H.J. Res. 3: Mr. WHEAT, Mr. BOSCO, Mr. LUNDINE, Mr. LEVINE of California, Mr. HOWARD, Mr. ECKART, Mr. SHANNON, Mr. MILLER of California, Mr. SMITH of Iowa, Mrs. BURTON of California, Mr. HOYER, Mr. FAZIO, Mr. SAVAGE, and Mr. ROYBAL.

H.J. Res. 179: Mr. JEFFORDS, Mr. CAMPBELL, and Mr. WIRTH.

H.J. Res. 205: Mr. GOODLING and Mr. WAXMAN.

H.J. Res. 243: Mr. CORCORAN and Mr. PAUL.

H.J. Res. 295: Mr. ANDREWS of Texas, Mr. AUCOIN, Mr. BARNARD, Mr. BARNES, Mr. BATES, Mr. BENNETT, Mr. BOUCHER, Mr. BROOKS, Mr. BRYANT, Mr. CARPER, Mr. CONYERS, Mr. DANIEL B. CRANE, Mr. DAVIS, Mr. DICKINSON, Mr. DICKS, Mr. DOWDY of Mississippi, Mr. DYSON, Mr. EMERSON, Mr. ENGLISH, Mr. FASCELL, Mr. GIBBONS, Mr. HANCE, Mr. HARKIN, Mr. HATCHER, Mr. HEFTEL of Hawaii, Mr. HIGHTOWER, Mrs. HOLT, Mr. JONES of North Carolina, Mr. KASTENMEIER, Mr. KAZEN, Mr. LEATH of Texas, Mr. LEHMAN of Florida, Mr. LEVINE of California, Mr. LONG of Maryland, Mr. MARTIN of New York, Mr. MARTINEZ, Mr. MATSUI, Mr. MCCOLLUM, Mr. MCDONALD, Mr. MCHUGH, Mr. MINETA, Mr. NATCHER, Mr. NICHOLS, Mr. NIELSON of Utah, Mr. PASHAYAN, Mr. RAHALL, Mr. ROBERTS, Mr. ROWLAND, Mrs. SCHNEIDER, Mr. SHAW, Mr. SNYDER, Mr. SPENCE, Mr. STANGELAND, Mr. STOKES, Mr. STUMP, Mr. TAUKE, Mr. THOMAS of Georgia, Mr. WHEAT, Mr. WILSON, and Mr. YOUNG of Alaska.

H. Res. 192: Mr. BOUCHER.

H. Res. 278: Mr. MCKINNEY, Mr. SUNIA, Mr. HANSEN of Idaho, Mr. CORRADA, Mr. PATMAN, Mr. FORSYTHE, Mr. MADIGAN, Mr. KEMP, Mr. ANNUNZIO, and Mr. NIELSON of Utah.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

179. By the SPEAKER: Petition of the Association of Pacific Island Legislatures (APIL), Agana, Guam, relative to continuing legal services in Micronesia upon termination of the trusteeship; to the Committee on the Judiciary.

180. Also, petition of the Association of Pacific Island Legislatures (APIL), Agana, Guam, relative to pursuing war claims for the people of Guam with the U.S. Government; to the Committee on the Judiciary.

181. Also, petition of Association of the Pacific Island Legislatures (APIL), Agana, Guam, relative to a comprehensive economic policy; jointly, to the Committees on Interior and Insular Affairs, Foreign Affairs, Banking, Finance and Urban Affairs, and Ways and Means.

182. Also, petition of the Board of Aldermen, Somerville, Mass., relative to the removal of contaminated fill; to the Committee on Public Works and Transportation.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 2230

(Amendment in the nature of a substitute)

By Mr. SENSENBRENNER:

—Strike out all after the enacting clause and insert in lieu thereof the following:

That this Act may be cited as the "Civil Rights Commission Reauthorization Act of 1983".

ESTABLISHMENT OF TERMS FOR MEMBERS OF THE COMMISSION

SEC. 2. Section 101 of the Civil Rights Act of 1957 (42 U.S.C. 1975) is amended by adding at the end thereof the following:

"(f)(1) Upon vacancies in the Commission after the date of the enactment of this subsection, members of the Commission shall be appointed for a term of six years except that, of the members first appointed to such vacancies—

"(A) two, not affiliated with the same political party, shall be appointed for a term of two years;

"(B) two, not affiliated with the same political party, shall be appointed for a term of four years; and

"(C) two, not affiliated with the same political party, shall be appointed for a term of six years.

"(2) After the date of the enactment of this subsection, an individual appointed to fill a vacancy occurring other than by the expiration of a term of office shall be appointed to the unexpired term of the member such individual succeeds.

"(g) A commissioner may be removed by the President only for inefficiency, neglect of duty, or malfeasance in office.".

EXTENDING THE LIFE OF THE COMMISSION

SEC. 3. Section 104(c) of the Civil Rights Act of 1957 (42 U.S.C. 1975c(c)) is amended by striking out "1983" and inserting "2003" in lieu thereof.

AUTHORIZATION OF APPROPRIATIONS

SEC. 4. Section 106 of the Civil Rights Act of 1957 (42 U.S.C. 1975e) is amended to read as follows:

"AUTHORIZATION OF APPROPRIATIONS

"SEC. 106. There are authorized to be appropriated to carry out this Act $13,000,000 for the fiscal year ending September 30, 1984, and such sums as may be necessary for each of the following nineteen fiscal years.".

H.R. 2867

By Mr. BREAUX:

—Page 11, strike out line 18 and all that follows down through line 5 on page 12 and substitute the following:

"(b) LAND DISPOSAL OF CERTAIN HAZARDOUS WASTE.—(1)(A) Not later than February 1, 1984, the placement of containerized liquid hazardous waste in landfills or salt dome formations is prohibited.

"(B) Not later than February 1, 1984, the placement of bulk or noncontainerized liquid hazardous waste in landfills which do not meet the requirements of 40 CFR 265.314 as in effect on July 27, 1983, salt dome formations, underground mines, or caves is prohibited.

"(C) Effective six months after the date of enactment of this subsection, the placement of bulk or noncontainerized liquid hazardous waste in any landfill is prohibited.

"(D) Effective one year after the date of enactment of this subsection, the placement of any liquid which is not a hazardous waste in a landfill for which a permit is required under subsections 3005(c) or (e) is prohibited.

"(E) Beginning two years after the date of enactment of this subsection, no hazardous waste listed or identified under Section 3001 as of the date of enactment may be placed or maintained in a surface impoundment which does not meet the requirements of subsection (k) (as established in Section 21 of these amendments) for new surface impoundments. For any hazardous wastes identified or listed under Section 3001 after the date of enactment, the placement or maintenance of such wastes into a surface impoundment which does not meet the requirements of subsection (k) (as established in Section 21 of these amendments) within two years after such listing or identification is also prohibited.

"(2) Effective on the date of enactment, for hazardous waste listed or identified under Section 3001, other than those covered by the prohibitions in paragraph (1), there shall be no placement of such waste into salt dome formations, underground mines, or caves until such time as the Administrator has issued permit standards under this subtitle for such facilities and a permit has been issued pursuant to Section 3005(c).

"(3) Prior to February 1, 1984, the Administrator shall maintain the requirements (as in effect on April 30, 1983) in regulations under Section 3004 respecting the disposal in landfills of liquid hazardous wastes and free liquids contained in hazardous wastes.".

On page 14, line 18, insert after the period the following sentence:

"In making the determinations contained in this paragraph, the Administrator may not modify the prohibitions set forth in subsection (b) of this Section.".

On page 17, line 10, insert after the period the following sentence:

"In the case of agencies or instrumentalities of the federal government, no other effective date established by the Administrator shall be later than 18 months after the effective date specified in subparagraph (A).".

On page 18, strike the closing quotation marks on line 2, and insert the following subsections:

"(g) DEFINITIONS.—As used in this Section, the terms

"(1) 'Land disposal' means—

"(A) the placement of hazardous waste on or into the land, including but not limited to the placement of such wastes in a salt dome formation, landfill, surface impoundment, waste pile, injection well, land spreading method, coburial with solid wastes, or storage in drums, tanks or other vessels, except:

"(i) where storage in drums, tanks or other vessels is performed to allow the accumulation of such quantities as to facilitate proper treatment, recovery, or disposal; or

"(ii) if the hazardous waste is placed in a surface impoundment for treatment, such impoundment meets the design standards for new impoundments; and,

"(iii) where treatment residues which are hazardous wastes are removed for subsequent processing or disposal within one year of such placement.

"(2) 'liquid hazardous waste' means those hazardous wastes which are identified or listed by the Administrator pursuant to section 3001 which the Administrator determines to be in liquid form or to contain free liquids, including those liquid hazardous waste to which absorbents have been added.

"(h) AIR EMISSIONS FROM LAND DISPOSAL FACILITIES.—Not later than two years after the date of enactment of this subsection, the Administrator shall promulgate regulations for the monitoring and control of air emissions at hazardous waste storage treatment and land disposal facilities, including but not limited to open tanks, surface impoundments, and landfills, as may be necessary to protect human health and the environment.".

On page 58, line 14, after the period insert the following:

"(c) FEDERAL FACILITY INSPECTIONS.—Beginning one year after the date of enactment of this subsection, the Administrator shall, or in the case of a State with an authorized hazardous waste program the State shall, undertake no less often than every year a thorough inspection of each facility for the treatment, storage, or disposal of hazardous waste which is operated by a Federal agency as to its compliance with this subtitle and the regulations promulgated thereunder. The records of such inspections shall be available, consistent with section 1006, to the public as provided in Section 3007(c).

"(d) FEDERAL AGENCY HAZARDOUS WASTE FACILITY INVENTORY.—Each Federal agency shall, within one year after the date of enactment of this subsection, undertake a continuing program to compile, publish, and submit to the Administrator, and the State in the case of States having an authorized hazardous waste program, an inventory describing the location of each site which the Federal agency owns or operates or has owned or operated where hazardous waste is being stored or has been or is being disposed of. The initial report shall be submitted within two years of the date of enactment of these amendments and shall be updated no less frequently than every two years thereafter. Such inventory shall contain—

"(1) a description of the location of the sites at which any such storage or disposal has taken place before or after the date on which permits are required under Section 3005 for such storage or disposal;

"(2) such information relating to the amount, nature, and toxicity of the hazardous waste at each such site as may be practicable to obtain and as may be necessary to determine the extent of any health hazard which may be associated with such site'

"(3) the name and address and responsible agency for each such site, determined as of the date of preparation of the inventory;

"(4) an identification of the types of techniques of waste treatment or disposal which have been used at each site; and

"(5) information concerning the current status of the site, including information respecting whether or not hazardous waste is currently being treated or disposed of at such site (and if not, the date on which such activity ceased) and information respecting the nature of any other activity currently carried out at such site.".

—Page 11, strike out line 18 and all that follows down through line 5 on page 12 and substitute the following:

"(b) LAND DISPOSAL OF CERTAIN HAZARDOUS WASTE.—(1)(A) Not later than February 1, 1984, the placement of containerized liquid hazardous waste in landfills or salt dome formations is prohibited.

"(B) Not later than February 1, 1984, the placement of bulk or noncontainerized liquid hazardous waste in landfills which do not meet the requirements of 40 CFR 265.314 as in effect on July 27, 1983, salt dome formations, underground mines, or caves is prohibited.

"(C) Effective six months after the date of enactment of this subsection, the placement of bulk or noncontainerized liquid hazardous waste in any landfill is prohibited.

"(D) Effective one year after the date of enactment of this subsection, the placement of any liquid which is not a hazardous waste in a landfill for which a permit is required under subsections 3005 (c) or (e) is prohibited.

"(2) Effective on the date of enactment, for hazardous waste listed or identified under Section 3001, other than those covered by the prohibitions in paragraph (1), there shall be no placement of such waste into salt dome formations, underground mines, or caves until such time as the Administrator has issued permit standards under this subtitle for such facilities and a permit has been issued pursuant to Section 3005(c).

"(3) Prior to February 1, 1984, the Administrator shall maintain the requirements (as in effect on April 30, 1983) in regulations under Section 3004 respecting the disposal in landfills of liquid hazardous wastes and free liquids contained in hazardous wastes.".

On page 14, line 18, insert after the period the following sentence:

"In making the determinations contained in this paragraph, the Administrator may not modify the prohibitions set forth in subsection (b) of this section.".

On page 17, line 10, insert after the period the following sentence:

"In the case of agencies or instrumentalities of the federal government, no other effective date established by the Administrator shall be later than 18 months after the effective date specified in subparagraph (A).".

On page 18, strike the closing quotation marks on line 2, and insert the following subsections:

"(g) DEFINITIONS.—As used in this Section, the terms

"(1) 'Land disposal' means—

"(A) the placement of hazardous waste on or into the land, including but not limited to the placement of such wastes in a salt dome formation, landfill, surface impoundment, waste pile, injection well, land spreading method, coburial with solid wastes, or storage in drums, tanks or other vessels, except:

"(i) where storage in drums, tanks or other vessels is performed to allow the accumulation of such quantities as to facilitate proper treatment, recovery, or disposal; or

"(ii) if the hazardous waste is placed in a surface impoundment for treatment, such impoundment meets the design standards for new impoundments; and,

"(iii) where treatment residues which are hazardous wastes are removed for subsequent processing or disposal within one year of such placement.

"(2) 'liquid hazardous waste' means those hazardous wastes which are identified or listed by the Administrator pursuant to section 3001 which the Administrator determines to be in liquid form or to contain free liquids, including those liquid hazardous waste to which absorbents have been added.

"(h) AIR EMISSIONS FROM LAND DISPOSAL FACILITIES.—Not later than two years after the date of enactment of this subsection, the Administrator shall promulgate regulations for the monitoring and control of air emissions at hazardous waste storage treatment and land disposal facilities, including but not limited to open tanks, surface impoundments, and landfills, as may be necessary to protect human health and the environment.".

On page 58, line 14, after the period insert the following:

"(c) FEDERAL FACILITY INSPECTIONS.—Beginning one year after the date of enactment of this subsection, the Administrator shall, or in the case of a State with an authorized hazardous waste program the State shall, undertake no less often than every year a thorough inspection of each facility for the treatment, storage, or disposal of hazardous waste which is operated by a Federal agency as to its compliance with this subtitle and the regulations promulgated thereunder. The records of such inspections shall be available, consistent with Section 1006, to the public as provided in Section 3007(c).

"(d) FEDERAL AGENCY HAZARDOUS WASTE FACILITY INVENTORY.—Each Federal agency shall, within one year after the date of enactment of this subsection, undertake a continuing program to compile, publish, and submit to the Administrator, and the State in the case of States having an authorized hazardous waste program, an inventory describing the location of each site which the Federal agency owns or operates or has owned or operated where hazardous waste is being stored or has been or is being disposed of. "(5) information concerning the current status of the site, including information respecting whether or not hazardous waste is currently being treated or disposed of at such site (and if not, the date on which such activity ceased) and information respecting the nature of any other activity currently carried out at such site.".

By Mr. TAUZIN:

—Sec. 21. Section 3004 is amended by inserting the following at the end thereof:

(k) MINIMUM REQUIREMENTS FOR CERTAIN FACILITIES.—

(1)(A) Except as provided in Subparagraph (B), each landfill or surface impoundment for which an application for a permit under Section 3005 (c) is received by the Administrator after the date of the enactment of the Act of 1983, shall be required (as a condition of receiving such permit) to be double lined and to monitor ground water.

(B) With respect to each landfill or surface impoundment containing those solid wastes subject to the study required under section 8002 (f) or (p) and which landfill or surface impoundment becomes subject to regulation under this subchapter, standards promulgated under subsection (a) for such facility shall require the monitoring of groundwater and such other standards as the Administrator may determine are necessary to assure the protection of human health and the environment; and

H.R. 2780

By Mr. LEVIN of Michigan:

—Page 2, after line 22, insert the following new section (and redesignate the succeeding sections and references thereto accordingly):

COMPUTATIONS OF ENTITLEMENT USING REPRESENTATIVE TAX SYSTEM

SEC. 5. Section 6707 of title 31, United States Code, is amended—

(1) by striking out subparagraph (B) of subsection (b)(2) and inserting in lieu thereof the following:

"(B) the fiscal capacity of the State and of all units of general local government located in such State, as determined by the Secretary by means of the representative tax system developed pursuant to subsection (f).";

(2) by striking out subparagraphs (A) and (B) of subsection (b)(3) and inserting in lieu thereof the following:

"(A) the numerator is the per capita fiscal capacity of the United States, as determined by the Secretary by means of the representative tax system developed pursuant to subsection (f); and

"(B) the denominator is the per capita fiscal capacity of the State, as determined by the Secretary by such means.";

(3) by striking out clauses (i) and (ii) of subsection (c)(2)(A) and inserting in lieu thereof the following:

"(i) the numerator is the per capita fiscal capacity of the United States, as determined by the Secretary by means of the representative tax system developed pursuant to subsection (f); and

"(ii) the denominator is the per capita fiscal capacity of the State, as determined by the Secretary by such means, bears to"; and

(4) by adding at the end thereof the following new subsections:

"(e) The amount allocated to any State under this subsection (b) or (c) of this section as a consequence of the amendments made by section 5 of the State and Local Fiscal Assistance Amendments of 1983 shall not exceed by more than 10 percent the amount which would be allocated to such State if such amendments had not been enacted.

"(f)(1) The term 'representative tax system' means a method of determining the fiscal capacity of a government by estimating the amount of revenue that such government would raise if it applied a national uniform set of tax rates to a specified set of tax bases.

"(2) The Secretary, in consultation with the Secretary of Commerce, the Secretary of the Interior, the Comptroller General of the United States, and the Advisory Commission on Intergovernmental Relations, shall develop a representative tax system similar to the representative tax system described in the March 1982 report of such Commission entitled 'Tax Capacity of the Fifty States: Methodology and Estimates'. The Secretary of Commerce shall collect whatever data and statistical estimates are necessary to develop and implement such a system.

"(3) When the Secretary has developed a representative tax system under subparagraph (2), or proposes to amend such system, the Secretary shall, in accordance with the provision of section 553 of title 5, United States Code, provide public notice of such system or amendment and an opportunity to interested persons to comment on such system or amendment. A report on such system or amendment shall be submitted to the Committee on Finance of the Senate and the Committee on Government Operations of the House of Representatives as soon as practicable after the period for receiving comments from interested persons has ended.

"(4) After compliance with the requirements of subparagraph (3), a representative tax system developed under subparagraph (2), and any amendment made to such system, shall take effect not sooner than 45 days after publication in final form in the Federal Register and concurrent transmittal to each House of the Congress.

"(5) Until the Secretary has developed a representative tax system under subparagraph (2), the Secretary shall use the representative tax system and data provided in the most recently revised version of the March 1982 report described in subparagraph (2).".

Page 8, beginning on line 5, strike out all of section 9 through line 14 on page 10 and redesignate the succeeding section accordingly.

—Page 9, strike out lines 10 through 12, and on lines 13 and 18, redesignate paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

Page 9, strike out lines 21 through 23, and on line 24, redesignate subsection (c) as subsection (b).

Page 10, line 1, strike out "subsection (a)(3)" and insert in lieu thereof "subsection (a)(1)"; on line 7, strike out "subsections (a)(1) and (2)" and insert in lieu thereof "subsection (a)(1)"; and on line 12, strike out "subsection (a)(3)" and insert in lieu thereof "subsection (a)(2)".

REPAYMENT OF LOANS IN DEFAULT

SEC. 308. The Bretton Woods Agreement Act (22 U.S.C. 286 et seq.) is amended by adding at the end thereof the following:

"REPAYMENT OF LOANS IN DEFAULT

"SEC. 46. All funds contributed to the Fund by the United States pursuant to section 40 shall be used immediately and exclusively to repay loans which are in default to depository institutions chartered in the United States.".

H.R. 3021

By Mr. DANNEMEYER:

(Amendment to the amendment in the nature of a Substitute (text of H.R. 3521).

—Page 18, after line 25, insert the following new paragraph:

"(4) None of the funds provided to a State under this part shall be used to provide abortion counseling or referral.".

—Page 2, line 11, insert "obtained from existing revenue sources and shall be" before "used".

Page 3, after line 21, insert the following new subsection:

"(c)(1) Within 90 days after the date of the enactment of this part, the President, the Speaker of the House of Representatives, and the President pro tempore of the Senate shall each appoint five members to a commission which shall make specific recommendations to the Congress, within 90 days of the date of the commission's convening and consistent with paragraph (2), for the financing of this part.

"(2) Such commission, in its recommendations—

"(A) may not recommend that any of the financing of this part be derived from any Trust Fund under this Act or from funds otherwise to be used to pay interest on the national debt;

"(B) may not recommend that such financing be effected in a manner that results in a reduction in the funding of unemployment compensation or national defense functions below the levels in effect for fiscal year 1983; and

"(C) shall recommend such other specific reductions in the funding of other programs and functions, in approximate proportion to the increase in the funding in such programs and functions since fiscal year 1973, as may be necessary to finance this part.

"(3) Notwithstanding any other provision of this part, no State shall be entitled to receive payments under this part until the first calendar quarter beginning after the date the commission makes its recommendations to the Congress under this subsection.".

—Page 18, beginning on line 11, strike out "without limitations of amount, duration, or scope except as to medical necessity".

EXTENSIONS OF REMARKS

U.S. SUGAR PROGRAM

HON. THOMAS J. DOWNEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. DOWNEY of New York. Mr. Speaker, today Congressman GRADISON and I are introducing a bill which addresses the U.S. sugar program. We believe that the sugar program, in the way it is written and in the way it is administered, is one of the worst programs in existence. This program is inconsistent with all we have been trying to accomplish in international trade policy; it distorts agricultural markets for the benefit of a very few producers; and it is adding approximately $3 billion a year to the bill American consumers pay for sweeteners.

Let me take a moment, Mr. Speaker, and explain how the sugar program works.

Under the 1981 farm bill, the Government provides nonrecourse, low-interest loans to sugar producers with sugar as collateral. These loans are made by the Commodity Credit Corporation of the Department of Agriculture and are extended to sugar processors who use their sugar as collateral for the loans. If the domestic price for sugar exceeds the loan rate, plus shipping, handling and storage costs, the processors will sell the sugar on the market and pay off the loan. If, however, the market price is below the price guaranteed by the Government program, the producers simply default on the loan. Since the collateral for the loan is the sugar itself, the Government ends up owning the sugar and the processor keeps the money from the loan at whatever price was set by the Government. From 1982 through 1985 the legislation requires the Secretary to establish loan provisions which set a floor for sugar prices at 17 cents per pound for the 1982 crop year; 17.5 cents for 1983; 17.75 cents for 1984 and finally 18 cents a pound for the 1985 crop.

The problems arise because of the difference between world market prices and the loan levels set in the law. Currently raw sugar is selling at 10 to 11 cents per pound on the world market. Obviously, an American producer who has received a nonrecourse loan of 17 cents per pound will choose to forfeit on his loan and allow his sugar to pass to the Government rather than sell at the existing market price. Such forfeiture would in turn result in tremendous losses to the Government.

In order to avoid the forfeiture of sugar to the Government, the President is authorized to impose duties and fees on imported sugar. However, even the authorized duties and fees were not high enough to bridge the gap between market prices for sugar and the loan levels. Thus, in May 1982, President Reagan signed a proclamation exercising authority Congress granted him to impose quotas on imports of sugar. These quotas restrict the supply of sugar in the United States and create an American market price high enough to avoid defaults on loans to producers.

When the loan program was enacted by Congress, it was anticipated that the Government would protect the domestic market price at about 2 cents above the loan rate. Thus it was expected that a 17-cent-loan program would result in a protected market stabilization price of about 19 cents. However, in order to make absolutely certain that there would be no defaults in loans which result in Federal budget obligation, the administration has set the market stabilization price at nearly 4 cents above the loan levels provided in the law.

This is quite a complex program, Mr. Speaker, but I will try to describe its impact with just a few sentences. In order to subsidize American sugar producers, Congress established a loan program to insure the producers a return far above that offered by the world market. Then, the Department of Agriculture, in administering that program, has raised the price of sugar even higher than the sugar producers could have dreamed.

I have been speaking a lot in terms of pennies, Mr. Speaker. The current world market price of raw sugar is 10 to 11 cents. The loan rate is 17 cents. The market stabilization price is about 21 cents. It may appear that these differences are insignificant, but let me assure you they are not. A 1-cent rise or fall in the price of raw sugar has an impact of $300 million on American consumers. Thus our sugar program which provides a subsidy of 11 to 12 cents per pound, is costing our citizens over $1 billion each year.

While this program is not technically a tax, Mr. Speaker, it surely has the impact of one—and a most regressive one at that. Sugar is an essential ingredient in hundreds of our food products, and taxes on food always fall most heavily on the poor.

On the other hand, Mr. Speaker, it is not poor, struggling farmers who receive the benefits of the sugar subsidy. According to the Department of Agriculture, the American sugar industry is dominated by a few big companies. All told there are fewer than 14,000 sugar producers in the United States, a mere handful compared to 870,000 wheat producers or 324,000 dairy farmers. The cost of this billion dollar program for the benefit of these very few, amounts to an incredible average of $71,500 per producer per year. These are not little family farms. They are some of the Nation's largest corporations.

Further, as I mentioned above, the sugar program has required the imposition of strict, country-by-country quotas on sugar brought into the United States. This is in the most extreme and the most disruptive form of market protection and in direct contradiction to U.S. trade policy.

Sugar import quotas legitimize every other country's attempt to restrict its imports of U.S. products. They undermine our efforts to remove trade restrictions imposed by the European Community, Japan, and other trading nations. Moreover, they have noticeably increased the risk of new restrictions being added to American wheat, corn, and other agricultural products which we must be able to export.

Clearly, Mr. Speaker, Congress should address and reconsider the sugar program. The bill we introduce does so. It will eliminate sugar quotas, which in my opinion have no place in our trade policy and have been so restrictively utilized to drive prices far above what they should be. Further, the bill assures that the elimination of the authority to impose quotas will not affect the President's existing flexibility in modifying duties.

Surely, there are additional steps which Congress should take in reforming that program, and I am certain that I will have further recommendations to make in the future. In the meantime, I hope my colleagues will study the sugar program and our bill. We feel that the merits are clear and look forward to the support of a majority. An explanation of our bill follows here:

Section 1 of the bill removes the President's authority to impose import quotas on sugar and repeals the quotas currently in effect.

Section 2 assures that the elimination of the quota authority will not affect the President's flexibility to

---

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

modify duties on sugar. The standard for modification is the one currently set forth in headnote 2, subpart A, part 10 of the tariff schedules.●

HELSINKI AND GDANSK: GRIM AUGUST ANNIVERSARIES

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. MARKEY. Mr. Speaker, this month begins and ends with the anniversaries of two historic and related events: The August 1 signing of the Helsinki accords in 1975 and the August 31 signing of the Gdansk agreements in 1980.

Today, the eighth Helsinki anniversary, is not a happy occasion. It reminds us of the men and women who are victimized by Soviet bloc governments because they have the courage to claim the human rights set forth in the Helsinki accords. One could expect the words of the Helsinki agreement to sound hollow to these long-suffering people. Instead, the language of the Helsinki Final Act continues to inspire them because its words carry the force of principle.

The spirit of Helsinki was present amongst the strikers in Gdansk, Poland, during that fateful August 1980, when Solidarity was born. It is no coincidence that one of the demands secured from the Polish Government by the workers of Szczecin that August, was the agreement to republish and disseminate the text of the Helsinki accords. The Solidarity Union had its own Helsinki monitoring committee under the auspices of its information and consultation center and matters of repression. Zbigniew Romaszewksi, who chaired this committee, had earlier served on a monitoring group established by the Workers' Defense Committee (KOR) and had prepared an extensive report on human rights in Poland for presentation to the Madrid Review Meeting of Helsinki signatory states in the fall of 1980.

The Madrid meeting was in session that grim December 1981 when the dark night of martial law descended on Poland. This unique East-West forum became a major platform from which NATO and neutral nonalined states could condemn martial law, ensuring that the massive abuse of human and civil rights occurring in Poland remained a prominent issue before the press and public. Because of the tragic events in Poland, negotiation was suspended in Madrid until the following fall. When the meeting resumed, the NATO returned with a package of tough proposals geared to reinforce the human rights and freedoms under siege in Poland and in the other Soviet bloc states. Subsequent debate at the meeting centered on the NATO proposals, thus keeping these important humanitarian issues alive.

The most significant testament to the continuing importance Solidarity attaches to the Helsinki process, and to the talks in Madrid, is a meticulously researched 600-page report written under perilous circumstances by a newly-formed monitoring group in Poland which was commissioned by the Temporary Coordinating Committee (TKK or Underground) of Solidarity. Presented to delegates at the Madrid meeting in March 1983, it provides a penetrating analysis of "Human and Civil Rights in Poland During the State of War." In the cover letter introducing the report, the authors wrote:

> We send this report with the conviction that it will serve the cause of peace and security in Europe, for there can be no peace without social justice.

Mr. Chairman, that is the very essence of the Helsinki Final Act as well as the Gdansk agreements. Recently the Jaruzelski regime has orchestrated an artificial lifting of martial law in Poland which has been accompanied by thinly veiled attempts to tighten internal controls while appearing to relax them, and to institutionalize repression while pretending to legalize it. Jaruzelski's refusal to release the original Helsinki monitors, imprisoned KOR members, is stark evidence of the lack of real change in Poland.

The Madrid meeting will come to a close in early September with all participating countries approving a concluding document that endorses free trade unions and strengthens the rights of Helsinki monitors. Poland has agreed to document, yet it declares Solidarity to be an outlawed organization and holds its top leadership prisoner.

But I see reason for hope. The Helsinki monitors in Poland perservere in their work, for these courageous people realize that the Helsinki process continues to make sense as a reasonable international program for the development of lasting trust and peace in Europe, just as the Gdansk agreements continue to hold out hope for social peace and social justice.●

EXPLANATION OF MISSED VOTE

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Ms. FERRARO. Mr. Speaker, on Friday, July 29, I was unavoidably absent from the House Chamber when the vote occurred on House Concurrent Resolution 153, providing for the adjournment of the House and Senate. Had I been present, I would have voted "yea."●

THE LONG, HARD ROAD FROM HELSINKI TO MADRID

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. SMITH of New Jersey. Mr. Speaker, 8 years ago today, on August 1, 1975, in Helsinki, Finland, the leaders of 33 nations of Western and Eastern Europe, Canada, and the United States signed accords which were to guide their states toward international trust and cooperation. These long-term goals were to be met through the good faith observance by signatory states of agreed standards for responsible and humane international conduct.

Since the signing 8 years ago, concerned citizens in both East and West have sought to give the fine words contained in the Helsinki Final Act more than symbolic meaning. In the West, citizens who have taken an active part in the Helsinki process have complemented and furthered the work of their governments. In contrast, citizens of East bloc countries who similarly have attempted to "know and act upon their rights" and play a legitimate and genuine role in the Helsinki process consistently have met with repression at the hands of their governments.

This pattern of Eastern bloc human rights abuse in contempt of the Helsinki accords, became particularly evident in the Soviet Union and Czechoslovakia by the time of the first Helsinki Review Meeting in Belgrade in 1977-78. That review meeting ended in disappointment with a terse "agreement to disagree" that accurately mirrored the wide gulf separating word and deed.

The period between the Belgrade Review Meeting and the opening of the Madrid Review Meeting in the fall of 1980 witnessed intensified repression on an even wider scale in the Soviet Union, where the KGB declared open season on dissident activity and Helsinki Monitoring Groups came under heavy siege. The Soviet Union invaded Afghanistan, brutally violating Helsinki principles regarding the nonuse of force, inviolability of frontiers, and respect for the sovereignty of states as well as those concerning respect for fundamental human rights and freedoms.

During the course of the Madrid Meeting itself, 500 Soviet citizens are known to have been sent to prison, labor, camp, or internal exile for exercising rights protected under the Helsinki accords. Fifty-two members of the Moscow, Ukrainian, Lithuanian, Georgian, and Armenian Helsinki Monitoring Groups currently are prisoners of conscience. The founder of

the first such citizens' group, physicist Yuri Orlov, has been on a hunger strike since July 10 in an effort to secure amnesty for Helsinki prisoners.

Anatoly Shcharansky, Moscow Helsinki Monitor and leader of the Jewish emigration movement in the U.S.S.R., has withstood repeated health-shattering incarcerations in prison punishment cells. Virtually all Ukrainian Helsinki Monitors have been imprisoned or exiled. Repression in the forcibly annexed Baltic States has been severe, largely taking place far from Western view and therefore with greater impunity. Dr. Sakharov, exhausted and ill, remains in bitter internal exile in Gorki. His wife, former Helsinki Group member, Elena Bonner, fears for his health as well as her own.

Meanwhile, in Poland, one of the few places in the East bloc where progress steadily had been made since the Helsinki accords were signed, the brief renaissance of human rights under Solidarity was abruptly stilled by the imposition of martial law in December 1981. Since then, Poland has suffered social upheaval, human catastrophe and is now undergoing a period of entrenched dictatorship. Five former members of the Workers' Defense Committee (KOR)—Adam Michnik, Jacek Kuron, Jan Litynski, Henryk Wujec, and Jan Joseph Lipski—who served as Poland's earliest Helsinki monitors, face subversion charges and remain in pretrial detention. The 5, as well as approximately 60 other major Solidarity leaders and advisers, are not included in the recently announced amnesty. Thousands of others remain in confinement and their fate is uncertain.

Thus, the history of the Madrid meeting in a sense has been a chronicle of grim developments. For 3 long years at the meeting, Western countries have succeeded in focusing world attention on these tragedies, which otherwise would have gone unremarked and largely unnoticed. For the West, that in itself was both a moral obligation and an important accomplishment.

The concluding document of the meeting reflects this concerned preoccupation with humanitarian questions including terrorism, monitors, religious liberty, trade unions and human contacts, and other humanitarian matters. The concluding document also provides for a series of meetings before the next review conference in 1986 which provide valuable opportunities to keep human rights issues alive and preserve the lifeline to the persecuted in the East whose only hope is sustained expressions of Western support.

Mr. Speaker, for many the path from Helsinki has been all too rocky. For some, a tortuous route of exodus. For others, a seemingly endless diplomatic maze. In the final analysis, though, it remains the one long road that can ultimately lead us to lasting peace and cooperation in Europe.●

HELSINKI HUMAN RIGHTS DAY

HON. RAYMOND J. McGRATH

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. McGRATH. Mr. Speaker, today commemorates the eighth anniversary of the signing of the Helsinki accords. Eight years ago, we looked at this historic occasion as a giant step forward for human rights. Finally, an agreement was reached among nations of diverse economic, religions, and philosophical backgrounds which recognized basic human rights for all people.

Or so we thought.

Today we are forced to look back at the time that has elapsed since that August 1, with a great degree of sadness. The progress in the area of human rights has been dwarfed by a growing violation. The hopes expressed at that time, have turned to cynicism. That document has been used by maLny countries as a bargaining tool in achieving their economic and political goals. In these nations, a facade of human rights compliance is promoted when it is politically beneficial, but at any time the rights can be quickly revoked at the whim of the government.

The Eastern European nations that signed the Helsinki accords have shown an alarming disregard for the rights they pledged to recognize and uphold. Led by the Soviet Union, political and labor unions such as Solidarity have been supressed monitors of the accords in Eastern bloc nations have been harassed, and the expression of religion has resulted in persecution and imprisonment for many, such as the Soviet Jews.

Today's anniversary is an important day for all of us who believe in the ideal of human freedom. It should be a day of celebration.

This year, as one response to the continuing crackdown in human rights, we should make it a day of action. I urge my colleagues to join with me in challenging the Soviet Union and its Eastern allies to fulfill their commitment. The accords were signed 8 years ago in a spirit of cooperation and progress. We must call on all who participated to allow those principles to operate so that all people might enjoy the rights and freedom for which every soul thirsts.●

MINUTEMAN HOME CARE CORP.

HON. EDWARD J. MARKEY

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. MARKEY. Mr. Speaker, I would like to take this opportunity to commend the Minuteman Home Care Corp., of Lexington, Mass., an organization which recently embarked on a most worthwhile project aimed at improving services for older Americans.

Minuteman Home Care Corp., long ago established itself as a leader in elderly care, helping to meet the special needs of senior citizens in 16 Massachusetts cities and towns, including five communities which I represent—Burlington, Lexington, Wilmington, Winchester, and Woburn. This organization has provided valuable community services such as home care, visiting homemakers, volunteer and employment opportunities, transportation, and meals on wheels.

Minuteman Home Care Corp., has now joined with local businesses and industries in an innovative and ambitious program designed to further improve services for seniors. This project—planned partnership in aging—encourages businesses and corporations to participate in a cooperative community effort to address the needs of older Americans and those who care for them. I would like to recognize the concerned businesses that have agreed to take an active role in shaping the system of care for the elderly of their communities. These organizations are: AVCO Systems Division; Digital Equipment Corp.; W. R. Grace & Co.; Polaroid Corp.; Honeywell Information Systems; Gen Rad; GTE Laboratories, Inc.; Leader Federal Savings & Loan Association; Raytheon Co.; Washington Business Group on Health; and Boston University School of Management.

Planning partnership in aging has already established some important goals, citing the need for better preretirement planning, for more information about older employees and their families, for continued involvement in cost containment, for the redesigning of benefit packages to encourage efficient community care, and for a greater focus on corporate contributions to the elderly. I am certain my colleagues would agree that these are most worthwhile goals. But I believe that the efforts of planning partnership in aging are especially important in light of the disturbing cutbacks in services for the elderly brought about by the present administration. Indeed, it is my hope that this joint endeavor by Minuteman Home Care Corp., and those concerned businesses and corporations will set an example for other groups throughout the Nation.

I wholeheartedly support planning partnership in aging, and I take great pride in commending their fine work.●

SUGAR PROGRAM

HON. WILLIS D. GRADISON, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. GRADISON. Mr. Speaker, I am pleased to join with Congressman DOWNEY in introducing a bill which addresses the sugar program established by the 1981 farm bill. The quotas which have been imposed under that legislation to protect sugar prices are proving to be extremely costly to consumers and are undermining our Government's efforts to liberalize world trade.

The administration reluctantly imposed quotas in May 1982, after a drop in the world sugar price made it impossible to continue to protect the sugar loan program with import duties and fees. In order to avoid the Government's acquisition of sugar through the forfeiture of loans, the Department of Agriculture determined that the market price should be maintained at 20.73 cents per pound. Many experts believe that this price was higher than it needed to be, and when quotas were used as a measure of achieving it, sugar prices went even higher.

Quotas are not an effective tool for setting prices. It is difficult, if not impossible, to fine tune the market relying upon them. As a result, USDA felt it should be safe and err on the high side. Thus, USDA set very restrictive country by country quotas which have caused prices to rise above 22 cents per pound.

All of this is extremely costly to our constituents, Mr. Speaker. It is estimated that the cost to Americans for each 1-cent increase in the price of sugar is at least $300 million a year. Thus, just the error factor in using the quotas is costing consumers over $600 million in 1983. And this is on top of what I believe is a grossly over-generous subsidy of $2.4 billion provided sugar producers under the basic loan program.

Mr. Speaker, I have worked very hard in my years in Congress toward deregulation of the economy and to eliminate restrictions, protections and subsidies from special segments of our economy. I believe that through tough, healthy and unrestricted competition, with protections only when they are clearly needed, the American economy will regain its vigor and retain its place as the most creative and efficient economic force in the world.

I also believe that our trade policy should reflect these goals. I have encouraged every effort our President has made to force foreign nations, who wish to export their goods to the United States, to open their own markets to products made in America. There is no question in my mind that we can compete with any nation if we are permitted to do so.

I am grateful, Mr. Speaker, that many of my colleagues share these views, and I hope they will join me in giving careful scrutiny to the sugar program. Quotas are the most restrictive and damaging of trade barriers. As U.S. Trade Representative Brock has stated, their imposition under the sugar program has made our efforts to remove barriers to American goods in Europe and Japan an even more difficult task. Our bargaining position will be seriously jeopardized as long as quotas remain in force.

Our bill will eliminate the hypocrisy of quotas from the sugar program and our trade policy, Mr. Speaker. It will also preserve the President's flexibility in imposing tariffs on imported sugar.

The bill will have an impact on the subsidy to American sugar producers, and I believe this is equally as appropriate. The sugar program provides a much higher degree of support in relation to world prices than nearly any other commodity. American prices are at 22 cents per pound for sugar while the world price currently ranges from 10 to 11 cents per pound. Such a subsidy sends exactly the wrong signal, that is to expand production rather than contract it—and as a result, perpetuates the surplus in supply.

Further, according to figures provided by the Department of Agriculture, the sugar support prices are much higher relative to production costs than virtually all other agricultural commodities. The comparison looks like this:

Percent target price is of cost of production

	Percent
Sugar	80
Wheat	56
Corn	65
Cotton	74

Congress is reexamining nearly all of its agricultural programs, Mr. Speaker. Surely, we must also look again at the most generous farm program of them all—sugar. This program is costing our constitutents $3 billion each year. It is disrupting our trade policy and moving us away from the free market we have been working so hard to restore.

I hope my colleagues will carefully consider this legislation and support our efforts to provide rationality in this extremely costly program.●

CENTRAL AMERICA AND OUR FUTURE

HON. JACK FIELDS

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. FIELDS. Mr. Speaker, I present for our colleagues two articles from the commentary page of today's Washington Times concerning the current crisis in Central America. The decisions made over this issue by the President and the Congress in the coming months will, one way or another, have permanent effects on American citizens and the peoples in all nations. These articles by Philip Gold and Patrick Buchanan offer considerable insight into the decision process and its meaning.

REAGAN HAS A HISTORIC OPPORTUNITY—IF HE'S WILLING TO PAY THE PRICE

(By Patrick Buchanan)

With the dispatch of the U.S. battle fleets to the Pacific and Caribbean coasts of Central America, the president has issued a statement to the world: A Soviet satellite state and military base in Central America is unacceptable to the United States.

That the Sandinistas and their American sympathizers have gotten the message is unmistakable. Suddenly, the Ortega Brothers are anxious to negotiate treaties of noninterference in the affairs of their neighbors. The American left—politicians and press auxiliaries—is alternately berating Reagan's "gunboat diplomacy," and imploring him to talk to the Sandinistas, to listen to the Contadora Group, to wait upon the Kissinger Commission. Something approaching a general panic has broken out in this city now that Ronald Reagan means to rid the hemisphere of the Sandinistas.

By dispatching the fleet, however, the president has himself publicly climbed up the high dive. If six months hence, USS Ranger and New Jersey come steaming home, and the Sandinista regime is firmly and permanently entrenched, the president will be perceived as having run an American bluff. The Soviet military base in Central America will be accepted by the world as a permanent feature of the Cold War with which the United States has, once again, come to terms. Castro and Andropov's tremendous gamble will have paid off.

All the talk about poverty and human rights, democracy and land reform aside, Central America is the latest battlefield in the war between the United States and the Soviet Union.

The Soviets, the Cubans, the Sandinistas have shoved their stack of chips in. They have accepted the risks inherent in establishing a communist beachhead deep inside the hemispheric defense perimeter of the United States. They have in four years built an indigenous army of 75,000 troops and militia, poured in advisers, technicians and material, and sought to expand the beachhead to El Salvador.

The Ortega Brothers are not going to be negotiated out of power by Richard Stone or Henry Kissinger. They are not going to be frightened out of power by the battleship New Jersey with its impressive array of cruise missiles. They are not going to commit suicide by inviting back anti-com-

munist Nicaraguans and committing their fate to free elections. Nor will they be abandoned by Yuri Andropov simply because Sen. Moynihan warns that if he doesn't, we will cut off his wheat supply and foreclose on his Polish subsidiary.

The presence of the battle fleet can persuade Managua, temporarily, to cool its revolutionary ardor, to play the peace-loving socialist state, the hemispheric good neighbor.

But, as soon as the gun-boats go home, the Sandinistas will return to the business of waging war against Western interests in Central America, just as Hanoi went back to its war of conquest of South Vietnam, the day the B-52s departed.

Having seized and consolidated power at the barrel of a gun, the Sandinistas will not be removed—except at the barrel of a gun. Given the military build-up in Nicaragua, unprecedented in Central American history, it is unlikely that any coalition of 10,000 "Contras" can drive them from power, without the military assistance of the United States. Which means American wounded and American dead.

If the United States is unprepared to pay that price, then we should reconcile ourselves to a Central America of 20 million people allied with and attached to the Soviet Empire. It is as simple as that.

Conversely, Central America offers a historic opportunity to the United States.

In Nicaragua, the Cubans and Soviets are taking an immense gamble. They are overextended, overexposed. If the president is willing to put up with hysteria in the United States, to pay the price to overthrow the Sandinista regime he would be the first American president to have inflicted a decisive military defeat upon the Soviet Empire.

If, through American action, the Sandinista regime is thrown upon the trash heap of history, the communist war in El Salvador—isolated, demoralized guerrillas with no base of supply—will gutter out. An American-backed push to dump the Sandinistas, coupled with U.S. recapture of the island of Grenada and Suriname from the grisly Castroite gangs who seized them, could, in six months, put the Western Hemisphere—excepting only Cuba—off-limits to the Soviet Empire.

This would expose as bogus the myth that communist revolutions are irreversible, and would send a message to the world that, under Mr. Reagan, the post-Vietnam paralysis of the United States is over. The political and psychological shock to Castro, of seeing the Soviet's Western Hemisphere bases rolled up with impunity, would be jolting; and the effect upon free men and anti-communists from Eastern Europe to southern Angola would be electric.

By sending the fleet, Mr. Reagan has come close to putting his place in history on the line. If the Sandinistas survive, and lead the comminist takeover of Central America, no amount of plea-bargaining on the part of the president's cohorts—i.e. he had no "consensus"; he lacked public support—is likely to persuade.

NICARAGUA AND THE MOMENT AT HAND

(By Philip Gold)

The ancient Greeks had two words for time. One, chronos, refers to time in its ordinary mien: the undifferentiated passage of the seasons and the years. The English word, chronological, derives from it.

The second word, kairos, can mean, variously, the critical time, the right time the unrepeatable time. Historically, it signifies those happenings which change, not only what is to come, but also our understanding of what has gone before. Moses on Mount Sinai, Christ on the Cross, Enola Gay above Hiroshima, Auschwitz, Tet—kairotic bits of time.

But there is also a kind of negative kairos: a sort of historical anti-matter composed of roads not taken, premises and promises left unfulfilled, hopes and opportunities stillborn. Of these tragic nonevents, our century has known more than its share.

And is living—may be living—through another now.

Since first it cursed the earth, communism has come to power largely via a two-stage process: initial alliance with non-communist forces against domestic oppression (or foreign occupation), followed by the gradual destruction of those allies after victory. From the 1917 Bolshevik power grab to the Czech coup of 1948 to the current global array of tragedies, the pattern has been much the same: first ally, then co-opt, betray, and massacre.

For a generation, now, it has been part of the American purpose to oppose—to contain—the spread of communism. This policy of containment worked well enough in post-war Western Europe, where strong democratic traditions (bolstered by American aid and troops) helped preclude communist takeover.

But simple anti-communism has proven peculiarly inefficacious in the developing world, where democratic traditions rarely exist, and where American influence (and Marines) have been used more often to prop up existing oppressions than to work for positive change.

In part, this has often been unavoidable; given an either/or between totalitarian communism and more "traditional" dictatorship, the latter has usually proven preferable. Not only are "traditional" tyrannies somewhat milder, but they also leave open at least a prospect for change; violent or otherwise. And, so runs the logic, history has also proven that when communism descends upon a country, the loss is final and irreversible.

But what if this logic of history could be changed? What if the classic two-stage pattern could be extended: revolution to rid a country of its indigenous tyranny, the standard communist bid for total control, followed by the armed refusal of those who did not run out one set of tyrants in order to submit to another far worse?

What if such armed refusals could avail themselves of the tactics which have proved so successful in disrupting governments across the planet? And what if those armed refusals could enjoy the international sanctuaries and support which communist movements have hitherto found so essential for success?

And what if the United States could ally itself with such armed refusals? What if the United States could shed its developing world image—and actual role—as the godfather of sundry petty despotisms in order to support genuine popular movements? Would not both anti-communism and the advancement of positive freedom be served?

This is, of course, the current situation in Nicaragua. But the nascent civil war transcends the question of whether that county can exist without either the communists or the Somocista. And it transcends the question of whether, as one American adviser in El Salvador aptly put it: "in order to save one country, we may have to take another back."

The real question is whether or not "taking back" can establish a global precedent: whether, in fact, the communist tide is reversible: whether, in fact, it may on occasion be more effective to "take back" a country than to "save" its local oligarchs.

Or perhaps the real question is whether or not the American people can be brought to understand the present kairos: whether they will authorize the activities which can make the reversal possible: or whether they will succumb to that orgy of self-pity and pseudorighteousness which goes by the name, "Vietnam Syndrome."

There is no guarantee that the Nicaraguan crisiss—or the Angolan, or the Afghan, or wherever men and women resist communist tyranny—will become the kairotic episode in the struggle against communist expansion. Nothing is ever guaranteed. But, among the many meanings of kairos is: "opportunity."●

SANCTITY OF LIFE ON QUALITY OF LIFE

HON. CHRISTOPHER H. SMITH

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. SMITH of New Jersey. Mr. Speaker, more than a decade ago the Supreme Court launched our Nation on a most brutal course. In Roe against Wade, the Court denied legal protection to the most defenseless and vulnerable members of the human family: unborn children.

In formulating this decision, the Court relied in part on a new ethic, one that placed only relative rather than absolute value on each human life. Since unborn children, in the Court's estimation, were incapable of "meaningful" life, their destruction was a matter of legal and constitutional indifference.

Those of us who oppose this decision predicted that the destruction would not stop with the unborn, but would spread inexorably to other classes of human beings.

Mr. Speaker, events of the intervening decade, sadly, have proved us right. Today it is not only the unborn, but newly born defective infants as well, who are being killed in our Nation's medical facilities. Such infants are considered not to have meaningful lives and are left to die through malign neglect.

It is significant that this link between abortion and infanticide is acknowledged even by abortion proponents. Austrailian bioethicist Peter Singer, writing in the July 1983 issue of Pediatrics, the official journal of the American Academy of Pediatrics, notes that, "The first major blow to the sanctity of life view was the spreading acceptance of abortion throughout the Western world."

Singer applauds this assault on the sancity of life ethic and a second assault on it as well—infanticide.

If we compare a severely defective human infant with a nonhuman animal, a dog or a pig, for example, we will often find the nonhuman to have superior capacities, both actual and potential, for rationality, self-conciousness, communication, and anything else that can plausibly be considered morally significant. Only the fact that the defective infant is a member of the species Homo sapiens leads it to be treated differently from the dog or pig. Species membership alone, however, is not morally relevant • • •

If we can put aside the obsolete and erroneous notion of the sanctity of all human life, we may start to look at human life as it really is: at the quality of life that each human being has or can achieve.

Mr. Speaker, this Congress must call a halt to this erosion of the sanctity of life ethic. My esteemed colleague from Illinois, HENRY HYDE, has introduced the Respect Human Life Act (H.R. 618), and has filed discharge petition No. 3 so that it may come before this body.

I call on all my colleagues who believe human life to be valuable and who oppose abortion and infanticide to sign Discharge Petition No. 3. And I call on every Member of this body to read Mr. Singer's article so that they might make an informed choice between two competing ethics: the ethic of elitism and death embodied in the quality of life ethic, and the sanctity of life ethic.

[From Pediatrics, Vol. 72, No. 1, 1983]

COMMENTARIES: SANCTITY OF LIFE OR QUALITY OF LIFE?

(Copyright © 1983 by the American Academy of Pediatrics)

The ethical outlook that holds human life to be sacrosanct—I shall call it the "sanctity-of-life view"—is under attack. The first major blow to the sanctity of life view was the spreading acceptance of abortion throughout the Western world. Supporters of the sanctity-of-life view have pointed out that some premature babies are less developed than some of the fetuses that are killed in late abortions. They add, very plausibly, that the location of the fetus/infant—inside or outside the womb—cannot make a crucial difference to its moral status. Allowing abortions, especially these late abortions, therefore does seem to breach our defense of the allegedly universal sanctity of innocent human life.

A second blow to the sanctity-of-life view has been the revelation that it is standard practice in many major public hospitals to refrain from providing necessary life-saving treatment to certain patients. Although this practice applies to geriatric patients and those suffering from terminal illness, the most publicized and also the potentially most significant cases have been severely defective newborns. In Britain, Dr. John Lorber [1] has quite candidly described his method of selecting which babies suffering from spina bifida should be given active treatment, and he has indicated, with equal candor, that in his view the best possible outcome for those not selected is an early death.

The decision not to treat an infant with Down's syndrome has also been publicized. In April 1982, in Bloomington, Indiana, the parents of an infant with Down's syndrome and in need of corrective surgery refused permission for the surgery to be performed. Few details are available because the court ordered the records sealed, but the court refused to intervene or to take the child out of his parents' custody.[2]

Although many doctors would sharply distinguish the active termination of life from a decision not to treat a patient for whom the foreseen outcome of this decision is the death of the patient, the distinction is a tenuous one, and the claim that it carries moral weight has been rejected by several academic philosophers. Hence, the acceptance of nontreatment in these situations is rightly perceived as a further threat to the sanctity-of-life view.

Some respond to this situation with a sense of alarm at the erosion of our traditional ethical standards. We already have, these people tell us, one foot on the slippery slope that will lead to active euthanasia, then to the elimination of the mentally feeble and of the socially undesirable, and finally to all the atrocities of the Nazi era. To pull back from this abyss, we must renew our commitment to the most scrupulous respect for all human life, irrespective of its quality.

It is in keeping with this response that shortly after the verdict was handed down in the Bloomington case, the Reagan administration issued, through the Department of Health and Human Services, a "Notice to Health Care Providers" stating that it is unlawful for a recipient of federal financial assistance to withhold from a handicapped infant any medical treatment required to correct a life-threatening condition, when the treatment is not medically contraindicated and would be given to an infant who was not handicapped.

Seen from a distance, this notice appears to put doctors in the absurd situation of having to keep alive the most grossly defective infants, for whom life is either quite valueless—because the infant is forever incapable of any conscious experience whatsoever—or else a positive burden, because it is a life of pain and discomfort without the redeeming value of a rational awareness of self or others. Even Lord Justice Templeman, who in a recent English case concerning an infant with Down's syndrome ordered that surgery be performed, did not wish to go so far. He allowed that in a case in which the life of the infant would be "demonstrably awful" there would have been grounds for allowing a child to die. The Reagan administration, it would seem, wishes infants to be kept alive even when their life will be "demonstrably awful." [3]

Is the erosion of the sanctity-of-life view really so alarming? Change is often, in itself, alarming, especially change in something that for centuries has been spoken of in such hushed tones that to question it is automatically to commit sacrilege. There is little evidence, however, to support the application of the slippery slope argument in this context. Cultures that have practiced forms of infanticide or euthanasia—Ancient Greece, the Eskimos—have been able to hold the line around those categories of beings that could be killed, so that the lives of other members of these societies were at least as well protected as the lives of citizens of the United States, where the culture officially accepts no limits to the sanctity of human life.

Whatever the future holds, it is likely to prove impossible to restore in full the sanctity-of-life view. The philosophical foundations of this view have been knocked asunder. We can no longer base our ethics on the idea that human beings are a special form of creation, made in the image of God, singled out from all other animals, and alone possessing an immortal soul. Our better understanding of our own nature has bridged that gulf that was once thought to lie between ourselves and other species, so why should we believe that the mere fact that a being is a member of the species *Homo sapiens* endows its life with some unique, almost infinite, value?

Once the religious mumbo-jumbo surrounding the term "human" has been stripped away, we may continue to see normal members of our species as possessing greater capacities of rationality, self-consciousness, communication, and so on, than members of any other species; but we will not regard as sacrosanct the life of each and every member of our species, no matter how limited its capacity for intelligent or even conscious life may be. If we compare a severely defective human infant with a nonhuman animal, a dog or a pig, for example, we will often find the nonhuman to have superior capacities, both actual and potential, for rationality, self-consciousness, communication, and anything else that can plausibly be considered morally significant. Only the fact that the defective infant is a member of the species *Homo sapiens* leads it to be treated differently from the dog or pig. Species membership alone, however, is not morally relevant. Humans who bestow superior value on the lives of all human beings, solely because they are members of our own species, are judging along lines strikingly similar to those used by white racists who bestow superior value on the lives of other whites, merely because they are members of their own race.

Ironically, the sanctity with which we endow all human life often works to the detriment of those unfortunate humans whose lives hold no prospect except suffering. A dog or a pig, dying slowly and painfully, will be mercifully released from its misery. A human being with inferior mental capacities in similarly painful circumstances will have to endure its hopeless condition until the end—and may even have that end postponed by the latest advances in medicine.

One difference between humans and other animals that is relevant irrespective of any defect is that humans have families who can intelligently take part in decision about their offspring. This does not affect the intrinsic value of human life, but it often should affect our treatment of humans who are incapable of expressing their own wishes about their future. Any such effect will not, however, always be in the direction of prolonging life—as the wishes of the parents in the Bloomington case, and in several other recent court cases, illustrate.

If we can put aside the obsolete and erroneous notion of the sancity of all human life, we may start to look at human life as it really is: at the quality of life that each human being has or can achieve. Then it will be possible to approach these difficult questions of life and death with the ethical

sensitivity that each case demands, rather than with the blindness to individual differences that is embodied in the Department of Health and Human Services' rigid instruction to disregard all handicaps when deciding whether to keep a child above—Peter Singer, MA, BPhil, FAHA, Centre for Human Bioethics, Monash University, Clayton, Victoria, Australia.●

AMERICA'S UNSUNG HEROES

HON. BILL RICHARDSON

OF NEW MEXICO

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. RICHARDSON. Mr. Speaker, there are many unsung heroes in our Nation's history—soldiers whose outstanding record of bravery and heroism in battle has not been properly recognized. I want to draw my colleagues attention to a group of fighting men who fall into that category.

Mr. Speaker, 41 years ago the U.S. Marine Corps Navajo Code Talker program was established at a Marine base in California. Two hundred young Navajo men left their families, homes, and friends to enlist in the military service for one of the most important missions of World War II. The Navajos participated in a training program that prepared them to serve in diverse units as communicators—code talkers and radiomen at communication centers throughout the war.

Mr. Speaker, Navajo was an unwritten language at that time and completely unintelligible to anyone except another Navajo. Therefore, it was a perfect language for devising code words into specialized military terms. Secret coded messages could be translated into Navajo and transmitted and translated back into English quicker than messages using conventional code writing techniques.

Mr. Speaker, the Navajo Code Talkers were one of the U.S. Government's secret weapons in the Pacific during World War II. Navajo Code talkers achieved many important accomplishments.

They also provided the key to a 413-word code the Japanese were never able to break. This proved to be a significant factor in the United States winning the war in the Pacific.

The activities of the code talkers was so secret that knowledge of what they contributed was not made public until 30 years after war's end. Many of the code talkers were unable to explain to their families their secret role in the war effort.

Mr. Speaker, It is somewhat ironic the Navajo Code Talkers who risked their lives for the United States during World War II were discouraged and even forbidden to speak their native tongue. There is an effort underway today to change all of that by promoting the importance of the Navajo language.

Tribal officials on the Navajo reservation are taking steps to preserve what many Navajos believe is the most precious part of their heritage: the Navajo language. Tribal leaders are working to establish a policy that would bring the Navajo language back into the classroom in reservation schools. Other Navajos are working on writing a dictionary for elementary school children.

These activities are beginning to bear fruit. I noticed the reservation newspaper, the Navajo Times, printed an article in the Navajo language. I commend these efforts and hope the importance of the Navajo language is never lost. I know the Navajo Code Talkers share in that desire.

Mr. Speaker, the Navajo Code Talkers of World War II served their country well. They deserve to receive the same benefits from the Federal Government as do non-Indian veterans. In many cases, Mr. Speaker, that has not happened. Members of the Navajo Code Talkers Association are now beginning to express their dissatisfaction with the Veterans' Administration. They have requested Federal funds through the VA to start up a medical facility for Navajo veterans at the Gallup Indian Medical Center. Under existing arrangements Navajo Veterans must now drive over 3 hours to Albuquerque to receive medical treatment. Many Navajo veterans live on Federal trust lands and have no collateral. Therefore, they cannot secure a loan to build a home. they have requested Federal money for housing on the reservation as well as guaranteed loans for the many veterans living off the reservation. The Navajo Code Talkers Association is also working to establish an Office of Veterans Affairs' on the Navajo Reservation.

Mr. Speaker, the Navajo Code Talkers are asking only for parity. They are asking only that they receive the same treatment as other veterans groups.

Mr. Speaker, although the U.S. Marines have always acknowleged the significant contribution the code talkers made to the war effort, it took 40 years for the U.S. Government to make any kind of official recognition. On Agust 14, 1982, a special Presidental Commission dedicated that day in recognition of these unsung warriors of the Navajo Nation who gave of their time and commitment and shared the special heritage of their language so that others might live. A special ceremony is planned for this year on August 12 in Gallup, N. Mex. I plan to attend, Mr. Speaker, to honor the special fighting men who left their hogans on the vast and sprawling Navajo reservation to make one of the most important contributions toward our victory in the Pacific during World War II. I hope my colleagues will join with me in sharing our appreciation to the Navajo Code Talkers.●

EXCESS FEDERAL PROPERTY IN LEHIGH ACRES, FLA.

HON. E de la GARZA

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. DE LA GARZA. Mr. Speaker, pursuant to Public Law 97-394, the Forest Service of the Department of Agriculture has informed the Committee on Agriculture that it is formally proposing to declare as excess Federal property the Southeastern Forest Station Forest Resources Laboratory located in Lehigh Acres, Fla.

A final decision on this proposed disposal will be made after 30 days. The Committee on Agriculture will welcome comments from interested Members and I ask relevant documents detailing this proposal and furnished to me as chairman of the committee be included in the RECORD at this point:

U.S. DEPARTMENT OF AGRICULTURE,
FOREST SERVICE,
Washington, D.C., July 22, 1983.

Hon. E. (KIKA) DE LA GARZA,
Chairman, Committee on Agriculture, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: Section 316 of the 1983 Interior and Related Agencies Appropriations Act (PL 97-394) requires funded Agencies to take the following actions before disposing of any lands, except by exchange or under certain specified authorities:

1. Determine that the tract is no longer needed by the Federal Government and inventory the tract as to its public value.

2. Provide opportunity for public review and comment.

3. Provide 30 days advance notice to the congressional delegation of the State or States in which the tract proposed for sale is located and the plan for carrying out such disposal.

4. Notify the appropriate congressional committees for immediate publication in the Congressional Record.

We are proposing to declare excess the Southeastern Forest Experiment Station Forest Resources Laboratory, Lehigh Acres, Florida. It is an improved 10.02 acre parcel located in the Lehigh Industrial Park, Lee Boulevard Highway 884, Lehigh Acres, Lee County, Florida.

Notice was given to the Florida Congressional Delegation on June 1, 1983. (See enclosed copy of letter.)

Information on the proposed disposal was published in the local newspaper to provide the opportunity for public review and comment. (See enclosed copy of notes.) We have received no comments from the general public nor from local Government officials. We have received comments from the Division of Forestry, Florida Department of Agriculture and Consumer Services, and from the School of Forest Resources and Conservation of the University of Florida, copies of which are enclosed.

The final decision on the proposed disposal will be made after 30 days. Our Report of

Excess Real Property will include the interest indicated by the State of Florida agencies.

Sincerely,

J. LAMAR BEASLEY,
(For R. Max Peterson, Chief).

Enclosure.

FLORIDA DEPARTMENT OF AGRICULTURE AND CONSUMER SERVICES
Tallahassee, Fla., June 9, 1983.

Dr. ELDON ROSS,
Director, Southeastern Forest Experiment Station, Asheville, N.C.

DEAR ELDON: We understand that due to budget cutbacks it is necessary that you close out the Lehigh Acres Laboratory and Related Facilities, and phase down your research in eucalyptus forest plantation studies. This will result in the Lab being declared excess.

The Florida Division of Forestry would like to continue the collaboration and participation in the research and assist to the extent possible with continuing the efforts made to date. Because of this and the need for us to eventually move our district office and fire control facilities to a more desirable location, it is requested that the Lab and Related Facilities be transferred to the Florida Department of Agriculture and Consumer Services, Division of Forestry.

If this is done, such personnel and related resources that you are able to continue in this program can be housed and supported by the facility and personnel of the Division.

We would appreciate your favorable consideration and support of this request.

Sincerely,

JOHN M. BETHEA,
Director.

UNIVERSITY OF FLORIDA, SCHOOL OF FOREST RESOURCES AND CONSERVATION,
Gainesville, Fla., June 9, 1983.

Dr. ELDON ROSS,
Director, Southeastern Forest Experiment Station, USDA, Forest Service, Asheville, N.C.

DEAR ELDON: For several years, the School of Forest Resources and Conservation has collaborated with the Station's scientists at Lehigh Acres on eucalyptus studies. We have several joint projects there now.

Last fall, it became evident that budget problems were forcing reductions in your eucalyptus research. Now, I understand the Lehigh Acres Laboratory is being declared excess and that the Florida Department of Agriculture and Consumer Services is proposing that the facility be turned over to them, principally for use by its Division of Forestry.

If the Station must dispose of the laboratory, I hope that it will be transferred to the Department of Agriculture and Consumer Services. The School plans further eucalyptus studies and needs continued access to the clone bank seed orchards and data at Lehigh Acres. We have excellent relations with the Division of Forestry and thus could expect their agreement for such access.

Sincerely.

ARNETT C. MACE, JR.,
Director.

[Fort Myers News-Press, Published every morning—Daily and Sunday, Fort Myers, Florida]

AFFIDAVIT OF PUBLICATION

State of Florida, County of Lee.

Before the undersigned authority, personally appeared Brenda J. Yarger, who on oath says that she is the Accts OperSupr of the Fort Myers News-Press, a daily newspaper published at Fort Myers, in Lee County, Florida; that the attached copy of advertisement, being a Notice of Proposed Disposition in the matter of Land and Improvements, June 8, 15, 1983.

Affiant further says that the said Fort Myers News-Press is a paper of general circulation daily in Lee, Charlotte, Collier and Hendry Counties and published at Fort Myers, in said Lee County, Florida and that said newspaper has heretofore been continuously published in said Lee County, Florida, each day, and has been entered as a second class mail matter at the post office in Fort Myers in said Lee County, Florida, for a period of one year next preceding the first publication of the attached copy of the advertisement; and affiant further says that he has neither paid nor promised any person, firm or corporation any discount, rebate, commission or refund for the purpose of securing this advertisement for publication in the said newspaper.

BRENDA J. YARGER

Sworn to and subscribed before me this 15th day of June, A.D. 1983.

U.S. DEPARTMENT OF AGRICULTURE,
SOUTHEASTERN FOREST EXPERIMENT STATION,
Asheville, N.C., June 1, 1983.

Hon. LAWTON M. CHILES,
U.S. Senate,
Washington, D.C.

DEAR SENATOR CHILES: For the past 15 years, the Forest Service has conducted research at Lehigh Acres, Florida. Most of our studies dealt with eucalyptus for forest plantations. As a result of budget reductions during 1981-1983, our staff there has been reduced to one scientist with several part-time employees. Maintenance costs for our Lehigh Acres laboratory are too high for the size of our staff. Therefore, we have determined that the facility is excess to our needs.

We will not report the property as excess until you have had 30 days for review as specified in Section 316 of the 1983 Interior and Related Agencies Appropriation Act.

Site Name: Southeastern Forest Experiment Station, Forest Resources Laboratory, Lehigh Acres, Florida.

Description and size: Laboratory and office space, 10,716 Sq. Ft.

All properties are located in Lee County near Lehigh Acres, Florida, commencing at the southwest corner of the northwest quarter of Section 29, Township 44, Range 26 east, 10.02 Acres.

We have notified Senator Hawkins and Congressman Mack of plans to declare this property excess. Also, we are publishing the enclosed notice in the Fort Myers News Press and the Suburban Reporter (Lehigh Acres) on June 6 and 13, 1983. This is necessary to fulfill the requirements of the 1983 Interior and Related Agencies Appropriations Act.

Dr. Thomas Ellis, Assistant Station Director, called your Lakeland office last week to inform you of our plans. As he explained, we intend to have our scientist continue eucalyptus research through a cooperative agreement with the Florida Division of Forestry. We are indicating on our report to GSA the Division's interest in acquiring the Lehigh Acres property.

If you wish additional information, please write to us or call our office at FTS 672-0758 or 704-258-2850, extension 758.

Sincerely,

ELDON W. ROSS,
Station Director.●

GAO CHEMICAL WARFARE REPORT IS NOT FLAWED

HON. CLEMENT J. ZABLOCKI

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. ZABLOCKI. Mr. Speaker, a month ago during the House debate on the binary chemical weapons program, a number of charges were leveled against a new report by the General Accounting Office entitled "Chemical Warfare: Many Unanswered Questions." It appears as if the primary source of those criticisms was a lobbying document prepared and distributed to Members of the House by the Department of Defense.

Upon hearing of this lobbying document, Mr. Charles A. Bowsher, the Comptroller General of the General Accounting Office, wrote to assure me of the objectivity and independence of GAO's report. In his letter of June 15, 1983, Mr. Bowsher, in addition, offered to provide the House Committee on Foreign Affairs with an indepth response to the charges contained in the DOD lobbying document. Because of the importance of GAO's findings to the congressional debate on the proposed binary chemical weapons program, I asked Mr. Bowsher to proceed with his response.

Mr. Speaker, it has come to my attention that key Defense Department officials are continuing to denigrate this report in briefings and meetings with both Members of Congress and the press. I believe that the time has come to put an end to these unsubstantiated and false accusations. Accordingly, I commend to my colleagues Mr. Bowsher's 15-page July 6 letter to me which can be obtained from the Committee on Foreign Affairs or its Subcommittee on International Security and Scientific Affairs. What follows are a few highlights of GAO's responses to DOD claims which reaffirm the need for the House conferees to preserve the House's decisive and bipartisan majority vote on June 15 against binary production in the upcoming conference with the Senate on the fiscal year 1984 Defense authorization legislation. These highlights are:

DEAR CHAIRMAN ZABLOCKI: As requested by our office, we respond in this letter in detail to the charges made against our chemical warfare report ("Chemical Warfare: Many Unanswered Questions," April 29, 1983) in a 12-page anonymous and untitled document that has been circulating among congressional members. Typically, the General Accounting Office does not respond to such documents. While we usually respond imme-

diately to critiques by organizations (or even individuals representing their own views), we hesitate to give credence to an anonymous document by treating it seriously. In this case, however, the document has been given such wide distribution that it seems prudent to respond formally so as to set the record straight.

As we indicated in our letter to you on June 15, 1983, our chemical warfare report was prepared with the same objectivity and independence that GAO applies to all its products. Additionally, we find that most of the comments made in the anonymous document were made by DOD in our exit conference with Dr. Gold, the Deputy Assistant to the Secretary of Defense for Chemical Matters, and as is our customary practice, we responded to those comments in our report (see pages 103–06 and 119–22). . . .

One charge that the document makes is that GAO did not hold substantive discussions on the issues with DOD officials. This charge was made by DOD in our exit conference with Dr. Gold on January 24, 1983. Specifically, he raised the concern that we had not worked with his office.

We pointed out at the exit conference that we had conducted the interview and data collection phase of our work before he arrived at DOD and that we would make this clearer in the report. We also presented him with a list of individuals in DOD and the services whom we made contact with during our audit. The list includes Major General Niles Fulwyler and members of his staff (his office served as the Army's focal point [the only active DOD focal point at the time of our review] for chemical warfare matters during the period of our review), Colonel John Tengler of the Joint Chiefs of Staff, Victor Utgoff and Colonel Horace Russell of the National Security Council, Robert Mikulak of the Arms Control and Disarmament Agency, and Professor John Deutch of the Massachusetts Institute of Technology and Chairman of the Defense Science Board Summer Study of Chemical Warfare (during a briefing on chemical warfare that he presented at the MITRE Corporation). We added that we had attended and obtained testimony presented to the Senate Appropriations Committee in May 1982 by Dr. Richard L. Wagner, the Assistant to the Secretary of Defense for Atomic Energy, by Dr. Theodore Gold, the Deputy Assistant to the Secretary of Defense for Chemical Matters, and by the Honorable James F. Leonard, former Ambassador and senior official in the Arms Control and Disarmament Agency on chemical and biological warfare issues.

We also talked with other non-DOD experts such as Dr. Matthew Meselson of Harvard University. We are not sure who on the above list is meant in the document's emotion-laden charge that GAO's sources include "anti-chemical activists." We do not believe, however, that an information synthesis can omit serious, well-qualified critics of Administration policies or proposals. Such an omission would be true grounds for methodological criticism.

GAO Claims: "The GAO report alleges that the DOD lacks knowledge about the size, condition and composition of its own chemical stockpile."

DOD Response: "This allegation is false and, not only is it unsupported by the facts, it is not even supported by the documentation cited in the GAO report . . . Moreover, GAO did not request stockpile information from DOD nor even avail themselves of the primary source document on stockpile status."

GAO Comments: "In summary, our report builds upon previous audit work conducted by GAO and a follow-up study indicating the continued presence of several critical problems. After an extended period for agency review, DOD officials did not provide or give the titles of any additional sources that would clarify the status of the stockpile. Repeated requests for such documentation were made during the exit conference with DOD in response to concerns raised by Dr. Gold. As noted in our report (p. 104), no additional sources or titles were provided. The claim that GAO did not request stockpile information is, therefore, false."

GAO Claim: "The present GAO report quotes from the 1977 GAO report which 'found that little had been done to maintain the stockpile as serviceable or to restore its unserviceable portions.' The present report concludes that 'we have found no new evidence from the present review that suggests that the situation has changed.' "

DOD Response: "The GAO did not request from DOD any information on our restoration activities but instead chose to rely on outdated reports to make a judgment. The evidence is available if the team had bothered to look. From December 1980 to December 1982 the DOD increased the percentage of 155mm and 8-inch nerve agent projectiles ready for issue from less than 15% to almost 65%. In the same period the percentage of bombs ready for issue increased from 75% to over 95%. This information is documented, and was reported to Congress."

GAO Comments: "As we stated previously to this reply, and noted on page 104 of our report, we responded to this criticism at the exit conference held with DOD officials on January 24, 1983. We repeatedly asked for recent information on DOD efforts to assess the stockpile size and condition. No additional information or sources were provided at that time. Given the important achievement that would be represented by an increased percentage of ready-for-issue 155-mm and 8-inch nerve agent projectiles (from less than 15 percent to approximately 65 percent) it is surprising that we were not advised of it. But such an achievement would also have obvious implications for the current rationale supporting projected binary requirements."

5. GAO Claim: "As opposed to an emphasis on arms control, U.S. chemical policy reflects either an emphasis on weapons or an emphasis on defense with a limited retaliatory capability for deterrence of chemical warfare."

DOD Response: "The overriding U.S. chemical warfare objective since 1969 has been to achieve a complete, verifiable ban on chemical weapons. This objective has been clearly stated in both words and deeds by four successive administrations, including the present one."

GAO Comments: "The anonymous document implies that GAO chooses not to mention that the overriding U.S. chemical warfare objective has been to achieve a complete, verifiable ban on chemical weapons. By presenting the GAO statement out of context, the document in fact misleads the reader. Page 17 of our report does present DOD's statement that "the ultimate U.S. goal is a complete and verifiable ban on developing, producing, and stockpiling chemical weapons.' "

GAO Claim: "Little is known about the size or composition of the Soviet stockpile."

DOD Response: "The GAO authors did not evaluate any primary source intelligence data and therefore are unqualified to make such judgments."

GAO Comments: "A misconception is reflected in the anonymous document regarding the meaning of 'primary source intelligence data' and the manner in which GAO treated these data. We did indeed obtain intelligence data, including:

(1) " 'Chemical and Biological Warfare Capabilities—U.S.S.R.,' DIA, February 1981, Secret.

(2) " 'Chemical and Biological Warfare Capabilities—U.S.S.C.,' DIA, February 1983, Secret.

(3) " 'Chemical and Biological Wafare Capabilities—European Communist Countries (Less U.S.S.R.),' DIA, June 8, 1982, Secret.

(4) "Report of the Defense Science Board 1980 Summer Study Panel on Chemical Warfare," OUSD for R&E, January 1981, Secret.

(5) "DOD Report to the Congress on Chemical Warfare," March 1982, Secret."

These are the primary documents in which the Soviet threat in terms of stockpile, production facilities, test sites, depots, and types of agents is presented. We treated the documents as primary source data and accepted the data as fact. We did not attempt to evaluate the methods by which the data were obtained. We also received briefings on the Soviet threat from DIA and JCS. And our final draft was reviewed by the CIA, specifically to examine our treatment of intelligence data.

Thus, it is not the case that we failed to obtain and review classified data up to and including secret documents . . .

GAO Claim: "The available data do not sustain the argument that binaries offer substantial technical operational advantages over existing weapons; binaries place greater space requirements on storage, transportation, and deployment; the mixing requirements of binaries may deminish [sic] their operational effectiveness; peacetime advantages (of binaries) may have related wartime costs (such as mixing time and more complex logistics)."

DOD Response: "The GAO auditors did not investigate the technical characteristics of either binary or unitary chemical weapons; nor did they compare them against each other or against some type of objective criteria."

GAO Comments: "Any investigation into the technical and operational characteristics of the binary weapons quickly identifies the lack of field-test data. One is left with only simulation data generated by using simulants rather than actual agents. As a result, and as is pointed out in the GAO report, conclusions about many of the technical characteristics of binaries and comparisons with unitary weapons are open to question. Some of the comparisons made by the services and DOD suffer from the same lack of information and, as a result, GAO simply points out that they are not supported by empirical data. GAO does, in fact, discuss alternatives to binaries (pp. 61–67). GAO agrees that the services and DOD have "concluded that binary weapons are clearly preferred to present or new unitary weapons." Our position is simply that this conclusion is not sustained by available data."

GAO Claims: "Binary production might complicate arms control verification procedures."

DOD Response: "The difficult problem of verifying nonproduction of key precursors

remains unchanged whether or not the U.S. proceeds with binary production."

GAO Comments: "The GAO report in fact once again attempts to present a balanced picture of the implications that modernization through binaries might have for disarmament. In this case, the literature is not conclusive, hence the summary statement that binaries might complicate disarmament negotiations. . . . We indicate that while it seems that binaries might present new verification problems, little is known about what the specific verification problems are or what their solutions will be."

GAO Claim: "The United States unlike the Soviet Union, has not built a strong ability to defend against chemical warfare."

DOD Response: "The United States is not yet where we need to be in chemical protective capabilities, but we have made significant improvement over the past several years. For example, all overseas Army and Air Force units have chemical protective equipment, training and exercises are now routinely conducted, and there are major research and development programs to improve equipment. Our program is still underway and will continue to evolve to counter the threat."

GAO Comments: "The precise statement made in the GAO report is that 'the United States, unlike the Soviets, does not have a strong ability to defend against chemical warfare' (p. 57). The statement that 'GAO falsely implied that the U.S. has ignored chemical defenses while seeking new chemical weapons' is a contradiction of our statement, on page 57 of our report, in a discussion about past and present efforts, that 'We found manifest progress, but we also noted some continuing problems and limitations.' We made a similarly balanced statement on the issue of funding in the same section of our report."

Mr. Speaker, in a related development since the June 15 decisive House vote against binary production, the GAO issued on July 1, 1983 another report on our chemical program in which the GAO concluded that "the U.S. Army's program to assure the security and safety of the U.S. chemical munition stockpile is comprehensive and effective."

I know many of our colleagues will be relieved to know that our country's currently large stockpile of chemical munitions and bulk chemical agents was found by GAO to be comprehensive and working effectively. The GAO report states:

Army efforts have been successful. For at least the last five years (1978-82), the extent of chemical accidents and incidents has been minimal. GAO visited four storage sites which, together, store the vast majority of the stockpile and found that three had experienced a total of only five minor chemical accidents or incidents for the five-year period. The other site had experienced none. All the accidents or incidents were immediately and thoroughly investigated, and none led to serious personal injury. All chemical agent contamination was restricted, with no release to the outside atmosphere. Moreover, four of these cases were associated with demilitarization or disposal operations rather than normal storage and maintenance.

These findings make it clear that safety interests and requirements do not justify embarking on an unproven and untested binary production program.●

HOW PITTSBURGHERS VIEW THE ISSUES

HON. WILLIAM J. COYNE
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. COYNE. Mr. Speaker, I would like to share with my colleagues the results of a newsletter survey I recently conducted for the 14th District of Pennsylvania. The nearly 4,000 residents of the Pittsburgh area who completed questionnaires responded decisively to seven questions on general issues of the day. Often their opinions opposed the policies which the administration sets forth as mandated by the American people. In several areas, the people of Pittsburgh seem to have a different view.

A consensus among these respondents is apparent on the subject of America's Armed Forces. Pittsburghers want to cut back sharply the defense budget. Specifically regarding the pressing issue of U.S. involvement is Central America, Pittsburghers overwhelmingly oppose providing American military assistance to countries such as El Salvador. A majority responded that they believe the U.S. policy toward Central America should be to support negotiations among conflicting factions and to provide only economic assistance, not military assistance of any kind, to Central American nations.

To find their positions on defense spending, I asked my constituents to choose from four levels of proposed defense budgets. Fewer than one in eight said they support the President's proposed defense spending plan of $244.7 billion. More than half responded that they would prefer even less defense spending than the $235.4 billion approved by the House budget resolution—indicating that even a reduction as massive as $10 billion is not enough.

This strong statement about the level of Pentagon spending, coupled with the preference of Pittsburghers not to become involved militarily in Central America, tells me that we should start to focus on fighting the domestic problems individuals in America face every day—inflation, unemployment, and lack of basic human services.

I asked my constituents what they thought about domestic spending and what they thought we should do to reduce the Federal deficit. Not surprisingly, out of the four measures suggested to reduce the deficit, 66 percent of the voters chose to cut defense spending as a means of getting the Federal budget in the black. Nearly two-thirds chose to initiate an economic stimulus program, and suggested public works or jobs programs. Further, more than half said they would not want to reduce human services spending or to increase taxes in order to reduce the Federal deficit. As one constituent commented, "We need to invest in the future, to support higher education and basic human services."

Given the chance to suggest other means of reducing the Federal deficit, three themes recurred: First, constituents wanted to eliminate waste in the Government bureaucracy; second, many wanted a reduction in foreign aid as a means of bringing the American economy back to its feet; and last, more often than any other suggestion, constitutents demanded reforms in the tax structure. A tax system with no deductions or loopholes was popular with these Pennsylvanians.

On the subject of taxes, I asked my constituents to indicate their views on seven tax strategies currently considered as plausible means of reducing the Federal deficit. I included Congressional Budget Office estimated savings for each measure.

All told, the respondents agreed to measures that would save the Government an estimate $232 billion over 5 years. By a 3 to 1 margin, the voters agreed to limit tax deduction for business entertainment, a savings of about $5.7 billion; 61 percent thought that the period for depreciating new buildings should be extended by 5 years, a savings of $19.3 billion. Repeal of the oil and gas depletion allowance to save $8.7 billion and stopping income averaging for tax purposes to save $20.9 billion were also high priorities.

The respondents were divided on the option with the biggest savings of all, repeal of the third year of the Reagan tax cut for an estimated $177 billion savings; 49 percent favored the repeal, 43 percent opposed it, and 8 percent were not sure. A $10,000 limit on deductions from consumer borrowing, including home mortgages and car loans, for $9 billion, was narrowly rejected. Constituents wanted to keep sales tax deductions, a potential $27.9 billion in revenues.

Control of health care costs, particularly hospitalization, is one issue on which most everyone agrees action is necessary. Yet the constituents who filled out the questionnaire were split on a particular method of providing affordable and adequate health care. While about half opposed both a comprehensive national health insurance program or national health insurance for catastrophic illness, nearly two-thirds preferred a Federal program for controlling rising hospital costs.

Rising costs are also a concern in the area of natural gas prices. The current administration favors a 3-year period for removing all price controls on nat-

ural gas, which opponents fear would lead to higher gas prices. I asked my constituents if they favored the administration plan or a second plan which would maintain price controls for natural gas while increasing controls on newly discovered gas in the future; 62 percent of the respondents objected to decontrol, and nearly three-fourths said they favored stricter controls on newly discovered gas through 1987.

My constituents also strongly agreed on the need for campaign finance reform. Four out of five favor limiting the amount of money a candidate for Congress can spend. Nearly the same number agreed to limiting the amount of money Political Action Committees (PAC's) can contribute to congressional campaigns.

It is clear to me that the residents of the 14th Congressional District of Pennsylvania have deeply held opinions on which course this Nation should take. They want to trim the fat off the Federal budget without cutting too far into the programs that help the average family. They particularly want to keep the massive military budget from absorbing funds needed for more immediate domestic human services programs. They want to keep the United States out of military involvement in Central America.

As their elected Representative in Congress, I accept the mandate given by Pittsburgh voters.

At this point, Mr. Speaker, I would like to include in the record the exact response to the questionnaire, as tabulated by the House Information Service.

BILL COYNE SURVEY

1. Health costs: Costs for hospital care are rising faster than inflation. To make sure that the average family can afford adequate health care, which do you prefer?

(a) A comprehensive national health insurance system—Result: Yes—40 percent; no—56 percent; not sure—4 percent.

(b) National health insurance for catastrophic illness—Result: Yes—39 percent; no—56 percent; not sure—6 percent.

(c) A federal program aimed at controlling rising hospital costs.—Result: Yes—60 percent; no—35 percent; not sure—5 percent.

2. Natural gas prices: The Administration says the market place should determine the price of natural gas. It proposes to remove price controls for all natural gas, including gas already discovered, over a three year period.

Opponents argue that decontrol means eventual higher gas prices. They propose maintaining controls on "old gas, rolling back the allowable ceiling prices to January 1, 1982 levels, while placing stricter controls on new gas through 1987.

Do you favor decontrolling the price of gas over the next three years? Result: Yes—27 percent; no—62 percent; not sure—11 percent.

Do you favor maintaining price controls on gas already discovered, rolling back ceiling prices to January 1, 1982, while putting stricter controls on new gas through 1987? Result: Yes—72 percent; no—20 percent; not sure—8 percent.

3. Taxes: Unprecedented federal deficits of over $200 billion a year are considered to be a serious restraint against economic recovery. Following are some of the tax strategies being considered to reduce the deficit (with the figure in parenthesis showing the Congressional Budget Office estimate of the revenue gain for the federal government for the next five years). Indicate your views on each:

(a) Eliminate sales tax deduction ($27.9 billion)—Result: Yes—38 percent; no—51 percent; not sure—11 percent.

(b) Eliminate "income averaging for people with rapidly rising income who enjoy lower rates based on incomes in previous years ($20.9 billion)—Result: Yes—53 percent; no—39 percent; not sure—8 percent.

(c) Limit tax deductions for business entertainment and meals to 50% of the amount spent ($5.7 billion)—Result: Yes—69 percent; no—24 percent; not sure—7 percent.

(d) Lengthen the period for depreciating new and newly-purchased buildings from 15 to 20 years ($19.3 billion)—Result: Yes—61 percent; no—30 percent; not sure—9 percent.

(e) Put a $10,000 ceiling on deductions from all consumer borrowing such as home mortgages, auto loans and other nonbusiness loans ($9 billion)—Result: Yes—43 percent; no—46 percent; not sure—11 percent.

(f) Repeal the oil and gas depletion allowance ($8.7 billion)—Result: Yes—58 percent; no—27 percent; not sure—15 percent.

(g) Repeal the third year, 10 percent income tax deduction enacted in 1981 ($177 billion)—Result: Yes—49 percent; no—43 percent; not sure—8 percent.

4. Central America: The Congress has been asked by the Administration to increase military aid to countries such as El Salvador. What do you think the United States policy should be toward Central American countries which face political and military challenges:

(a) Provide military assistance—Result: Yes—14 percent; no—81 percent; not sure—5 percent.

(b) Provide military assistance, while supporting negotiations among factions—Result: Yes—23 percent; no—71 percent; not sure—6 percent.

(c) Provide economic assistance only, while supporting negotiations—Results: Yes—56 percent; no—38 percent; not sure—6 percent.

5. Defense spending: This year the Administration proposed a defense budget of $244.7 billion. The House approved $235.4 billion for defense—less than the Administration requested, but more than last year.

What level of defense spending do you favor? (check one) not sure: 3 percent.

(a) The $244.7 billion Administration request—Result: 13 percent.

(b) More money than the Administration requested—Result: 3 percent.

(c) The $235.4 billion approved by the House—Result: 25 percent.

(d) Less than either the Administration requested or the House approved—Result: 56 percent.

6. Campaign spending: To lessen the influence of money on the electoral process, would you favor a revision of the election law limiting the amount a candidate can spend on a campaign for Congress? Result: Yes—83 percent; no—12 percent; not sure—5 percent.

As to Political Action Committees (PACs), do you favor placing more stringent limits on the amount of money congressional candidates can receive from these sources? Result: Yes—81 percent; no—12 percent; not sure—7 percent.

7. Federal deficit: The federal deficit for this year is projected to be four times greater than it was during the last year of the Carter Administration. How would you reduce the deficit?

(a) Reduce defense spending—Result: Yes—66 percent; no—20 percent; not sure—14 percent.

(b) Reduce human services spending—Result: Yes—24 percent; no—57 percent; not sure—19 percent.

(c) Increase taxes—Result: Yes—24 percent; no—55 percent; not sure—21 percent.

(d) Initiate an economic stimulus program—Result: Yes—62 percent; no 18 percent; not sure—20 percent.

(e) Other (please indicate)—Result: Answered—47 percent; did not answer—53 percent.●

DR. MARTIN LUTHER KING, JR. DAY

HON. PETER H. KOSTMAYER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. KOSTMAYER. Mr. Speaker, tomorrow the House of Representatives has the opportunity to designate the third Monday in January each year as a legal public holiday to commemorate the birthday of Dr. Martin Luther King, Jr.

Designating new public holidays in honor of someone is not an action that the Congress should treat lightly or without careful scrutiny. However, I believe that commemorating Doctor King's birthday is an appropriate tribute to a man who devoted his whole life to the pursuit of those ideals on which the United States was founded. His commitment to a peaceful social revolution moved us closer to meeting these national goals and his short life served as a sign of hope for millions of Americans, both black and white. He proved that violence and lawlessness were not necessary to achieve compassion and justice for this country.

Mr. Speaker, this month is the 20th anniversary of Doctor King's "I Have A Dream" speech at the Lincoln Memorial on August 28, 1963. His dream has not faded or dimmed in the 20 intervening years. There is important unfinished business. We as a nation must use his birthday each year to rededicate ourselves to the principles and goals for which he died.

In 1979, I voted in favor of commemorating Doctor King's birthday on the third Monday in January and I do so again this year. It is my hope that my distinguished colleagues will recognize the importance of this bill and by doing so rededicate ourselves to Doctor King's commitment to equality and justice.

Doctor King's speech from 1963 follows:

I HAVE A DREAM

MARTIN LUTHER KING, JR.

I am happy to join with you today in what will go down in history as the greatest demonstration for freedom in the history of our nation.

Five score years ago, a great American, in whose symbolic shadow we stand today, signed the Emancipation Proclamation. This momentous decree came as the great beacon light of hope for millions of Negro slaves who had been seared in the flames of withering injustice. It came as the joyous daybreak to end the long night of their captivity.

But one hundred years later the Negro still is not free. One hundred years later, the life of the Negro is still badly crippled by the manacles of segregation and the chains of discrimination. One hundred years later, the Negro lives on a lonely island of poverty in the midst of a vast ocean of material prosperity. One hundred years later, the Negro is still languished in the corners of American society and finds himself an exile in his own land. So we have come here today to dramatize the shameful condition.

In a sense we've come to our Nation's Capital to cash a check. When the architects of our republic wrote the magnificent words of the Constitution and the Declaration of Independence, they were signing a promissory note to which every American was to fall heir. This note was a promise that all men, yes, black men as well as white men, should be guaranteed the unalienable rights of life, liberty and the pursuit of happiness.

It is obvious today that America has defaulted on this promissory note insofar as her citizens of color are concerned. Instead of honoring this sacred obligation, America has given the Negro people a bad check, a check which has come back marked "Insufficient Funds." But we refuse to believe the bank of justice is bankrupt. We refuse to believe that there are insufficient funds in the great vaults of opportunity of this nation. So we have come to cash this check, a check that will give us upon demand, the riches of freedom and the security of justice. We have also come to this hallowed spot to remind America of the fierce urgency of now.

This is no time to engage in the luxury of cooling off or to take the tranquilizing drug of gradualism. Now is the time to make real the promises of democracy. Now is the time to rise from the dark and desolate valley of segregation to the sunlit path of racial justice. Now is the time to lift our nation from the quicksands of racial injustice to the solid rock of brotherhood. Now is the time to make justice a reality for all of God's children.

It would be fatal for the nation to overlook the urgency of the moment. This sweltering summer of the Negro's legitimate discontent will not pass until there is an invigorating autumn of freedom and equality. Nineteen sixty-three is not an end but a beginning. Those who hoped that the Negro needed to blow off steam and will now be content will have a rude awakening if the nation returns to business as usual. There will be neither rest not tranquility in America until the Negro is guaranteed his citizenship rights. The whirlwinds of revolt will continue to shake the foundations of our nation until the bright day of justice emerges.

But there is something I must say to my people who stand on the warm threshold which leads them to the palace of justice. In the process of gaining our rightful place we must not be guilty of wrongful deeds. Let us not seek to satisfy our thirst for freedom by drinking from the cup of bitterness and hatred. We must forever conduct our struggle on the high plane of dignity and discipline. We must not allow our creative protest to degenerate into physical violence. Again and again we must rise to the majestic heights of meeting physical force with soul force.

The marvelous new militancy which has engulfed the Negro community must not lead us to a distrust of all white people, for many of our white brothers, as evidenced by their presence here today, have come to realize that their destiny is tied up with our destiny. They have come to realize that their freedom is inextricably bound to our freedom. We cannot walk alone.

And as we walk we must make the pledge that we shall always march ahead. We cannot turn back. There are those who are asking the devotees of civil rights: "When will you be satisfied?" We can never be satisfied as long as our bodies, heavy with the fatigue of travel, cannot gain lodging in the motels of the highways and the hotels of the cities. We cannot be satisfied as long as the Negro's basic mobility is from a smaller ghetto to a larger one. We can never be satisfied as long as our children are stripped of their selfhood and robbed of their dignity by signs stating: "For Whites Only." We cannot be satisfied as long as the Negro in Mississippi cannot vote and the Negro in New York believes he has nothing for which to vote. No, no, we are not satisfied and we will not be satisfied until justice rolls down like the waters and righteousness like a mighty stream.

I am not unmindful that some of you have come here out of great trials and tribulations, some of you have come fresh from narrow jail cells, some of you have come from areas where your quest for freedom left you battered by the storms of persecution and staggered by the winds of police brutality. You have been the veterans of creative suffering. Continue to work with the faith that unearned suffering is redemptive.

Go back to Mississippi, go back to Alabama go back to South Carolina, go back to Georgia, go back to Louisiana, go back to the slums and ghettos of our northern cities, knowing that somehow this situation can and will be changed. Let us not wallow in the valley of despair.

I say to you today, my friends, even though we face the difficulties of today and tomorrow, I still have a dream. It is a dream deeply rooted in the American dream. I have a dream that one day this nation will rise up and live out the true meaning of its creed: "We hold these truths to be self-evident that all men are created equal."

I have a dream that one day on the red hills of Georgia the sons of former slaves and the sons of former slaveowners will be able to sit down together at the table of brotherhood.

I have a dream that one day even the State of Mississippi, a state sweltering with the heat of injustice, sweltering with the heat of oppression, will be transformed into an oasis of freedom and justice. I have a dream that my four little children will one day live in a nation where they will not be judged by the color of their skin but by the content of their character. I have a dream today.

I have a dream that one day down in Alabama with its vicious racists, with its Governor having his lips dripping with the words of interposition and nullification—one day right there in Alabama, little black boys and black girls will be able to join hands with little white boys and white girls as sisters and brothers.

I have a dream today.

I have a dream that one day every valley shall be exalted, every hill and mountain shall be made low, the rough places will be made plain and the crooked places will be made straight, and the glory of the Lord shall be revealed, and all flesh shall see it together.

This is our hope. This is the faith that I go back to the South with. With this faith we will be able to hew out of the mountain of despair a stone of hope. With this faith we will be able to transform the jangling discords of our nation into a beautiful symphony of brotherhood. With this faith we will be able to work together, to pray together, to struggle together, to go to jail together, to stand up for freedom together, knowing that we will be free one day.

This will be the day when all God's children will be able to sing with new meaning:

My country 'tis of thee,
Sweet land of liberty,
Of thee I sing:
Land where my fathers died,
Land of the pilgrims' pride,
From every mountain-side
Let Freedom ring.

And if America is to be a great nation, this must become true. So, let freedom ring from the prodigious hill tops of New Hampshire. Let freedom ring from the mighty mountains of New York. Let freedom ring from the heightening Alleghenies of Pennsylvania. Let freedom ring from the snowcapped Rockies of Colorado. Let freedom ring from the curvaceous slopes of California. But not only that, let freedom ring from Stone Mountain of Georgia.

Let freedom ring from Lookout Mountain of Tennessee.

Let freedom ring from every hill and molehill of Mississippi. From every mountainside, let freedom ring. And when we allow freedom to ring, when we let it ring from every village, from every hamlet, from every state and every city, we will be able to speed up that day when all of God's children, black men and white men, Jews and Gentiles, Protestants and Catholics, will be able to join hands and sing in the words of the Old Negro spiritual: "Free at last! Free at last! Thank God almighty, we are free at last!"●

THE KGB: THE REAL ENEMY—PART I

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Monday, August 1, 1983

● Mr. MICHEL. Mr. Speaker, the New York Times recently published a three-part study of the Soviet intelligence and security agency, the KGB. One of the findings of that report states:

During the first half of this year every North Atlantic Treaty Organization member in Europe with the exception of Luxembourg and Portugal, expelled or arrested men described as Soviet agents.

This series is all but incredible in its documentation of KGB espionage, ex-

ploitation of "peace groups" and attempts to gain Western technology through various means.

I found this series so informative that I want to bring it to the attention of you and our colleagues. Too often we simply take KGB activities for granted and yawn when we are told what the KGB is doing. We say, in effect: "That, after all, is the way they are." But it is time we took a new, clear look at KGB activity and remember what that organization is: An integral part of a militant ideology dedicated to the eradication of Western values and rights.

At this point, I wish to insert in the RECORD, part I of "Tracking the KGB." This part is titled, "The KGB Goes on the Offensive and the West Begins To Strike Back" by John Vinocur in the New York Times, Sunday, July 14, 1983.

THE K.G.B. GOES ON THE OFFENSIVE AND THE WEST BEGINS STRIKING BACK

(By John Vinocur)

BONN, July 23.—The Soviet intelligence and security agency, the K.G.B., has entered a phase of aggressiveness in its activities in the West, according to allied officials. The upsurge is cited as the principal cause of a series of expulsions of Soviet agents from countries around the world since the start of 1983.

The number of Russians expelled for illegal intelligence-gathering so far this year has reached 90, according to the United States State Department. Six others, identified as spies, left on their own. The total for all of 1982, according to United States Government records was 49; in 1981, it was 27.

TECHNOLOGY AND MISSILES

The increased number of expulsions, including the French decision to order the departure of 47 Russians in April, is widely described as a function of the stepped-up K.G.B. effort, but not a result of a coordinated Western campaign.

Although there were varying views on the degree of increase in the K.G.B.'s activities, intelligence analysts, government officials, and active and former counterespionage officers interviewed in six European countries and the United States agreed that the areas of Soviet concentration were the acquisition of advanced Western technology, and an attempt to block, through political-influence operations, NATO's deployment at the end of the year of new nuclear missiles in Western Europe.

During the first half of this year every North Atlantic Treaty Organization member in Europe with the exception of Luxembourg and Portugal expelled or arrested men described as Soviet agents.

The latest of the Russians to be expelled was Vladislav Istomin, a Vice Consul in Geneva, who was told to leave Switzerland early this month after he was described as a spy specializing in the collection of technological and economic information.

Switzerland, a neutral, also closed the Bern bureau of the Novosti press agency, citing its attempts to influence disarmament groups calling themselves the peace movement, and threw out a Soviet journalist and a diplomat described as his K.G.B. superior.

Denmark expelled Yevgeny Motorov, head of Line X for the K.G.B. in Copenhagen. Line X is the field section for science and technology.

Danish counterespionage sources said he tried not only to obtain microelectronic equipment on NATO's embargoed lists, but also to interest a Dane, a potential agent, in joining the country's Fulbright Scholarship Committee.

A PRIZED TARGET

In Belgium, Yevgeny Mikhailov, director general of a Soviet-Belgian company interested in computers, was thrown out, just as his predecessor was seven years ago.

These expulsions have counterparts in Thailand, Australia and Japan, a particularly prized target for its technological innovations. Even the Iran of Ayatollah Ruhollah Khomeini sent home 18 Russians described as K.G.B. agents, denouncing their "treachery."

If Soviet efforts to acquire technology in Japan are regarded by United States officials as particularly intense, it is in Western Europe that counterintelligence officials have been most forthcoming in discussing K.G.B. activities.

"We see a multiplication and an intensification in the technology sector that must reflect unusual pressure to perform," a West German counterespionage official said. "It just wasn't there before in the same degree. They've become very aggressive."

Another West German expert spoke of a coordinated, intense campaign to mobilize Western opinion against the new NATO missiles.

ABUSIVE AND OUTRAGEOUS

In Paris, aides to President Francois Mitterrand used the words "abusive" and "outrageous" in describing the K.G.B. activities that led to the expulsions there.

An American who surveys Soviet espionage activities dated the buildup back two and a half to three years.

The onset of détente in the late 60's led to a general upswing in efforts by the K.G.B., he said, "but their plans appear to have been pushed forward. If you look at the behavior, you cannot reach another conclusion."

"The people who were on the streets work overtime, and the other guys who were usually in the house went into the streets," the American said.

He found a symbol for the expansion in a Soviet general, a man normally leaving his office only rarely, who was "hustling on the street"—seeking to make an illegal contact in an allied capital.

The start of the buildup preceded the coming to power of Yuri V. Andropov, the Communist Party chief who headed the K.G.B. and its half-million or more agents for 15 years.

But it developed under him—and with it the K.G.B.'s reputation as a highly skilled, professional organization, hampered by bureaucracy, corruption and internal rivalries, yet unquestionably respected, or reviled, as a leading international instrument of Soviet power.

A DIVISION OF LABOR

In addition to the K.G.B.'s assertiveness, there are reports of its increased use of Eastern European intelligence services in coordinated operations.

A West German expert, one of those in Western Europe who see relatively limited changes in the tempo of Soviet espionage, insisted that its overall effectiveness had grown because of better division of labor—giving tasks formerly accomplished by K.G.B. officers to the so-called "satellite agencies."

Documents turned over to the Swiss authorities after the occupation of the Polish Embassy in Bern by dissidents showed unusual coordination between the East bloc embassies there in amassing information on military matters.

Some evidence exists that East Germany, after having achieved remarkable penetration in West Germany, is increasing its espionage effort in Scandinavia, notably in Denmark.

The Czechoslovaks are strongly present in Austria—the West European country widely described as the least resistant to Soviet-led espionage—and the Bulgarians in Italy, Greece, and Turkey.

A United States Government document, assessing a decade of Western technology collection by the Soviet intelligence agencies and their East European counterparts, found last year that it had saved the Warsaw Pact "hundreds of millions of dollars" and "years in development time."

The acquisitions, the report said, have permitted the modernization of the pact's weapons industry, greater weapons performance, and the ability to build in countermeasures "to Western weapons early in the development of their own weapons programs."

General notions of the extent of the K.G.B.'s activities have been reinforced as well.

TRAINING OF TERRORISTS

Pro and con discussions among Western intelligence agencies, current six or seven years ago, over the possibility of Soviet involvement in the training of terrorists have largely subsided, replaced by a general acceptance that as many as 2,000 or 3,000 members of the Palestine Liberation Organization received specialized training in the Soviet Union. The P.L.O., in turn, furnished instruction to Western European terrorists.

Varying presumptions and theories still exclude any single line among the Western agencies about the role Mehmet Ali Agca says the K.G.B. played in aiding his attempt on the life of Pope John Paul II in 1981.

The French and Italian intelligence services are among those tending to accept the premise that the Russians were a party to the shooting. But, with the exception of the Italians, none of the European counterespionage agencies seem to have made a priority of investigating the case.

Rather, the attention of these agencies is mainly focused on trying to keep track of the K.G.B. officers in so-called "legal" positions—embassies, trade missions, international organizations—running agent networks made up of target-country nationals and "illegals," or Russians with false identities who have been submerged over periods of 10 to 15 years in the West.

The job is enormous. In most Western countries, the percentage of officers of the K.G.B., and the G.R.U., the Soviet military intelligence organization, among Soviet "legals" is estimated at about 30 to 40 percent of the entire Soviet representation.

A PRIME TARGET

In a country like France, this would mean about 400 officers. According to Nikolai Polyansky, a Russian who defected while working for Unesco in Paris in 1981, the percentage of Soviet intelligence officers in a country like Switzerland, a prime target because of its international organizations and financial community, runs to about two-thirds the entire staff.

In France, officials consider that the number of Soviet agents has increased significantly, and date the buildup from the last four years.

In West Germany, where the mass of Warsaw Pact intelligence operations are carried out by East Germans, the 408 Russians in official delegations have been described as including 109 confirmed intelligence officers, and 77 who are suspected of serving intelligence functions.

Since full, 24-hour surveillance of a single Soviet officer by a counterespionage service, including relays and replacements, can involve as many as 20 men over a week, pressures on counterespionage services have grown.

FATIGUE AND ANGER

"To understand what the French did when they threw out the 47," an expert explained, "you can assume that the decision was weighed politically, and bolstered by very good evidence obtained by the very best technical means. But plain fatigue and real anger played a part."

The French expulsions, which clearly strengthened the determination of other governments to move against K.G.B. operations, were essentially aimed at Line X in Paris. President Mitterrand actually received 127 names for possible expulsion, and the final list was drawn from them.

The Government's vague explanation at the time of the expulsions in April mentioned intolerable interference in several areas of French life.

The cases, in fact, involved rather classic military espionage, with considerable, but not dominant, interest in France's development of a neutron weapon.

Soviet officers bribed and blackmailed French citizens. The lack of arrests of the K.G.B.'s French agents has been explained privately as an attempt to keep the Russians in the dark about the extent of French knowledge of their operations.

A K.G.B. DEFECTOR

The French have described as "interesting in a general sense without direct bearing on the expulsions" a series of disclosures about K.G.B. operations by Vladimir Kuzichkin, a K.G.B. major in charge of illegal operations in Iran who defected to Britain in June 1982.

One report, attributed to a Western diplomat in Moscow, told of France's breaking a Soviet Embassy code through an unusual technological advance. There was no confirmation, but highly perfected listening and surveillance devices are believed to be an important factor in the West's evaluation of K.G.B. activities.

Mr. Polyansky said in an interview that all Western intelligence agencies had enough detailed information on Soviet intelligence officers and their activities in Western countries to proceed with scores of expulsions, and that this had been the case in France for years.

"All that was needed is the political will," he said. "Mr. Mitterrand had it. His predecessor did not. The evidence is there. Take West Germany. The evidence is there. The political will is missing."

Intelligence officials repeatedly state that expulsions and attitudes of individual countries toward Soviet intelligence activities go far beyond the activities themselves and relate to domestic politics.

If a Socialist Government can expel 47 Russians without difficulty or severe reprisal, an official said, then similar decisions become less problematical elsewhere.

There is a strong assumption among intelligence and political officials outside France that, regardless of the Soviet Union's "abusive" and "outrageous" behavior, Mr. Mitterrand would not have made his decision unless he had some clear political points to make.

The officials assume that he sought to weaken the French Communist Party as a source of potential trouble within his coalition Government of Socialists and Communists; to strengthen his anti-Soviet credentials at a time when France hoped for maximum understanding of its economic problems among its Western allies, notably the United States, and to cut the ground away from any domestic opposition that would push for French acceptance of the Soviet demand that French missiles be counted in calculating a possible agreement on intermediate-range nuclear missiles in Europe.

For a former British specialist in Soviet intelligence operations, the most significant aspects of the series of expulsions are whether the Russians are allowed to substitute new personnel, and if there are signs, however small, of the explusions' effect on K.G.B. operations.

So far, in France, none of the K.G.B. officers have been replaced. The Soviet Union has proposed three or four names to fill the corresponding positions at Unesco from which its men were expelled, but they have not been approved by the French Government.

VIRTUALLY NO RETALIATION

For some experts, the fact that there has been virtually no retaliation by the Soviet Union for most of the expulsions is a clear sign that it seeks to limit damage by avoiding a cycle of countermeasures and new reprisals.

In the case of France, the Russians are understood to have been informed that dozens of new expulsions could take place if the French Embassy staff in Moscow were diminished.

Expulsions in themselves are believed to create substantial problems within the K.G.B.

As a result, numbers of experienced officers cannot be used easily in the West again, and extreme caution must be employed in running operations and developing or maintaining contacts with agents who may be under surveillance.

Because foreign postings are considered substantial career rewards, there are psychological and bureaucratic problems in reintegrating men into service at home, often in dismal internal security jobs in the Soviet provinces.

WE'VE JUST PINGED THEM

"If you P.N.G. a guy, you're creating interesting waves of nervousness," an American expert said of declaring somebody persona non grata. "But have these expulsions seriously broken the stride of agent activity? No. We've just pinged them. They're flesh wounds."

The British specialist argued that, with Mr. Andropov in power in the Soviet Union, the likelihood was that the K.G.B.'s role would continue to expand.

"His presence at the top can only be beneficial to the K.G.B.," he said. "He knows its resources better than anyone else and logic says he would use them."

The K.G.B. now sends more people to the Central Committee, and its own organization includes more deputy chairmen, a sign of a larger staff and an upgraded status, he said.

It has turned into an organization that many skilled young Russians seek to join. It offers travel, money, and power to a degree that few other Soviet institutions can provide.

"They have operated with a very great deal of success," the British specialist said. "From what we've seen this year, the conclusion I draw is a pretty narrow one, though—not much more than a sense that this success seems to be gradually seeping into the heads of the Western authorities."●

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the Office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Tuesday, August 2, 1983, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

AUGUST 3

8:30 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

9:00 a.m.
Select on Intelligence
Closed briefing on intelligence matters.
S-407, Capitol

9:30 a.m.
Commerce, Science, and Transportation
Surface Transportation Subcommittee
To hold hearings to review the economic state of the inland waterway industry.
SR-253

Finance
Taxation and Debt Management Subcommittee
To hold hearings on H.R. 2163, to authorize funds for fiscal years 1984 through 1988 to assist States in administering and enforcing recreational boating safety programs, S. 927, to extend the time for payment of the manufacturer's excise tax on sport fishing equipment and S. 1183, to exempt from the tax on unrelated business income certain debt-financed income of educational institutions.
SD-215

Labor and Human Resources
Business meeting, to resume markup of S. 1133, to authorize funds for fiscal years 1984, 1985, and 1986 for the Legal Services Corporation.
SD-430

10:00 a.m.
Environment and Public Works
Business meeting, to mark up pending calendar business.
SD-406

Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold oversight hearings on the collection of criminal fines.
SD-342

Conferees
Closed, on S. 675, authorizing funds for fiscal year 1984 for the Department of Defense.
H-405, Capitol

10:30 a.m.
Rules and Administration
Business meeting, to resume consideration of Senate Resolution 177, to establish procedures for the purpose of conducting an investigation into the allegations relating to members of President Reagan's campaign organization, an original resolution to authorize funds from the contingency fund of the Senate to establish a Senate day care center, and other pending legislative and administrative business.
SR-301

2:00 p.m.
Energy and Natural Resources
To hold hearings on S. 1701, to impose specific directives on the Bonneville Power Administration.
SD-366

Judiciary
To resume hearings on S. 1059, to provide equal access and opportunities to public school and public college students who wish to meet voluntarily for religious purposes.
SD-226

Conferees
Closed, on S. 675, authorizing funds for fiscal year 1984 for the Department of Defense.
S-407, Capitol

2:30 p.m.
Foreign Relations
To hold hearings on the nomination of Thomas R. Pickering, of New Jersey, to be Ambassador to El Salvador.
SD-419

AUGUST 4

8:30 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

9:30 a.m.
Finance
International Trade Subcommittee
To hold hearings on the administration's proposed renewal of the Generalized System of Preferences which permits duty-free entry of articles from developing countries, subject to certain conditions and limitations; to be followed by hearings on the substance of S. 979, to improve the enforcement of export administration laws (pending on Senate calendar).
SD-215

10:00 a.m.
Appropriations
Defense Subcommittee
To hold hearings to review spare parts management and pricing policy of the Department of Defense.
SD-192

Conferees
Closed, on S. 675, authorizing funds for fiscal year 1984 for the Department of Defense.
S-407, Capitol

10:30 a.m.
Foreign Relations
Arms Control, Oceans, International Operations, and Environment Subcommittee
Near Eastern and South Asian Affairs Subcommittee
To hold joint hearings on U.S. nuclear assistance to India.
SD-419

2:00 p.m.
Foreign Relations
To hold hearings on the President's certification on conditions in El Salvador.
SD-419

Conferees
Closed, on S. 675, authorizing funds for fiscal year 1984 for the Department of Defense.
S-407, Capitol

AUGUST 5

9:30 a.m.
Joint Economic
To hold hearings on the employment/unemployment situation for the month of July.
SD-106

10:00 a.m.
Conferees
Closed, on S. 675, authorizing funds for fiscal year 1984 for the Department of Defense.
S-407, Capitol

2:00 p.m.
Conferees
Closed, on S. 675, authorizing funds for fiscal year 1984 for the Department of Defense.
S-407, Capitol

SEPTEMBER 8

10:00 a.m.
Labor and Human Resources
Family and Human Services Subcommittee
To resume oversight hearings on the breakdown of the traditional family unit, focusing on the historical perspective and societal implications.
SD-430

SEPTEMBER 15

10:00 a.m.
Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 752, to provide for certain measures to reduce the salinity of the Colorado River, S. 1027, to provide that any construction costs undertaken by the State of Washington on the Yakima River basin water enhancement project made prior to congressional authorization of the project, may be credited toward any future cost-sharing requirements that Congress may impose at the time of authorization, and S. 483, to authorize the Bureau of Reclamation to provide compensation to certain landowners who are deprived of winter stock water supply for their livestock along Willow Creek in Idaho.
SD-366

Labor and Human Resources
Family and Human Services Subcommittee
To resume oversight hearings on the breakdown of the traditional family unit, focusing on causes and remedies.
SD-430

SEPTEMBER 20

10:00 a.m.
Foreign Relations
Business meeting, to consider certain arms reduction proposals, including Senate Resolution 57, Senate Joint Resolution 2, Senate Joint Resolution 29, Senate Resolution 159, Senate Joint Resolution 74, Senate Concurrent Resolution 46, Senate Concurrent Resolution 107, and Senate Resolution 83.
SD-419

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on a Presidential commission report on excellence in education.
SD-430

11:00 a.m.
Veterans' Affairs
To hold hearings to receive legislative recommendations for fiscal year 1984 from the American Legion.
SR-325

SEPTEMBER 21

10:00 a.m.
Governmental Affairs
Business meeting, to mark up S. 121, to establish a U.S. Department of Trade as an executive department of the Federal Government.
SD-342

SEPTEMBER 22

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on a Presidential commission report on excellence in education.
SD-430

SEPTEMBER 23

9:30 a.m.
Finance
Economic Growth, Employment and Revenue Sharing Subcommittee
To hold hearings on the future of U.S. basic industries.
SD-215

SEPTEMBER 27

9:30 a.m.
Labor and Human Resources
Labor Subcommittee
To hold hearings on S. 19 and S. 918, bills to revise current Federal pension law with respect to the rights and benefits of working and nonworking women, and the substance of S. 372, to promote interstate commerce by prohibiting discrimination in the writing and selling of insurance contracts.
SD-430

SEPTEMBER 29

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume hearings on a Presidential commission report on excellence in education.
SD-430

OCTOBER 3

9:30 a.m.
Finance
Economic Growth, Employment and Revenue Sharing Subcommittee
To resume hearings on the future of U.S. basic industries.
SD-215

OCTOBER 18

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume oversight hearings on vocational education programs administered by the Department of Education.
SD-430

OCTOBER 25

10:00 a.m.
Labor and Human Resources
Education, Arts, and Humanities Subcommittee
To resume oversight hearings on vocational educational programs administered by the Department of Education.
SD-430

CANCELLATIONS

August 3

9:30 a.m.
Judiciary
Constitution Subcommittee
To hold hearings on proposed legislation authorizing funds for the Civil Rights Commission.
SD-226

SENATE—*Tuesday, August 2, 1983*

(Legislative day of Monday, August 1, 1983)

The Senate met at 9 a.m., on the expiration of the recess, and was called to order by the Honorable JOHN HEINZ, a Senator from the State of Pennsylvania.

Mr. HEINZ. Our prayer today will be offered by the son of our Senate Chaplain, the Reverend Richard Christian Halverson, Jr., pastor, Chesterbrook Presbyterian Church, Falls Church, Va.

PRAYER

The Reverend Richard Christian Halverson, Jr., offered the following prayer:

Let us pray.

Father in Heaven, in spite of the temptation we all face to show partiality to others depending on their economic, social, or vocational status, help everyone who works in the Senate to faithfully perform their role no matter how great or small it is.

Keep each one from coveting the gifts or position of another and create a spirit of harmony in this body born out of mutual submission and service.

If there are any who are unhappy or unfulfilled in what they do or who they are, grant them the wisdom to comprehend their inestimable value to You and to one another.

We ask this in the name of Jesus Christ, who, though He was in the form of God, did not count equality with God a thing to be grasped but emptied Himself, taking the form of a servant. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., August 2, 1983.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JOHN HEINZ, a Senator from the State of Pennsylvania, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. HEINZ thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE ACTING MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The acting majority leader is recognized.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, it is my understanding that there is a series of special orders. I ask unanimous consent that the time requested for Senators GOLDWATER, BAKER, STEVENS, and TOWER be controlled by Senator SYMMS.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I further ask unanimous consent that following the time for the special orders there be a period for the transaction of routine morning business for 15 minutes during which Senators may speak for not to exceed 3 minutes each.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

UNITARY TAXATION

Mr. STEVENS. Mr. President, over the past few years, President Reagan and the Congress have made a good start on efforts to ease the burden of Federal regulation from the backs of State and local governments. Congress must be wary of proposals for new Federal intrusions into the areas of governmental authority reserved to the State.

Examples are Federal legislative proposals designed to preempt the States' use of the unitary method of taxation. One such bill would cost 32 States almost $700 million in revenues by prohibiting them from using the unitary apportionment method for determining in-State profits and from taxing certain corporate dividends. In its June 29, 1983, decision in the Container Corp. case, the U.S. Supreme Court upheld the constitutionality of these State tax methods, calling them proper and fair.

Recently the Wall Street Journal ran an editorial which did not approve the Supreme Court's reasoning on the unitary method of taxation. However, the Journal points out that the unitary method keeps the States from being cheated by fancy accounting, but also cautions that there is the possibility of arbitrary applications of it.

The Journal concludes that the best protection against such arbitrary applications will come from the market, as States compete with each other for business investment. As defenders of States' sovereignty, the Journal opposes efforts to impose a new level of Federal regulation.

Mr. President, I ask unanimous consent that the Journal editorial be printed in the RECORD immediately following my remarks.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, July 5, 1983]

TAXING THE WORLD

Oh for the good old days of 19th century tax law. That's when the courts agreed with Adam Smith that levies should be uniform and proportional, meaning as simple and, often, as low as possible. We venture to suggest that this attitude had something to do with the country's phenomenal growth. As one can see from the U.S. Supreme Court's recent decision on the "unitary tax" in Container Corp. of America's suit against the California Franchise Tax Board, things are different now.

This increasingly popular tax, used in one form or another by 23 states, violates the old-fashioned notion that taxes should be predictable or at least not arbitrary. The Supreme Court has obviously been wrestling with the problem. It's taken six cases on the subject in five years. Now, in an opinion by Justice William Brennan, the court's best friend to freewheeling state finance, it's thrown up its hands and endorsed "flexibility" from Sacramento to Montpelier.

The states with this tax basically want to reach as much of a company's assets as they can in figuring its tax bill. Whether the firm spans many states or many nations, they argue that all its branches and subsidiaries constitute a single business unit. The states then apply a formula to determine how much of this business goes on inside their boundaries and proceed to make their levy on that portion of the whole. So far, the problem hasn't been the formula that determines each state's share; it generally has three parts, for total payroll, property and sales within the jurisdiction. The battles come in defining how much of a worldwide company's parts belongs to a single business unit. Should Mobil be taxed for Aramco in Vermont, to cite another famous case?

Fans of the unitary tax say that it keeps the states from being cheated by fancy accounting that switches profits from the division being taxed to another further up the line. In the Vermont case, Mobil was claiming losses for two years that reduced its total tax bill to an annual $25. By figuring in dividends from Mobil's overseas subsidiar-

ies, Vermont raised its tax take to more than $25,000 a year. The Supreme Court said OK.

So far, so good, but the problem that the latest case gave up on is how to say consistently what is part of a "unitary business" and what isn't. After noting the court's earlier attempts, Justice Brennan shrugged and said that hereafter "this Court will, if reasonably possible, defer to the judgment of state courts." The states are likely to choose the rules that give them the biggest take, and the multinational corporations are bound to be facing a welter of arbitrary standards.

States can choose, for instance, between taxing the dividends a foreign subsidiary pays to the parent company, as Vermont did, or taxing its income as part of the whole, as did California. Some eager taxmen will inevitably stretch the unitary idea as far as it will go. There's even bound to be abuse of the apportionment formula, to exaggerate the in-state share of business and hence the tax bill. The Supreme Court, after all, has already endorsed a fairly wide margin of error in an exercise that is arbitrary to begin with.

The court and Congress may be called back into the morass if double taxation gets out of hand and foreign tax treaties get stepped on. Britain's Margaret Thatcher is already muttering darkly about the case, and she tends to be listened to these days. But the most powerful discipline will probably come from the market, as disgruntled companies start to shop around for more favorable business climates. It's revealing that New York's Gov. Cuomo made a deal with major oil companies to repeal his state's unitary tax just a week before the Container Corp. decision. In return he did get their assent to another state tax on petroleum products, but he also seems to have squelched rumors that some of the majors were thinking of pulling their headquarters out of the state.

As defenders of states' sovereignty in the past, we should still stand by their right to make their taxes as complicated and as economically damaging as they want. But things were a lot simpler in the old days.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The minority leader is recognized.

IT IS TIME TO GIVE NEGOTIATIONS A CHANCE

Mr. BYRD. Mr. President, I hope that we are perhaps witnessing early signs of a desire on the part of all parties to bring a regional peace to Central America. The administration appears to have taken on a new flexibility, in its rhetoric at least, and it ought to be commended for that.

I believe the administration is responding to a general lack of both American and international support for its overly militant attitude toward the region. But regardless of the motivation, the new flexibility, if there is such, is a positive sign, particularly as it relates to former Senator Richard Stone's meeting this past weekend with Ruben Zamora, one of the representatives of insurgents in El Salvador.

I am also hopeful regarding recent positions that have been voiced by Cuba and Nicaragua. They are positive developments because they are responsive to the efforts of the Contadora, a group comprised of four democratic allies of the United States. The President should welcome these proposals since they are in accord with what he himself outlined in his speech to the Congress on April 27.

As a reciprocal gesture on our part, perhaps this might be the time for the administration to pull back on its planned sea and land maneuvers, or at least reduce the scale of those sea and land maneuvers scheduled for the region. To do so would send a signal that our response to potentially fruitful proposals offered by Nicaragua and Cuba is one of conciliation, and a desire to explore the proposals, rather than escalation. Recent peace proposals for Central America offered by Cuba and Nicaragua are closely related to the efforts of the Contadora group comprised of Mexico, Venezuela, Panama, and Colombia.

On July 17, the President of the Contadora countries released a communique after their emergency summit meeting. It called for a greater reliance on negotiations and less on military means for settling disputes, a halt to the militarization of the region, withdrawal of all foreign military advisers, and opposition to the creation of foreign military bases in Central America.

Nicaragua, which offered its proposal on July 19, called for an end to all arms assistance to the opposing sides in El Salvador, an end to all forms of military assistance to opposing sides in El Salvador, an end to all forms of military assistance to opposing forces in the region as a whole, and a ban on foreign military bases and military exercises in the region. Moreover, Nicaragua made a concession by announcing its willingness to negotiate these issues in a multilateral rather than bilateral context, and these meet a number of requirements previously laid down by our own Government as conditions for negotiations.

The Cuban position was announced on July 29 by Fidel Castro. He stated Cuba's willingness to support, and abide by, regional accords banning arms shipments into Central America by all outside parties and prohibiting foreign military advisers in the region.

Certainly, Cuban behavior under Fidel Castro leads one to be somewhat cautious as to the sincerity with which this offer was made. And Nicaragua, under the Sandinistas, gives one the impression that it is moving in the direction of becoming a Soviet satellite. So there is reason to question the sincerity of the leaders of both of these countries; but now is the time to test the sincerity of both the Cubans and the Nicaraguans, particularly since the issues of war and peace are at stake.

In my estimation, the administration has not taken full advantage of the most valuable tool we have at our disposal—the Contadora group. We are talking about four Latin American nations that are our friends, and desperate to assist in bringing an end to the violence in the region.

Mr. President, the Contadora group is able to bring to bear only its powers of persuasion and consultation. It cannot do much if the United States, the dominant force in the region, does not work closely and effectively with it. The value of the Contadora group was aptly demonstrated this weekend when the meeting was arranged between Senator Stone and Mr. Zamora under the auspices of Colombian President Belisario Betancur.

The President should state more clearly his intention to vigorously pursue the proposals—certainly to explore them—offered by the Contadora group, Nicaragua and Cuba. This would demonstrate that the United States is second to none in its desire to find peaceful solutions to Central America's conflicts. A positive sign in that direction would be a willingness on the part of the administration to scale down—rather than scaling up, as today's news would indicate—the planned military exercises, both in size and duration.

Mr. President, I make this suggestion today, not in a partisan vein—for, above all, our foreign policy should be bipartisan. As I have previously stated, this issue should not be cast in terms of who might lose this or who might lose that, but in terms of the national security interests of the United States.

ACID PRECIPITATION

Mr. BYRD. Mr. President, the July 26 edition of the Wall Street Journal contains an editorial on the subject of acid precipitation. The editorial, entitled, "What Acid Rain?", makes the point that recent reports on that phenomenon reach conflicting conclusions and cast doubt on proposed control strategies.

The major study released on June 29 by the National Academy of Sciences points up the substantial lack of understanding as to the actual origins, causes, and effects of acid precipitation among America's best scientists.

The editorial also addresses the question of the costs of some control strategies. It sounds a cautionary note that very expensive controls should not be applied, given the level of scientific uncertainty over the effectiveness of controlling particular sources coupled with the certainty of economic damage to industrial America.

I ask unanimous consent that the editorial from the Wall Street Journal of July 26 be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, July 26, 1983]

WHAT ACID RAIN?

We seem to be experiencing a sudden shower of "acid-rain" studies. The White House has just published two, the National Academy of Sciences another and the Environmental Protection Agency is working on one. What's apparent so far isn't how much we know about acid rain, it's how little. But some members of the Reagan administration have been put in such fear of the environmental lobby that they want private industry—and its customers, of course—to throw billions of dollars at the problem while its causes still are clouded with doubt.

The point man of this effort is presidential science adviser George A. Keyworth II, better known as the man who tried to give us "dense-pack" basing for the MX missile. Mr. Keyworth's acid-rain study isn't due out until fall, but he has been in such a hurry to get on the record that he has issued a sketchy five-page summary. It recommends that "additional steps should be taken now" to make a "meaningful reduction" in the emissions of sulfur compounds into the atmosphere. Presumably those steps include adding more super-costly scrubbers to the Midwest power plants the acid-rain lobbyists claim are ruining lakes in the Northeast U.S. and Southeast Canada.

What's the scientific basis for recommending such huge expenditures? Not much. "The overall scientific understanding of the various aspects of acidic precipitation is quite incomplete at the present time and will continue to have major uncertainties well into the future," the Keyworth summary admits. It says getting at the truth will take "at least 10 or 20 years" of additional research. While recommending action now based on "imperfect data" runs the risk of error, the White House science types insist that inaction pending more research entails "even greater risk of damage." And after all, we might add, it's someone else's money.

The National Academy of Sciences report takes a different tack. Curbing sulfur dioxide emissions throughout eastern North America would reduce acid deposition in the region, it argues. But the NAS can't predict whether substantially reducing emissions from Midwest power plants would help the Northeast U.S. and Canada. Moreover, the academy's scientists say they really don't fully understand the meteorological processes that may (or may not) be making precipitation more acidic. Their modeling suffers from a limited data base. "There is, admittedly, much to be learned about the relationships between emissions and deposition," the study states.

Neither the Keyworth nor NAS studies pay much heed to that considerable number of scientists who believe that what's called acid rain probably is more the result of changing natural conditions than man-made pollution. The Western U.S. has been less dry, on the whole, in recent years, which means that less alkaline dust is being picked up to neutralize the natural acidity of rain clouds as they move eastward, one such theory holds.

In addition, changes in local farming and forestry practices near the affected lakes and streams may be increasing the amount of acidic runoff. Rising precipitation levels may also be overwhelming the natural buffering capacity of sensitive areas in the Northeast. Declining fish-stocking in Adirondack lakes, coupled with increased fishing, may be more responsible for declining fish populations than those suspected rain clouds from Ohio and West Virginia.

These and other nagging questions about the acid-rain hypothesis were given more consideration by the White House Council on Environmental Quality, which in its annual report noted that the air generally is getting cleaner (something that seems self-evident and makes us wonder why, if acid rain is a result of pollution, it is said to be getting worse). Emphasizing the need for more long-term acid-rain research, it says that the work over the past 10 years shows that "the causes and effects of acid rain are certainly more complicated than once believed."

As part of a joint U.S.-Canadian acid-rain study published earlier this year, the U.S. team concluded that "cause-and-effect relationships have often not been clearly established." It couldn't differentiate between manmade and natural causes, for example, and cited our lack of knowledge about key chemical and biological processes that may effect water acidity.

In the face of all this scientific uncertainty, the call for "immediate action" is strange indeed. Peabody Holding Co., admittedly with some bias as a result of its coal interests, estimates tighter emission rules would cost Midwestern and Southern residents $7 billion annually in higher electricity bills and would create a loss of $5 billion in annual mining wages. Edison Electric Institute calculates electricity bills in some parts of the U.S. would rise as much as 50 percent.

That seems to us like a lot of money to extract from ratepayers on the basis of so little understanding. Perhaps Mr. Keyworth should be promoted to a political post and let someone else take over the job of evaluating scientific inquiry.

ORDER OF PROCEDURE

Mr. BYRD. Mr. President, I yield now to my good friend Mr. PROXMIRE.

Mr. PROXMIRE. I thank my good friend the minority leader.

ALL OF US WANT TO NEGOTIATE NUCLEAR ARMS CONTROL WITH THE SOVIETS FROM STRENGTH

Mr. PROXMIRE. Mr. President, there is obviously a very big majority in the country that favors the negotiation of a mutual, verifiable nuclear arms freeze with the Soviet Union. State referenda as well as public opinion poll after public opinion poll consistently show a smashing 3-to-1 margin in favor of such a nuclear freeze. The House of Representatives earlier this year voted nearly 2 to 1 in favor of such a freeze. I believe the Senate will follow suit as soon as we have the chance to do so.

How, then, has the Senate approved authorization of the MX 10-warhead missile? How has the House of Representatives also approved the MX? How can we explain that, even if we can somehow derail the MX in the appropriations process or somewhere else along the line, we will go ahead with the testing, production, and deployment of thousands of cruise missiles, with the production of 20 or more additional Trident submarines to carry our missiles in oceans all over the world? If we favor a freeze, why did we vote to spend billions on the D-5, the hard-target-kill new missile expressly designed for our subs? Why will we probably build 100 or more B-1B bombers and certainly many more new technology or Stealth bombers?

The Office of Management and Budget has calculated that in the next 5 years this Congress that favors ending the nuclear arms race will appropriate at least $50 billion per year to increase the size and lethal punch of our nuclear arsenal—and get this—even if the present arms control talks are promptly and fully successful. Why?

Here is why? While some of us oppose the MX and the B-1 bomber, virtually no one I know in the Senate—and probably very few, if any, in the House—oppose the rest of the Defense Department's awesome nuclear weapons shopping list. These weapons will sharply increase our capacity to destroy the Soviet Union and undoubtedly provoke a determination from the Soviets to match or surpass our nuclear advances. How can this willingness to spend billions, vastly expanding our nuclear capacity, square with our expressed desire to stop the arms race? The answer is that those of us who favor a nuclear freeze do not—I stress do not—favor unilateral disarmament. The key words in the freeze are that it must be "mutual" and "verifiable." Unfortunately, we do not live in a Sunday school world. We cannot trust our powerful adversary. But we can recognize that the Russians have the same basic interest in avoiding the sure suicide of a nuclear war that we have.

Those of us who oppose the MX and the B-1B do believe that this country should negotiate from strength. We simply refuse to accept the argument that testing, building and deploying an MX for $20 billion or spending another $20 billion on a hundred B-1B bombers will neither strengthen our nuclear deterrent, nor enhance our bargaining position in negotiations with the Soviet Union. This Senator is convinced that both the MX and the B-1B will weaken, not strengthen, our nuclear deterrent.

I say all this, Mr. President, because I have become convinced that there is confusion in the country and in this body, too. We do not have Senators either thirsting for nuclear war or ready to disarm unilaterally. The difference between Senators on our nuclear weapons policy is really limited to judgment over what will constitute

an effective deterrent and will serve our interests in negotiating with the Soviet Union for an effective arms control.

How does this square with my professed estimate that a majority of the Senate will support a nuclear freeze? How could a majority of Senators support a nuclear freeze if they favor going ahead with the production of thousands of cruise missiles, the Stealth bomber, the midgetman missile, and a new weapon as devastating as the hard-target-kill, submarine-launched missile and 20 new Trident submarines to carry it? Should not those of us who favor a freeze oppose and vote against all these devastating nuclear weapons? Absolutely not! Why not? Because we do not believe in unilateral nuclear disarmament. We fully understand that without an agreement for both a mutual and a verified freeze, we must push ahead. If we stand still, our present deterrent could vanish as the Russians test and produce and deploy ever newer weapons.

Mr. President, this aspect of the views of those of us who opposed some nuclear weapons we consider either mischievously destabilizing—like the MX, or hopelessly obsolete like the B-1B—is not understood by many of our opponents in this body. It is not understood by some of the press and some of the public.

Consider that the defense authorization bill that passed the Senate 10 days ago not only carried the MX; it also carried a series of nuclear weapons and billions of dollars to fund their testing, their production, and their deployment. Most of the press attention concentrated on the MX. The other nuclear weapons that make our nuclear arsenal both more deadly and more survivable were never in controversy. They were either supported by virtually all Senators or the few who opposed them recognized the hopelessness of any attempt to take them out of the bill because such a heavy majority of the Senate favored their retention.

This does not mean that a majority of Senators do not favor moving promptly to truly effective arms control negotiations with the Soviets. I am convinced they do. It means that we recognize that we must negotiate with the Soviet Union from a position of military strength. A minority of us disagreed on the MX because we did not consider that the MX added strength to our military posture. I seen nothing inconsistent in the House vote for the MX and its nearly 2-to-1 vote for the nuclear freeze. There will be nothing inconsistent if the Senate, having approved the MX, now decides to pass a nuclear freeze resolution.

We should never forget that until the freeze is negotiated and accepted by both sides, we must continue—as the Soviets certainly will—to build our nuclear strength. The arms race can only stop when we reach a mutual, verifiable agreement.

INTRANSIGENCE ON HUMAN RIGHTS

Mr. PROXMIRE. Mr. President, frequently the intransigence of a single nation can stall a vitally needed international agreement. For the past 10 days, the small nation of Malta has filibustered at the European Security Conference, preventing the conclusion of the East-West conference on détente in Europe.

For almost 3 years, 35 nations have been meeting in Madrid to review and update the provisions of the Helsinki Final Act of 1975. Of great importance to the Western nations participating at the conference was a review of the human rights violations in the Soviet Union and Eastern Europe. Following the detailed review there was a general condemnation of the Soviet Union and her allies because of their failure to comply with their Helsinki commitments.

Max M. Kampleman, the chief U.S. delegate to the Madrid Conference, commented:

> The Madrid meeting has been, therefore, the appropriate forum at which to insert political and moral pressure into the process. The implementation review became the mechanism. . . . Madrid's implementation review afforded the opportunity for a large number of the participating states to communicate to the Soviet Union their deep concern about violations of the accords.

As Mr. Kampleman so clearly states, the Helsinki Final Act and the follow-up Madrid Conference have provided us with a forum to protest Soviet actions. Agreements to which both the United States and Soviet Union are signatories create the perfect opportunity to bring pressure to bear on the Soviets for their human rights violations.

But Malta is singlehandedly holding up the conclusion of the Madrid Conference. This intransigence rings familiar to me, because for the past 16 years I have addressed a similar intransigence—the Senate's failure to ratify the Genocide Convention. Malta may have a self-interest in stalling the Madrid accords, but no one's self-interest is served by our failure to ratify the Genocide Convention.

Too often in the past, our diplomatic protests have been easily rebuffed by the Soviets. Whenever we protest their violations of human rights—in Afghanistan, Poland, or the Soviet Union itself—their representatives have a simple but devastating response. They ask how we can protest violations when our own failure to ratify the Genocide Convention indicates our disregard of human rights.

I firmly believe that our human rights record is the finest in the world, but our failure to ratify the Genocide Convention is an ugly blotch upon it. We must provide our diplomats with free rein to protest human rights violations throughout the world. We must put an end to Soviet charges of hypocrisy.

I urge my colleagues to ratify this important human rights document.

POWELL MOORE LEAVES STATE DEPARTMENT

Mr. BYRD. Mr. President, this week will be Powell Moore's last as Assistant Secretary of State for Congressional Relations. Mr. Moore will be leaving public service to take a position as vice president for legislative affairs for the Lockheed Corp. The Government's loss will be Lockheed's gain, for I cannot think of anyone who has a more distinguished record of public service than has Powell Moore and who is as trusted and has the confidence of Members of Congress.

I first knew him when he served as Press Secretary for the late Senator Richard B. Russell of Georgia from 1966 to 1971. He then served as Deputy Director of Public Information for the Department of Justice from 1971 to 1972, and as Deputy Special Assistant to the President from 1973 until 1981.

With the election of Ronald Reagan as our 40th President, Powell assumed responsibilities as Deputy Assistant to the President for Legislative Affairs. On February 4, 1982, his nomination was confirmed by the Senate for his present position as Assistant Secretary of State for Congressional Relations.

It has been my good fortune to have known and watched Mr. Moore grow during his public career in Washington. He is a person of impeccable integrity and devotion to duty. He has been one of the most effective and dependable public servants I have ever known. In particular, Mr. Moore has been sensitive and appreciative of Congress as an institution. The President and the Secretary of State will be losing a particularly valuable asset.

Powell Moore is a friend. Although I regret his leaving Government service, I look forward to continuing this friendship as he embarks on a new career in the private sector, and I wish him well as he launches this career.

Mr. STEVENS. Mr. President, I commend the distinguished Democratic leader for his remarks concerning Powell Moore, and I am sure we all wish him well. I endorse the glowing comments made by the Senator from West Virginia.

ORDER OF PROCEDURE

Mr. STEVENS. Mr. President, I ask unanimous consent that the special order for Senator MATTINGLY occur

first. It is my understanding that because of the previous unanimous-consent request, already granted, the remainder of the five special orders will be under the control of Senator SYMMS.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

RECOGNITION OF SENATOR MATTINGLY

The ACTING PRESIDENT pro tempore. The Senator from Georgia.

Mr. MATTINGLY. Mr. President, I send a bill to the desk and ask that it be read the first and second times, by unanimous consent, and that it be referred to the proper committees for consideration.

Mr. BYRD. Mr. President, what is the request?

Mr. MATTINGLY. I am sending a bill to the desk and asking that it be read the first and second times, by unanimous consent.

Mr. BYRD. Does the Senator wish to do this under the provisions of rule XIV?

Mr. MATTINGLY. I just wanted it referred appropriately.

Mr. BYRD. So the Senator is not attempting to have the bill placed on the calendar?

Mr. MATTINGLY. No.

Mr. BYRD. I thank the Senator.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

S. 1723—ALTERNATIVE TRADE REORGANIZATION PLAN

Mr. MATTINGLY. Mr. President, I am pleased to have this opportunity not only to express my thoughts on the current debate over the plans to reorganize the trade functions of the Federal Government, but also to introduce legislation which is a workable alternative to the proposal already introduced. While I attempt to keep an open mind to suggestions intended to improve the process of formulating a coherent trade policy within the Government, I believe the administration's current trade reorganization plan is a step backward for the trade community in our country.

This position may come as a surprise to those who remember my cosponsoring Senate bill 121, introduced earlier this session. At first glance, the provisions of S. 121 looked appealing. To merge the policymaking and negotiating functions of the Office of the U.S. Trade Representative (USTR) with the analysis and implementation functions of the U.S. Department of Commerce into a "lean and mean" new Department of International Trade and Industry (DITI) had some degree of attractiveness. I signed on as an early cosponsor of S. 121 out of an awareness of the need for a stronger, more coherent approach on trade.

However, it is on account of my strong belief in the need for more consistency in U.S. trade policy that I have come to oppose the administration's reorganization plan. They say their reorganization plan will improve coordination among the various departments which have a hand in trade policy formation. I say that taking USTR out from under the umbrella of the White House and making it an equal among other departments will demote the importance of trade at a time when it should and must be a national priority.

They argue that the creation of a new Department of Trade will result in a "leaner and meaner" trade policymaking structure. I say that we do not need more government, more bureaucracy, and more cost.

However, while I oppose the administration's plan for trade reorganization, I do not support the existing trade structure either. The Office of the U.S. Trade Representative, the key agency for trade policy formulation, has itself taken on the bureaucratic characteristics of other Federal departments. I believe it has lost its ability to reconcile the disparate but valid interests of other departments which influence trade to the point where USTR, to quote Secretary Baldrige, is only able to reach the "lowest common denominator." Gradual changes in the makeup of USTR over the years, I believe, have resulted in its inability to implement any administration's authority to administer trade laws given them by Congress in the Trade Expansion Act of 1962, and to act as staff coordinator for trade policy on behalf of the President.

Let us face it—the two alternatives we face, the administration's reorganization plan and the existing trade structure, are inadequate. What the trade community needs is a compromise and that is just what I propose today—a plan that will work for Americans wanting to trade.

We already have existing laws enacted in 1962 that provide for the type of trade organization I am proposing. We do not need more government or elaborate new laws. Laying aside the legal technicalities, the compromise legislation I offer today will, first, restore the intent of the current, but distorted, trade laws by reducing the size of the Office of the U.S. Trade Representative to what was originally envisioned; second, keep the office directly under the umbrella of or within the White House; third, permit the trade policymaking process to be managed by the President's representative for trade, but be closely and immediately controlled by the President. That way, when the President's representative for trade speaks, it is just like hearing it from the President himself. Furthermore, fourth, the President will be designated Chairman of the Interagency Committee on Trade Policy provided for originally by the Trade Expansion Act of 1962 and subsequent acts. Finally, fifth, the U.S. Trade Representative will be redesignated as "the President's representative for trade negotiations" to emphasize and clarify his direct responsibility to the President.

Mr. President, I believe my proposal is a true compromise and creates a "leaner and meaner" workable trade structure. It shares similar objectives intended by the President's plan but with less government, with little or no cost, with better coordination between competing domestic and international policies, and with the best interest of the trade community in mind.

The objectives of my compromise include: first, streamlining the trade policymaking process; second, facilitating the formulation of a coherent and consistent trade policy; third, restoring an effective organization which can speak with one voice—the President's; fourth, synthesizing the interests of other agencies with responsibilities for trade; and finally, fifth, forming an organization which is able to improve our balance of trade and our competitiveness at home and abroad.

Reasons for restoring the authority of the President to oversee trade can be found in current law. Under the Trade Expansion Act of 1962, Congress delegated to the President the authority to enter into trade agreements and to administer the trade agreements program, an authority which was renewed under the Trade Acts of 1974 and 1979. Congress delegated this power to the President and not to any subordinate agency or department of the executive branch, because trade in goods and services with other countries is not the domain of any one agency, but rather involves: first, the State Department to formulate the foreign policy of the United States; second, the Defense Department to secure our national security; third, the Commerce Department to promote the domestic commerce of the United States; fourth, the Labor Department to insure the welfare of the American worker; fifth, the Agriculture Department to secure the prosperity of the American farmer; sixth, the Treasury Department to insure the financial and monetary stability of the country; and seventh, from time to time, the interests of other departments involved.

I firmly believe that only the President can coordinate and give appropriate weight to all the diverse considerations stated above. It is also his responsibility to reestablish fairness and equity in our trade relations with foreign countries.

Furthermore, under the Trade Expansion Act of 1962, a special representative for trade negotiations was designated to carry out the President's responsibility to administer international trade laws. This special representative was also designated Chairman of the Interagency Committee to advise the President with respect to trade matters. The need for additional staffing at the special trade representative's office was minimized because the purpose of the interagency trade process was to draw, to the maximum extent possible, the resources of the agencies represented in the Interagency Trade Committee.

In spite of the legislative mandate for such interagency trade organization, the Office of the President's Special Trade Representative—USTR—has, as I said before, lost its markings of a small office of the President. In the process, this Office has so broadly expanded its staff that it fails to implement the President's authority given him by Congress in 1962, to act as staff coordinator for trade policy on behalf of the President, and to enable Congress to exercise its oversight and express its concerns in international trade. In other words, the authority of the President to conduct and coordinate trade policy and make negotiations has become blurred and haphazard. Thus, Mr. President, I believe that the Office of the Trade Representative should be brought under the close and immediate control of the President.

However, there are more current reasons which support my position. Recently, the formulation of trade policy has increasingly taken on political overtones. This has been particularly true as Presidential elections approach. For instance, many candidates today are calling for a reexamination of our basic assumptions of trade and the premises upon which our trade relations are based. Some prescribe the adoption of "fashionable" imitations of other countries' models for trade.

While the attention given to trade is desirable, the direction of most proposals is not. Most proposals suggest heavy Government intervention and decisionmaking at heavy budget cost.

Thus, after the election is over, we will either be faced with cumbersome Government involvement in private business or, what is more likely, trade policy will return to the back burner to simmer and stew until another election campaign.

In other words, we cannot treat trade policy as if it were attached to a political roller coaster. Trade policy development must be given consistency. To secure its long-term importance, its rightful place and coordination with competing domestic and international interests, it must be embedded and united with the development of other kinds of policies such as fiscal and monetary policies. These policies certainly earn the attention of the President himself and so must trade policy.

Mr. President, I had the opportunity to relay my message and the elements of my compromise legislation to the President himself, during a return flight from Atlanta yesterday. I stressed the need for him to direct trade policymaking from the White House and not from a new department.

In conclusion, I believe the administration's plan would be a step backward for our trade interests. I believe that trade reorganization will result in deflecting attention from political sensitive trade issues. It is the responsibility of Congress to require the President, and no one but the President, to reconcile competing political objectives with the priorities of trade policy formulation.

To restore tough, effective, and efficient trade policy formulation and execution, the Office of the U.S. Trade Representative should be trimmed to the size originally contemplated by Congress and should be brought more closely into the White House staff under the direct control of the President.

The President should share the interagency Committee on Trade Policy provided for originally by the Trade Expansion Act of 1962 and subsequent acts.

Finally, the U.S. Trade Representative should be redesignated as a President's representative for trade negotiations to emphasize and clarify his direct responsibilities to the President.

Mr. President, my predecessors in Congress displayed a great understanding of trade matters. I urge my colleagues to demonstrate the same understanding and insight. I furthermore urge those active in the trade community in this country to take a closer look at the trade reorganization plan before accepting an idea which, I believe, is not in the best interest of our country.

Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Assistant Secretary of the Senate proceeded to call the roll.

Mr. SYMMS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. D'AMATO). Without objection, it is so ordered.

RECOGNITION OF SENATOR SYMMS

The PRESIDING OFFICER. The Senator from Idaho (Mr. SYMMS) is recognized for 75 minutes.

Mr. SYMMS. I thank the distinguished Presiding Officer.

A SOLUTION TO OUR CENTRAL AMERICAN PROBLEM

Mr. SYMMS. Mr. President, I wish to address this body this morning on a subject that I think is of grave importance to our national security. I think it has implications that go far past those that are so often viewed in the general sense of the words "international security," "Communist threat," and so forth. It has an impact that affects our trade policy. Of course, I am referring to the problem we have with our foreign policy in Central America, in El Salvador, Nicaragua, and Cuba, of course, being those bases which are providing a foothold for the Soviets in this hemisphere in violation of the Monroe Doctrine.

Mr. President, we are concerned about our trade policies. I heard my distinguished colleague from Georgia addressing the Senate earlier this morning about the problems of international trade and what we could do to improve it. Certainly we should be doing—and I support those efforts of my colleagues—things to help bring about a reduction in this drastic balance-of-payments situation.

As long as there is a perception in the world that the United States is no longer a reliable ally; that the United States is only bluffing; that the United States ultimately, due to our stalemate in Korea in the fifties, our loss in Southeast Asia in the seventies, allowed the Castro cancer to grow and stay in this hemisphere in violation of agreements that have been signed with the United States over a period of years; whether we will exert ourselves to our moral obligation to be the leader of the free world, and certainly in our own front yard in Central America, it causes a drain of capital out of countries where people foresee things to be less stable and a clamoring to get that money into the United States. That in fact has a big impact on employment in the United States, on jobs, and on exports, because, as we have a stronger and stronger dollar, we find ourselves in a situation where a good part of the psychological perception that people have is to liquidate their assets in countries where they foresee things less stable and try to get the money into the United States. It only makes it hard for our farmers to export corn, wheat, and soybeans, or our industrial manufacturers to export heavy equipment because of the value of the dollar and the differential between the dollar and currencies of other countries in the world.

There is a lot at stake. There is no question that our vital interests are on the line in the struggle for control of Central America. The bottom line is, will we have the courage to restore the Monroe Doctrine in Central America,

or will we allow the Brezhnev doctrine to be successful?

It is often overlooked, but there are some big stakes with respect to national security. I mentioned the general concept I have of what is happening with respect to international trade as people try to cash in their assets in those countries, turn them into hard American dollars, deposit them here, make the dollar stronger, and making it harder and harder for the United States to compete in trade.

But we should look at what happens to national security in Central America. Mr. President, El Salvador is the symptom of the main problem of American foreign policy. Soviet power in Nicaragua and Cuba is the cause. Restoring the Monroe Doctrine by prevailing over the Brezhnev doctrine is the solution. America's vital interests are on the line in the struggle for Central America.

First, the United States imports 40 percent of its energy and 93 of 95 strategic minerals.

Second, in peacetime, 44 percent of all foreign tonnage and 45 percent of crude oil shipped to the United States transits the Caribbean, and 75 percent of the energy imports tranship or transit the Caribbean.

The third example of what is at stake for the United States in Central America is that United States reinforcements and petroleum for our forces in Europe would embark from gulf ports and sail through the Florida straits. These are some often overlooked factors indicating how great the stakes are for American national security in Central America.

It is interesting that Harold Rood in his brilliant book "Kingdoms of the Blind" wrote:

> Following the Japanese attack on Pearl Harbor from January to August 1942, over 260 Allied merchant ships totaling 1½ million tons were sunk by German submarines in the region between Florida and the entrance to the Panama Canal. Forty-one merchant ships were sunk in the Gulf of Mexico in May alone. Almost half the ships lost were oil tankers. However, in all of those months, there were never more than 12, and usually around 8, U-boats operating in American waters to the west and south of Cuba. Those submarines were operating 4,000 miles away from their bases on the coast of France outside the range of the German air force and without support from the German surface fleet. There were no long-range aircraft to help direct the U-boats to fruitful targets or to defend them against attacks by Allied escort vessels and patrol planes. When the subs had fired all their torpedoes and were running short of fuel, they had to return to their bases in the Bay of Biscay.

That was in 1942. That is, when Cuba was an ally of the United States. If another confrontation of any kind came about with the submarine base being in Cuba, you can imagine the havoc that could be raised.

Fourth, according to Navy Secretary John Lehman, 85 percent of the Army's combat logistics come out of gulf ports. The Caribbean is 1 of the world's 14 major maritime choke points and one of only five inland seas. The Panama Canal is one of only two interoceanic canals in the world. Shifting forces and supplies through the Panama Canal, between our Atlantic and Pacific coasts, saves a 7,400-mile journey around Cape Horn. The petroleum fields of southern Mexico are also a ripe target for Marxist conquest.

A fifth factor is the fact that the U.S. economy is buttressed by imports of $30 billion annually from Central America in bauxite, petroleum, sugar, coffee, and meat. Job-producing exports of $31 billion include transport equipment, industrial machinery, chemicals, grain, and manufactured goods. Americans have privately invested more than $13 billion in the Caribbean Basin countries.

Finally, Mr. President, the Kennedy-Khrushchev agreement of 1962, if enforced, would preclude the introduction of any offensive weaponry to Cuba. Both the Monroe Doctrine and the missile crisis agreement also restrict Soviet missile, plane, and naval buildups elsewhere in the Western Hemisphere. In Nicaragua, Grenada, and Surinam as well as Cuba, the Brezhnev doctrine is being permitted to supersede the Monroe Doctrine.

The Soviet Union, since the 1962 Kennedy-Khrushchev agreement, has incrementally strengthened its offensive war-waging capabilities in America's "front yard," the Caribbean and Central America.

Here are some examples of Soviet power in the Americas:

First, five Caribbean nations are now part of the Soviet military axis—Cuba, Nicaragua, Grenada, Guyana, and Suriname. Each is preparing major airstrips capable of handling the big TU-95 Soviet Bear bombers. These strategic aircraft, with a range of 5,100 miles, are equipped to carry the 385-mile range Kangaroo nuclear missile—each one 40 times more devastating than the Hiroshima bomb.

Second, Russian Echo II nuclear submarines operating out of Cuba are also equipped to carry cruise missiles equipped with nuclear warheads. The Shaddock missile, even more powerful than the Kangaroo, has a 540-mile range.

Third, Cuba's Armed Forces total more than 225,000 personnel, including a 15,000-man Air Force and a 10,000-man Navy; 140 SAM-3 missiles were delivered to Havana in December 1982. Some SAM's are being transshipped to Nicaragua and are being installed there.

Fourth, this year, Cuba has completed building 190 concrete, bombproof shelters for its fleet of 225 Mig Soviet-built fighter bombers. At least 40 are capable of delivering nuclear warheads. The Mig-23's can carry Kitchen missiles with nuclear warheads equipped to travel 480 miles at 3,000 miles per hour. Counting fixed-wing combat aircraft and combat helicopters, Cuba deploys 555 planes. Communist Cuba has, among its numerous military bases, submarine and airbase facilities so "hardened" that they could only be knocked out by nuclear barrage.

Fifth, the Soviets have supplied Cuba with at least 650 tanks—3,000 according to Eden Pastora—and 90 helicopters.

Sixth, with Soviet aid, the Cubans have developed an amphibious attack capability based on six Foxtrot patrol submarines, with 20 torpedoes each, 26 fast attack craft armed with Styx surface-to-surface missiles, 10 large patrol craft, 40 Zhuk and Turya hydrofoil attack boats, fully armed with guns and torpedoes.

Seventh, more than 13,000 Soviet personnel are stationed in Cuba, including a combat brigade of soldiers under arms, reinforced by 1,700 men during June and equipped with tanks, armored personnel carriers, long-range artillery, and long-range air transport capabilities, plus civilian and military advisers. Perhaps this is to help offset the more than 40,000 Cuban troops assigned overseas to fight the U.S.S.R.'s battles in Angola, Ethiopia, Nicaragua, and elsewhere.

Eighth, with increasing regularity, Soviet nuclear submarines are being serviced out of Cuba's Cienfuegos Naval Base. Soviet Bear bombers, operating out of Cuba, regularly skirt the edges of U.S. airspace. There are reports that as many as 10 of the "Bears," possibly designed for antisubmarine warfare, possibly equipped with air-launched cruise missiles, have recently been stationed in Cuba. The Chief of Naval Operations has confirmed that at least two of these Soviet nuclear bombers are fully equipped with operable bomb bays. Nine Cuban airfields are set up to handle Soviet TU-95's and/or Backfire bombers.

Ninth, in 1967, the United States, plus all Latin American countries—except Cuba—signed the Treaty for the Prohibition of Nuclear Weapons in Latin America. Why not Cuba? Fifty-five important U.S. cities, with 74 million people, are in range of Soviet missiles, aircraft, and subs operating off our shores.

Tenth, the Soviet intelligence collection unit in Lourdes, Cuba, covers 28 square miles—the largest non-American center in the Western Hemisphere—to monitor, by electronic means, U.S. military and scientific activity in more than 20 States. It can

jam satellite transmissions as well as civilian and military communications.

Eleventh, 63,000 tons of Soviet military equipment was shipped to Cuba in 1981, plus another 68,000 tons in 1982. This is more than in 1962, the year of the missile crisis.

The Soviet Union is giving 20 times more military assistance to Cuba than the United States is providing all Latin America. There are reports of Soviet-Cuban biological and chemical warfare production, storage, and training assistance to PLO, SWAPO, and Central American Marxist forces in Cuba.

Twelfth, two prime targets for the Soviets are Norfolk, Va.—home of our Atlantic Fleet—and Charleston, S.C.—east coast base for the nuclear missile submarine leg of our strategic defense triad—America has no defense against a Soviet strategic offensive launched from Caribbean-based submarines, airfields, or missile emplacements.

Thirteenth, 36 military bases, including 2 ports and 3 big airstrips, have been created in Nicaragua, which has recently received 50 Soviet tanks, 1,000 East German trucks, 100 antiaircraft guns, three brigades of Soviet artillery, plus Soviet-built assault helicopters and transport aircraft. Nicaragua's military buildup is unprecedented in Central America—more than 75,000 troops already under arms—39 percent of all males over 18 in Nicaragua are in uniform—2,000 Cuban military advisers—plus 6,000 civilians—and it has been rumored that those numbers have been going up rapidly—36 new military bases and Soviet bloc weaponry—including 45 to 50 tanks, three brigades of artillery, 100 antiaircraft guns, armored personnel carriers, mobile rocket-launchers, transport aircraft, and assault helicopters—as well as an undetermined number of Mig fighter planes.

Fourteenth, as many as 50 Libyan and PLO advisers have been active in Nicaragua. PLO leader Yasser Arafat agreed to provide military equipment to Nicaragua, including arms and aircraft, when he was in Managua on July 22, 1980. Arafat affirmed to a group of Palestinian journalists in Beirut on January 11, 1982, that "there are Palestinian revolutionaries with the revolutionaries in El Salvador * * *" PLO personnel are, for example, providing pilot training and aircraft maintenance in Nicaragua.

Fifteenth, the Soviets have prepared a huge drydock in Spain which has been to the Nicaraguan Pacific port of San Juan del Sur, in connection with the Moscow-Managua agreement for a new trans-Isthmian canal. This could be used to justify long years of future Soviet presence required to turn over drydock functions and dig the new canal. Indeed, the Soviet brigade might be sent over from Cuba to the Central American mainland to guard canal construction. San Juan del Sur is a secure beachhead commanding the Pacific approaches to the Panama Canal. Soviet engineers, plus their families, are due to arrive soon. I ask unanimous consent that an article from Foreign Broadcast Information Service be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SOVIET UNION TO DONATE FLOATING DRYDOCK

SAN JUAN DEL SUR (ERAGU) [not further identified].—A floating drydock donated by the Soviet Union to Nicaragua under a policy of service and technic cooperation with our nation is scheduled to arrive at this port in June.

The drydock, currently undergoing repairs in Spain, will be brought by a large delegation of Soviet technicians who will train approximately 100 people to handle it after it is installed.

The port administration reported through Demetrio Munoz that due to the size of dock, small and oceangoing ships can be repaired in it simultaneously.

Munoz said that the drydock will be 3 miles off this port and is expected to service ships of fairly large draft.

The Soviets will provide free technical service for the dock for a period of 7 to 10 years, that is, long enough for Nicaraguans to learn to handle it.

The Soviet delegation, including 10 families, that will come here to cooperate with the revolution will stay at the Hotel Barlovento during its stay in Nicaragua.

For this purpose, the National Ports Enterprise will revamp the abandoned hotel at a cost of 5 million cordovas under an agreement with the Nicaraguan Tourism Institute, which administers these installations.

Mr. SYMMS. Mr. President, 16th, Nicaraguan pilots are currently being trained in Bulgaria. There are over 5,000 Cuban, Russian, East German, Bulgarian, PLO, and other East bloc advisers in Nicaragua.

These Communist advisers are now 100 times more numerous than all American military advisers in all of Central America.

Seventeenth, there are 10 airstrips in Guyana, 3 in Grenada. The new Russian airbase in Grenada expands the radius of operation of all Soviet and Cuban aircraft in the region allowing them to fly 1,000 miles into the heartland of South America. Cuban aircraft can refuel in Grenada on flights to and from Africa.

Eighteenth, Grenada provides several strategic aspects for the Russians: 56 percent of all the oil consumed on the eastern U.S. seaboard—over 6 million barrels per day—comes from the refineries and oilfields within 500 miles of Grenada—that is, the giant Amerada Hess refinery and oil storage complexes in St. Croix, U.S. Virgin Islands, and St. Lucia—could be knocked out by Mig-23/27 tactical aircraft in less than 20 minutes.

Nineteenth, the 75-kilowatt transmitter, given by Cuba to Radio Free Grenada, is about to start broadcasting "revolutionary" messages across the Caribbean and into Latin America. Meanwhile, Congress is holding up funds for Radio Marti—when this is going on under our nose.

Twentieth, Soviet airbases in Nicaragua and Grenada will soon enable the Russians to dominate the airspace over Mexico, all of Central America, northern South America, and the entire eastern Caribbean.

Twenty-first, with the Communist takeover of Surinam, the Soviet Migs will be able to reach into Central Brazil from the U.S.-built airfield in Surinam. With Surinam and Grenada as Soviet/Cuban bases in the region, it is feared that any or all of the tiny islands in the region could be easily captured overnight by 20 or 30 armed Cuban revolutionaries in a boat—just as Grenada was taken by the Communists in 1979.

Twenty-second, Soviet and Cuban trained and financed terrorists and guerrillas operate throughout the Western Hemisphere—not just in El Salvador and Guatemala, but in Colombia, Honduras, Peru, Haiti, Argentina, Chile, and Venezuela as well. Indeed, there is hardly a country among the island and continental nations of Latin America which lacks a disciplined Communist subversive entity loyal to Moscow and its objectives of global conquest.

Twenty-third, the Soviet/Cuban command have long since plotted Caribbean seabottom trench routes linking the four Sovietized countries—Grenada, Nigaragua, Guyana, Surinam—there. Along those trenches, Cuban or Russian submarines can shuttle nuclear-missile cargos undetected. So at any of the four surrogate base countries, TU-95's could be armed with sub-delivered Kangaroos at any time. Thus, with nuclear weapons probably already inside the U.S. early-warning arc, the Kremlin can engage in effective nuclear blackmail. The Kangaroo nuclear warheads are 40 times more devastating than the Hiroshima bomb. Loaded on TU-95 Soviet bombers with a range of 5,100 miles, these 385-mile range Kangaroo missiles can hit any target in the United States within 5 minutes of launchtime.

The Soviet Union has imposed the Brezhnev doctrine upon Fidel Castro's Communist regime in Cuba, and it probably has already been imposed on Communist Nicaragua. Under the Brezhnev doctrine, once any Communist regime seizes power, it will be maintained and supported in power by Soviet armed force as in Czechoslovakia in 1968.

Yet Soviet imperialist intrusion as a permanent source of conflict in the Western Hemisphere is contrary to a fundamental principle of American foreign policy—the Monroe Doctrine.

It is contrary to this. Yet it goes on as we stand here in Washington and watch the events of the day take place.

In April and May 1982, President Reagan and three other top officials of the Reagan administration explicitly stated that the Soviets had violated the 1962 Kennedy-Khrushchev Agreement which ended the Cuban missile crisis. Under this agreement, the Soviets were required to halt the further introduction of offensive weapons such as nuclear missiles, light bombers, and troops into Cuba.

In addition to the threat of nuclear blackmail, it does not take much imagination to project what would happen if Central America is dominated by Marxist regimes with the support of the Cubans and the Soviets. It would be only a matter of time before Mexico would become a Marxist state on our own southern border. Already the Communists are building subversive infrastructures along the Mexican border towns from San Diego in the west to Brownsville, Tex., in the east. If you think we have problems with illegal aliens now, think of the problems we would come to have if a Communist Mexico were intent on mounting the kind of terrorist war in southern California, Arizona, New Mexico, and Texas that we have seen in Central America.

That is why, Mr. President, I say we cannot afford a no-win war in El Salvador in which we tinker with the symptoms while ignoring the cause. Land reform, in the sense that it means expropriation of private property, is no more desirable when imposed by the U.S. Government than when enforced by Joseph Stalin.

It should not be the Reagan administration's objective to institute democratic socialism in the nations of Latin America, but rather to defend the vital interests of the United States.

When many people want to make the comparison of what is going on in Central America with what went on in Vietnam, I think there are some things we should look back at. If we cannot learn something from our experience there, then we will, of course, deserve all the problems that we will get in the future.

I mention, Mr. President, the fact that we have large numbers of undocumented illegal aliens in this country today. Many people are very concerned about it. But I might just mention, also, that most of the undocumented illegal aliens who are in the United States today are at a working age, they are working, they are producing, they are paying taxes, they are contributing to the U.S. social security trust fund which certainly needs the contributions, among other things, and are providing the service industry in this country with large numbers of the people for restaurants, hotels, some agricultural work, and other places, doing jobs in factories and industry. There are somewhere between 8 million to 15 million, and it is a little bit hard to tell how many there are, most of whom come from Mexico or from Central America or South America.

If we should see a Communist-type revolution start in Mexico, I think we could be sure that we would have at least 10 percent of the population from the Panama Canal come north to the United States, and those would not just be workers at that point. They will be families, old people, young people, and everyone coming with it. It will not just be people coming up to the United States to work, earn some money, and take it back in a direct form of foreign aid where they have earned their foreign aid and take it back to provide for their families, where there is no bureaucracy involved. In many ways it is probably our most effective foreign aid program, the guest worker program, that goes on illegally in the United States, where people come into this country, work for a period of time and take the money back to help their families.

If this happens, we will end up with millions of refugees in this country, and then we will have to pay for refugee camps, for how to assimilate these people into our society, English-speaking courses, and so forth, in order to help them become part of our society.

I said, Mr. President, that we can no longer afford a no-win war in Central America. I think we should look at what happened in Southeast Asia to see why it was we lost. Of course, I have said many times that the battle was lost here in Washington, it was lost by the opinion makers, it was lost by those people who make the news. It was lost by the political leaders of the time. It was not lost by the brave men and women of the U.S. Armed Forces on the battlefield. The war was lost here.

In Vietnam, four major factors contributed to America's defeat:

First, a policy of gradualism that started here in Washington which prevented decisive application of superior U.S. force and capability;

Second, a policy of permitting the enemy to retain privileged sanctuaries, where we said "We cannot shoot past this certain line." They can come in but when they go back across the line we gave them sanctuary. That was a decision that was made here in Washington;

Third, failure to enunciate a clear policy rationale, based on the defense of America's vital interest; and

Fourth, failure to rally the American people behind a policy of victory based on the defense of our vital interests.

I would say, Mr. President, that if we fall into the same trap that political leaders of the sixties fell into, we could end up with the same disastrous outcome. I think first we must define what our objectives are and why it is in our best interest, and that is what I am trying to do here today.

But we cannot achieve a victory in Central America covertly or with less than a total effort any more than we were able to in Vietnam.

I, therefore urge, that President Reagan adopt, articulate, and seek public support for the following policies, which, in my opinion, are essential to preventing Soviet conquest of the Western Hemisphere:

On that point it is probably worthy to look into the future as to why it would be that the Soviets would want to get involved in Central America when it is so far from the Soviet Union. Most likely, sometime down the road the Soviets would like to use their base and their foothold in Central America as a bargaining chip for their adventuristic attitudes toward warm water ports in the Persian Gulf, and it would be a way for them to deal with future American leaders and future American administrations, saying, "We will not do this in Central America if you will not do such and such in the Persian Gulf."

In order to bring this about, the first thing I will ask the President to do is to share with the American people the full and precise terms of the 1962 Kennedy-Khrushchev agreement, the diplomatic record on that agreement since 1962, and the full extent of the Soviet disregard of the same agreement.

Mr. President, it has always baffled me how the United States of America could have a confrontation with the same Communist enemy in Cuba in 1962 and fail to respond to it and yet turn right around and go 9,000 miles from home in the name of resisting communism and fight a war where we lost 55,000 of our finest young men, and then we found out that it was all for naught because we did not have the political will in Washington to allow the people who were sent to fight the war to carry it off to a victory.

Evidently, the decision was not made when we started into it of what our objectives were, and what I appeal to this administration to do is define what our objectives are. I think one way to start in this would be to explain to the American people what it was that was agreed to in the Kennedy-Khrushchev agreement which said in effect that they cannot put in offensive weapons in this hemisphere, but we would not allow Cuban nationals who had emigrated to the United States to form anti-Castro provisional

revolutionary forces to go back and liberate Cuba from the Communists.

So we have held up our end of the bargain but the Soviets and Cubans have not held up theirs, in the Kennedy-Khrushchev agreement of 1962.

Second, we should recognize and declare the present Government of Nicaragua and the present Government of Cuba, for that matter, are at war with the United States, and they are waging a battle against us to do everything they can.

Third, I think the President then should consider very carefully the idea of establishing diplomatic relations with an anti-Soviet alternative to the Government in Nicaragua and declare it is our policy to help install Nicaragua's recognized Government and allow them to have a free election, which the present Sandinista-Marxist government will not allow.

We have never heard that they had a free election of the Government we are supporting in El Salvador, but there has been no election except at the barrel of a gun in Nicaragua.

I also might mention that it is a great deal of concern to me—to find it being reported in the news media that Fidel Castro would now like to talk about the fate of Central America with the United States. I think we should remind ourselves and Fidel Castro that it is not the decision of the United States or Cuba to sit down and determine what the fate of Central America should be.

Our responsibility, I think, should be to allow those people in that country, in those countries, to have the opportunity to determine their own future and their own fate, and they never have been given that opportunity since the Sandinista revolution in Nicaragua. We have given the indigenous people that opportunity in El Salvador, and they support the government in power in El Salvador, and I think our moral obligation should be to help those people.

Fourth, I think we should consider also ending the restrictions on Cuban exiles and the harassment of their anti-Castro radio stations.

Fifth, we should seek popular support and congressional approval to assist those people who are trying to help freedom-loving Nicaraguans regain control of their territory which they have longed for for so many generations.

I think we should consider, Mr. President, the possibility of what will happen if the situation is not affected by what our fleet, which is now en route to Central America, is doing. I think it is fine for the United States to send the fleet down for exercises, but I think there is a problem that we should not do anything with respect to our military posture without looking through to the full extent of where we are going.

It is my opinion that our effort now should be to seek a victory of those people in Nicaragua who are striving to give the Nicaraguan people an opportunity for social justice, for economic justice, and for political freedom and political ideas and thought processes.

I would venture to say that the Sandinistas or the Communists now in Nicaragua would have a hard time at the polls winning a free election. They would not do well, and that is why they do not want to have any election at all in El Salvador, because they know they will not win. The only way they can win an election is through the political power that comes out of the barrel of a gun, and they know that, and that is the reason they are operating that way.

As Al Capone once said, "One can get along with a smile, but he can get along better with a smile and a gun." That is what is happening in Central America. We have terrorists and hoodlums blowing up bridges and powerlines, disrupting civil activities of people, disrupting their ability to farm, to raise food for their families, and this is happening in El Salvador and it is being financed and supported right out of Nicaragua. But I think now that the fleet has been moved down to Central America, we have to be very, very careful as to what we do and whether we carefully, judiciously exercise our power with that so that it is not perceived as just a bluff.

Sixth, we should provide for the defense of Florida and the Gulf States from attack by Soviet missiles and aircraft based in the Caribbean. We should provide AWAC aircraft for our southern air defense.

Seventh we should declare the intention to fully reassert the premise of the Monroe Doctrine, that the United States will not permit European imperialism to continue anywhere in the Western Hemisphere.

In closing, let me say at this time that we are confronted with the challenge that grows more serious each day, and our failure to act has already resulted in an unprecedented military threat to the United States, to America's independence and security. The question in the 1980's is the same as it was in the 1820's: the sovereign survival of our free society, of our hemisphere, or are we going to be subjected to submission to the installment plan. So our choice is very clear, between the Brezhnev doctrine or the Monroe Doctrine. I would ask that we enforce the Monroe Doctrine.

On Thursday, July 28, 1983, a very distinguished journalist in this city wrote a lead editorial in the Washington Times newspaper. That, of course, is Patrick Buchanan. Mr. Buchanan points out that President Reagan has historic opportunity if he is willing to pay the price.

Mr. President, I ask unanimous consent that the text of the Buchanan editorial be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

(By Patrick Buchanan)

REAGAN HAS A HISTORIC OPPORTUNITY—IF HE'S WILLING TO PAY THE PRICE

With the dispatch of the U.S. battle fleets to the Pacific and Caribbean coasts of Central America, the president has issued a statement to the world: A Soviet satellite state and military base in Central America is unacceptable to the United States.

That the Sandinistas and their American sympathizers have gotten the message is unmistakable. Suddenly, the Ortega Brothers are anxious to negotiate treaties of noninterference in the affairs of their neighbors. The American left—politicians and press auxiliaries—is alternately berating Reagan's "gunboat diplomacy," and imploring him to talk to the Sandinistas, to listen to the Contadora Group, to wait upon the Kissinger Commisssion. Something approaching a general panic has broken out in this city now that Ronald Reagan means to rid the hemisphere of the Sandinistas.

By dispatching the fleet, however, the president has himself publicly climbed up the high dive. If six months hence, USS Ranger and New Jersey come steaming home, and the Sandinista regime is firmly and permanently entrenched, the president will be perceived as having run an American bluff. The Soviet military base in central America will be accepted by the world as a permanent feature of the Cold War with which the United States has, once again, come to terms. Castro and Andropov's tremendous gamble will have paid off.

All the talk about poverty and human rights, democracy and land reform aside, Central America is the latest battlefield in the war between the United States and the Soviet Union.

The Soviets, the Cubans, the Sandinistas have shoved their stack of chips in. They have accepted the risks inherent in establishing a communist beachhead deep inside the hemispheric defense perimeter of the United States. They have in four years built an indigenous army of 75,000 troops and militia, poured in advisers, technicians and material, and sought to expand the beachhead to El Salvador.

The Ortega Brothers are not going to be negotiated out of power by Richard Stone or Henry Kissinger. They are not going to be frightened out of power by the battleship New Jersey with its impressive array of cruise missiles. They are not going to commit suicide by inviting back anti-communist Nicaraguans and committing their fate to free elections. Nor will they be abandoned by Yuri Andropov simply because Sen. Moynihan warns that if he doesn't we will cut off his wheat supply and foreclose on his Polish subsidiary.

The presence of the battle fleet can persuade Managua, temporarily, to cool its revolutionary ardor, to play the peace-loving socialist state, the hemispheric good neighbor.

But, as soon as the gun-boats go home, the Sandinistas will return to the business of waging war against Western interests in Central America, just as Hanoi went back to its war of conquest of South Vietnam, the day the B-52 departed.

Having seized and consolidated power at the barrel of a gun, the Sandinistas will not be removed—except at the barrel of a gun. Given the military build-up in Nicaragua, unprecedented in Central American history, it is unlikely that any coalition of 10,000 "Contras" can drive them from power, without the military assistance of the United States. Which means American wounded and American dead.

If the United States is unprepared to pay that price, then we should reconcile ourselves to a Central America of 20 million people allied with and attached to the Soviet Empire. It is as simple as that.

Conversely, Central America offers a historic opportunity to the United States.

In Nicaragua, the Cubans and Soviets are taking an immense gamble. They are overextended, overexposed. If the president is willing to put up with hysteria in the United States, to pay the price to overthrow the Sandinista regime, he would be the first American president to have inflicted a decisive military defeat upon the Soviet Empire.

If, through American action, the Sandinista regime is thrown upon the trash heap of history, the communist war in El Salvador—isolated, demoralized guerrillas with no base of supply—will gutter out. An American-based push to dump the Sandinistas, coupled with U.S. recapture of the island of Grenada and Surinam from the grisly Castroite gangs who seized them, could, in six months, put the Western Hemisphere—excepting only Cuba—off-limits to the Soviet Empire.

This would expose as bogus the myth that communist revolutions are irreversible, and would send a message to the world that, under Mr. Reagan, the post-Vietnam paralysis of the United States is over. The political and psychological shock to Castro, of seeing the Soviet's Western Hemisphere bases rolled up with impunity, would be jolting; and the effect upon free men and anti-communists from Eastern Europe to southern Angola would be electric.

By sending the fleet, Mr. Reagan has come close to putting his place in history on the line. If the Sandinistas survive, and lead the communist takeover of Central America, no amount of plea-bargaining on the part of the president's cohorts—i.e. he had no "consensus"; he lacked public support—is likely to persuade.

Mr. SYMMS. Mr. President, I also ask unanimous consent to have printed in the RECORD at this time a Washington Times article by Mrs. Jeane Kirkpatrick, our distinguished Ambassador to the United Nations, dated Friday, July 15, entitled "Guerrilla Facade of Democracy Has Been Dropped."

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Washington Times, July 15, 1983]

GUERRILLA FACADE OF DEMOCRACY HAS BEEN DROPPED

(By Jeane Kirkpatrick)

The guerrilla movements in Central America today can be distinguished from those elsewhere, those in Vietnam, for example, in significant measure precisely because they dropped any reformist, nationalist, nonaligned, democratic, broad-based facade, which has until now been conceived as prerequisite of a successful strategy for so-called liberation wars.

As recently as 1979, when the Sandinistas undertook the last six months of the struggle against the Somoza regine and triumphed in that struggle, it was reasonable to anticipate that the result of a successful Sandinista struggle could be a broad-based nationalist, reformist, neutralist, democratic regime.

The liberation front which achieved its victory over Somoza comprised multiple groups. There were important representatives from the private sector. like Arturo Cruz and Alfonso Robelo and Jorge Salazar.

There were religious leaders like the Archbishop Obando y Bravo, who commanded the broadest support in the nation and had become veritable symbols of opposition to Somoza.

There were various armed factions within the FSLN, and the FSLN was itself a plausible, broad front, so that it could possibly bring to the OAS in July 1979 its request for formal official support from the Organization of American States.

At the time, in July 1979, in response to that request from the FSLN, the Organization of American States took an unprecedented step. It passed a resolution calling for a head of state, Somoza, to step down as a president, and his replacement by representatives of this new, broad, reformist, democratic front.

Certainly the political basis of the act made clear the expectations of the other governments of the Americas and of the United States.

Formal written commitments were made by the FSLN in their letter to the OAS. That letter is not often enough thought about today.

Since we are indeed approaching the fourth anniversary of the victory of the FSLN in Nicaragua, I would like to read just a few passages from the letter which led to the OAS' formal support and which played no insignificant role in the final arrival of the FSLN in power.

"Mr. Secretary General of the Organization of American States: We are pleased to make available to you and to the ministers of foreign affairs of the member states of the organization a document containing our plan to secure peace in our heroic, long-suffering country at the moment when the people of Nicaragua are consolidating its political and military victory over the dictatorship.

"First, we have developed this plan on the basis of the resolution of the 17th meeting of consultation on June 23, 1979, a resolution that was historic in every sense of the word. It demands the immediate replacement of the genocidal Somoza dictatorship, which is now nearing its end, and backs the installations of a broadly representative democratic government in our country, such as the one we have formed.

"While saying that the solution to this problem is exclusively within the jurisdiction of the people of Nicaragua, it appeals to a hemispheric solidarity to preserve our people's right to self-determination. We are presenting to the community of the hemisphere in connection with our plans to secure peace, the goals that here inspired our government ever since it was formed. They have been set forth in our documents and political declarations, and we wish to ratify them here today, that is, before the OAS.

"One, it is our firm intention to establish full observance of human rights in our country in accordance with the United Nations Universal Declaration of the Rights of Man and the Charter of Human Rights of the OAS. Our observance of human rights has already been made plain by the way the Sandinista National Liberation Front has treated hundreds of prisoners of war. Our government thus invites the Inter-American Commission on Human Rights to visit our country as soon as we are installed in our national territory.

"Two, our wish that our installation in Nicaragua come about through peaceful and orderly transition. The Government of National Reconstruction would take it as a gesture of solidarity if the foreign ministers of the hemisphere were to visit our country, and we do hereby extend to them a fraternal invitation to do so.

"Three, our intention to embrace civil justice in our country, and to try those incriminated of crimes according to the regular law. The people have won themselves the right to let justice prevail for the first time in half a century, and will do so within the framework of the law without a spirit of vengeance or indiscriminate reprisals.

"Four, those who wish to do so may leave the country.

"Five, the plan to call the first free elections our country has known in this century, so that Nicaraguans can elect their representatives to the city councils, to the Constituent Assembly, and later elect the country's highest authorities.

"Mr. Secretary General, it is now up to the governments of the hemisphere to speak so that the soldarity with the struggle of our people is carried forward to make democracy and justice possible, and Nicaragua can become fully effective. We ask that you transmit the text of this letter to the foreign ministers of the Organization of American States.

"Yours most respectfully, Junta of the Government of National Reconstruction, Violeto Chamoco, Sergio Ramirez Mercado, Alfonso Robelo, Anehas Daniel, Ortega Saavedra."

Those were the promises offered. Those were the statements of intentions, sincerely, presumably, entered. On the basis of the letter's promises and the expectation that those promises would be fulfilled, the OAS passed its resolution. The United States rushed some $24.6 million in emergency food, medical and reconstruction assistance to the FSLN, and provided some $118 million in direct financial assistance in the subsequent 18 months.

In addition, the United States firmly backed the application of the new government of Nicaragua in the multilateral lending institutions and assisted them in securing some $262 million in aid from those multilateral institutions, an amount doubled that the Somoza government had received in the preceding 20 years.

The United States was also helpful, as were other members of the Organization of American States, in securing support from other western and democratic countries. This was so successful that by the fall of 1982, the total amount of economic aid which the government of Nicaragua had received from western governments was estimated authoritatively to be $1.4 billion as compared to about $.6 billion from the Eastern bloc.

The government which resulted rather quickly shed some of its broad-based characteristics. It became more and more narrow in composition, and repressive in its behavior. Of the five members of the junta who made the application to the OAS, who signed the letter, two resigned within the

first year: Violeto Chamoco after it became clear that rigorous press censorship was the norm rather than the free press which had been anticipated; Alfonso Robelo after it became clear that the policies were not those of the pluralist democracy which he had expected.

Both of them were, of course, also very negatively impressed by the decision announced during the first year to postpone, and then to postpone again, elections until finally it was announced just in advance of the first anniversary of the revolution in July 1980 that there would be no elections before 1985, not even the municipal elections, which it was thought would take place during the first year, that it would, furthermore, be illegal for parties to organize, or to discuss candidacies of national elections before 1984.

It was further, of course, suggested, rather brutally, that those elections when they finally took place would not be the kind of elections that we bourgeois democrats talk about, but the kind of elections that would serve the purposes of the revolution.

The progressive private sector, COSEP, resigned in protest against the progressively severe restrictions on the political process and on economic freedom. Not too long thereafter, their leader, Jorge Salazar, was murdered in cold blood as he traveled from one city to another, gunned down. His widow serves today on the six-person directorate of the anti-Sandinista FDN. The details of this murder, by the way, are available today in Washington from that most interesting recent arrival from Managua, Miguel Bolanos who has a good deal of information as well as about the murder in cold blood of hundreds of former national guardsmen who were on one pretext or another simply shot and then buried in mass graves.

The opposition group that Alfonso Robelo had organized in his opposition party, the MDN, was set upon repeatedly. His house was attacked by the so-called divine mobs with which the Nicaraguan revolution attempts to protect itself, and demonstrate the seriousness and character of its purpose.

Very soon it became clear that this broad revolutionary front was a very narrow front indeed. That process of attrition continued as person after person who had been associated with the Sandinista front abandoned hope, gave up, went first into passivity and then frequently into exile.

Eden Pastora's departure was one landmark. The departure of two successive ambassadors to Washington were other landmarks. Virtually the entire group that negotiated the original economic assistance from the United States are now in exile.

It had become progressively clear that the broad front was very closely linked to the Soviet bloc. The landmark, the first landmark in this linkage, was a trip in May 1980 of Moises Hassan, Henry Ruiz and Carlos Colonel, among others, to Moscow to sign an agreement between the FSLN and the Communist Party of the Soviet Union.

At that meeting, among other things, the Sandinista front, the FSLN, committed itself to support for the Soviet invasion of Afghanistan, as well as to the peace-loving Vietnamese people's invasion and occupation of Kampuchea.

The government in Managua meanwhile devoted itself to the process of progressive consolidation of power. The church, which in Managua has been notoriously independent, has been progressively brought under control, and when it could not be brought under direct control it has, of course, been challenged by way of the development of a parallel so-called "popular church."

A kind of apex in this effort was achieved with the really incredible behavior of the Nicaraguan government during the visit of the Pope, during which the persons who wanted to meet the Pope were prevented from attending his appearances and his mass, and those who desired to insult him were instead allowed to claim the only seats.

The ushers who were assigned to maintain order were, of course, also cheerleaders who led the interruptions, systematic, repeated interruptions of the Pope's homily.

The independent unions of Nicaragua have been brought under control. Private enterprise has been brought under control. And of course, though it is hard to single out particular groups who have been maltreated among all those who have been maltreated, but the Miskito, the Suma, the Rama—their mistreatment has been singular for its brutality.

It either drove them into exile or into forced habitation in camps from which they are not permitted to depart—burning the villages, burning their churches, burning their fields, really brutalizing these people, who have asked only that they be left alone.

That is, of course, the ultimate sin from the point of view of the totalitarian—that people ask to be left alone to pursue their own goals and honor their own values and worship their own gods. The Miskitos were profoundly offensive to the Sandinistas, and they have suffered bitterly.

Meanwhile, the militarization in Nicaragua has gone on apace. Today Nicaragua has the largest military force of any country in Central America, any country in Central America ever dreamed of.

They have some 25,000 active duty forces and double that number in militia and the active forces. There are more foreigns in Nicaragua than we care to think about. Cubans are the largest group. There are several thousands of those. Sometimes we estimate 9,000. Is that our current estimate?—8,000, 9,000, give a thousand, take a thousand. By the time we look again, there may be more.

There are Soviet advisors, there are East Germans, there are 40 to 50 PLO "volunteers." There are arms, ammunitions from all the countries, virtually, in the Soviet bloc.

The Libyan connection was rather dramatically exposed in Brazil, rather unintentionally but very usefully, providentially, one might almost say, during a crucial congressional discussion.

Nicaragua's strength makes their neighbors very uncomfortable. That marvelous embodiment of democratic leadership, the president of Costa Rica, Carlos Alberto Montt, commented:

"At this point it is possible that the conditions for a consensus action within the OAS are present. But yes, there is sufficient reason so that all the countries should be alert. A country dominated by the policies and interests of the Soviet Union in our Caribbean area is a danger for other nations. Cuba has been, Nicaragua will be when they definitely decide openly to take the road to international Marxism."

The president of Panama, Ricardo de la Espriella, commented:

"When a country arms itself more than it needs to maintain internal order, its neighbors worry and can do the same. Nicaragua is arming itself and it is arming itself more than what is necessary to maintain order. This pushes other nations to do the same. This is not the solution. We see with concern the excess of the Nicaraguan government's armaments."

The decision to openly identify themselves with the Soviet Union in fact had almost been taken by the time that President Montt spoke, and that was something over a year ago.

It was at the first anniversary, of course, that Fidel Castro had come himself to say, now we are three, meaning, of course, Cuba, Granada, and Nicaragua, predicting that soon there would be more.

There is today, for anybody who is interested in stamp collecting, a marvelous new Karl Marx stamp issued in Managua, which not only has a picture of the founder, but it also quotes from the Communist Manifesto.

It is no longer possible, for anybody who is willing to know, to doubt the political-military character of the government of Nicaragua, or of its international alliances, or of their intentions.

As the character of the Nicaraguan regime became clearer, so did the character of the Salvadoran struggle. The Salvadoran struggle, too, began with a group, the FMLN, which appeared to be broad-based reformist, neutralist, pluralist. It, too, contained diverse elements, or appeared to.

They are no more ambiguous in their character than the government of Nicaragua. Their intentions are no more ambiguous, their plans for the hemisphere and for the rest of Central America are no more ambiguous.

The interesting doctrine of truth which they have introduced into our hemisphere is as important as the military forces. They have introduced into our hemisphere, I truly believe, a notion that truth is defined by power, that power can define what is good, what is true, what is fair, what is peace.

They are trying to teach us that what is true is what the so-called "progressive nations" say is true, that what is fair is what serves their interests, that what is legitimate is what expands their power. They are trying to teach us that it is legitimate for communist governments to train and arm guerrillas and make war on their non-communist neighbors, and that it is illegitimate for non-communists to defend themselves or for others to help them do so.

According to this logic, movements which expand communist power are by definition national liberation movements. Everything is permitted to achieve their ends; nothing is permitted to their targets, not even the right of self-defense.

The strategic importance of this conflict, morally, military, economically to the people of Central America, to the people of South America, and to the people of North America, can hardly be overestimated.

We should not ignore the fact that during the past year an active guerrilla movement, the Sindero Luminoso, has disrupted the life of the democratic republic of Peru; that another guerrilla movement, the M-19, has disrupted the life of another democratic republic, Colombia, in spite of a very generous offer of amnesty by the new president of Colombia; that guerrilla movements continue to disrupt the life of Guatemala, that they threaten Honduras, that they threaten and bully and menace Costa Rica.

The United States supports today the same principles which have inspired us for centuries. We support the notion of Americans free of interference from foreign extra-

hemispheric powers. We support the principles of national independence, of self-determination, the principles of freedom, equality, constitutionalism, rule of law, democracy.

The president of the United States has reiterated these in many occasions. He did so in his dramatic speech to Congress, when he said:

"The United States will support any agreement among the Central American countries for the withdrawal under fully verifiable and reciprocal conditions of all foreign military and security advisers and troops. We will support any verifiable, reciprocal agreement among Central American countries and the renunciation of support for insurgencies in neighbors' territories. We desire to help Central America to end its costly arms race and will support any verifiable, reciprocal agreement on the nonimportation of offensive weapons."

Every country in the world, specifically including the United States, has a stake in this struggle for the defense of the most basic principles of the Americas, of the United Nations Charter, of the United States Constitution, and indeed of the civilized world.

(The Hon. Jeane Kirkpatrick is the United States representative to the United Nations.)

Mr. SYMMS. I want to just comment briefly, Mr. President, on what Mr. Buchanan's point is. He makes the point here by saying:

With the dispatch of the U.S. battle fleets to the Pacific and Caribbean coasts of Central America, the president has issued a statement to the world: A Soviet satellite state and military base in Central America is unacceptable to the United States.

That the Sandinistas and their American sympathizers have gotten the message is unmistakable. Suddenly, the Ortega Brothers are anxious to negotiate treaties of noninterference in the affairs of their neighbors. The American left—politicians and press auxiliaries—is alternately berating Reagan's "gunboat diplomacy," and imploring him to talk to the Sandinistas, to listen to the Contadora Group, to wait upon the Kissinger Commission. Something approaching a general panic has broken out in this city now that Ronald Reagan means to rid the hemisphere of the Sandinistas.

That is Buchanan's opening statement. Then he goes on to say:

By dispatching the fleet, however, the president has himself publicly climbed up the high dive. If six months hence, USS *Ranger* and *New Jersey* come steaming home, and the Sandinista regime is firmly and permanently entrenched, the president will be perceived as having run an American bluff. The Soviet military base in Central America will be accepted by the world as a permanent feature of the Cold War with which the United States has, once again, come to terms. Castro and Andropov's tremendous gamble will have paid off.

All the talk about poverty and human rights, democracy and land reform aside, Central America is the latest battlefield in the war between the United States and the Soviet Union.

He points out in the article—and I urge my colleagues to read the article as it will appear in the RECORD—

In Nicaragua, the Cubans and Soviets are taking an immense gamble. They are overextended, overexposed. If the president is willing to put up with hysteria in the United States, to pay the price to overthrow the Sandinista regime, he would be the first American president to have inflicted a decisive military defeat upon the Soviet Empire.

It would appear to me, Mr. President, now that the fleet has been committed, that the President had better think long and hard, as the leader of our foreign policy. I think my big concern when a Central America policy commission was announced was that we do not need government by commission in the United States. We have a very, very ample system of checks and balances, of congressional cooperation with the administration. We really are certainly capable, I think, in our system of having cooperation between the leader, the President, the Commander in Chief, and the Congress which ultimately has to approve these appropriations that are necessary for any of the actions of the executive branch, whether it be military or otherwise.

At this point I hope the administration will not waste this opportunity. We have seen these opportunities for action wasted in 1962 when it was appropriate. I think if we are victorious in Central America, that most certainly we could put Castro on the defense instead of the offense. Fidel Castro would be in a position where instead of having 40,000 troops scattered around terrorizing other places in the world, such as Africa and Nicaragua, he would have to have them back home to defend the homeland, and we could make the world a much safer place if we exploit a unique opportunity in history that has been handed to us at this point in time.

If we fail to meet the challenge and help those freedom-loving people who are trying to democratize Nicaragua, if we fail in that task, then we are going to pay a much higher price in blood and treasure later on down the road.

It would be my wish that the President would heed, I think, the very clear insight Mr. Buchanan has set forth in his editorial of Thursday, July 28, and apply a great deal of American pressure and actually bring this about so that we are successful, so that we will not have to face the refugee problem that I assure my colleagues we will have to face in the very near future. Just a little bit of effort now and a little bit of exertion of American's strength here in our own front yard will pay us large dividends down the road.

Now, I would just like to close, Mr. President, by saying that when I started out my remarks I mentioned the problems we faced with international trade and the $70 billion trade deficit. American success in Central America would probably have a tremendous fringe benefit to our international trade problems. It would make people perceive that it is not necessary for a flight of capital all over the world into what they view as the last bastion of safety and freedom—America—that is going to last for a while longer while they keep spinning over little countries, throwing them to the alligators. Everyone with capital hopes of course, that the United States, will be eaten last by the alligators. If once we can reverse the tide to prove that it is not inevitable that the Communist advancement is going to continue, to have one place in the world where there was a repudiation, a reversal, if you will, of the Soviet expansionism and the application of the Brezhnev doctrine that has been applied so diligently by the Soviet empire since they have come into being, and that they have instituted in 1968, of course, in Czechoslovakia and forced, in their typical way, their definition of freedom—if you send in somebody with more AK-47's and bigger and better guns than they have, then you give them freedom at the point of a gun barrel and you have it freedom the Russian way. That is what they call peace.

I sometimes wonder why we have been so naive for so many years about what the Communists were up to.

Mr. President, I wish to thank the distinguished majority leader and minority leader for providing this time for me this morning. I know that we are very busy at this time and they are moving to get the legislative agenda on. I hope that my short 45 minutes will not be disruptive to the efforts of the distinguished majority leader and the distinguished minority leader have to accomplish today.

Mr. President, I yield the floor.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a 15-minute period for the transaction of routine morning business, during which Senators may speak for 3 minutes each.

POVERTY IS WINNING

Mr. SYMMS. Mr. President, I would like to submit for the RECORD an article recently published by Colin Welch in the summer issue of Chief Executive magazine.

Mr. Welch hit the nail right on the head in his article. We are losing the war on poverty because our lawmakers have lost faith in the compassion of capitalism. In order to reduce poverty we have to believe in the power of capitalism to deliver more freedom, more opportunity, more social mobility, and more abundance than any other system devised by man. Capitalism rewards the risktaker, and it is a system that believes in profit as an incentive

and in the widest distribution of justice, as well as wealth.

Franklin Roosevelt used to say that the inherent vice of capitalism was the unequal sharing of blessings—while the inherent virtue of socialism was the equal sharing of misery. Too many Americans believe that capitalism is not very noble, that somehow our economic system is something to apologize for. In the land of John Kenneth Galbraith and John Maynard Keynes, profit has not always been regarded as a positive thing, and capitalism has often been regarded as the handmaiden of greed.

But the American brand of capitalism has always demanded more than creature comfort. It demands a fair distribution of the profit—and a widespread assumption of responsibility. For there can be no real prosperity in a land where millions are denied a chance at success. Responsible capitalism fuels social progress and has an underlying morality which prevents the system from degenerating into mere acquisition on a grand scale.

As the last half century has been a constant narrowing of the old gulf between business and the humanities, so Government has come to assume an ever-greater role in economic affairs. For 50 years, we have turned to Washington to feed the hungry, house the homeless, provide work for the unemployed. And so Government swelled to meet those demands; and in the process it came to confuse responsibility with dictation. It promised to realize our dreams—but spent much of its time sleepwalking. It vowed to raise the floor beneath the poor—but lowered the ceiling on everyone else. It sought to divide existing wealth more evenly—rather than foster the creation of new wealth for millions of Americans.

Real compassion and capitalism of the American brand have always been comfortable partners. Our brand of capitalism has been successful because we have always combined it with a sense of moral obligation. It reaches its zenith in an atmosphere of democracy, equity, fairness and real compassion. It is based on the genius of individual men and women, and thrives wherever those individuals are protected and wherever their diversity is maintained.

Our economic system has not failed us; nor has it outlived its usefulness or too simple for today's complex world. Our economic system—capitalism—is not working very well because some of our leaders on Capitol Hill do not believe in the merits of the system and constantly try to undermine it.

One need only look around the globe for proof that increasing Government control, further punishing our producers and robbing everyone of incentive—in short socializing our economy—will not work.

Our system of democratic capitalism, based on the freedom and genius of the individual, with individual rights and responsibilities under representative Government is the system that does work. It will work better and for the benefit of everyone, if we all believed in the system.

Mr. President, I ask unanimous consent that the article by Colin Welch be printed at this point in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

POVERTY IS WINNING

(By Colin Welch)

President Johnson, a great and maligned man in many ways, waged two great wars at once. One was in Vietnam, and ended in defeat. The other was against poverty. You remember the sick joke of the time—"I've joined the war against poverty. This morning I shot a beggar." And how has this second war ended—in defeat or victory?

In one sense it has not ended, and never will till the poor are no longer with us. But certainly the results of the war so far, in terms of objectives achieved and costs incurred, are perverse and disappointing in the extreme.

Most people probably think, or till recently thought, that the prosperity of the Truman/Eisenhower-Kennedy epoch somehow left out the poor. The rich got richer, the middle classes prospered; but underneath there remained a great reservior of poverty and misery which was unalleviated and undiminished. Precious little trickled down into those dark depths.

I could never believe this myself. I was inoculated against this particular error by the Italian economist Pareto, who taught—roughly—that a rise in national income must normally lead to greater equality as well as prosperity, and that no class could be excluded from its benefits unless by arbitrary non-economic barriers, like apartheid in South Africa.

Yet even there, so great are the wealth-producing forces generated by South Africa's bounding economy, that nothing can prevent the blacks from prospering, less than the whites maybe, but more than they did before in South Africa or do anywhere else in Africa. For instance, South African blacks own more automobiles than Russians do in the whole Soviet Union!

I would therefore expect poverty to have diminished in Eisenhower's prosperous America. And so indeed we find that it did drop steadily between 1948 and 1968. By 1952 it had fallen from 33 to 28 percent of the population; under Eisenhower it fell to 22 percent; by 1964 it was only 18 percent, and under Johnson it fell again to 13 percent in 1968.

A 5 percent drop, then, under Johnson? No better than under his predecessors, to be sure, but no worse either. But wait: as a brilliant article by Charles A. Murray (in last fall's Public Interest) made clear, things were beginning to go badly wrong by 1968.

The war on poverty was declared in 1964. But the first great offensives were not launched till the budgets of 1967 and 1968. And since 1968 the steady fall in poverty first slowed and then went into reverse. More people are poor in America now than at any time since 1968.

This refers indeed only to cash incomes. Add in benefits in kind, like food stamps, subsidized housing and medical care, and you get a rosier picture. While 13 percent now live in cash poverty, only 6.1 percent live in absolute poverty—though of course in-kind benefits are not the same as, or as good or dignified as, cash in the pocket, which the poor would surely prefer.

For a less rosy picture, there is what Mr. Murray calls "latent poverty"; that is to say, the number of people "who would be poor if it were not for government help."

This figure dropped steadily and healthily through the properous '50s and '60s, from about 30 percent to 18 percent. Since then it has climbed to 22 percent, and is rising still. Yet the war on poverty was designed not to increase but to reduce the numbers dependent on government help. President Johnson offered not handouts but a hand, "opportunity and not doles." The days of the dole he thought numbered; yet more people are dependent on it now than ever.

What are the consequences? George Gilder has set them out, as also Blanche Bernstein in "The Politics of Welfare," her account of her heroic efforts to bring New York's welfare jungle under some sort of control. To name a few: the demoralization of America's poor; the destruction of work incentives by the fact that welfare pays better for idleness; the general impoverishment caused by the consequent withdrawal of labor; a growing welfare bureaucracy of "community" determined to extend its empire and to increase the numbers dependent on it; a consequent explosion of false claims and ineligible recipients; a vast proliferation of one-parent dependent families; the growth of a hereditary "underclass," in which children are reared to regard welfare (and crime) as the normal way of life; overheavy taxation, destroying the jobs even of those prepared to work and thus aggravating the problem; a sorry and worsening mess.

Capitalism has often been accused of perpetuating poverty, or even of creating it. The latter charge is manifestly absurb. Capitalism did not make us poor. It found us poor.

Poverty was our original and natural state. We do not have laboriously to explain it, or wonder why it still persists. What is really a matter for wonder is why it is not still as universal as it was.

The life of primitive man was filed with strife and labor: strife to protect his hunting grounds and cultivated patches, labor to extract from these last a miserable subsistence. Capitalism when it eventually arrived did not find him fat and idle. It did not set him to work. It found him already working. What it did was, by organizing his toil and dividing his labor, to make him infinitely more productive.

Thus was "surplus value" created. Marx regarded this as something stolen by the capitalist from the worker. It was rather in fact something created by the capitalist, and thus arguably his own property.

He was not so much "exploiting" the workers as rearranging his work for the common good. The result was an enormous increase of wealth, from which we have all, capitalists and workers alike, enormously benefited. Still, in Marxist and progressive thought, the capitalist is regarded as the father of the dragon poverty rather than the St. George who killed it.

Governments by contrast are credited with alleviating poverty. They normally deserve such credit only insofar as they create and maintain the order and stability without which capitalism cannot operate fruit-

fully. Beyond this point their efforts are often counter-productive.

Without conscious intent, free market capitalism waged war on poverty with notable success. With conscious intend, governments have waged war on poverty with little success, none or worse. There is a paradox here, and a moral.

The great Gladstone boasted that, as Chancellor of the Exchequer, he had left the rich richer and poor less poor than he found them. The sooner we remember that these two developments are not incompatible but harmonious, the better for the poor.

Meanwhile, in the war against poverty, poverty is winning.

ACCREDITATION OF THE VOICE OF AMERICA TO SENATE PRESS GALLERY

Mr. SYMMS. Mr. President, if I might have 1 more minute, I would like to refer to an article written by Lester Kinsolving, which appeared in the Washington Guide. This is a very interesting article. I urge my colleagues to read it. It is certainly something of historical significance, I think, to those of us who are new here. It concerns the rules and nuances of how this august body works, how the rules are set for the press gallery in the United States Senate.

I found the article very interesting and very fascinating, about the way that Capitol Hill for years has kept the congressional press gallery under the control of the press.

I want to compliment those in the Senate who were responsible for bringing about the fact that the "Voice of America" will now have accreditation in our press gallery and they will have the same privileges as others with accreditation.

It is my understanding that they do not have them today but they will have them in the very near future. They will have the same privileges that the Tass News Agency has and the same privileges that Pravda has in the press gallery. That is an improvement.

I ask unanimous consent that the article by Lester Kinsolving, the national editor of Washington Guide, be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

VOICE OF AMERICA

(By Lester Kinsolving)

Most Americans are not aware that a committee of reporters on Capitol Hill has, for years, kept the Voice of America out of the Congressional press galleries, while at the same time admitting the Tass News Agency.

This denial of accreditation to the Voice of America (VOA) is done by the Standing Committee of Correspondents, a reporters committee (actually three reporters committees, for print, for radio-TV, and for periodicials) to whom Congress has given the authority to issue, deny or even confiscate the Congresssional press credentials of other reporters. In the course of taking such action against reporters who are either competitors, or not properly respectful, this reporters committee cannot be taken to the civil courts, since they are given Congressional immunity. The only recourse to which a reporter can turn in such a case is either the Senate Committee on Rules and Administration or the Speaker of the House, either of whom can overrule the reporters committees. (Such overruling, by the Senate Rules Committee, has taken place only twice in this century.)

When the VOA appealed this exclusion to the Senate Rules Committee, the chairman, Charles Mathias, R-Md., conducted a hearing on May 10th. The hearing room was crowded, and there were no less than 48 U.S. Senators who wrote Mathias asking that this ban on the VOA be set aside. Despite this, and an extensive story on this hearing by UPI, all three daily newspapers published in Washington (The Post, the Washington Times, and USA Today) killed this UPI story.

IMMUNITY FROM OUTSIDE PRESSURES

During the hearing, the "chairperson" of the Standing Committee of Correspondents, Cheryl Arvidson of Cox Newspapers, told the Rules Committee:

"The VOA is a government agency, run with government money and overseen by political appointees" and "is also charged with articulating the foreign policy of the United States." Therefore: "We are not convinced that VOA is totally immune from outside pressures from higher sources who wish to influence its news and reporters."

Just how many newspapers are immune from all such "outside pressures" is an interesting question indeed, raised as it was by Miss Arvidson who is employed by the Cox Newspapers. Chairman of the Board of this corporation is Anne Cox Chambers of Atlanta, where the Cox Newspapers own both dailies, the Journal and the Constitution. Mrs. Chambers was so strong a supporter of Jimmy Carter's campaign for the Presidency that after the election, she became the U.S. Ambassador to Belgium. As for "outside pressures," the Atlanta Constitution fired its education editor, George Bowler, because he circulated a memo to fellow journalists asking whether it was ethical for a newspaper to avoid reporting anything negative about Atlanta's most prominent department store—and the leading advertiser in the Constitution.

(Bowler recalled, during an interview, that he was fired by Reg Murphy, who is now the publisher of the Baltimore Sun.)

RUSSIAN RETALIATION?

Since Tass News Agency is unquestionably a government agency, Miss Arvidson testified:

"The Standing Committee (of Correspondents) wrestled with this problem in 1950 and finally admitted Tass, under pressure from the State Department."

While the very idea of the elected representatives of the press corps on Capitol Hill being successfully "pressured" by the folks from Foggy Bottom is prima facie ludicrous, Miss Arvidson went on to reveal:

"A confidential State Department memo in our files recommends the accreditation (of Tass) in the interest of helping American correspondents obtain and retain visas from the Soviet Government. These days, newspapers are filled with reports of foreign governments seizing any opportunity to expel American correspondents from their countries, and there is no doubt in our minds that U.S. reporters would be retaliated against, to the detriment of the American public, if the Standing Committee sought to oust representatives of government-controlled news services from our gallery."

Any reporter who has ever covered the Department of State is familiar with the policy whereby the U.S. Government, whenever an American diplomat or newsman is expelled without due cause, expels a Soviet diplomat or newsman.

U.S. EDITORS OBJECTION

What Miss Arvidson failed to mention in her testimony is the fact that the Standing Committee's files also contain a very strongly-worded protest of the accreditation of any Tass representatives, given the large number of KGB agents who have been discovered to be Tass correspondents.

This protest came from a source of far greater "pressure" than the State Department: the ASNE (American Society of Newspaper Editors).

This reporters committee having accredited Tass and excluded VOA must surely provide some high comedy to the Kremlin—as well as a propaganda tool. For the Soviets can point out that the VOA is, by Congress itself, not regarded as being as legitimate as Tass, or the other government-controlled communist news agencies, who are accredited.

NATIONAL PUBLIC RADIO OBJECTS

By way of still further irony, one of those on the Radio-TV Gallery Standing Committee who testified against admission of VOA was Linda Wertheimer, of National Public Radio. NPR is heavily financed by the U.S. Government. Mrs. Wertheimer is accredited to cover Congress, where her husband, Fred, is head of one of the most controversial of all the lobbies, Common Cause. And speaking of lobbyists, Chairperson Arvidson told the Senate Rules Committee:

"The Standing Committee was created in 1877 to deal with just this sort of problem: Congress was under siege from lobbyists, claims agents and executive branch employees, who were using press privileges to gain access to the press galleries and other facilities."

TIME MAGAZINE OBJECTS

Also testifying in opposition to the accreditation of VOA was the Standing Committee of Correspondents of the Periodical Gallery. This committee includes Neil MacNeil, correspondent of Time magazine. Mr. MacNeil led the opposition to the accrediting of Consumer Reports, whose application for admission was turned down, among other reasons because its publisher, Consumers Union, is a non-profit, advocacy group which accepts no ads and which lobbys on behalf of consumers. Time, Incorporated, also has a lobbyist in Washington. But apparently this has been regarded as not so corrupting as the advocacy of Consumer's Union. Moreover, the many points of view which are advocated by Time magazine are perhaps more expressed, in what has been called the editorial content: no editorials per se; because Time is one great big never-ending editorial.

QUITE A PROUD HISTORY

Chairperson Arvidson also told the Senate Rules Committee:

"The Standing Committee has been in place since 1877, so we have quite a proud history." She did not explain how she had managed to reach such a conclusion on the basis of what is in the Standing Committee files. For apparently Miss Arvidson overlooked a good bit of the history of this committee; of which history very few people of

any ethical discernment would be proud—such as the Lautier case.

BECAUSE I AM COLORED

Louis Lautier was a reporter for the Atlanta Daily World, and 35 other newspapers, of the Negro Newspaper Publishers Association.

From his former associates at the Daily World in Atlanta, as well as the Afro-American in Baltimore, I learned that Louis Lautier died, not many years after this Standing Committee of Correspondents voted repeatedly to keep him out of the Senate Press Gallery. After this 14 month's exclusion, however, the Senate Rules Committee voted unanimously to overrule the Standing Committee of Correspondents, and to order that Louis be admitted.

The Standing Committee on Correspondents' minutes for March 19, 1947, contain some very notable reactions indeed to this action by the Senate Rules Committee. For these reporters termed this ruling by the Rules Committee an "arbitrary action of the Senators in ignoring the Standing Committee's recommendation for a one month study," and they added that there was: "obvious political motivation behind the Senatorial order," which constituted "a Rules Committee challenge of the correspondents' own authority in controlling the press galleries."

The effect of this (alleged) authority to "control the press galleries,"—control by reporters rather than Senators, that is—was apparent in Mr. Lautier's testimony. He noted that the Atlanta Daily World published 6 times a week, with a circulation of 28,190, according to Editor and Publisher Yearbook. (The Standing Committee of Correspondents issued a press release that reported: "The Committee understands that the circulation is between 2,000 and 3,000.")

Mr. Lautier also noted that since he was accredited to the White House and attended President Truman's press conferences; and considering the number of newspapers he represented, with a circulation of "around one and a half million," . . . "I can only conclude that the sole reason for the failure or refusal of the Standing Committee of Correspondents to approve my application to the Congressional Press Galleries is that I am colored."

Mr. Lautier was apparently not given to any exaggeration. He noted that Negro reporters were relegated to the visitors galleries—when there was room. But on such newsworthy occasions as the challenge to the credentials of Mississippi's Senator Theodore Bilbo, "Negro correspondents had to get the news the best way they could. . . . It was suggested that I could follow Congressional proceedings through the Congressional Record."

DOMINATION BY BIG RICH MEDIA

The record of who has served on this Standing Committee of Correspondents shows that this committee of reporters continues, year after year, to be dominated by reporters from the large and wealthy media. This is one of the privileges, if a publisher can afford to maintain large staffs on Capitol Hill; for they can also dominate the annual election of members of this Standing Committee of Correspondents.

Every one of the candidates in the 1983 election to this Standing Committee supported this system of domination by the Big Media, because, they claimed, they believe in the concept of "one man, one vote."

When asked if they also believe that this concept should be applied to the floor of the Senate, as well as the Senate press gallery, their answers were somewhat uncertain. For such a system would no longer provide the balance under which such comparatively small states as Rhode Island and Maryland sought 18th century protection against being dominated by such giants as Virginia, New York and Massachusetts.

No such protection is provided in the Senate Press Gallery. There is no such protection for reporters who represent media in many of those states with smaller populations; states that are represented in the Senate by members of the Senate Rules Committee.

If any of the reporters from such comparatively small media dare to be insufficiently respectful to the clusters of Big Media reporters who have always dominated the membership of the Standing Committee of Correspondents, such irreverent reporters, can, under the present system, have their press credentials taken away from them, or denied. This has been done . . . and it can still be done today; without due cause; without any semblance of due process. It can be done under the cloak of Congressional immunity. It can be done by the perpetrators without fear of any lawsuit for the damage they can do to people like Lautier, because of this extension of Congressional immunity, which surely ought to be taken away from them by the Senate Rules Committee.

NOWHERE ELSE DO REPORTERS ACCREDIT

At the State Department, a reporters' unofficial group called the State Department Correspondents Association is no longer allowed to accredit, or to take away credentials, of other reporters. Nowhere else in our nation's capital, are reporters allowed to control the accreditation of fellow reporters—who may be their close competitors, or for whom they may harbor personal animosity.

Such exceptional power is granted, however, to this handful of reporters on Capitol Hill. And White House press passes are today granted only after the applicant has first obtained a Congressional press pass.

FLOUTING THE FIRST AMENDMENT

How have these reporters' committees exercised this rather awesome power over the credentials of other reporters? Judge Gerhard Gesell of the U.S. District Court summarized the record quite accurately in the case of Consumers Union vs. Periodical Correspondents Gallery:

"Under a broad, generalized Congressional delegation, authority has been given to certain newsmen to prevent other newsmen from having access to news of vital consequence to the public. As a result, a group of established periodical correspondents has undertaken to implement arbitrary and unnecessary regulations, with a view to excluding from news sources representatives of those publications whose ownership or ideas they consider objectionable. The situation disclosed by this undisputed record flouts the First Amendment. It matters not that elements of the press, as well as Congress itself, appear to have been the instruments for denial of Constitutional rights in this instance; for those rights limit the actions of legislative agents and instrumentalities as surely as those of Congress itself."

WRIST SLAPPING THE POWERFUL

In addition to Judge Gesell's notation of this flouting of the First Amendment, there is also the 14th Amendment's guarantee of equal protection. Yet a comparison of the Standing Committee of Correspondents' treatment of Louis Lautier with this committee's treatment of offenders from large and wealthy newspapers in the committee's own files surely demonstrates an absence of equal protection. For example:

A reporter for the Washington Star was reprimanded for having accepted money from an agent of the Government of Nicaragua for writing a story. But he did not experience loss of his press credentials as Lautier did.

A reporter for the Detroit News committed a felony by impersonating a Congressman, and obtaining a good seat for the Begin-Sadat treaty-signing at the White House. Another (non-journalist) impersonator, of Senator Magnuson in Washington State, was convicted and sent to NcNeil Island Penitentiary. But this reporter was not even reprimanded by the Standing Committee of Correspondents. Instead, his bylined account of this felonious lying was published on page one by his newspaper. And he didn't experience loss of his credentials like Lautier did. (His proud report of having lied has now been, in effect, seconded by reporters of the Baltimore Sun and the Los Angeles Times, who have publicly declared their willingness to steal, or lie, in order to get a story. In the case of the Baltimore Sun reporter, he told me that this willingness to steal for publication would have extended even to such U.S. military secrets as the Manhattan Project, or the top secret timetable for our Normandy Invasion.)

A reporter for the Los Angeles Times enlisted an accomplice to impersonate a Congressman's staffer, in order to gain access to that Congressman's office after dark. Here, this reporter stole a news release from the desk of the Congressman and broke the embargo by three days. The reporter was caught and summoned to the office of the U.S. Attorney. But he was subsequently warned, released, and only reprimanded—by the Standing Committee of Correspondents. This burglar did not experience loss of his credentials like Lautier did.

A widely syndicated columnist for the Washington Post was discovered, in 1963, to be the officer of an airline, who presented a bill for $16,000 to Bobby Baker. This columnist was reprimanded by the Standing Committee. Thirteen years later, this same columnist was exposed by the Miami Herald as having become an officer of the Diplomat National Bank, as well as director of a chain of restaurants, and official of a chain of karate franchises. But not one member of the allegedly concerned Standing Committee of Correspondents was apparently willing to file a complaint against Jack Anderson. They took no action against this repeated violation of their rules. And he never experienced loss of his credential like Lautier did.

A reporter for the Louisville Times, not many years after the creation of the Standing Committee of Correspondents, entered the House of Representatives building and confronted retired Congressman William Taulbee of the 10th District of Kentucky. Taulbee, a Methodist clergyman, was not armed. But this reporter, Charles Kincaid, in front of eye witnesses including House Doorkeeper Sam Donaldson, drew a pistol and shot Congressman Taulbee in the head.

In having researched this case for some twelve hours, in the back issues of the Washington Post and the Washington Star, and having consulted with the House Press Gallery Superintendent, I learned from his 41 years experience that there is no known

evidence that the Standing Committee of Correspondents ever suspended the credentials of reporter Kincaid—even for killing a Congressman.

Instead, the Washington Star strongly supported this reporter who it noted, came from a good family in the Blue Grass—while Congressman Taulbee came from the hills. Kincaid was aquitted a year later, since it was reported that Taulbee had earlier in the day grasped Kincaid by the ear and expressed strong displeasure with some of the reporter's writings' in the Lousiville Times. For having murdered a Congressman, reporter Kincaid did not suffer loss of his credentials like Lautier did.

INTERNATIONALLY LUDICROUS

In addition to the Lautier case, the decision of this Standing Committee of Correspondents led the venerable columnist Richard Strout to resign from the press galleries, rather than adhere to their ridiculous ruling that he would no longer be able to accept $50 fees for doing broadcasts for the Voice of America.

This Standing Committee of Correspondents has also made itself internationally ludicrous by charging that both Drew Pearson and Marguerite Higgins had violated the rules because these renowned journalists had endorsed Crest toothpaste, the allegedly low nicotine content of a cigarette, Listerine, Adam Hats, Bromo Seltzer and a line of men's clothing at a local department store. Higgins laughed and dropped her membership. Pearson appeared before this Standing Committee and confessed that he had endorsed yet another product, an empty container of which he left in the permanent files. It is a good Maryland product: "Drew Pearson's No-Bull Cow Manure."

POSSIBLE REFORMS

If the Senate Rules Committee sees fit to continue the existence of the Standing Committee of Correspondents, the process of election ought to be restructured so that small media may be guaranteed representation, and thus protection, in the manner of sparsely populated states being represented in the United States Senate.

This could be done by a Senate Rules Committee rule that no one wire service, newspaper, network magazine, etc., will be given more than one vote in the election of members of the Standing Committee of Corresponsdents. This would mean that the wealthy and powerful media, who can afford to maintain large staffs on Capitol Hill, will no longer be able to have such power over the smaller media.

There is also a serious need that the rules of the press and other media galleries be rewritten by competent legal counsel, in order that they be clearly understood, rather than vague, and subject to a wide variety of interpretations.

The most serious need, however, is for the Senate Rules Committee to issue an insistence that all actions of this Standing Committee of Correspondents be done with proper regard for due process of law. And when violations of this standard are alleged to take place, there be immediate access to the Senate Rules Committee, or a subcommittee thereof. This is essential in order that never again will any person have to wait so long for remedial action as did Louis Lautier as a result of the indefensible actions of this Standing Committee of correspondents. For this Committee has so often violated what should have been a solemn obligation to uphold the First and Fourteenth Amendment rights to press freedom and equal protection, in the course of maintaining the good name of the United States Senate.

THE CRANSTON ENERGY PLAN

Mr. CRANSTON. Mr. President I am today, announcing a comprehensive long-range plan to meet the Nation's chronic energy problem.

My plan will eliminate our dangerous and costly dependence on foreign oil and get us into the 21st century with no energy crisis.

My national energy plan calls for:

Phasing out all nuclear fission powerplants and replacing them with renewable energy sources:

Increasing the use of renewable energy—such as solar, wind, geothermal, biomass and hydroelectric—to supply as much as 25 percent of the Nation's energy needs by the year 2000.

Doubling the current rate of energy conservation.

With consistent and intelligent planning, we can ultimately achieve an all-renewable, inexhaustible domestic energy supply.

We can meet our energy needs without threatening our environment.

This plan will make possible a reduction in total U.S. energy use and stimulate economic growth.

U.S. consumers and business will use 29.5 fewer quads of energy in the form of imported oil, domestic coal, and nuclear power than the Energy Information Administration has projected for the year 2000.

Instead, Americans will use 10.6 more quads of energy from environmentally-clean renewable sources.

And they will consume 18.9 quads less energy—at an estimated savings of $190 billion a year.

A quad is short for a quadrillion—a million billion—BTU's (British thermal units). It is the energy equivalent of 44 million tons of bituminous coal, 63 million tons of wood, 1 trillion cubic feet of natural gas, or 170 million barrels of crude oil.

Saving 18.9 quads of energy is equivalent to saving 151.2 billion gallons of gasoline—enough to keep 190 million cars running for a year.

What we are talking about essentially is making use of available energy.

We do not need to sacrifice our standard of living.

In fact, intelligent energy planning will enable us to raise our standard of living and the quality of American life.

I estimate that this plan will create 5 million new jobs by the year 2000 and deter new cycles of inflation.

Inefficient use of energy, like the inefficient use of any resource, adds to the cost of production and ultimately hurts business.

Renewable energy production is far more labor intensive than the expensive and potentially hazardous nuclear plants we now have.

For every position in a nuclear powerplant that is lost, four new jobs will be created in producing, selling, and installing renewable energy equipment—jobs for carpenters, cement masons, crane operators, electricians, plumbers, and salespersons.

Renewable energy production is also less capital intensive.

Instead of wasting capital on huge, evermore costly and overcentralized powerplants, we should invest that money to modernize and revitalize American industry.

Until 1980, Congress had thrashed out a number of bipartisan approaches to ease our energy problems by reducing importation of foreign oil, promoting alternate energy sources and encouraging conservation.

However, these efforts lacked the coherent goal and a well-coordinated plan essential to avoiding recurring energy crises.

The time called for strong, imaginative Presidential leadership on the energy front, but instead we elected Ronald Reagan—who turned the clock backward by undermining support for vital energy programs Republicans as well as Democrats had helped to create.

My national energy plan will depend for its success on strong Presidential leadership, an energy-sensitive Congress and farsighted consumer and corporate decisions.

The plan, by the year 2000, would:

First. Double energy conservation by reinstituting mandatory appliance efficiency standards for each of 13 major household appliances—which alone would save 5 to 15 quads of energy—implementing conservation measures in Federal buildings, and encouraging technically feasible, cost-effective energy efficiency improvements in buildings through well-designed, local, State, and Federal conservation programs.

Second. Limit oil use to the transportation sector of the economy, where liquid fuels continue to be needed for the foreseeable future—current law already bans the burning of oil in powerplants after 1990.

Third. Reduce foreign oil imports by more than a third, to 1 billion barrels a year—about 8 percent of our total energy use. That is how much we now buy from non-OPEC nations.

Fourth. Encourage the continued use of natural gas, the cleanest of the fossil fuels which is in ample domestic supply until it can be replaced by renewable fuels such as methane generated from waste.

Fifth. Stop licensing construction of new nuclear fission powerplants and decommission existing nuclear plants as alternative energy sources come on line.

Sixth. Slow the increase in coal use below the rate projected. The Energy

Information Administration sees coal satisfying nearly 32 percent of the Nation's energy needs by the year 2000; for environmental reasons, I would limit our coal use to just under 25 percent of our national energy use.

Seventh. More than double the role of renewable sources in meeting the Nation's energy needs through expanded use of: geothermal, solar, hydro, wind, and biomass.

Completion of the federally-supported Heber project in southern California by 1985 will have the effect of doubling available geothermal resources.

I propose extension until 1990 of renewable energy tax credits to promote residential and commercial use of solar energy, solarization of Federal buildings and encouraging use of photovoltaic cells in the developing world.

We can increase our hydroelectric capacity by negotiating with Canada to take advantage of expanding hydroelectric power across the border through gridlinking plus adding hydroelectric capacity to existing U.S. dams.

The Federal Government should encourage wind farming and the use of small and large wind turbines to generate electricity, and support feasibility demonstrations of urban solid waste conversion to energy.

This will not only provide fuel but decrease the need for new land fills and reduce air and water pollution.

My natural energy plan follows:

THE CRANSTON ENERGY PLAN

INTRODUCTION AND SUMMARY

The industrialized world, and particularly the United States, must plan its energy future or face ultimate disaster. The United States has faced recurring energy crises over the past decade. During the winter of 1972–73, shortages of fuel oil developed in some areas followed by gasoline shortages in the spring. From October 1973 to March 1974, crude oil supplies from Arab OPEC states were abruptly cut off and prices rose from $1.77 a barrel to $7.00. The price of Saudi crude increased every year from 1974 until 1982 and nearly doubled during the 1979–80 tight market caused by the abrupt shut-down of Iranian production. In 1982 the price was $34 a barrel. As a result, from 1975 through 1981 the United States paid $278 billion for imported oil compared to $27 billion in the preceding several years. The 1973–74 crisis and the recurrence in 1979 brought home the danger of our energy situation, perhaps the most severe threat to our security in our lifetimes.

Current softness in the world oil market results from worldwide recession, coupled with some conservation resulting from world reaction to the severe price increase of 1979–80. However, economic development within underdeveloped nations will soon raise world oil demand and almost surely produce a new world oil shortage and new and precipitous price increases. So long as our economy remains dependent on imported oil, we could again face huge increases in the outflow of capital each year to OPEC nations, with the situation steadily getting worse. Compared with this alternative, a very large scale investment in conservation and in clean and renewable domestic energy alternatives and other domestic energy sources, spread over 18 years and largely spent inside the United States, would be cheap.

The goal of the Cranston energy plan is to achieve an all-renewable domestic energy supply, if possible, during the 21st century. However, because projections into the next century are not particularly useful, the plan sets year 2000 targets. In the accompanying table proposed energy goals are listed. Our energy needs are to be supplied by roughly equal contributions of domestic oil, natural gas, coal, renewables, and conservation. Imported oil will be reduced to only 8.3 percent of our total energy use; it is hoped that nuclear power will be phased out by 2000. The total energy supplied, including increased conservation, matches Energy Information Agency [EIA] projections for the United States needs in the year 2000.

A careful analysis of renewable energy sources shows that a 25 percent contribution from these sources can reasonably be achieved by 2000.

The Cranston plan proposes roughly doubling the rate of conservation assumed in the EIA plan, reducing energy use by an additional 17.5 percent.

This plan assumes that no nuclear power plants not presently licensed for construction will be built, and that existing nuclear power plants can be phased out as they age and lose whatever viability they presently have and as less expensive, more desirable alternatives come on line. If renewables (or other projected fuel sources) come on less quickly than anticipated, or total demand exceeds assumptions, the phasing out of nuclear plants can occur more slowly, provided public health and safety are protected.

The Cranston plan assumes that relatively clean-burning natural gas is the most desirable of the fossil fuels. The amount assumed by EIA is also included here. It will supply 19.1 percent of the nation's energy in this plan.

In this plan all of the domestic and imported oil, as well as a small contribution from alcohol fuels, will be used for transportation. Oil accounts for 31.3 percent of the total energy budget.

The balance of our energy supply (24.6 percent) will come from domestic coal, used primarily to generate electric power with additional U.S. coal exported to other industrial nations.

The plan, including annual milestones, and the details of how they are to be accomplished, would be submitted to Congress for approval or modification after consultation with states, industry, utilities, and others. Every fourth year projections would be made extending final-year targets four years into the future, until the ultimate objective is achieved.

Under the Cranston plan, more than 5 million jobs for carpenters, cement masons, electricians, plumbers, air conditioners, heating and refrigerator technicians, glaziers, crane operators, solar engineers, architects, solar law specialists, real estate appraisers, salespersons, city planners, landscapers, and others would be created by the year 2000. When renewable energy is coupled with a strong conservation effort and the displacement of capital-intensive energy investment, the economy will grow at healthy, prosperous rates without creating inflation or new energy crises.

CHART 1.—YEAR 2000 CRANSTON ENERGY PLAN

[Total Demand = 89.1 Quads]

Supply	Quads	Percent
Oil	27.9	31.3
Domestic	20.5	23.0
Imported	7.4	8.3
Natural Gas	17.0	19.1
Coal	21.9	24.6
Nuclear	0	0
Renewables	22.3	25.0
Direct heat geothermal	0.1	0.1
Geothermal electric	2.2	2.5
Active and passive solar	4.7	5.3
Photovoltaics	1.8	2.0
Hydroelectric	4.5	5.0
Wind electric	3.0	3.4
Biomass	6.0	6.7
Wood and wood waste	4.4	4.9
Solid waste	0.6	0.7
Alcohol fuels	1.0	1.1
Total demand	89.1	100.0
Conservation	18.9	
Energy Information Administration projection, 1980	108.0	

CHART 2.—CRANSTON PLAN COMPARED WITH EIA PROJECTIONS FOR THE YEAR 2000 [1]

	Quads	Percent
Cranston plan:		
Oil	27.9	31.3
Domestic	20.5	
Imported	7.4	
Natural gas	17.0	19.1
Coal	21.9	24.6
Nuclear	0	0
Renewables	22.3	25.0
New total demand	89.1	100.0
Additional conservation	18.9	(17.5)
Old total demand	108.0	
EIA projections:		
Oil	33.6	31.1
Domestic	20.5	
Imported	13.1	
Natural gas	17 .0	15.7
Coal	34.4	31.9
Nuclear	11.3	10.5
Renewables	11.7	10.8
Total demand	108.0	100.0

[1] Based on Energy Information Administration projections for 1980, the most recent pre-recession year.

DETAILS OF THE CRANSTON ENERGY PLAN

The various elements of the Cranston energy plan for the year 2000 will be described in somewhat more detail to indicate both the opportunities and problems that we face. In addition several important peripheral considerations will be discussed.

A. Domestic oil

U.S. petroleum production peaked at 3.5 million barrels per day in 1970 and has been declining. Recent high prices and removal of controls has brought about 150 million extra barrels to market each year but that does not solve the problem of declining supplies. At 1981 production rates, the U.S. has about nine years of proved conventional oil reserves left. More will be found, but most of the very large continental U.S. fields have probably been discovered with the 2½ million oil and gas wells that have been drilled. The last big find was the Alaska North Slope field at Prudhoe Bay. It is not clear whether there are similar fields within the Naval Petroleum Reserve in Alaska (NPRA). The Reagan Administration attempted, as part of its controversial plans, to lease 2 million acres of the NPRA in 1982. The size of the offering, along with other massive oil lease sale offerings, will certainly reduce the U.S. returns on this promising, but unproven, resource.

Another major, largely untapped domestic crude oil source is "heavy oil", more than half of which is in California but which appears also in Kansas, Texas, Louisiana, Oklahoma, Mississippi, Wyoming, and Utah. The total reserve could be more than 20 billion barrels. Because of its high sulfur and metal content and its high viscosity, heavy oil is difficult and costly to produce, often requiring steam injection or other heating processes to extract the oil. As much as one-third of the produced crude may be used to make steam.

While there are problems in producing and refining this oil, there are also solutions, and 240,000 barrels a day are being produced in California. The rate at which heavy oil will be developed depends on the economics behind the huge investments necessary to take advantage of this large domestic source.

Oil shale in the Green River basin of Colorado, Utah, and Wyoming is another large deposit of oil. However, the economic risks of oil shale production are very great and the profitability of this technology is in serious doubt with world oil prices at about $30 per barrel. Many of the production techniques embody serious environmental risks.

All potential new sources of oil supplies will be increasingly difficult to produce or refine, and increasingly costly. The Strategic Petroleum Reserve is a national reserve to provide supplies during an emergency. When fully established, it could deter a political-embargo and during a supply interruption could help keep prices from exploding. A 90-day supply—about 750 million barrels—is planned for the U.S.; this goal is to be reached in 1989. A standby use plan, including withdrawal criteria, methods for pricing and allocating the oil during severe supply interruptions needs to be promptly developed.

B. Natural gas

U.S. natural gas production reached its peak in 1973 and has maintained a slightly lower level of output since then in spite of the significant changes in price structure resulting from the Natural Gas Production Act of 1978. Some gas is imported from Mexico and Canada and small amounts are brought in by special ships and port facilities as liquified natural gas. Our proved reserves of gas would disappear in 11 years, but recent discoveries and the potential for major new finds of domestic gas are far higher than that for oil.

With adoption of the NGPA, a surge in exploration for gas took place. There is no convincing evidence that total decontrol is needed to increase exploration further—since current prices now stimulate conventional exploration, and total decontrol would eliminate the advantage currently enjoyed by deep drillers—who have found most of the new gas. Decontrol of old gas would raise consumer prices and might curb some exploration for and production of new gas.

The environmental attractiveness of gas—because of low sulfur and nitrogen content—and the ease of converting natural gas-burning facilities to renewable fuels, suggest that it should displace less attractive fuels even as we work to reduce the overall U.S. energy consumption. Such an approach is reflected in the Cranston energy plan.

C. Coal

The U.S. has enormous amounts of coal, more than any other nation. It is found in 26 states. Since 1974 coal use has risen steadily, but coal's share of the expanding electric generation market has declined. The advisability of converting power plants from natural gas to coal, as the Fuel Use Act once required, has been reconsidered because coal brings with it a litany of problems.

One problem is human. In 1979, coal mine accidents killed 100 miners and injured thousands. Moveover, black lung disease kills at least 4,000 miners each year. Currently, 200,000 former mine workers are drawing compensation for disabilities caused by black lung disease.

Production of coal by underground mining is an increasingly capital intensive operation while uncertain markets, depending on vacillations in price and environmental policy, have reduced capital availability. Even strip-mining, which is less costly, still involves major costs for necessary land reclamation.

Most coal is transported by rail and expansion of coal use would inevitably lead to the need for expansion of some railroads, requiring major capital investment. But, in other areas, under some conditions, slurry pipelines would be less costly, and increase competition, benefitting consumers. However, slurry lines require right-of-way easements across lands owned by railroads which they are unwilling to give. Federal legislation to straighten out this problem was first proposed by President Kennedy in 1962. No administration had opposed this legislation until the Reagan Administration—which argues that it would compromise state's rights. Problems with water use can be avoided by using other fluids in the pipe.

A major problem with coal is its larger concentration of sulfur than most gas and oil and the problems with environmental pollution and acid rain that result. The use of scrubbers to remove most sulfur at the plant and new burning techniques such as fluoridized bed combustion and magnetohydrodynamic (MHD) generation may be helpful and necessary in containing this major problem.

Finally, all fossil fuels contribute to increasing the concentration of carbon dioxide (CO_2) in the atmosphere. Coal, because it is essentially all carbon, is much the worst of all. Scientists fear a "greenhouse effect" from a CO_2 build up that may cause massive long-term climatic changes including the melting of the polar ice caps and shift of prime agricultural zones.

Solving coal's environmental problems so that its tremendous energy potential may eventually be realized, if possible, is an area which could usefully be addressed by an ongoing multi-partite commission, consisting of industry, labor, academia, environmentalists, and appropriate government officials, working cooperatively to formulate consensus policies. So long as the environmental problems and miners' safety are unsolved, slow growth of the use of coal is appropriate. In the Cranston plan coal would supply 24.6 percent of our estimated needs in 2000.

D. Nuclear energy

In 1981 nuclear plants accounted for only 11.9 percent of the nation's electricity production. The E.I.A. projects that 33 percent of America's electricity will be fission-generated in 2000. This is neither likely nor desirable.

Fission reactors have become increasingly costly to build and operate. Between 1975 and 1979 twenty orders for new reactors were cancelled and 40 deferred. The present costs of nuclear energy are less than the true costs because the Price-Anderson Act limits the liability of nuclear plant operators for risks to the public health and safety. Furthermore, the costs of major accidents, such as that at Three Mile Island, and the costs of dismantling old plants and of disposing of nuclear waste—a task still not adequately handled—are seldom counted in the overall reactor costs.

Uranium is a finite resource, unless breeder reactor technology is used enabling the reactor to produce more fuel than it uses. But breeders convert uranium to plutonium, only a few pounds of which can create a devastating bomb. The risk that nuclear weaponry will proliferate to even more nations or to terrorist groups, destabilizing the world balance of terror, is great enough with conventional fission reactors, without increasing it via breeders.

When these problems are compounded by the risk of human error and mechanical failure, such as occurred at Three Mile Island, fission becomes an undesirable alternative, to be used only when necessary. By 2000 we could hope to eliminate this necessity completely with a sensibly steady energy policy. Continued research on fusion is desirable. Fusion poses 1/10 the radiation hazard, no proliferation problem and is a renewable energy source which uses hydrogen atoms as fuel. Technological feasibility may be established during this century, but the energy is not likely to be economic until well into the 21st century.

E. Renewables

Switching our imported oil dependence to any other limited and depletable resource, particularly a fossil fuel, merely delays the day when we or our children again will face energy crises. Our long-range energy policy goal should be to convert our economy to domestically available, environmentally safe, renewable energy supplies. But given the long lead times for total energy conversions, the institutional resistance to change, and the lack of present availability of any single totally satisfactory alternative, the total conversion will take many, many years. To reach 25 percent solar and renewable energy by 2000 will require adoption of a consistent and comprehensive energy policy and steady pursuit of its goals.

1. Geothermal Energy

The heat within the earth is one of the most plentiful of available renewable energy resources, yet one whose potential is often ignored in both short and long-term energy planning. Magma (molten rock) from the earth's core reaches temperatures of 1,200°C. Very recent experiments in Hawaii have, for the first time, penetrated magma, recovered a complete core, and maintained an open hole in the magma for future experiments. Scientists believe this establishes the feasibility of direct extraction of energy from magma located within 10 kilometers of the surface of the earth. U.S.G.S. estimates that in the continental U.S. alone, near-surface magma deposits contain 800 to 8000 times as much energy as the U.S. uses each year.

The geysers, a rare dry steam resource in northern California, currently produce 910 megawatts of electricity and this will more than double by 1990. The Cranston plan anticipates that 2.6% of the nation's energy will be supplied by geothermal sources in 2000, as the federally supported demonstration of the binary process makes use of moderate temperature resources commercially feasible.

2. Solar Energy

By heating the earth and its atmosphere, the sun generates wind, waves and tides, rainfall for rivers, ocean temperature differences, and growth in trees and plants. Thus, not only active and passive solar and photovoltaics, but wind generation, tide conversion, hydroelectric power, ocean thermal energy conversion, wood burning, biomass conversion and alcohol fuels are solar energy uses. These sources are, like geothermal energy, for practical purposes, inexhaustible or "renewable". Within reasonable constraints set by economics, technology and other considerations a national energy policy should prefer alternatives consistent with achieving national goals. The use of solar options is preferable because they are diffuse, abundant, environmentally attractive, renewable, more labor intensive and often less capital-intensive than other options.

The nation is already embracing renewables in many areas. Passive solar systems are producing more than half a building's heat needs in well designed and well insulated new homes. Federal tax imducements, with applicable state tax credits, make new installations of solar water heating and space heating economic in many parts of the country at existing oil prices. In California alone there are expected to be 1.5 million solar installations by 1985.

The current replacement cost of fossile fuel plants is over $825 per kilowatt and future fuel supplies are uncertain. The current replacement cost of nuclear plants is $1-2,000 per kilowatt. Photovoltaic units currently cost $4-6,000 per kilowatt and are expected to fall below $2-3,000 per kilowatt by 1985 and steadily downward thereafter while nuclear and fossil fuel plant costs are rising rapidly. With appropriate government support, by 1990 photovoltaic cells should generate electricity at $450-1,000 per kilowatt or less, well below the cost of all traditional alternatives. Merely redirecting amounts the Reagan Administration proposes to use to subsidize the nuclear industry—including Three Mile Island clean-up costs and development of the Clinch River Breeder Reactor—would more than pay the short-run federal investment cost in a solar preference, program. Before long the program would pay for itself and return budget savings to the federal government. Even a low level of photovoltaic conversion could produce 3.3 million jobs by 2000.

The other way to make electricity from sunlight is to use the sun to heat a fluid which drives a heat engine. Commercial feasibility demonstrations by the mid-1990s could bring on commercial solar thermal electric power generation before the end of the century. However, no significant solar thermal generation is included in the Cranston year 2000 plan. Ocean thermal energy conversion and similar techniques applied to solar ponds also seem unlikely to make significant contributions by the year 2000.

Hydroelectric power now supplies 12 percent of the nation's electric energy. Expansion in Canada with grid linking across the border, adding power generating equipment to existing dams, and increasing the electric capacity of hydroelectric dams would lead to a substantial increase in energy supply from this source.

After much experimentation and development, wind power is about ready to develop commercially. Beginning in 1981 a wind farm development was begun in California. The first phase is to be completed in 1983 and will consist of fifty 2.5 megawatt wind turbines. By 1984 there will be 145 turbines generating 350 megawatts of power. Some experts believe that as many as 60,000-90,000 large wind machines as well as many smaller ones could be in place by 2000. The Cranston plan sets a goal which is less than half that amount but still contributes 3.4 percent of the nation's energy needs in the year 2000.

After the 1973-74 crisis, the use of wood for cooking, heating, some industrial processes, and for generating electricity soared. In New England, 20 percent of all homes use wood as a primary heat source. The use of wood could be increased by a factor of 4 or 5 and renewed indefinitely, provided that a careful, sustained yield forestry management policy is pursued which avoids clear-cutting and concentrates on selective cutting, thinning, species variation and replanting. In order to permit other uses of wood, to guard against air pollution, and to maintain maximum retention of unspoiled wilderness and green space, this plan limits wood-energy use to half its potential.

Urban solid waste can be converted to energy, decreasing the need for new landfills and cutting air and water pollution. The technology is well developed in Europe where nearly 200 cities convert waste to energy. However, efforts to demonstrate feasibility of waste energy conversion in several municipalities have been abandoned by the Reagan Administration. The Cranston plan anticipates that .7 percent of our energy needs will come from this source.

Many plants grown in sunlight can be converted to ethanol (grain alcohol) or methanol (wood alcohol) by fermenting carbohydrate rich crops, then distilling the alcohol. It is mixed with gasoline to produce gasohol which can now be produced for about $1.10 per gallon, a marginally competitive price. It is reasonable to maintain the current federal tax incentive to permit this expanding renewable energy source to develop at its present pace. By 2000, that should produce 1.1% of our energy needs.

F. Conservation

From the traditional view that energy conservation meant sacrifice, deprivation and a declining standard of living. Except within the Reagan Administration, a recognition has emerged that conservation—increased energy efficiency—is the least costly, safest, cleanest and fastest way to meet our transitional energy needs. The opportunities for major improvements in conservation appear throughout our society.

Our industrial strength has decreased severely in recent years and we are faced with strong challenges from Europe and Japan. Aging plants and out-of-date procedures must be revitalized as part of a major reindustrialization of America that is needed to meet these challenges. Part of such an effort is to reduce costs and make our industry energy efficient by eliminating the profligate energy practices of our cheap energy days. Waste heat from plants can be used to heat offices or water or to pre-heat elements to be used in the plant process. Major heat users should investigate reducing costs by cogeneration, that is making electricity to be sold to the utility and using the remaining "waste" heat for their industrial needs.

Modern insulation, high efficiency burners, long lasting high efficiency lighting, fuel efficient trucks and transportation, and computer controlled energy processes are all paths to an efficient and competitive U.S. industry once again on the upswing. The energy savings that have been made by industries with strong management commitments to conservation and with technical staffs devoted to analyzing operations and implementing conservation methods have been remarkable. To regain our worldwide industrial leadership requires improvements in many areas: one of them is to place our industry at the cutting edge of modern technology and energy efficient practices.

Significant savings can come from extending federal auto efficiency standards to set goals through 1995. With an end-year corporate average auto efficiency requirement of 40 miles per gallon in 1995, we save a billion barrels of oil in 2000. Forty miles per gallon is already technologically feasible, but would require large front end capital investment by an ailing domestic auto industry. Tax incentives and some continued federal partnership on alternative fuel engine research and development is needed.

Thirty-one percent of the energy we use is for generation of electricity—almost always through centralized and increasingly expensive power plants run by utilities—regulated by state Public Utilities Commissions. Under the best of circumstances only 35% to 40% of the energy used in generators appears as electricity; the remainder is heat that is usually dispersed to rivers or the environment rather than being used to heat neighborhood buildings ("district heating") or to sell to nearby industries that need heat. The city of St. Paul, its residents, and a local electric utility are cooperating in the process of installing district heating from an electric generator as a major experiment in waste heat utilization. If successful, this approach should be adopted widely. It requires active leadership from cities and the acceptance by utilities of a role as suppliers of energy—both heat and electricity—rather than electricity alone.

Our buildings, both residential and commercial, are not well designed for energy conservation. As new buildings replace old ones it is essential that the most flagrant sources of energy waste be eliminated. This can be done by incorporating where practical high standards of insulation, passive solar heating in winter and solar shading in summer, high efficiency air conditioning, high efficiency gas and oil burners, efficient lighting, lighting controls to prevent over illumination, efficient appliances, and minicomputer energy management systems. To achieve these goals requires governmental leadership, standard state-wide building codes that are both flexible and easily understood by builders, and cooperation by builders and suppliers. A state building code with many of these features has been developed in California and is being implemented there. If successful, its use could be encouraged as a base for the upgrading of other states codes.

The opportunities for conservation are enormous. A reduction of energy use by 17.5% beyond that projected by the E.I.A. projections is proposed by the Cranston plan. To achieve such results requires steady leadership and support from the national government and from state and local governments and a readiness to fight waste by utilities, builders, manufacturers, offices, stores, homeowners, and apartment dwellers.

In conservation the Reagan Administration has been tragically wrong. It is attempting to dismantle all conservation programs lock, stock, and barrel. It would remove federal support that enables states and localities to operate effective programs. It fails to perceive the relationship between

energy modernization of urban buildings and the viability of our future housing stock, the long-term stability of regions, and U.S. economic productivity. Congress mandated national appliance efficiency standards for each of 13 major house appliances in the National Conservation Policy Act in 1978.

Instead, the Reagan Administration proposed standards so weak as to constitute no standard at all, while requiring states to petition to avoid preemption of state standards existing in California, New York, Florida, Kansas and other states. It refuses to implement mandated conservation measures in federal buildings. It has reduced or eliminated research and development programs. Its consistent policy in the field of energy is to reduce or destroy any programs that support conservation. The Reagan Administration believes that support for conservation is bad and that support for nuclear power is good. In both respects, it is wrong.

ENVIRONMENTAL CONCERNS

In the panic following the energy crises of 1973-74 and 1978-79, proposals to lessen U.S. oil vulnerability often viewed environmental concerns as mere obstacles in the path of national energy development. These niceties might be taken into account in less troubled times, the argument runs, but not in times of energy crisis when U.S security and economic interests are vulnerable to foreign pressure.

President Carter's proposals for an Energy Mobilization Board—which could override state and federal environmental laws seen as obstacles to approved energy projects—and for an $88 billion national commitment to synfuels development, were not fully approved by Congress. It was too large a commitment, too soon, and without adequate understanding of the economic and environmental variables. Another example is Reagan Administration Interior Secretary James Watt's 5-year Outer Continental Shelf oil and gas leasing plan. In a search for every possible barrel of oil and gas, it would disturb or threaten with oil spills virtually every unspoiled portion of the nation's coastline, regardless of the views of states or localities or any competing values or commercial interests which might exist. Onshore, Watt made similar unacceptable proposals for wilderness areas and other protected preserves.

Such proposals threaten more than "pretty" areas. They lack understanding of the fragile balance between energy, matter and the ecosystem supporting life on earth. The inevitable consequence of ignoring environmental concerns is, at best, temporary relief of a short-term crisis in exchange for a worse crisis later, when inevitable damage to the food chain, the public health or safety, the atmosphere which supports life, or other vital human interests forces reconsideration. Energy policy must weigh societal needs for security, health and safety, employment, and aesthetic values, not just the private profits of entrepreneurs.

Several environmental specifics have been previously set out in discussions of particular fuels and technologies. Two deserve reemphasis as the two most serious environmental problems associated with combustion of fossil fuels.

We are just beginning to understand the effects of acid rain. Under the current Clean Air Act, airborne concentrations within a region of pollutants like sulfur dioxide and nitrogen oxide, i.e., "SOX" and "NOX", are reduced by controlling sources within that region. But some "SOX" and "NOX" don't form gaseous air concentrations. Rather, they rise into the upper atmosphere, where they combine with water vapor to form sulfuric or nitric acids, which then fall to earth in another region, poisoning water systems, crops and forests. Since these toxics do not respect man-made boundaries, acid rain is almost always an international or interstate problem with which the 1970 Clean Air Act amendments are inadequate to deal.

The Canadian government has repeatedly expressed concern about damage to its lakes, forests, and ecosystems from U.S. and Canadian-generated acid rain. Clearly, the problem will need to be addressed internationally. Through joint efforts of science, industry and government, Canada has reduced some of its own emissions.

In the U.S. the main source of acid rain in 31 states of the East and Midwest apparently is the "tall stacks" of fossil fuel burning powerplants, built, ironically enough to disperse air emissions. The stacks may be in Ohio, but because of prevailing winds, the fall-out may occur in Canada or the New England states.

By 1978, acid rain cost an estimated $5 billion in the eastern U.S. including $1 billion in reduced agricultural revenues. In the next 20 years, unless abated, acid rain could cost $8.3 billion in crop damage in the Ohio Valley alone.

In addition, acid rain does damage to forests and destroys $13 billion worth of materials in the eastern U.S. annually, and does immeasurable damage to lakes, fresh water rivers and streams and to their marine populations.

The increased acidity of the water supply leaches metal like lead, copper, aluminum, mercury and cadmium from watershed soils, sediments and water pipes and, at very dangerous levels, introduces them to people in their drinking water.

While the problem in the East results from the prevalence of midwestern powerplants with tall stack burning high sulfur coal, the West, too, has its own acid rain problem, probably caused primarily by NOX from auto emissions.

Reduction of the SOX problem in the East is technologically feasible, by using "scrubbers" in the stacks, but that's expensive and debate rages over who should pay.

The answers concerning western acid rain are less clear, but may involve requiring automobile inspection and maintenance of auto emission equipment, and more sophisticated technology.

Certainly, international cooperation and prompt resolution is a must.

Scientists believe that the amount of carbon dioxide in the atmosphere could double within the next 50 years, if present trends continue, threatening a "greenhouse effect" that would melt polar icecaps, flood coastal areas, and wipe out food supplies.

The cause is combustion of fossil fuels in all forms. Only by ultimate total conversion to non-fossil fuels—particularly clean renewables—can this effect be avoided, since the build-up is cumulative. And, as more and more nations develop industrially, they too must convert to clean fuels to avoid the greenhouse effect.

ECONOMIC CONCERNS

The Reagan Administration argues that—except for nuclear fission for which the Administration has proposed major new subsidies—leaving the nation's future energy supply to the judgment of private companies responding to economic pressures of the marketplace is sufficient. The Administration is moving in exactly the wrong direction.

The marketplace is not free. It has been structured by previous and continuing government subsidies, by monetary and fiscal policies, by regulations (local, state and federal), by oligopoly and uneven competition between integrated major corporations and non-integrated independents. Now it is further unbalanced by uneven access to capital and to some energy resources, by cartel pricing, and by foreign government policies that adjust supply and demand for non-economic reasons.

Even were the market really "free", federal responsibility for national defense and general welfare requires the government to restrict some activity and to encourage benign activity, where economic stability, the national economy and security, public health or safety, or other vital public interests are at stake.

Market choice of some very capital-intensive alternatives—nuclear power, coal and synfuels development—could, to the extent that they use up available investment capital, prevent near-term investment in conservation and renewable energy technology, with regrettable long-term economic and environmental consequences.

Government policy on coal should aim at improving its social usefulness by supporting MHD and fluidized bed combustion research. A short-term increase in abundant U.S. coal is needed to provide energy during the transition to renewable energy and to increase exports to offset capital outflow from imported oil. But weakening environmental laws that govern use of coal is both unnecessary and unwise. And the government must encourage investment in the less capital-intensive and more socially desirable renewables which ultimately can provide all the energy we need. It may, therefore, be necessary to increase subsidies for renewable energy development.

Developing an energy plan for the future is vital, but it provides only part of the revitalization our economy needs. And economic recovery which merely restores energy-intensive industries to short run economic health will eventually result in new inflation, energy crises, and deeper future recessions.

Permanent economic health—insofar as energy policy is concerned—depends on decreasing our fossil fuel dependence before the next world-wide shortage of oil occurs. It requires creation of the numbers and kinds of jobs that our work force can fill, many from new energy industries. For the same investment dollars, conservation and the renewable technologies are far more labor-intensive than nuclear or fossil fuels. And nuclear power is ever more costly, while renewable technology is ever less expensive and the fuel is usually free.

The federal government must work with state and local government, with the utilities industry, with energy technology and fuel suppliers and with labor, to promote transition to a strong, energy-efficient economy which provides employment for our workers at energy costs that do not deprive low income people of the energy they need.

Perhaps $50 billion of private and public investment on average will be needed each year for energy until the year 2000, counting home-owner and business investment, public loans and loan guarantees, purchases, tax credits and other subsidies, even if heavy investment in capital intensive alternatives is avoided. By far, most of this in-

vestment will come from consumer and corporate decisions in the private sector.

But there is no choice. If we do not commit to and carry out a sensible energy policy over the next 17 years, we will spend even more on oil, and eventually face much more costly decisions.

REMARKS BY CONGRESSMAN WAXMAN ON HUMAN RIGHTS IN THE SOVIET UNION

Mr. CRANSTON. Mr. President, earlier this month a delegation of 18 Members of the House of Representatives, led by my counterpart in that body, Mr. FOLEY of Washington, the Democratic whip, met in Moscow with Soviet leaders to discuss a wide range of issues.

A major focus of these meetings was the issue of human rights. The discussion of this issue was led by my esteemed and respected colleague from California, Representative HENRY A. WAXMAN of Los Angeles, who chaired the task force on human rights of the House delegation.

Mr. WAXMAN's remarks to the opening plenary session of the meetings in the Kremlin received a good deal of attention by both his congressional colleagues and Soviet officials because he spoke with knowledge and passion from the perspective which all Americans bring to the fundamental issues of freedom of association, expression, and religious observance.

As one who has been so deeply involved in the struggle for human rights and has led past exchanges of a smiliar nature with Soviet officials, I appreciate the candor, lucidity, and eloquence of Mr. WAXMAN's remarks and the impossibility of Soviet officials misinterpreting his words. I also know that the concerns he so forcefully expressed accurately reflect the most deeply held beliefs of the American people.

Mr. WAXMAN called attention to the severe restrictions within which Christians, Muslims, and Jews live in the Soviet Union. He eschewed diplomatic euphemisms and evasion. The Los Angeles Congressman chose, rather, to summarize precisely the abuses in the field of human rights which have generated greatest concern in the West and referred to a number of individual cases and a wide range of religious and ethnic groups. The unifying principles were our agreement with the Soviets at Helsinki and our own moral heritage.

Since few of my colleagues in this body have had the opportunity to read Mr. WAXMAN's, remarks, I ask unanimous consent that they be printed in the RECORD.

There being no objection, the remarks were ordered to be printed in the RECORD, as follows:

REMARKS BY CONGRESSMAN HENRY A. WAXMAN ON HUMAN RIGHTS IN THE SOVIET UNION TO MEMBERS OF THE SUPREME SOVIET OF THE U.S.S.R. IN THE KREMLIN ON JULY 5, 1983

We meet here today to discuss various issues of concern to the people of our countries and, indeed, of the world. Arms control is a central concern to all of us here. Yet all of my colleagues share another concern: that governments live up to solemn international commitments, freely undertaken, to respect the human rights of their citizens.

We meet here today to discuss issues of mutual concern. Yet, we cannot gloss over those issues about which we disagree. Americans are convinced that the issue of how a government treats its citizens is a legitimate—indeed integral—part of the international agenda.

Modern technology has brought us the atomic bomb—and the danger of nuclear catastrophe. Modern technology has also brought us instant communication with the result that people everywhere are informed about people around the world. Indeed, this awareness is a central fact of modern life: we all inhabit a global village threatened with total destruction. No political leader can ignore either aspect of these fundamental facts.

Instant communication also makes people everywhere aware of contradictions between words and deeds. No society is perfect. No government or party can claim that all its citizens agree on every point of public policy. It is difficult for an informed public to have faith in negotiations with a country which flouts solemn agreements in one area, such as human rights, while professing the urgent need for new agreements in another area, such as arms control. In fact, I believe that governments which violate the internationally guaranteed rights of their citizens risk loss of international credibility.

This loss of international credibility has many ramifications: not only the loss of public confidence, but also difficulties, complications and delays in the diplomatic arena. In fact, such a loss of credibility extends to all areas of bilateral relations and begins to poison the very foundation of the relationship between our countries.

I want to turn to an examination of an international agreement which spans many vital issues. Indeed, it can be seen as a code of conduct for relations between states and between governments and governed: the 1975 Final Act of the Conference on Security and Cooperation in Europe. This international agreement does not have the status of a treaty; rather, it is a solemn statement of political intent. It is precisely in relation to this document that the question of credibility is so crucial, particularly since the Helsinki Final Act refers to the positive role to be played by private individuals as well as governmental institutions.

What events occurred which heightened public concern about human rights violations of the Helsinki Accords in your country? Since the start of the Madrid CSCE Meeting in September 1980, your government has arrested over 500 people in the USSR who peacefully advocated Helsinki-guaranteed rights. These arrests have burdened the work of the long-protracted Madrid Meeting and have exacerbated efforts to negotiate a balanced and substantive document.

All too often when representatives of my country speak of public concern for human rights issues in your country, we are told that we are merely concerned with the fates of a few misfits. To this I say if a government can easily take reprisals against its own citizens who speak critically, then no citizen is safe.

Furthermore, it is precisely vis a vis individuals that governments must and do prove themselves. Therefore, I will refer to some individuals in your country whose problems we consider to be representative of similar problems faced by thousands of other people.

ANDREI SAKHAROV

First, however, I would like to refer to a man who has been called the conscience of mankind: Andrei Sakharov. Although he was never formally accused of any offense, on January 22, 1980, Sakharov was summarily banished to the closed city of Gorky where he lives under virtual house arrest. Today, partly as a result of a hunger strike undertaken by him and his wife, Elena Bonner, to gain emigration rights for a relative, Sakharov and Bonner urgently need to be hospitalized in the Academy of Sciences hospital in Moscow. How can a government which ostracizes and ignores the basic human needs of a famous man such as Sakharov expect to gain international credibility for its treatment of ordinary men and women?

HELSINKI MONITORS

Another issue of particular concern to Americans who are committed to the noble humanitarian aims of the Helsinki Final Act is the systematic campaign of repression undertaken by your government against Soviet citizens who merely sought to call public attention to certain shortcomings in Soviet observance of the human rights provisions of the Helsinki Final Act. Today, 53 members of these citizens' groups are imprisoned in Soviet prisons, labor camps and psychiatric hospitals. None of these people ever advocated violence. Instead, they compiled reasonable documents about human rights problems in their own country. If your government found fault with these documents, why not dispute their facts? By locking up such people—and by abusing them further while imprisoned—your government showed the world it cannot tolerate individuals who publicly advocate the humanitarian aims of the Helsinki Final Act.

My country continues to be concerned with the fates of 53 imprisoned Helsinki Monitors, including Russian physicist Yuri Orlov and Jewish mathematician Anatoly Shcharansky of the Moscow Helsinki Group; poet Mykola Rudenko of the Ukrainian Helsinki Group: Viktoras Petkus of the Lithuanian Helsinki Group; physicist Robert Nazaryan of the Armenian Helsinki Group; and Merab Kostava of the Georgian Helsinki Group. Americans cannot understand why young Ukrainian Monitor, Olha Heyko, now faces a possible 12-year imprisonment term, nor why pregnant Irina Grivnina of the Psychiatric Working Group is under official pressure to perform manual labor in exile, or why aged Ukrainian Monitor Oksana Meshko is exiled to the rigors of remote Siberia.

EMIGRATION

Despite international legal commitments, your government does not permit free emigration from the Soviet Union. In fact, the only recognized legal basis for leaving the USSR is for the purposes of family reunification. The emigration process is lengthy, cumbersome, and fraught with uncertainty and potential penalties. In a distortion of the Helsinki spirit, since 1979 the Soviet

government now defines family for emigration purposes as only father, mother, son or daughter.

Tragically, in some cases, even reunification of nuclear families is not deemed sufficient cause to permit emigration from the USSR. I have in mind here, among all too many other examples, the issue of US-Soviet binational marriages. One U.S. husband, Professor Woodford McClellan, has not seen his Russian wife, Irina, since 1974. Last year, one group of Soviet citizens was driven to a series of life-threatening hunger strikes to protest prolonged Soviet-imposed separation from their husbands and wives in the West. While we are gratified that two of these Soviet spouses were allowed to join their families in the United States, two other Soviet husbands, Sergei Petrov and Yuri Balovlenko, are still being denied emigration permission. Unfortunately, this list of divided nuclear families could be extended. Another case comes to mind: a mother, Francesca Yanson, who is ill with cancer, has been trying in vain for three years to see her son in the United States. Recently, several members of this Delegation met a young man by the name of Igar Tufeld who has appealed to us to intervene with you for his parents, Mr. and Mrs. Valdimir Tufeld, who are both quite ill. How can the Soviet government ignore these basic human needs of its citizens and still hope to be trusted in the world?

Not only does your government restrict potential emigrants to divided nuclear families, but, in practice, only the members of three ethnic minorities in the Soviet Union—Jews, Germans and Armenians—have been permitted to leave the Soviet Union in significant numbers. Even here, however, recent statistics point to a sharp cutback in the numbers of Soviet Jews, Germans and Armenians being permitted to emigrate from the USSR. While 51,000 Jews left the Soviet Union in 1979, last year only 3,000 were allowed to leave. If the present trend continues, this year only 1,200 will emigrate. Even more ominous for the future emigration prospects of Soviet Jewry, your government recently formed an official Anti-Zionist Committee which announced on June 6, 1983 that the process of family reunification for Soviet Jews was "essentially completed."

American organizations estimate that 300,000 Soviet Jews would like to emigrate from the Soviet Union: one such man is Gregory Gimpelson of Leningrad who has applied for emigration since 1977. Denied permission to work as a scientist, nevertheless he is denied emigration for alleged access to secrets in a scientific job he left in 1973. Another family, the Michelson family of Florida and Moscow, have not seen each other in 28 years! Despite many appeals on behalf of this family, Galina Golsman Michelson of Moscow, and her daughter's family, continue to be denied emigration permission. The Essas family of Moscow has been trying to emigrate to Israel since 1973 to join their aged parents. And I raise with you on a personal level the case of a cousin of mine, David Gregoriovitch Vaksman in Kishinev, the city from which my grandparents fled Tzarist persecution and where this young man lives under Soviet oppression. Such needless human suffering flies in the face of your government's humanitarian pronouncements. We have a list of names of people that put a lie to your statement that there are few Jews who want to leave. We know of them because their relations in Israel and in the United States have appealed to us for help. Some of us will try to call or visit these refuseniks while we are here. Those that I have personally talked to tell me that they are desperate. And I tell them they are not forgotten by those who will stand with them in conscience.

In addition to these tragic stories, other Soviet families are adversely affected by Soviet emigration practices: the Jurgutis family of Lithuania has been separated from their father in Chicago since 1974; the Russian Evsyukov family, who live near Moscow, suffer numerous persecutions, including a term in labor camp, for their desire to emigrate.

RELIGIOUS BELIEVERS

Of course, Americans were heartened by the news that, after a 23-year effort, the Pentecostal Vashchenko family were allowed to leave the USSR on June 27—the fifth anniversary of their taking refuge in the U.S. Embassy in Moscow. I hope that their fellow Siberian Pentecostals, the Chmykhailov family, will soon follow.

But what impelled these two Pentecostal families—and an estimated 30,000 other Soviet Christians—to struggle so hard and so long to leave the Soviet Union? After all, the Soviet Constitution asserts the separation of church and state. Nevertheless, the Soviet government attempts to maintain total control over organized religion in the Soviet Union. All religious communities—Christian, Jewish or Moselm—must agree to onerous state control over all aspects of their activities. Any religious community which does not agree to such legal restrictions is relegated to outlaw status. Indeed, there are thousands of Soviet Christians, including, for example, 175 reform Baptists, who are imprisoned in the Soviet Union for refusing to obey such laws.

Yet here again contradictions in the policy of your government emerge: some religious communities, even if they agree to abide by Soviet laws, are refused legal status because their religious belief itself is deemed by your government to be illegal. Here I have in mind the tragic fate of the Ukrainian Catholic Church and of the Jehovah's Witnesses in the Soviet Union. Adherents to these religions are subjected to particular persecution. Ukrainian Catholic activist, Iosyp Terelya, founder of the Initiative Group for the Rights of Believers and the Church—who has already spent over a decade in prison—was rearrested in December 1982.

Other religious activists in the USSR have also suffered similar fates at the hands of your government: Russian Orthodox priest, Father Gleb Yakunin of the Christian Committee has been denied contact with his family after he was sentenced in August 1980 to a ten-year term; Lithuanian Catholic priest, father Alfonsas Svarinskas of the Catholic Committee, was also sentenced to a ten-year term.

ETHNIC AND CULTURAL RIGHTS

Americans, like Soviets, live in a country with a rich and varied cultural history. We understand that it is not always easy to accommodate the diverse aspirations of ethnic minorities. Although problems remain, in recent years my country has made great strides in improving the status of such American ethnic groups as Blacks and Native Americans.

In your country, however, there are disturbing signs of regression from Helsinki obligations in your treatment of legitimate rights of ethnic minorities: these are anti-Semitic articles in your official press; there is an escalation in pressures to Russify the languages and Sovietize the cultures of the non-Russian half of your population; and there is evidence of discrimination against religious believers and Jews in higher education. There are even cases of imprisoning of Soviet citizens who seek to improve the status of their ethnic groups: a Soviet Jew, Feliks Kochubievsky, who wanted to form a Soviet-Israeli Friendship Soviety, was given a prison term for "anti-Soviet slander." Mustafa Dzhemilev, a leader of the Muslim Crimean Tatar struggle from Central Asian exile to return to their historic homeland in Crimea, has spent most of his adult life in camps and exile. Russian writers, such as Georgy Vladimov, are forced into exile from refusing to submit to official pressures to increase Communist orthodoxy in Russian literature. Soviet scientists are denied permission to attend international scientific conferences—as happened last week with Professor Khatchaturyan and his wife who were supposed to address an international physics conference in Greece. Other Soviet scientists, such as Jewish mathematician Viktor Brailovsky, who organized an unofficial Moscow seminar for other scientist refused emigration permission, are imprisoned.

UNOFFICIAL PEACE GROUPS

Although your government encourages citizens' disarmament initiatives in the West, Soviet officials have imprisoned eight members of two unofficial peace groups: four signatories of an October 1981 appeal that the Baltic states of Lithuania, Estonia and Latvia be included in an official Soviet proposal to create a Baltic nuclear-free zone, and four members of the Group to Establish Trust between the United States and the U.S.S.R.

CONCLUSION

I hope that your government will take my comments in the spirit in which they are intended: if trust between our countries is to be established, we must be more attentive to all of the matters of concern to each other. As far as human rights are concerned, they are not only important to us, but are inextricably linked with the other items on the agenda between our two countries.

PATRICK WARREN'S TREK

Mr. SPECTER. Mr. President, I rise today to commend and to congratulate a courageous Pennsylvanian, Patrick Warren, who today entered Washington after walking across the United States from California.

Mr. Warren's 3,000-mile trek will conclude in Philadelphia, where he lives. His grueling odyssey across our Nation was undertaken to show that epileptics are capable of everything that their nonafflicted brethren can do.

Mr. Warren, a roofer by trade, suffered two tragic, almost fatal accidents before learning that he suffered with epilepsy. In 1974 and again in 1979 during epileptic seizures, Mr. Warren walked off rooftops while working. In the second fall, he fractured his skull.

After a number of failures at reaching a correct diagnosis of Warren's problem by various medical authorities, the Graduate Hospital's Compre-

hensive Epilepsy Center correctly diagnosed his ailment as epilepsy and placed him on a treatment program which has effectively controlled his seizures.

Determined to thank the CEC and bring attention to epilepsy and how it can be conquered, Mr. Warren set forth on his prodigious undertaking on May 2. With grit and courage, he has persevered.

Today, he is being received at the White House and congratulated by President Reagan.

And now as he enters the last lap of his journey on behalf of all epileptics, I believe he deserves the thanks and commendation of all of us for this noble effort on behalf of his fellow man.

WEINBERGER'S 10 COMMANDMENTS

Mr. GRASSLEY. Mr. President, last week, Secretary of Defense Weinberger issued 10 initiatives to get excessive cost increases of spare parts under control.

I am here today to commend Secretary Weinberger for his directive, but to also warn both the Secretary and the American public that the 10 initiatives will have little impact in-and-of themselves. I have some suggestions for Secretary Weinberger.

Secretary Weinberger has declared verbal war on the largest bureaucracy in the Western world. Yet he is fighting a war against a well-armed adversary, and with little more than high-minded and noble-sounding rhetoric.

As a result, the Secretary will continue to experience entrenched resistance to his new initiatives. And we will continue to have excessive cost increases of spare parts, unless concrete and specific steps are taken to change the system.

The Secretary's 10 commandments closely resemble other rhetoric we have heard from the Defense Department for years. The most recent example is the Carlucci initiatives.

The Carlucci initiatives were to be the be-all and end-all of positive change in the Pentagon. But they had little impact because they had no teeth.

There was no timetable, no accountability, and no clear indication that the initiatives were a serious undertaking.

Now, Mr. Weinberger has given us "Son of Carlucci," 10 new initiatives which are even more vague then the first 32. Yet he claims: "It is a program with teeth," and it will end cost abuses "once and for all."

Here is an indication of the teeth in these 10 commandments:

"Should offer incentives. * * *"

"Awards * * * should be continued. * * *"

"I expect you. * * *"

"To alert defense contractors. * * *"

"To accelerate reform. * * *"

"To take steps. * * *"

"To convey a strong belief. * * *"

The Secretary is giving us nothing concrete. No goals, no timetable, no accountability.

The real 10 commandments are straightforward: Thou shall not kill. Period. And there is no question as to who is accountable.

I would like to illustrate my point with the particular case of a man who has tried to follow these 10 commandments for over a year, now, and has been condemned because of it.

His name is George Spanton. He is the resident auditor for the Defense Contract Audit Agency in West Palm Beach, Fla. He had attempted a thorough audit of Pratt & Whitney because of improprieties. He has been harassed to the point of frustration. He nearly lost his job for attempting to save the taxpayer money. That was his reward for doing what is right. He was threatened with dismissal by his own superiors.

Even from the top he got little encouragement. In response to a request from me to keep Spanton on the case at West Palm Beach, Secretary Weinberger, on April 16, was quoted by a spokesman as saying it was "immaterial" to him whether Spanton stayed on the job.

I have put together a chronology of newspaper clippings which detail the Spanton case. It was not until his story erupted in the public domain that anything was done to correct the perversion.

One wonders, in light of all this, how big the Secretary's commitment is to these 10 initiatives. So far, we have just words. Now we need followup. Words are necessary, but even more desirable are actions, which are proof of intent.

There are many people like George Spanton in the defense community who have tried and have wanted to carry out the 10 commandments for a long time. Yet the system has stifled them. That is because the incentives encourage such stifling. And indifference at the top has enabled the system to prevail.

If the Secretary and others in the Defense Department were serious about managing the Pentagon effectively, they would listen to people like Spanton whose job it is to expose waste and inefficiency.

Earlier this afternoon, I had a letter hand-delivered to Secretary Weinberger, asking him to promote George Spanton for his diligence and perseverence, and urging him to exercise commandment No. 2 against those who tried to stifle Mr. Spanton.

The second commandment reads as follows:

I expect you to take stern disciplinary action—including reprimand, demotion and dismissal—of those employees who are negligent in implementing our procedures.

I also sent the Secretary a copy of this memo from George Spanton to the Atlanta regional director for the DCAA. It is Mr. Spanton's response to the recent DOD Inspector General's report on spare parts price increases.

In this memo, Mr. Spanton recommends that the Inspectionor General review be expanded to include a review of Pratt & Whitney's markup and profit determinations. It also critiques the current DCAA audit policy, and comments on the incentives for cost growth in spare parts.

I have recommended to the Secretary of Defense that he review Mr. Spanton's memo and that he heed its recommendations.

If the Defense Department is serious about bringing cost increases under control, it will listen to people like George Spanton, and then change the system so that the George Spantons are more easily heard.

The Secretary of Defense should heed such specific and concrete recommendations as those outlined in this memo by Spanton. That is what Spanton and others are there for.

The Secretary should construct a timetable with startup dates, goals, and progress checks. And he should make public the names of those who are accountable—those who are monitoring progress, evaluating results and establishing new goals.

This is the only way even the Secretary himself will ever know that his initiatives are working. And it is the only way the problem of excessive cost increases will ever be corrected. I encourage the Secretary to take these appropriate steps.

Mr. SYMMS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. HECHT). The clerk will call the roll.

The acting assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

Mr. McCLURE. Mr. President, what is the pending business?

The PRESIDING OFFICER. Time for morning business has expired. Morning business is closed.

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

The PRESIDING OFFICER. The clerk will report the pending business.

The legislative clerk read as follows:

A bill (H.R. 3363) making appropriations for the Department of the Interior and re-

lated agencies for the fiscal year ending September 30, 1984, and for other purposes.

SECOND EXCEPTED COMMITTEE AMENDMENT—RELATING TO SECTION 317

The PRESIDING OFFICER. The question is on agreeing to the second committee amendment.

Mr. McCLURE. Mr. President, I am happy to yield to the Senator from Pennsylvania for a series of questions which I hope I will be able to answer.

Mr. HEINZ. Mr. President, I thank my friend, the distinguished chairman of the Committee on Energy and Natural Resources, for yielding.

We are considering here a matter that touches not only on our committee but also on a number of concerns and maybe even reservations I have in a number of ways.

I do note and take cognizance of the fact that the Senator from Washington and the Senator from Idaho are making what I believe is a sincere and best effort to insure that there is an adequate flow of financing or noninterruption of employment, specifically involving, as I understand the purpose of this amendment, the WPPSS nuclear powerplant No. 3.

I note that I, too, come from an area which has had problems. Incidentially, I am not referring to Three-Mile Island. We still have that as a problem. But we have our economic problems, and we have our steel mills that have been hit by unemployment. We have had problems with a variety of economic hard times, and they continue.

A number of questions come to my mind, and I should like to make sure that I have all my facts straight first.

Mr. McCLURE. Mr. President, will the Senator yield at that point? That is a very unusual thought process here—to get your facts straight before saying something. I appreciate that.

Mr. HEINZ. I take that as the high compliment I think it is.

It is my understanding that the effect of the amendment is to create a separate entity through the Bonneville Power System which would allow that entity, using the full faith and credit of the Bonneville Power System, to underwrite the activities of——

Mr. McCLURE. May I rephrase that slightly? It does not use the faith and credit of Bonneville. It is to the extent that Bonneville has contractual authority and contractual liability under the net billing agreements.

Mr. HEINZ. I stand technically corrected.

Let me say to my friend that I am not trying to spell out the legalities here.

My understanding is, however, that the result is a very substantial obligation of the Bonneville Power System by virtue of the net revenue agreement and, for the purposes of that agreement, the commitments made by the Bonneville System are binding upon it to the extent of those agreements, which are considerable. Therefore, to the extent of those agreements Bonneville has pledged its full faith and credit to fulfill those agreements. Is that not correct?

Mr. McCLURE. To the extent of the liabilities incurred in the net billing contracts which were entered into in 1971 and approved by Congress in their budget submissions in 1971, that is correct. They are liable for the payments required under those contracts.

Mr. HEINZ. Yes.

It is my further understanding that the idea is that this new authority will be able to issue bonds and incur bonded indebtedness for the purpose of completing WPPSS No. 3; is that correct?

Mr. McCLURE. It is not necessarily contemplated that the entity would issue bonds. They would go to the financial markets to raise money by debt instruments.

Mr. HEINZ. I stand corrected. But they will seek financing from the public by debt instruments——

Mr. McCLURE. That is correct.

Mr. HEINZ [continuing]. Which will include bonded indebtedness.

Mr. McCLURE. It could.

Mr. HEINZ. Would those be solely for the purpose of No. 3 or would the uncompleted financing needed for No. 2, which I understand is in the neighborhood of $100 million, also be financed?

Mr. McCLURE. It could be.

Mr. HEINZ. It could be.

There is an existing number of creditors to WPPSS 1, 2, and 3 at the present time. What does the amendment provide for or alternatively what is contemplated in the way of subordination of existing creditors to any new financing that might be offered through this authority?

Mr. McCLURE. I think the subordination is a question that is not relevant because Bonneville is obligated to pay all of the commitments that are outstanding at the present time just as they would be with respect to the balance, and I do not think there is any contemplation on the part of anyone that Bonneville is going to default with respect to its obligations under the net billing contracts on 1, 2, and 3 which are already covered by those contracts. They will be fully paid by Bonneville.

Mr. HEINZ. I do not know that either the Senator from Idaho or I in the Chamber can dispose of the issue authoritatively because I do not claim to be an expert and I do not think he does either on the effect of a subsequent decision to subordinate existing debt to a preferred debt to be issued in the future. But it is my understanding that the debt originally issued was triple A rated by the bond services. Obviously, it is no longer receiving that high rating. But it would be this Senator's concern, if not judgment, that the act of subordinating existing debt will have some kind of an effect on that debt. But I do not know that he and I are the kind of municipal finance authorities that this Senator would like to hear from. Indeed, it seems to me that it is a question on a subject upon which reasonable people can disagree and suggest to me that if I may say so, Mr. President, that is properly a subject for hearings before our committee.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. HEINZ. I yield.

Mr. McCLURE. First of all, I do not believe there is any question in the mind of anyone of whom I am aware that the obligations that are incurred under the net billing contracts on 1, 2, and 3 are not to be fully paid. They will be fully paid from revenues that flow from the marketing of existing power in the projects that exist in the Northwest.

Second, I wish to make sure that the RECORD reflected accurately that the bonds that were issued on 1, 2, and 3 were triple A rated, were bonds issued by the Washington Public Power Supply System and, although they were guaranteed in effect by the net billing contracts, they were not directly issued nor were they direct obligations of Bonneville.

Mr. HEINZ. Yes. That is understood.

On the first point, however, the Senator raises an interesting question which is that the net billing contract, of course, with Bonneville is only as good as the ability under the Bonneville power system to find a buyer for the power at the rate that they want to charge. Is that not correct?

Mr. McCLURE. Of course, that is correct. But the Bonneville system has a tremendous number of customers who consume an awful lot of electricity while there is a surplus at the present time and it would be the surplus of power to which the Senator would be addressing his question. The rest of it throughout the Pacific Northwest is being sold today, and those revenues must be sufficient to pay the indebtedness.

There is a rate case and incidentally the Federal Energy Regulatory Commission has some responsibility for the supervision of rates, and that rate case before FERC must generate sufficient revenues to pay the obligations that Bonneville does have, and those revenues are sufficient.

Mr. HEINZ. Neither of us can stand here in the well of the Senate today and say particularly in the light of the existing surplus of power and in light of the recent experience that the utilities in this Northwest have had, where-upon increasing off a very low base the price for electric power in the

Northwest there have been cutbacks, conservation in electric power such that at least in one significant instance, when a substantial rate increase was put into effect, there was no net increase in revenues.

Mr. McCLURE. If as a matter of fact the revenues had not been sufficient and were not sufficient to pay the indebtedness to Bonneville, the rates would have to be increased again.

Mr. HEINZ. That is correct. What we do not know in this Chamber I suggest, though, is the extent to which further rate increases will lead to further reductions in demand. The Senator may say he knows and I may say I know, but that does not make either of us right.

Mr. McCLURE. The Senator is raising an issue that no one familiar with the Bonneville system has raised at all, and I submit it should not be raised now to cast further doubt in the minds of people who hold the bonds that were issued by WPPSS on 1, 2, and 3 as to whether or not they will be paid. They will be paid. Bonneville has the resources from which they can pay them. They will be paid upon their schedule. There is absolutely no doubt in the mind of anyone with respect to that.

Mr. HEINZ. Mr. President, if the Senator will permit me, I wish some reassurance on that for the reasons just hinted at plus some others.

Let me state so that there is no misunderstanding, the Senator from Idaho concedes that there is a surplus of power right now in the Northwest, and that is without the completion and without WPPSS 2 and WPPSS 3.

Mr. McCLURE. If I may interrupt the Senator at that point to make what I think is an essential point, I understand what he is saying, but the revenues for Bonneville are completely and perfectly adequate, but let us stop for just a moment. Apparently your concern is whether or not Bonneville will be able to pay the obligations that it has under the net billing contracts.

Mr. HEINZ. That is one of my concerns.

Mr. McCLURE. Senator, does it not stand to reason that to complete the plants and have some additional power to sell is going to enhance its ability to pay rather than decrease its ability to pay?

Mr. HEINZ. No; that is not immediately clear, because in order to generate revenue it is not enough to have a product to sell. One must have willing buyers.

Mr. McCLURE. Of course.

Mr. HEINZ. Not only to consume what is produced but to pay the price that must be charged.

We all know, at least as I understand this, there are going to be some further rate increases here. We all know at least within the last few years there have been some rate increases that have actually caused demand to go down.

Mr. McCLURE. If the Senator is in a horse race you want to have a horse that will run, otherwise you are going to have to pay for the horses that came out of the starting gate and are dead, lying there on the track dead. Do you want to have to pay for a dead horse or would you rather have one that runs?

Mr. HEINZ. How much will it cost to feed the horse if he lives?

Mr. McCLURE. If that horse lives and runs he has the opportunity to win something. If he is lying dead on the track he has no opportunity at all.

Mr. GORTON. Will the Senator yield?

Mr. HEINZ. I do not want to beat a dead horse.

Mr. GORTON. Will the Senator from Idaho yield?

Mr. McCLURE. The Senator from Pennsylvania has the floor but the Senator from Washington wants to make a comment.

Mr. HEINZ. I have the feeling I am outnumbered but please proceed.

Mr. GORTON. I think my friend from Pennsylvania raised good questions. I do not believe however that the questions are relevant to the amendment to the committee amendment which is before us at the present time, and I do not believe they are relevant for the following reasons: the amendment which is before us at the present time authorizes the Bonneville Power Administration to enter into certain agreements through a new third party to complete Washington Public Power System Project No. 3.

The Senator from Pennsylvania is also correct that this could be utilized for No. 2 as well, but No. 2 is now being completed by money coming directly from the Bonneville Power Administration and it will be complete—out of net revenues—and it will be complete in a matter of months. So that this legislation in all probability is not necessary for the completion of No. 2.

The various parties who are interested in the completion of No. 3 have found a source of revenue, source of construction money. They have found money which they can borrow if this authority is granted. That assumes that various financial institutions willing to lend almost $1 billion are convinced of the security of that investment. The security of that investment is based on the authority of the Bonneville Power Administration to charge those who purchase power from it enough money in order to repay that investment, along with the bonds which are already outstanding on WPPSS 1, WPPSS 2, and WPPSS 3.

Now the point is that while I suppose in theory it is possible that there could be power existing from No. 3 which can be completed in 6 or 7 years in any event which could not be marketed with anyone at all, it could be conceived that has already been discounted by the persons who are willing to lend money by the fact there will be a market for it or in the alternative the Bonneville Power Authority from its other revenues can pay off both the bonds which have been already issued and the $960 million which is necessary to complete No. 3.

Mr. HEINZ. Will the Senator yield?

Mr. GORTON. Certainly.

Mr. HEINZ. I think the Senator's argument raises a very interesting question. Let us assume that everything the Senator has said is correct. Let us assume there are willing buyers out there for this financing, and let us assume that everything that I am concerned about is correct, that is to say there is not much proof that there is a market for this power, that there is not much proof that the market can bear the price that is contemplated. The question then is why would willing buyers be willing to buy this financing?

I think that that should lead us to the next area of inquiry, which is what is the relationship of the Bonneville Public Power system and the subsidiary whose net billing contract it stands ready to guarantee to other sources of funds, namely that of the Federal Government.

I understand the Senator from Idaho. Senator McCLURE, has an amendment, I do not know whether it is pending or adopted, that says the full faith and credit of the Federal Government does not stand behind the Bonneville Power system.

Mr. McCLURE. I think it is abundantly clear in existing law the Federal Government's full faith and credit is not pledged and is not behind Bonneville Power on these issues and that is already a matter of law. In order to make it absolutely clear I suggested——

Mr. HEINZ. It was apparently not clear to the bond underwriters as recently as 1974 and 1976 but according to my information the reason there was a triple-A rating here is there was an assumption——

Mr. McCLURE. I do not think that is true at all.

Mr. HEINZ. I think you and I are not arguing the point.

Mr. McCLURE. Let me try to answer.

Mr. HEINZ. I am not contending that the full faith and credit of the Federal Government is involved here. All I was saying is you intended to make that doubly clear in your amendment.

Mr. McCLURE. That is right. I intended, and the purpose of the amendment was, to restate what the law already is.

Mr. HEINZ. The Senator from Pennsylvania understands that fully and did not think his comments were in any way at variance with what the Senator has just said. What I did want to say is that, I really did want to ask, is its not true that although the full faith and credit of the Federal Government is not contemplated to be and as you read existing law according to most people's, most authorities' interpretations, although some would argue it, was never backed by the full faith and credit of the Federal Government, what in fact is the nature of the relationship between Bonneville Public Power and the Federal Government.

It is this Senator's understanding that they have the ability to have the use of money from the Federal Government.

Mr. McCLURE. We have granted them borrowing authority which is limited by appropriations acts as to what that borrowing authority is from the U.S. Treasury. We have from time to time appropriated money to the Bonneville Power Administration for the purpose of constructing transmission lines. Those direct appropriations for a specific purpose. But there never has been an argument made with respect to the net billing contracts that the full faith and credit of the United States is pledged to the net billing contracts and that is not the case under the current law and has not been a representation made to the market and the issuance of the bonds by WPPSS. I think WPPSS in issuing the bonds stated they were backed by the Bonneville Power Administration through the net billing contracts, which is a fact.

Mr. HEINZ. That distinction is noted, and I accept it.

Where I am less willing to accept the argument is that that is a distinction that is a meaningful difference to those people who buy bonds.

Mr. METZENBAUM. Will the Senator yield?

Mr. HEINZ. Because having come to the Congress as they have in the past for between $7 billion and $8 billion in financing for transmission equipment——

Mr. McCLURE. That is not quite correct.

Mr. HEINZ. You do not know what I have said yet.

Mr. McCLURE. But I know what you have said so far, and it is incorrect.

Mr. HEINZ. What is incorrect?

Mr. McCLURE. They did not come to Congress for $7 billion or $8 billion to finance transmission lines. That includes the power facilities that are in Federal dams for which repayment is required under the authorization for those dams. The major part of that $7 billion to $8 billion comes from the repayment for the power facilities, the major—a minor part of it with respect——

Mr. METZENBAUM. Will the Senator yield?

Mr. McCLURE. The minor part is——

Mr. METZENBAUM. I am trying to find out when the Senator from Idaho wants me to raise my point of order, at what point. It is almost 12 o'clock. Do you want me to make it after we return at 2 o'clock?

Mr. McCLURE. I appreciate the Senator asking that question. I will consult with him. It is my understanding that under the previous order we were expected to recess at the hour of 12 until the hour of 2 o'clock and be back on the bill at 2.

Mr. HEINZ. Have the Senator from Idaho and the Senator from Ohio completed their business?

Mr. METZENBAUM. I completed it. I did not get an answer.

Mr. HEINZ. Let me put this in the form of a question. Is it the understanding of the Senator from Idaho that the $7.5 billion, roughly, is, as we were discussing a moment ago, an obligation of the Bonneville Power system to the Federal Government?

Mr. McCLURE. It is an obligation, yes.

Mr. HEINZ. Could the Senator from Idaho tell me what the history of the repayment of that obligation has been?

Mr. McCLURE. I have not personally checked that recently because it really is not directly relevant to the pending matter.

Mr. HEINZ. May I suggest to the Senator why it may be very relevant, indeed?

Mr. McCLURE. Surely.

The PRESIDING OFFICER. The hour of 12 noon has arrived.

RECESS UNTIL 2 P.M. TODAY

Mr. McCLURE. Mr. President, I now move that the Senate recess until the hour of 2 p.m.

The PRESIDING OFFICER. Under the previous order, the Senate will now stand in recess until 2 p.m. this afternoon.

Thereupon, at 12 noon, the Senate recessed until 2 p.m., whereupon, the Senate reassembled when called to order by the Presiding Officer (Mr. LUGAR).

DEPARTMENT OF THE INTERIOR APPROPRIATIONS, 1984

The Senate continued with the consideration of the bill.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, it is now 2 p.m. It may be that there is a message from the House on the railroad retirement bill. I may ask the Senate to turn to that, temporarily. I will not do that at this time. As I indicated earlier to the minority leader and, I think, to other Senators, if that message does arrive, there seems to be a general consensus that we ought to try to address it, if we can.

Could I inquire of the Chair, is the message here?

The PRESIDING OFFICER. The message has arrived.

Mr. BAKER. I will not ask the Chair to present it, but while I have a chance to confer with the principals, I suggest the absence of a quorum.

I withhold that request.

Mr. METZENBAUM. Mr. President, may I ask the majority leader if I might ask for the yeas and nays in connection with the pending amendment?

Mr. BAKER. Mr. President, I yield to the Senator so he may do that.

Mr. METZENBAUM. Mr. President, I ask for the yeas and nays with respect to the pending amendment.

The PRESIDING OFFICER. Is there a sufficient second, There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

The majority leader is recognized.

UNANIMOUS-CONSENT AGREEMENT

Mr. BAKER. Mr. President, as I indicated earlier, on the floor and privately to the minority leader and to other Senators directly involved from the jurisdictional standpoint, as and when we received H.R. 1646, the railroad retirement bill, from the House of Representatives, it would be my hope that we could take it up on a relatively short time limitation and proceed to dispose of the bill this afternoon. I am about to propose such a unanimous-consent agreement. If that is granted, it will also be my intention to ask that the provisions of the Budget Act be waived so we can proceed with the consideration of that matter.

First, Mr. President, I ask unanimous consent that the pending measure be temporarily laid aside and that the Senate turn to the consideration of H.R. 1646, the railroad retirement bill; that no Senate amendments be in order; and that debate be limited to 30 minutes, to be equally divided between the majority leader and the minority leader or their designees.

Mr. LONG. Reserving the right to object, Mr. President, that has not been cleared on this side of the aisle. I cannot agree to that limitation. I

could agree to the bill being brought up for consideration.

Mr. BYRD. Mr. President, do I understand from the majority leader that there would be no amendments in order?

Mr. BAKER. Yes, Mr. President, the language of the request was that no Senate amendments be in order.

Mr. BYRD. So there could not possibly be any nongermane amendment.

Mr. BAKER. That is correct.

Mr. President, I wish to amend the request. I am advised now that perhaps the time limitation had not been fully cleared on both sides. I amend the unanimous-consent request by removing the time. I shall restate the request so it is clear.

I ask unanimous consent that the Senate temporarily lay aside the pending measure and turn to the consideration of H.R. 1646, the railroad retirement bill, and that no Senate amendments be in order.

Mr. BYRD. Reserving the right to object, would the majority leader add the provision that no call for the regular order would bring this measure down?

Mr. BAKER. Yes, Mr. President, I add that to the request.

Mr. METZENBAUM. Reserving the right to object, Mr. President, and I do not intend to object, I assume that when the majority leader says temporarily laying aside a measure that is on the calendar at the moment, he means that, immediately upon conclusion of the railroad retirement measure, we shall return to consideration of the Interior appropriations measure?

Mr. BAKER. Yes, Mr. President, that would happen automatically unless we take some other action to take up some other meausure. There are other measures, such as the Department of Transportation report, that may require action.

The answer to the question is that, on the disposition of the railroad retirement measure, the Interior bill would recur as the pending business and the second committee amendment would recur as the pending amendment.

Mr. METZENBAUM. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET ACT WAIVER—RAILROAD RETIREMENT SOLVENCY ACT

Mr. BAKER. I as unanimous consent that section 402 of the Budget Act be waived with respect to the consideration of H.R. 1646.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

RAILROAD RETIREMENT SOLVENCY ACT OF 1983

The PRESIDING OFFICER. The clerk will state the bill.

The assistant legislative clerk read as follows:

A bill (H.R. 1646) to amend the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes.

Mr. BAKER. Mr. President, I might say that it appears likely that there will be a request for a record vote on this measure. At the request of another Senator, I now ask for the yeas and nays on that question.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. BAKER. Mr. President, I now yield the floor.

The PRESIDING OFFICER. The Senator from Kansas.

Mr. DOLE. Mr. President, I know there are Senators who would like to be recognized before I make a statement to explain the bill. I wish first to yield to the distinguished Senator from Virginia (Mr. WARNER) who has been active in working out this program. I appreciate his assistance.

The PRESIDING OFFICER. The Senator from Virginia.

Mr. WARNER. Mr. President, the legislation before us today, H.R. 1646, amends the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act of 1974 to assure sufficient funds to pay current and future benefits.

If the Congress does not act on these amendments, present railroad retirees will be forced to take a 40-percent reduction in their tier II benefits. This cut would reduce all retirement checks by approximately 15 percent. We cannot allow this to happen.

This $4 billion, 5-year package is designed to save the railroad retirement system from insolvency.

Under this legislation, employers and employees will increase their contributions to the retirement system by $500 million over the next 5 years. During that same period, the Federal Government will contribute about $2 billion to the system. These provisions will become effective October 1.

The railroad retirement system pays about $5.7 billion annually in benefits to about 1 million persons. Recent high unemployment in the railroad industry has threatened to make the system insolvent.

Without these changes, the railroad retirement system will face a deficit of $13 billion by 1992.

The legislation represents a compromise plan recommended by a railroad labor-management committee.

Mr. President, I urge my colleagues to support this compromise legislation.

Mr. DOLE. Mr. President, I yield to the distinguished senator from Iowa, who has the same committee obligation.

Mr. JEPSEN. Mr. President, I rise in support of the Railroad Retirement Solvency Act. I cannot emphasize enough the extreme importance of this legislation. Thousands of retired railroad employees are anxiously awaiting the adoption of this bill. Without exaggeration, many of these retirees would not be able to make ends meet if this bill is not passed.

For many months now, Mr. President, I have been assuring my constituents that Congress would act responsibly and complete action on this solvency bill prior to the September deadline. I am glad that I am able to report that we are, in fact, meeting that deadline.

I want to especially congratulate the representatives of railway labor and management who have worked so hard to come up with a compromise package. As anyone who has ever been involved in labor-management negotiations knows, this is a very time consuming and difficult task. The individuals involved deserve great praise for their hard work and dedication to a fair and equitable solution.

There are those, Mr. President, who have criticized this plan but those voices are definitely in the minority. There is no denying the fact that there is a special relationship between the railroad retirement fund and the Federal Government. If we were able to turn the clock back 50 years, we might not be in the position we are in today. But, turning the clock back is not possible. We must deal with the situation as it is presented to us. The facts are that if we do not act, significant reductions will have to be made in the benefits of thousands of retired railroad workers. I cannot accept that solution.

Railroad retirees worked hard for their pensions and they deserve to have a pension that is fair. It is not their fault that the fund is in trouble so we cannot expect to bear the burden of restoring the fund the financial solvency. But assessing blame will not resolve the problem. That is why it was so important for labor and management to work together to find a solution.

Just as the social security reform commission developed a bipartisan solution to the financing problems of social security, management, and labor have worked together with Government to find a solution to the railroad retirement fund problem.

I am proud to be able to support this package and I strongly urge my colleagues to join me in adopting this bill. We cannot turn our backs on those

people who are depending on us to come up with a solution. To vote against this package would be disastrous for so many people.

Mr. President, I urge my colleagues to vote in favor of this bill.

Mr. DOLE. Mr. President, let me state at the outset that there is another committee under the jurisdiction of labor union resources. I understand that Senator HATCH and the ranking member on that committee may want to share in this presentation. As soon as they arrive, I shall be happy to yield to the members of that committee.

Mr. METZENBAUM. Mr. President, will the Senator yield?

Mr. DOLE. I yield to the Senator from Ohio.

Mr. METZENBAUM. Mr. President, I speak as a member of that committee which developed this compromise, worked out over a long period of time.

I rise in support of this legislation to put the railroad retirement fund back on its feet. This legislation is urgently needed to prevent major benefit cuts—cuts that would reduce tier 2 benefits for retirees by 40 percent—from going into effect on October 1. I commend the chairman of the Finance Committee Senator DOLE and the chairman of the Labor Committee Senator HATCH for moving this legislation through so expeditiously, especially in light of the fact that it was only passed by the House late Monday.

I support this legislation as a true compromise plan, but I have many reservations about specific parts of the plan. This package of tax increases and benefit reductions has been endorsed by the administration, has been adopted by the full House on a vote of 398 to 5, and has been endorsed by most of the major rail unions.

Although this bill goes far to put the overall railroad retirement fund into solvency, I am especially concerned about the so-called 60-30 provisions in this package. Currently railroad employees can retire at age 60 with 30 years service and obtain full benefits. As I understand this compromise, persons wishing to retire at full benefits would have to wait until age 62. Under this bill a person can retire with full benefits at age 60 until July 1, 1984. After that a person between the ages of 60 and 62 will face a reduction of 10 percent in tier 1 (social security level) benefits. After January 1, 1986, persons retiring before age 62 would face a reduction in tier 1 benefits of 20 percent.

I am deeply distressd by this particular provision. This latest phase-in provision may help some individuals who were expecting to retire next year with full benefits. But it will still leave many retirees with the choice of working several years longer than planned or accepting reduced benefits. I believe other provisions could have been adopted that would have generated the same cost savings to the railroad retirement system, but I am reluctantly endorsing the whole package in order to insure the system's solvency. However, I shall follow implementation of this plan carefully, and if it is financially possible, I may offer an amendment in the future to restore the full 60-30 provision.

Mr. President, I must emphasize that the insolvency problem faced by the railroad retirement fund—as with the social security system—is not due to overspending by the fund to retirees. Those men and women have worked for years for those benefits. They earned them, and they deserve to be paid those benefits. The real problem lies in the economic policies that the Reagan administration has passed, which has caused tremendous unemployment throughout the economy, but especially in the rail industry. In 1956 there were 1.2 million workers paying into the railroad fund; nobody ever predicted a shortfall back then. But today, there are only 400,000 workers. That is a precipitous drop from 1980, when we had over 700,000 workers. That tremendous decline in unemployment during the Reagan recession has sent the fund into insolvency and has forced this package to be developed.

I am encouraged that this plan will be adopted in time to prevent the even more drastic cuts in tier II benefits scheduled to take place on October 1. But I believe the best way overall to put the railroad retirement fund back on its feet is to revive the economy, so railroad workers have their jobs and railroad retirees can keep their full benefits.

Mr. DOLE. Mr. President, I yield to the Senator from New Jersey.

Mr. BRADLEY. Mr. President, during today's Finance Committee hearing, the Senator from Kansas indicated his support for a study to examine the railroad retirement and the railroad unemployment insurance systems and their effect on the commuter railroad lines established under the Northeast Rail Service Act of 1981. During today's hearing, David Stockman indicated that the administration will conduct such a study and report back to Congress by early 1984.

Several Senators have expressed concerns about this issue, including the Senators from Connecticutt, New Jersey, New York, and Pennsylvania.

Mr. President, I recommend that the study be undertaken by the Department of Treasury, in conjunction with the affected commuter railroad agencies and labor, to review all aspects of the commuter agencies' participation in the railroad retirement system and the railroad unemployment system including:

First, the history of commuter agencies as providers of commuter rail service;

Second, a comparison of past and future employment trends in the rail freight and commuter service areas;

Third, an analysis of the extent to which the commuter rails are responsible for the railroad unemployment insurance system's debt and an assessment as to whether it is fair to impose the solvency tax on the commuter lines;

Fourth, an examination of whether the freight railroads and commuter agencies should be under the same tax rate structure of the retirement system and the unemployment system;

Fifth, recommendations for an equitable tax rate structure for the commuter lines under the railroad retirement and railroad unemployment insurance.

Mr. President, I want to ask the distinguished chairman of the Finance Committee if he agrees that this kind of study is a responsible course of action to take and whether we will expect that by early 1984 the study would be completed?

Mr. DOLE. Let me state to the distinguished Senator from New Jersey that I appreciate his willingness to do it in this fashion rather than to amend the legislation. I think this is a responsible way to address the very valid questions raised by the Senators from New Jersey, New York, Pennsylvania, and also other Senators who have that same concern. We will direct the Treasury to make this study and have the report back by April 1, 1984.

Mr. BRADLEY. I thank the Senator very much for his outstanding work on this issue.

Mr. DOLE. I thank the Senator from New Jersey for his support of this legislation.

Mr. President, we are trying to move as quickly as we can on this legislation. We had hearings this morning in the Senate Finance Committee. The other committee of jurisdiction, Labor and Human Resources, as I have indicated, has had hearings. There has been a lot of discussion in the past several months with representatives of the American railroads. William Dempsey, president of the Association of American Railroads; Charles Hopkins, Chairman of the National Railway Labor Conference, and also Mr. Ole Berge, president of the Brotherhood of Maintenance of Way employees and chairman of the Railway Labor Executives Association Committee on Railroad Retirement, and Mr. Fred Hardin, were before our committee this morning. And also Jim Snyder, chairman of the Railroad Labor Executive Association's Committee on Legislation in Washington, D.C., and Lloyd Duxbury, president of the Railroad Retirement Association.

Mr. David Stockman, Director of the Office of Mangement and Budget, was on the same panel. He arrived a bit late, and we made him a member of that distinguished panel. We had complete accord; without exception every member of the panel, including Mr. Stockman, representing the President and the administration, urged that we move on this legislation as quickly as possible.

We adjourned that hearing about 11 a.m., and we are on the floor now with the legislation. I think that would satisfy the concerns of those distinguished members of the panel.

Mr. President, this legislation does have that broad support. I believe the House has done an outstanding job. No doubt there will be some questions, and I assume, as Mr. Stockman indicated, there are probably a number of areas where we might provide technical amendments, but in the interest of preventing what I perceive as being a real problem by the end of this month—sending out a million notices to railroad retirees that their benefits were going to be reduced by 40 percent is not something that I think should happen—we must pass this legislation. I thank my colleagues on both sides of the aisle for their willingness to consider this bill today.

Today the Senate has the opportunity to approve, on an urgent basis, legislation to deal with the financial problem of the railroad retirement system and the railroad unemployment compensation system. The legislation proposed for dealing with those problems, H.R. 1646, is a matter of some urgency, because, unless Congress acts, the Railroad Retirement Board will implement a 40-percent reduction in so-called tier II benefits—the industry pension equivalent—on October 1, in order to insure that income to the system will not fall short of outgo in the next fiscal year. We owe it to the retirees, and to the railroad industry, to make sure that does not happen.

The Senate is not lacking experience with the problems of underfunded retirement benefit programs. Our major legislative achievements this year—some might say our only achievement—has been to secure passage of the social security rescue package based on the recommendations of the National Commission. That package was a balanced, bipartisan effort, requiring significant contributions from beneficiaries and workers paying into the system. It was a bill that no one was completely happy with—probably the sign of a perfect compromise.

There seems to be widespread agreement that the same approach is needed with railroad retirement. The system is in dire trouble, due to the steady decline in railroad employment while the number of retirees drawing benefits has remained high. To save the system requires firm action—to preserve basic benefits, and keep our promise to workers who have relied on the sytem, requires some adjustment of benefits as well as extra revenues to shore up the program. We need to do our best to approve a solvency package that will guarantee security for beneficiaries for many years ahead, not just provide a quick patch up that will bring us back to the issue 6 months, 1 year, 2 years from now. We made adjustments in the program in 1981 that proved no more than a stopgap before facing the real problem.

PROGRESS

Fortunately, all parties to this problem have shown a willingness to work together, negotiate in good faith, and resolve differences in order to put together a workable package. Their efforts resulted yesterday afternoon in House passage of the compromise package, based on the negotiated labor-management agreement and modified by the Ways and Means Committee, that should put railroad retirement on a much sounder financial footing and guarantee basic benefits. The legislation also addressed the severe problems of the railroad unemployment compensation system, which has also threatened to drain the retirement fund under its borrowing authority. While the bill passed by the House does not finally resolve the problems of railroad unemployment, it does deal with the problem of the potential drain on the retirement fund and set the stage for a more comprehensive solution for railroad unemployment compensation. This is real, substantial progress.

SENATE CONTRIBUTION

The Senate, like the House, is acutely sensitive to the needs to those who depend on Government entitlements, and of the difficulty of finding the proper financing arrangements to put Government retirement programs on a secure and sound basis. In the Finance Committee in particular, we are also keenly aware of the impact higher taxes can have on an industry that has long-term difficulties of its own. In the Senate the Committee on Labor and Human Resources is primarily responsible for the benefit structure of railroad retirement and for all unemployment compensation. The Finance Committee is entrusted with securing financing for the system, and for governing the relationship of railroad retirement with social security and of railroad unemployment benefits with regular unemployment compensation. Each of those responsibilities of ours is involved in the House-passed legislation, which has the strong support of rail labor and management. That fact has just been made clear in testimony before the Finance Committee, and in letters from labor and management which I ask unanimous consent to have included in the RECORD.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

AUGUST 1, 1983.

Hon. ROBERT DOLE,
Chairman, Committee on Finance,
U.S. Senate, Washington, D.C.

DEAR SENATOR DOLE: We are writing to express the view of the Association of American Railroads and the National Railway Labor Conference respecting H.R. 3619, the railroad retirement legislation that is to be considered by the House today and that is the subject of hearings in the Senate Finance Committee tomorrow.

The Association represents, in terms of mileage and revenues, almost all of the nation's railroads in a wide variety of matters, including legislative matters, that concern the railroad industry. The Conference represents, in terms of mileage and revenues, almost all of the nation's railroads in national collective bargaining with the unions representing their employees and in regard to other matters concerning labor-management relations in the railroad industry, including negotiations with the unions in regard to recommendations to the Congress upon proposed changes in the railroad retirement system.

Our respective Boards of Directors met last Thursday and Friday and considered this legislation. The financial burden that it will, if enacted, impose on the industry is very large indeed. That burden goes well beyond what we believe is necessary. Nevertheless, we recognize that, in view of the imminence of benefit reductions mandated by statute, it is imperative that Congress act promptly. Accordingly, we support the enactment of H.R. 3619, provided that enactment is swift and with no further changes that would further minimize the effects of the benefit modifications or further increase the costs of the rail industry.

Very truly yours,

———— ————,
Chairman, National Railway Labor Conference.

————— ————,
President, Association of American Railroads.

———

RAILWAY LABOR EXECUTIVES' ASSOCIATION,
Washington, D.C., August 1, 1983.

Hon. ROBERT J. DOLE,
Chairman, Senate Committee on Finance, Senate Hart Office Building, Washington, D.C.

Hon. ORRIN G. HATCH,
Chairman, Senate Committee on Labor and Human Resources, Senate Russell Office Building, Washington, D.C.

DEAR CHAIRMEN: As you know, the railroad retirement system is facing a serious financial crisis that will result in drastic cuts in the benefits of over one million beneficiaries on October 1, 1983, under Section 22 of the current law, unless action is taken by the Congress to enact remedial legislation promptly.

You are also aware that representatives of railroad labor and railroad management have been working diligently for the past several months on proposed changes in the current law to improve the financial condition of the system so that such reductions would not occur. Additionally, the labor-management proposal would place the railroad retirement trust fund in a solvent condition for at least the next decade.

As a result of numerous meetings with Senators, Congressmen, and their staff, the proposed labor-management legislation (H.R. 1646) has been amended by the parties as well as jurisdictional Committees of

the House. As a result, additional increased costs have been imposed on both employers and employees to further insure the financial solvency of the railroad retirement system for the next several years.

While H.R. 1646 as amended differs significantly from the original H.R. 1646, primarily because of the increased tax provisions, and while there is a difference of opinion among the parties of interest over the revenue provisions, the fact remains that the legislative package does represent a substantial compromise by all parties of interest, i.e., labor-management, federal government, and railroad retirement beneficiaries.

In our judgment, the legislation certainly reflects a bi-partisan effort similar to that displayed by the bi-partisan group responsible for the enactment of the recent Social Security legislation. While there may be certain objectionable features for each of the partisan groups, nevertheless the legislation (H.R. 1646) expected to be passed by the House of Representatives, adequately corrects the financial condition of the railroad retirement trust fund and removes the possibility of drastic annuity reductions on October 1, 1983, under Section 22 of the current law.

Accordingly, we urgently request that H.R. 1646 be passed intact immediately by the Senate to allay the fears of over one million beneficiaries of the railroad retirement system and our 400,000 active railroad employees who are deeply concerned about the future solvency of the railroad retirement trust fund.

Speaking in behalf of a large majority of the railroad labor unions, we respectfully request your support and prompt action.

Sincerely yours,

O. M. BERGE,

Chairman,

Railroad Retirement Committee, Railway Labor Executives' Association.

FRED A. HARDIN,

Chairman,

Railway Labor Executives' Association.

Mr. DOLE. Mr. President, everyone agrees as I do, that our colleagues in the House have done a good job in this bill. In the normal course of things the Finance and Labor Committees would take the time to give the proposal a fresh look, since there is almost always room for improvement, and our Members generally have particular concerns that warrant being addressed. In this case, however, the overwhelming desire on all sides appears to be to expedite passage of the House bill. It is a sound package; it is firmly supported by labor and management and it is endorsed by the administration, as David Stockman testified to the Finance Committee this morning. While there may be room for improvement here—and I know the administration sought, for a long time, to reduce the general taxpayer's contribution to this package even more—the looming date of October 1 seems, in this Senator's view, to justify our agreeing to facilitate swift Senate approval of the House bill without independent committee consideration. To do otherwise puts at risk not only the well-being of beneficiaries, but their confidence in the system and the ability of Congress to manage it properly. More crisis management is the last thing we need here. To that end, I hope Members of the Senate will agree to expedite the House railroad retirement bill. If they have special concerns, there will be other opportunities to address them in separate legislation if they can make their case. To proceed in this fashion does require, of course, that our Members understand the features of the package, the nature of the problems, and the ways in which the burden of solving those problems is shared under the House bill. That is why we are here today, and I hope all Members state whatever concerns they have for the record so they may be examined for future legislation, rather than addressed in H.R. 1646. The case is compelling for acting now to safeguard railroad retirement. The cost is not small, but to do less would be a breach of faith with the industry, its workers, and those who worked for so many years to earn a decent retirement.

Mr. President, I ask unanimous consent that the background and an explanation of the legislation itself be included as a part of the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

H.R. 1646—RAILROAD RETIREMENT SOLVENCY ACT—BACKGROUND AND DESCRIPTION

BACKGROUND

The railroad retirement system is established under Federal law to provide retirement benefits to employees of the railroad industry. The system is funded by special taxes on rail employees and employers. Similarly, unemployment benefits are provided to rail employees through a specially funded system administered by the Railroad Retirement Board. Rail employment is not covered by or taxed under either social security or the regular State systems of unemployment insurance.

There are two basic railroad retirement benefits and two additional types of benefits for which some retirees are eligible. The basic "Tier I" benefit is designed to provide retirees the equivalent of social security benefits. The "Tier II" benefit is the equivalent of industry pension benefits for railroad workers. In addition, a modest supplemental annuity benefit is available to career railroad employees who retire with at least 25 years service; and a so-called "windfall" or dual benefit is available to workers who earned both railroad retirement benefits under railroad employment and social security benefits under non-railroad employment.

Solvency problem. In the 1981 budget reconciliation and the Economic Recovery Tax Act Congress enacted benefit and tax adjustments in railroad retirement designed to ensure the solvency of the system. Under section 22(c) of the Railroad Retirement Act as amended at that time, the Railroad Retirement Board is required to report by April 1 if it projects there are insufficient funds, including borrowing, to fully finance benefits for the next fiscal year. The Board must set forth regulations providing a pro rata reduction in pensions, preserving full social security equivalent (Tier I) benefits and paying a constant benefit each month. Pursuant to this provision, on February 18, 1983, the Board indicated that it would be required to reduce Tier II benefits by 40% beginning October 1, 1983, due to the projected shortfall in funds for the retirement system.

The shortfall is, in essence, due to the decline in rail employment relative to the number of retired railroad employees. Currently there are about 3 railroad retirees for each railroad employee, employment in the industry having declining from 1.2 million in 1956 to 400,000. The "best guess" employment projection made by the chief actuary for the Railroad Retirement Board shows employment declining to about 340,000 by 1989 and stabilizing at that level (Table attached).

The following tables were prepared by the Office of the Actuary of the Railroad Retirement Board. These tables are self-explanatory and give some indication of the ability of the Railroad Retirement System to pay full benefits in a timely manner under two different employment assumption. Employment under the two assumption are shown below:

	Employment assumption (thousands)	
	Best guess	Pessimistic
Calendar year:		
1983	385	365
1984	370	350
1985	360	335
1986	355	320
1987	350	305
1988	345	290
1989–92	340	290

LABOR/MANAGEMENT AGREEMENT

Early this year rail labor and management reached agreement on a suggested financing package to ensure the solvency of the railroad retirement system and shore up the railroad unemployment compensation system. This proposal, involving both benefit adjustments, tax increases, and Federal contributions, was introduced in the House as H.R. 1646 and the Senate as S. 1074. The package was modified by agreement between rail labor and management on May 25, subsequent to the action by the House Committee on Energy and Commerce reporting H.R. 1646. H.R. 1646 was significantly modified by the Ways and Means Committee and reported on July 1, and further modified on the House floor August 1.

H.R. 1646 AS PASSED BY THE HOUSE

The basic provisions of the House-passed bill are:

60-30. Currently railroad employees can retire at age 60 with 30 years service and obtain full benefits. This rule would be changed so that those retiring between ages 60 and 62 between July 1, 1984 and December 31, 1985, with 30 years service, would receive a permanent 10 percent reduction in benefits. Beginning January 1, 1986, the benefit reduction for this group would be 20 percent.

Disability waiting period. The disability waiting period for railroad retirement would be conformed to the five-month waiting period for social security disability benefits.

Annuity beginning date. Railroad retirement would be conformed to the limits on retroactivity for beginning annuity payments that exist under social security (in most cases 6 months before the filing of an application).

COLA deferral. The Tier I and Tier II Cola's for this year would be delayed until January 1, 1984, to parallel changes made in social security.

COLA offset. Tier I COLA's would be offset in Tier II benefits on a one-time basis up to a total 5 percent COLA.

Tier I benefit taxation. Tier I benefits would be taxed under the same rules as social security benefits, with the revenues returned to the RR fund.

Tier II benefit taxation. Tier II would be taxed as normal retirement benefits (that part which exceeds the employee's contribution). Revenues from income taxation of Tier II benefits and windfall benefits would go to the RR fund only until FY 1989 or when revenues from taxing Tier II reach $877 million, whichever is sooner. After that they would go to the general fund, and in 1989 revenue from taxing windfall benefits would go to the windfall benefit account.

To conform to changes in social security, remaining benefits to post-secondary students would be phased out.

Tax increases. The Tier II taxes would be increased one percent for employers and .75 percent for employees for each of three years: on January 1, 1984, January 1, 1985, and January 1, 1986.

The financial interchange with social security, which transfers to the RR account the amount of social security equivalent benefits provided under railroad retirement, would be put on a current basis by allowing the railroad retirement fund to borrow against the financial interchange.

Windfall. Funds to cover full windfall benefits for the period 1974 to 1981 would be loaned from the Treasury to the RR fund over three years ($1.7 billion plus interest). The loans would be repaid only if Congress appropriates funds to the RR account for that purpose.

Annualized wage base. The wage base for Tier I and Tier II would be changed from a monthly determined amount to an annual amount, effective January 1, 1985, and would increase thereafter in line with average wage growth.

RR unemployment borrowing. The RR unemployment system would not be allowed to borrow from the general treasury, but RR unemployment borrowing from the railroad retirement fund could continue through September 30, 1985.

RR unemployment tax. On January 1, 1984, the RR unemployment tax would be increased by raising the monthly wages subject to the tax from $400 to $600.

RRUC Repayment Tax. To reimburse the railroad retirement fund for borrowing, a "repayment" tax would be imposed on railroad companies for the period July 1, 1986, through September 30, 1990. Tax would be 2 percent of the first $7,000 in annual wages for each employee and would increase by 0.3 percent each January 1.

Sick Benefits. Sick pay under railroad retirement would be subject to income tax the same as all other sick pay is taxed, for benefits received after December 31, 1983.

Unemployment Committee. A committee of two representatives of rail labor and two of rail management, plus one public member, would be established to review railroad unemployment and report to Congress by April 1, 1984 with recommendations that can ensure repayment of all loans from the railroad retirement fund no later than the year 2000.

Section 22 of the railroad retirement would be amended to include additional reporting requirements. Each year the Railroad Retirement Board would calculate the projected finances of the system over the next 5 years, and would be required to report to Congress if they see a threat of insolvency at any time during that 5-year period.

Deposit of taxes. As of January 1, 1984, the deposit of railroad retirement taxes would be conformed to the schedule for depositing social security and income taxes for nonrailroad employment ($500 or more undeposited at end of month must deposit in 15 days after end of month; $3,000 or more undeposited at end of eight-month period must deposit within three banking days).

Benefits in divorce. In community property states, benefits payable to divorced parties would be made divisible in audit settlements.

Mr. HEINZ addressed the Chair.

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. HEINZ. Mr. President, we are obviously faced with an emergency. The consideration of this legislation occurs on the threshold of what could be a catastrophe for nearly 1 million retirees nationwide, some 82,000 of them in my State of Pennsylvania. We have the largest number of retirees in the Nation. We are acting in the nick of time. This is the 11th hour. If we were not to pass this legislation, there would be extremely deep cuts in the tier 2 portion of the pensions for railroad retirees. They would go down by an estimated 40 percent on October 1. If we do not act between now and September 1, a notice will go out with all the checks explaining to people that

their next checks may be substantially reduced.

The parties to this legislation have worked long and hard. I want to associate myself with the remarks of the distinguished chairman of the Committee on Finance (Mr. DOLE). Labor and management people have, after 6 months of extremely intensive effort, emerged with a solution, a solution that is badly needed. I do not think it is a perfect solution. Indeed, I have some concerns that I went into, in part, at our Finance Committee hearing today. But I do intend to support this legislation. I am not going to attempt to amend it. I am going to attempt to improve upon it, as I will explain in a moment.

H.R. 1646 is now before the Senate; and the Senate is scheduled to adjourn at the end of this week for a 6-week recess. We in the Senate either have to pass a bill literally within a matter of hours—or we must decide to let the issue wait for the Senate to return. In my judgment, the Senate should not adjourn and let beneficiaries begin the countdown toward the October 1 deadline. It is imperative that the Senate pass this bill immediately so that the October cuts will not take place.

I regret that the Senate has been given so little time to consider the House-passed bill, which is an extremely complex piece of legislation that will have a heavy impact on beneficiaries, on rail workers, and on the railroad industry.

I know that the parties have been hard at work on this problem. I commend rail labor and management for spending more than 6 months of intensive effort, with numerous negotiations and renegotiations, to come up with a package that will avert the draconian benefit cuts that have been widely advertised. They have done their work well.

The good results of these efforts are embodied in some numbers: the typical retired worker on the rolls would end up losing $60 a month in October if no legislation were passed. Under this pending legislation, the monthly annunity will not be reduced at all. It will be frozen from now through December 1984, and on January 1, 1985, the monthly annuity for a typical employee will be about $7 a month more, instead of being sharply reduced.

The effect for people in various circumstances is summarized in the following table, which I ask unanimous consent to have printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

ANNUITY AMOUNTS UNDER SECTION 22 (PRESENT LAW) REDUCTION AND UNDER H.R. 1646

Type of annuity and amount in Sept. 1983	Oct. 1983		Oct. 1984		Jan. 1985	
	Sec. 22 (Present law)	H.R. 1646 (Proposed)	Sec. 22 (Present law)	H.R. 1646 (Proposed)	Sec. 22 (Present law)	H.R. 1646 (Proposed)
Typical employee on rolls—$650	$590	$650	$530	$650	$530	$657
Typical spouse on rolls—$350	$310	$350	$270	$350	$270	$353
Typical widow on rolls—$550	$510	$550	$470	$550	$470	$556
30–60 employee awarded in Sept. 1983—$1,250	$1,030	$1,250	$810	$1,250	$810	$1,261
30–60 employee awarded in Oct. 1984			$762	$1,267	$762	$1,276

Mr. HEINZ. Mr. President, I must also remind the parties that, regardless of one's position on this issue, the railroad retirement system is a Federal program, for which the Congress is accountable. And I, for one, have some concerns about the legislation that the House has sent over.

Because benefits are, in effect, frozen through 1984 and partially frozen in 1985, the real benefits of railroad retirees, adjusted for inflation, will of course decline. And when we consider that retire taxable, the real, aftertax income of the beneficiaries will be reduced. That may be the necessary, inevitable price to pay for restoring solvency to the system.

But, then again, the full benefit reductions may not be inevitable. Rail employment, after dipping to a low point of 388,000 in March 1983, has had a healthy rebound to 405,000 as of June 1983, which is well above the employment assumptions used by the Railroad Retirement Board under its so-called best guess estimate. Indeed, the low point for rail employment so far this year is above the average yearly employment level assumed under the best guess assumptions.

The assumptions also predict rail employment will decline again in 1984 and beyond. The legislation we are considering has a healthy margin of safety and should provide adequate funding for the next 10 years, even using the pessimistic assumptions developed by the Railroad Retirement Board. And I am relieved that the package has taken into account such a contingency as the pessimistic employment assumptions.

But what happens if we have erred in our assumptions—for once—by using too pessimistic an estimate? That could mean that some part of the benefit reductions imposed on beneficiaries may not, in fact, be necessary, and that some portion of the tax increases, the stiff tax increases, on rail labor and management, might prove not to be necessary. The bill before the Senate, H.R. 1646, does, in fact, contemplate such a possibility as far as taxes go. Section 502 of the bill calls for annual reports to Congress by the Railroad Retirement Board, on the actuarial status of the fund, including whether there are sufficient reserves in the account and whether the rates of such taxes should be reduced. So presumably, if the Congress legislates more tax increases than are necessary, there is a way for Congress to know about that and correct it.

But what about the 1 million railroad retirees? What happens to them if the economic recovery proves to be robust, and rail employment stabilizes or even increases in contrast to the declining forecasts of employment used in developing the bill? There is no provision in this package that protects beneficiaries from any potentially unnecessary benefit reductions.

I am concerned, in particular, with the provision in the bill that will save nearly $1 billion over 5 years by reducing retirees' tier 2 benefits, dollar for dollar, for any tier 1 social security equivalent cost-of-living increases, up to a cumulative 5-percent. On January 1, 1984, the social security cost-of-living increase of 3.5 percent will be deducted from the tier 2 benefit. But since the bill calls for a cumulative 5 percent adjustment, the remaining 1.5 percent will be taken from the social security cost-of-living increase paid on January 1, 1985.

Now, what happens if rail employment picks up? What happens if the reserves are above even the best guess estimate? Well, under the present bill, the second phase of the COLA offset will take place anyway. There is no provision for a contingency.

Now, the philosophical and the policy implications of this provision also trouble me deeply. We keep telling railroad retirees that their monthly check is really two pensions combined, a social security pension and a private industry pension. Well, this COLA offset uses the social security benefit increase to reduce the industry's obligation for the private pension. In my judgment, it is not good policy to allow social security benefit increases to be used to reduce a private pension obligation.

I am also troubled by the erratic distributional effects of this provision.

As Chairman of the Special Committee on Aging, I asked the GAO to give me some data on the distribution of this tier 2 cut. They advised me that 45 percent of beneficiaries would lose less than 10 percent of their tier 2 benefits; 37 percent will lose between 10 and 20 percent of their tier 2; an additional 11 percent will lose between 20 and 30 percent of their tier 2 benefits. And 7 percent would lose more than 30 percent of their tier 2 benefits.

Now, I realize that no one's monthly check will go down because of this offset. But since we have divided this pension into two parts, there seems to me to be serious equity problems

about using the social security benefit increase to cover up really wide-ranging, disparate reductions in the industry pension.

So while I certainly do support the legislation as a whole, it seems to me that this one provision warrants some closer scrutiny by the Senate. For example, the second phase of the COLA offset could be made contingent on reserve levels so that if rail employment does not fall to the levels predicted, then the COLA increase would not be offset in 1985.

In conclusion, Mr. President, I support rapid enactment of this bill to insure that the benefits are not cut in October. I commend rail labor and rail management for their efforts. But it may be necessary to take a look at some of these provisions again next year, if the economy and the condition of the railroad retirement fund improve.

Senator DOLE and I agreed at the Finance Committee hearing on railroad retirement to obtain a study of the effects of this COLA offset provision, and of the potential for rescinding the second phase of the offset. That study will be helpful.

In the meantime, I intend to introduce a bill, shortly, that will drop the second phase of the COLA offset, scheduled for January 1, 1985, if the reserves available to the railroad retirement system are sufficient to pay full benefits.

There are other things in this bill that I would have liked the Senate to consider more carefully, such as the way in which the dual or so-called windfall benefits are taxed as a private pension, rather than as a social security benefit. And I also question whether the tax on tier 2 benefits should not flow into the railroad retirement trust fund for a longer period of time than is provided in this bill.

But we are faced with an emergency. Benefits will go down, substantially, if the Senate does not pass this bill today. And railroad retirees should not be held hostage because of congressional inaction. I therefore support immediate passage of the bill.

Mr. President, I should like to beg the indulgence of Senator DOLE for the purpose of a discussion.

As the distinguished Chairman of the Finance Committee recalls at the hearing on railroad retirement financing earlier today, I expressed some concerns about the provision in the bill that calls for the next 5 percent of tier 1—social security—cost-of-living increases to be used to reduce the tier 2 benefit, dollar for dollar. I am concerned that the measure, as Mr. Duxbury stated at the hearing in behalf of railroad retirees, might unfairly—and unnecessarily—penalize those retirees who are least able to afford it. And it may be that the full 5-percent COLA offset will not be required, if the economy recovers strongly and rail employment increases, or even stabilizes at its current level of 405,000, instead of declining as predicted by the assumptions used to work out the financial effects of this package. As we agreed at the hearing, I would like to see a study that will evaluate the effects of the COLA offset provision on beneficiaries and the desirability of modifying the provision if the economy and rail employment permit.

Mr. DOLE. I share the concern of the Senator from Pennsylvania, and I am pleased that he raised this question in the hearing. It is a matter of record. There was an agreement at that time that we would figure out the best way to posture the study. I am not sure whether it is to be made by GAO or Treasury. I am sure we can arrange for a study of this issue without amending the bill before us, H.R. 3619. How would the Senator from Pennsylvania like this study to be conducted?

Mr. HEINZ. I should like to make a suggestion in that regard at this time.

Following up on our discussion at the hearings, I made a few inquires, and it is my best judgment that we should ask the Railroad Retirement Board to make a report to Congress by October 1, 1984, to address the following questions:

First, what is the dollar impact of the COLA offset provision in H.R. 1646 on beneficiaries in general, and on those, in particular, with annuities at or below the poverty level, or within 125 percent of the poverty level? The effects of inflation and the taxation of benefits should be taken into account.

Second, what would the effects on the railroad retirement trust fund be if the second phase of the COLA offset, that which is scheduled for January 1, 1985, were to be dropped?

Third, how could the offset cost-of-living increases eventually be restored to beneficiaries—if and when the condition of the fund returns to a sufficient level of reserves?

Does the Senator from Kansas see a problem with that kind of study?

Mr. DOLE. I see no problem with such a study, and I think the results will probably be useful and informative to the Congress. And I think it is preferable to have the Railroad Retirement Board conduct this study at our direction, rather than to amend the bill.

I think that would be a good way to handle it. We could make the request to the board in writing, and I am certain that they would be willing to accommodate that request.

Mr. HEINZ. I see no reason to amend the bill. Often we do that, but I think with the strong support of the Senator from Kansas, the chairman of the Finance Committee, we would get the study in good time. So long as the study is done by October 1, 1984, to give Congress time to reconsider the second phase of the COLA offset, it is fine with me.

Mr. DOLE. I thank the Senator from Pennsylvania. We will do that immediately. The date he suggests is October 1, 1984?

Mr. HEINZ. October 1, 1984.

I thank the Senator from Kansas.

Mr. President, I want to make one other remark to my colleagues.

It is my hope, if we can get the enormous procedures on both sides of the aisle worked out in time, to send to the desk a bill, for its immediate consideration by the Senate.

I ask unanimous consent to have the bill printed in the RECORD at this point.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 1(g)(2) of the Railroad Retirement Act of 1974 is amended by adding at the end thereof the following:

"For purposes of section 3(i)(2) of this Act, the period June 15, 1948, through December 15, 1950, shall be deemed to be a war service period with respect to any individual who without intervening employment not covered under this Act rendered service as an employee to an employer under this act in the year he was released from active military service or in the year immediately following such year.".

SEC. 2. The amendment made by this Act shall apply with respect to annuities accruing in months beginning after the date of enactment of this Act.

Mr. HEINZ. Mr. President, let me take this opportunity to explain to those listening that the purpose of this measure is to correct a serious inequity that results from an oversight in the bill before us. That oversight affects a small number of veterans of the Korean conflict who lose credit for all their military service under railroad retirement because they volunteered just prior to the official declaration of a war service period.

Frankly, I had intended to offer this bill—which I introduced on May 5, using identical language, as S. 1214—as an amendment to this bill. But inasmuch as we want to get this bill through as quickly as possible, and since I did not want to delay this important piece of legislation by requiring a conference with the House, I am asking my colleagues to cooperate by giving their unanimous consent for the consideration of this measure. They do not necessarily have to vote for it if they do not like it, but I would hope they would cooperate in allowing it to be considered immediately upon the disposition of this measure.

It is my understanding that the representatives of rail labor and management equally support this change in the Railroad Retirement Act. Indeed, they believed it was to be included in this bill, but it has not been included,

through the oversight I mentioned a moment ago; and we will have to pass a separate bill if the provision is to be adopted without delaying the railroad retirement bill.

I thank my colleagues for their attention. I hope my colleagues can help in allowing this measure to be considered immediately after the disposition of the bill.

Mr. LONG. Mr. President, reserving the right to object——

Mr. HEINZ. The Senator from Pennsylvania has not made a unanimous-consent request. I am simply saying that it would be my intention, upon the disposition of this measure, to make such a unanimous-consent request; and I am trying to put Senators on notice now that they might be able to take the matter under their best, carefully considered judgment. I do not mean to interrupt the Senator, but I did not want him to think I had put the unanimous-consent request at this time.

Mr. LONG. I thank the Senator. If he had made a unanimous-consent request, I would feel compelled to object, in order to reserve the rights of Senators long enough for those interested in the matter to be alerted and to act accordingly.

Mr. HEINZ. The Senator is correct. That was the whole purpose of my brief remarks.

Mr. LONG. Mr. President, the railroad retirement program has reached the point where benefit costs will soon exceed the funds available to pay those benefits. To deal with this situation, the House passed a bill on Monday (H.R. 1646) which makes several changes in the railroad retirement program and its financing.

The House bill, which is now before the Senate, is a major piece of legislation. It increases the railroad payroll tax rates on both railroads and rail workers. It repeals the previously tax-free status of the industry portion of railroad pensions. The portion that is equivalent to a social security benefit was already made taxable under the social security amendments. It provides for a reduction in benefits for those retiring before the full retirement age. The bill also modifies the cost-of-living provisions which apply to those now on the benefit rolls in a manner which will reduce their benefits compared with what they could expect under current provisions. In addition, a substantial part of meeting the railroad retirement problem over the next few years is achieved by transferring some $4 to $5 billion from the General Treasury to the retirement program.

In the ordinary course of events, a bill of this magnitude would be carefully studied by the Senate committees of jurisdiction—the Committee on Finance and the Committee on Labor and Public Welfare. However, the bill is being handled on an expedited basis. At a hearing this morning before the Finance Committee, both rail labor and management and Director Stockman of OMB urged that the House bill be accepted promptly and without amendment. According to their testimony, action this week is necessary to prevent the necessity of notifying some 1 million retirees that their benefit checks will be reduced starting in October.

I am concerned about some aspects of this legislation. With the massive budget deficits this country faces, I am hesitant to see us simply endorse without examination a House-passed bill which to a considerable extent solves the railroad retirement problem by financing it out of general Federal revenues, which is to say financing it out of the deficit. At the same time, however, I recognize the urgency of the situation as outlined by this morning's witnesses before the Finance Committee.

In view of the fact that we have no alternative available to us at this point, I will reluctantly vote for the bill. I would much prefer to be voting for a measure that would be increasing revenues and trimming future increases to the extent that so-called general revenues would not be necessary. I hope that we have an opportunity at a future occasion to find a better solution.

Mr. GRASSLEY. Mr. President, will the Senator from Kansas yield?

Mr. DOLE. I yield.

Mr. GRASSLEY. Mr. President, I rise in support of this compromise.

I am very glad that railroad labor and management, the administration, and congressional leaders have reached a compromise which will avert the need to notify railroad retirement recipients of a catastrophic cut in their benefits. I know the 2,000 Iowans who have written me on this issue will also be glad to know that they will not be on the receiving end of those notices.

Though this solution is not perfect—a compromise reached with the gales of crisis blowing down our doors rarely is—it does meet the three minimum requirements for remedial legislation in this area. First, the necessary sacrifices come in large measure from the parties involved: Railroad employees, retirees, and management. Second, the actual benefits of current recipients will not be reduced, although cost-of-living adjustments will be altered and some benefits will be taxed. Finally, all parties involved assure us that the Federal deficit will not be increased.

For these reasons, I find this benefit package acceptable and urge my colleagues to support the compromise so that action may be completed before we adjourn.

I want to close with a note of caution, similar to the one I sounded when we completed work on the social security package. And that is that like social security, railroad retirement seems to have a nasty habit of not remaining solvent despite our guarantees.

It will be incumbent upon Congress to keep a close eye on the system as railroad employment continues to fall and the pressures to mount, so that we may insure that the interests of retirees and the taxpayers are protected.

Thank you, Mr. President.

Mr. DOLE. Mr. President, I do not know of any other requests for time on this side. I understand the distinguished junior Senator from Pennsylvania (Mr. SPECTER) will want to make a statement. I am not sure whether he wants to make it or just have it made a part of the RECORD, but we can check on that.

I also indicate that I share the concern expressed by the distinguished Senator from Louisiana (Mr. LONG) with reference to transfer of general revenues. That is a matter of concern. It is certainly a matter of concern at all times, particularly in the time of unwieldy deficits, and it is a matter I assume we will continue to address, but I do believe that the urgency of the need for the legislation has been clearly demonstrated and as indicated by Mr. Stockman this morning it is not the kind of a package that he may have put together, not the kind that labor might have put together, nor the kind that management might have put together, but all parties working together came up with what I believe and I think most of us believe is a fair compromise under the circumstances.

Are there further requests for time?

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The acting assistant legislative clerk proceeded to call the roll.

Mr. SPECTER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SPECTER. Mr. President, today we are taking the necessary steps to avert the impending bankruptcy of the railroad retirement system. More than 80,000 residents of my State of Pennsylvania rely on the continued solvency of this system. The unfortunate and rapid decline in rail employment lies at the root of the system's instability. Four years ago, rail employment hovered at about 550,000; as recent as January 1983, the rail industry counted only 388,000 among its work force. Pennsylvania has not been spared of high rail unemployment. Yesterday, joined by Senators SASSER and DIXON, I introduced legislation to reinstate a program of supplemental benefits for these jobless workers.

On February 18, the Railroad Retirement Board informed the Congress that if it did not act promptly, railroad retirement benefits would be cut 40 percent on October 1, 1983, and an additional 40 percent a year later. The Committees on Labor and Human Resources and Finance should be commended for acting under pressure to inject a certain amount of financial stability and solvency to both the retirement system and the railroad unemployment insurance program. However, while the decisions made were difficult ones and sufficient for the short term, they were not necessarily the most equitable and correct for the long-term future of railroad workers.

My colleague, Senator HEINZ, has proposed an alternative measure to reform the railroad retirement system. Rather than threaten the administration of this retirement system or its beneficiaries by attempting to amend the pending bill and perhaps, delay its passage, he has chosen to support this bill and request immediate Senate scrutiny of his proposal. I support Senator HEINZ in this effort.

During the 97th Congress, I opposed changes in the structure of the railroad retirement system. I rejected the idea of merging railroad retirement tier I with social security, or converting the tier II component to a private pension plan. I also supported full funding of the dual benefit for railroad retirees. Although the bill we consider today retains this basic structure, I am concerned about how several of the changes proposed will impact the level of benefits that retirees—many of whom spent more than three decades working on the railroads—have come to expect and deserve.

Consequently, I look forward to rapid consideration of the Heinz proposal. Meanwhile, it is my view that we are acting in an appropriate and necessary manner to preserve the integrity of the railroad retirement system. I thank the Chair and yield the floor.

Mr. PERCY. Mr. President, I fully support H.R. 1646 which amends the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to fund current and future benefits of the railroad retirement system. H.R. 1646 is an equitable solution to the system's insolvency and will preserve the system without further benefit cuts or tax increases through this century and perhaps the next. It is a fair compromise by the administration, railroad labor, and rail management. We are all called upon to share the burden which includes an increase in taxes on employers and employees, and selective adjustments in benefits to produce the greatest savings to the trust fund while having the least effect upon beneficiaries. Nearly 1 million beneficiaries would receive reduced pension checks in October if the Congress fails to act on this measure.

The railroad retirement system was enacted by Congress in 1935—before the establishment of the social security system—to shore up the failing pension plans of railroad companies. It is the only pension system for private sector workers that is financed by the Federal Government. The system is financed through a combination of employee, employer, and Federal payments to a trust fund administered by the Railroad Retirement Board.

The Railroad Retirement Board announced earlier this year that unless action was taken to bolster the retirement system, certain benefits would have to be cut some 40 percent October 1 of this year and an additional 40 percent the next year. The first cut would amount to an estimated $53-a-month loss in the average monthly pension of $630. The principal reason for the financial strain on the trust fund is the unanticipated, sharp increase in railroad unemployment. Since August 1981, when the Congress last addressed the financing of the system, employment in the rail industry has dropped 24 percent, from 510,000 to 388,000 workers.

Mr. President, passage of the bill is particularly significant for Illinois. There are 66,200 railroad retirement beneficiaries in Illinois—the third greatest amount of any State. Illinois has more railroad workers—34,000—than any other State in the Nation. The Railroad Retirement Board is headquartered in Chicago where it employs 1,100. Excluding agencies of purely regional significance, the Board is the only Federal agency not located in the Washington metopolitan area.

Mr. President, I urge my colleagues to support this measure.

Mr. DOMENICI. Mr. President, I rise in support of H.R. 1646, the Railroad Retirement Solvency Act of 1983. This legislation is critical for insuring that railroad retirement benefits are paid on time and in full on October 1 of this year.

There is a funding gap of $2.7 billion in the railroad retirement system over the next 3 years. This gap threatens the benefits of a million railroad retirees across the Nation. Over 7,000 of them are in my own State of New Mexico.

Unless Congress acts promptly, railroad retirement benefits for the average retiree must be reduced by an average of $636 in fiscal year 1984. That reduction begins October 1.

Railroad retirees and their dependents are alarmed about the fate of their next benefit check. Rail workers are wondering whether the system will be around to pay benefits when they retire. We cannot risk allowing the railroad retirement system to default on its obligations to so many Americans.

This bill is the result of a series of compromises involving labor and management, Members of both parties in Congress, and the administration. As such it contains many elements which many of us, myself included, would not support if they were not part of the whole compromise.

Just this morning, Mr. Stockman, representing the administration, endorsed this bill at a Finance Committee hearing on the subject. Representatives of labor and management supported this package also. And the vote yesterday in the House showed broad bipartisan support when it was passed by a vote of 398 to 5. I think all of the parties who helped negotiate this package should be commended for their spirit of compromise.

The package before us resembles the bipartisan social security compromise in many ways. It produces solvency in the system and avoids drastic, across the board benefit reductions through a combination of revenue increases, slower benefit growth, and general fund transfers. This allows the burden of restoring solvency to the system to be spead fairly and equitably.

The major provisions of the legislation would:

Increase taxes for employers, employees, and retirees;

Delay scheduled COLA increases and several other benefit changes consistent with social security; and

Reimburse the railroad retirement trust fund for windfall payments that were not fully appropriated.

Despite my reservations about specific parts of the package, I have decided on balance it must be supported. It must be supported to insure that benefits are not reduced in October, and to insure solvency of the railroad retirement system over the longer term.

Mr. HATCH. Mr. President, as chairman of the Labor and Human Resources Committee, I join with my distinguished colleague Mr. DOLE in seeking prompt consideration of the railroad retirement bill H.R. 1646. This measure passed the other body just yesterday, and the administration is asking the Senate to pass the bill expeditiously, without amendment, thus clearing the measure for the President to sign.

The bill is the product of long, hard negotiations among representatives of the rail industry, the rail unions, and the administration. The relevant congressional committees have also played an active role in developing this compromise bill. My own committee held hearings on the matter back in April, and this morning the Finance Committee received testimony from the administration, the rail carriers, and the rail unions. All the witnesses supported the bill as passed by the other body, and they strongly pressed

for prompt Senate action, before the start of the August recess.

I ask unanimous consent at this point to insert in the RECORD letters which have been sent to both Mr. DOLE and me from the Railway Labor Executives' Association, representing rail labor, and the National Railway Labor Conference, and the Association of American Railroads, representing the railroads. In these letters, the parties set forth their support for the bill and urged speedy action.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

AUGUST 1, 1983.

HON. ORRIN G. HATCH,
Chairman, Committee on Labor and Human Resources, U.S. Senate, Washington, D.C.

DEAR SENATOR HATCH: We are writing to express the view of the Association of American Railroads and the National Railway Labor Conference respecting H.R. 1646, the railroad retirement legislation that is to be considered by the House today and that is the subject of hearings in the Senate Finance Committee tomorrow.

The Association represents, in terms of mileage and revenues, almost all of the nation's railroads in a wide variety of matters, including legislative matters, that concern the railroad industry. The Conference represents, in terms of mileage and revenues, almost all of the nation's railroads in national collective bargaining with the unions representing their employees and in regard to other matters concerning labor-management relations in the railroad industry, including negotiations with the unions in regard to recommendations to the Congress upon proposed changes in the railroad retirement system.

Our respective Boards of Directors met last Thursday and Friday and considered this legislation. The financial burden that it will, if enacted, impose on the industry is very large indeed. That burden goes well beyond what we believe is necessary. Nevertheless, we recognize that, in view of the imminence of benefit reductions mandated by statute, it is imperative that Congress act promptly. Accordingly, we support the enactment of H.R. 1646, provided that enactment is swift and with no further changes that would further minimize the effects of the benefit modifications or further increase the costs of the rail industry.

Very truly yours,

——— ———,
Chairman, National Railway Labor Conference.

——— ———,
President, Association of American Railroads.

———

RAILWAY LABOR EXECUTIVES' ASSOCIATION,
Washington, D.C., August 1, 1983.

HON. ROBERT J. DOLE,
Chairman, Senate Committee on Finance, Washington, D.C.

HON. ORRIN G. HATCH,
Chairman, Senate Committee on Labor and Human Resources, Washington, D.C.

DEAR CHAIRMAN: As you know, the railroad retirement system is facing a serious financial crisis that will result in drastic cuts in the benefits of over one million beneficiaries on October 1, 1983, under Section 22 of the current law, unless action is taken by the Congress to enact remedial legislation promptly.

You are also aware that representatives of railroad labor and railroad management have been working diligently for the past several months on proposed changes in the current law to improve the financial condition of the system so that such reductions would not occur. Additionally, the labor-management proposal would place the railroad retirement trust fund in a solvent condition for a least the next decade.

As a result of numerous meetings with Senators, Congressmen, and their staff, the proposed labor-management legislation (H.R. 1646) has been amended by the parties as well as jurisdictional Committees of the House. As a result, additional increased costs have been imposed on both employers and employees to further insure the financial solvency of the railroad retirement systems for the next several years.

While H.R. 1646 as amended differs significantly from the original H.R. 1646, primarily because of the increased tax provisions, and while there is a difference of opinion among the parties of interest over the revenue provisions, the fact remains that the legislative package does represent a substantial compromise by all parties of interest, i.e., labor-management, federal government, and railroad retirement beneficiaries.

In our judgment, the legislation certainly reflects a bi-partisan effort similar to that displayed by the bi-partisan group responsible for the enactment of the recent Social Security legislation. While there may be certain objectionable features for each of the partisan groups, nevertheless the legislation (H.R. 1646) expected to be passed by the House of Representatives, adequately corrects the financial condition of the railroad retirement trust fund and removes the possibility of drastic annuity reductions on October 1, 1983, under Section 22 of the current law.

Accordingly, we urgently request that H.R. 1646 be passed intact immediately by the Senate to allay the fears of over one million beneficiaries of the railroad retirement system and our 400,000 active railroad employees who are deeply concerned about the future solvency of the railroad retirement trust fund.

Speaking in behalf of a majority of the railroad labor unions, we respectfully request your support and prompt action.

Sincerely yours,

O. M. BERGE, *Chairman, Railroad Retirement Committee, Railway Labor Executives' Association,*
FRED A. HARDIN, *Chairman, Railway Labor Executives' Association.*

Mr. MITCHELL. Mr. President, I rise in support of H.R. 1646, legislation to resolve the financial crisis in the railroad retirement system.

Congress last acted on the railroad retirement system in 1981 when it enacted a compromise funding plan that called for benefit cuts in exchange for $1.7 billion in new rail employee and employer taxes during fiscal years 1982, 1983, and 1984. The changes were expected to keep the system solvent for 10 years.

However, the recession which occured since that time has casued a 25-percent reduction in rail employment. In the 18-month period from July 1981, to January 1983, the railroad industry suffered a net loss of 123,000 jobs. The increased unemployment in turn resulted in lost payroll taxes to the railroad retirement account and additional drains on that account for unemployment compensation claims.

The overall problem created by this sequence of events is of substantial dimension. On February 18, the Railroad Retirement Board advised Congress that there would be insufficient funds to pay full benefits to railroad retirees this fall. The crisis is so severe that tier II benefits will be cut by 40 percent on October 1, 1983, and by 80 percent on October 1, 1984, unless Congress takes action now. Feeling the brunt of this steep reduction would be 1 million retirees, retired spouses and survivors nationwide. In the State of Maine, there are nearly 5,000 rail annuitants—2,200 retirees, 1,100 retired spouses, and 1,600 survivors. For these individuals, a 40-percent reduction in benefits would have serious repercussions, reducing their income substantially and rendering them more vulnerable to today's high cost of living, particularly as winter approaches in the Northeast and heating costs mount.

In facing the task of helping the railroad retirement system avert bankruptcy, we in Congress are mindful of the efforts of rail labor and management in drafting a resolution to the problem. Earlier this year, they developed a memorandum of agreement, supporting legislation which would assist the system through a variety of methods, asking railroad retirees, employees, and management as well as the Federal Government to participate in a compromise solution. The result is a $9 billion package that should stabilize the system over a period of years.

Under that package, retirees are asked to forego a small portion of the benefits they can now receive under the early retirement provision of the Railroad Retirement Act. They would be subject to reductions in cost of living adjustments (COLA's) and would have pension benefits subjected to taxation.

Rail employees and management would have their payroll taxes increased substantially over the next 3 years to add to the revenues of the badly depleted railroad retirement account.

Under the original rail labor/management agreement, retirees, employees and management together would contribute 41 percent to the overall legislative solution and the Federal Government 59 percent.

However, the agreement has undergone modification during the course of deliberations in the committees and on the floor of the House. H.R. 1646, as passed by the House, reduced the Government's share by 15 percent and apportioned those savings among the

other parties affected by the legislation, but principally to rail management. As a result, the bill provides for a Government contribution of 44 percent with the balance to be made up by rail retirees, employees, and management.

The legislation before us also addresses in partial fashion the insolvency of the railroad unemployment compensation system. That system, which is administered by the Railroad Retirement Board, has for some time had insufficient income to pay benefits to those railroad workers who lose their jobs. Funds have therefore been borrowed from the railroad retirement account in order to insure the full and prompt payment of unemployment compensation benefits. While rail labor and management would have allowed the railroad unemployment compensation system to borrow from the Federal Treasury for funding shortfalls, the bill allows continued borrowing from the pension account until September 30, 1985, and permits rail labor and management to work on a long-term solution in the interim period. I will look forward to reviewing recommendations on that problem as information becomes available next year.

Mr. President, H.R. 1646 as passed by the House is not a perfect solution to the prospective insolvency of the railroad retirement system. Indeed, concern has been expressed about the burden it would impose in private industry, on employees and on retirees.

Representatives of the railroad companies have testified before Congress about the relative cost of the package, requiring a significant contribution on their part in new taxes on an annual basis for each employee. While all railroad systems must respond to the imposition of new revenue requirements, the burden will be more keenly felt by smaller, short line companies. Fortunately, the administration has agreed to report to Congress by next April 1 on the impact which the new taxes will have on commuter lines.

Fears have also been expressed about the costs to be imposed on retirees, who will no longer have as generous an option on early retirement and who must forego some of their benefits in order to contribute to the overall solution that has been worked out. In particular, it is felt that the offset which must be made by the tier I COLA on tier II benefits may be onerous to certain individuals and surviving spouses. Congress must take a closer look at this provision next year after experience has been gained with its implementation in order to avoid unduly steep reductions in railroad annuities.

Mr. President, the solution to the railroad retirement crisis is not ideal. However, it is a reasonable compromise that demands sacrifice from all parties affected. In that sense, it attempts to apportion fairly the $9 billion needed to rescue the system from bankruptcy. Representatives of the administration, rail labor and management have expressed their support for the package in its current form, and have urged its speedy passage in order to avert the 40 percent reduction in benefits which will otherwise occur on October 1.

I believe Congress has the right and the responsibility to shore up the ailing railroad retirement system. Many Americans depend upon it for their support and will suffer substantial hardship if we fail to respond in a prompt and positive manner.

Accordingly, I express my support for the legislation and urge that H.R. 1646, as passed by the House by a vote of 398 to 5, be adopted without change by my colleagues in the Senate.

Mr. MELCHER. Mr. President, I support this bill as essential to alleviating the anxiety of over 1 million railroad retirement beneficiaries. They have been told that unless we act now, their pensions will be cut by 40 percent on October 1. This is a totally unacceptable penalty on these senior citizens who have earned the right to a reasonable standard of living in their retirement years.

The retirees are not to blame for economic policies that have brought about the rapid demise of our railroads. They held up their end of the bargain through years of hard and dangerous labor. We can do no less.

Labor and management have agreed on the contents of this bill. They have agreed to share the burden of increased contributions to the retirement fund.

The Federal Government has a clear, moral responsibility to restore the funds owed the Railroad Retirement Board as this bill provides.

I urge my colleagues to vote for this bill today, despite some less than perfect features, so that this group of senior citizens can be assured that their pensions are safe.

Mr. BOSCHWITZ. Mr. President, today we are considering the rescue plan for the railroad retirement system. This legislation is necessary because railroad retirees and rail workers face yet another financial crisis in their retirement system.

Like social security, their system is about to pay out more in benefits than it is taking in in taxes. And because of this, retirees face a potential 40 percent cut in certain benefits on October 1, this year.

Today's funding crisis stems from four basic problems.

First, there are 25 percent fewer rail workers paying into the system than in 1981.

Second, many of these former workers are collecting unemployment—forcing the railroad unemployment fund to borrow from the railroad retirement account, RRA. This totals up to $500 million since 1981.

Third, the payment of windfall benefits for 20 years puts a continuous strain on the RRA.

And fourth, and perhaps the most important and startling reason, is the worker to retiree ratio. If you recall, Mr. President, during the social security debate, people were worried because there were only three workers for every retiree where there used to be a 14-to-1 ratio. This meant a smaller tax base and forced those of us developing a rescue plan to take a hard look at payroll tax rates. But the railroad retirement system has each worker supporting almost three retirees. How can reserves be built up under these circumstances? And how can a fair tax rate be set for employers or employees?

As a result of these four problems, the entire railroad retirement system is again teetering on the edge of collapse. Income in fiscal year 1982 was $5.6 billion, but expenditures were almost $6.3 billion. Thus, the RRB has projected the retirement fund will be $548 million short in fiscal year 1984 and $13 billion short by 1992. To further compound this problem, an additional $1.8 billion in borrowing is expected by the rail unemployment fund by 1988.

This is why today's legislation is so important. While I am concerned about some of the provisions—like my colleague from Pennsylvania, I am concerned about the tier II offset—I feel it is imperative that the package pass. If we fail to act this week, 1 million retirees will needlessly be frightened by official notices of impending 40-percent benefit cuts.

By passing this bill today, we can avoid creating that unnecessary fear.

In my travels around Minnesota, I have had many chances to talk with railroad retirees who are terribly confused and worried about potential cuts in their benefits. Many others—my staff and my colleagues—have heard the same fears.

That is why I am so firmly committed to preventing current retirees from losing 40 percent of their tier II benefits. My contact with the retirees has impressed on me the severity of the situation and has increased my dedication to resolving the funding shortfall. I urge my colleagues to join me in support of this rescue plan.

Mr. SASSER. Mr. President, I rise today to offer my support for the railroad retirement legislation pending before the Senate, H.R. 1646.

Mr. President, history records that it was the railroad industry which led the development of private company pensions in this country. By 1927, some 8 years before the passage of social security, almost 95 percent of

the employees of major rail lines, and five out of six employees in the railroad industry had some opportunity to receive a retirement pension.

In 1937, the railroad retirement system was established in response to a growing need for placing the wide variety of railroad retirement pension plans on a sound financial basis. In order to protect the pension credits earned prior to the establishment of the railroad retirement system, railroad employment was excluded from social security.

In 1974, the system was reorganized, with the agreement of both rail labor and management, to reflect three levels of benefits: Tier 1 benefits are paid to employees with at least 10 years of railroad experience and are based upon combined railroad industry and social security covered earnings. Tier 2 benefits approximate the structure of a private industry pension plan with benefits related to service in the railroad industry and financed by taxes on industry employees. Finally, a dual benefits program protects those individuals eligible for both railroad related benefits and social security benefits.

The legislation before us today represents a genuine compromise. It embodies the collective efforts of both rail labor and management to maintain a strong and enduring railroad retirement system.

This legislation represents an agreement on the part of very diverse participants, the administration included, on the absolute need for concrete action to avert crippling reductions in basic railroad retirement benefit levels.

Time, in this instance, is no ally. Absent a quick resolution to the financial problems confronting the railroad retirement system, it is estimated that average railroad retirement benefits will be slashed by some 40 percent come October 1 this year. And next year, benefit reductions of up to 80 percent could be in the offing.

Few among us would be able to adjust to an 80-percent reduction in fixed income, or even a 40-percent reduction. Well, that is exactly what will happen unless we pass this legislation now before us.

Without this legislation, the average railroad retiree will have his benefits reduced by $60 per month starting this October. The average retiree's spouse will consequently suffer a $40 reduction per month. The average retiree who has retired at 60 years of age with 30 years of railroad experience will be facing $220 reduction in monthly benefits.

Next year the problem will worsen. The average retiree will be facing a $120 monthly reduction, while the average retiree who has retired at 60 years of age with 30 years of service will be facing a $440 monthly reduction. Such benefit reductions are unconscionable, and cannot be rolerated.

But how, you may ask, has such a situation developed? There are basically four major factors which have contributed to the current financial difficulties of the railroad retirement system:

First, the recession has caused railroad employment to decline by nearly 25 percent over the past 2 years. Although rail employment has been increasing over the past few months, there are still more than 100,000 less rail employees than there were some 2 years ago.

Second, massive borrowing from the railroad retirement trust fund in order to fund the dual benefits program, which the Congress has underfunded since 1974, has left a shortfall of $1.8 billion in the railroad retirement fund.

Third, borrowing from the railroad retirement trust fund to meet the unemployment insurance payments made necessary by the huge layoffs in the rail industry over the past 2 years.

Fourth, the excessive delay in the transfer of funds owed by social security to the railroad retirement fund and the delays and limits imposed upon borrowing against those funds to keep the retirement trust fund from expiration.

In January of this year, Senator HEINZ and I offered a sense-of-the-Congress resolution which called on rail labor and management to discuss various alternatives for remedying these financial difficulties and reach an agreement prior to October 1, 1983. They have done so and it is now Congress turn to act.

This legislation has the support of the administration, and that in itself is a significant accomplishment. It is the result of intense negotiations involving management, labor, Congress, and the administration. H.R. 1646 has passed the House by an overwhelming vote of 398 to 5. This bill offers the best available solution for the solvency of the railroad retirement system.

It is a fair and equitable agreement in that it singles out no one group to absorb the burden of the remedies. Employees, employers, retirees, and the Federal Government all contribute and thus share responsibility for the retirement system. It should be noted here that the Federal Goverment's only contribution is that amount which Congress committed itself to pay under the dual benefits provision of the 1974 Railroad Retirement Act.

Mr. President, without passage of H.R. 1646, thousands of railroad retirees would suffer a severe financial burden. Instead of maintaining their current railroad retirement annuities, they would witness severe reductions in their basic benefits. Annual benefit reductions of nearly $1,000 per retiree would be common in 1984; benefit reductions of some $1,500 would occur in 1985.

With passage of this legislation, basic benefits are protected, and the integrity and solvency on the railroad retirement system is maintained.

I am a supporter of the strongest possible railroad retirement system. Twenty thousand retirees and their families and dependents in Tennessee depend on a sound railroad retirement system.

H.R. 1646 maintains a solvent railroad retirement program. I urge passage of this legislation.

Mr. BUMPERS. Mr. President, I want to express my strong support for the Railroad Retirement Solvency Act of 1983 which we are considering today. As other Members of this body have pointed out, this is by no means a perfect measure but we have an emergency on our hands and this bill will avoid the benefit cuts that otherwise would occur on October 1.

Mr. President, the 16,000 railroad retirees and dependents in Arkansas are deeply concerned about the financial integrity of the railroad retirement system. They feel like they are on a benefit rollercoaster. A federally administered railroad retirement program was set up in 1937 and has been amended several times. The current structure of the system originated from the Railroad Retirement Act of 1974, and I am sure that most Members of Congress who voted for that legislation thought that they were assuring the financial integrity of the system for years to come. But as every Member of this body is aware, it was necessary in 1981 again to amend this legislation because of the continuing decline in railroad industry employment which reduced revenue from payroll taxes. We did so in the hope that 1 million railroad retirees, their survivors, and dependents, would be assured of full benefits for at least 10 years and perhaps longer.

But our predictions were way off the mark, I think primarily because the President's program for economic recovery, which we also adopted in 1981, has been such an unmitigated economic disaster for the country. When we passed the Railroad Retirement Amendments, of 1981 we assumed that railroad employment would level off at about 500,000 workers, but instead the numbers declined from 510,000 in August 1981, to 388,000 in January of this year. The retirement system had an income of $5.6 billion in fiscal year 1982, but expended about $700 million more than that. Since the taxes of each worker support almost three retirees, the fund's reserves were meager. It became clear that the system would not have enough money to meet benefit payments in October of this year.

As a result, the Railroad Retirement Board on February 18 warned of massive benefit cuts, and the railroad retirees have been scared ever since. Happily, rail labor and management, with congressional help, worked out this emergency plan. Again, we hope that the projections that this measure will shore up the system for a decade are accurate, but all of us are aware that these projections are simply educated guesses and depend primarily upon the performance of the national economy, which no one has had any success in predicting accurately over the last few years.

The important thing for now is that we are adopting a plan that will avoid benefit cuts in October and we hope for a long time thereafter. It is a reasonable plan that has the support of both rail labor and management, and it is imperative that we send this measure to the President as quickly as possible. Our Nation's railroad retirees and their dependents have been dangling long enough. They want the assurance that they can make the house payment and buy food and clothing and the other necessities of life come October 1. I commend the members of the Finance Committee and Labor and Human Resources Committee for their work on this measure. I hope that this important bill will be adopted unanimously.

Mr. STEVENS. Mr. President, I am pleased to join my Senate colleagues in saluting the cooperative effort that went into the bill now before us, H.R. 1646. From personal experience, I know what thorny issues pay and benefits are, and I congratulate all those whose hard work made today's consideration of a railroad retirement package possible.

I am confident this bill is sufficient to meet the financial needs of railroad retirees without sacrificing the financial stability of the railroad retirement system as a whole. The compromises agreed to by all parties affected by the provisions of this bill sets an example that hopefully will be emulated in future negotiations on difficult legislation. But most importantly, with this bill we can now guarantee that receipt of much deserved retirement benefits for those who have contributed to this important piece of our Nation's history—the railroad.

Mr. PRYOR. Mr. President, as a cosponsor of S. 1074 I am pleased the Senate is today considering legislation which assures the availability of resources to pay current and future benefits under the Railroad Retirement Act of 1974.

I am especially pleased that we are meeting only hours after the House of Representatives has overwhelmingly approved H.R. 1646, a bill which was hammered out by rail management and labor. This is truly a crucial time for Senate action because this issue needs to be resolved before the August recess.

We have broad support for this legislation. The issue needs immediate attention. I hope we can get these changes enacted into law as soon as possible in order to head off the October 1 reductions.

This retirement system, which is now paying benefits to approximately 1 million annuitants, will undergo a 40-percent reduction in its tier II benefit payments unless Congress acts to improve the system's financial position.

The basic problem confronting the railroad retirement system is the same one which plagues the social security system: too few workers paying into the system in proportion to those drawing benefits. This problem has been exacerbated by the decreasing level of rail employment.

The financial stability of the railroad retirement system has caused great concern among railroad retirees who have contributed for many years toward their retirement only to be faced now with possible reductions.

It is my hope that H.R. 1646 will provide a long-term, comprehensive solution to the problems of adequately funding the railroad retirement system and I urge my colleagues to support its passage.

Mr. GLENN. Mr. President, I am pleased to support this urgently needed legislation to improve the financial condition of the railroad retirement system. This legislation is necessary to protect the benefits of 54,000 railroad retirees in the State of Ohio and over 1 million retirees nationwide. This refinancing package, which was worked out by railroad labor, management, and Congress, will prevent a drastic 40-percent cut in retirement benefits on October 1. I urge my colleagues to support this legislation.

The deep national recession has had a heavy impact on the railroad industry. In 1981, we negotiated a refinancing package for the railroad retirement system that was designed to put it on firm financial footing for many years. However, during the last 2 years railroad employment has dropped from 514,000 to 400,000 workers. Nearly 25 percent of railroad workers have lost their jobs. This high unemployment in the railroad industry has reduced contributions to the retirement fund. In addition, the railroad unemployment compensation program has borrowed money from the retirement fund, further reducing assets of the retirement program.

The bill we are considering today includes increased taxes for railroad employers and workers, adjustments in benefits and early retirement, transfers from the General Treasury to the railroad retirement fund for past underfunded obligations, and changes in the relationship between the unemployment compensation program and the retirement system. The bill has some tough medicine that will require sacrifices from workers, employers, and retirees. We must strike a balance that is fair to retirees who have paid large retirement contributions and are entitled to their benefits, and we must also be mindful of the needs of workers and employers who are struggling to survive during this very difficult economic period.

I urge my colleagues to support this legislation to restore financial stability and public confidence to the railroad retirement system.

Mr. NICKLES. Mr. President, as I examined this bill in comparison with the original labor-management request in February of this year, as embodied in H.R. 1646 and S. 1074 as originally introduced, I believe that there have been improvements. I commend the Office of Management and Budget, the House Ways and Means Committee, rail labor, and rail management for their sincere, hard-working efforts to reach a compromise on this difficult matter.

As much as I appreciate their efforts, I am not able to support their final product. This bill contemplates raising $9.26 billion during fiscal years 1984–88. The source of that funding is divided as follows:

	In millions	Percent of total
Federal Government	$4,070	44
Current and future retirees	2,200	24
Rail management	2,000	21
Rail labor	990	11
Total	9,260	100

My main reservations about the bill are as follows: Of the $4 billion Federal contribution, I believe $2.07 billion is an outright gift, the reimbursement for underfunded past windfalls benefits. I also have some doubts about the $2 billion worth of changes in the borrowing against the financial interchange.

Also there is a bad precedent in this bill of which I want my colleagues to be fully aware. Tier II benefits will be taxed for the first time, which is entirely fair since other private pensions are subject to income tax. However, unlike all other private pensions, the income taxes collected on tier II are deposited in the railroad retirement account, not the General Treasury, until fiscal year 1989 or until $877 million is collected, whichever is earlier.

Lastly, Mr. President, this bill does not resolve the problem of rail-UI insolvency. The railroad unemployment insurance program has operated in the red 18 years out of the past 23 years according to CRS. Currently, the UI fund is approximately $500 million in debt to the railroad retirement ac-

count. Although the increased employer UI taxes in this bill are a step in the right direction, not enough will be raised to preclude future borrowing or to repay the debt. In fact this bill now allows Rail-UI to borrow from the General Treasury instead of as in the past from the railroad retirement account. I would like the Senate Labor Committee to join Senate Finance next year in examining this rail-UI problem.

Mr. President, estimates upon which the parties, committees, and OMB relied indicate this package will keep the system solvent until 1990—that is only 6½ years. I place little faith in those estimate given the track record of such estimates in the past. I hope for the sake of railroad retirees that this package puts the account on sound footing.

I am genuinely concerned for the retirees and the taxpayers. If I honestly felt this package was to the benefit of both of them, I would have endorsed this wholeheartedly. I feel it unfortunate that once again this deliberate body has acted in haste without knowing the elements of this legislation.

Mr. RIEGLE. Mr. President, I am pleased to rise in support of H.R. 1646, the Railroad Retirement Solvency Act of 1983. This legislation is vital to insuring the solvency of the railroad retirement system and to preventing unfair benefit cuts to over 1 million railroad retirees that would otherwise occur on October 1, 1983.

The railroad retirement system currently faces its most severe financial crisis. This crisis is primarily due to the severe recession that we have faced over the last 2 years. As a result of this recession, railroad employment has decreased from 510,000 in August 1981—when the railroad retirement amendments were enacted as part of the Omnibus Budget Reconciliation Act of 1981, to 388,000 in January 1983. The railroad retirement system suffered a loss in its revenue base during this 18-month period of over 25 percent. The pension equivalent of the railroad retirees benefits is now facing a 40-percent cut in October of this year, rising to an 80-percent cut in October 1984.

This legislation will prevent this catastrophe from occurring. It will provide for selective adjustments in a variety of benefits which should result in the greatest savings to the trust fund with the least adverse affects on railroad retirees. It will provide for additional funding through the imposition of taxes upon both employees and carriers. Finally, it will provide for the recovery of certain depletions in the trust fund account caused by past underfunding.

Mr. President, this legislation calls for sacrifices from all parties involved. I understand that rail labor, rail management, as well as the administration are in agreement on the need for the immediate enactment of this legislation. While many of us have reservations about particular aspects of this proposal, it is clear that we have a package of mutually dependent compromises. Their prompt and swift enactment is essential to the avoidance of the economic catastrophe that would otherwise fall upon all railroad retirees and their beneficiaries.

I commend the leadership of both parties for their diligence in bringing this legislation before us, and urge its immediate adoption.

Mr. D'AMATO. Mr. President, the Railroad Retirement Solvency Act of 1983 is the product of tireless efforts of both management and labor to reach an agreement that returns the system to solvency. They should be commended on their efforts.

I have always been a strong supporter of the railroad retirement system, which now provides benefits to almost 1 million railroad beneficiaries, 60,000 of whom reside in New York State. By passing this legislation this afternoon, we will allay the fears of those beneficiaries who are facing a 40-percent reduction in their tier II benefits on October 1.

This bill requires sacrifices on the part of beneficiaries, current railroad workers, and the railroad industry. Under the circumstances, I think it is the best possible solution considering the time constraints under which we are working. However, as do some of my colleagues, I have some concerns with aspects of the bill.

I am bothered by the COLA deferral and offset provision. I was pleased to learn that a study will be undertaken with a report due on October 1, 1983 addressing the impact of this provision on railroad beneficiaries.

I am also concerned that the increased taxes on the railroad industry will place an additional burden on the already overburdened commuter railroad agencies. I was pleased to learn that Senator DOLE and David Stockman agreed to undertake a study to review all aspects of the commuter agencies' participation in the railroad retirement system and the railroad unemployment system and to report back to Congress by early 1984. I look forward to the study findings and anticipate that it will lead to further legislative action on our part.

Mr. President, I urge my colleagues to pass the Railroad Retirement Solvency Act of 1983.

Mr. DOLE. Mr. President, I do not have any request for time. The yeas and nays have been ordered.

Mr. LONG. Mr. President, I do not have any request for time and I suggest we go ahead and vote on it.

The PRESIDING OFFICER. The question is on the third reading of the bill.

The bill was ordered to be read a third time, and was read the third time.

The PRESIDING OFFICER. The question is, Shall the bill pass? The yeas and nays have been ordered, and the clerk will call the roll.

The acting assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Arizona (Mr. GOLDWATER) and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Mississippi (Mr. STENNIS) is necessarily absent.

The PRESIDING OFFICER (Mr. KASTEN). Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 95, nays 2, as follows:

[Rollcall Vote No. 240 Leg.]

YEAS—95

Abdnor	Garn	Metzenbaum
Andrews	Glenn	Mitchell
Armstrong	Gorton	Moynihan

Ford	Melcher	

NAYS—2

Helms	Nickles

NOT VOTING—3

Goldwater	Stennis	Weicker

So the bill (H.R. 1646) was passed.

Mr. DOLE. Mr. President, I move to reconsider the vote by which the motion was agreed to.

Mr. LONG. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER OF BUSINESS

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, I have been canvassing the list of available things to do. I must report to the Senate that I have a dreary report on all fronts.

It does not look as if we are going to get very far with the Department of the Interior appropriations bill—at least not today. I continue to hope that we can pass that bill, but it is clear to me that we are not going to get it done today.

I had hoped, as I announced earlier, to have the Department of Transportation conference report, but at last reading, the House had not yet passed it. The estimate was that it would probably be 4:30 p.m. before they act, which means it would be 5 to 5:30 p.m. before we could act.

There is one education bill that might be taken up this afternoon, but if there is any opposition to that, I am afraid that would be impossible.

Mr. STAFFORD. If the leader will yield, I believe that could be ready by not later than 4 p.m.

Mr. BAKER. Mr. President, what I propose to do is put us in morning business and give Members an opportunity—I notice, for instance, that the Senator from Vermont (Mr. STAFFORD) wishes to speak on a matter concerning the former chairman of the Public Works Committee. Other Senators may have things to do.

Then when we get a chance to clear the education bill to do or anything else, we clearly will do that. We already have an order for 9:30 in the morning. When we come back in the morning, we would be, once again, on the Interior appropriations bill.

I know the Senator from Ohio is greatly interested in that, and none of this is calculated to deprive him of any opportunity he would have to make whatever move he wishes, but for a variety of reasons I would sort of like to put that to bed right now and pick it up again in the morning after routine morning business is out of the way, about 10 a.m. or maybe 10:30 a.m.

Mr. METZENBAUM. Mr. President, will the majority leader yield for a moment?

Mr. BAKER. Yes; I yield.

Mr. METZENBAUM. It occurs to me that the Interior appropriations bill is a matter that a number of people put a lot of work into. I only have a special interest in the content of it as 1 of 100 Senators. We have been delayed in some respects with respect to one committee amendment. Yesterday I was prepared and did raise a point of order with respect to that committee amendment. I was asked to withhold that temporarily. I am prepared to raise that point of order immediately. I am prepared to, if the Senator from Idaho wishes to appeal the decision of the Chair in the event the Chair rules in my favor, move that along expeditiously.

The point of my being on my feet is to say to the majority leader that I for one do not want to be a party to any delay and am prepared to move forward.

As a matter of fact, it is my understanding we were indeed going to move immediately to the consideration of the Interior appropriations bill pursuant to the order that was entered prior to taking up the railroad retirement bill. I thought that was a clear understanding that we had. I would really like to go forward and raise my point of order.

Mr. BAKER. Mr. President, I thank the Senator, I understand how he feels. That is why I said what I said. The problem I have outlined would not jeopardize his rights. What it would do is postpone the confrontation on the point of order until this measure occurred as the pending business tomorrow morning.

Now, I hope the Senator will let us do that. It is true and I freely acknowledge that when he asked me I stated, and I stated accurately, I believe, that when railroad retirement was disposed of, the pending business would be once more the Interior appropriation bill, as indeed it is. It is before the Senate at this moment. But I hope the Senator would not insist on that.

For a variety of reasons, including some personal considerations—and I know every Senator in this Chamber at one time or the other, sometimes large numbers of Senators have had personal matters they had to attend to—I hope the Senator would consider giving me that much flexibility so that we could deal with this in the morning instead of today. I promise him that I am not trying to defeat his efforts to make the point of order, but I do urge the Senator to consider that it is a leadership judgment on this side at least that we would be better served to pick up this fray in the morning than we would be to continue it this afternoon.

Mr. METZENBAUM. When the majority leader puts it on that basis, I am hard put to say no, since, when I have gone to him on previous occasions on a personal matter, he has always been very accommodating. I would not insist upon the matter, but I do hope I will have my opportunity early in the morning so that every Member may have an opportunity to vote if the Senator from Idaho appeals the ruling of the Chair.

Mr. BAKER. I thank the Senator very much.

RADIO MARTI

Mr. BAKER. Mr. President, one other matter. As I indicated to the minority leader a moment ago, I planned to file a second cloture motion on the Radio Marti matter.

I ask unanimous consent that it be in order to submit a cloture motion on that matter at this time.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. BYRD. Mr. President, give time for objections, if I may say most respectfully to the Chair.

I will not object, but I do want to state for the record that the reason I am not objecting is that the majority leader can find various ways in which to get Radio Marti up if he wanted. So with all those weapons at his command, I see no need for his having to go through those motions, so I do not object.

Mr. BAKER. Mr. President, I thank the minority leader. He is absolutely correct. There is certainly more than one way to bring that matter back before the Senate for this purpose, but this is the quickest and cleanest way. I thank the minority leader for his statement.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

CLOTURE MOTION

The PRESIDING OFFICER. The clerk will report.

The legislative clerk read as follows:

CLOTURE MOTION

We, the undersigned Senators, in accordance with the provisions of rule XXII of the Standing Rules of the Senate, hereby move to bring to a close debate on the motion to proceed to the consideration of S. 602, an act to provide for the broadcasting of accurate information to the people of Cuba, and for other purposes.

Senators, Paula Hawkins, Steven D. Symms, Mack Mattingly, Slade Gorton, Lawton Chiles, James A. McClure, Jesse Helms, Gordon Humphrey, Jeremiah Denton, Paul Trible, Orrin G. Hatch, John P. East, Don Nickles, Paul Laxalt, Strom Thurmond, and Barry Goldwater.

Mr. BAKER addressed the Chair.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, under rule XXII, this vote would occur after a quorum call had established the presence of a quorum of Senators, with that quorum call to begin at 10:30 on Thursday morning. If cloture is not invoked on Wednesday, tomorrow, on the previous motion, it would be my intention to confer with the minority leader and see if we could find a more convenient time for that vote, but I will not do so at this moment.

FEDERAL SUPPLEMENTAL COMPENSATION ACT OF 1982

Mr. BYRD. Mr. President, will the majority leader yield to me for the purpose, which I have discussed with him already, of initiating the process under rule XIV of getting a bill on the calendar.

Mr. BAKER. Yes, I yield. Mr. President, the minority leader did speak to

me about this. He is master of the rules, and he certainly has the full opportunity to do this, which I acknowledge and appreciate.

Mr. BYRD. I thank the majority leader.

Mr. President, there is a message at the desk, a House message, H.R. 3409, on Federal supplemental compensation. I have been asked by a Senator to ask for the first reading of that measure.

The PRESIDING OFFICER. The clerk will report the bill.

The legislative clerk read as follows:

A bill (H.R. 3409) to amend the Federal Supplemental Compensation Act of 1982 with respect to the number of weeks of benefits paid in any State.

Mr. BYRD. Mr. President, I ask for the second reading of the bill.

The PRESIDING OFFICER. Is there objection?

Mr. BAKER. Mr. President, I object to further proceeding on the bill at this time.

The PRESIDING OFFICER. Objection is heard to the second reading of the bill on this day. The bill will remain at the desk pending second reading on the next legislative day.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I understand that the distinguished Senator from Vermont wishes to be recognized.

Mr. President, did I provide for a time in which Senators might speak in morning business?

The PRESIDING OFFICER. There is right now no order.

Mr. BAKER. Did I provide for a time for the transaction of routine morning business?

The PRESIDING OFFICER. There is currently no order for the transaction of routine morning business.

Mr. BAKER. I beg the Chair's pardon. I had a colloquy with the Senator from Ohio, who indicated he would not object. I then made the request that there be a period for the transaction of routine morning business.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, in any event, I now ask unanimous consent that there be a period for the transaction of routine morning business to go no longer than 4:30 p.m. in which Senators may speak for not more than 10 minutes each.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

TRIBUTE TO SENATOR RANDOLPH

Mr. STAFFORD. Mr. President, the Senator from Vermont understands that we are now in morning business. I hope that my dear friend and colleague of many years, Senator RANDOLPH, is listening and while I am talking may be able to get to the floor, because I had hoped he would be here. I thought he was present. He was a few minutes ago.

Mr. President, my very good friend and colleague, the most able Senator from West Virginia, Senator JENNINGS RANDOLPH, has justly won the respect and admiration of his colleagues in this body and in the other body, back at home and throughout the Nation during his entire public life. He has consistently put the needs of the Nation above partisan politics in working with and serving eight Presidents. It has been my extreme pleasure to have worked closely with Senator RANDOLPH. We currently serve together on three committees: Environment and Public Works, of which I am currently honored to be the chairman, and which he served as chairman for many, many years. It was under his leadership that I learned the routine of running a committee.

We have also served together on the Committee on Labor and Human Resources, and there we have been since 1971, when I came to the Senate—he as chairman and I as ranking minority member of the Subcommittee on the Handicapped.

We have served together on the Veterans' Affairs Committee since its creation.

Throughout his career, Senator RANDOLPH has helped to champion the cause of the blind, the disabled, the aged, the poor, and others who need a strong voice in Washington.

His list of accomplishments is long and impressive. Among them, he has authored the 26th constitutional amendment, giving 18- to 20-year-olds the right to vote.

I know how zealously and jealously he has guarded the blind vendor program, which was created by the Randolph-Sheppard Act.

He has authored the Appalachian Development Act and the Economic Development Act to provide increased employment opportunities and services for depressed areas.

It was under his leadership in the Subcommittee on the Handicapped that he and I developed what became Public Law 94-142, providing for equal education opportunity for all handicapped children.

Senator RANDOLPH is the only Member of the 98th Congress to have voted for the landmark social security law. Over the years, he has worked to strengthen this program, which touches the lives of almost every American family.

Senator RANDOLPH, to our personal sorrow, recently announced that he will not seek reelection in 1984. He certainly will be acutely missed in the Senate. Everyone wishes him well, because he has been a friend and a gentleman in his relations with all his Senate colleagues, whether they be Republicans, Democrats, liberals, or conservatives.

Mr. President, the May edition of the American Association of Retired Persons news bulletin contained a most deserved special feature on Senator RANDOLPH which describes his long and illustrious career in Congress. I ask unanimous consent that this article be printed in the RECORD as a small token of the affection and esteem in which the people of this Nation, as well as his colleagues in this body, hold him.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SENATOR RANDOLPH RECALLS ROOSEVELT'S NEW DEAL

(By Bill Crawford)

Depression, Recession. Coal mines. Hard work. Long hours on West Virginia's roller-coaster roads. Climbing. Stumping in the back country. Setbacks. Politics. Winning and losing elections. FDR's New Deal.

Jennings Randolph knows all about the vicissitudes of life.

The United States Senator from the Mountain State has "*served* four U.S. Presidents and *worked with* nine Presidents," he said, since 1933 when he came to Washington as a freshman in the House of Representatives.

At 81, Randolph is the only current member of Congress who was serving when the original Social Security legislation passed in 1935. He was elected to the House with the 1932 Roosevelt landslide. Randolph lost an election in 1947 and later joined Capital Airlines, where he became assistant to the president and director of public relations. He was elected to the Senate in 1958 and has served continuously since. Now he is looking toward retirement.

Roosevelt was Randolph's favorite President, and he likes to reminisce about the days of the New Deal and FDR. "Roosevelt couldn't walk, but he placed America on its feet," the Senator said of FDR, who was confined to a wheelchair.

Randolph vividly recalls one of FDR's trips to West Virginia. "It was at the Mountain State Forest Festival, and I told the President that our Governor (Guy Kump) and Sen. Mansfield Neely were bitter enemies. 'Just wait 'til I get both of them togther,' the President responded. Roosevelt told them that any split in the Democratic party would not be condoned, and he had them shake hands," the Senator recalled.

He also remembers the day he sold his car in 1933 so he would have enough money to live with his wife Mary, whom he had married only a week earlier. It was his first year in Congress and "times were hard," he said. A few years later, he recounted, he went to a Washington bank and told an executive that he needed to borrow $1,000—"but I don't have any collateral," he said. "Yes, you do," the banker retorted, "you've been elected to two terms in Congress."

In his early years as a Congressman, he saw even more of the First Lady, Eleanor Roosevelt, than he did of FDR. She was interested in helping with homestead projects for miners and became popular with West Virginians, who later named a new town El-

eanor. Calling her a "remarkable woman," Sen. Randolph recalled "going down into coal mines with her and square-dancing with her later that night."

"I'll never forget the night when I was driving Mrs. Roosevelt and Doris Duke back to Washington from West Virginia and we decided to stop for supper. I reached into my pocket and had only pennies. Here I am, I thought, with the First Lady of the United States and the richest girl in America and I have only pennies."

He solved the dilemma by slipping away during the meal and explaining the problem to the owner, who was an old friend. He mailed a check for the dinner the next day.

Before coming to Washington, Sen. Randolph was a newspaper editor in Clarksburg and a professor at Davis and Elkins College in Elkins, W. Va., where he later served as athletic director. "We beat West Virginia U. (7-0), and Navy (2-0) in football in the late '20s," he said with a smile.

Some of the Senator's "best accomplishments," he said, include:

Author of the 26th Amendment to the Constitution, which guaranteed 18-to-20-year-olds the right to vote.

Author of the Randolph-Sheppard Act in 1936, which created the Blind Vendor Program and paved the way for major legislation for the handicapped.

Author of the Appalachian Regional Development Act and Economic Development Act, which were passed in 1965.

He also served as chairman of the Senate Environment and Public Works Committee in 1966-71, and has a general record of achievements far too long to list here.

He recently announced that he is retiring after his current term, which ends in 1985. "There is a season and time for every purpose," Sen. Randolph told friends gathered for an 81st birthday party.

Mr. MOYNIHAN. Mr. President, even as the senior Senator from Vermont is the chairman of our committee and, in that sense, the greatest of our number, I am one of the least; but I think we might claim to be equals in our affection and regard for the man to whom the chairman, with his characteristic graciousness, refers in our proceedings as the chairman emeritus.

Senator RANDOLPH is everything Senator STAFFORD has said. He is not just a person whose long career reminds us that someone exceptional is in our presence, but also someone whose personal manner and sense of his Nation and of this body remind us of some things which may have diminished in the interval and what we may have lost and what we still continue, at least in a measure, to possess by his continued and invaluable presence.

I thank my chairman for his characteristic graciousness in what he has just said.

Mr. STAFFORD. I thank the distinguished Senator.

Mr. President, I am delighted that our chairman emeritus has been able to come to the floor. I yield the floor.

Mr. RANDOLPH. Mr. President, I was on a long-distance telephone call, responding to a constituent on some problems that he and others have in the lovely land in the hills of West Virginia.

The Senators from Vermont and New York are most generous in their words which are spoken as I begin our final 17 months in this forum—God willing—on this historic Hill.

I thank you, my friend and able Chairman. I shall not refer to the measures on our efforts except in this one instance.

You are one of a few Members of the Congress who pilots his own plane. You fly back and forth to Vermont, said to be the most rural of our States. By some criteria, West Virginia is classified as second. You and I and Senator MOYNIHAN—who has been very gracious, as always, in his comments—know that the aviation history of the United States, as well as the world, is being celebrated this year: the bicentennial of air and space.

It was my dream that we have an Air and Space Museum. In 1946, I authored the legislation which created what is now that popular museum, said to be the most visited in the world.

It was 30 years before we were able to open it—the land, the buildings, the aircraft, the spacecraft, all the exhibits.

Since July 4, 1976, as of the last count a few days ago, approximately 62.5 million men, women, and children came to that museum, on Independence Avenue, to marvel at the "flying" machines and thrill at the movies. We compress time in moving individually and carrying the messages across the far reaches of the Earth and the sky and into space.

It was only a few weeks ago that, for the first time in the history of humankind, through the gift of television, ABC—my son Jay works for NBC, and he will forgive me—in cooperation with those of our Republic and Germany and Comsat, worked out a plan by which, initially, we saw on a television screen the intrepid climbers scaling the heights toward the peak of Mount Everest.

Never before had that happened. We realized again how dependent we are on one another and as units of Government, because Katmandu and Nepal are a long way from New York, Vermont, or West Virginia. A signal was dropped over the Indian Ocean and the completed cycle permitted us the enjoyment and excitement of watching the climbers. That signal needed an Earth station. And where is that station? In a quiet valley of West Virginia, in Preston County in the little community of Etam and nearby Lennox. The discs rise 12 stories high, a part of this circle which brings, we hope, humankind closer together in the understanding of the need for peace among the peoples of this planet.

Yes, there are faraway places with strange sounding names, but the world must come closer together not only in science but in our hearts.

In the Senate there is the preparation for possible war. Our Nation must be strong, but the questing for peace must go forward. Mr. President, our two friends are stalwarts in hopefully bringing to passage the National Academy for Peace.

We have 54 sponsoring Senators working to bring the bill to the floor. It has been reported from the committee on which the Senator from Vermont and I serve by a vote of 11 to 6. We hope the bill can pass before this Congress ends the present year.

Thanks, Senator STAFFORD, thanks, Senator MOYNIHAN.

We share—all of us—heavy responsibilities and also cherished opportunities in this body. Regardless of political labels, we work together with our cooperative and constructive chairman of the Environmental and Public Works Committee.

I recall Senator MOYNIHAN's helpful visits to our State. Next Tuesday evening I will be speaking up in New York State at Houghton College.

Mr. President, I am thankful I can be a Member of the Senate.

I shall leave, of course, on January 4, 1985 as our beloved majority leader, HOWARD BAKER, will leave. I shall remember most the kind, considerate, and cooperative spirit of my colleagues.

Mr. BUMPERS. Mr. President, first of all, I will not add my voice to those of Senator MOYNIHAN and Senator STAFFORD at this moment. When I get ready to deliver an encomium to my distinguished colleague from West Virginia I would want an hour or two of reserved time to say all the things I wish to say about him, for a host of reasons, not the least of which is that we roomed together on the same floor of the Dirksen Building for many years. He was a great supplier of an inexhaustible supply of popcorn to everyone on the floor, and I will always remember him for that as well as his legislative achievements. But at the proper time I certainly will add my voice to those that have already been heard here today.

COAL LEASING MORATORIUM AMENDMENT

Mr. BUMPERS. Mr. President, the majority leader has indicated that we are not going to get to the Interior appropriations bill and that this is probably going to have to be put over unless some disposition can be made of the provision in the bill dealing with the Washington Public Power issue.

If and when that issue is presented, Senator JACKSON and I intend to offer an amendment, as we have previously, declaring a moratorium on coal leasing on Federal lands. This amendment will

be slightly different from the one we offered previously and by which we lost by 3 votes. This amendment will be in keeping with a provision that is in the supplemental appropriations bill which requires Secretary Watt to appoint a commission. I must say I would be suspicious of any Commission Secretary Watt would appoint, but, nevertheless, he will be under mandate by law to appoint a commission that is charged with the responsibility of coming back with a set of guidelines for the coal leasing program, dealing, not only with determining which lands should be leased but also with determining how the Government can be sure it will get fair market value for the coal it does sell.

Senators all know that the General Accounting Office has said that the last lease sale of 1.6 billion tons of coal held by Secretary Watt cost the American taxpayers almost $100 million. That is, the lease sale failed by nearly $100 million to bring the fair market value.

So, all Senator JACKSON and I are proposing—and it does not seem like very much to me—is that the Commission report within 6 months after it is appointed, that the Commission report be forwarded to Congress, and that Congress be given 90 days in which to review the recommendations.

There is no mandate under expedited procedures for Congress to act in order for leasing to resume. The amendment simply provides the Congress with 90 days in which to review the report. If it is satisfactory, obviously the coal leasing can go forward. If it is not, Congress can do whatever it sees fit to do. I hope that at some point, maybe before we get out, if not shortly after we come back from our recess, we can get back to the Interior bill, and Senator JACKSON and I can be heard and the matter debated once again.

It is not the most exotic issue in the world, but it is one that is very important.

Mr. President, this morning's New York Times has an excellent editorial entitled "Cool the Fire Sales in Public Coal." The New York Times has taken Mr. Watt to task about his decision to lease at least another 10 billion tons of coal before he leaves office when we have a 172-year supply of coal under lease right now at current production rates from Federal leases.

Mr. President, I ask unanimous consent that that editorial and an editorial that appeared in Saturday morning's Hartford Courant entitled "Moratorium on Coal Leasing," be printed in the RECORD.

[From the New York Times, Aug. 2, 1983]

MISPLACED ENERGY—COOL THE FIRE SALES IN PUBLIC COAL

With coal in glut, and billions of tons of Federal coal still under lease to mining companies, there is no reason to rush the Interior Department's peddling of more leases to coal on Federal lands. Yet Interior Secretary James Watt proposes to auction off an additional 17 billion tons over the next 15 months.

Congress has sufficient doubts about Mr. Watt's program that it recently ordered him to appoint a commission to examine the coal-leasing program. The House has also ordered a suspension of coal leasing until the commission reports. The Senate ought to do the same.

The commission's first task is to weigh the General Accounting Office's finding—which Mr. Watt disputes—that last year's sale of coal leases in the Power River Basin netted roughly $100 million less than fair market value. If so, the bidding procedure needs to be seriously revised.

Mr. Watt contends that the bonus bids paid for leases are trivial compared with the royalty payments when coal is mined; thus the public's interest is to get as much coal into production as possible. There is something to this argument, but not a lot. The bonus bids are cash in hand, which makes them more important than distant royalties. They also represent the Government's only means of capturing the premium value of one tract over another.

The commission should also establish a clear procedure for selecting the tracts put up for lease. With so much coal to choose from, it is hard to see why Mr. Watt's department can only select land of high environmental value. The Utah sale planned for next February includes five tracts near the borders of the Bryce Canyon National Park and 10 in national forests. The next sale, in New Mexico's San Juan basin, will lead to the destruction of some 2,500 sites containing dinosaur fossils and 1,500 archeological sites of the Anasazi Indians.

The coal industry mined 100 million tons of Federal coal last year, and has 18 billion tons under lease. It can well afford to hold its breath for a few months while some order is imposed on Mr. Watt's furious fire sales.

[From the Hartford Courant, July 30, 1983]

MORATORIUM ON COAL LEASING

Interior Secretary James G. Watt remains characteristically unrepentant after charges he leased federal coal at bargin-basement prices to companies that might have had inside knowlege about the leasing program last year.

He plans four more sales, involving more than 10 billion tons of coal, during the coming fiscal year, despite the depressed coal market. The proposed sales raise many serious environmental questions, but even the economics argue againt rushing headlong into getting rid of more resources now.

If the sales take place, taxpayers will likely lose hundreds of millions—perhaps billions—of dollars that might otherwise go to the federal treasury if the coal were held until the market improves.

Congress should prevent Mr. Watt from dumping more of the coal resource, at least until a recently appointed blue-ribbon commission completes its review of this department's leasing procedures and makes its recommendations to Congress. The commission is supposed to present a report in six months.

The House, as part of the appropriations process, has already voted to defer further coal leasing to allow the commission to do its work. The Senate should do the same when it considers Interior's appropriations bill, probably within the next few days.

If the Interior secretary can't learn from his own mistakes, the least Congress can do is prevent Mr. Watt from repeating them.

JAPAN'S IMPORT STRATEGY

Mr. PERCY. Mr. President, one of the most frequently discussed foreign trade topics in Congress is the trade deficit we have with Japan. Certainly the $20 billion trade deficit expected for this year is cause for concern. American companies want to be able to sell more of their products and services in Japan, but have been met, in many instances, with nontariff barriers and a decided preference for products made in Japan.

As the free world's second largest economy, Japan has become an economic marvel around the world. Many countries, including our own, seek to borrow pages from Japan's book of economic growth.

In the past several years, we have been seeking to impress upon Japan the need to provide broader access for foreign companies to its domestic markets. A number of tariffs have fallen in the past several years which have encouraged us to believe that Japan is on the road to lowering barriers.

We recently had another confirmation of this when Japan's Ministry of International Trade and Industry (MITI) announced that it would begin emphasizing the importance of imports rather than exports.

On June 16, the Christian Science Monitor carried an article from Tokyo on this shift in policy at MITI. I applaud this change at MITI and think that it is a very strong signal to this country and other major exporters that Japan is serious about improving market access. This is a very positive report to hear from Tokyo and I wish to bring it to my colleagues' attention.

Mr. President, I ask unanimous consent that the article from the Monitor by Geoffrey Murray be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Christian Science Monitor, June 16, 1983]

JAPAN ADOPTS STRATEGY FOR IMPORTS

(By Geoffrey Murray)

TOKYO.—Japan's powerful Ministry of International Trade and Industry will stress imports rather than exports from now on to remove its "notorious" image overseas, the ministry's new head has promised.

"The main problem now is how to increase imports, and further market-opening measures may have to be considered," said Sosuke Uno, in his first interview since assuming the MITI post last Friday.

In the first ministerial change of the seven-month-old government of Prime Minister Yasuhiro Nakasone, Mr. Uno replaced Sadanori Yamanaka, who resigned reportedly because of health problems.

A prisoner of war in Siberia, Uno returned from Russian captivity to enter local poli-

tics. He stepped onto the national scene in 1960. Previous Cabinet appointments included a stint as MITI vice-minister from 1966 to 1968.

Would he become as controversial a figure at MITI as his predecessor? Smiling, Mr. Uno said firmly: "Yes. There are a lot of characters in the Nakasone faction [of the LDP, to which both men belong]. We had been on the sidelines a long time."

Nevertheless, Uno, in his first public utterances as MITI minister, has not repeated the charges made by Mr. Yamanaka that Japan's trading partners in the West are making Tokyo a "scapegoat" for their economic problems and lack of competitiveness in the world market. "Trade frictions have some psychological aspects," he said gently.

With a trade war still a possibility—especially with a record trade surplus in prospect this year—MITI would conduct thorough discussions with its counterparts abroad about thorny issues, Uno pledged.

He said Prime Minister Nakasone had asked him to pursue the goals of stimulating the domestic economy, developing harmonious trade with other countries and promoting Japan's international role in an era of global economic interdependence.

Uno promised that under his stewardship "notorious MITI" would do its best to maintain cooperative ties with Japan's trading partners for sustained economic growth without inflation.

A few days before Yamanaka's resignation, government sources said the emphasis at MITI would now be switched from traditional export promotion, including financial support, to creating opportunities for more imports of foreign manufactured goods.

As the longtime ally of Nakasone, Uno is seen by political analysts here as likely to play an important role in promoting the premier's program for revitalization of the Japanese economy to reverse the depressed demand that is harming the import market.

Other countries should be left in no doubt of Japan's determination to reflate the domestic economy and make a major contribution to beating global recession, Uno said.

MR. GENNADY KHASIN AND SOVIET JEWRY

Mr. HATCH. Mr. President, due to my deep concern for Soviet Jews, who are systematically discriminated against and severely persecuted in the Soviet Union, I am "adopting" Mr. Gennady Khasin, a professor of math, a Hebrew teacher, and long-term "refusenik." Mr. Khasin first applied to emigrate in 1976 but was refused for reasons of "state interest." Gennady and his wife Natasha have both lost their jobs as a result of applying to emigrate. Adding insult to injury, Mr. Khasin has been threatened with prosecution for "parasitism" because he is unemployed. The Khasins have been subject to severe harassment by the KGB, including repeated searches of their home and confiscation of Hebrew language books, personal letters, a tape recorder, and Natasha's emigration invitation from Israel as well as some of her daughter's personal belongings.

In spite of all of this, Gennady and Natasha have remained activists. Natasha maintains contact with a group called Prisoners of Conscience, filling in for Ida Nudel, who is currently living in exile. In December 1982, the Khasins were informed by Soviet officials that they need never apply to emigrate again, because their refusals were considered permanent and irrevocable. Even if this dire announcement had not been made, Gennady Khasin would have very little hope because his mother, Adela, who was his only relative living in Israel and therefore the only person able to send him the needed invitation to emigrate, died last month.

In April of this year, Gennady was summoned for reserve duty—even though he has never served in the army before and is now beyond the age of military service. Since reserve duty is usually served only by high-ranking officers, there is speculation that this represents a new form of harassment. Another Jewish activist, Lev Elbert, was recently sentenced to 1 year in a labor camp for refusal to serve.

Mr. President, I believe it is clear that the Khasins—like thousands of Soviet Jews who have applied to emigrate—are living under intolerable conditions. If there is any hope for Soviet Jews and others who are being persecuted by Soviet officials for their religious beliefs, it is that U.S. policymakers will not forget them. It is imperative that we raise the issue of Soviet Jewry with Soviet leaders every chance we get. We must convince them that we consider their treatment of Soviet Jews a fundamental stumbling block on the road to improved relations between our two countries.

For the benefit of my colleagues, I would like to insert an article in the RECORD from the New York Times about Soviet Jewish emigrés in Israel who deny the Soviets' claim that almost all Jews who wish to emigrate have done so.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the New York Times, June 14, 1983]

EMIGRES IN ISRAEL DENY SOVIET CLAIM: THEY TELL OWN STORIES TO SHOW THAT RELATIVES LEFT BEHIND ARE STILL SEEKING TO GO.

(By David K. Shipler)

JERUSALEM, June 13.—A group of Jewish émigrés whose parents, children and friends have been blocked from leaving the Soviet Union gathered today in Jerusalem to rebut a recent Soviet contention that almost all Jews who wished to emigrate had done so.

The assertion, made in a Moscow news conference last week by a member of the officially backed Anti-Zionist Committee, has caused indignation in the émigré community. The Israel Public Council for Soviet Jewry lists 2,240 émigrés as having a total of 8,000 relatives who want to leave, according to Ruth Bar-On, council spokesman.

"We believe it is perhaps three times more," she said.

The Soviet Anti-Zionist Committee, made up of well-known Jews, was formed six weeks ago in apparent response to international criticism over the virtual cutoff of Jewish emigration. The number of Jews leaving the Soviet Union dropped to 2,688 in 1982, from a high of 51,320 in 1979. There are about 1.8 million Jews in the Soviet Union.

EMIGRATION GENERALLY RESTRICTED

The emigration of Soviet citizens in general is restricted, but permission has been granted to substantial numbers of Jews, ostensibly to reunify families separated by World War II.

At the Moscow new conference, one of the committee members, Samuil L. Zivs, a jurist, said those Jews "who wanted to leave have left the country."

The Israeli group that gathered today rebutted the assertion by telling their own stories. There were 10 of them, each with two or more people left behind, and they spoke somberly, often choking back tears. There was none of the wit and merriment that ran through gatherings of would-be émigrés in Moscow in the 1970's, none of the sardonic humor that used to keep them afloat.

"My letters don't get there, their phone is cut off," said one of the émigrés, Fanya Gorenshtein. "We can't do anything. It's very hard, very hard. We have no hope anymore."

Her daughter, Etalina Godyak, a piano teacher, has been refused an exit visa since 1979. The daughter's husband is a physicist. Their 10-year-old son, Anton, was killed at a Moscow school in November 1980, when an older boy hit him on the back of the neck with a karate blow, Mrs. Gorenshtein said.

SEPARATION PAINFUL FOR PARENTS

For aging parents, the separation has been painful. Asya Plashchanka, who came to Israel in 1977, left her daughter, Natalya Rozenshtein and her son-in-law, Grigory Rozenshtein, and her two grandsons. Mr. Rozenshtein, a computer specialist, has been repeatedly refused emigration since 1974 and has been placed under house arrest from time to time.

The older grandson, Mikhail, 21, has been threatened with prosecution for refusing army service, despite a deferment as a medical student, Mrs. Plashchanka said.

"It is the fourth generation of my family to suffer," she said. "In '37 my parents were arrested, my father was shot. I am the only daughter, and I was left alone at the age of 16. As a daughter of an 'enemy of the people,' I couldn't get a job, they threw me out everywhere. Now my daughter and her husband. Now my grandchildren. Perhaps their children as well. So Jewish history in the Soviet Union is not yet closed."

PLAGUED WITH DEEPENING DOUBT

Parents, many in their 60's, are plagued by the deepening doubt that they will ever see their children again.

Vinya Belkina's 34-year-old son, Yakov Rakhlenko, and his wife and daughter, have been waiting in Moscow since 1972 for permission to emigrate. He worked as a fitter.

Rika Kulbak's son, Emmanuil Lurye, a 44-year-old chemist, got his visa, but he was taken off the plane Feb. 15, 1980, and she and her husband came on without him. Appeals on his behalf have been made by American scientists, to no avail.

Vanda Osnis's only son, Marat, a computer engineer, has been waiting since 1972. He has a wife and a child. Having lost his job, he now gives physics and mathematics lessons privately to earn some money, she said.

"They don't receive my letters; I don't receive theirs," Mrs. Osnis said. "For more than six years, I haven't received a photograph."

They have occasional guarded conversations on the telephone.

CHILDREN LEFT PARENTS BEHIND

There are some cases of children who made it out, and parents who did not. Igor Tufeld, a student at Hebrew University, said that his mother and father, both with health problems, had been refused visas repeatedly since 1977. They have never seen his wife, whom he met in Israel, nor have they seen his son, their grandson. Mr. Tufeld speaks with them by phone.

"They told me they're really depressed," he said. "They are just two sick people."

Similarly, Bella Khomak's parents are living in Kishinev, in Soviet Moldavia. They all applied together in 1977, but her father, who used to work in an office that distributed electrical equipment, was refused a visa. Mrs. Khomak, who was divorced, came ahead to Israel with her daughter.

Freda Shkolnik's husband, Itskhak, has been released after seven years in prison for anti-Soviet agitation and espionage for the Israelis, but no prospect of his emigration is in sight. She and his daughter, now 16, came without him.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

ANNUAL REPORT OF THE NUCLEAR REGULATORY COMMISSION—MESSAGE FROM THE PRESIDENT—PM 71

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Environment and Public Works:

To the Congress of the United States:

I transmit herewith the Eighth Annual Report of the Nuclear Regulatory Commission as required by Section 307(c) of the Energy Reorganization Act of 1974 (42 U.S.C. 5877).

The report covers fiscal year 1982, with occasional treatment of events occurring after that period.

RONALD REAGAN.

THE WHITE HOUSE, *August 2, 1983.*

MESSAGES FROM THE HOUSE

At 9:56 a.m., a message from the House of Representatives, delivered by Ms. Goetz, one of its reading clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1646. An act to amend the Railroad Retirement Act of 1974 and the Railroad Retirement Tax Act to assure sufficient resources to pay current and future benefits under the Railroad Retirement Act of 1974, to make technical changes, and for other purposes; and

H.R. 3394. An act to provide additional authority for the consolidation of student loans and to make certain other changes in Federal student financial assistance.

The message also announced that pursuant to section 4(a) of Public Law 96-114, as amended by Public Law 98-33, the Speaker appoints as additional members of the Congressional Award Board the following: Mr. A. J. F. O'Reilly of Pittsburgh, Pa; Dr. Juanita Kreps of Durham, N.C.; Mr. Christopher F. Edley of New York, N.Y., and Dr. Henry Viscardi, Jr., of Albertson, N.Y.; and Mr. Douglas A. Fraser of Northville, Mich., for the remainder of the term of Ms. Dinah Shore; and that pursuant to section 4(a) of Public Law 96-114, as amended by Public Law 98-33, the minority leader appoints as additional members of the Congressional Award Board the following: The Honorable Gerald R. Ford of Rancho Mirage, Calif.; Mr. Curtis L. Carlson of Minneapolis, Minn.; Mr. Allen H. Neuharth of Rochester, N.Y.; and Mr. C. William Verity, Jr., of Middletown, Ohio.

At 2:11 p.m., a message from the House of Representatives was delivered by Mr. Berry, one of its reading clerks, announced that the Speaker had signed the following enrolled bills and joint resolution:

S. 272. An act to improve small business access to Federal procurement information.

S. 930. An act to authorize the Smithsonian Institution to purchase land in Santa Cruz County, Ariz.

H.J. Res. 338. Joint resolution to correct Public Law 98-63 due to an error in the enrollment of H.R. 3069.

The bills and joint resolution were subsequently signed by the President pro tempore (Mr. THURMOND).

At 3:18 p.m., a message from the House of Representatives was delivered by Ms. Goetz, one of its reading clerks, announced that the House agrees to the amendments of the Senate to the bill (H.R. 2355) to establish an emergency program of job training assistance for disabled veterans and veterans of the Vietnam era, with amendments, in which it requests the concurrence of the Senate;

The message also announced that the House has passed the following bill, with an amendment, in which it requests the concurrence of the Senate:

S. 64. An act to establish the Irish Wilderness in Mark Twain National Forest, Mo.

The message further announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1556. An act to authorize the conveyance of the Liberty ship *John W. Brown;* and

H.R. 3564. An act to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and to the 1985 crop wheat and feed grain programs.

The message also announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 40. Concurrent resolution expressing the sense of the Congress that the Federal Government should maintain current efforts in Federal nutrition programs to prevent increases in domestic hunger.

The message further announced that pursuant to section 4(a) of Public Law 96-114, as amended by Public Law 98-33, the Speaker appoints as a member of the Congressional Award Board: Mr. Joseph J. Gouthro of Atlantic Highlands, N.J., vice Mr. A. J. F. O'Reilly of Pittsburgh, Pa.

HOUSE MEASURE REFERRED

The following bill was read the first and second times by unanimous consent, and referred as indicated:

H.R. 1556. An act to authorize the conveyance of the Liberty ship John W. Brown; to the Committee on Commerce, Science, and Transportation.

HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 40. Concurrent resolution expressing the sense of the Congress that the Federal Government should maintain current efforts in Federal nutrition programs to prevent increases in domestic hunger; to the Committee on Appropriations.

ENROLLED BILLS PRESENTED

The Secretary reported that on today, August 2, 1983, he had presented to the President of the United States the following enrolled bills:

S. 272. An act to improve small business access to Federal procurement information; and

S. 930. An act to authorize the Smithsonian Institution to purchase land in Santa Cruz County, Ariz.

REPORT OF COMMITTEES

The following reports of committees were submitted:

Mr. LAXALT, from the Committee on Appropriations, without amendment.

S. 1721. An original bill making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1984, and for other purposes (Rept. No. 98-206).

Mr. MATHIAS, from the Committee on Governmental Affairs, with amendments.

S. 1625. A bill to amend the District of Columbia Retirement Reform Act.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. ROTH, from the Committee on Governmental Affairs: James Brian Hyland, of Virginia, to be Inspector General, Department of Labor.

Mr. PACKWOOD. Mr. President, as in executive session, I report from the Committee on Commerce, Science, and Transportation, favorably a nomination list in the Coast Guard which appeared in its entirety in the CONGRESSIONAL RECORD of August 1, 1983; and, to save the expense of reprinting them on the Executive Calendar, I ask that they lie on the Secretary's desk for the information of Senators.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. LAXALT:

S. 1721. An original bill making appropriations for the Departments of Commerce, Justice, and State, the Judiciary, and related agencies for the fiscal year ending September 30, 1984, and for other purposes; from the Committee on Appropriations; placed on the calendar.

By Mr. HATCH (by request):

S. 1722. A bill to repeal the Community Services Block Grant Act, and for other purposes; to the Committee on Labor and Human Resources.

By Mr. MATTINGLY:

S. 1723. A bill to redesignate the United States Trade Representative as the President's Representative for Trade Negotiations, and for other purposes; to the Committee on Finance.

By Mr. DOMENICI:

S. 1724. A bill to designate the Federal Building in Las Cruces, New Mexico as the "Harold L. Runnels Federal Building."; to the Committee on Environment and Public Works.

By Mrs. HAWKINS:

S. 1725. A bill to amend the Immigration and Nationality Act respecting powers and procedures in immigration emergencies, and for other purposes; to the Committee on the Judiciary.

By Mr. EAGLETON (for himself, Mr. HUDDLESTON, Mr. ZORINSKY, Mr. BOREN, Mr. SARBANES, and Mr. BAUCUS):

S. 1726. A bill to authorize the Secretary of Agriculture to purchase stored commodities from producers under certain circumstances; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. McCLURE (for himself, Mr. GARN and Mr. ARMSTRONG):

S. 1727. A bill to amend the Food Stamp Act of 1977 to reform and reduce the cost of administering the food stamp program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. KENNEDY (for himself, Mr. ANDREWS, Mr. HEINZ, Mr. SARBANES, Mr. HOLLINGS, Mr. RIEGLE, Mr. MATSUNAGA, Mr. CRANSTON, Mr. TSONGAS, Mr. GORTON, Mr. METZENBAUM, Mr. SPECTER, and Mr. INOUYE):

S. 1728. A bill to provide for the establishment of a National Task Force on Organ Procurement and Transplant Reimbursement; to the Committee on Labor and Human Resources.

By Mr. NUNN (for himself, Mr. MATTINGLY, Mr. BUMPERS, Mr. CHILES, Mr. DECONCINI, Mr. HEFLIN, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. LEVIN, Mr. MOYNIHAN, Mr. RANDOLPH, Mr. ZORINSKY, Mr. D'AMATO, Mr. ABDNOR, Mr. DURENBERGER, Mr. EAST, Mr. GOLDWATER, Mr. HATFIELD, Mr. HELMS, Mr. KASTEN, Mr. LAXALT, Mr. PERCY, Mr. TOWER, Mr. THURMOND, Mr. BOREN, Mr. BENTSEN, and Mr. INOUYE):

S.J. Res. 142. Joint resolution designating the week of October 3 through October 9, 1983, as "National Productivity Improvement Week."; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HATCH (by request):

S. 1722. A bill to repeal the Community Services Block Grant Act, and for other purposes; to the Committee on Labor and Human Resources.

REPEAL OF THE COMMUNITY SERVICES BLOCK GRANT ACT

● Mr. HATCH. Mr. President, today by request of the administration I am introducing legislation to end the separate authorization of the community services block grant. Many of the functions of the community services block grant program are served by the social services block grant program, and therefore, it makes sense to consolidate these functions and the requisite funding under one program. The Department of Health and Human Services is proposing in separate legislation an enhancement of the social services block grant authorization to account for community services functions that are not now included in this block grant.

The community services block grant and the social services block grant were both passed as part of the Omnibus Reconciliation Act of 1981. These two programs were components of President Reagan's first New Federalism initiative. They were designed to replace highly restrictive categorical grant programs with broader block grant programs that would allow the States greater flexibility in meeting the needs for social and community services. States have varying populations with varying needs and varying concepts on how these needs should be met, and it is only reasonable to give the States the latitude to accommodate these differences. Also, over the past 20 years there has been a substantial improvement in both the administrative and technical capacities of the States to establish and coordinate social programs.

However, it is true that when the community services block grant was enacted in 1981, the States had no specific experience in operating the community services programs. These programs had heretofore been administered by a separate Federal agency that has since passed from the scene. Consequently, an array of restrictions were included in the community services block grant authorization to protect existing grant recipients and to insure that certain specific functions would be performed. This October, the States will have had 2 years of experience with the community services block grant and the community services programs. Therefore, it is time to ease the restrictions so that the States can use their experience to improve the services that are provided the elderly and the needy. This legislation that the administration is proposing and I am introducing today is designed to accomplish this end.●

By Mr. MATTINGLY:

S. 1723. A bill to redesignate the U.S. Trade Representative as the President's Representative for Trade Negotiations, and for other purposes; to the Committee on Finance.

(The remarks of Mr. MATTINGLY and the text of the legislation appear earlier in today's RECORD.)

By Mr. DOMENICI:

S. 1724. A bill to designate the Federal building in Las Cruces, N. Mex., as the "Harold L. Runnels Federal Building"; to the Committee on Environment and Public Works.

HAROLD L. RUNNELS FEDERAL BUILDING

● Mr. DOMENICI. Mr. President, I am rising today to introduce legislation to name the Federal building in Las Cruces, N. Mex., as the Harold L. Runnels Federal Building. Former Congressman Runnels served in the House of Representatives for 10 years and was a popular and respected Representative of the people of New Mexico.

Harold Runnels was elected to his first term in 1970. Over the 10 years of his service, he distinguished himself as a fiscal conservative who called for fiscal restraint long before others in the Congress were worried about budget deficits.

Harold Runnels served the people of New Mexico well. His basic philosophy was to work with all groups to arrive at a final understanding that would be supported by all involved. His unique ability to bring divergent interests together earned him the respect of New Mexicans.

Regrettably, Congressman Runnels died of a terminal illness almost 3 years ago, on August 5, 1980. The memory of his good work remains with the people of New Mexico, and it is a fitting tribute to name the Federal building in Las Cruces in his memory.

Mr. President, it is my hope that the Senate might act swiftly on this bill, and I request that the text of the legislation appear at this point in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1724

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the building located at 200 Grigg Street, Las Cruces, New Mexico, known as the Federal Building, shall hereafter be known and designated as the "Harold L. Runnels Federal Building". Any reference in a law, map, regulation, document, record, or other paper of the United States to that building shall be deemed to be a reference to the "Harold L. Runnels Federal Building".●

By Mr. EAGLETON (for himself, Mr. HUDDLESTON, Mr. ZORINSKY, Mr. BOREN, Mr. SARBANES, and Mr. BAUCUS):

S. 1726. A bill to authorize the Secretary of Agriculture to purchase stored commodities from producers under certain circumstances; to the Committee on Agriculture, Nutrition, and Forestry.

MORE NEEDS TO BE DONE TO PROTECT FARMERS FROM WAREHOUSE BANKRUPTCIES

● Mr. EAGLETON. Mr. President, on a number of occasions, the Senate has considered and approved legislation to revise the bankruptcy laws to assist farmers who unfortunately find their grain tied up in a warehouse bankruptcy action.

Although changes in the bankruptcy laws are clearly necessary, in my opinion they do not go far enough. In situations where the assets of the warehouse are less then its indebtedness or where a shortage of grain exists, even if the proposed changes in the bankruptcy law are enacted, the farmers involved would still suffer unacceptable financial losses. No matter what change is made in the bankruptcy law, it would not protect farmers in such situations. I have been particularly interested in what is happening with federally licensed warehouses and those warehouses with uniform grain storage agreements with the Federal Government. When a farmer stores his grain in one of these warehouses which has an implicit stamp of approval of the Federal Government on it, he should feel confident that his grain is safe. Unfortunately, that is not necessarily so.

I would like to bring to the attention of my colleagues a report that has just been issued by the General Accounting Office on this very subject. Back in 1981, GAO made some very specific suggestions as to actions the Department of Agriculture should take to improve the inspection and financial review of grain warehouses. GAO believed that if their suggestions were implemented, the chances of detecting warehouses which were experiencing financial difficulties and which had the potential of going bankrupt would be improved. GAO was convinced USDA could better their preventive efforts and, therefore, reduce the incidence of warehouse bankruptcies.

The most recent GAO review, completed at my request, looked specifically at what USDA has done to improve its inspection program and implement the GAO recommendations. After a yearlong review, GAO has concluded that the grain warehouse industry's financial problems have not lessened, that the Department has reduced the number of warehouse examination hours expended and the frequency rate of warehouse examinations, and, finally, that the financial reporting requirements for federally examined warehouses are inadequate to insure a thorough review of a warehouse's financial condition.

Mr. President, what GAO has found is that the USDA is still doing far from the maximum it could to prevent warehouse bankruptcies. It is appalling to me that when it would be so easy to improve their reviews and improve their financial reporting requirements in order to help prevent bankruptcies before they happen, USDA has not done so.

Mr. President, it is high time that the Department of Agriculture take the issue of warehouse bankruptcies seriously. The GAO found that there were 23 bankruptcies amongst warehouses with USDA uniform grain storage agreements in 1982. In the first 2 months of 1983, seven more warehouses with agreements went bankrupt. Needless to say, this is not a sterling record.

I am today introducing legislation similar to what I proposed last year which would give the Secretary of Agriculture additional authority to assist farmers caught up in grain warehouse bankruptcies. Since the Secretary is apparently reluctant to take the steps necessary to help prevent bankruptcies in the warehouses USDA licenses and inspects, I believe it is incumbent upon him to assist farmers who are caught up in such bankruptcies.

Two major changes have been made to the bill compared with how it read last year. First, the Secretary would now be required to provide assistance to producers who wanted it rather than it being at his discretion to do so and, second, under this legislation the Secretary could make payment to farmers in either cash or commodities as opposed to just cash.

I ask unanimous consent that the digest of the General Accounting Office report and a copy of the bill be printed in the RECORD.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

FOLLOWUP ON ACTIONS NEEDED TO PROTECT DEPOSITORS AT FEDERALLY EXAMINED GRAIN WAREHOUSES

DIGEST

The Department of Agriculture administers a voluntary licensing and examination program for warehouses storing agricultural commodities under the U.S. Warehouse Act. The Department's Agricultural Marketing Service (AMS) administers the program to ensure that producers and the Federal Government have safe storage facilities. It also sets requirements for and examines warehouses storing commodities owned by the Commodity Credit Corporation (CCC) or pledged to CCC as loan collateral.

On June 19, 1981, GAO issued a report entitled "More Can be Done To Protect Depositors at Federally Examined Grain Warehouses" (GAO/CED-81-112) which recommended that the Secretary of Agriculture make changes to the Department of Agriculture's warehouse examination and financial data review procedures to provide increased protection to depositors at grain warehouses. The report estimates that as many as 300 of the 6,400 warehouses then subject to Federal examination may have been financially unsound.

The Ranking Minority Member, Subcommittee on Agriculture, Rural Development, and Related Agencies, Senate Committee on Appropriations, asked GAO to provide updated information on (1) actions taken by Agriculture to implement GAO's recommendations, (2) the impact of the fiscal year 1983 budget on the Department's ability to improve its inspection activities, and (3) the extent of financial problems in the grain warehouse industry.

Actions taken on previous GAO recommendations

GAO's 1981 report found that the development and use of a reliable formula for predicting warehouses that may go bankrupt in the foreseeable future would make the Federal warehouse examination program more effective. Accordingly, GAO recommended to the Secretary of Agriculture that appropriate action be taken.

As a result, the Department is in the process of developing a predictive formula to help identify grain warehouses in danger of bankruptcy, as GAO recommended.

In response to GAO recommendations calling for stricter financial reporting requirements, AMS and CCC amended their regulations effective July 1, 1982. AMS regulations now require that financial statements be prepared in accordance with generally accepted accounting principles and that they be audited by an independent certified public accountant. AMS regulations also provide that financial statements may be audited or reviewed by independent public accountants but will be accepted with the understanding that the warehouse will be subject to an onsite examination and audit by the Secretary.

In contrast, CCC regulations provide that financial statements may be accompanied by either a report of audit or review conducted by an independent certified public accountant or by an independent public accountant or with a compilation report.[1] CCC procedures provide that financial statements not audited by a certified public accountant may be subject to an examination by the Secretary. (See p. 8.)

GAO believes that because review reports and compilation reports do not contain an accountant's opinion, the reports do not provide the Department with sufficiently reliable financial information on ware-

[1] A compilation report is management's representation of the financial statement. No auditing or reviewing has been done and, accordingly, no opinion or any other form of assurance is given.

houses. A review may bring to the accountant's attention significant matters affecting the financial statements, but it does not provide assurance that the accountant will become aware of all significant matters that would be disclosed in an audit. Further, in a compilation report, the accountant does not express any opinion on the financial statements. An audit, on the other hand, is a critical examination of the accounting records by a public accountant. Through an evaluation of the company's system of internal controls, inspection of documents, observation of assets, and other accounting procedures, the accountant will gather evidence necessary to express an opinion on the fairness of the company's financial statements.

Financial statements audited by independent certified public accountants or independent public accountants, although more costly, would provide the Department and depositors at federally examined grain warehouses with greater assurance that the warehouses' financial statements are reliable. The audited statements are reliable. The audited statements would provide depositors with a better indication as to the warehouses' financial condition. (See p. 9.)

Recommendation to the Secretary of Agriculture

Although the Department has amended its warehouse financial reporting regulations since the June 1981 report, GAO recommends that the Department revise its regulations to require that federally examined warehouses submit annual financial statements accompanied by an audit report prepared by an independent certified public accountant or independent public accountant. (See p. 10.)

Extent of financial problems at grain warehouses

GAO concluded that the industry's financial problems have not lessened. For example, the number of warehouses that have filed for bankruptcy or liquidated increased from 14 in 1980 to 23 in 1982. Further, of the 19 warehouses identified in GAO's June 1981 report that met GAO's criteria for being in financial trouble, only 8 were still in operation under the same owner. (See p. 13.)

Impact of fiscal year 1983 budget on inspection activities

The Department has reduced the number of examination hours expended and the frequency rate of warehouse examinations. However, Department officials stated that the funds available in the fiscal year 1983 budget was not a factor in its reduction decision because warehouses would be responsible for all or part of the examination cost. (See p. 18.)

Department officials also stated that the July 1, 1982, changes to the financial reporting requirements would provide them with additional financial information on warehouses. They believe that the additional information would make it possible to reduce the frequency of examinations needed to determine warehouses' financial condition.

GAO believes that the reduction in the frequency of warehouse examinations was premature considering the current financial condition of the grain warehouse industry and the lack of a predictive formula to be used for establishing priorities and frequencies of examinations. GAO also believes that any reductions in the frequency of warehouse examinations should not have been made until its recommendations regarding financial reporting requirements and the development of a predictive formula have been implemented and an improved financial condition demonstrated. Until then, the reduction in the frequency of examinations increases the possibliity that some warehouses which are short of grain or are in financial difficulty will go undetected, increasing the likelihood of bankruptcy or liquidation.

Agency comments and GAO evaluation

GAO obtained comments from the Department of Agriculture which generally agreed with the report's factual content. From an accounting viewpoint, the Department agreed with GAO's evaluation that financial statements accompanied by an audit report prepared by an independent certified public accountant or by an independent public accountant would provide the most reliable indication of a warehouse's financial condition. However, from an operations viewpoint, the Department believes that the financial information contained in compilation reports provides CCC with adequate assurance as to the solvency of warehouses.

GAO believes that compilation reports do not provide sufficiently reliable financial information because they do not contain an opinion by an accountant on the financial condition of the warehouse. GAO believes that annual financial statements, accompanied by an audit report prepared by an independent certified public accountant or independent public accountant, containing an accountant's opinion of the financial statements, provide a more reliable indication of a warehouse's financial condition.

S. 1726

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Agriculture and Food Act of 1981 is amended by inserting after section 1122 a new section as follows:

"AUTHORITY OF THE SECRETARY OF AGRICULTURE TO PURCHASE STORED COMMODITIES FROM PRODUCERS UNDER CERTAIN CIRCUMSTANCES

"SEC. 1123. (a) In any case in which a warehouse licensed under the United States Warehouse Act, or licensed under a State law comparable to such Act, as determined by the Secretary of Agriculture—

"(1) has filed a voluntary petition in bankruptcy,

"(2) has had an involuntary petition in bankruptcy filed against it, or

"(3) is unable to release commodities in the possession of such warehouse because such warehouse has instituted, or has had instituted against it, under a State law proceedings relating to financial insolvency,

the Secretary shall, at the request of a producer, purchase from such producer the quantity of any agricultural commodity stored by such producer in such warehouse if such producer has a warehouse receipt (or other valid document of title or ownership defined in regulations prescribed by the Secretary) for such commodity.

"(b) The price which the Secretary shall pay any producer under subsection (a) for any agricultural commodity shall be based upon the prevailing market price for the commodity on the day on which the petition in bankruptcy referred to in subsection (a) was filed or the day on which proceedings were instituted under State law, as the case may be, minus applicable storage charges, or in lieu of cash payment the Secretary may make payment in the form of an equivalent amount of agricultural commodity of equal quality to that stored by such producer in such warehouse.

"(c) If the Secretary purchases, under the authority of this section, any quantity of an agricultural commodity stored in a warehouse referred to in subsection (a) by a producer described in such subsection, the United States shall be subrogated to any right or claim that such producer or such producer's personal representative, successor, dependents, or survivors may have against such warehouse with respect to the commodity purchased by the Secretary.

"(d) The Secretary shall carry out the provisions of this section through the Commodity Credit Corporation.

"(e) The Secretary shall issue such regulations as the Secretary determines necessary to carry out this section not later than ninety days after the date of enactment of this section."●

By Mr. KENNEDY (for himself, Mr. ANDREWS, Mr. HEINZ, Mr. SARBANES, Mr. HOLLINGS, Mr. RIEGLE, Mr. MATSUNAGA, Mr. CRANSTON, Mr. TSONGAS, Mr. GORTON, Mr. METZENBAUM, Mr. SPECTER, and Mr. INOUYE):

S. 1728. A bill to provide for the esablishment of a National Task Force on Organ Procurement and Transplant Reimbursement; to the Committee on Labor and Human Resources.

NATIONAL TASK FORCE ON ORGAN PROCUREMENT AND TRANSPLANT REIMBURSEMENT

Mr. KENNEDY. Mr. President, today I am joining with Senators ANDREWS, HEINZ, SARBANES, HOLLINGS, RIEGLE, MATSUNAGA, CRANSTON, TSONGAS, GORTON, and METZENBAUM in introducing a bill to create a National Task Force on Organ Procurement and Transplant Reimbursement.

The tragic plight of a series of children in desperate need of liver transplants in order to live has filled our media over the last several months and awakened the compassion and concern of the American public. Anxious parents have sought out TV cameras and newspaper reporters in frantic efforts to locate suitable donors before their children die.

Some of these stories have had happy and others tragic endings.

The publicized cases are only the tip of the iceberg. Not only are there many children needing liver transplants whose cases never draw public attention, other organs are needed by American citizens but are not available. There are major concerns about the adequacy and effectiveness of the information directed to the medical community, the clergy, and the public safety community. There are deep concerns that the current system of organ identification and allocation is inadequate, poorly coordinated, and ineffective in meeting life and death needs.

As a result of these concerns and the obvious need for information by the American people, I am introducing legislation to create a National Task

Force on Organ Procurement and Transplant Reimbursement.

This bill directs the Secretary of Health and Human Services to convene a 12-member task force to:

Assess the current status and adequacy of organ procurement and dissemination mechanisms.

Develop a plan for creating a well-developed, coordinated system for a comprehensive organ donor and dissemination network.

Develop a plan for the education of the medical community, the general public, the clergy and public safety officers on the issues of organ transplantation and procurement.

Assess the appropriateness role of the Federal Government in the establishment and maintenance of an organ procurement system.

Develop a plan for a permanent body to make recommendations to public and private insurers on the appropriations of insurance reimbursement for particular transplant procedures.

American Academy of Pediatrics in New York City. As a result of major television network coverage of Mr. Fiske's appeal, a liver from a 10-month-old Salt Lake City auto accident victim was offered for transplantation.

One week ago, the President made a plea for a liver to save the life of a dying girl. Two days later a wire service story brought news of a Congressman's letter to the President informing him of another child dying of a rare liver disease.

Despite the humane ends served by these media appeals, it would clearly be in the best interest of patients, the families, and our society if such desperate measures were not necessary.

This turn to the media to identify and allocate organs for transplantation has been forced on Americans because of the shortage of organs and the difficulty of identifying appropriate potential donors. The shortage of organs is real.

The number of potential annual liver transplants is about 4,600 nationally; yet, only around 100 liver transplants will be performed this year. The number of recipients is expected to increase as improvements occur in transplantation techniques.

Some doctors estimate that at least 12,000 Americans are potential candidates for heart transplants. Yet, only 100 Americans are expected to receive a heart transplant this year.

Despite the fact more than 5,000 people will have kidney transplants this year, there are between 6,000 to 8,000 people currently awaiting donor kidneys. Furthermore, experts believe that 10,000 kidney transplants annually will be possible within 5 years if the necessary organs are available.

These numbers put the organ transplant issues in a perspective that is hard to ignore. It is easy to understand the desperation and fear felt by potential organ recipients and their families. And, apparently, the desperation and fear is not unfounded. Donald Denny, director of Organ Procurement for the University Health Center for Pittsburgh is quoted in an October 1982 issue of U.S. News & World Report as saying that his center lost a dozen patients over a 2-year period who were waiting for suitable livers; one patient waited almost 5 years for a suitable kidney.

The tragedy of the shortages is even more striking when we realize that only 2,500 kidney donors were found last year among the estimated 20,000 potential American donors.

Among the reasons given for the shortage of donors are physician reluctance to discuss organ donation with grieving families, lack of family awareness, lack of information on the part of the medical community, and complexity in obtaining the cooperation of a transplant team. Perhaps most important, there is not adequate national network to solicit, identify, and match donors and need.

Congressman ALBERT GORE, chairman of the House Science and Technology Subcommittee on Investigations and Oversight, held hearings in April of this year on the problems of organ procurement, distribution, and reimbursement. Mr. GORE found that the existing system for organ procurement is fragmented, with profound variation from locality to locality, and lacks a cohesive national or regional organizational strategy.

In the area of kidney transplants, Congressman GORE found that existing programs for organ transplantation were supported by Federal funds provided as reimbursement for costs to kidney acquisition. Despite the heavy investment in Federal dollars, the kidney procurement program also lacked a national or regional strategy.

Some have argued that the Federal Government should take positive steps to improve the availability of donor organs. It has been suggested that Federal funding would encourage the development of organ procurement agencies in uncovered geographical areas. A national computer network to improve matching between donors and recipients and to reduce the number of unused donor organs has been recommended by other experts. Still others suggest that the Federal Government should fund educational programs for the medical community and the public to encourage organ donation.

Mr. President, it seems clear to all that the media do not represent an appropriate nor efficient means of allocating scarce medical resources. It is also clear to all that something must be done. The role of the Federal Government in an organ procurement system should be clarified.

In addition to the issue of the availability of organs, there is the very major issue of how to finance these procedures. When Jamie Fiske left the University of Minnesota, it was estimated that the total cost for her care in Minneapolis, including hospitalization while awaiting the transplant, was as much as $175,000.

Many transplant recipients are forced to turn to bake sales and community collections to pay for their procedures. Reimbursement policy on transplants is inconsistent and inadequate. The decision as to who should live and who should die should not rest on either an arbitrary insurance policy or on personal wealth. This country cannot accept this approach to transplant reimbursement. The task force will address this issue, recommending a rational and fair transplant reimbursement policy.

The National Task Force on Organ Procurement and Transplant Reimbursement Act which Senator ANDREWS and I are proposing will enlist the advice and talent of experts from around the country to develop a rational response to this urgent and critical problem. The task force will address all of the issues including reimbursement and report back to the Congress with their plans. Senator ORRIN HATCH, chairman of the Committee on Labor and Human Resources, has assured me that the Labor Committee will hold expedited hearings on this legislation after the August recess.

I ask unanimous consent that the bill be printed in the RECORD, along with a copy of a letter to me from Charles and Marilyn Fiske in support of efforts to address the procurement problems. I also ask unanimous consent to print in the RECORD an article by John K. Iglehart, entitled "Transplantation: The Problem of Limited Resources," from the July 14, 1983 issue of the New England Journal of Medicine, and letters of support from the American Heart Association, the American Liver Foundation, and the National Kidney Foundation.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1728

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "National Task Force on Organ Procurement and Transplant Reimbursement Act".

FINDINGS

SEC. 2. The Congress finds and declares that—

(1) a major obstacle to all organ transplant programs is the lack of suitable donor organs for patients awaiting surgery;

(2) a number of patients waiting for donor organs face certain death within a predictable time period;

(3) the absence of fully effective national networks to solicit, identify, and match

organ donors with transplant patients has forced such patients and their families to resort to public appeals through the mass media in order to procure the organs needed for transplantation;

(4) a cooperative relationship between an informed public and a receptive medical community is necessary for the identification and procurement of organs for transplantation; and

(5) disagreements between the health insurance community and the medical community concerning the appropriateness of reimbursement for transplant procedures has led to inequitable treatment and potential denial of needed care.

ESTABLISHMENT

SEC. 3. Within 60 days after the date of enactment of this Act, the Secretary of Health and Human Services shall establish a National Task Force on Organ Procurement and Transplant Reimbursement.

DUTIES OF THE TASK FORCE

SEC. 4. (a) The Task Force shall assess the nature and extent of public and private efforts that are needed to create a highly visible, well defined, and effective program of organ procurement, and shall develop a plan for the establishment of a comprehensive organ donor network and organ procurement system.

(b) The plan developed under subsection (a) shall include—

(1) an analysis of the factors that affect and determine the availability of organs for transplantation;

(2) a specification of mechanisms to identify potential organ donors, provide for rapid matching of donors with appropriate organ recipients, and facilitate transportation of organs to such recipients;

(3) provisions for the education and training of members of the medical community, including physicians, nurses, hospitals, and emergency personnel;

(4) provisions for the education of the general public, the clergy, law enforcement officers, members of local fire departments, and other agencies and individuals that may be instrumental in effecting organ procurement;

(5) provisions for the development of a system for the collection, analysis, and dissemination of all data useful for the creation and maintenance of an effective organ procurement system;

(6) provisions for the conduct of continuing research concerning the transportation of organs from donors to recipients;

(7) recommendations for appropriate mechanisms to provide financial support for an organ procurement system, and for amounts necessary to support such a system;

(8) an assessment of the appropriate role for the Federal Government in the establishment and maintenance of an organ procurement system; and

(9) provisions for the establishment of an authoritative permanent entity to make recommendations to private and public insurers concerning the appropriateness of insurance reimbursement for particular transplant procedures.

MEMBERSHIP

SEC. 5. (a) The Task Force shall be composed of twelve members as follows:

(1) The Secretary of Health and Human Services (or the designee of the Secretary).

(2) The Surgeon General of the United States (or the designee of the Surgeon General).

(3) The Director of the National Institutes of Health (or the designee of the Director).

(4) Six individuals appointed by the Secretary who are not officers or employees of the United States and who represent the medical community, the religious community, the public safety community, and the health insurance community.

(5) Three individuals appointed by the Secretary who are not officers or employees of the United States and who have personal experience with respect to organ procurement.

(b) A vacancy in the Task Force shall be filled in the same manner as the original appointment was made. A vacancy in the Task Force shall not affect its powers.

(c)(1) Except as provided in paragraph (2), members shall be appointed for the life of the Task Force.

(2) If any member of the Task Force who was appointed to the Task Force under paragraph (1), (2), or (3) of subsection (a) leaves the office specified under such paragraph, or if any member of the Task Force who was appointed under paragraph (4) or (5) of such subsection becomes an officer or employee of the United States, such individual may continue as a member of the Task Force for a period not in excess of thirty days beginning on the date such individual leaves that office or becomes such an officer or employee, as the case may be.

(d) The members of the Task Force shall elect a Chairman from among the members of the Task Force.

(e) Seven members of the Task Force shall consititute a quorum, but a lesser number may hold hearings.

(f) The Task Force shall hold its first meeting on a date specified by the Secretary which is not later than thirty days after the date on which the Secretary establishes the Task Force under section 3. Thereafter, the Task Force shall meet at the call of the Chairman or a majority of its members but shall meet at least three times during the life of the Task Force.

(g)(1) Each member of the Task Force who is not an officer or employee of the United States shall be compensated at a rate equal to the daily equivalent of the annual rate of basic pay prescribed for grade GS-18 of the General Schedule under section 5332 of title 5, United States Code, for each day (including traveltime) during which such member is engaged in the actual performance of duties as a member of the Task Force. Each member of the Task Force who is an officer or employee of the United States shall receive no additional compensation.

(2) While away from their homes or regular places of business in the performance of duties for the Task Force, all members of the Task Force shall be allowed travel expenses, including per diem in lieu of subsistence, at rates authorized for employees of agencies under sections 5702 and 5703 of title 5, United States Code.

DIRECTOR AND STAFF OF TASK FORCE

SEC. 6. (a) The Task Force shall appoint an Executive Director who shall be compensated at a rate not to exceed the rate of basic pay prescribed for level V of the Executive Schedule under section 5316 of title 5, United States Code.

(b) With the approval of the Task Force, the Executive Director may appoint and fix the compensation of such additional personnel as the Executive Director considers necessary to carry out the duties of the Task Force.

(c) The Executive Director and the additional personnel of the Task Force referred to in subsection (b) may be appointed without regard to the provisions of title 5, United States Code, governing appointments in the competitive service, and may be paid without regard to the provisions of chapter 51 and subchapter III of chapter 53 of such title relating to classification and General Schedule pay rates.

(d) Subject to such rules as may be prescribed by the Task Force, the Executive Director may procure temporary or intermittent services under section 3109(b) of title 5, United States Code, at rates for individuals not to exceed $200 per day.

(e) Upon request of the Task Force, the head of any Federal agency is authorized to detail, on a reimbursable basis, any of the personnel of such agency to the Task Force to assist the Task Force in carrying out its duties under this Act.

(f) The Administrator of General Services shall provide to the Task Force on a reimbursable basis such administrative and support services as the Task Force may request.

POWERS OF TASK FORCE

SEC. 7. (a) For the purpose of carrying out this Act, the Task Force may hold such hearings, sit and act at such times and places, take such testimony, and receive such evidence, as the Task Force considers appropriate. The Task Force may administer oaths or affirmation to witnesses appearing before the Task Force.

(b) Any member or employee of the Task Force may, if authorized by the Task Force, take any action which the Task Force is authorized to take by this section.

(c) The Task Force may secure directly from any Federal agency such information as may be necessary to enable the Task Force to carry out this Act. Upon request of the Chairman of the Task Force, the head of such agency shall furnish such information to the Task Force.

REPORT

SEC. 8. (a) The Task Force may transmit to the President and to each House of the Congress such interim reports as the Task Force considers appropriate.

(b) The Task Force shall transmit a final report to the President and to each House of the Congress not later than six months after the date on which the Task Force is established by the Secretary under section 3. The final report of the Task Force shall contain a detailed statement of the findings and conclusions of the Task Force and the recommendations of the Task Force for such legislation and administrative actions as the Task Force considers appropriate.

DEFINITIONS

SEC. 9. For purposes of this Act—

(1) the term "Federal agency" has the meaning given to the term "agency" in section 551(1) of title 5, United States Code;

(2) The term "Secretary" means the Secretary of Health and Human Services; and

(3) the term "Task Force" means the National Task Force on Organ Procurement and Transplant Reimbursement established under section 3.

AUTHORIZATION OF APPROPRIATIONS

SEC. 10. For fiscal years beginning after September 30, 1983, there are authorized to be appropriated such sums as may be necessary to carry out this Act.

TERMINATION

SEC. 11. The Task Force shall terminate three months after the date on which the

Task Force transmits the final report required under section 8 to the President and each House of Congress.

---

100 BAYBERRY CIRCLE,
Bridgewater, Mass., July 26, 1983.

Senator EDWARD KENNEDY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KENNEDY: We are encouraged by your effort to effectively address the problems that are associated with transplant surgery. Your willingness to introduce legislation for the establishment of a National Commission on Organ Procurement signals a plan of action that involves both public and private efforts. The identification of organs for transplantation is a cooperative effort between a well informed public and an integrated system that matches suitable donors with recipients. Until there is a better resolution potential transplant patients will find themselves in a race against time.

Last Fall we were faced with this problem as our daughter Jamie awaited transplant surgery at University Hospital in Minnesota. A willingness to address this problem offers hope to those patients facing this surgery. We feel that a National Commission to collect the necessary data to address the problems of organ procurement and education is an encouraging step. As we had mentioned to you when we met last April we support your effort in this critical health issue.

As Jamie continues to grow and take her first few steps we support your effort to bring hope to so many others.

Sincerely,

CHARLES AND MARILYN FISKE.

[From the New England Journal of Medicine, July 14, 1983]

HEALTH POLICY REPORT

(John K. Iglehart)

TRANSPLANTATION: THE PROBLEM OF LIMITED RESOURCES

A congressional inquiry, designed originally to evaluate current methods of securing human organs for transplantation, has helped alert federal policy makers to inadequacies in that system. But along the way, the inquiry also uncovered some other serious aspects of the profound dilemma that third parties will increasingly face in deciding whether to pay for costly new transplantation procedures and also involving the chaotic process by which emerging technologies are evaluated for their medical efficacy.

The interest of the legislators who were party to the inquiry, undertaken by the House Science and Technology Subcommittee on Investigations and Oversight, was provoked by recent media attention to the plight of families with children who have an incurable liver disease, biliary atresia, and need a liver transplantation. As they addressed the issue, the legislators found themselves confronted by an array of social, economic, medical, political, and ethical questions, such as "Who shall live?" "Who shall pay?" and "Who shall decide?" These are the kinds of questions that arise in a health-care system that is driven by an ever-expanding technology base and a seemingly insatiable consumer and provider demand to use medical care, yet faces a future of limited resources.

The congressional examination underscored the complex issues ahead for a society that is humanitarian in its instincts and supportive of a generous investment in social welfare but leaves to the vagaries of a media blitz the task of families searching for a human organ for transplantation; that believes in the decentralization of government and views the private sector as supreme but also supports a president who directs his staff to help families find livers and the means to finance their transplantation at the same time that the Defense Department refuses to pay for the same procedure.

The congressional inquiry was launched by Representative Albert Gore, Jr., an ambitious young politician who is chairman of the House Science and Technology Subcommittee on Investigations and Oversight. The issue was brought to Gore's attention initially when a Tennessee constituent sought his help in securing an organ. The broader issues concerning transplantation were raised by Dr. Myron Genel, a professor of pediatrics at the Yale University School of Medicine. Genel is spending a year in Gore's office as a Robert Wood Johnson Foundation health-policy fellow. An unannounced but nevertheless favored candidate to assume the seat that Senate Majority Leader Howard H. Baker, Jr., will vacate in 1984 when he retires, Gore has been active in a range of health issues, including the relation between sodium in food and high blood pressure, human genetic screening, and the National Cancer Institute's therapy program. Thus, one could not accuse him of simply grabbing the issue of organ transplantation because it is in the medical spotlight at the moment, though he did reap considerable publicity for his efforts.

On April 13, 1983, Gore opened the first of three days of hearings before the subcommittee with the following remarks:

"Each of us has been moved by the stories of families seeking life-saving organs for their critically ill loved ones. . . . I am sure that many of you have wondered, as I have, why there is not some system to help meet those compelling needs in a more rational way. . . . It was for this very reason, especially after I was personally contacted to assist in such a search, that I directed the subcommittee staff to conduct the investigation which has brought us here today."

This report will focus on the issues surrounding the availability and procurement of organs for transplantation that were examined by Gore's subcommittee and a recent workshop sponsored by Surgeon General C. Everett Koop, a pediatric surgeon with a keen interest in improving the procurement process. The report will also dwell on the inconsistencies in the performance and policies of third parties as they struggle with what Gore characterized as "the dawning of a new era in transplantation." A subsequent report will cover the mounting concern, expressed by members of Gore's panel, testified to by Dr. Edward N. Brandt, Jr., assistant secretary of health of the Department of Health and Human Services (DHHS), and also reflected in a range of other activities, over the absence of an adequate mechanism to evaluate emerging medical technologies and those already in common use.

As a consequence of two widely publicized cases of pediatric liver transplantation and the difficulty or failure of families of other patients to secure organs, a growing awareness of the problems of organ procurement has been created by the media and the expressed interest of politicians, including President Reagan. The need to develop better organ-procurement procedures was also underscored by nationally recognized physicians who testified to the growing demand of organs as improved surgical methods and a promising new drug, cyclosporine, make transplantation a more attractive medical alternative for an increasing number of patients.

Added to these concerns were the sentiments of legislators who serve on the Science and Technology Subcommittee on Investigations and Oversight. Democrats and Republicans alike, without exception, were decidedly in favor of transplantation. They dwelled on the personal plight of families in need of organs and the resources to transplant them. Little was said about the societal implications of the transplantation phenomenon. Koop's workshop (June 7 through 9) was attended by 40 people of similar mind.

Representative Joseph R. Skeen of New Mexico, the subcommittee's ranking Republican, recounted that he had lost a sister in 1962 to a kidney disorder and that a niece, who testified at the hearing, had recently received a transplanted kidney. "The future of this field of research [transplantation] is, in my opinion, without limit."

Representative James H. Scheuer another subcommittee member, said in his opening remarks:

"We in Congress must evaluate and analyze how the federal government can aid in organ procurement and how we can make sure that every patient who needs an organ for a transplant has one. We must also examine the adequacy of the Medicare coverage for transplants, both in terms of the procedures and the length of time that the benefits are available. In no way should the federal reimbursement mechanism act as a disincentive to transplants which are far more life-saving, far more life-enhancing and far more cost-effective than conventional therapies."

Representative Claudine Schneider, said in her opening comments;

"The thought of vital organs, such as livers, hearts and kidneys, being transplanted routinely at our nation's best medical centers is a tribute to how far transplant technology has evolved. . . . I think it would certainly be a tragedy if, after realizing that we have the technological breakthrough . . . we don't take full advantage of affording this remarkable therapy to all needing patients."

A shortage of organs for transplantation has persisted for years. It now appears that this shortage will be exacerbated by improvements in transplantation techniques, because the numbers of available organs that are actually transplanted has not changed appreciably. Ironically, the inadequacy of the liver supply has received far more attention than has the shortage of kidneys—a fact that Donald W. Denny, director of organ procurement for the Transplant Foundation at the University of Pittsburgh, testified to on April 13 before Gore's panel.

"The shortage of kidneys for transplantation has received relatively little attention, largely because renal transplantation is not a form of transplant therapy which is often an alternative to death. . . . The undeniable facts that a real kidney, a transplanted kidney, provides a better quality of life for ESRD [end-stage renal disease] patients and that renal transplantation is more cost-effective per patient life-year than the artificial kidney have not been sufficient to cause the national sense of urgency which underlies these hearing. Without intending to diminish the meaning and the impor-

tance of this subcommittee's purpose today, I must lament . . . the fact that recent publicity concerning the need for a liver transplant for a handful of patients at two or three transplant centers (including my own) has outweighed the silent suffering of many thousands of patients waiting for a kidney transplant at 150 transplant hospitals over the past decade in moving the conscience of this nation."

Among the witnesses before the House panel were three transplantation surgeons who discussed the status of organ procurement and transplantation generally. They were Dr. Norman Shumway, professor of surgery at the Stanford University School of Medicine; Dr. Thomas E. Starzl, professor of surgery at the University of Pittsburgh School of Medicine; and Dr. G. Melville Williams, professor of surgery at the Johns Hopkins Hospital. All three testified to the dramatic progress in organ transplantation, which is reflected in survival rates. They attributed this progress to the emergence of cyclosporine, to their belief that liver, heart, and heart-lung transplantations are no longer "experimental" procedures, and to the opinion that third-party payers were calling them experimental as an excuse not to finance such operations. All three agreed that greater discussion within families of the importance of making a commitment, before a tragedy occurs, to donate organs is "the single most important thing that could happen" to increase the supply of available organs.

Since 1967, more than 500 heart transplantations have been performed in the United States. Currently, there are 10 American medical centers with active heart-transplantation programs; they performed some 100 transplantations in 1982. Thirty were undertaken at Stanford. Roger W. Evans, a research scientist at Battelle Human Affairs Research Centers, Seattle, reported in a paper prepared for the Surgeon General's organ-procurement workshop that "with as many as nine hospitals either currently in the process of establishing new transplant programs, or seriously considering beginning to perform heart transplants, the number of such procedures performed in 1983 is expected to exceed 125."

Shumway has pioneered the development of heart transplatation in the United States. He described it as a "proven therapeutic intervention with a five-year survival rate of at least 50 per cent, and a one-year survival rate that approaches 80 per cent." These rates were similar to those cited by Dr. Peter Safar for Pittsburgh's heart-transplant program. Shumway reported that 106 of 260 patients who had received heart transplants at Stanford—representing work over a 15-year period—were still "alive and well. . . . Suffice it to say that transplantation of the heart is on the same therapeutic footing as kidney transplants."

Shumway also testified to the progress in heart-lung transplantations, noting that 8 of 11 patients who have undergone this procedure "are alive and well, out of the hospital and fully rehabilitated two months to two years after the transplant. . . . Irrespective of any conceivable advance in artifical organs, heart-lung transplantation is here to stay."

Liver transplantation began in 1963. Starzl has performed about 370 of the estimated 600 liver transplantations that have been undertaken throughout the world. Before the use of cyclosporine, beginning in 1980, the surgery resulted in only a 30 per cent survival rate after the first year. Starzl observed that with the use of the new drug, the one-year rates of graft and patient survival have more than doubled and are now 65 to 70 per cent. Starzl's surgical team carried out 82 liver transplantations in 1982 and expects to do 100 more this year.

Starzl predicted that once cyclosporine is approved for general use and liver transplantation is no longer considered an experimental procedure, many medical centers will create new liver-transplantation programs. "I am guessing 20 to 30 centers . . . there must be already around 12 that are ready to go." Starzl also predicted that the rate of kidney transplantation will increase sharply after cyclosporine is approved for general use—a step the Food and Drug Administration is expected to announce this summer. Attributing his estimate to Sandoz, the manufacturer of the drug, Starzl said that to maintain a patient with a liver transplant on cyclosporine would cost from $5,000 to $6,000 a year.

All the surgeons who testified discounted the adverse effects of the drug and did not mention its possible long-term consequences. (Dr. David Winter, cyclosporine project leader at Sandoz, told the FDA's Oncologic Drugs Advisory Committee on March 25: "Renal dysfunction, often called nephrotoxicity, is clearly of major concern to us. Roughly a quarter of the patients do exhibit this." Winter said that among 1800 patients throughout the world who have received cyclosporine, 15 cases of lymphoma have been reported—8 in patients with renal transplants, 6 in patients with cardiac transplants, and 1 in a patient with a bone-marrow transplant. The committee voted to recommend approval of cyclosporine for use in patients with kidney, liver, and heart transplants.)

Williams, who is former president of the American Association of Transplant Surgeons, agreed with Starzl that kidney transplantation will increase once cyclosporine is made available to medical centers other than the four that have used it as an investigational drug. Williams said that the number of kidney transplantations increased from 4,721 four years ago to 5,350 last year. According to recent estimates, 20,000 people who die in the United States each year would be suitable kidney donors (in terms of age and disease), but only 2,000 actually become donors. Williams asked: "Is the reason for our failure to obtain more organs the result of negative public attitudes or inefficient procurement systems? I think both."

Denny, Pittsburgh's transplant coordinator, described the recovery of organs as a three-tier process involving 110 organ-procurement programs that exist across the United States, physicians and nurses who work in acute-care hospitals, and the general public. In describing this process, Denny left no doubt that the task of the nation's 360 transplant coordinators is a never-ending struggle to educate medical practitioners and the public concerning the critical need for organs to transplant. "Because of the apparent holes in our educational system," Denny testified, this year the North American Transplant Coordinators Organization established a 24-hour national information-and-referral service for doctors and nurses, which can be reached by dialing 800-24-DONOR. "Our struggle now is to acquaint physicians and nurses throughout the country with the availability of this number. . . . Every organ procurement program has as one of its major goals the recovery of kidneys for transplantation for the nearly 6,000 people who are now waiting for renal transplantation in this country."

Denny described physicians and nurses as "the weak link" between the organ-procurement programs and the public, because they often "shirk" the task of explaining to families the meaning of brain death, the physical state patients must be in before they become potential organ donors, with the exception, of course, of healthy donors who offer one of their two kidneys for transplantation.

"In my experience, only one out of 10 families of a brain dead victim initiates the request to donate. . . . To try to explain to a family that this brain-dead victim who looks as though he is alive and merely comatose is really dead is a difficult task for physicians and sometimes they shirk it . . . because of their own grief, their own pain, their own assault on their integrity which they are experiencing because of death."

Denny said that "ignorance, apathy, [and] indifference" all play a part in forming the attitudes of practitioners who resist involvement in the organ procurement process,

". . . but perhaps the biggest problem is the medical-legal problem—physicians and nurses who fear that if they cooperate in the recovery of organs for transplantation, they will be vulnerable to litigation. We live in a litigious society, and physicians especially know how damaging nuisance lawsuits can be. As a result, they oftentimes practice defensively. Their patients are not waiting for transplants, and our requests that they help us sometimes fall on deaf ears because of their fear of medical-legal vulnerability."

From June 7 through 9, Benny and some 40 other people committed to improving the organ-procurement process, including the surgeon general, transplantation surgeons, transplant coordinators, critical-care nurses, and families who have lost children because of the inadequacies of the process, gathered at Project HOPE, Millwood, Virginia, to discuss how best to educate the physician and the public to the need for organ donation.

Koop, a pediatric surgeon for 35 years before he became surgeon general, said in his keynote address:

". . . whatever success has been achieved so far in organ procurement is only a modest beginning, a small toe-hold on what may be as difficult a climb as the north face of Everest. . . . I think it's important for us to accept the current system of organ procurement as voluntary, decentralized and imperfect, but nevertheless open to improvement. And, having accepted it, relay that information to the public in the most reassuring way possible."

Koop, who said that he had convened the workshop at the request of President and Mrs. Reagan, declared that the federal government should be a participant in efforts to improve the procurement process, but it should not assume a "leadership position." At the close of the workshop, Koop outlined the steps he would take to improve the procurement system: convening a work group to discuss the formation of a federation of the disparate interests now involved in procurement, urging private groups to submit proposals to DHHS "for the possible funding of a project to address the deficiencies in the data bases relating to organ procurement and transplantation," and forming a group at the National Institutes of Health "to address the problem of the maintenance of the body of a potential multiple organ donor."

Koop said that on the basis of the remarks of several participants and "my own instincts, I would like to keep away from regulatory suggestions and offer an educational alternative to the establishment of organ procurement plans and protocols within hospitals." The educational alternative would involve discussions with the American Hospital Association and the Federation of American Hospitals, requesting that their member hospitals institute policies that would lead to more effective procurement of organs from potential donors. Denny, among others, had suggested the use of state health departments and the Joint Commission on Accreditation of Hospitals as agencies that could incorporate in their certifying processes a requirement that hospitals have policies for the determination of brain death and for identifying potential donors and referring them to the nearest procurement program.

Koop's workshop was only a small reflection of the array of federal activities related to organ transplantation. These activities include funding biomedical research related to transplantation, regulating the approval of new drugs intended to increase the efficacy of transplantation, paying for kidney and cornea transplants under Medicare, and examining the need to finance heart and liver transplantations. In recent months even Reagan has become personally involved both by directing Koop to identify the steps that could be taken to close the gap between the demand for organs and their supply and by employing a White House aide whose responsibilities include working directly with families that are searching for organs and the means to finance their transplantation.

The involvement to finance of the aide, Michael Batten, has led to an unusual series of federal interventions on behalf of families, including pressuring private health insurers, state Medicaid directors, and the DHHS to pay for organ transplants; making arrangements with the Air Force to ferry organs and patients; and assisting in local fund-raising efforts to pay for the operation.

Batten said in an interview that he functions under a mandate from Reagan to "give life a chance, [to] err on that side," although the emphasized that he does not directly solicit funds for families. Stemming from that "unwritten policy," said Batten, who works in the White House Office of Public Liaison, "is a mandate to use the good offices of the President to help families find organs and the means to pay for them." Batten said his activities have included "twisting the arms of state Medicaid directors" to pay the state share for liver transplantations. One technique Batten said he uses is to "put in writing" the willingness of DHHS to pay the federal share. "That shifts the burden to the states."

Batten estimated that his activities have "forced" 20 states to pay for liver transplantations when they otherwise might have declined. "New York was a piece of cake, but other states came harder. Mississippi refused [to pay for the two liver transplants received by Brandon Hall]," he said. Batten also makes regular inquiries of private insurers that resist covering liver transplantations.

Nationally, the Blue Cross and Blue Shield Association still considers liver transplantation an "experimental" procedure and thus not one that insurance plans are compelled to finance, but individual plans have increasingly bowed to local pressures and paid for such procedures, though usually on an ad hoc basis. (Charles Fiske, father of Jamie Fiske, one of the celebrated pediatric liver-transplant recipients, testified before Gore that after pledging to pay for the procedure, Massachusetts Blue Cross reversed its decision but subsequently—after the case had generated considerable publicity and political pressure—helped pay for it, telling Fiske, "due to the extenuating circumstances in this particular case, we have made an exception.")

Batten said he points out this decision to other Blue Cross plans that resist paying for liver transplantations. "When the Blue Cross plans say we do not cover liver transplants because they are experimental, I ask, 'Why don't you cover them on the same ad hoc basis that Massachusetts Blue Cross did?'" Batten's activities have gone largely unnoticed in Washington, except for the Health Care Financing Administration (HCFA), which worries about the implications his actions may have for it. HCFA's regional offices recently were directed to learn what they could of Batten's activities. The information was consolidated and written as an "eyes only" memorandum that was held tightly within DHHS.

Batten's activities have generated many local newspaper stories. On May 12, for example, the Memphis Press Scimitar, in an article headlined, "Reagan Staff Aids Woman's Quest for UT [University of Tennessee] Transplant," recounted that Batten had intervened on behalf of an Arizona woman after her husband's health insurer, Insurance Company of North America, refused to pay for the operation, contending that a liver transplantation was still an experimental procedure.

On May 14, the New Haven Register, in an article headlined, "White House Intervenes to Get Mom a Transplant," reported:

"It took the intervention of the White House, but an unemployed penniless mother of four will get the $89,000 federal grant she needs for a possible life-saving transplant, the governor's office said Friday. . . . Michael Batten, an aide to President Reagan, said the commissioner of the federal Rehabilitative Services Administration reversed an earlier decision and approved the surgery after discussions with White House officials."

Batten's activities, as noble as they may appear at the local level, have created an ad hoc arrangement fraught with inequity, because for every person he can help, there are obviously many more people who slip through this makeshift process. Batten conceded that his activities amount to "events in search of a policy." Ironically, although he said he "raised hell with the Defense Department, Batten has thus far had no discernible success in reversing a policy of its Civilian Health and Medical Program of the Uniformed Services (CHAMPUS) not to pay for liver transplantations. CHAMPUS' reasoning was precisely the same as that of the Insurance Company of North America; the procedure is experimental and thus not covered by the program.

Dr. John F. Beary III, acting assistant secretary of defense for health affairs, testified to the department's policy in this regard on April 27 during an appearance before Gore's subcommittee. The question arose in connection with Captain John H. Broderick of Minden, Louisiana, an Army officer whose 31-month-old daughter, Adriane, has biliary atresia and needs a liver transplantation. Beary said: "Our Office of General Counsel has reviewed the legal situation pertaining to the case and has advised me that it is legally objectionable to pay for experimental medicines and surgery, until such time that medical researchers prove that a therapy is effective and that it is not more likely to harm the patient than to help.

Beary said that CHAMPUS determines its policy on whether a therapy is experimental or generally accepted treatment according to the findings of three bodies: the Blue Cross and Blue Shield Medical Policy Council, the Public Health Service, and the American Medical Association's Council on Scientific Affairs. The Blue Cross Council, Beary testified, concluded at its March meeting this year that liver transplantation was "still experimental." The Public Health Service is studying the question, the results of which Brandt testified, "should be available this summer." The American Medical Association's Council on Scientific Affairs has not considered the question and, according to its chairman, Dr. William Dolan, has no plans at present to do so.

However, the refusal of CHAMPUS to cover liver transplantations has not inhibited its involvement in the kind of activities in which the White House's Batten has engaged to assist families in need of organs. Beary testified: "With Captain Broderick, for example, the CHAMPUS has provided guidance on fund raising, community resources, running an appeal, and managing an appeal account."

Beary's testimony left Gore just short of outraged:

"I find your testimony extremely disappointing, extremely disappointing . . . What we have here is an absolutely absurd situation, and it is very frustrating. Most all the private insurance companies recognize that this is no longer an experimental procedure. Most of them are reimbursing for it. We have testimony showing that there is a 70 to 80 percent success rate with these procedures. We have testimony showing that it is cheaper to save their lives and go forward with a transplant than it is to pay for all the care needed during a lingering death, which you presently approve (finance). And yet the government bureaucracies represented here absolutely refuse to recognize what is obvious to the medical experts in the field. That is a slow, slow process that is cranking along toward the consensus conference (National Institutes of Health Consensus Conference on Liver Transplantation, June 20 through 23) and then there will be an evaluation. . . . And, in the meantime, these children need the money, and in its place we have the, I think, bizarre spectable of the Defense Department providing public relations guidance to mount public fundraising drives for the children of military personnel who need these procedures to save their lives."

One conclusive development that came out of Beary's testimony was a pledge to bring the assets of military medicine to bear on the organ-procurement problem. Beary said: "We have seven million beneficiaries in the military hospital system itself, 12,000 doctors and 161 hospitals. So I hope by approaching this systematically, we can come up with a very reasonable program to contribute to the shortage of organs."

Carolyne K. Davis, administrator of HCFA, discussed in her testimony the status of kidney transplantation as it applies to the End-Stage Renal Disease program, primarily a dialysis program, which HCFA operates. (On December 31, 1982, HCFA reported that 70,055 patients with end-stage renal disease were entitled to Medicare ben-

efits. On that date, HCFA said, a total of 65,763 Medicare and non-Medicare patients were receiving dialysis treatments.

Davis said that 38,650 kidney transplantations have been performed since the program began a decade ago. "We now have roughly 15,700 individuals who are currently still alive and living with a functioning transplanted kidney." In another such estimate, which pointed up the dismal state of data collection in the program, Prof. Richard A. Rettig, chairman of the Department of Social Sciences at the Illinois Institute of Technology and a respected student of end-stage renal disease, testified that there are 12,000 such patients alive with a functioning kidney transplant.

Davis brought to the committee's attention the recent findings of HCFA's research staff, which showed, she said, that "a group of transplant patients would cost the Medicare program less than a group of dialysis patients after a four-year period of time when one aggregates the costs for the four-year period and considers them." Davis also mentioned briefly a Battelle Institute study, financed by HCFA, that analyzed 11 renal-dialysis centers and about 900 patients. The study, she said, concludes that "the kidney transplant and the patients who are on home dialysis are more likely to be working and have a lower level of functional impairment." Another study she discussed, undertaken by the Brandeis University Health Policy Center and also funded by HCFA, is investigating methods to increase public participation in kidney donation. "We hope that we can correlate and analyze the state of the art in the organ procurement area and develop a model for a successful kidney procurement agency," Davis said.

If, as is widely believed in the transplantation community, a new era in organ transplantation is at hand, what steps should the federal government consider to facilitate this phenomenon? Rettig recommended that Congress examine the issue of reimbursing for the costs of immunosuppressive drugs used by transplant recipients as part of "outpatient services" and eliminate the three-year eligibility limit for benefits received by transplant recipients. (The absence of benefit coverage after three years was identified in testimony by the National Association of Patients on Hemodialysis and Transplantation as an impediment to transplantation.)

Rettig also suggested that the government examine the prospect that increased resources invested in organ procurement might well yield higher numbers of retrieved kidneys. Rettig was particularly critical of the administration of the End-State Renal Disease Program, characterizing it as "weak." Lastly, Rettig, too, called for improved mechanisms for the assessment of technology.

Since Gore's Subcommittee on Investigations and Oversight does not have any legislative authority, the primary product of its hearings on organ transplantation will be a report, the bulk of which will be framed and written by Genel. Another panel, the House Energy and Commerce Subcommittee on Health and Environment, to which Gore has close ties by virtue of his membership on the parent committee, plans hearings in late July on the same issues that Gore raised. Expressing his view on the subject, Representative Henry A. Waxman (D-Calif.), chairman of the Subcommittee on Health and the Environment, said:

"Over the past year, I have become increasingly concerned about the nation's policies toward organ transplantation. Too often now even the most prominent patients cannot get the organ that they need. Severe barriers to payment preclude millions without health insurance from admission to a transplant program. This situation will surely become worse as cyclosporine becomes widely available and transplants more viable."

Gore said in an interview that his subcommittee's report will recommend "a cohesive national program for improved organ procurement" that will include a strong federal role—a feature that puts Gore's vision in conflict with that of Koop. Gore's report is also likely to recommend the regionalization of transplantation facilities by geography or some measure of quality or both—a policy direction favored in both the NIH liver transplant consensus conference and a new report prepared by a task force on liver transplantation in Massachusetts. Gore's report is also likely to include a call for catastrophic health insurance. Whatever the report says, it will by no means be the last word on a set of issues that concerns organ transplantation today but inevitably will apply to other technologies tomorrow. In their many different forms, they all seem to boil down to making more effective use of limited resources.

AMERICAN HEART ASSOCIATION,
Washington, D.C., August 2, 1983.

Hon. EDWARD M. KENNEDY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KENNEDY: I understand that you will be shortly introducing the "National Task Force on Organ Procurement Act." The legislation as I understand it would establish a national Task Force to assess and evaluate the multitude of problems confronting organ transplantation in the United States and to develop a comprehensive organ donor network and organ procurement plan.

The American Heart Association is pleased to support your legislative effort and to offer our assistance in ensuring that this legislation is enacted expeditiously.

Sincerely,

MARY JANE JESSE, M.D.,
President.

AMERICAN LIVER FOUNDATION,
Cedar Grove, N.J., August 1, 1983.

Hon. EDWARD M. KENNEDY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KENNEDY: Please be advised that the American Liver Foundation is very supportive of your and Senator Mark Andrews plans to propose legislation soon to establish a National Commission and system for the procurement of desperately needed organs to save the lives of many in need of these organs.

It is becoming increasingly evident, in our opinion, that the medical procedure to transplant livers has emerged as a sound medical procedure. Yet, the major problem we see in the absence of a national system to match donor with recipient. The development of such a mechanism is imperative to the survival of many potential recipients of organs.

Again, we support your efforts and stand ready to provide any assistance whatsoever in developing such a program.

Sincerely,

THELMA K. THIEL,
President.

NATIONAL KIDNEY FOUNDATION, INC.,
New York, N.Y., August 1, 1983.

Hon. EDWARD KENNEDY,
U.S. Senate,
Washington, D.C.

DEAR SENATOR KENNEDY: It is a pleasure for me on behalf of the National Kidney Foundation to endorse the organ donation, research, and registry legislation you and Senator Mark Andrews will introduce tomorrow.

The National Kidney Foundation has been a leader in the field of research in transplant rejection, profusion and tissue typing. We were part of the group that successfully sponsored and gained approval of the Uniform Anatomical Gift Act in the various 50 states. More recently we have successfully sponsored organ donation designation on state driving permits in many states. We have been the prime mover in donor education programs having distributed more than 30 million organ donor cards. Early this year we commissioned the Gallup Organization to conduct the first national survey of public opinion on organ donation.

We stand ready to assist you and Senator Andrews, Congressmen Gore and Waxman, in developing a national program.

Sincerely,

DAVID ODGEN, M.D.,
President, National Kidney Foundation.

● Mr. ANDREWS. Mr. President, I am proud to join with my colleague, the senior Senator from Massachusetts, in introducing legislation calling on the Secretary of Health and Human Services to establish a National Task Force on Organ Procurement and Transplant Reimbursement Act.

In recent months, we have been made aware of the plight of men, women, and children who are desperately awaiting transplant surgery. We must immediately take action to find solutions to this tragic dilemma.

It is my hope that through the creation of a national task force, major obstacles surrounding organ donation will be closely examined. These will include:

First. Public awareness for the need of donors for organ transplants. A recent Science magazine article stated that last year in the United States, out of some 20,000 potential donors—young or middle-aged patients classified as brain dead—only 2,500 actually donated their organs.

Second. Better coordination of present organ procurement and distribution systems; and

Third. Reimbursement policies for the cost of organ transplantation.

Both the Congress and the administration have expressed concern over the problems with organ procurement. Recently, Congressman ALBERT GORE of Tennessee, chairman of the House Science and Technology Subcommittee on Investigations and Oversight, held a series of hearings on organ donation. I am pleased that Congressman GORE, as well as Congressman WAXMAN, chairman of the House Energy and Commerce Subcommittee on Health and Environment, and

myself will soon introduce legislation creating a comprehensive donor network.

The administration has also been involved in the study of organ procurement. In June, Surgeon General C. Everett Koop conducted a workshop to examine the present organ procurement process and a possible role for the Federal Government in that process. With the creation of a national task force, the problems and obstacles can be given a comprehensive overview.

I urge my colleagues to join in this effort to establish a National Task Force on Organ Procurement and Transplant Reimbursement Act, and to call for the immediate enactment of this legislation so that the precious gift of life can be offered to all Americans.●

By Mr. McCLURE (for himself, Mr. GARN, and Mr. ARMSTRONG):

S. 1727. A bill to amend the Food Stamp Act of 1977 to reform and reduce the cost of administering the food stamp program, and for other purposes; to the Committee on Agriculture, Nutrition, and Forestry.

FOOD STAMP REFORM ACT OF 1983

● Mr. McCLURE. Mr. President, today Senator GARN, Senator ARMSTRONG and I are introducing the Food Stamp Reform Act of 1983. This bill contains 16 changes in the food stamp program that are necessary to eliminate some of the waste and abuse of the system.

Every Member of this body knows that our budget problems will never be solved until Congress has the courage to address the growth in entitlement programs. It does not take a Ph. D. in economics to figure out where the problem lies when you have over 50 percent of the total Federal budget growing at 15 percent a year. We have allowed this situation to go on long enough, and I think Congress has an obligation to the American taxpayer to do something about it. If Congress thinks it can ignore the growth in all the entitlement programs then we are just not living in the real world. Between 1970 and fiscal 1981, the cost of living rose 138 percent, and during the same period Federal spending on entitlement programs more than quadrupled, from $70 billion to $295 billion. We could eliminate every discretionary program the Government operates, and it is not going to solve our budget problem. The only way to do that is to enact reforms in entitlements. The bill we are introducing today is a step in that direction.

I will not argue that the food stamp program was set up with the best of intentions and that it is a necessary program for many people in this country who find themselves in circumstances beyond their control. Certainly, we, as a society, have a human obligation to help people who are in need. But, Mr. President, I do not believe the American taxpayer is under any obligation to pay for food for people who are perfectly capable of working and who simply find it easier to live off the public dole.

In 1961, the Federal Government established a small antihunger program in eight U.S. counties, at a cost of $13 million. This experimental project blossomed in the current food stamp program that was enacted in 1964 at a cost of $56 million. By 1978, it cost exactly 100 times the original amount. This year, we are talking about a program that will exceed $12 billion. Currently, 1 out of 10 Americans are receiving food stamps—22 million people. We have 94 million taxpayers in this country. Every one of those taxpayers pays $127.66 a year to finance this program. The unbelievable growth of food stamps tells me that structural changes are needed in order to reduce the number of able-bodied people who are receiving benefits. Changes are also needed not only to eliminate abuse, but also to cut down on the fraud that is so widespread in the system. The Food Stamp Reform Act achieves these goals by doing the following:

First. Restores the food stamp purchase requirement eliminated in 1977, with an exemption for the elderly and disabled.

Second. Limits eligibility to those with gross incomes at or below 100 percent of poverty.

Third. Permits the States to use the same assets test as for aid to families with dependent children (AFDC), or in the case of the elderly or disabled, permits the use of the assets test for supplemental security income (SSI).

Fourth. Requires photo identification cards be issued and that food stamps be countersigned.

Fifth. Counts as income for eligibility determination such things as income tax rebates, Federal energy assistance.

Sixth. Reduces the standard deduction from $85 to $60.

Seventh. Reduces the age of a child which exempts an individual from work registration from 6 to 3, except where appropriate child care is not available.

Eighth. Freezes the indexing of benefit levels; that is, child care deduction, excess shelter deduction.

Ninth. Requires the States to pay for any excess in the error rate above 3 percent.

Tenth. Requires that purchases with food stamps be made in even dollar amounts. Any amount over an even amount must be paid by the recipient in cash.

Eleventh. Eliminates the $10 minimum benefit.

Twelfth. Permits the Secretary to require cross-matching with dividend and interest income information reported to the IRS to determine unreported income to the household.

Thirteenth. Permits the States to require repayment through unemployment compensation benefits if a participant has been receiving food stamps through fraudulent means.

Fourteenth. Permits the States to intercept Federal income tax refunds to pay for overissuance due to fraud.

Fifteenth. Simplifies definition of "household."

Sixteenth. Permits, rather than requires, the States to provide expedited service for certain households.

Back in November 1980, the investigations staff of the Senate Appropriations Committee reported that "we believe far too little is being done to detect and prosecute food stamp recipient fraud." Three years later, in its report of February 4, 1983, GAO determined that we lose about $1.2 billion every year from the food stamp program because of overissuance, errors, and fraud. Year after year passes, and we still have done relatively little to clean up the food stamp program. I think it is a national disgrace, and this bill is designed to do something about it. The provisions in this bill are roughly divided into three categories—tightening up on eligibility requirements, addressing fraud and abuse and cutting back on waste.

Mr. President, I have always thought it was ludicrous to establish a poverty level, and then make food stamps eligibility at something above that level. If the poverty level, as defined by the Office of Management and Budget, is too low, then it should be changed, but until that is determined to be the case, then eligibility for assistance programs should be set at 100 percent of the poverty level.

Likewise, I have never understood why we have allowed so many deductions for eligibility determination. If a person receives a low-income energy assistance check—that is income. There is no way you can get around that fact. Money is money, no matter what form it comes in, and all of that should be taken into account when determining eligibility.

According to the GAO report issued in February of this year, although Federal losses in the food stamp program can occur in any number of ways, the biggest problem lies in how a household's eligibility is determined. The Food Stamp Reform Act simplifies the definition of households eligible to participate in the food stamp program in such a way that, with the exception of elderly or disabled persons, all individuals living together would be defined as a household. States would be permitted to draw up

criteria to provide certain exceptions, if they so desire.

The bill contains several provisions relating to fraud and abuse that I believe are just plain commonsense. The requiring of photo-identification cards and countersigned stamps, much like travelers' checks, will help eliminate the black market in food stamps, plus help reduce the estimated $20 billion, according to GAO, that is lost each year due to reported losses and theft of food coupons mailed to participating households. Allowing the cross-checking of IRS records to verify interest and dividend income, and the reported level of assets, such as a savings account, is one of the recommendations that GAO makes in it's report. Additionally, if a person has received food stamps through fraudulent means, then we should be able to intercept unemployment benefits and income tax refunds.

One of the complaints I hear most often from Idahoans about food stamps is when a participant buys a small item and uses the change from the food stamp to purchase beer or cigarettes. By requiring even dollar purchases, this abuse will be eliminated, and the food stamp participant will only have to pay a maximum of 99 cents. Requiring an out of pocket expense of 1 to 99 cents is hardly an intolerable burden.

Responsible people who work in food stamp offices will tell you that the "expedited service" requirement is one of the most abused provisions of the current program. Currently a food stamp recipient can request expedited service and must receive the assistance within 5 days. All this provision does is permit the people to hop from food stamp office to food stamp office. The February GAO report indicates that this "multiple participation" is quite extensive. Inadequate time for verification precludes early detection of a fraudulent application. Our bill simply allows a State to provide expedited service, rather than requiring it.

Finally, this legislation will require that the States pay for any excess in the error rate above 3 percent. The food stamp program currently has an error rate of over 10 percent. That is totally unacceptable, but the States have no real reason to try to correct this problem since the program is 100 percent funded by the Federal Government. I believe it is entirely reasonable to require this lower rate, or to require reimbursement to the Federal Government.

The GAO report indicates that the four most prevalent abuses of the system include:

Failing to accurately report income and assets.

Opening multiple cases.

Filing false claims of lost or stolen coupons and authorization-to-participate cards.

Failing to report changes that could result in terminated eligibility or reduced benefit levels.

The bill Senator GARN, Senator ARMSTRONG, and I are offering addresses all of these areas and does so in manner that will not harm those people who are truly eligible for food assistance. The food stamp program is one of the most abused and wasteful programs the Federal Government operates, and I think that vast majority of the American people agree with me. Why Congress is always so hesitant to take a stand on this issue and clean up the program is beyond me. It is only reasonable to think that when we see abuse, we should act to do something about it. We have made some advances in food stamp reform—but it simply has not been enough. All of the things my bill deals with need to be done. They needed to be done years ago, but better late than never.

I ask unanimous consent that the text of the bill be inserted in the RECORD at this time.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1727

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; TABLE OF CONTENTS

SECTION 1. (a) This Act may be cited as the "Food Stamp Reform Act of 1983".

(b) The table of contents for this Act is as follows:

TABLE OF CONTENTS

Sec. 1. Short title; table of contents.
Sec. 2. References to the Food Stamp Act of 1977.

TITLE I—DEFINITIONS

Sec. 101. Purchase requirement.
Sec. 102. Households.
Sec. 103. Adjustment of eligibility and benefit levels.

TITLE II—ELIGIBLE HOUSEHOLDS

Sec. 201. Income standards of eligibility.
Sec. 202. Nonrecurring lump-sum payments.
Sec. 203. Energy assistance payments.
Sec. 204. Standard deductions.
Sec. 205. Resource limitations.

TITLE III—ELIGIBILITY DISQUALIFICATIONS

Sec. 301. Parents and other caretakers of children.

TITLE IV—ISSUANCE AND USE OF COUPONS

Sec. 401. Cash change.

TITLE V—VALUE OF ALLOTMENT

Sec. 501. Minimum allotment.

TITLE VI—ADMINISTRATION

Sec. 601. Expedited coupon issuance.
Sec. 602. Photographic identification cards.
Sec. 603. Countersignature of coupons.
Sec. 604. Interest and dividend information.

TITLE VII—COLLECTION AND DISPOSITION OF CLAIMS

Sec. 701. Food stamp intercept of unemployment benefits.
Sec. 702. Food stamp intercept of Federal tax refunds.

TITLE VIII—ADMINISTRATIVE COST-SHARING AND QUALITY CONTROLS

Sec. 801. State agency liability for errors.

TITLE IX—EFFECTIVE DATE

Sec. 901. Effective date.

REFERENCES TO THE FOOD STAMP ACT OF 1977

SEC. 2. Except as otherwise specifically provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.).

TITLE I—DEFINITIONS

PURCHASE REQUIREMENT

SEC. 101. (a) Section 3(b) (7 U.S.C. 2012(b)) is amended by inserting "and any amount to be paid by the household for the allotment" before the period at the end thereof.

(b) The first sentence of section 4(a) (7 U.S.C. 2013(a)) is amended by inserting "which has a greater monetary value than the charge to be paid for the allotment by the households" before the period at the end thereof.

(c) Section 8 (7 U.S.C. 2017) is amended—

(1) by striking out the section heading and inserting in lieu thereof the following: "VALUE OF AND CHARGES FOR ALLOTMENT";

(2) by inserting "which is in excess of the amount charged the household for the allotment" after "household" in subsection (b); and

(3) by adding at the end thereof the following new subsections:

"(e) (1) A household shall be charged for the allotments issued to them, except that—

"(A) allotments shall be issued without charge to a household containing an elderly or disabled member; and

"(B) allotments may be issued without charge to a household with an income of less than $30 per month for a family of four under standards of eligibility prescribed by the Secretary.

"(2) The amount of the charge shall represent a reasonable investment on the part of the household, except that the charge may not exceed 30 per centum of the household's income.

"(f) Funds derived from the charges made for allotments shall be promptly deposited, in a manner prescribed in regulations issued pursuant to this Act, in a separate account maintained in the Treasury of the United States for such purpose. The deposits shall be available, without limitation to fiscal years, for the redemption of coupons.".

(d) Section 11 (7 U.S.C. 2020) is amended—

(1) in subsection (e)—

(A) by striking out "and" at the end of paragraph (20); and

(B) by adding at the end thereof the following new paragraph:

"(22) notwithstanding any other provision of law, for the institution of procedures under which a household participating in the food stamp program may have any charges for its allotment deducted from any payment the household receives under title IV of the Social Security Act (42 U.S.C. 601 et seq.) and have its allotment distributed to it with the payment;"; and

(2) In subsection (h), by striking out "Treasury" and all that follows through the period at the end thereof and inserting in lieu thereof "separate account established under section 8(f), a sum equal to the amount by which the value of any coupons

issued as a result of the negligence or fraud exceeds the amount that was charged for the coupons under section 8(e)(2)".

(e) Section 15(a)(7 U.S.C. 2024(a)) is amended by inserting "purchase," after "for the".

(f) Section 18 (7 U.S.C. 2027) is amended—

(1) by adding after the first sentence of subsection (a) the following new sentence: "Such portion of any such appropriation as may be required to pay for the value of the coupon allotments issued to eligible households which is in excess of the charges paid by the households for the allotments shall be transferred to and made a part of the separate account established under section 8(f).";

(2) by amending the first sentence of subsection (b) to read as follows: "In any fiscal year, the Secretary shall limit the value of coupons issued which is in excess of the value of coupons for which households are charged, to an amount which is not in excess of the portion of the appropriation for the fiscal year which is transferred to the separate account under subsection (a).";

and

(3) by adding at the end thereof the following new subsection:

"(f) If the Secretary determines that any of the funds in the separate account established under section 8(f) are no longer required to carry out this Act, the unneeded funds shall be paid into the miscellaneous receipts of the Treasury.".

HOUSEHOLDS

SEC. 102. Section 3(i) (7 U.S.C. 2012(i)) is amended—

(1) by striking out "or who, while living with others," in clause (1) of the first sentence and inserting in lieu thereof "and";

(2) by striking out "separate and apart from the others, or" in clause (1) of the first sentence and inserting in lieu thereof a comma;

(3) by striking out "together" the second time it appears in clause (2) of the first sentence;

(4) by inserting before the period at the end of the first sentence the following: ", or (3) at the option of the State agency, one or more individuals who while living with others, customarily purchase food and prepare meals for home consumption separate and apart from the others"; and

(5) by inserting after the second sentence the following new sentence: "Subject to the preceding sentence and the limitation of clause (2) of the first sentence of this subsection relating to parents and children, or siblings, who live together, a State agency may prescribe criteria to determine whether one or more individuals who while living with others, customarily purchase food and prepare meals for home consumption separate and apart from the others qualify as a household under clause (3) of the first sentence of this subsection.".

ADJUSTMENT OF ELIGIBILITY AND BENEFIT LEVELS

SEC. 103. (a) The second sentence of section 3(o) (7 U.S.C. 2012(o)) is amended—

(1) by inserting "and" after "September 30" at the end of clause (5); and

(2) by striking out ", (7)" and all that follows through "household size" at the end of clause (8).

(b) Section 5(e) (7 U.S.C. 2014(e)) is amended—

(1) by striking out the second sentence; and

(2) in clause (2) of the fourth sentence, by striking out "adjusted (i)" and all that follows through "twelve months ending the preceding June 30,".

(c) The amendments made by this section shall become effective on the date of the enactment of this Act.

TITLE II—ELIGIBLE HOUSEHOLDS

INCOME STANDARDS OF ELIGIBILITY

SEC. 201. Section 5(c)(2) (7 U.S.C. 2014(c)(2)) is amended by striking out "by more than 30 per centum".

NONRECURRING LUMP-SUM PAYMENTS

SEC. 202. (a) Section 5(d) (7 U.S.C. 2014(d)) is amended by striking out clause (8).

(b) Section 5(f)(1) (7 U.S.C. 2014(f)(1)) is amended—

(1) by inserting ", other than income of the type described in subparagraph (C)," after "one year" in subparagraph (A); and

(2) by adding at the end thereof the following new subparagraph:

(C) Household income for those households that receive income in the form of nonrecurring lump-sum payments, including, but not limited to, income tax refunds, rebates, or credits, retroactive lump-sum social security or railroad retirement pension payments, and retroactive lump-sum insurance settlements, shall be income of the household in the month received. The household shall be ineligible for participation in the food stamp program for the whole number of months that equals (i) the sum of such amount and all other income received in such month, not excluded under subsection (d), divided by (ii) the nonfarm income poverty guidelines applicable to such household. Any income remaining (which is less than the applicable monthly standard) shall be treated as household income received in the first month following the period of ineligibility determined under the preceding sentence.".

ENERGY ASSISTANCE PAYMENTS

SEC. 203. (a) Section 5(d) (7 U.S.C. 2014 (d)) (as amended by section 202(a) of this Act) is amended—

(1) by striking out clause (11);

(2) by inserting "and" at the end of clause (10); and

(3) by redesignating clause (9), (10), and (12) as clauses (8), (9), and (10), respectively.

(b) Section 2605(f) of the Low-Income Home Energy Assistance Act of 1981 (42 U.S.C. 8624 (f)) is amended—

(1) by striking out "food stamps,"; and

(2) by inserting ", other than the Food Stamp Act of 1977" before the period at the end thereof.

STANDARD DEDUCTIONS

SEC. 204. The first sentence of section 5(e) (7 U.S.C. 2014(e)) is amended by striking out "$85" and inserting in lieu thereof "$60".

RESOURCE LIMITATIONS

SEC. 205. Section 5(g) (7 U.S.C. 2014(g)) is amended—

(1) by striking out "The" in the first sentence and inserting in lieu thereof "(1) Subject to paragraph (2), the"; and

(2) by adding at the end thereof the following new paragraph:

"(2) (A) In lieu of the resource limitations provided for in paragraph (1), a State may, if it so elects, establish resource limitations provided for in subparagraph (B) only, subparagraph (C) only, or both such subparagraphs.

"(B)(i) As used in this subparagraph, the term 'resources' has the same meaning given the term for purposes of determining eligibility for benefits under title XVI of the Social Security Act (42 U.S.C. 1601 et seq.) (relating to the supplemental security income program).

"(ii) If a household includes an elderly or disabled member, the combined resources of all members of the household may not exceed—

"(I) in the case of a household consisting of only one member, the amount referred to in section 1611(a)(1)(B)(ii) of the Social Security Act (42 U.S.C. 1382(a)(1)(B)(ii)) (relating to an individual having no spouse with whom the individual is living); and

"(II) in the case of a household consisting of more than one member, the amount referred to in section 1611(a)(2)(B) of the Social Security Act (42 U.S.C. 1382(a)(2)(B)) (relating to an individual who has an eligible spouse).

"(D)(i) As used in this subparagraph, the term 'resouces' has the same meaning given the term for purposes of determining eligibility for aid under the State plan approved under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.).

"(ii) If a household does not include an elderly or disabled member, the combined resources of all members of the household may not exceed the resource limitation applicable to a household of the same size as the household under the State plan approved under part A of title IV of the Social Security Act (42 U.S.C. 601 et seq.).

"(E) The choice by a State to use resource limitations under this paragraph in lieu of the limitations under paragraph (1) shall be uniform throughout the State.".

TITLE III—ELIGIBILITY DISQUALIFICATIONS

PARENTS AND OTHER CARETAKERS OF CHILDREN

SEC. 301. Clause (B) of section 6(d)(2) (7 U.S.C. 2915(D)(2)(B)) is amended to read as follows: "(B) a parent or other member of a household with responsibility for the care of (i) a dependent child who is under three years of age, (ii) a dependent child who is three years of age or older but under six years of age, in any case in which adequate care is not otherwise available, or (iii) an incapacitated person;".

TITLE V—ISSUANCE AND USE OF COUPONS

CASH CHANGE

SEC. 401. Section 7(b) (7 U.S.C. 2016(b)) is amended—

(1) by striking out ": *Provided further,*" and all that follows through the period at the end thereof and inserting in lieu thereof a period; and

(2) by adding at the end thereof the following new sentences: "Change in any form, other than uncancelled or unmarked coupons which were previously accepted for eligible foods, may not be given to eligible households for food purchases. Eligible households using coupons to purchase food shall pay cash for the amount of such purchase which exceeds the value of the lowest coupon denomination issued.".

TITLE V—VALUE OF ALLOTMENT

MINIMUM ALLOTMENT

SEC. 501. Section 8(a) (7 U.S.C. 2017(a)) is amended by striking out the colon after "dollar" and all that follows through the period at the end thereof and inserting in lieu thereof a period.

TITLE VI—ADMINISTRATION

EXPEDITED COUPON ISSUANCE

SEC. 601. Paragraph (9) of section 11(e) (7 U.S.C. 2020(2)(9)) is amended to read as follows:

"(9) at the option of the State agency, for the provision of coupons on an expedited basis to categories of households designated by the State agency to be in immediate need because such households each have—

"(A) household income, as described in section 5(d), that is less than $85 per month; and

"(B) financial resources, as described in section 5(g), that do not exceed $100;".

PHOTOGRAPHIC IDENTIFICATION CARDS

SEC. 602. Section 11(e)(16) (7 U.S.C. 2020(e)(16)) is amended by striking out "in those" and all that follows through "integrity,".

COUNTERSIGNATURE OF COUPONS

SEC. 603. Section 11(e) (7 U.S.C. 2020(e)) (as amended by section 101(d)(1) of this Act) is amended by adding at the end thereof the following new paragraph:

"(23) that the State agency shall require a member of a household to sign a coupon at the time the coupon is issued to, and used by, the member;".

INTEREST AND DIVIDEND INCOME

SEC. 604. (a) Section 11 (7 U.S.C. 2020) is amended by adding at the end thereof the following new subsection:

"(o) The Secretary, in consultation with the Inspector General of the Department of Agriculture, may require a State agency, the Inspector General, or both, to request and utilize information available under section 6103(l)(9) of the Internal Revenue Code of 1954 pertaining to the interest and dividend income of the households in any State or area if the Secretary determines that such action would aid in protecting the integrity of the food stamp program in such State or area.".

(b)(1) Section 6103(1) of the Internal Revenue Code of 1954 (relating to disclosure of returns and return information for purposes other than tax administration) is amended by adding at the end thereof the following new paragraph:

"(9) Disclosure of certain return information to Federal, State, and local agencies administering federally funded needs-based programs.

"(A) Return information from Internal Revenue Service.—The Secretary shall, upon written request, disclose interest and dividend data from automated files containing return information from information returns made pursuant to section 6041, 6042, and 6049 to officers and employees of an appropriate Federal, State, or local agency administering a federally funded needs-based program.

"(B) Restriction on disclosure.—The Secretary shall disclose return information under subparagraph (A) only for purposes of, and to the extent necessary in, determining an individual's eligibility for benefits, or the amount of benefits, under a federally funded needs-based program,".

(2)(A) Paragraph (2) of section 6103(a) of such Code is amended by striking out "or of any local child support enforcement agency" and inserting in lieu thereof ", any local child support enforcement agency, or any local agency administering a federally funded needs-based program".

(B) Subparagraph (A) of section 6103(p)(3) of such Code (relating to records of inspection and disclosure) is amended by striking out "or (8)" and inserting in lieu thereof "(8), or (9)".

(C) Paragraph (4) of section 6103(p) of such Code (relating to safeguards) is amended by striking out "or (8)" in so much of such paragraph as precedes subparagraph (A) thereof and inserting in lieu thereof "(8), or (9)".

(D) Clause (i) of section 6103(p)(4)(F) of such Code is amended by striking out "or (8)" and inserting in lieu thereof "(8), or (9)".

(E) The first sentence of paragraph (2) of section 7213(a) of such Code is amended by striking out "or (8)" and inserting in lieu thereof "(8), or (9)".

TITLE VII—COLLECTION AND DISPOSITION OF CLAIMS FOOD STAMP INTERCEPT OF UNEMPLOYMENT BENEFITS

SEC. 701. (a) Section 13 (7 U.S.C. 2022) is amended by adding at the end thereof the following new subsection:

"(c)(1) A State agency may determine on a periodic basis, from information supplied pursuant to section 3(b) of the Wagner-Peyser Act (29 U.S.C. 49b(b)), whether an individual receiving compensation under the State's unemployment compensation law (including amounts payable pursuant to an agreement under a Federal unemployment compensation law) owes an uncollected overissuance.

"(2) A State agency may recover an uncollected overissuance—

"(A) by entering into an agreement with an individual described in paragraph (1) under which specified amounts will be withheld from unemployment compensation otherwise payable to the individual and furnishing a copy of the agreement to the State agency administering the unemployment compensation law, or

"(B) in the absence of an agreement, by obtaining a writ, order, summons, or other similar process in the nature of garnishment from a court of competent jurisdiction to require the withholding of amounts from the unemployment compensation.

"(3) As used in this subsection, the term 'uncollected overissuance' means the amount of an overissuance of coupons, as determined under subsection (b)(1), which has not been recovered pursuant to subsection (b)(1).".

(b)(1) Section 11(e) (7 U.S.C. 2020(e)) (as amended by section 603 of this Act) is amended by adding at the end thereof the following new paragraph:

"(24) at the option of the State, for procedures necessary to obtain payment of uncollected overissuance of coupons from unemployment compensation pursuant to section 13(c); and".

(2) Section 3(b) of the Wagner-Peyser Act (29 U.S.C. 49b(b)), as amended by sections 181(i) and 501 of the Job Training Partnership Act (96 Stat. 1356 and 1392), is amended—

(A) by striking out "or" the second place it appears and inserting in lieu thereof a comma; and

(B) by inserting after "such Act," the following: "or of a State agency charged with the administration of the food stamp program in a State under the Food Stamp Act of 1977 (7 U.S.C. 2011 et seq.),".

(3) Section 303(d) of the Social Security Act (42 U.S.C. 503(d)) is amended—

(A) by redesignating pargraphs (2) and (3) as paragraphs (3) and (4), respectively; and

(B) inserting after paragraph (1) the following new paragraph:

"(2)(A) The State agency charged with the administration of the State law—

"(i) may require each new applicant for unemployment compensation to disclose whether the applicant owes an uncollected overissuance (as defined in section 13(c)(3) of the Food Stamp Act of 1977) of food stamp coupons,

"(ii) may notify the State food stamp agency to which the uncollected overissuance is owed that the applicant has been determined to be eligible for unemployment compensation if the applicant discloses under clause (i) that the applicant owes an uncollected overissuance and the applicant is determined to be so eligible,

"(iii) may deduct and withhold from any unemployment compensation otherwise payable to an individual—

"(I) the amount specified by the individual to the State agency to be deducted and withheld under this clause,

"(II) the amount (if any) determined pursuant to an agreement submitted to the State food stamp agency under section 13(c)(2)(A) of the Food Stamp Act of 1977, or

"(III) any amount otherwise required to be deducted and withheld from the unemployment compensation pursuant to section 13(c)(2)(B) of such Act, and

"(iv) shall pay any amount deducted and withheld under clause (iii) to the appropriate State food stamp agency.

"(B) Any amount deducted and withheld under subparagraph (A)(iii) shall for all purposes be treated as if it were paid to the individual as unemployment compensation and paid by the individual to the State food stamp agency to which the uncollected overissuance is owed as repayment of the individual's uncollected overissuance.

"(C) For purposes of this paragraph, the term 'unemployment compensation' means any compensation payable under the State law (including amounts payable pursuant to an agreement under a Federal unemployment compensation law).

"(D) A State food stamp agency to which an uncollected overissuance is owed shall reimburse the State agency charged with the administration of the State unemployment compensation law for the administrative costs incurred by the State agency under this paragraph which are attributable to repayment of uncollected overissuance to the State food stamp agency to which the uncollected overissuance is owed.".

FOOD STAMP INTERCEPT OF FEDERAL TAX REFUNDS

SEC. 702. (a) Section 13 (7 U.S.C. 2022) (as amended by section 701(a) of this Act) is amended by adding at the end thereof the following new subsection:

"(d)(1) Except as provided in paragraph (7), a State agency may inform the Secretary of the Treasury of the identity of an individual who owes an uncollected overissuance and the amount of the uncollected overissuance.

"(2) Upon receiving notice from a State agency pursuant to paragraph (1), the Secretary of the Treasury shall determine whether any amounts, as refunds of Federal taxes paid, are payable to the named individual (regardless of whether the individual filed a tax return as a married or unmarried individual). If the Secretary of the Treasury finds that an amount is payable, the Secretary of the Treasury shall withhold from the refunds an amount equal to the amount of the uncollected overissuance, and pay the amount to the State agency (together with notice of the individual's home address).

"(3) If the offset procedure is applied for the benefit of a State agency pursuant to paragraph (2), the State agency must pay a fee to the Secretary of the Treasury to reimburse the Secretary for the full cost of

applying such procedure. Such fees shall be credited to the appropriation accounts which bore all or part of the costs involved in making the collections.

"(4) The Secretary of the Treasury shall issue regulations, approved by the Secretary, which prescribe—

"(A) the time at which a State agency must submit notice of an uncollected overissuance;

"(B) the manner in which the notice must be submitted;

"(C) the necessary information which must be contained in or accompany the notice; and

"(D) the amount of the fee that a State agency must pay to reimburse the Secretary pursuant to paragraph (3).

"(5) The Secretary of the Treasury shall advise the Secretary, at least annually, of—

"(A) the State agencies which have furnished notices of uncollected overissuances under this subsection;

"(B) the number of cases in each State with respect to which the notices have been furnished under this subsection;

"(C) the amount of uncollected overissuances sought to be collected under this subsection by each State; and

"(D) the amount of the collections actually made under this subsection in the case of each State agency.

"(6) As used in this subsection, the term 'uncollected overissuance' means the amount of an overissuance of coupons, as determined under subsection (b)(1), which has not been collected pursuant to subsection (b)(1) or (c) within three months of the determination of the overissuance.

"(7) An uncollected overissuance shall be subject to the offset procedure described in this subsection if the amount of the uncollected overissuance in the current or previous taxable years and any other amounts owed to the State agency under similar provisions of Federal law equals $100 or more.".

(b)(1) Section 11(e) (7 U.S.C. 2020(e)) (as amended by section 701(b)(1) of this Act) is amended by adding at the end thereof the following new paragraph:

"(25) at the option of the State agency, for procedures necessary to obtain payment of uncollected overissuances of coupons from Federal tax refunds pursuant to section 13(d).".

(2) The proviso of the first sentence of section 16(a) (7 U.S.C. 2025(a)) is amended by striking out "section 13(b)(1) of this Act" and inserting in lieu thereof "subsections (b)(1), (c), and (d) of section 13".

(3) Section 6402(c) of the Internal Revenue Code of 1954 is amended—

(A) by striking out so much of such subsection as precedes "The amount of" and inserting in lieu thereof the following:

"(c) OFFSETS.—

"(1) OFFSET OF PAST DUE SUPPORT AGAINST OVERPAYMENTS.—";

(B) by striking out "subsection" in the third sentence of paragraph (1) and inserting in lieu thereof "paragraph"; and

(C) by adding at the end thereof the following new paragraph:

"(2) OFFSET OF FOOD STAMP OVERISSUANCES AGAINST OVERPAYMENTS.—The amount of any overpayment to be refunded to the person making the overpayment shall be reduced by the amount of any uncollected overissance (as defined in section 13(d)(6) of the Food Stamp Act of 1977) of food stamp coupons owed by that person and with respect to which the Secretary has been notified by a State agency in accordance with section 13(d) of the Food Stamp Act of 1977. The Secretary shall remit the amount by which the overpayment is so reduced to the State agency to which the uncollected overissuance is due and notify the person who made the overpayment that so much of the overpayment as was necessary to satisfy the person's obligation for an uncollected overissance has been paid to the State agency. This paragraph shall be applied to an overpayment after such overpayment has been reduced (pursuant to paragraph (1)) by the amount (if any) of past-due support owed by such person and prior to the crediting of such overpayment against such person's future liability for an internal revenue tax.".

(c) The amendments made by this section shall apply to taxable years ending after December 31, 1983.

TITLE VIII—ADMINISTRATIVE COST-SHARING AND QUALITY CONTROLS STATE AGENCY LIABILITY FOR ERRORS

SEC. 801. (a) Section 16 (7 U.S.C. 2025) is amended—

(1) by striking out subsections (c) and (d) and redesignating subsections (e), (f), and (g) as subsections (d), (e), and (f), respectively; and

(2) by inserting after subsection (b) the following new subsection:

"(c)(1) As used in this subsection—

"(A) the term 'dollar value equivalent' means the value of allotments determined by multiplying the payment error rate for a fiscal year by the dollar value of all allotments issued during that fiscal year by a State agency; and

"(B) the term 'payment error rate' means the percentage of all allotments issued in a fiscal year by a state agency which are—

"(i) issued to households which fail to meet the eligibility requirements established under section 5 or 6; and

"(ii) overissued to households which meet such requirements.

"(2) The Secretary shall institute an error rate reduction program under which each State agency shall, other than for good cause as determined by the Secretary, pay to the Secretary or have withheld by the Secretary as described in paragraph (4), the dollar value equivalent of the any payment error rate of the State agency which is over 3 per centum, as determined by the Secretary.

"(3) If the Secretary makes a claim against a State for payment under paragraph (2), the State may seek administrative and judicial review of such claim under the procedures set forth in section 14.

"(4) If a claim made against a State for payment under paragraph (2) is ultimately determined to be valid or is not contested by the State, the claim shall be collected by the Secretary through State payment, withholding amounts otherwise payable to the State agency under this Act, or other mechanisms authorized by subchapter II of chapter 37 of title 31, United States Code. Such a claim may be collected on a monthly, quarterly, semiannual, or annual basis, as determined by the Secretary.".

(b)(1) Section 11 (7 U.S.C. 2020) is amended—

(A) by striking out "section 16(e)" in subsection (e)(3) and inserting in lieu thereof "sections 16(d)"; and

(B) by striking out "sections 16(a) and 16(c)" in the second sentence of subsection (g) and inserting in lieu thereof "section 16(a)".

(2) Section 18(e) (7 U.S.C. 2027 (e)) is amended by striking out the second sentence.

(c)(1) Section 11 (7 U.S.C. 2020) (as amended by seciton 604(a) of this Act) is amended by striking out subsection (h) and redesignating subsections (i) through (o) as subsections (h) through (n), respectively.

(2) Section 11(e)(2) (7 U.S.C. 2020 (e)(2)) is amended by striking out "subsection (i)" and inserting in lieu thereof "subsection (h)".

(3) The first sentence of section 18(e) (7 U.S.C 2027(e)) is amended by striking out "11 (g) and (h)" and inserting in lieu thereof "11(g)".

TITLE IX—EFFECTIVE DATE

EFFECTIVE DATE

SEC. 901. Except as provided in sections 103(c) and 702(c) of this Act, the amendments made by this Act shall become effective on October 1, 1983.●

● Mr. ARMSTRONG. Mr. President, I am pleased to join my colleagues, Senators MCCLURE and GARN, introducing this major food stamp reform.

This program is out of control.

I hear from Coloradans all the time about various abuses they see every day in the grocery stores. In the last year, nearly 500 people have written to me to express their concern about this program, and I know other Senators hear the same fears from their constituents.

People were outraged to hear the case of the Texas housepainter (reported in the Washington Post of September 29, 1982) who had applied for food stamps 75 times in 23 different States, and had stolen $14,000 worth of stamps from the program. This went on for 2 years before he was finally caught.

Investigators in Chicago in September of 1982 arrested 42 persons for food stamp fraud, and found that 24 of them were Federal employees. All told, these people had stolen $500,000 worth of food stamps. A similar investigation in Indianapolis at the same time resulted in 21 arrests of store owners, not food stamp recipients, who had traded cash for food stamps and turned in the fraudulent stamps in violation of Federal laws.

An investigation in Virginia known as "Operation Sandcrab" turned up 40 arrests of food stamp cheaters who had illegally exchanged the coupons for stereos, cars, guns, drugs, clothes, and other luxuries.

Mr. President, it is impossible to know how many more people have been involved in food stamp fraud and abuse. But the General Accounting Office estimated in its February 1983 report that waste, abuse, and error result in losses approaching $2 billion per year. And it is important to note that those who are most hurt by these abuses are the people who really need food stamps. That is $2 billion that could have gone to families who needed it. For instance, the same GAO report estimates that $500 million

worth of food stamps are underissued; that is, that people were given inadequate amounts based on their entitlements. And the net losses from these errors could have provided food stamp benefits to 1.7 million needy people for 2 years.

The legislation we are introducing today is aimed at solving the real problems that caused these abuses. We must redouble our efforts to catch those who cheat the system, and cheat the poor, but at the same time, I think it is especially important that we solve the institutional problems that allow these abuses to occur.

For example, GAO reported that during 1981, 16,000 cases of recipient fraud were actually adjudicated, but suggests that fraud is much more prevalent than that. New York City in 1981 made almost no investigations of cases involving inaccurate reporting of income or recipient of multiple benefits, and none were ever referred for adjudication. In California the same year, 14,000 potential fraud cases were investigated but only 242 were ever referred for adjudication.

Part of the problem is that States have little incentive for cracking down on these abuses. The Federal Government pays all of the benefits and a substantial share of the administrative costs of the program, and States are not required to pay for errors, so long as the error rate is no more than 10 percent.

But the GAO report lists many other means whereby the States could do a better job of enforcing the food stamp laws. Cross-checking of computer files to determine multiple applications, and to check other income sources is one way States could be more sure that a person really needs food stamps. And the ability to check IRS records to see that a person reports all his income on a food stamp application is another method of reducing this fraud.

The legislation we are introducing will correct these problems. It addresses 16 particular changes in the system designed to give States the tools and the incentives needed to avoid this kind of waste in the future. And if we expect this program to accomplish its intended purpose, we must act on these matters now.

The food stamp program began as an experiment in eight counties in 1961. That experiment, which cost the taxpayers $13 million, served 150,000 people. It blossomed into the food stamp program in 1964 at a cost of $56 million. By 1978 the program had reached literally 100 times its original cost, and this year it is expected that the program will cost $12 billion to operate. And today more than 22 million Americans receive food stamps.

The rapid increases in the cost of this program are hard to justify in these severe economic times. But they are impossible to justify until we address the abuses. I encourage the Senate to act expeditiously on this bill and I commend Senator MCCLURE for his leadership on what I think is among the most important issues of our times.●

By Mr. NUNN (for himself, Mr. MATTINGLY, Mr. BUMPERS, Mr. CHILES, Mr. DECONCINI, Mr. HEFLIN, Mr. HOLLINGS, Mr. HUDDLESTON, Mr. LEVIN, Mr. MOYNIHAN, Mr. RANDOLPH, Mr. ZORINSKY, Mr. D'AMATO, Mr. ABDNOR, Mr. DURENBERGER, Mr. EAST, Mr. GOLDWATER, Mr. HATFIELD, Mr. HELMS, Mr. KASTEN, Mr. LAXALT, Mr. PERCY, Mr. TOWER, Mr. THURMOND, Mr. BOREN, Mr. BENTSEN, and Mr. INOUYE):

S.J. Res. 142. Joint resolution designating the week of October 3 through October 9, 1983, as "National Productivity Improvement Week"; to the Committee on the Judiciary.

NATIONAL PRODUCTIVITY IMPROVEMENT WEEK

● Mr. NUNN. Mr. President, for several years it has been my pleasure to introduce a Senate joint resolution designating a week in October as "National Productivity Improvement Week." Because one of the most important economic issues facing our Nation is the urgent need to gain a better understanding of the crippling effect of declining or stagnating productivity on the economic health of the United States, I am pleased once again to offer this joint resolution on behalf of the American Institute of Industrial Engineers. This resolution calls on the President of the United States to proclaim October 3 through October 9, 1983, as "National Productivity Improvement Week" for 1983.

As you may know, from 1948 to 1978 American productivity grew at a rather steady annual rate of 2.2 percent. However, since 1978, though there have been varying degrees of quarterly increases and decreases, productivity growth has stalled. This is a dangerous situation because the trend to increased wages and salaries without an accompanying increase in productivity leads to more dollars chasing fewer goods and services, which is one of the root causes of inflation. Therefore, it is extremely important that we recognize the need to continually increase productivity in order to help combat the continuing danger of inflation. Such increased productivity would also help remedy our balance of trade problem and increase our national standard of living.

According to the Congressional Research Service, there are at least five factors which contribute to a general slowdown in productivity growth. First, increases in the price of energy over the last decade have caused a shift away from the production of goods using large amounts of energy toward the production of goods using smaller amounts of energy. The type of industries which use smaller amounts of energy tend to have lower rates of productivity growth. Second, increases in the cost of capital over labor have led some industries to favor increases in the use of labor over the use of capital equipment which would have increased productivity. Third, increases in the cost of financing such productivity increasing equipment have discouraged its purchase. Fourth, the advent of less productive younger workers of the baby-boom generation into the work force has decreased productivity. Finally, throughout the decade of the 1970's, increased Government regulations concerning safety and pollution control caused the diversion of capital into equipment to deal with these problems which does not necessarily increase productivity.

We must remember that productivity growth can help to hold down inflation. Besides helping to break the wage-price spiral, it can help to improve the security of American jobs. At a time of such serious unemployment, the retention of American jobs is vitally important. Over the decade of the 1970's it has been estimated that declining U.S competitiveness cost $125 billion in lost production and 2 million lost jobs. This problem, which some refer to as structural unemployment, is directly related to the fact that our foreign competitors have consistently attained average productivity gains much higher than that of the United States.

There are numerous ways in which productivity growth may be encouraged, such as increased rates of capital investment, reduced energy costs, and improved research and development efforts. However, any successful solution to our productivity crisis will require a clearer appreciation of both the serious effects of declining productivity, as well as the potential that a reversal of this trend holds for reducing the threat of a revival of double-digit inflation.

Mr. President, I am therefore pleased to note that once again the American Institute of Industrial Engineers, whose members are actively engaged in management of plant design and engineering, systems engineering, production and quality control, energy conservation, performance and operations standards, and material flow system and operations research, has continued their public information campaign to promote a better understanding of the critical aspects of productivity improvement. Efforts such as these are to be commended and encouraged, and I am pleased to join in the cosponsorship of this joint resolution designating October 3 through 9, 1983 as "National Productivity Im-

provement Week." I am hopeful that the Senate will act expeditiously on this resolution.●

● Mr. D'AMATO. Mr. President, I rise today in support of the resolution introduced by my distinguished colleague from Georgia, Senator NUNN. It is only fitting that we commemorate the week of October 3, 1983, as National Productivity Week.

The Nation has recently endured the worst recession since the Great Depression of the 1930's. However, we are now entering a period of sustained economic growth without runaway inflation. With disinflation, profits can no longer be realized via price hikes. The marketplace will not tolerate higher prices or wages in an environment of declining inflation. Instead the only way to generate larger profits is through productivity savings. Stable prices force a reduction in costs which results in improved income levels.

For the corporation, both large and small, this means streamlining management, reducing labor costs, and purchasing more productive technology. The American worker plays a critical role in this process. If our Nation's industry is to regain its competitive position, improved productivity must occur. For labor, this does not represent only sacrifice. The best way I know to guarantee jobs is to insure that our products are superior from a price and quality viewpoint. Productivity is paramount to accomplishing this goal. Today, as economic activity burgeons, new strides in productivity are being attained. I applaud both management and labor for these gains. Controlling inflation is critical to the continuation of this process. National Productivity Week will highlight the importance efficiency plays in our Nation's economic well-being.●

ADDITIONAL COSPONSORS

S. 269

At the request of Mr. MCCLURE, the name of the Senator from Utah (Mr. HATCH) was added as a cosponsor of S. 269, a bill to provide for the disposal of silver from the national defense stockpile through the issuance of silver coins.

S. 914

At the request of Mr. MCCLURE, the names of the Senator from South Dakota (Mr. ABDNOR), the Senator from Texas (Mr. BENTSEN), the Senator from West Virginia (Mr. BYRD), the Senator from Minnesota (Mr. BOSCHWITZ), the Senator from Kansas (Mr. DOLE), the Senator from Missouri (Mr. EAGLETON), the Senator from Alaska (Mr. MURKOWSKI), and the Senator from Delaware (Mr. ROTH) were added as cosponsors of S. 914, a bill to protect firearms owners' constitutional rights, civil liberties, and rights to privacy.

S. 1256

At the request of Mr. EAGLETON, the name of the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 1256, a bill to authorize special assistance for desegregation activities.

S. 1301

At the request of Mr. HEINZ, the name of the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 1301, a bill to amend the Internal Revenue Code of 1954 to allow a credit against tax for expenses incurred in the care of elderly family members.

S. 1302

At the request of Mr. HEINZ, the name of the Senator from Hawaii (Mr. MATSUNAGA) was added as a cosponsor of S. 1302, a bill to amend title XVIII of the Social Security Act with respect to purchase and rentals of durable medical equipment.

S. 1306

At the request of Mr. MATHIAS, the name of the Senator from Indiana (Mr. QUAYLE) was added as a cosponsor of S. 1306, a bill to amend the patent law to restore the term of the patent grant for the period of time that nonpatent regulatory requirements prevent the marketing of a patented product.

S. 1520

At the request of Mr. CRANSTON, the name of the Senator from Maryland (Mr. SARBANES) was added as a cosponsor of S. 1520, a bill to authorize redress payments to certain residents of the United States of Japanese-American, Aleut, or other ancestry who were interned, detained, or forcibly relocated by the United States during World War II, and for other purposes.

S. 1602

At the request of Mr. MCCLURE, the name of the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 1602, a bill to amend the Internal Revenue Code of 1954 to provide a partial exclusion for dividends and interest beginning in 1983.

S. 1634

At the request of Mr. WALLOP, the name of the Senator from Utah (Mr. GARN) was added as a cosponsor of S. 1634, a bill to amend the Mineral Lands Leasing Act of 1920 and for other purposes.

S. 1661

At the request of Mr. DOLE, the name of the Senator from Louisiana (Mr. JOHNSTON) was added as a cosponsor of S. 1661, a bill to amend the Internal Revenue Code of 1954 to make technical corrections with respect to the application after 1983 of the percentage depletion allowance to oil and natural gas resulting from secondary or tertiary processes.

S. 1666

At the request of Mr. CHAFEE, the name of the Senator from Wyoming (Mr. SIMPSON) was added as a cosponsor of S. 1666, a bill to amend the Internal Revenue Code of 1954 to reduce the capital gains tax rates for individuals who hold new issues of stock at least 5 years.

SENATE JOINT RESOLUTION 17

At the request of Mr. PRYOR, the name of the Senator from Kansas (Mr. DOLE) was added as a cosponsor of Senate Joint Resolution 17, a joint resolution proposing an amendment to the Constitution to provide for the direct popular election of the President and Vice President of the United States.

SENATE JOINT RESOLUTION 113

At the request of Mr. WILSON, the names of the Senator from Texas (Mr. BENTSEN) and the Senator from Texas (Mr. TOWER) were added as cosponsors of Senate Joint Resolution 113, a joint resolution to provide for the designation of the week beginning June 3 through June 9, 1984, as "National Theater Week."

SENATE JOINT RESOLUTION 121

At the request of Mr. ABDNOR, the name of the Senator from Kansas (Mrs. KASSEBAUM) was added as a cosponsor of Senate Joint Resolution 121, a joint resolution to designate November 1983 as "National Diabetes Month."

SENATE JOINT RESOLUTION 136

At the request of Mr. GLENN, the names of the Senator from Kansas (Mr. DOLE), the Senator from Kentucky (Mr. FORD), and the Senator from New Jersey (Mr. LAUTENBERG) were added as cosponsors of Senate Joint Resolution 136, a joint resolution to recognize "Volunteer Firefighters Recognition Day," as a tribute to the bravery and self-sacrifice of our volunteer firefighters.

SENATE RESOLUTION 130

At the request of Mr. GORTON, the names of the Senator from Arizona (Mr. DECONCINI) and the Senator from Nevada (Mr. LAXALT) were added as cosponsors of Senate Resolution 130, a resolution expressing the sense of the Senate that the President should award the Presidential Medal of Freedom to Barney Clark, to be presented to his family in his memory.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON COMMERCE, SCIENCE, AND TRANSPORTATION

Mr. McCLURE. Mr. President, I ask unanimous consent that the Committee on Commerce, Science, and Transportation be authorized to meet during the session of the Senate on Tuesday, August 2, to meet in execu-

tive session to consider pending calendar business.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON ENERGY, NUCLEAR PROLIFERATION AND GOVERNMENT PROCESSES

Mr. BAKER. Mr. President, I ask unanimous consent that the Subcommittee on Energy, Nuclear Proliferation and Government Processes of the Committee on Governmental Affairs be authorized to meet during the session of the Senate on Wednesday, August 3, to hold an oversight hearing on the collection of criminal fines.

The PRESIDING OFFICER. Without objection, it is so ordered.

SELECT COMMITTEE ON INTELLIGENCE

Mr. BAKER. Mr. President, I ask unanimous consent that the Select Committee on Intelligence be authorized to meet in closed session during the session of the Senate on Wednesday, August 3, to receive a briefing on intelligence matters.

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

TRIBUTE TO MSGR. WILLIAM T. MURPHY

● Mr. MOYNIHAN. Mr. President, I rise today to pay tribute to a distinguished member of New York's clergy, Msgr. William T. Murphy, associate pastor of St. Catharine's Church. This past month Monsignor Murphy celebrated the 50th anniversary of his ordination. A splendid accomplishment indeed.

Recently, the Pelham Sun printed a front page article outlining Monsignor Murphy's distinguished career. I would like to share that article with my colleagues and ask that it be printed in the RECORD.

The article follows:

MONSIGNOR MURPHY IS 50 YEARS A PRIEST

Monsignor William T. Murphy, associate pastor of St. Catharine's Church, celebrated 50 years in the priesthood recently. His response to congratulations is "Incredible!"

He was ordained at St. Patrick's Cathederal on June 10, 1933, by Patrick Cardinal Hayes. Parishioners of St. Catharine's Church celebrated on June 19, due to earlier parchial and school concerns.

Born in Greenwich Village, Manhattan, Msgr. Murphy attended parochial schools and graduated from St. Joseph's Seminary in Yonkers. His first assignment was St. Joseph's Church in Middletown, New York, where he served for three years. He has a distinct memory of each succeeding assignment, seven in all, but insists that no special memories stand out. It has been just day by day parochial duties: Masses, preaching, administering sacraments, hearing confessions.

Within one exception: during World War II, a new church, "A different kind of church", Our Lady of Victory, ministering to business people in the Wall Street area of Manhattan, was built during Father Murphy's pastorate, which extended from 1944-47. It still stands, and is doing fine, he says, with just a hint of pride. Its founding and construction received wide coverage at the time, as any one who lived in New York City at the time well remembers.

Made a Monsignor in 1966, while pastor of St. Joseph's Church in New Windsor, N.Y., Father Murphy was assigned to St. Gabriel's in New Rochelle in 1969, where he remained until 1975. In 1976, he came to Pelham which he loves.

He says Pelham is beautiful the people wonderful, "very much like my first parish". St. Catharine's parish is "like a huge family. That's the influence of Msgr. Philip Murphy". He very much enjoys working with Msgr. Philip Murphy and the other priests, Father Butler, who has been at St. Catharine's for 23 years and Msgr. Darcy, the apostolate for deaf and speech disabled for this area, in residence in Pelham.

The necessity of closing St. Catharine's School is heartbreaking to Msgr. Murphy, but he is glad there are other parochial schools nearby.

Fifty years of "parochial duties" means fifty years of ministering to human needs. While he is required to retire this year upon reaching the age of 75, Msgr. Murphy says that he will be permitted to continue his duties so long as he wishes to do so and is able. And he finds that very fortunate.●

RESTORING MOST-FAVORED-NATION STATUS TO POLAND

● Mr. EAST. Mr. President, it is my understanding that there are continuing discussions within the Department of State and the Office of the U.S. Trade Representative of restoring most-favored-nation status to Poland. Dr. Magnus J. Krynski of Duke University, in a recent letter to Mr. Frederick Montgomery of the Trade Representative's Office, argues forcefully and knowledgeably against such restoration. I believe Dr. Krynski's arguments are compelling, and I recommend that my colleagues consider them seriously. I ask that Dr. Krynski's letter be printed in full in the CONGRESSIONAL RECORD.

The letter follows:

POMOST,
SOCIO-POLITICAL MOVEMENT,
Durham, N.C., May 30, 1983.

MR. FREDERICK MONTGOMERY,
Chairman, Trade Policy Staff Committee, Office of the U.S. Trade Representative, Washington, D.C.

DEAR MR. MONTGOMERY: Mr. Christopher Rac, Coordinator of the Executive Committee of POMOST, A Polish-American organization with headquarters in Chicago, Illinois, and branches in fifteen other states, asked me to write to you in connection with the memorandum addressed to your office some time ago by Mr. Mitchell Kobelinski. We know of Mr. Kobelinski's memorandum, in which he argued the case for the restoration of the Most Favored Nation status to Poland from *Kurier Polski i Polonijny* of March 1983 (No. 1), which printed a lengthy summary of his arguments.

Mr. Kobelinski's memorandum is intellectually unconvincing and his views run counter to the majority opinion of Polish Americans. Why then is it necessary to reply to his memorandum? Mr. Kobelinski is a former director of the U.S. Import-Export Bank and a former director of the U.S. Small Business Administration. His successful career in the past should not obscure the fact that his present argumentation is unsound and that his advocacy of economic collaboration with the unpalatable Jaruzelski regime is generally rejected by the Polish-American community as morally ambiguous.

Before dealing with the specifics of Mr. Kobelinski's memorandum, a brief comment on the major Polish-American organizations and their attitudes is necessary.

Virtually all the major Polish-American organizations strongly support all the sanctions in force at the present moment. In fact, many Polish Americans feel that the sanctions do not go far enough. POMOST, the largest and fastest-growing pro-Solidarity organization, is strongly in favor of sanctions. Other major pro-Solidarity organizations, such as the Committees in Support of Solidarity of New York and Philadelphia, Support of Solidarity of Boston, and Solidarity International of Connecticut and New York, also favor sanctions. I speak of these matters from firsthand knowledge as POMOST's liaison officer to our fraternal pro-Solidarity organizations in the Northeast. I can also say with authority, as a member of the Board of Directors of the Polish Institute of Arts and Sciences in New York (the prestigious organization of academicians, writers, and artists) that the Polish-American intellectual community also backs the sanctions. Finally, even the Polish American Congress, the organization which represents older generations of Polish Americans and is perhaps least responsive to issues of foreign policy, is also officially strongly on record as supporting sanctions. This is of utmost importance, since Mr. Kobelinski is a former chairman of the Illinois Division of the Polish American Congress, and a false impression might have been created that he represents the views of the PAC. The fact is that Mr. Kobelinski's views are not at all representative of any substantial segment of the Polish-American community. Mr. Kobelinski is the President of the Kore International Trade and Investment Company, which is interested in trade with Poland. His views are more likely than not a reflection of the economic interests of that company.

Let me respond now, point by point, to Mr. Kobelinski's arguments:

1. *Kobelinski:* The United States has in the past maintained economic relations with socialist countries the political systems of which it does not approve. By revoking the Most Favored Nation status from socialist Poland, the U.S. is guilty of a double standard.

Response: The MFN status is based on good behavior. East Germany, Czechoslovakia, and the Soviet Union were never granted MFN status; Romania recently lost it for a transgression that is relatively minor compared to all the violations of Polish and international laws perpetrated by the Jaruzelski junta. Here are some of these violations. The Jaruzelski regime violated the decision of the Polish Supreme Court, which legalized Solidarity; it proclaimed Martial Law in contravention of the Polish Constitution, and it also violated many international agreements, statutes, and conventions, in particular those of the Helsinki Final Accord, the International Labor Organization, and the United Nations. Since the onset of Martial Law more than fifty people have been killed or tortured to death in

street demonstrations, prisons, and police stations. Water cannon, concussion grenades, tear gas, and truncheons are regularly used against peaceful demonstrators. Some of the former Solidarity activists are abducted from the streets and factory floors and pressed into penal military battalions, while others are forced, through threats and physical violence, to leave Poland. All the major professional and artistic organizations have been dissolved or indefinitely suspended, and many of their members have lost their positions. A show trial resembling Moscow trials of the 1930s is being prepared against five intellectuals of the Committee for Workers' Defense and seven Solidarity Union leaders. The regime is poisoning the atmosphere of public life by adopting a policy of "divide and conquer." It tries to set farmers against workers, workers against intellectuals, Catholics against Jews, "radical" priests against "reasonable" bishops.

Can anyone in his right mind seriously suggest, as Mr. Kobelinski apparently does, that this grotesque regime, which combines in a bizarre manner many of the worst features of Stalinism, Nazism, and Prussian militarism, should deserve privileged treatment by the United States Government?

2. *Kobelinski:* The U.S., by applying sanctions and embargoes, is losing its credibility as a trading partner.

Response: Mr. Kobelinski defines credibility in a very narrow sense, in terms of trading credibility only. We believe that political credibility is more important, that there are larger interests than just the narrow economic ones. The case for trade with the East has always been argued on the basis of leverage; if we are not going to use this leverage, there is no longer any justification for trading. Besides, the U.S. should not be concerned about its reputation as a trading partner in the eyes of the regime that the President of the United States in an apt, if somewhat understated phrase, described as a "bunch of no good lousy bums."

3. *Kobelinski:* Poland was one country with which the U.S. had a favorable trade balance.

Response: This is not a serious consideration, since the amount of trade was rather insignificant. Besides, we do not believe that trade with the Soviet bloc should be used to solve the economic difficulties of the West, such as recession, unemployment, and balance of trade. Other ways need to be found to handle these problems. In this, I believe, Polish Americans are totally in agreement with the policies of the present Administration which is trying to persuade our NATO allies to adopt a similar stance.

4. *Kobelinski:* The Jaruzelski government is liberal, and this is exemplified by the fact that 85 percent of agriculture is in private hands and Jaruzelski is doing everything in his power to offer inducements to peasants to increase their production.

Response: Polish agriculture has been in private hands since 1956 and this fact has nothing to do with any liberalism on the part of the present government. In fact, the past two governments also courted the peasants, only to crack down on them later on. Jaruzelski seems to be repeating this pattern; he has recently levied a crippling new tax on farmers.

5. *Kobelinski:* The Jaruzelski government is sincerely engaged in reforms aimed at the decentralization of the economy, and it should be helped by the West to achieve this goal.

Response: The decentralization plans have already met with serious resistance at the local level by vested interests and are not likely to be implemented. The nation's leading economists are in internment camps and prisons now, but even Jaruzelski's economists agree that the economy is at present in a much worse state than it was before the introduction of Martial Law and they have ceased quoting statistics. The downward spiral of the Polish economy continues, and practically everyone agrees that its end is nowhere in sight. One Communist journalist recently stated that Poland would be well-advised to apply for the status of a Third World country, so that it would be able to receive more loans and credits.

6. *Kobelinski:* If the U.S. does not rescind sanctions Poland will not be able to pay its debt to the U.S.

Response: It is obvious to everyone that Poland is actually in default and will never be able to repay its debts. A recent article in *Forbes* magazine mentioned that the IMF is "giving nightly thanks" for the fact that Poland is not one of its members. Jaruzelski has unilaterally proclaimed Poland in default by suspending payments on the interest. Everyone realizes that the Commodity Credit Corporation is making payments to American bankers from taxpayers' money as part of a charade to help our imprudent bankers with their bookkeeping. Polish Americans believe that those payments should be stopped and Poland declared in default. The Polish Communists were not paying the debt when they had MFN status, and they are not paying it now. Furthermore, they were always cynical about their obligations and never intended to pay. In support of this argument, I refer you to the excellent piece by John Van Meer in *Commentary* (December 1982, pp. 18-19). Mr. Kobelinski uses the argument that the Poles may repay the debt simply to appeal to Western public opinion.

7. *Kobelinski:* Sanctions hurt the average Pole by limiting the quantity of goods on the market.

Response: The Polish people firmly support sanctions and are enthusiastic pro-Reaganites. The Poles are aware that even if they may be hurt economically, so will be the regime, and they take a long historical view that the present repressive regime should not be aided if one expects any reversal of policy.

Besides, it is highly debatable that the regime would put any goods on the market which would benefit the average citizen. The Government spokesman, Jerzy Urban, has cynically declared that the Government "will always have enough food for themselves." Polish consumer items, totally unavailable in Poland, are being sold in New York City, and consumer goods that come to Poland as gifts from the West are often used as an instrument of political control. There have been recorded cases of relief food from Germany going to the ZOMO police. Therefore, the argument that trade with Poland will improve the plight of the average Pole is specious.

Mr. Kobelinski is factually correct in only one section of this memorandum. It is true that the Polish regime has called upon Polish-American businessmen to establish private enterprises in Poland, and it is also true that some businessmen responded to the invitation. There is no question that for the next few months or years there will be oportunities in Poland for shortsighted petty entrepreneurs to profit from the collapse of the Polish economy. If, however, the previous pattern of treating private business in Poland is repeated, the entrepreneurs will eventually be forced out of business by heavy taxation and a full array of bureaucratic harassments. The final plight of those who choose to traffic with the Martial Law regime is of no concern to POMOST. POMOST's main concern, however, is to expose Mr. Kobelinski's elaborate structure of economic and political rationalizations for what it really is—a smoke screen to conceal the desire of a handful of businessmen for immediate financial profit.

To summarize: Sanctions, even though they do not go far enough, are effective, as evidenced by the savage anti-American and anti-Reagan campaign of vilification unleashed by the Jaruzelski regime. The people of Poland overwhelmingly support the retention of sanctions. Sanctions also have a psychological and symbolic dimension: they reassure the Polish people that their struggle is not forgotten and that the world's greatest democracy, the United States of America, is on their side.

The spirit of resistance in Poland remains strong. The influence of Solidarity's ideals continues unabated in Poland and beyond its borders—in Hungary and even in distant Cuba. The U.S. should support the great Polish rebellion against totalitarianism not only because of the obvious legitimacy of the Poles' struggle for democracy and human rights. It is in the national interest on the U.S. to support movements that will weaken and destabilize totalitarian Communist regimes world-wide. President Reagan, in his superb speech to the British Parliament, announced the formation of the American Political Foundation for the purpose of helping create pluralistic and democratic movements in the Third World and in the Communist bloc. In Poland the U.S. does not need to teach the people the rudiments of democracy and trade unionism; a highly sophisticated movement of pluralistic democracy is already in existence there. Supporting this movement will be in keeping with this Administration's avowed intention to assume the ideological offensive in our conflict with the U.S.S.R. We can think of no easier, more natural, and least costly way of implementing the President's policy of supporting the emergence of pluralistic democracies abroad than the retention of the present sanctions against Poland.

Such a policy will have the enthusiastic support of POMOST, of other pro-Solidarity groups, and of the vast majority of the Polish-American community. Polish Americans have been concerned with the "Carterization" of U.S. foreign policy, with its constant shifts and vacillations. We had high hopes of the Reagan Administration, and by and large we have not been disappointed. We continue to hope that in President Reagan's second term the firm and long-range policy of linking trade to the Communist block's behavior world-wide will be applied consistently. The premature removal of sanctions would be a bitter disappointment to Polish Americans; we would regard it as an abandonment, for no valid reason, of a superb movement which is shaking the foundations of the Soviet Empire.

The situation in Poland is highly unpredictable. Mieczyslaw Rakowski, the Deputy Premier, announced a few days ago that Martial Law may last several years. At about the same time two Soviet journals attacked him as "a dangerous liberal"—proof that Jaruzelski's superiors in Moscow are not quite satisfied with his performance of repression. The Jaruzelski junta may still be replaced by a regime that is even harsher, and the possibility of direct Soviet invasion

cannot be precluded. Under these volatile circumstances the question of lifting sanctions, even the discussion of the topic, POMOST firmly firmly believes should be taken off the agenda of U.S. foreign and trade policy for a good many years—pressures from our Western Allies and Mr. Kobelinski and his cohorts notwithstanding.

POMOST strongly believes that U.S. foreign and trade policies should be conducted on the basis of the national interest of the U.S., and not in response to pressures from a handful of businessmen who represent only their own interests.

Respectfully,

MAGNUS J. KRYNSKI,
Chairman, Department of Slavic Literatures, Duke University and POMOST's North Carolina Representative.●

TRIBUTE TO ATTORNEY JOHN DAY BRIGGS

● Mr. MOYNIHAN. Mr. President, I would like to pay tribute today to a distinguished citizen who has served his community diligently and well.

On Friday September 23, 1983, the Washington County Democratic Committee will be honoring John Day Briggs with a testimonial dinner-dance. I would like to add my appreciation to theirs and share with the Senate some of the outstanding positions Mr. Briggs has held.

John Day Briggs has served in many posts in his lifetime. He has served Washington County, N.Y., as a supervisor, tax attorney, county attorney, compensation attorney, district attorney, and county judge. And he has served in each of these positions with great distinction. Many consider him to be the senior statesman of the county.

But more than anything else, John Day Briggs is a dedicated public servant. The plethora of positions he has held testifies to his dedication to the well-being of the citizens of Washington County. And, in this era of public apathy and indifference, men such as John Day Briggs are rare indeed and deserving of our gratitude.●

POLISH NATIONAL DAY

● Mr. MURKOWSKI. Mr. President, hitherto when I have spoken in this Chamber on the subject of Poland, it has been with the aim of chastising the Polish Communist regime and its Russian overlords.

This day, of all days, should give me ample opportunity to complain most stridently. July 22—called Poland's National Day—commemorates the adoption of the Soviet Constitution which transformed the democratic republic of Poland into the socialist Polish People's Republic. Hardly an event any of us here, nor indeed the vast majority of the Polish people, would like to celebrate.

But of course the Polish Communist authorities will try to use the day to divert the attention of the people. They call this the National Day—a euphemism I suppose for Conquest Day—and try to amuse the Polish people with anecdotes of their subordination to their traditional Russian enemies.

Mr. President, it would perhaps have been preferable to ignore this day as an illegitimate holiday. But better that we take a moment to remember the good that is Poland—its people, its natural resources, its history of courage and fierce independence.

Poland, with 36 million people, is second in area and population only to the Soviet Union in Eastern Europe. It has huge coal and gas reserves, and is a source of copper and sulfur. But Poland also is in serious debt. It owes the United States about $3 billion, and has a total foreign debt of $26 billion.

Poland is therefore not just depressed politically; it is depressed economically.

Yet the people who poured into the streets by the thousands to celebrate Solidarity Day, and by the millions to greet the Pope, did not appear depressed. Angry, yes. Cautious, perhaps. But the fear of reprisals did not seem to deter them. They remember past freedom and fight on, no matter what the consequences. They are like George Bernard Shaw's prisoner, who, when he sees the door of his dungeon open, dashes for it without stopping to think where, or whether, he will get his dinner outside.

Mr. President, on this sad anniversary I congratulate the Polish people for their perseverence in remembering other, more authentic, national days.●

TRIBUTE TO DETECTIVES SALVATORE PASTORELLA AND ANTHONY SENFT AND TO POLICE OFFICER ROCCO PASCARELLA

● Mr. MOYNIHAN. Mr. President, I would like to call to the attention of my colleagues the valiant acts of three members of the New York City Police Department. On January 1, 1983, Detectives Salvatore Pastorella and Anthony Senft, and Police Officer Rocco Pascarella sacrificed personal security to serve the citizens of New York City. These three policemen performed beyond the call of duty. To say that their actions were heroic is to understate their selflessness.

On that night, these three officers were faced with a crime of the worst kind—indiscriminate terrorism. They were called upon to remove a bomb placed by terrorists of the FALN, and, while attempting to remove the device, it detonated, maiming them for life.

Terrorist actions of this kind represent the worst form of cowardice. They attempt to destroy the very fabric of Democratic society, jeopardizing innocent lives. The very weakness of the act is made painfully clear when compared to the strength and bravery of these three officers. They were willing to lay their own lives on the line for what they believed in, while the terrorists were only willing to risk the lives of others.

To Rocco Pascarella, Salvatore R. Pastorella, and Anthony S. Senft our hearts and prayers go out for a healthy recovery and a happy life. Take pride in the knowledge of your great importance to our society. You men will serve as an inspiration for all of us who know of your brave deeds. May we all be as dedicated in our public service as you three men were courageous in your duties on the police force. You have given the citizens of New York yet another reason to take pride in their New York City Police.●

VOLUNTEER FIREMAN RECOGNITION DAY

● Mr. LAUTENBERG. Mr. President, it is with pleasure that I join Senator GLENN as a cosponsor of his resolution designating August 20 as "Volunteer Fireman Recognition Day." Volunteer firemen across the Nation perform a dangerous and essential duty; a duty which deserves the honor of all Americans. As Senator GLENN has pointed out, in 1982, 68 volunteer firemen lost their lives and 337 have died over the last 5 years.

In New Jersey there are some 60,000 volunteer firefighters who work in 1,200 separate departments. These firemen, like their colleagues around the country, serve their communities and fellow citizens in a brave and unselfish manner. I am indeed honored to designate a day in their honor.●

TRIBUTE TO HENRY URBAN, THE PEOPLE'S PUBLISHER

● Mr. MOYNIHAN. Mr. President, I rise today to pay tribute to Henry Urban, the recently retired publisher and president of Buffalo News. Known to many as the "People's Publisher," Henry Urban built his reputation on his concern for the integrity of The Buffalo News and its readers. Never distancing himself from the day-to-day operations, he maintained a constant oversight, walking the floors and proofreading the copy, making sure that his readers would not be annoyed by typographical mistakes.

Mr. President, on June 20, 1983, The Buffalo News printed an article which described Henry Urban and his career quite well. I ask that it be included in the RECORD.

The article follows:

HENRY URBAN RETIRES; GUIDED THE NEWS AS "PEOPLE'S PUBLISHER"

Every worked day during three decades at The News, Henry Z. Urban's homeward trip has taken him through the intersection of Delaware Avenue and Ferry Street.

"Every time I have driven by, I looked up at the window, the one in the room where I was born," he says. Then he adds, "I didn't get very far in life."

The man who is retiring today as president and publisher of The News has come a long way, his self-deprecating remarks to the contrary. A large part of his waking hours for 30 years has been devoted to The News and it has been a period of change and transition.

Through it all, Mr. Urban, a man whose roots are deep in Buffalo, has helped keep up The News tradition of close identification with the community. He is confident it is a tradition that will continue.

Joining The News in 1953, Mr. Urban served from 1957 to 1962 as assistant business manager and from 1962 to 1971 as business manager and assistant treasurer.

In 1971 he became treasurer, business manager and corporate director. In 1974 the board of directors named him president and publisher.

He quickly earned the title of the "people's publisher," a man who listened carefully to the concerns of readers and did something about them. Knowing that readers are always annoyed at typographical errors, he daily carefully scoured the first edition for errors. When he spotted one, he was on the phone immediately to the production officer.

Rather than view operations from an "ivory tower" office, he became a familiar figure around The News plant. During the Blizzard of '77, he ate fench fries for breakfast along with other marooned employees. He also had to make painful decisions about a Friday press run that couldn't be delivered by trucks, blocked by snow drifts.

Ultimately, the trucks delivered both the Friday and Saturday News, Mr. Urban himself delivered some of them to the homes in his neighborhood.

The 30-year period was marked by the death in 1956 of Edward H. Butler Jr., son of The News founder and its second proprietor, and the move from the News building of nearly a century at Main and Seneca streets to a new headquarters at Scott and Washington streets.

After Mr. Butler's death, Mr. Urban worked closely with James H. Righter, publisher from 1955 to his retirement in 1971, and with the widow of Mr. Butler, Kate R. Butler, when she assumed the task of publisher from 1971 until her death in 1974.

Mr. Urban was editor and publisher when The News was purchased in 1977 by Warren E. Buffett of Omaha, Neb.

Mr. Urban comments, "The News is an institution of great integrity that identifies with the community and with its employees. Mr. Buffett has wanted that continued in the Butler tradition."

One of Mr. Buffett's early decisions was to return to the oldest of all News traditions, a Sunday morning paper.

It was typical of Mr. Urban's dedication that, with the start of the new Sunday paper in November 1977, he came to the plant about 11:30 every Saturday night and toured production facilities, checking on the progress of work and chatting with employees.

Mr. Urban and his wife, Ruth DeMoss Wickwire Urban or "Dolly," intend to stay in Buffalo.

"It's home to us and we like it," he explains. "The best is yet to come for this city."

The retiring publisher is planning ahead only six months. He wants to catch up on his reading and do some traveling. That will include an annual tradition of 25 years—a summer stay at Nantucket—and visits to Leesburg, Va., to visit daughter Ruth "Robbie" Smith; to Troy to see another daughter, Florence "Sony" Hunn, and New York City to see a son, Ward A., who is with the Bank of New York.

Another son, Henry Z. Jr., stayed in Buffalo where he is associated with the Manufacturers & Traders Trust Co.

The Urbans also are proud of two grandchildren.

"We're city people," Mr. Urban says about his wife and himself. "That's strange, too, because I'm a descendant of farmers."

He is the grandson of George P. Urban, who came to Western New York from Germany to found the Urban Milling Co. and play a role in the early use of electricity as head of the Cataract Power and Conduit Co.

His mother was Emma Winspear, whose family got here in 1836, six years ahead of the Urbans. The Winspear farm was at Doat Street and Pine Ridge Road where Villa Maria College now stands.

Henry Urban's father, George, had a stable of thoroughbred horses on his Cheektowaga farm. The son remembers taking them to a half-mile track along Harlem Road to exercise them.

The Urban trotting horses raced those from stables of Seymour H. Knor and Chauncy U. Hamlin. A few gentlemanly wagers were made along the rails of the Hamburg track. In the winter horses were hitched to cutters for races over the snow from Symphony Circle northward along Richmond Avenue.

Henry Urban was playing polo at the Knor home in East Aurora. ("I wasn't very good," he says.)

He can look out windows of The News building and see the destroyer, the USS *Sullivan*, in the Buffalo Naval Park. It was the ship that came to the rescue of the shot-up USS *Canberra*, the World War II cruiser on which Mr. Urban was a gunnery lieutenant. Mr. Urban entered naval service upon graduation from Yale University in 1943.

He's a trim 6 feet, one inch—testimony to an active life that included occasional golf, calisthenics and gardening.

Ahead of him is a self-imposed deadline.

"At the end of the year, I'll review things to see if I enjoy loafing. It could be that I'll get back into a few things after that."

Mr. Urban remarks in mock frustration. "Getting out of this office is more difficult than getting into it. I expect I'll be here July 1 cleaning out my desk."

But he is happy about his successor Stanford Lipsey, who is moving up from vice chairman to president and publisher.

"Working with Stan has been a pleasure," Mr. Urban says, "We have made a smooth transition."

After lifetime of community service, it's unlikely that either Mr. or Mrs. Urban will be idle. He has developed himself to many community fund-raising drives.

Mrs. Urban, whose family was in the forefront of the state's steel industry, has been chairman of the Board of Managers of Children's Hospital and will cap 19 years of service as an honorary member. She also was active on the Buffalo General Hospital Junior Board.

Mr. Urban doesn't want to drop out of his community activities, but he admits he'd like a little vacation from them.

He will continue as a director of The News.

The News Executive Committee today honored Mr. Urban at a luncheon in the Buffalo Club.●

COOPER INDUSTRIES DONATION

● Mr. MURKOWSKI. Mr. President, I shall insert in the RECORD a letter from President Reagan to the president of Cooper Industries, a Texas-based company.

The letter expresses the President's pleasure and pride in Cooper Industries' donation of 10,000 acres of beautiful wilderness to the Wrangell-St. Elias National Park and Preserve in Alaska.

The 10,000 acres constitute about 500 mining claims—nearly a third of all the mining claims in the park—which Cooper acquired in 1981. The claims lie in the Chitistone Canyon, an area particularly noted for its spectacular scenery.

Wrangell-St. Elias National Park, with its 12 million acres, is the largest park in the United States. It is famous for its glaciers, its wild rivers, its abundant wildlife and its great mountains. The Cooper donation is situated in the heart of the park. It will make a magnificent addition.

Since Cooper is primarily a manufacturing company and has not been involved in minerals development, it was decided to divest inself of the mining claims. But to the company's credit and to our lasting benefit, Cooper, decided not to sell, but to donate its land to the national park system. In celebration of its 50th anniversary, their donation is the single largest corporate gift of land to the Park Service.

I want to commend the leadership of Cooper Industries in making this unprecedented gift to the United States. The people of the United States are receiving a great gift.

This is an area that should be available for many activities, and the donation by Cooper Industries will insure that the lands will be available for generations to come. I should like to note in passing that by this action the development of a potentially world-class deposit of strategic minerals will go undeveloped. Unfortunately, the problems Cooper faced in developing the claims serves to illustrate how difficult it is to bring into production mineral finds in remote parts of Alaska.

As Secretary Watt noted so eloquently:

Cooper has provided an outstanding example of the kind of private initiatives that are needed to assure the protection of prime park resources without always drawing on the financial resources of the Federal Government.

The material follows:

THE WHITE HOUSE,
Washington, D.C., June 1, 1983.

MR. ROBERT CIZIK,
President,
Cooper Industries,
Houston, Tex.

DEAR MR. CIZIK: I am pleased to send you this personal note of thanks for Cooper Industries' fine gift of 10,000 acres of prime Alaska wilderness for inclusion in the National Park System.

This splendid addition to Wrangell-St. Elias National Park and Preserve greatly enriches the public estate and constitutes the single largest corporate gift of land to the National Park Service. By choosing to donate rather than develop this land, you have demonstrated how concerned corporations can make lasting contributions to this nation's environmental well-being.

Again, my personal thanks and praise for this wonderful gift to the American people.

Sincerely,

RONALD REAGAN.

[News release]

DEPARTMENT OF THE INTERIOR,
NATIONAL PARK SERVICE,
For Release June 1, 1983.

COOPER INDUSTRIES DONATION IN ALASKA IS LARGEST IN PARK SERVICE HISTORY

Cooper Industries, a Texas-based manufacturing company, today donated more than 500 mining claims in the Wrangell-St. Elias National Park and Preserve, Alaska, to the Federal government.

The claims, representing nearly ⅓ of the claims in the park and covering approximately 10,000 acres, constitute the largest donation ever made by a commercial concern to the National Park System.

Interior Secretary James Watt accepted the gift on behalf of the government and noted that "Cooper has provided an outstanding example of the kind of private initiatives that are needed to assure the protection of prime park resources without always drawing on the financial resources of the Federal government."

Secretary Watt added that "it is a great pleasure to recognize Cooper Industries' generosity which so clearly shows the public interests of the business community."

Wrangell-St. Elias National Park and Preserve is the largest in the United States and is renowned for its sweeping scenic vistas, mountain peaks of up to 18,000 feet, huge glaciers, remote valleys, wild rivers, and magnificent wildlife. The Cooper donation is located in the heart of this vast park on the border with Canada.

In making the donation, Alan E. Riedel, Senior Vice President of Cooper Industries, said, "Cooper is a manufacturing company, and not in minerals development. This area is very wild and has spectacular mountain and valley scenery. There is abundant wildlife—the famous Dahl sheep, wolves, moose and bear. We thought we might sell it; however, being our 150th anniversary, at the request of the National Park Service we decided to make a gift of the land to the American people."

The area donated is about 15 miles east of McCarthy in the park's Chitistone Canyon area, which is particularly noted for its rugged beauty. The claims are on both sides of the Chitistone River.

Cooper acquired the property in question when it acquired the Belden Corporation of Illinois in 1981. The company's headquarters is in Houston, Texas.●

THANK YOU TO SUMMER INTERNS

● Mr. MOYNIHAN. Mr. President, each summer my office and the office of my colleagues is filled with interns. Highly motivated and eager to learn, they come to Washington for a variety of reasons. Some are interested in a career in Government and use their internship to help themselves decide if they have made the correct career choice. For others, an internship is an opportunity to augment their studies at school. They are afforded time to study Washington in Washington, instead of from a classroom.

Whatever their reasons for coming to Washington, their presence is much appreciated. Whether performing tedious tasks or interesting research, they are essential to the smooth functioning of the office.

My office has 11 interns this summer, all of whom have proven invaluable in one way or another. I would like to thank Julio Batista, Ruth Bard, Harold Bordwin, Tharon Cooke, Brian McKeon, Mary Phillips, Daniel Paris, Richard Palmer, David Schanzer, Victoria Schwartz, and Christine Scott for the fine work they have all done. It has been my pleasure to have you working here in my office. I hope that you have all benefited from your summer here and would like to wish you the best of luck.●

PERSECUTION IN CENTRAL AMERICA

● Mr. GRASSLEY. Mr. President, since the Sandinista revolution in 1979, the entire fabric of Nicaraguan society has been altered. We know full well the economic and military changes, and have more recently become aware of the persecution of labor leaders, journalists and Miskito Indians. I should like to bring to the Senate's attention the situation of Nicaragua's Jewish community.

I should say "former Jewish community," as they have been forced into exile from Nicaragua since the revolution. Their story is important for a number of reasons. First, the harassment and expulsion of a religious minority from any country is a gross violation of human rights, which the United States must deplore. Furthermore, their plight is the result of longstanding ties between the Sandinistas and the Palestine Liberation Organization. Such ties exist also between the PLO and revolutionary groups in many other Central and Latin American countries. We are all aware that the PLO receives a great deal of its support from the Soviet Union. It should be noted here that the Soviets are currently conducting their own intensive campaign of anti-Semitism. Finally, those Central and Latin American countries all have politically vulnerable Jewish communities, who stand to receive similar treatment at the hands of leftwing revolutionaries in league with the PLO.

Without some expression of outrage over the expulsion of the Jews of Nicaragua, and some understanding of the conditions and forces leading to it, the Jews of El Salvador may well become the next case in point.

Yasser Arafat, himself, proclaimed:

It was disgraceful of Reagan to call us terrorists. We are a great revolution that can never be intimidated. We have connections with all revolutionary movements throughout the world, in Salvador, in Nicaragua—and I reiterate Salvador—and elsewhere in the world.

It has been said by some in this country that the situation in Nicaragua is the result simply of Sandinista anticapitalism, not including Sandinista anti-Semitism. This is a simplistic reading of recent history and shows ignorance of the Sandinista method of operation.

The Sandinistas claim their economic plan includes a mixture of capitalism and socialism, and they have, in fact, left some industries in the hands of their owners. Some of these owners are Catholic, some are Arab, some are of European extraction. There is evidence that the only Nicaraguan businessmen who have been put out of business as a group are the Jewish ones. They were not all involved in the same industry; they did not all have the same degree of wealth; they did not all employ the same number of people. There was no logical economic reason to confiscate all of the Jewish businesses. Their only common denominator was the religion of their owners. This is anti-Semitism in a pure form.

Where did it come from? The Jews of Nicaragua had lived there peacefully for nearly a century. Its roots are in the support given to Israel by the previous governments of Nicaragua, and reinforced by arms, training and money given to the revolutionaries of Nicaragua by the Cubans, the PLO and by radical Arab States.

This was confirmed recently by Sandinista defector Miguel Bolanos. Bolanos was commander of a guerrilla unit during the revolution, and an officer in Sandinista counterintelligence until his defection this year. He said:

There is no problem now; there are no Jews. They (the Sandinistas) ruined their churches and took their land and their stores. Then they told them to leave . . . Our solidarity with the PLO was more important then anything we had with Jews or Israel.

That solidarity goes back a long time. In 1968, the Sandinistas and the PLO met in Mexico City, resulting in 52 Nicaraguans going to Lebanon and Algeria for training.

In 1970, Sandinistas participated in the PLO uprising against King Hus-

sein of Jordan, and an attempted hijacking of an Israeli airliner.

In 1978, in a public statement, the Sandinistas and the Marxist Democratic Front for the Liberation of Palestine emphasized "the bonds of solidarity which exist between the two revolutionary organizations" and condemned U.S. support for Israel and Nicaragua.

Later that year, the Sandinistas firebombed the entrance of the Managua Synagogue during Sabbath services. It was, perhaps, the first incident in which the Nicaraguan Jews felt the direct effect of an alliance committed to the overthrow of Somoza and the destruction of Israel. It was certainly not the last.

Common graffitti in Managua read, "Israel, Jews and Somoza—the same thing."

After the revolution, the Sandinistas signed a government-to-government agreement with the PLO. The PLO opened an Embassy in Managua and loaned the Sandinistas 6 million British pounds.

On the first anniversary of the revolution, Yasser Arafat was hailed in Managua by Interior Minister Thomas Borge, who told him:

> We say to our brother Arafat that Nicaragua is his land and the PLO cause is the cause of the Sandinistas.

Later, the PLO supplied advisors, technicians, pilots and trainers to the Sandinistas. This followed tons of arms and ammunition supplied by the PLO through Lebanon during the revolution.

Following the revolution, the Sandinistas confiscated the Synagogue of Managua, claiming it was the personal property of a prominent Jewish citizen. This was despite the fact that the deed, properly recorded, showed the building to belong to the Nicaraguan Jewish community, and to no individual. The building is currently a Sandinista office building, covered with anti-Zionist posters. The Sandinistas now say they will consider reviewing the Jewish community's claim to the building and reestablishing it as a house of worship. However, in a country with no Jews, this is cynicism of the highest order.

Where did this unholy alliance come from? How do revolutionaries from the Middle East find those of Central America? Who is the mediator? Revolution today is not an isolated phenomenon. Terrorists from around the globe meet and coordinate their arms, training, activities and ideologies. Castro, Arafat and the Sandinistas are entirely public about their international commitment to assisting people in revolution. And the chief exporter of liberationist philosophy and the means to succeed is the Soviet Union.

Therein lies a grave danger to the United States and to our friends and allies around the world—specifically, in this case, a danger to Jewish communities in so many countries vulnerable to political upheaval.

Elliot Abrams, Assistant Secretary of State for Human Rights, recently addressed the subject of the slogan of leftist revolutionaries—"Imperialism, Zionism and Colonialism." He said:

> Imperialism, of course, refers to the US and its West European allies. Colonialism refers to our allies in the Third World, such as El Salvador. And Zionism refers to the State of Israel, and—let us be quite clear about this—to the Jewish people as well.

The Soviet Union has been making a case against Zionism since 1967 and was instrumental in the infamous 1975 "Zionism is Racism" resolution at the United Nations.

This year, they have gone further. In April, a new anti-Zionist committee was formed to combat Zionism, which is defined in part as a cult of political arbitrariness and impunity, demagogy and ideological sabotage, sordid maneuvers and perfidy and, finally, a cult of racism.

Leningrad Pravda followed that by denying the existence of Jewish culture and religion, saying that those things had been destroyed by the Diaspora 2,000 years ago. Practice of the Jewish religion today, accordingly, makes Jews agents of Zionism, as defined above.

By attempting to delegitimize the Jewish religion, the Soviets are making it acceptable for their surrogates and proxies to collaborate both for the destruction of Israel and the destruction of Jews.

It is done today in the Soviet Union, where Jews have gone to prison for teaching the Hebrew language.

It was done in Nicaragua, where the Jewish community was harrassed into exile.

It may be done tomorrow in the other countries of Central America, where the PLO is assisting the Soviet Union in the export of revolution and the export of anti-Semitism.●

THE COMPREHENSIVE CRIME CONTROL ACT

● Mr. D'AMATO. Mr. President, I rise today in support of the Comprehensive Crime Control Act, as amended by the Senate Committee on the Judiciary on July 21, 1983. It is expected that this historic legislation will be reported by the committee this week.

It has taken many years of statesmanlike, bipartisan cooperation among members of the Judiciary Committee, and between the executive and legislative branches, to fashion this "core package." The result is a reasonable, intelligent, and effective aproach to the crime problem that is uppermost in everyone's mind today.

The bill now excludes the "drug czar" provision opposed by the administration. In addition, this amended version of the Comprehensive Crime Control Act deletes other controversial items, among which are: the good faith exception to the exclusionary rule; limitations on habeas corpus; constitutional procedures for the death penalty; and the Federal Torts Claims Act amendments.

We, therefore, now have before us the essence of the omnibus crime package the Senate passed last year by a vote of 95 to 1: sentencing and bail reform and the criminal forfeiture provisions. These new rules will insure that organized crime figures, illegal drug traffickers, and violent criminals will serve full sentences commensurate with their crimes. These reforms will yield us more prisoners who, when faced with truly significant criminal sentences, will be more willing to cooperate with Federal prosecutors in developing stronger cases against the leaders of the organized crime and drug networks. We will also be better able to seize the proceeds and profits of criminal activity. By raising the criminal's cost of doing business, we will make criminal activity less attractive.

The drug enforcement provisions included in this legislation increase Federal penalties applicable to drug-related offenses. Fines and prison terms will increase for those dealing in large quantities of narcotics. They will be doubled for defendants with prior felony convictions. A special grant authority is also provided the Drug Enforcement Administration (DEA) to assist the States in their efforts to combat the illegal diversion of controlled substances.

The justice assistance section of this bill creates a beneficial program of financial assistance to State and local law enforcement agencies. I applaud particularly the DEA and justice assistance provisions. Crime is a national problem. The sophistication and financial resources of modern crime often exceed the resources of local law enforcement. These new provisions constitute an important recognition of the need for Federal assistance to localities in their anticrime efforts.

Similarly, provisions in this legislation to facilitate the donation of surplus Federal property to State and local governments for new prison space are welcome. The prison overcrowding crisis is national in scope and effect. It demands a Federal response. Other timely additions include reform of our laws with respect to the insanity defense, racketeering, and foreign currency transactions.

Mr. President, the need for this legislation has been demonstrated over the course of countless congressional hearings. I would like to conclude my remarks by referring to one such hearing. It was held by the Judiciary Committee in New York on July 11. I was

privileged to testify at that hearing before Senators THURMOND and BIDEN, who then graciously invited me to join them on the panel.

At that hearing, I heard extensive testimony from Federal, State, and local law enforcement officials. This testimony convinced me that we have it within our power to make truly historic inroads against organized crime and illegal drug trafficking.

To succeed against crime, we need to improve the cooperation between Federal and local law enforcement agencies. We also need to do more to protect the rights of society without violating the constitutional rights of the accused. The Comprehensive Crime Control Act accomplishes both goals; for that reason I urge my colleagues to give it their full support.●

SUPPORT FOR SILVER COINS

● Mr. McCLURE. Mr. President, It is time for the Treasury Department to start striking silver dollars again.

Silver is a noble, precious metal, much in demand both by coin collectors and also by the public at large. In the past, it has proven to be a responsible way to hedge against inflation, and when produced as coin, has been widely collected by serious numismatists.

With this in mind, I introduced earlier this year S. 269, a bill which would provide for the disposal of silver from the national defense stockpile through the issuance of silver coins.

The first part of the bill would reintroduce a silver dollar bearing the same design that George T. Morgan, Assistant Engraver of the U.S. mint, placed on the dollar in 1878, and which was circulated under the Bland-Allison Act until 1921. Over 500 million of these coins were produced by the U.S. mints at Philadelphia, San Francisco, New Orleans, Carson City, and Denver, and they are highly prized by collectors.

My bill would authorize up to 15 million ounces of silver—amounting to about 19 million coins)—to be produced with this historic design, but with a current date.

At a recent hearing before the Senate Banking Committee, Luis Vigdor, vice president of Manfra, Tordella & Brookes, and a member of the executive committee of the National Association of Coin and Precious Metals Dealers testified in favor of my bill and said that he believed that these coins would sell out within a very short period of time, thus giving the Government very substantial profits.

Additionally, my bill proposes that a silver "Krugerrand" be produced by the mint and sold in bulk, also at a profit.

This also was supported, at the same hearing, by the National Association of Coin and Precious Metals Dealers, as well as Gary Sturtridge, president of the Professional Numismatists Guild.

I believe that passage of this legislation is both in the national interest, and beneficial to the national economy, because of the substantial revenue that it will raise.

Mr. President, I would like to call your attention to an article which appears in the June 1983 issue of COINage magazine, by David L. Ganz, a contributing editor, and general counsel to both the Professional Numismatists Guild and the National Association of Coin and Precious Metals Dealers, which further discusses the proposal.

In conclusion, I heartily endorse prompt and speedy action on this proposal.

The article follows:

[From COINage, June 1983]

A 1984 MORGAN DOLLAR?—CONGRESS CONSIDERS SOME EXCITING NEW IDEAS

(By David L. Ganz)

The government issuance of a silver "krugerrand" and a new Morgan dollar, coupled with an American eagle bullion coin seems to hinge upon differences between the Senate and the House in regards to the bills in question.

Based upon legislation proposals of Senators James McClure, R-Idaho, and Jesse Helms, R-N.C., and set down for full discussion on the very day that federal income tax is due for filing, the bills under discussion would fundamentally alter the composition of coinage in a way that has been done only twice in our history since the original Mint Act of 1792.

Those two instances are 1933, when gold was removed from legal tender status, and 1965, when silver was withdrawn from circulating coinage. The practical effect of both bills would be to restore gold and silver coinage, in Helms' works, as the Constitution originally intended.

Reissuance of the Morgan silver dollar, utilizing the identical design that circulated from 1878 to 1921 (with intermittent periods of non-production) is one of the ideas of the McClure proposal which calls for 15 million troy ounces of silver to be utilized.

Helms in his bill calls for issuance of a one-ounce American eagle struck of .999 fine gold, and exempt from capital gains tax. It is similar to that proposed by the federal Gold Commission, whose report was issued last year favoring such a legal tender coin as a step toward revitalizing a gold standard.

Based on statistics contained in the legislative proposals, and since the standard silver dollars contained .7734 troy ounces of precious metal (in specifications shown in the accompanying chart), that means that a total of about 19.4 million pieces could be produced—as both proof and in uncirculated condition.

There is no practial limitation as to their total number of silver bullion coins of American eagle bullion coins that would be struck given the high amount of precious metal available under the bills for coining.

Under the McClure bill, the revived Morgan silver dollars would be primarily intended for collector sales, for each would sell at the spot price of bullion plus a premium, defined for the proof as at least 75 percent above cost, and for uncirculated, at least 50 percent above cost.

In the case of the other part of the Idaho Republican's plan to remonetize silver, it would authorize issuance of a .999 fine silver coin containing one troy ounce of silver—a virtual silver Krugerrand. (The South African government, for many years, has issued a gold coin, denominated the Krugerrand, which contains exactly one troy ounce of gold.)

PROPOSED NEW "MORGAN" SILVER DOLLARS

Size: 38.1 mm.
Weight: 26.73 grams.
Fineness: .900 fine.
Troy Oz.: .7734 fine troy ounces.
Edge: Reeded.
Proof Price: $18.95*.
Uncirculated Price: $16.25*.
Obverse: Liberty head.
Reverse: Eagle.

McClure's call for the reissue of the Morgan silver dollar for the first time in 61 years (and the first regular silver dollar issue since 1935) is more than a typical bill introduced by a member of Congress for home state constituency.

Idaho has been the home of King Silver for over a century, and McClure is not a freshman member of Congress. Since he came to Washington as a Congressman in 1967 (switching to the Senate after the 1972 election), he has gained seniority and is using it to promote a back-home industry where, after all, he will have to face the votes again in 1984.

Moreover, McClure is now a powerful man in the Senate's inner circle, a full committee chairman as well as active in the Senate Republican conference. And, perhaps most pure of all, he is apparently a true believer of silver and its coinage usage.

Back in 1971, Congressman James McClure introduced the first bill calling for a silver-clad bicentennial commemorative coin, a piece patterned after the then-issued proof-silver clad Ike dollars. He never wavered from that support, and now, it appears that there is a possibility his silver Krugerrand will become reality.

Likewise, Helms is a powerful conservative leader with a strong constituency outside the Senate, whose belief in the value of gold (and its power to help cure the economic malaise of the economy) is that of a true believer. He has backed a number of gold coin and medallion proposals over the past several years, and here has taken up the mantel left by the defeat at the polls of Sen. Harrison Schmidt, R-N.M, who first proposed these golden eagle coins in the last session of Congress.

Clearly, however, the influence of the Gold Commission's report of last year is felt, where influential Republicans including Treasury Secretary Regan, gubernatorial candidate Lewis Lehrman, and Rep. Ron Paul, R.-Tex., promoted issue of gold money.

In part, McClure's bill calling for the creation of a new Morgan dollar backs an approach also put forth by a government sponsored study, that prepared by the Comptroller General's Report on National Defense-Related Silver Needs, issued in January, 1982, which called for striking of commemorative coinage for collectors.

The second part, calling for bullion coins, was also in the GAO Report, which stated

* Note: Price calculated on $14 an ounce silver. Surcharge added to uncirculated (50%) and to proof (75%) may change. All figures approximate.

that "a bullion coinage program could also better assure that the disposal [of silver bullion in government possession] is made for domestic consumption by making the silver more attractive, affordable, and accessible" by having a coin for "Less than $20, instead of over $60,000 . . . required to participate in the sale" held then, and now, by the General Services Administration, the government's selling arm.

This, ultimately, is the impetus of the McClure program, for the government has been selling off silver from the national stockpile as a means of raising revenue, and also as a means of acquiring (through use of the proceeds) other more scarce or critical materials.

These sales, all by auction, have had a destabilizing effect on the marketplace, and McClure believes that if individuals can acquire silver at relatively modest cost, the market would stabilize and the price of silver start to go up again, benefiting the miners of Idaho and elsewhere.

To help sell the bullion pieces, the McClure proposal calls on the Treasury Department to set up a network of dealers and distributors, or, more aptly, to utilize existing, recognized dealers who would be able to buy the pieces at bulk discounts.

Bullion coins would have to be sold by Treasury at a price equal to bullion plus no more than 10 percent (and a bulk discount given from that sum). Thus, it would be possible to acquire relatively modest quantities of silver bullion "krugerrand" pieces at a modest advance over "spot" on a given day. (In fact, the prior day's price would be the fix.)

Legislation on the gold proposal was held last year by Rep. Frank Annunzio, D-Ill., chairman of the House Coinage Subcommittee, where Ron Paul is ranking minority member. To the surprise of everyone in attendance, the Treasury Department backed the gold coin—including the requirement that it be exempted from capital gain—but only on condition that the bill be unamended.

Charles Stahl, a long-time observer of the precious metals market and publisher of "Green's Commodity Market Comments," a respected industry review of gold and silver prices, believes that the Treasury's support was actually only lukewarm at best and more likely subterfuge.

Theory behind this is that Treasury staked out a position backing a bill (without any deviation) which it knew could not pass because of opposition from key leaders such as Rep. Henry S. Reuss, D-Wisc., then chairman of the Joint Economic Committee, and others.

But it may be difficult to leave that position now, especially when the Treasury Secretary headed up the Gold Commission. And, powerful opponents such as Reuss are not retired from Congress.

Treasury may now try to argue that with the revitalization of the gold medallion program (the five-year venture reluctantly embarked upon by Treasury in 1980), there is no need for the Helms bill.

This revitalization includes a reeding of the edge (like a coin), and an appellation of national origin, coupled with a more coin-like design which appears to be as much a marketing tool and anything else. (J. Aron & Co., a division of Goldman, Sachs, is handling the marketing under a contract with the Treasury.

However, this ignores the reality that the medallions are just that—they are not legal tender coins, cannot be used to settle contracts, or to pay wages, and (of course) while exempt from sales tax at initial point of sale through the government, are not exempt from capital gain—the way that money is supposed to be.

Witnesses at the hearing were to be called from all sectors of the economy and nation, ranging from Lehrman, who narrowly lost the governor's race in New York, to a representative of the National Association of Coin & Precious Metals Dealers and the Professional Numismatic Guild, Inc.

What remains to be seen is what type of hearing (and action) it will receive in the House—and when, if at all, a silver krugerrand, a new Morgan dollar, and a new gold coin will be issued for the American collector and people to acquire.●

CLAYTON LORD

● Mr. MATTINGLY. Mr. President, we have in our State a distinguished city councilman for Wrightsville, Ga., Mr. Clayton Lord. This fine gentleman has served his community in many posts, including 37 years as the justice of the peace.

What makes Mr. Lord unique is his age: He is 92 years young. I would like to enter into the RECORD an article on Mr. Lord from the Atlanta Constitution. I would like to especially call my colleagues' attention to Mr. Lord's platform: "Just honesty and truth, standing up for what I believe to be right, speaking out even if it's unpopular, and not making a bunch of promises that I can't keep."

That is a platform and a philosphy that we all should follow.

I submit for the RECORD an interesting newspaper article relating to Mr. Lord.

The article follows:

[From the Atlanta Constitution]

OLDEST COUNCILMAN IN U.S. MAY BE 92-YEAR-OLD SAGE IN WRIGHTSVILLE

(By Grace T. Crawford)

WRIGHTSVILLE, GA.—At an age when many people are turning to nursing homes, Clayton Lord, a 92-year-old retired storekeeper is busily completing a two-year term on the city council here.

His political staying power has made him one of the oldest—if not the oldest—active officeholders in the country, according to Cynthia Loftin of the Georgia Municipal Association and Frances Raiford of the National League of Cities.

Ms. Loftin says no specific age records are kept by her agency, but "as far as we can determine, there's no evidence to indicate an older city councilman anywhere."

At the age of 90, Lord had completed 37 years as the town's Justice of the Peace. He says he "never dreamt" of running again for public office, that he was "just too busy" with his books, garden, fishing, writing and working for Brown Memorial Baptist Church, where he is one of the oldest members.

But he was drafted, he says, by a group of townspeople who paid his entrance fee, had his political cards printed, then campaigned for him, "because they thought I was honest and the best man for the job."

With a soft chuckle, the wire-thin councilman says he "couldn't help but be tickled" when—after some folks said he was too old—he won the election. He defeated the man who had been named Wrightsville's Man of the Year by local civic organizations.

Refusing to call himself a politician, Lord says he's "just a servant of the people," and did most of his campaigning in the 1981 election by "chatting with folks" around the Johnson County Courthouse Square and by milling about among the Saturday shoppers.

His platform, he says, "was just honesty and truth, standing up for what I believe to be right, speaking out even if it's unpopular, and not making a bunch of promises that I can't keep."

And speak out he does, says Wrightsville Mayor Willis Wombles, smiling and shaking his head. "Yes sir, Mr. Clayton is very, very sharp. He keeps abreast of everything that's going on and doesn't rely on anyone else to inform him of the facts. He looks carefully at every situation, then he speaks his mind."

And he does not sugar-coat his opinions:

On racial problems in Wrightsville, staging ground for several demonstrations and racially motivated shootings in the past three years: "There are none and never have been. Any problems around here were caused by a bunch of outsiders."

On the discrimination suit filed by a group of blacks against the sheriff, city council and county commission: "The most stupid thing that ever happened in Johnson County. . . . The best blacks in town were against it."

Undecided as to whether he will seek another term, Lord says he's spent "a mighty lot of time" in public office, his first experience on council "as a young fellow in the 20s." He also served on the Johnson County School Board, the local tax board and says he was "a regular Marrying Sam" during his years as Justice of the Peace, presiding often over the court "where folks brought in every problem in the book and then some."

The councilman passes some of his time with the courthouse philosophers, a group of his retired friends who gather in good weather under the big oak trees just beyond the town square "and solve some mighty weighty problems."

He has strong ideas about food and excerise, sticking mostly to chicken and fish and fresh vegetables that he raises and tends in a half-acre garden plot behind his white frame home a few blocks from downtown Wrightsville. Cooking for himself since the death of his wife Irma several years ago, he proudly says his four children and 22 grandchildren "rave about my turnips."

In addition to his duties as a town councilman, he writes a weekly column, "Clayton Lord Sez," for the local paper.

The senior councilman is an avid reader and his shelves overflow with a variety of materials, plus a collection of newspapers from various cities. He just wants to keep informed, he says, noting that he's also quite a collector of joke books because he thinks laughter "is mighty good medicine " and he's always found a lot to laugh about."

Lord, who turns 93 in August, says "a bunch of folks have been talking to me about running for mayor, but I don't have time to fool with that."●

THE ST. PAUL COMPANIES

● Mr. DURENBERGER. Mr. President, Minnesota has a well-earned na-

tional reputation as the home of innovative ideas. More times than not, when you trace the roots of a successful social program you will find them firmly anchored in Minnesota soil.

One reason why innovation flourishes in Minnesota is that the people in my State have found that the delivery of public services does not always have to involve the public sector. Government is not the only choice in meeting the legitimate needs of people; in fact, in many cases it is far from the best choice.

Government, private for-profit and not-for-profit institutions, and individuals work side-by-side in Minnesota to improve the quality of life for all people in our State.

One outstanding example of this public-private cooperation is the involvement of The St. Paul Companies. The stated objective of The St. Paul Companies' community involvement could and should serve as a model for all businesses:

To contribute to the vitality of the communities where we do business in a way that encourages study, active debate and responsible action on issues critical to these communities for the purpose of increasing the flexibility, diversity of thought and innovation neccessary to meet challenges of a changing environment.

Mr. President, I ask that an article from the July 1983 issue of Response magazine be included in today's RECORD following my comments. I commend this article to my colleagues. It is typical of the kind of effort being made in Minnesota by outstanding companies like The St. Paul Companies and an example of how one concerned corporate citizen can make a difference.

Finally, Mr. President, I want to say a special word about Carl B. Drake, Jr., the chairman of The St. Paul Companies. Successful corporate involvement in the community demands leadership and commitment at the top. Carl Drake has provided that for The St. Paul Companies and it is one of the very important reasons why the Juvenile Crime Prevention Curriculum detailed in the article in Response has been so successful.

[From the Response, July 1983]

CONTRIBUTING TO THE VITALITY OF OUR COMMUNITY

(By Carl B. Drake, Jr.)

Like most major corporations, The St. Paul Companies have established a program of corporate involvement.

We, like other businesses, realize that we have obligations to a variety of stockeholders including our stockholders, consumers, employees and government, as well as the communities where we do business.

Community involvement—or better yet, community relations—describes the programs and activities to which the company will apply its corporate resources—money, skills and personnel—to assist in the solution of social problems in which the interest of the stockholder, employees, customers and the general public are fundamentally inseparable. These activities aim to make the community a better place to live and to assist groups of people to solve problems that do not respond to individual action.

Community relations activities of The St. Paul Companies have two goals: 1) to contribute to the solution of public problems for the purpose of reducing economic and social costs which drain the company and the community, and 2) to help create a stable, strong community environment which enhances the quality of life for employees and the public.

Both of those are high-sounding objectives, but I particularly want to draw attention to the fact that they stress cooperation. We state that we will "contribute to the solution of public problems" and that we will "help create a stable, strong community environment" rather than asserting the more traditional corporate verbs like: direct, control, lead, develop, implement, etc. This is not a case of semantic game-playing; those words were chosen carefully to reflect the style of our community affairs programs.

COMMUNITY VITALITY

This cooperative style stems from the direction and objective which senior management of The St. Paul Companies has set for its community involvement: "to contribute to the vitality of the communities where we do business in a way that encourages study, active debate and responsible action on issues critical to these communities for the purpose of increasing the flexibility, diversity of thought and innovation necessary to meet the challenges of a changing environment."

We translate those objectives into support for activities which will encourage self-reliance, stress preventative approaches to problem-solving, encourage innovation and creativity, address leadership development, involve management/technical assistance and, finally, encourage collaboration.

When all of these goals and objectives get distilled, their by-products should be programs and activities that are conceived and nurtured from within the communities and where our role is that of a partner in making these ideas a successful reality.

Based on what we hear from the neighborhood and community groups that have dealt with The St. Paul Companies, we have apparently been successful in fashioning a community affairs process which citizens feel is responsive to their needs and interests.

Let me try to describe in practical terms how all of this theory works in a real-life situation.

VANDALISM FIRES

Four years ago some concerned residents in the eastern part of St. Paul began looking around for solutions to a rash of vandalism fires that plagued their neighborhood. Increased police surveillance offered short-term help, but neighborhood leaders were looking for long-term solutions.

Aware of The St. Paul's reputation as a company that was interested in cooperating with community groups—and sensing our interest as an insurance company in fire prevention and arson awareness activities—representatives of the neighborhood asked the company to help them solve their problems.

In order to help determine the scope and size of the problem, The St. Paul staff hosted a meeting involving representatives from the police and fire departments, the schools, interested non-profit agencies and company experts in arson detection and prevention, as well as leaders of the community council in the affected neighborhood.

That first meeting identified the major problem area as juvenile arson—young children setting garage fires for the "thrill" of harassing and disturbing the neighborhood. The group decided that the most effective way to try and combat the problem, on a long-term basis, was to show the neighborhood youngsters the negative impact their actions had on their neighborhood. The school appeared to offer the most effective forum for getting this message to youngsters. So, when the county's Criminal Justice Coordinating Council came to The St. Paul for funds to develop a curriculum on juvenile crime in cooperation with the schools, we were enthusiastic. A junior high school teacher agreed to pilot the program in her class.

The 12-week program brings into the classroom police and fire department personnel to talk about juvenile crime and law enforcement; representatives from the juvenile justice system describe the court process for juvenile offenders; representatives from the county probation department tell about that aspect of juvenile justice; insurance company representatives explain how juvenile crime affects the insurance premiums that their parents pay for fire and other forms of property insurance.

The students go on field trips, including visits to neighborhood residents and businesses that have been victims of crime. These trips give them a chance to see firsthand, the real impact people experience from criminal activities—the fear, anger and frustration of the crime victims.

The unusual element of this classroom program requires the junior high school students to prepare lesson plans, including dramatizations, covering what they have learned about crime. The students then go into the fourth grade of neighboring elementary schools and put on classes, skits and small group discussions with those children. This peer teaching element strengthens the junior high school students' understanding of the effects of crime on their neighborhoods while also sensitizing younger students about crime.

A COOPERATIVE EFFORT

From its very beginning the Juvenile Crime Prevention Curriculum has been a cooperative effort. The neighborhood started it by raising the concerns; city and county governments and the local school district responsed by their willingness to work together with the community in solving a major local problem. The St. Paul Companies, the business element of this cooperative equation, provided not only the financial resources to get the project under way and keep it going but also served as the catalyst to bring all of the participants together.

Has the project been well received?

Since its pilot project phase, the program has grown in four years to be a part of the school curriculum throughout the St. Paul school system. But its influence is more than just local. Copies of the full curriculum have been made available free of charge by The St. Paul Companies. To date, nearly 4,000 copies have been distributed to education and law enforcement officials in all 50 states and, surprisingly, four foreign countries.

Did it work?

From the very beginning, police and school officials as well as neighborhood residents said they could sense a difference in what was happening in their community as the result of the Juvenile Crime Prevention

Curriculum. Vandalism and other juvenile related crimes declined.

A formal evaluation process is currently under way. Preliminary results of interviews with students who went through the pilot program four years ago show that they all have strong, positive recollections of the program. All of those interviewed said they had not committed a juvenile crime since the program. And more amazingly, many said they had talked others in their peer group out of committing juvenile crimes.

COMMUNITY AFFAIRS PRIORITIES

While the Juvenile Crime Prevention Curriculum is an important example of The St. Paul Companies' cooperative approach to community involvement, it is not the only example. We have established community affairs priorities which include education, health and community development—employment, housing and public safety. Based on these priorities, we are currently engaged in discussions with St. Paul/Minneapolis neighborhood groups on housing and economic development proposals that we expect to spring to life in the near future as major community programs. This cooperative approach is an integral part of our assessment of program and project proposals in all of these areas. We look for what the community or organization itself is bringing to the activity and how we can blend our resources to help it achieve its goals.●

WAINO HENDRICKSON

● Mr. MURKOWSKI. Mr. President, a few weeks ago I spoke in this Chamber on the occasion of the 100th birthday of one of Alaska's Territorial Governors, George A. Parks. I have a much less happy event to report. It concerns the death of Waino Hendrickson, who was Acting Governor of the Territory of Alaska twice, in 1957 and again in 1958.

Waino Hendrickson was a true Alaskan. Born in a log cabin in Juneau, he spent all but his World War II military service in Alaska. He worked in Alaska's mines, on its docks, and eventually on its lands for the Bureau of Land Management.

Mr. Hendrickson entered politics almost by accident, and only because he felt strongly enough about a town issue to run for mayor. From 1945 on he rose steadily in Alaskan government, until in 1953 when he was appointed secretary of the State, the second highest position in the State. At two points in his career, he served as Acting Governor.

He held the post at perhaps the most pivotal point in Alaska's history, filling the gap between the last Territorial Governor—Frank Heintzleman—and the first Governor of the new State—William Egan. Throughout this period of great flux, he provided the wisdom and stability that Alaska's citizens needed.

Mr. President, I would like to insert for the RECORD at this point three articles that appeared in the Anchorage Times and the Anchorage Daily News at the time of Mr. Hendrickson's death. They show more poetically than I can what this man meant to Alaskans.

The articles follow:

[From the Anchorage Daily News, June 22, 1983]

SERVICES SCHEDULED FOR FORMER TERRITORIAL GOVERNOR

(By John Lindback)

Services are scheduled this week in both Anchorage and Juneau for Waino Hendrickson, who was territorial governor of Alaska when it became a state in 1959.

Hendrickson died Sunday morning at Providence Hospital. He was 87.

Services in Anchorage will be held Thursday. Visitation is scheduled for 7 p.m. and a memorial service will be held at 8 p.m., both at Forest Lawn Mortuary, 11621 Old Seward Highway.

Services are scheduled for 2 p.m. Saturday in Juneau at the new Centennial Hall. Hendrickson was born in Juneau and served as the town's mayor from 1946 to 1953.

Hendrickson, a Republican, served as the federally appointed secretary of Alaska from 1953 to 1959. The position is considered the equivalent of the lieutenant governor today.

During his tenure as secretary, he filled in twice as acting territorial governor. The first time was January 3 to April 8, 1957, between the terms of Govs. Frank Hentzleman and Michael Stepovich.

Family members said he was also acting governor from Aug. 10, 1959 to Jan. 3, 1959, the day Alaska joined the union. Stepovich had resigned from the presidentially appointed post of territorial governor prior to statehood in order to enter Alaska's first campaign for governor.

Hendrickson's political history included a term, from 1950–52, in the territorial House of Representatives. That term was served concurrently with his position as mayor of Juneau.

Craig Forrest, one of Hendrickson's eight grandchildren, said one of his grandfather's most important accomplishments was guiding the transition of the territorial government into statehood.

Forrest said his grandfather was especially proud of an honor bestowed upon him in 1958 by the Tlingit tribe of southeastern Alaska. They inducted him as honorary member of the tribe.

After statehood, Hendrickson became the manager of the Juneau office of the federal Bureau of Land Management. He retired in 1966.

Hendrickson was born on June 18, 1896. He graduated from Juneau High School in 1916 and served in the U.S. Army from 1917-1919.

He worked for five years with the Alaska-Juneau Gold Mine Company From 1924 to 1927, he was assistant manager of the Juneau city dock.

In 1927, he became an employee and stockholder of the Alaska Laundry, where he worked until 1945. He was a salesman in Juneau for American Wholesale Grocery from 1945 to 1953.

He married Marion Kingsnorth Jones, a nurse, in 1924. They had one daughter, Dorothea Forrest of Anchorage.

Hendrickson was active in a number of civic organizations. He served as president of the Pioneers of Alaska and was a past commander of the state American Legion.

Hendrickson is survived by his daughter, seven grandchildren and eight great-grandchildren.

The family requests that friends who wish to donate memorials direct them to the charity of their choice or to the American Lung Association, 406 G. St., Anchorage, 99501.

[From the Anchorage Times, June 21, 1983]

WAINO EDWARD HENDRICKSON

Alaska pioneer Waino Edward Hendrickson, former mayor of Juneau and secretary of Alaska during territorial days, died Sunday at Providence Hospital. He was 87.

Mr. Hendrickson was born June 18, 1896 in a log cabin in Juneau where the Baranof Hotel now stands.

Mr. Hendrickson went to one-room schools in Juneau and graduated from high school in 1916 with a class of 14 students.

After high school, Mr. Hendrickson worked in the Alaska-Juneau and Alaska-Gastineau mines. In 1918 he and a small group of men from Juneau went to Fort William Henry Seward at Haines for military training and then on to the Presidio in San Francisco, Calif. It was his first outside trip.

When World War I ended, he returned to Juneau and the gold mines. He also met and married a Canadian nurse who had come to Juneau to work at St. Ann's Hospital. He and Marion Kingsnorth Jones married in 1924.

From the mines, Mr. Hendrickson went to work at the city dock. He left the dock to work at the Alaska Laundry and Cleaners, where he remained for the next 20 years.

In 1945 Mr. Hendrickson found himself in the middle of a heated small-town argument over the ownership of the local power utilities. He decided to run for mayor on a platform opposing municipally owned utilities. He won that election—and several more.

In 1951, he ran as a Republican for the territorial House of Representatives, a post he held again in 1953. When President Dwight D. Eisenhower appointed B. Frank Heintzleman governor in 1953, he appointed Mr. Hendrickson secretary of Alaska—today's equivalent to lieutenant governor.

When Heintzleman resigned Mr. Hendrickson became acting governor, a position he held until 1957 when Eisenhower appointed Mike Stepovich governor. Mr. Hendrickson was reappointed secretary.

He became acting governor when Stepovich resigned to run against Ernest Gruening for one of Alaska's two U.S. Senate seats. He remained in the position until William A. Egan was sworn as the state's first governor on Jan. 3, 1959.

Mr. Hendrickson was appointed by Eisenhower to head the Alaska Field Committee, the transitional office that was to oversee the change from territorial status to statehood. He remained there until 1961.

At that time he became director of the Southeast Alaska field Office of the Bureau of Land Management, a position he held until he retired and moved to Anchorage in 1965.

He served on the state Geographic Board and the Governor's Advisory Committee on Aging. He was past grand president of the Pioneers of Alaska and a past department commander of the American Legion.

He was king of the 1970 Fur Rendezvous.

He leaves one daughter, Dorothea Forrest of Anchorage.

Arrangements are pending at Kehl's Forest Lawn Memorial Chapel.

[From the Anchorage Times, June 22, 1983]

WAINO HENDRICKSON

Waino Hendrickson was a gentle, quiet man who served Alaska well in a period when the new state was being formed. He came close to being governor on several occasions, but fate never allowed him this honor.

He had other distinctions that will put his name near the top of the list of prominent citizens when the history of 20th Century Alaska is written. But it was his courtship with the governorship that came to mind when word of his death at Providence Hospital was reported Sunday.

A life-long Alaskan, born in Juneau, Mr. Hendrickson became active in hometown politics in 1945. By 1953, he had been appointed secretary of Alaska, which was the territory's No. 2 office and similar to the post of lieutenant governor today.

On two occasions during his seven-year tenure as secretary he became acting governor at the behest of President Dwight D. Eisenhower: for five months in 1956 after Gov. B. Frank Heintzleman resigned and again for ten months in 1958 after Gov. Mike Stepovich resigned to run for U.S. Senate.

During the weeks prior to the advent of statehood, Sen.-elect Ernest Gruening made entreaties to Washington to have the "acting" dropped from Hendrickson's title, but it was never done.

At one time in the early 1950s, he held three important posts at the same time. While he was mayor of Juneau he was elected to the legislature and was serving in both jobs when he was appointed secretary of Alaska.

Mr. Hendrickson's pursuits were not all political. He headed the official team named by the president to oversee the transition of Alaska from a territory to a state. He also served a term as grand president of the Pioneers of Alaska.

His soft voice and gentle presence was such that many Alaskans of today are unaware of his contributions a generation ago. But he earned a place of merit in the rich history of Alaska.●

FCC FINANCIAL INTEREST AND SYNDICATION RULES

● Mr. KASTEN. Mr. President, throughout my career in the Congress of the United States I have been interested in the relationship of Government to the natural operation of competitive marketplace forces in insuring that the interests and needs of the American people are well served. I believe that Government should intrude itself into the marketplace only when there are dysfunctions that jeopardize the public interest. As a member of the Senate Commerce Committee, I have had an opportunity to apply this philosophy to the domain of telecommunications and, in this regard, my special attention has been drawn to the FCC's financial interest and syndication rules.

These rules were adopted by the Commission in 1970. The financial interest rule prohibits the three major television networks from investing in programs which are broadcast on the networks in exchange for a profit-sharing interest. The syndication rule prohibits the three major networks from entering the business of selling individual programs—either those already broadcast on the networks or original programs—directly to local stations on a non-network basis. In the view of many economic and telecommunications scholars, these rules represent the high water mark of unjustified Government intrusion into a marketplace capable of functioning properly to serve the interests of the television viewing public. Rather than curing imbalances, the rules have apparently generated their own unacceptable distortions.

The rules have been the subject of study and debate virtually since they were adopted. This study and debate has been extensive, scholarly and bipartisan. In the mid-1970's the Brookings Institution published a report concluding that the rules were misguided. In the late 1970's Congress authorized a special FCC staff study of the rules which took 2 years to complete and which involved the compilation of thousands of pages of evidence. This special staff study concluded that the rules were unfounded, ill-conceived, and counterproductive and should be repealed. Recently, as a part of an ongoing FCC proceeding, the Departments of Commerce, Justice, and the Federal Trade Commission have reviewed the rules in detail and determined that they should be eliminated in their present form.

What I am troubled by are efforts in both Houses of Congress to bypass all of this study and expert opinion and impose a moratorium on the FCC's ability to complete its work of reviewing this outdated set of rules. It is the function of the Congress to establish the broad framework of communications policy. But we have delegated to the FCC, as the expert Government agency, the authority to implement that policy subject to congressional oversight. Pursuant to that delegation the FCC adopted the financial interest and syndication rules. Pursuant to that delegation they should be permitted to review them for their continued effectiveness and if the FCC determines that the rules are no longer warranted they should be permitted to act to repeal them.

We often hear the complaint that Government is incapable of acting expeditiously. We in Congress are often critical of the failure of the various departments and agencies of the Government to consider and act on matters of importance in a deliberate but timely manner. Here we face a Commission that has spent over 5 years and millions of taxpayers dollars examining these issues, yet some in Congress are suggesting that the FCC be prevented from completing its consideration of the subject for an additional 5 years. That is simply bad government. The FCC should act and act now.●

INLAND WATERWAY FINANCING

● Mr. STAFFORD. Mr. President, at my request, the Congressional Budget Office recently completed a study, "Inland Waterway Financing and the Potential Effects of User Charges." This issue, together with the question of inland waterway development, is now under review within the Subcommittee on Water Resources of our Committee on Environment and Public Works. It is my hope that we can report legislation to the Senate next month.

Because of the importance of this issue and the CBO review, I ask that a copy of this report be printed in the RECORD, together with a copy of Dr. Rivlin's transmittal letter.

The material follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, D.C., July 21, 1983.

HON. ROBERT T. STAFFORD,
Chairman, Committee on Environment and Public Works, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: In response to your request, the Congressional Budget Office has completed a brief analysis of issues relating to inland waterway development and user charge financing. The analysis takes up the questions of who should bear the costs of that development, what portion of federal costs should be recovered by user charges, what types of charges are available, and how should capital costs be treated.

The paper also reviews the "Section 205 Study" recently completed by the Departments of Transportation and Commerce. The CBO finds the study analytically sound and concurs in its overall conclusions. Particular points of agreement are that user charges designed to recover the full costs of the federal government's investment in inland waterways would be substantially above current levels, and that the effects of uniform system-wide fees would differ from those of segment-specific fees.

The sector that would be most adversely affected by imposition of fees set to recover waterway services costs would be agricultural shippers. Charges that covered operation and maintenance costs would be about 4 cents per bushel. Charges that also recovered initial investment costs in addition to operations and maintenance might range between 6 cents and 10 cents per bushel. The outcome would depend on which investment costs were to be recovered and how they were amortized.

Finally, the analysis points out that, to the extent foreign nations attempt to isolate their domestic markets from international price fluctuations, a significant portion of any U.S. user charge would likely be passed on to foreign governments, rather than being borne by U.S. agricultural shippers.

I hope your Committee finds this study useful. Please let us know if we can be of further assistance.

With best wishes.

Sincerely,

ALICE M. RIVLIN, *Director.*

Attachment.

INLAND WATERWAY FINANCING AND THE POTENTIAL EFFECTS OF USER CHARGES

PREFACE

This short study was undertaken at the request of Chairman Stafford of the Senate Committee on Environment and Public Works to provide information on issues relating to inland waterway development. Peyton L. Wynns of CBO's Natural Resources and Commerce Division prepared the analysis under the general supervision of David L. Bodde and Everett M. Ehrlich.

INTRODUCTION AND SUMMARY

The Congressional Budget Office has prepared this study to assist the Congress in considering adjustments to federal policy with respect to inland waterway development. The paper consists of three parts. The first briefly summarizes some of the major issues facing the Congress in the development of inland waterway policy. The discussion focuses on financing the costs of the inland water system. Four questions in particular are considered: Who should bear the costs of the system? How should a proper level of cost recovery be determined? What alternative types of charges are available? And how should capital costs be treated.

The second part reviews a major study of inland waterway user charges undertaken by the Administration to assess the economic impacts of user charges.* The study, which seems sound in its analytic method, arrives at several conclusions: That user charges designed to recover the system's full costs would be substantially above the levels of current fees; that barge operators and grain shippers are the two groups that stand to be adversely affected to any measurable extent by the institution of user fees set to recover the system's full costs; and that the consequences of uniform user fees levied systemwide would differ from those of fees set at different rates for different segments.

The third part of the paper deals directly with the impact on grain shippers of waterway user charges higher than the current level of less than 1 cent per bushel. (Levied as a tax on gasoline, the current user charge is in fact divided among shippers, consumers, and carriers.) It concludes that user charges designed to recover waterway operating and maintenance costs would result in charges of about 4 cents per bushel of grain delivered. Full recovery not only of operating and maintenance costs but also of all capital investments in the year expenditures were made would raise total charges to approximately 10 cents per bushel. Proposals that would limit capital recovery to new projects and spread recovery over a project's life would result in user charges averaging 6 cents per bushel. The level of user charges faced by individual shippers would vary markedly, depending on such factors as the type of user charge, the availability of other modes of transport, and the responses of competing carriers (primarily rail). Finally, to the extent that foreign grain-importing nations continued to use variable import levies in the attempt to isolate their domestic markets from international price fluctuations, a significant portion of any U.S. user charge would likely be passed on to foreign governments.

*See U.S. Department of Transportation and U.S. Department of Commerce, "Inland Waterway User Taxes and Charges" (February 1982).

PART I. MAJOR POLICY ISSUES

The issues the Congress faces in the development of a comprehensive inland waterway policy fall into two basic categories:

Which projects should the federal government undertake? and

How should those projects be paid for?

These questions are not new. In 1976, for example, the Congress requested from the U.S. Army Corps of Engineers a study to assist in considering questions dealing with the federal investment required and the projects needed.[1] That study identified potential investment needs arising from technological obsolescence and congestion. It concluded that $2.9 billion in 1982 dollars would be needed to complete navigation projects already under construction, and another $8.9 billion would be needed to rehabilitate and improve the inland waterway system over the coming 20 years. Another study, by the Departments of Transportation and Commerce, took up the questions of how such projects should be financed and paid for, and what likely impact should be anticipated from waterway user charges. Mandated by the Inland Waterway Revenue Act of 1978 (P.L. 95-502), the study is most commonly referred to as the "Section 205 Study" and is examined in Part II.

The link between the means of financing projects and the number and types of projects that should be undertaken warrants emphasis. The level of investment "needs" depends in part on how projects are paid for. Assessments of transportation needs reflect a desired quality and quantity of services to be provided at some understood level of prices. When the prices charged for use of a service or facility change, the level of "needs"—that is, demand for that service—may change dramatically as a result. One of the effects of not charging or underchanging users for services provided is that doing so usually leads to exaggerated assessments of demand. In other words, users request a far higher level of investment than they would if they themselves were faced with paying for the investment.

The second set of issues, then, is: Who should pay for the projects the federal government undertakes, and how should those projects be financed. These questions are considered from two perspectives—the general choice between user charges and funding from general revenues, and more specific issues related to user charges.

User charges versus funding from general revenues

From 1824, when the Army Corps of Engineers first began work on the nation's inland waterway system, most costs were paid from general revenues.[2] Early federal involvement in the development and operation of the inland waterways was undertaken to link the newly developing Midwest with the more developed eastern part of the country. Many later projects were also undertaken to promote regional economic growth. The direction of federal policy shifted in 1978, however, with the imposition of an excise tax on fuel under the Inland Waterway Revenue Act. The initial tax rate was set at 4 cents per gallon and is scheduled to increase in stages to a final level of 10 cents per gallon in 1985. Thus, today, commercial users of the inland waterway system are required to share directly in the costs of supporting the system.

When a federal subsidy is intended to promote regional development, few alternatives to funding such projects from general revenues are available. Attempts to finance projects by charging beneficiaries would largely negate the intent of a subsidy designed for that purpose. To the extent that the economy has now matured, however, and federal support of the inland waterway system has come to be viewed as support of one of a choice of freight modes, the Congress may wish to see that users bear an increasing share of the costs of the system.[3]

User charges have at least three major justifications. First, they promote an efficient use of resources. Transportation facilities provided without cost recovery make a mode that is subsidized cheaper to use than it otherwise would be. This can lead to a diversion of traffic from an economically more efficient mode to the subsidized mode. Second, simple fairness suggests that commercial enterprises, not the general taxpayer, shoulder the costs of the government services they use. And third, user charges can help determine the quality and quantity of services to be supplied by the government. Consensus is currently growing that federal subsidies give rise to demand for services that exceeds the level that would be requested if users had to pay for those services, and that many projects previously authorized would not have been undertaken if users had had to pay for them. Appropriate—that is, higher—user charges would tend to diminish the demand for projects that are not economically justified. If users are to pay a share of the costs of the inland waterway system, several subsidiary issues must be resolved.

Levels of cost recovery

User fees now in effect recover approximately 10 percent of the Corps of Engineers' costs of operating and maintaining the inland waterway system. Taxes at their present levels do not recover investment costs. Since other, competing modes of transport receive far less subsidy,[4] a move toward full cost recovery appears to offer potential for improving the efficiency of the nation's transportation system. Such a move would mean substantially higher fees on users, with hardship on some. Thus, the Congress might wish to phase in any changes in user charges or to seek less than full cost recovery. This latter approach would resemble that taken in 1978 under the Inland Waterway Revenue Act, which phases in the current set of fuel taxes at levels that recover less than full costs.

[1] See U.S. Army Corps of Engineers, *National Waterways Study—A Framework for Decision Making—A Summary*, Institute for Water Resources (January, 1983).

[2] In fact, user charges were levied on a few waterway segments until 1871.

[3] For an overview of the nation's public works infrastructure and an extensive analysis of user charges, see Congressional Budget Office, *Public Works Infrastructure: Policy Considerations for the 1980s* (April 1983). See also Congressional Budget Office, *Reducing the Deficit: Spending and Revenue Options* (February 1983), Chapter IX on "User Fees and Other Government Changes."

[4] The Congressional Budget Office has estimated that, in 1980, federal subsidies covered more than one-fourth of all inland waterway shipping costs. In contrast, trucks and railroads received far less (1 percent and 6 percent, respectively) and pipelines received no subsidies. Since 1980, the level of federal support for the rail freight industry has fallen as Conrail's financial performance has improved. See statement of Alice M. Rivlin, Director, Congressional Budget Office, before the Senate Committee on Environment and Public Works, Subcommittee on Water Resources, February 10, 1982.

Systemwide versus segment-specific charges

User fees for services provided to commercial navigation can be uniform for all users throughout the inland waterway system. For example, the current fuel tax and the Administration's recent proposal (S. 1554) that all carriers pay a tax of 1.1 mill per ton-mile represent fees of this type. Alternatively, different fees can be charged to different users, depending on the costs of the services provided to them. Under such a plan, users of high-cost waterway segments would pay fees reflecting the relative costs of those segments—for example, lockage charges or ton-mile fees, which differ by river segment.

Uniform systemwide charges tend to be easier and therefore less costly to administer. Since all users pay the same charge regardless of the costs of services provided to them, however, systemwide fees do not necessarily promote the selection of the most cost-effective projects. Segment-specific fees, on the other hand, tend to be administratively more complex, but they may lead to greater gains in efficiency; users more directly responsible for the costs must pay more of the costs incurred in their behalf. Some combination of systemwide and project-specific charges is also possible—for example, a systemwide fee to recover basic operating and maintenance costs, combined with a segment-specific fee for any water route on which heavy use requires exceptionally large investment costs.[5]

Treatment of capital costs

Because waterway projects are relatively few and of large scale involving sizable capital investment, the Congress may wish to consider initial federal financing of the projects, with subsequent cost recovery. Federal highway and airport programs are financed on a "pay-as-you-go" basis, with concurrent federal financing and cost recovery. That is, user fees are set at a level high enough so that user charge revenues offset current capital outlays. Such an approach is feasible with highways and airports, in which there are large numbers of capital projects and the administrative costs of treating each individually would be high.

With waterway projects, a somewhat modified approach might be effective. If major up-front costs were federally financed, they might subsequently be recovered over a projects' economic life with user charges tailored to specific projects. Doing so would strengthen the tie between investment costs and payments by users—thereby increasing economic efficiency.

PART II. THE SECTION 205 STUDY

In their "Section 205 Study," the Departments of Transportation and Commerce undertook to forecast the level of inland waterway traffic, first assuming no user charges.[6] Cost information provided by the Corps of Engineers was then used to estimate an initial level of user charges that, if levied on this traffic, would recover all inland waterway costs. Since user charges would increase the costs of barge transportation, some traffic would be diverted to other freight modes. The reduction in the expected level of traffic, in turn, would mean that the initial level of user charges would not result in full cost recovery. Hence, the simulation model was run through several iterations, each time with assumptions of lower traffic and higher user charges than in the previous round until the level of traffic appeared to stabilize.

Two key aspects of the Section 205 Study are particularly worth noting. First, the waterway use levels forecast prior to any diversion of traffic that might result from user charges reflected a continuation of the substantial growth experienced during the 1970s (averaging a little over 3 percent a year). In light of the slower growth experienced since 1979, continuation of such high growth rates is not now a clear prospect. Second, the study contemplated recovering only a relatively small amount of capital expenditures. It did not include any capital recovery of projects previously completed and concluded that traffic growth would not necessitate completion of any major new projects until the year 2000. Thus, the only capital expenditures to be recovered were projects still under construction.[7] In 1985, the costs to be recovered would include about $25 million in capital recovery, and by 1995, annual capital recovery would rise to about $150 million. (Converted into 1982 dollars, capital recovery would be about $31 million for 1985 and $190 million for 1995.) These amounts are relatively small compared with current Corps of Engineers construction levels, which have been running at about $400 million a year, and they are also small next to the Corps' estimates of approximately $12 billion worth of construction required over the next 20 years (or about $600 million a year in 1982 dollars).[8]

The combination of traffic levels that may be high and cost figures that are probably low means that any estimates of the tax levels needed to achieve full cost recovery are on the low side. Thus, the Section 205 Study's conclusion that a fuel tax of 34 cents a gallon (in 1979 dollars) would be required in 1985 to recover costs fully appears low.[9]

Taxes under present law will reach a maximum of 10 cents a gallon in 1985. This level is clearly far below the rate required for full cost recovery. The ultimate level of taxes that would be needed for full cost recovery would depend on a large number of uncertainties including future traffic growth, elasticity of demand for waterway transport, responses of competing freight modes to waterway charge increases, and the strength of foreign markets. Thus, the exact per-gallon level of fuel taxes that would fully recover waterway expenditures is uncertain. But calculation of an exact figure is unnecessary unless the Congress should desire to raise the tax level in one large increase. Much more important is the fact that the tax level for full cost recovery would be far above current levels.

The 205 Study is useful in pointing out differences between segment-specific versus systemwide user charges. When facilities are financed by charges that clearly reflect the costs of the services provided, users usually tailor their demand to their needs more carefully than they do when services are paid for either by a systemwide excise tax or out of general federal tax revenues. This observation holds as well for services provided by the private sector. For example, when electric power is metered and users are charged according to use, less power is consumed and conservation is encouraged.[10]

The 205 Study notes several high cost/low volume waterway segments that would carry no traffic at all if charges were set to cover the full costs of providing services. Some such segments have already cost the federal government substantial sums of money, and the projection of increased waterway traffic in general suggests that these segments may have adequate prospects for future use to warrant their continuation. In such instances, the structure and timing of user charges might be adapted to particular circumstances. Levies could be limited to less than full cost recovery, leaving responsibility for remaining costs still with the federal government—that is, still subsidized. Should traffic growth continue, this would retain the opportunity for the federal government to recover a greater proportion of costs in the future. To prevent such situations from recurring, however, the Congress might choose to impose segment-specific user charges designed to recover full costs on new projects not yet begun.

Several other conclusions of the 205 Study are also notable. One is that, with or without user charges, traffic growth on the inland waterway system is projected to continue. It also concludes that user charges would have minor or negligible impacts on regional economies, on energy consumption, and on the international balance of payments. On the other hand, two groups would sustain negative impacts, namely barge operators and grain interests. Though these effects are not analyzed in great detail, the diversion of some traffic to other freight modes (mainly rail) would cause the barge industry to experience slowed growth in traffic, revenues, and employment. Given the forecast of continued overall traffic growth, however, industry revenues and employment are nonetheless expected to rise over time, though less than might be achieved without increased user charges.

Thus, in light of all other changes occurring in a dynamic economy, the study concludes that user charges would probably not be a major influence on the well-being of the groups affected. It does, however, analyze in detail the impact of waterway user charges on grain shippers, discussed in the next section.

PART III. IMPACT OF USER CHARGES ON AGRICULTURAL SHIPPING

Various factors would determine the effects of waterway user charges on farmers. These include the level and type of charges and conditions in domestic and foreign markets. The effects would not be uniform among all farmers; not surprisingly, those closest to waterways and making the most extensive use of them would feel the most impact. In other words, farmers—or indeed, any other users of public works—who bene-

[5] This approach, a combination of systemwide and segment-specific fees, is reflected in S. 1554, which was introduced on June 28, 1983 and referred to the Senate Committee on Environment and Public Works.

[6] See U.S. Department of Transportation and U.S. Department of Commerce, *Inland Waterway User Taxes and Charges* (February 1982). Since only a small fraction of the $8 million authorized for the study was actually appropriated, the final report was not so comprehensive as the act describes. Reference to supporting analysis is provided in the Appendix.

[7] Those costs would be amortized over a 50-year period at a 3-percent rate of interest. Since all costs were expressed in 1979 dollars, the 3 percent represents a real rather than nominal interest rate.

[8] See U.S. Army Corps of Engineers, *National Waterways Study.*

[9] Converting the 34 cents to 1982 dollars would yield an estimate of 43 cents per gallon.

[10] For other instances of this effect in the private sector, see Congressional Budget Office, *Public Works Infrastructure.*

fit most directly from a subsidy stand to be the most directly affected by the withdrawal of that subsidy. And conversely, if the imposition of higher user charges should result in a higher delivered or market price for grain, farmers far from water transportation who make relatively little use of such services might actually benefit.

Cost effects for grain shipping—two analytic approaches

Recognizing the importance of grain transportation, the Section 205 Study presents the results of two different analytic methods to simulate effects of user charges. First, grain transportation was studied in the same manner as all other commodities by Data Resources, Inc. (DRI). Future traffic volumes without user charges were generated in DRI's macro-economical model. "Trigger points," or potential price increases at which shippers would begin to alter their shipping patterns, were then estimated. Then, DRI sought to estimate amounts of traffic diverted. Assuming that all costs were borne by farmers, the results suggested that the cost per bushel of moving grain by barge would increase by about 2 cents to 4 cents by 1990, and that a fuel tax of about 38 cents per gallon would be required to recover costs fully in that year.[11]

The results differed according to whether the means of cost recovery assumed was a systemwide fuel tax or a segment-specific mechanism. With the segment-specific user charge, barge transportation on serveral river systems emerged as no longer viable, because the waterway charges would result in costs higher than shippers would have to pay to use other transport modes. In such cases, only a systemwide charge would support these segments' costs. Shippers on high volume segments, in contrast, would bear lower shipping costs under a segment tax than under a systemwide tax.

The second approach, taken in a study by researchers at Iowa State University, uses production estimates from the U.S. Department of Agriculture for the years 1985 and 1990. The Iowa study identified the origin points for the grain shipments and the final destination points on the basis of consumption and export patterns. It then used a mathematical model to derive a least-cost distribution system. This provided a base case—an estimate on traffic flows in the absence of raised user charges. Transport costs were then increased to reflect user charges, and the program was rerun with a different set of commodity flows resulting.

The basic result of the Iowa analysis is that grain transport costs per bushel would be increased an average of between 2 cents and 3 cents, assuming a systemwide fuel tax of 32 cents a gallon in 1985. Because the Iowa study's method used more geographically specific input information, the results yielded more specific geographic information. The results were not uniform for all farmers. Typically, the price increases appeared lower on the Columbia/Snake River system (Washington/Oregon), ranging from less than 1 cent per bushel up to 2.5 cents per bushel, and higher on the Missouri River system, ranging from 4 cents per bushel to 7 cents per bushel.

[11] All estimates are expressed in constant 1979 dollars.

TABLE 1.—LEVEL OF WATERWAY USER CHARGES REQUIRED TO RECOVER OPERATION AND MAINTENANCE COSTS IN 1982

River	City where shipment originates	Miles to port [1]	In cents per bushel: Charges to recover full costs [2]	In cents per bushel: Charges to recover 70 percent of costs [3]
Mississippi	Minneapolis, Minn	1,811	7.8	5.8
	Clinton, Iowa	1,471	6.4	4.7
	St. Louis, Mo	1,128	4.9	3.6
	Cairo, Ill	954	4.1	3.0
	Helena, Ark	661	2.9	2.1
Illinois	Seneca, Ill	1,424	6.2	4.5
	Peoria, Ill	1,330	5.8	4.2
Ohio	Cincinnati, Ohio	1,456	6.3	4.6
	Louisville, Ky	1,332	5.8	4.2

	Central Ferry, Wash	405	1.8	1.3
	Windust, Wash	350	1.5	1.1
	Biggs, Oreg	209	.9	.7

[1] From C. Phillip Baumel, Robert J. Hauser, and Jeffrey Beaulieu, "Impact of Inalnd Waterway User Charges on Corn, Wheat and Soybean Flows," Iowa State University (March 1982), p. 44.
[2] CBO estimate.
[3] Administration proposal. CBO estimate based on a user charge of 1.1 mills per ton mile, as specified in S. 1554.
Note.—In all cases, estimates assume systemwide user charges.

CBO estimates

The CBO estimates that the level of user charges that would have been required to recover all 1982 operation and maintenance costs would, on average, have been about 4 cents per bushel. These charges are shown in Table 1, along with the user charges that might result from the Administration's proposal to recover 70 percent of operation and maintenance costs. These estimates assume that user charges are related to ton miles carried. User charges would be substantially lower if calculated on the basis of tons shipped, because agricultural shipments tend to have trip lengths much longer than the average for the full spectrum of waterway users.

Long-term effects

Depending on market conditions, increased user fees might be borne in the short run by U.S. producers, by consumers, or by intermediaries. In the longer term, the burden would likely be divided somehow between producers and consumers only.

During the past year or so, increasing attention has been devoted to import levies and other attempts by foreign nations to insulate their domestic markets from international commodity price fluctuations.[12] In essence, such policies seek to maintain a fixed domestic price by raising tariffs in response to falling import prices and lowering tariffs in response to rising prices. To the extent that U.S. exports are bound for destinations that adhere to such practices (such as the European Community), and to the extent that user fees resulted in higher delivered prices, the nations importing the grain would absorb the user fees by reducing import levies to maintain constant domestic prices. On the basis of current export patterns, two analysts have estimated that approximately two-thirds of any U.S. user fees would ultimately be absorbed by foreign governments.[13]

In any event, the magnitude of the impact of user fees on farmers would be swamped by normal price fluctuations and other economic variables. For example, CBO estimated last year that a one-percentage-point increase in the interest rate would cost about $5,700 each year for a typical farm harvesting 400 acres of corn and soybeans.[14] By contrast, user fees resulting in a price change of 3 cents a bushel would result in a loss of gross annual farm income of about $900. In comparing any price changes resulting from user charges, one should note that changes in daily grain prices of 5 cents to 10 cents per bushel are not uncommon.

APPENDIX: ANALYSES SUPPORTING THE SECTION 205 STUDY

Detailed reports of the research undertaken for preparation of the Section 205 Study can be found in the following publications of Data Resources, Inc. (DRI) and Iowa State University (Iowa State). See Robert Schuessler and Allan Phillips, "The Economic Impact of Inland Waterway User Charges," DRI (March 1982), and Schuessler, "Analysis of Issues Relating to the Economic Impact of Inland Waterway User Taxes and Charges," DRI (March 1982). See also C. Phillip Baumel and Curtis D. Huyser, "Impact of Inland Waterway User Charges on Fertilizer Flows," Iowa State (March 1982), and Baumel, Robert J. Hauser, and Jeffrey Bealieu, "Impact of Inland Waterway User Charges on Corn, Wheat, and Soybean Flows," Iowa State (March 1982).●

SENATOR ERVIN ON EQUAL RIGHTS AMENDMENT: "ERA'S TIME IS GONE"

● Mr. HELMS. Mr. President, the distinguished former Senator from North Carolina, Sam J. Ervin, Jr., wrote an article for the New York Times on the equal rights amendment which appeared in yesterday's edition. Senator Ervin brings great wisdom and years of public service to bear when he shares his thinking on issues of the day. I therefore invite my colleagues' attention to the matter of the equal rights amendment and Senator Ervin's judgment on it.

Mr. President, I ask that "ERA's Time Is Gone" by Senator Ervin, appearing in the August 1 edition of the New York Times, be printed in the RECORD.

The article follows:

[From the New York Times, Aug. 1, 1983]

ERA's TIME IS GONE

(By Sam J. Ervin, Jr.)

MORGANTON, N.C.—After 49 years of wise forbearance, Congress in 1972 succumbed to temptation and submitted the Equal Rights Amendment to the states for their ratifications. In the next eight months, 22 states voted to ratify it without pausing to determine what it meant and would do.

Knowledgeable and patriotic Americans, chiefly women, became alarmed by the early trend and assumed the task of telling the truth about the amendment to state legislators who had not already voted to ratify it.

As the truth was exposed, ratifications slowed. The 35th and last ratification was in 1977, when President Carter's underlings and supporters of the amendment persuaded or coerced Indiana to ratify the amendment by a one-vote margin.

When it became obvious that the requisite number of states—three-fourths—would not ratify within the seven years originally designated for the purpose, Congress succumbed to temptation a second time and extended the deadline for ratification three more years. Again the amendment's supporters were disappointed. Not a single state ratified the amendment during the three-year extension, notwithstanding political pressures and economic threats previously unknown in the United States.

Blind to these illuminating events, unrelenting advocates of the amendment are now demanding that Congress submit to temptation for the third time and present the amendment to the states yet again. Congress should resist these siren calls.

One can understand what the Equal Rights Amendment means and will do by reading the beguiling and deceptive words of the amendment and by meditating on what its most knowledgeable champions have said on the subject.

The amendment says "equality of rights under the law shall not be denied or abridged by the United States or any state on account of sex." Prof. Thomas Emerson of the Yale Law School and the three lawyers who joined him in an article in the Yale Law Journal in April 1971 have told us exactly what that means. I quote their words:

"The basic principle of the Equal Rights Amendment is that sex is not a permissible factor in determining the legal rights of women or men. This means that the treatment of any person by the law may not be based upon the circumstances that such person is of one sex or the other. The principle of the amendment must be applied comprehensively and without exceptions. Prohibition against the use of sex as a basis for differential treatment applies to all areas of legal rights. From this analysis it follows that the constitutional mandate must be absolute. Equality of rights means that sex is not a factor."

This being true, the amendment, if ratified, would have a devastating effect on the realities of human life as they have always existed in America and on the structure of our Government. I enumerate a few of the inescapable consequences of its ratification. It would nullify all existing and future laws on these subjects:

Laws that exempt women from being drafted and sent into combat in wars with our armed enemies.

Laws that grant legal exemptions and economic protections to women in general and wives, mothers and widows in particular.

Laws that impose on husbands and fathers the primary obligations to support their wives and children.

Laws that insure privacy to men and women and boys and girls by requiring separate restrooms in schools and in public, commercial and industrial buildings.

Laws that permit or require segregation by sex in schools, hospitals, jails and prisons.

Laws that regulate marriage and make the legal right of one person to marry another depend on their being persons of different sexes.

Laws that defines as crimes sexual offenses, such as rape and carnal knowledge of innocent and virtuous girls under the age of consent, which can be committed only by men.

What has just been said cannot be rightly disputed. The Equal Rights Amendment applies absolutely and completely to all areas of legal rights and forbids Congress and the states to make any legal right of any person depend on the circumstance that he or she is of one sex or the other.

Besides, the amendment would transfer from the states to Congress the ultimate legislative power to enact all laws regulating the rights and responsibilities of men and women and the protection of little children, God's most helpless creatures. In addition, the amendment would rob state courts of much jurisdiction by vesting in the Supreme Court supreme power to determine all questions on these subjects.

If ratified, the Equal Rights Amendment would crucify American womanhood on the cross of a dubious, legal equality and a specious legal uniformity.●

FELLOWSHIP PROGRAM OF THE ENGINEERING SOCIETY OF DETROIT

● Mr. RIEGLE. Mr. President, I would like to call the Senate's attention to a valuable and enlightened program that was developed 2 years ago by the Engineering Society of Detroit. This program places two professional engineers on Capitol Hill for 1 year. During the past 11 months, Scott Wagner of Detroit has been working in my office and Bill Pollard of Ann Arbor has been a staff professional in the office of my colleague from Michigan, CARL LEVIN. They have provided technical expertise and ability to our staffs in a variety of areas.

For example, Scott Wagner has been involved in issues ranging from revisions of the Clean Air Act to funding for mass transit projects in Michigan. Scott's contributions have been most valuable because he has enhanced our own capability to analyze the difficult issues facing the Congress, and develop appropriate responses. In addition, Scott, and this program, bring to us engineers with a distinct Michigan perspective. This enables our offices to focus legislative efforts in areas with the greatest benefit to the State.

Congress faces thousands of issues that are technical in nature. The Engineering Society of Detroit's fellowship program has increased our ability to serve the people of Michigan in more professional and practical fashion.●

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I believe there is no great demand for morning business this afternoon. In a few moments I will ask the Chair to inquire if there is further morning business and if no other Senator seeks recognition, I will plan to ask that the Senate recess over under the order previously entered until 9:30 a.m. tomorrow.

UNANIMOUS-CONSENT AGREEMENT—CONFERENCE REPORT, H.R. 3329

Mr. BAKER. Mr. President, I have a unanimous-consent request in respect to the conference report that I would like to state now for the benefit of the minority leader.

Mr. President, I ask unanimous consent that when the Senate considers the conference report to accompany H.R. 3329, the Department of Transportation appropriations bill, that the only amendment to be in order to an amendment in disagreement be an amendment dealing with OPM, to be offered by the Senator from Maryland (Mr. MATHIAS), with debate to be limited to 30 minutes equally divided between the mover of the amendment and the ranking minority member of the Appropriations Subcommittee, or their designees.

I further ask unanimous consent that time on the conference report and all other amendments in disagreement be limited to a total time of 30 minutes, to be equally divided between the chairman of the Transportation Subcommittee of the Appropriations Committee and the ranking minority member of that subcommittee, or their designees.

The PRESIDING OFFICER (Mr. RUDMAN). Is there objection?

Mr. BYRD. Mr. President, no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. I thank the minority leader.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I have three other brief requests and then I believe the distinguished Senator from Vermont has a matter he wishes to address. Mr. President, I believe all three of these requests have been cleared with the minority leader.

ORDER TO HOLD H.R. 3232 AT THE DESK

Mr. BAKER. Mr. President, I ask unanimous consent that H.R. 3232, an act to amend title 38 of the United States Code to authorize payment of travel and transportation expenses of newly appointed special agents of the Justice Department be held at the

desk until the close of business on Thursday, August 4.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

ORDER TO HOLD H.R. 3677 AT THE DESK

Mr. BAKER. Mr. President, I ask unanimous consent that H.R. 3677, an act to amend title XVIII of the Social Security Act to increase the cap amount allowable for reimbursement of hospices under the medicare program be held at the desk pending further disposition.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

EARLY ANNOUNCEMENTS OF AGRICULTURAL PROGRAMS

Mr. BAKER. Now, Mr. President, if the minority leader is agreeable, I would like to ask the Senate to turn to the consideration of H.R. 3564.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3564) to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. BYRD. No objection, Mr. President.

There being no objection, the Senate proceeded to consider the bill.

Mr. HUDDLESTON. Mr. President, H.R. 3564 will help farmers and industries that provide vital farm production supplies to make timely decisions for the 1984 and 1985 crop year. The provisions of H.R. 3564 are identical to those contained in S. 1687, a bill I introduced along with Senator JEPSEN.

I am pleased that Congress has acted rapidly in enacting this legislation. The bill will give wheat and feed grain farmers and farm suppliers a better opportunity to plan for adjustments in the 1984 and 1985 crop years than they have been afforded in the past.

The bill requires that the 1985 wheat program and the 1984 and 1985 feed grain programs be announced earlier than the dates specified in the 1981 farm bill. Under the bill, the Secretary of Agriculture would announce the 1985 wheat program by July 1, 1984. Further, he would announce the 1984 feed grain program by September 30, 1983, and the 1985 feed grain program by September 30, 1984.

Farmers and farm supply industries need to have adequate time to evaluate the commodity programs and to make planting and purchasing decisions based on that evaluation.

The late announcement of the 1983 payment-in-kind program gave farmers and farm suppliers little opportunity to plan adjustments for the 1983 crop year. Due to the late announcement of the program, agricultural suppliers, such as fertilizer producers and dealers, were caught with very large surpluses of supplies.

It seems clear that the timing of the program announcements can seriously and adversely affect the fertilizer industry. To alleviate the problems of that industry and other suppliers of production items, and the farm economy as a whole, the acreage reduction programs must be announced as early as possible.

This bill provides for more timely announcement and I am pleased the Congress has approved it.

The PRESIDING OFFICER. The bill is before the Senate and open to amendment. If there be no amendment to be offered, the question is on the third reading and passage of the bill.

The bill (H.R. 3564) was ordered to a third reading, was read the third time, and passed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RECORD OPEN UNTIL 6 P.M. TODAY

Mr. BAKER. Mr. President, it appears that the Senate will not be in session very much longer. I ask unanimous consent that the RECORD may be kept open today until 6 p.m. for the purpose of inserting statements.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Now, Mr. President, I believe the Senator from Vermont wishes to address the Chair. I yield to him.

The PRESIDING OFFICER. The Senator from Vermont.

CONSOLIDATION OF STUDENT LOANS AND CHANGES IN FEDERAL STUDENT FINANCIAL ASSISTANCE

Mr. STAFFORD. Mr. President, I call up H.R. 3394, which is at the desk, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

A bill (H.R. 3394) to provide additional authority for the consolidation of student loans and to make certain other changes in Federal student financial assistance.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

There being no objection, the Senate proceeded to consider the bill.

amendment no. 2109

(Purpose: To strike a cost of attendance allowance for room and board provision, and to extend a priority provision with respect to Sallie Mae indebtedness, and for other purposes)

Mr. STAFFORD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Vermont (Mr. STAFFORD) proposes an amendment numbered 2109.

Mr. STAFFORD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 22, lines 14 and 15, in section 3(a) of the Student Financial Assistance Technical Amendments of 1982, as amended by section 4(a) of the House engrossed bill, strike out ", 1984-1985, and 1985-1986" and insert in lieu thereof "and 1984-1985".

On page 22, beginning on line 24, strike out subsection (c) of section 3 of the Student Financial Assistance Technical Amendments of 1982, as amended by section 4(a) of the House engrossed bill.

On page 32, line 16, section 8 of the House engrossed bill is amended by striking out all after "by" and inserting in lieu thereof the following: "striking out 'September 30, 1984' and inserting in lieu thereof 'September 30, 1988'.".

Mr. STAFFORD. Mr. President, I am extremely grateful to the distinguished majority leader, Senator BAKER, and the minority leader, Senator BYRD, for arranging for the pending bill H.R. 3394, to be brought up at this time.

Mr. President, it is essential that this bill be considered, passed, sent back to the House, and sent to the President before we go into recess. If we do not act now, there will be yet another delay in the processing and delivery of student aid for more than 6 million applicants who need this aid in order to be able to attend school. These perpetual delays, resulting from differences about the distribution of such aid between Congress and the administration, have caused massive confusion among students, parents, college administrators, and lenders about the availability of aid. They have wreaked havoc with the ability of students to plan the financing of their higher education.

The bill before us, Mr. President, would do the following:

First. Permanently extend the waiver of Federal debt priority under

bankruptcy statutes for the Student Loan Marketing Association (Sallie Mae);

Second. Maintain the current family contribution schedules for Pell grants and guaranteed student loans for the 1984–85 and 1985–86 academic years, updated for the most recent and relevant data;

Third. Maintain the existing definition of "financially independent student" for the 1984–85 and 1985–86 academic years;

Fourth. Clarify the student loan disclosure provisions of last year's higher education technical amendments, Public Law 97–301;

Fifth. Increase the "Cost of attendance" allowance, used in determining eligibility for Pell grants, for commuting students not living at home to $1,600 in 1984–85 and $2,100 in 1985–86; and

Sixth. Extend for 3 months the authority of Sallie Mae to consolidate student loans.

Our amendments would modify the House-passed bill in the following manner:

First. Extend the Federal debt priority waiver for Sallie Mae to September 30, 1988, rather than permanently. This is an extension of 4 years relative to current law, and will provide sufficient stability for Sallie Mae in the financial markets; and

Second. Allow the increase in the commuter student allowance to rise to $1,600 for the 1984–85 academic year.

On this latter item, Mr. President, we feel constrained by the action of the other body. Frankly, I would prefer to wait until the reauthorization of the Higher Education Act, scheduled to take place in the 99th Congress, to address this issue, which has the potential of shifting the distribution of Pell grants among students in the various sectors of higher education. This is certainly a substantive change in what we intended to be a technical amendments bill. I would like to make it clear as to the intent of this amendment. We do not intend that the increased ceiling for the commuter student allowance be achieved by reducing Pell grant awards for noncommuters. In other words, if funds are insufficient to assure payment of Pell grant awards to satisfy all entitlements at the current maximum of $1,800, the $1,600 ceiling on the commuter allowance should be reduced as necessary. This is not to imply that the Pell grant maximum award should remain at $1,800; quite the opposite, we hope that the maximum award will be increased, and the commuter allowance will be able to rise accordingly. It has not risen, I am informed, for almost 10 years. However, this is a matter which is within the province of the appropriations process, and must be finally addressed within that process.

Mr. President, this is the best bill we are likely to get, given the stringencies of our time constraints. It is far from a perfect bill; it is not what I would, as chairman of the Education Subcommittee, have desired. We intended to bring before the Senate a bill which would have allowed State loan guarantee agencies and other private lenders the opportunity to consolidate loans on behalf of students on the same terms as Sallie Mae. The bill which my good friend, Congressman PAUL SIMON, intended to bring before the House on Monday would have done just that. However, at the last minute, just hours before consideration of the bill under suspension of the House rules, the Director of the Office of Management and Budget informed the ranking member of the Education and Labor Committee, Congressman ERLENBORN, that OMB objected to the bill.

OMB has known of this bill for months, and had never raised objections to it. At the 11th hour, without accurate data, it now objects to student loan consolidation. the Congressional Budget Office estimates that loan consolidation by States would result in a revenue loss of some $2 million in fiscal year 1984, rising to $12 million in fiscal year 1986. This is indeed a minimal cost to bear if we are attempting, as the administration has suggested time and time again that we do, to shift the burden of government to the States. Needless to say, I am vexed about the dilatory response of OMB on this matter. To merely extend Sallie Mae's authority for 3 months means merely that we will shortly visit this issue again, with or without the help of OMB.

Mr. President, with respect to the extended 3-month authority of Sallie Mae to consolidate student loans, I am aware that the original August 1 shutdown date for loan consolidation has caused some questions in the minds of borrowers and within the administration of Sallie Mae as to whether the program would be able to continue. I would hope that we will be able to work out an agreement to allow the program to continue, extending consolidation authority to States and other private lenders as well. However, I would urge that Sallie Mae in the next 3 months, accept for consolidation only those applications actually made to it prior to August 1.

Finally, Mr. President, there is another issue which I would have hoped to address in this legislation. I am concerned that certain nonprofit guarantors of student loans which are not designated as the State loan guarantee agency have been entering States to guarantee loans without informing the designated State agency. Mr. President, I believe that in certain States, where access to student loans has been far from universal, the State agencies have been part of this problem of access. This is especially true for students in certain proprietary school programs of short duration. In these States, it may be necessary to have an outside lender and an outside guarantor.

However, I do not believe that outside guarantors should make a unilateral determination that service and access provided by a State agency has been inadequate, and then enter into business in that State without some determination by the Secretary of Education and the Governor that access has been, in fact, inadequate. It has never been the intent of Congress, since the inception of the State guarantee agency program, to have a nonprofit organization or institution which is not designated as the State guarantee agency compete with such a designated agency. If the Secretary finds that an outside guarantor can provide improved student access to capital, then he should allow a guarantee arrangement made by that guarantor to stand. I believe that the recent proliferation of these arrangements, without close scrutiny by Congress or by the Secretary as to whether such arrangements actually improve student access to loan capital, is troublesome, and does merit our prompt attention. Therefore, Mr. President, I will work to see that Congress addresses this important issue during its further consideration of the student loan consolidation issue, which must occur before the end of October.

I thank my colleagues, and urge the adoption of the amendment.

Mr. KENNEDY. I would like to make a brief statement regarding H.R. 3394, the Student Loan Consolidation and Technical Amendments Act of 1983. As Senator STAFFORD noted, this legislation addresses and resolves some very important and complex problems related to our student financial aid system.

Specifically, this bill:

Establishes the Guaranteed Student Loan and Pell Grant Family Contribution Schedule through the 1985–86 school year;

Freezes the criteria for determining independent student status through the 1985–86 school year;

Requires the disclosure of certain information to students regarding their loans; and

Extends the Student Loan Marketing Association loan consolidation authority through October 31 of this year.

If we hope to avoid a serious disruption in the student financial aid system, we must insure that these four provisions are enacted prior to the August recess. However, both the Senate and the House are operating under enormous time pressures. I fear that the House will simply not have

time to return to consideration of this bill, as amended.

Let me emphasize that I have no substantive objections to these amendments. I would simply prefer to accept this bill without these amendments. I believe our first priority should be in insuring that the financial aid system is not needlessly disrupted.

I will not object to the amendment by Senator STAFFORD nor will I oppose it. I urge my colleagues to also accept this amendment and this bill. More importantly, however, I urge my colleagues in the House to move to a speedy disposition of this bill as amended. Let us get this bill enacted and get the loan money out to the students.

Mr. STAFFORD. Mr. President, I move the adoption of the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 2109) was agreed to.

Mr. STAFFORD. Mr. President, I move passage of the bill as amended.

The PRESIDING OFFICER. Are there further amendments? Is there further debate? The question is on the engrossment of the amendment and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

Mr. STAFFORD. I move to reconsider the vote by which the bill passed.

Mr. BAKER. I move to lay the motion to reconsider on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, that is all I have in my folder. There may be at least one other Senator on the way to the floor. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. HUDDLESTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FARMERS AND FOREIGN SUBSIDIES

Mr. HUDDLESTON. Mr. President, we all know that our agriculture producers in this country are undergoing very difficult times—low prices, the weather, surplus production, foreign sales declining for the third time in over a decade. We know that, in this country, we have to be able to sell abroad over a third of the grain we produce in order to accommodate the production capacity of our producers and to assure some kind of reasonable return.

Our colleague, the distinguished Senator from Delaware (Mr. BIDEN), has written an excellent article, carried in the Daily Times of Salisbury, Md., relating to this problem as it affects his State of Delaware.

One of the problems that the Senator from Delaware points out and emphasizes in this article is the fact that our producers are having to compete with agriculture producers of other countries who enjoy large subsidies in their efforts to export their products. Consequently, we are not playing on an even field as far as competing for the export market.

I ask unanimous consent that this article by Senator BIDEN be printed in the RECORD at this point.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

[From the Salisbury (Md.) Daily Times, July 11, 1983]

FARMERS SHOULDN'T HAVE TO COMPETE WITH FOREIGN SUBSIDIES

(By Joseph Biden)

In the last 10 years the value of Delaware agricultural exports have skyrocketed 550 percent.

This is a clear example of how well our products can sell abroad if they are allowed to compete on even terms. But in 1981, for the first time in many years, the value of our farm exports dropped because of the unfair and restrictive practices of our trading partners.

Those of us who serve Delaware in the Congress have had to wrestle with the issue of how to get America's trading partners to trade fairly. This problem hits Delaware's agriculture hard, especially the poultry and soybean business which is so important on the Delmarva peninsula. Agriculture remains one of Delaware's largest and most important industries and these products are the major elements of that industry.

Our farmers and poultry producers, who are hard-working and productive managers, deserve better. They find themselves falling farther and farther behind. Not only do they have to contend with high interest rates—much too high in relation in the current rate of inflation—and continuing low prices for their products, but they also find themselves losing ground to foreign competitors—especially those in Europe—who are heavily subsidized by their governments.

In 1976, the U.S. exported $30 million worth of poultry to the Middle East. Last year, because of foreign subsidies, those exports fell to almost nothing. Delaware's poultry producers feel the aftershocks as they continue to lose money and markets. Unless something happens fast, the United States may no longer have an export industry for whole broilers.

At the end of June, the Commerce Department reported that for the month of May nationwide figures show overall exports falling 3.2 percent. Our trade deficit for 1983 could hit a record $70 billion mark if that trend continues.

Expansion of our exports for Delaware and the entire nation can be achieved—if we insist on fair competition. To that end, I have proposed both legislative and administrative remedies.

Recently I joined a number of my colleagues in pressing Ambassaador Bill Brock, our international trade representative, to negotiate more agressively with our European and Brazilian trading partners. What we need is to substantially reduce government subsidies so everyone can compete on a more nearly equal footing. Brock has been negotiating for the last year and a half. If those negotiations drag out much longer without achieving some substantial concessions, many poultry producers could be facing bankruptcy particularly in light of problems caused by the PIK program.

Two weeks ago, to indicate the urgency of this matter to the Administration, a bipartisan group of my colleagues in the Senate joined me in passing an amendment to the International Monetary Fund Bill. The IMF is responsible for loans to developing countries. The legislation calls for curtailment of aid to countries with predatory export subsidies.

Another step that should help our farmers is the ongoing negotiation with the Soviet Union for a long-term grain agreement. Again, I am urging Ambassador Brock to press the Soviets to include value-added products (soybean meal and oil and poultry parts) in the agreement. Including those products would be of immeasurable benefit to Delaware's producers. Soybeans and poultry accounted for 59 percent of Delaware's agricultural exports in 1981. If our products get a fair shake in these new markets, we can help our farmers without resorting to export subsidies.

BLACK AND HISPANIC VIEWS ON IMMIGRATION

Mr. HUDDLESTON. Mr. President, when experienced pollsters V. Lance Tarrance and Peter D. Hart join together to produce a nationwide poll, no reasonable person would dare question the results. Today, these well respected professionals released the results of a nationwide survey on Hispanic and black attitudes toward immigration policy.

Although their findings were not surprising to me, they do refute much of the misinformation that has been circulated about the need for immigration control. Some of the highlights of the survey were:

Both with regard to legal and illegal immigration, substantial portions of the Hispanic and black communities perceive a need for change in American immigration policies—with pluralities or majorities of respondents emphasizing the need to put greater controls on immigration.

Substantial majorities favor proposals to curb illegal immigration by having penalties and fines for employers who hire illegal immigrants.

Pluralities of Hispanics and majorities of blacks believe that the United States should admit fewer immigrants into the country legally than has been the case in recent years.

Substantial majorities of Hispanics and blacks believe that illegal immigration hurts the job situation for

American workers by taking away jobs that Americans might fill.

This is the most comprehensive national poll ever taken on the attitudes of Hispanic and black Americans on U.S. immigration issues, and I urge all of my colleagues to take the time to review it.

I ask unanimous consent that the summary of major findings be printed in the RECORD.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

HISPANIC AND BLACK ATTITUDES TOWARD IMMIGRATION POLICY—SUMMARY OF MAJOR FINDINGS

CONCERN WITH THE IMMIGRATION ISSUE

1. Among both Hispanics and blacks, there is a broad degree of concern with the issue of immigration. This is particularly true among Hispanics, 72% of whom rank immigration as having above average importance among the range of issues with which government deals—including 31% who say immigration is one of the most important issues facing government and 41% who rank it as very important. Among blacks, 57% assign above average priority to the issue of immigration.

2. There is a widespread perception that illegal immigrants hurt the job situation for American workers by taking away jobs that Americans might take. Fully 82% of all blacks say that illegal immigrants hurt the job situation for Americans. Sixty-nine percent of all blacks believe that this situation is a major problem. Blacks with incomes under $10,000 are particularly likely to feel that job losses caused by illegal immigration are a major problem (76%). Among Hispanics, a 58% majority believe that illegal immigrants take jobs away from Americans who might want them, and 46% of all Hispanics consider this to be a problem of major proportions. Fifty-one percent of Hispanics who are U.S. citizens consider the impact of illegal immigration of American employment to be a problem of major proportions, compared to 28% among non-citizen Hispanics.

3. The large majority of blacks (71%) believe that illegal immigrants cause general pay rates and wages in America to be lower than they otherwise would be, and six-out-of-ten blacks term the impact of illegal immigration on wage rates a major problem. Attitudes among Hispanics on this question are somewhat more divided—52% say that illegal immigrants undermine American wage rates, while 40% do not believe this is the case. Among Hispanics who are U.S. citizens, 55% say illegal immigrants undercut wage rates in the country, including 43% who deem this to be a major problem. Among non-citizen Hispanics, 42% say that illegal immigrants undercut wages and the issue is considered to be a major problem by 26%.

4. Attitudes among both Hispanics and blacks are divided with regard to the assertion that restricting illegal immigration would be harmful to the economy because low-wage jobs now done by illegal immigrants would not get done or employers would be forced to pay higher wages. Among Hispanics, 51% agree and 40% disagree. Among blacks, 48% agree and 44% disagree.

THE BASIC DIRECTION OF IMMIGRATION POLICY

Both with regard to legal and illegal immigration, substantial portions of the Hispanic and black communities perceive a need for change in American immigration policies—with pluralities or majorities of respondents emphasizing the need to put greater controls on immigration.

1. On the subject of legal immigration, 46 percent of Hispanics say that the U.S. should admit fewer immigrants legally than has been the case over the past decade (the question cited 450,000 as the annual average over the past decade), 27 percent feel the recent levels of immigration are about right, and only 15 percent say the U.S. should increase the number of legal immigrants admitted to the country. Among Hispanics who are U.S. citizens, 50 percent believe fewer legal immigrants should be admitted than has been the case in the recent past, 12 percent prefer higher quotas, and 26 percent are satisfied with current levels. Among non-citizen Hispanics, 30 percent would prefer less legal immigration, 25 percent say more legal immigration should be allowed, and 28 percent endorse the status quo. When asked specifically about legal immigration from Mexico in a question that cited the 1980 level of 56,000, Hispanics are somewhat less agreed on the need for reductions (14 percent allow more, 37 percent allow fewer, 40 percent about right). There is a broad consensus among blacks in support of reducing legal immigration generally: fully 65 percent say the U.S. should admit fewer legal immigrants than it has under recent practices, including 45 percent who say the number of legal immigrants should be a lot less.

2. On the subject of illegal immigration, a substantial plurality of Hispanics and a large majority of blacks say our current laws need to be changed to be tougher and more restrictive of illegal immigration and illegal aliens. Among blacks, fully 70 percent favor changing current laws to be tougher on illegal immigration, 16 percent say the current laws are about right, and just 8 percent feel the laws should be changed to be made less restrictive. Among Hispanics, 47 percent favor tougher laws, 22 percent support the status quo, and 15 percent favor moving toward less restrictions; 16 percent are unsure. Again, the difference in attitudes between Hispanics who are U.S. citizens and those who are non-citizens is substantial: 55 percent of Hispanic citizens favor tougher laws to deal with illegal immigration, compared to 23 percent among Hispanic non-citizens. Among both blacks and Hispanics, attitudes toward the basic direction of U.S. policy on illegal immigration hold relatively stable after respondents are given arguments both for (protecting American jobs and wages, put the needs of Americans first) and against ("nation of immigrants" tradition, difficulty of enforcement, potential for discrimination) tough restrictions on illegal immigration. After hearing the pro and con statements, Hispanics favor tough restrictions on illegal immigration by a margin of 57 percent to 32 percent; blacks favor tough restrictions by a 71 percent-to-19 percent margin. (See attached questionnaire for wording of statements.)

REACTION TO SPECIFIC POLICY PROPOSALS

Substantial majorities of both Hispanics and blacks favor proposals to curb illegal immigration by having penalties and fines for employers who hire illegal immigrants and making major increases in the amount of money the federal government spends on patrolling the borders to stop illegal immigrants from entering the country. At the same time, Hispanics tend to be strongly sympathetic to the idea of an amnesty program for illegal immigrants who have been in the country for a certain period of time; a majority of blacks also support this idea, but with less intensity. When respondents volunteer what they believe would be an appropriate amount of time an illegal immigrant should have been in the U.S. in order to qualify for amnesty, the median response among Hispanics is 4.7, while the median response among blacks is somewhat higher than five years.

1. By a margin of 60% to 33%, Hispanics support adopting legal sanctions against employers who hire illegal immigrants. Among Hispanic citizens, 66% favor these employer sanctions—including 53% who strongly support them. Hispanic non-citizens oppose employer sanctions by a margin of 55% to 38%. Blacks favor penalizing employers who hire illegal immigrants by a margin of 66% to 27%, with 56% strongly supporting employer sanctions.

2. Stepped-up spending on tougher border enforcement is supported by all Hispanics by a margin of 61% to 30%, with 47% saying they feel strongly about their support for greater efforts to patrol the borders. Among blacks, fully 69% favor major increases in funding for border patrols (including 55% who strongly favor this).

3. When asked how they feel about the idea of establishing "some sort of amnesty or legalization program that would allow illegal immigrants or undocumented workers who have been in the U.S. for a certain period of time to remain here legally," 74% of all Hispanics say they favor this idea, with 57% who say they favor it strongly; 19% oppose the plan. Blacks favor the concept of amnesty by a margin of 57% to 34%—including 38% who are strongly supportive; 29% are strongly opposed. When asked in a subsequent question to volunteer how long an illegal immigrant should have been in the country to qualify for amnesty, 28% of Hispanics mention a period of four years or less, 32% suggest five years, 29% volunteer a period of more than five years, and 5% stress their opposition to any sort of amnesty. Among blacks, 21% mention a residency requirement of four years or less, 27% specify five years, 34% mention a period of more than five years, and 10% say no illegal immigrant should be granted amnesty.

4. Finally, respondents were asked for their reaction to the provision of certain tax-funded services to illegal immigrants, with the following results:

Hispanics broadly support the idea of having the government provide free public education to the children of illegal immigrants (71 percent favor, 25 percent oppose); blacks are also favorable to this idea, but by a somewhat smaller margin (55 percent favor, 40 percent oppose).

Majorities of both Hispanics (57 percent oppose, 36 percent favor) and blacks (60 percent oppose, 36 percent favor) reject the idea of allowing illegal immigrants to receive welfare such as AFDC and Food Stamps. Among Hispanic citizens, 63 percent oppose permitting illegal immigrants to participate in these welfare programs, including 53 percent who are in strong opposition.

With regard to Medicaid, Hispanics favor allowing illegal immigrants to receive benefits by a margin of 52 percent to 41 percent, while opinions among blacks are slightly more divided (50 percent favor, 44 percent oppose).

Mr. HUDDLESTON. Mr. President, I yield to the majority leader.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF CERTAIN SENATORS ON TOMORROW

Mr. BAKER. Mr. President, I ask unanimous consent that on tomorrow, after the recognition of the two leaders under the standing order, two Senators be recognized on special orders for not to exceed 15 minutes each. That is to say, Senators RUDMAN and DIXON, in that order.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER TO RESUME CONSIDERATION OF H.R. 3363 ON TOMORROW

Mr. BAKER. Mr. President, after the execution of the special orders, it is anticipated that time may be provided for the transaction of routine morning business. After that, if it is so provided, the Senate will return to the consideration of the Interior appropriations bill.

In addition to the Interior appropriations bill, Mr. President, it is hoped that on tomorrow we can pick up the Department of Transportation appropriations conference report. On last inquiry, the House had not yet finished action on that measure, but they expect to do so today. We should have that matter available in the Senate tomorrow. It is privileged, of course, and at some point I will ask the Senate to turn to the consideration of that conference report.

RECESS UNTIL TOMORROW AT 9:30 A.M.

Mr. BAKER. Mr. President, I know of no other Senator seeking recognition. I find no dispute on that issue from the minority leader, who is a short distance from me on the other side of the aisle. Given those circumstances, I ask unanimous consent that the Senate stand in recess until the hour of 9:30 a.m. tomorrow morning, in accordance with the previous order.

There being no objection, the Senate recessed at 4:19 p.m. until tomorrow, Wednesday, August 3, 1983, at 9:30 a.m.

HOUSE OF REPRESENTATIVES—*Tuesday, August 2, 1983*

The House met at 12 o'clock noon.

The Rev. Dr. Duke Kimbrough McCall, president of the Baptist World Alliance, Louisville, Ky., offered the following prayer:

Our Father who art in heaven, we open our hearts and our hands to receive Thy good gifts this day. Give us a job worth doing and wisdom to do it well, for our own sake and the sake of all mankind.

We have worried and argued on the assumption that we are worth preserving from nuclear holocaust or just plain hunger. Alas, there is little supportive evidence of our importance outside our pride and our instinct for self-preservation.

Our best hope is that You, O God, thought we were worth saving because You loved us all. So be pleased to hear our prayer, in the name of Jesus Christ, our Saviour and Lord. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

MESSAGE FROM THE PRESIDENT

A message in writing from the President of the United States was communicated to the House by Mr. Saunders, one of his secretaries.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Sparrow, one of its clerks, announced that the Senate had passed without amendment a joint resolution of the House of the following title:

H.J. Res. 338. Joint resolution to correct Public Law 98-63 due to an error in the enrollment of H.R. 3069.

PRIVATE CALENDAR

The SPEAKER. This is the day for the call of the Private Calendar. The Clerk will call the bill on the Private Calendar.

CONVEYANCE OF THE LIBERTY SHIP "JOHN W. BROWN"

The Clerk called the bill (H.R. 1556) to authorize the conveyance of the Liberty ship *John W. Brown* to the John W. Brown preservation project.

There being no objection, the Clerk read the bill, as follows:

H.R. 1556

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding any other provision of law, the Secretary of Transportation (hereinafter in this Act referred to as the "Secretary") may convey, without reimbursement but subject to the conditions set forth in section 2, the right, title, and interest of the United States in the vessel John W. Brown to the John W. Brown Preservation Project (hereinafter in this Act referred to as the "Project"), a nonprofit corporation organized under the laws of the State of New York. If such a conveyance is made, the Secretary shall deliver the vessel to the Project at the place where the vessel is located on the date of the enactment of this Act, in its present condition, without cost to the United States.

SEC. 2. The conveyance of the vessel John W. Brown under the first section of this Act shall be subject to the following conditions:

(1) The Project shall use the vessel as a nonprofit merchant marine memorial museum and may not use it for commercial transportation purposes.

(2) If the United States has need for the vessel at a later date, the Project, at the request of the Secretary, shall make the vessel available to the United States without cost to the United States.

(3) In the event the Project no longer requires the vessel for use as a merchant marine memorial museum, the Project shall at the discretion of the Secretary reconvey the vessel to the United States in as good a condition as when it was received from the United States, except for ordinary wear and tear, and shall deliver it to the United States, without cost to the United States, at the place where the vessel was delivered to the Project.

With the following committee amendment:

Strike all after the enacting clause and insert in lieu thereof:

That, notwithstanding any other provision of law, the Secretary of Transportation (hereinafter in this Act referred to as the "Secretary") may convey, subject to such conditions he deems appropriate and subject to the conditions set forth in section 2, the right, title, and interest of the United States in the vessel John W. Brown to a nonprofit corporation (hereinafter in this Act referred to as the "recipient") for use as a merchant marine memorial. If such a conveyance is made, the Secretary shall deliver the vessel to the recipient at the place where the vessel is located on the date of the enactment of this Act, in its present condition, without cost to the United States.

SEC. 2. The conveyance of the vessel John W. Brown under the first section of this Act shall be subject to the following conditions:

(1) The recipient shall use the vessel as a non-profit merchant marine memorial museum and may not use it for commercial transportation purposes.

(2) If the United States has need for the vessel at a later date, the recipient, at the request of the Secretary, shall make the vessel available to the United States without cost to the United States.

(3) In the event the recipient no longer requires the vessel for use as a merchant marine memorial museum, the recipient shall, at the discretion of the Secretary, reconvey the vessel to the United States in as good a condition as when it was received from the United States, except for ordinary wear and tear, and shall deliver it to the United States at the place where the vessel was delivered to the recipient.

SEC. 3. Nothing in this Act shall require the Secretary to retain this vessel in the Reserve Fleet for a period longer than two years from the date of enactment.

Mr. SENSENBRENNER (during the reading). Mr. Speaker, I ask unanimous consent that the committee amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

The committee amendment was agreed to.

● Mr. BIAGGI. Mr. Speaker, I rise in support of H.R. 1556—legislation to preserve one of the last Liberty ships—the *John W. Brown.* This bill authorizes the Maritime Administration to transfer the *John W. Brown* to an appropriate nonprofit organization, which would then establish a memorial honoring the men and women who built and crewed the merchant fleet that helped win World War II.

This museum will also serve as a vivid reminder of the need to maintain a fleet capable of transporting arms, supplies, and troops in the event of a national emergency. It is indeed unfortunate that many of our citizens are unaware of the crucial role played by our merchant marine during times of national crisis.

The risk undertaken by our merchant seamen is demonstrated by one grim statistic: During World War II, merchant seamen suffered a greater percentage of fatalities than any branch of the armed services, except for the Marines.

The role of the merchant fleet was so significant that General Eisenhower characterized the merchant marine as our fourth arm of defense.

H.R. 1556 will save the *John W. Brown,* which was one of 2,770 Liberty ships built in series construction. She was constructed in 41 days at the Bethlehem-Fairfield shipyard in Baltimore. She saw service in the Mediterranean as a troop transport, ferrying troops to the Anzio beachhead and transporting German POW's to North Africa.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

After the war, Liberty ships served various functions: Some became naval auxiliary vessels; many were utilized as break-bulk transports by U.S. and foreign shipping lines; and a number were ultimately used in artificial reef projects.

In 1945, the *John W. Brown* became the Nation's first and—to my knowledge—only maritime high school. From then until last year she was used by the New York City Board of Education to teach young people the necessary skills to prepare for service at sea.

H.R. 1556 will facilitate the creation of a permanent living memorial to those valiant seamen who gave their lives so that others might live in freedom.

The establishment of this museum will also be a tribute to the workers who constructed the merchant fleet that helped us win the war. These workers—though they did not serve on the battlefield—worked long and hard to build the fleet.

Our merchant mariners and shipyard workers have long been neglected and ignored; this legislation, however, will create a suitable memorial to the valiant men and women who served with distinction, and I ask my colleagues to join me in supporting it.●

The bill was ordered to be engrossed and read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to authorize the conveyance of the Liberty ship *John W. Brown.*"

A motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Private Calendar.

REV. DR. DUKE KIMBROUGH McCALL

(Mr. HUBBARD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. HUBBARD. Mr. Speaker, it is a pleasure and an honor to have Dr. Duke Kimbrough McCall, president of the Baptist World Alliance, to give our opening prayer and serve as our guest chaplain today.

Dr. McCall, now chancellor of the Southern Baptist Theological Seminary in Louisville, Ky., retired February 2, 1982, as president of the Southern Baptist Theological Seminary after three decades of leadership there. I am privileged to say that Dr. McCall and my late father, Dr. Carroll Hubbard, Sr., for 52 years a Baptist minister, were friends and closely associated with each other through the years.

It can be said that as president of the Baptist World Alliance that Dr. McCall is to Baptists internationally what Pope John Paul II is to Catholics around the world.

Ordained a Baptist minister in 1937, Dr. McCall was pastor of Broadway Baptist Church in Louisville for 3 years and president of New Orleans Baptist Theological Seminary from 1943 to 1946. Further, Duke McCall has held several national denominational posts over the years, including executive secretary-treasurer of the Southern Baptist Convention's Executive Committee.

He and his lovely, talented wife Marguerite, who died April 3 this year, raised four sons: twins Duke Kimbrough McCall, Jr., and Douglas Henry McCall, John Richard McCall, and Michael William McCall.

Dr. Duke McCall is admired by those who know him, including his colleagues in the Lord's work—Jewish rabbis, Catholic priests, and Protestant ministers.

I am pleased to have as my guests today Dr. Duke McCall and his grandson, Douglas McCall.

TELEPHONE RATE INCREASES

(Mr. WRIGHT asked and was given permission to address the House for 1 minute.)

Mr. WRIGHT. Mr. Speaker, the Federal Communications Commission recently has promulgated a ruling which threatens to reach out and touch every American right in the pocketbook.

That ruling in effect will reduce long distance charges and greatly increase the charges for local telephone service.

Bell operating companies throughout the country have announced their request for unprecedented telephone rate increases in the wake of that ruling. We are seeing requests that could double or triple the average consumer's basic telephone bill.

But Judge Harold Greene, who decided the AT&T case on which the Federal Communications ruling was based, says that the access charge decision runs directly counter to the purpose of the court.

So I commend to my colleagues serious consideration of a bill which has been introduced in the Commerce Committee which would repeal the Federal Communications access charge decision and require the FCC to establish a formula under which local telephone service will remain affordable throughout the country.

DR. MARTIN LUTHER KING, JR.

(Mr. ANDREWS of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANDREWS of Texas. Mr. Speaker, today the House will vote on making the birthday of Dr. Martin Luther King, Jr., a national holiday. Martin Luther King, Jr., was a man of vision. He had a vision of America which we must continue to strive to reach. He was a man who asked that the person who delivered his eulogy not say that he had won a Nobel Peace Prize or that he had received 400 or 500 other awards. All he wanted said was that Martin Luther King, Jr., tried to love and care for others.

Those tangible awards had little meaning. He wanted us to remember him as a drum major; a drum major for justice, a drum major for peace, and a drum major for righteousness. That is what this bill and this debate are all about. Martin Luther King, Jr., was a man who, during a speech in Detroit, Mich., not long before he died, said that "Every man, from a bass black to a treble white, is significant on God's keyboard."

Reverend King was a leader in the tradition of the Apostle Paul and Mahatma Gandhi. He understood that passive resistance can be mightier than force. He once said that "It is a strong man who can stand up to violence without resorting to violence." He was a man who believed in America; his determination was fired by the ideals for which this country was founded. He was a man who believed that "Injustice anywhere is a threat to justice everywhere."

Let us unite here to right an injustice which we in Congress have allowed to be perpetuated by our inaction. This recognition of Dr. King's birthday is not just a celebration of one man's life; it is a celebration of every American's inalienable rights. It is a celebration of justice, a celebration of progress, a celebration of hope. Martin Luther King, Jr., had a dream. Let us help America realize that dream. Now is the time to make real the promise of democracy. I urge my colleagues to support this important and timely legislation.

A CALL FOR TEXTILE FAIR TRADE LEGISLATION

(Mr. DERRICK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DERRICK. Mr. Speaker, I rise on behalf of the 117,000 South Carolinians still employed in textiles and in behalf of those, who until 1982, had jobs in the 27 South Carolina mills that have been shut down. I ask the House Subcommittee on Trade to immediately develop legislation to combat foreign unfair trade practices.

Yes, the textile industry has had to update its equipment and refine its lines; it has done that and continues to do so, but the finest equipment in the world cannot compete against foreign governments subsidizing their textile companies in an all-out effort to

obtain a larger share of the U.S. market.

I am greatly disappointed with this weekend's trade agreement with China which strikes another blow to the U.S. textile industry. The President has promised repeatedly to limit textile imports to domestic market growth, but he has sold us out.

I do not ask for protectionism; I ask for fair trade.

Since the Reagan administration is not doing the job, I am asking the Congressman SAM GIBBONS' Subcommittee on Trade to bring about fair trade. The administration has talked it to death; I want to see the Congress give new life to textiles crafted in the United States

Prior to his election, President Reagan promised he would make sure that textile jobs remain in this country. He said that fibers, textiles, and apparel provide 2.3 million jobs, a high percentage of which are held by minorities. Under Mr. Reagan, the number of jobs has dropped by 200,000.

Certainly the recession has played a role, but a big part of the problem has been our trade practices. From January through May of this year textile imports are up 21 percent over the same period last year. During the same 5 months our textile trade deficit is up 34 percent. Korea has increased its manmade fiber dress imports to the United States by 164 percent over 1982; Hong Kong's increase is 113 percent. As an indication of how severe our trade practice problems are, there has been a significant increase in the number of cases of foreign unfair trade filed with the International Trade Commission. There have been five cases, such as the dumping of polyester cloth from Japan and China, filed already in 1983.

We cannot waste any more time. There are more than 2 million Americans looking to Congress to provide help they cannot find anywhere else. It is time for unfair trade to cease.

A POLICY OF DOUBLE STANDARDS AND SPECIAL PRIVILEGES IN TAXATION

(Mr. ALEXANDER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ALEXANDER. Mr. Speaker, we have heard much lately about debategate or brief-gate and about spies and moles around the Presidency. In all fairness, Mr. Speaker, it is my duty this morning to submit convincing evidence that there is right now, at this moment, a Democratic mole in Ronald Reagan's White House.

Mr. Reagan, in his address to the American Bar Association yesterday, said:

> The explicit promise in the Declaration of Independence that we are endowed by our Creator with certain inalienable rights was meant for all of us. It was not meant to be limited or perverted by special privilege, or by double standards that favor one group over another.

Mr. Speaker, every Member of Congress knows that this was the work of a speech writer. And this speech writer is attempting to undercut and to subvert the President's policy of double standards and special privileges in taxation.

The effect of President Reagan's Tax Act of 1981 was to increase the burden of taxes for middle America and for lower-income Americans by about 10 percent and to decrease taxes for upper-income Americans by the same 10 percent. So disguised as a tax cut, it was the largest tax shift in American history.

It reminds me of the old country lawyer's adage: "The large print giveth, and the small print taketh away."

CIVIL RIGHTS

(Mr. KILDEE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KILDEE. Mr. Speaker, the press has been full of reports lately of the administration's apparently new-found commitment to the cause of civil rights. Indeed, there has been a much publicized increase in the administration's civil rights posture during these last several weeks.

But it is by their deeds—not their words—that the Nation shall judge the Reagan administration's commitment to civil rights. And by every measure, this President's commitment has been found lacking.

From the shame of attempting to grant tax exempt status to schools which discriminate on the basis of race to the travesty of trickle-down economics, the Reagan administration has steadfastly impeded progress on civil rights issue. But more disturbing than the administration's drive to prevent the success of the civil rights movement, is their attempt to roll back many of the movement's past gains. There is no greater example of this retreat than the President's attempts to pack the U.S. Commission on Civil Rights.

The President has taken the unprecedented step of firing five of the six Commission members during his term. These firings are irresponsible and a clear effort to stack the Commission with members who will make the Commission ineffective as a civil rights monitoring organization.

The Civil Rights Commission was established as the conscience of our National Government. President Reagan is trying to remake the Commission into a mouthpiece for his administration and to stifle criticism of those administration policies which are unfair to many in our Nation. I urge the Senate to reject the President's nominations for replacements and I hope the courts will overturn the firings. It is essential for the Civil Rights Commission to be independent of the administration whose policies it is examining.

□ 1215

NEW YORK IS THE APPLE OF U.S. NAVY'S EYE

(Mr. BIAGGI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BIAGGI. Mr. Speaker, Diana Ross and the U.S. Navy have something in common—they both love New York. They each displayed their affection for the greatest city in the world last week. Diana Ross gave a free concert viewed by almost half a million people in Central Park—and did it as her way of thanking New York City for all it had done for her career.

Last Friday, the U.S. Navy and their distinguished Secretary John F. Lehman, Jr., announced that the city of New York had been awarded the battleship *Iowa* and six other support ships all of which would be stationed in the Port of New York. Estimates show that this project will produce as many as 9,000 new jobs and over $500 million a year to New York City's economy. It is said that nothing happens by itself. The *Iowa* contract came as the result of hard work and a special brand of bipartisan cooperation within our congressional delegation. Our colleague JOE ADDABBO and Senator AL D'AMATO were the guiding lights which helped steer the *Iowa* into New York City.

As a lifelong resident of New York City, I take special pride in her special week last week. The people of New York City do not always receive their fair share of the Federal pie—but at least in this one instance—New York City proved to be the apple of the U.S. Navy's eye.

THE TELEPHONE CRISIS

(Mr. BATES asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BATES. Mr. Speaker, the House Committee on Energy and Commerce and the Senate Committee on Commerce, Science, and Transportation held a rare, joint hearing on telephone legislation pending before this Congress.

There are now 12 bills before both Houses that attempt to reduce for the American consumer the great impact of the AT&T divestiture decisions. As

the author of three of those bills, I would like to call your attention to what must be addressed to avert a crisis in our telephone system.

First, we must insure that future service not fall below the current level of service to telephone customers.

Second, States must retain the authority to regulate service to insure that all areas and customers are covered, even if not profitable. Their role in depreciation decisions should be preserved.

Third, access charges derived from the availability of the telephone system reflect the benefits from the system.

Fourth, a universal fund be established which does not exclude any State with overall cost-efficient service if there are areas within the State where service costs are more than the national average.

These issues must be addressed if this Nation is to continue to retain its complex web of telecommunications and to preserve effective competition in the industry.

THE TEFLON PRESIDENCY

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, after carefully watching Ronald Reagan he is attempting a great breakthrough in political technology—he has been perfecting the Teflon coated Presidency.

He sees to it that nothing sticks to him. He is responsible for nothing—civil rights, Central America, the Middle East, the economy, the environment—he is just the master of ceremonies at someone else's dinner.

"Oh, that naval exercise." "Oh, that Interior Secretary." "Oh, that Middle East." "Oh, that acid rain." "Oh, that unemployment."

Harry Truman had a sign on his desk emblazoned with his motto: "The buck stops here." It has obviously been removed and Reagan's desk has been Teflon coated, also I could be wrong. Maybe Reagan does know what he is doing. The Rocky Mountain News on July 29 carried a cartoonist's version of the last Presidential press conference. Reported: "Mr. President, isn't your claim that your administration has done more for women just another fabrication?" Reagan: "I'm glad you asked. I'm willing to put my record against anyone else's! Check it out. You'll see we've had more fabrications than any previous administration!"

UNSAFE AND INEFFECTIVE DIET PILLS

(Ms. OAKAR asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Ms. OAKAR. Mr. Speaker, I noted last week that the FDA chief, Dr. Arthur Hull Hayes, resigned rather unexpectedly. Of course, we all know he was under internal investigation by his department, the Department of Health and Human Services.

Mr. Speaker, I think he mirrored the laxity of FDA. As we all know, more than 69 percent of the over-the-counter drugs that FDA has tested—and they have not gotten to most of them—are unsafe and ineffective. Our Aging Health Subcommittee had a hearing last week at which we went in depth into the ineffective and unsafe diet pills that are being popularized by a super-duper campaign in advertising, and we saw examples of people who have suffered strokes and hypertension and hypnotic reactions, and so forth.

In fact, the majority of people who take those awful pills are very susceptible to those kinds of occurrences. The tragedy is that FDA is not using its discretionary power to enforce the law. They are not protecting the American consumer. Therefore, I have introduced a bill which deals with FDA. If they are not going to protect the consumer, we must make them.

PARLIAMENTARY INQUIRY

Mr. SOLOMON. Mr. Speaker, I have a parliamentary inquiry on the discretionary powers of the Speaker.

The SPEAKER pro tempore (Mr. KILDEE). The gentleman will state it.

Mr. SOLOMON. Mr. Speaker, is it not the fair policy of the Speaker, when we are in the 1-minute speech period, that he first recognize the Democrats who were on the floor in the order that they arrived, and then the Republicans who have been sitting here for 45 minutes in the order in which they arrived, and then go back to those latecomers? Is that not the fair policy of the Speaker of this House?

The SPEAKER pro tempore. It is at the discretion of the Chair, and the Chair tries to be fair. The Chair is aware of no unfairness yet. The Chair now recognizes the gentleman from Arkansas.

Mr. SOLOMON. I thank the Speaker for being so fair.

NERVE GAS WEAPONS BACK IN THE NEWS AGAIN

(Mr. BETHUNE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BETHUNE. Mr. Speaker, the morning papers are full of the news that the armed services conference has caved in to the request of the moribund Chemical Corps to include the production of nerve gas weapons in the conference report.

Of course, that is no surprise, because the armed services conferences members ooze prejudice for this faulty system. This House has found 2 years in a row that those weapons are not needed, and that is no surprise. The Department of Defense itself has admitted that the artillery shells we have are perfectly good until the year 1990.

This House has found that the Big Eye Bomb is a mechanical nightmare. It blows up on us, not the enemy. That is why this House has, for 2 years in a row, rejected this idiotic weapons system. Not only have we saved $6 billion for the American taxpayer, but we have preserved a moratorium that has been in effect since 1969 which serves us well because we hold the high ground on this issue in the world when it comes to deciding who people can trust on the issue of arms control.

So I urge my colleagues to reject the conference report when it comes back if it includes this very ill-conceived weapons system.

A BANKER'S AND A CONGRESSMAN'S PERSPECTIVE ON IMF QUOTA INCREASE

(Mr. MACK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MACK. Mr. Speaker, in a few days, we will again discuss the IMF and its quota increase of $8.4 billion. It was said here that bankers are not Congressmen and Congressmen are not bankers. While that may be true, let me share a few thoughts after 16 years in the banking business.

First, you do not solve the problem of international finance by piling debt on top of debt.

Second, you do not solve the problem by committing to additional lending without knowing how much more money in future years will be needed.

Third, you do not solve the problem by working out a plan which does not have as its basis a full understanding of the specific losses that cold occur over a certain period with a specific financial impact.

The conclusion, to which I have come, places the responsibility directly on our international lenders. They should develop the plan; they should forge the agreements, they should restructure the debt but without taxpayer dollars.

That is a banker's and a Congressman's perspective.

COMMUNIST HUMAN RIGHTS VIOLATIONS IN EL SALVADOR

(Mr. SOLOMON asked and was given permission to address the House for 1 minute.)

Mr. SOLOMON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and I do not wish to revise and extend my remarks.

At 2 p.m. tomorrow, before the House Committee on Foreign Affairs Subcommittee on Human Rights, I will present, on behalf of the Central American Freedom Alliance and the Council for International American Security, a diary of public statements about specific incidents between October 1979 and June 1983 that documents for the first time the daily reality of terrorism used by Communist guerrillas in El Salvador.

Mr. Speaker, this is a compilation of broadcast, wire and press reports culled by the Foreign Broadcast Information Service of the Department of Commerce. More often than not, it shows what the guerrillas themselves report about their own terrorist activities through Radio Havana and their own propaganda organs. Based on this evidence, we can point to over 20,000 human rights violations, killings, maimings, kidnappings, hostage-taking, and terrorist assaults in public places by Communist insurgents in El Salvador.

This evidence is a matter of public record, and I invite the media to examine it closely.

REFORM OF EXPORT CONTROL LAWS ESSENTIAL—NOW!

(Mr. BEREUTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BEREUTER. Mr. Speaker, if anyone doubts the need for the export control law reforms proposed in H.R. 3231, they only need to speak with their constituents.

Yesterday, for example, I received a letter from a small business in my district which demonstrated in graphic terms the appalling state of affairs regarding our export control program. On February 22 of this year, my constituent company filed with the Department of Commerce an export license application for a microprocessor controlled fraction collector, a device used in chemical and biochemical applications which collects liquids which are subsequently deposited into test tubes. The company sought export approval for this product in order that it might be exhibited in the Soviet Union. According to company officials, several telephone calls to the Department failed to obtain any expediting of this application.

The export license was finally granted, more than 5 months later, on July 26. The exhibition for which the product was destined had been held May 25 through June 8, 7 weeks ago.

Company officials explain that their only competition internationally comes from a Swedish firm which can export its product free of licensing requirements.

Sadly, I must report that this excessive delay is not an unusual occurrence. No wonder, therefore, that U.S. exporters are losing ground daily in their battle to remain competitive internationally. Unless we act now to reform control laws which contribute nothing to our national security but which contribute to the economic well-being of our foreign competitors, our Nation's status as an economic superpower will be lost forever. That will be a truly fatal blow to our overall national security.

I urge my colleagues to join with me in giving overwhelming approval to H.R. 3231 when it reaches the House floor.

□ 1230

PROMOTE GRACE HOPPER TO COMMODORE

(Mr. PHILIP M. CRANE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PHILIP M. CRANE. Mr. Speaker, I would like to call to your attention the work and contributions of a very special woman, Capt. Grace M. Hopper, U.S. Navy, who is currently serving on active duty with the Naval Data Automation Command in Washington, D.C.

During her 40-year association with the Navy, "the grand old lady of software" has made numerous contributions through her expertise in the computer field. Captain Hopper worked with the first large-scale computer, Mark I. She pioneered much of today's most widely accepted computer programing language, COBOL, and she invented the first practical compiler to translate English into machine language. She has been honored with more than 30 awards and recognitions for her outstanding advances in the computer field. She retired from the Navy at the age of 60. However, the Navy was compelled to recall her to active duty just 8 months later when the Pentagon discovered it was in need of her expertise in the computer field.

At 76, Captain Hopper is currently the oldest naval officer on active duty. In a May 1983 interview with Newsweek, she was quoted as saying, "I've received the highest award anybody can give me, and that is the privilege and the honor of serving proudly in the U.S. Navy." It is time the Navy recognized the outstanding contributions made by this officer recalled from retirement over a decade and a half ago, and promote her to the rank of commodore.

I am today introducing legislation that authorizes and requests the President to promote Capt. Grace M. Hopper to commodore. I ask that you, too, show Captain Hopper that she is a valuable part of our Navy, that she has contributed "above and beyond the call of duty" and that she is entitled to flag rank.

TOBACCO SUBSIDY PROGRAM FOUND WANTING

(Mr. PETRI asked and was given permission to address the House for 1 minute.)

Mr. PETRI. Mr. Speaker, the tobacco lobby has asked us to support a procession of cure-alls under the guise of getting the tobacco subsidy program working. However, reality has voted to reject these so-called cures.

When the tobacco markets opened in Georgia and Florida last week, tobacco sold for an average of 12 cents a pound less than last year. The result was additional hardship on the tobacco farmers along with tremendous surpluses.

Last year, 14 percent of the tobacco sold during the first week of sale went into surplus. This year, the surplus for the first week was over 37 percent.

The tobacco lobby has held off major change by asking for studies in 1981, an assessment in 1982, and a price freeze in 1983. How long are we going to be fooled by these quack cures which only help absentee allotment holders and big corporations? Let us put the tobacco subsidy program out of its misery, now.

OPPOSITION TO CHEMICAL WEAPONS

(Mrs. ROUKEMA asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. ROUKEMA. Mr. Speaker, I was most distressed yesterday to learn that the conferees to H.R. 2969, the Defense Department authorization bill, have decided to end the moratorium we have had since 1969 on the production of chemical weapons. This is a terrifying decision which must be reversed. History will not forgive us if we agree to produce these lethal binary chemical munitions.

The case has not been made for production of these weapons. The proponents have not answered the questions of deterrence or adequately addressed the foreign policy implications, specifically with respect to our NATO allies. A new weapons program will be established with little understanding of the impact upon foreign policy, military security, or comprehensive arms control.

Very recently, this House voted decisively 256 to 161 against chemical

weapons production. Subsequently, the other body approved production, but only after the Vice President was called in to cast an extraordinary tie-breaking vote. This can hardly be construed by the conferees as a mandate for production.

I urge the conferees to reverse this decision or be prepared for a challenge to the conference report when it is brought to the House floor.

WITHDRAWAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 1797

Mr. WHITEHURST. Mr. Speaker, I ask unanimous consent that my name be withdrawn as a cosponsor of H.R. 1797.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Virginia?

There was no objection.

INTRODUCTION OF BILL TO AFFORD RELIEF TO SMALL HEALTH CLINICS

(Mr. RICHARDSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RICHARDSON. Mr. Speaker, recently the National Health Service Corps issued some guidelines on July 31, 1983, that would alter the payback system for rural health clinics all around this country. This has grave implications for many health clinics that are small and serve the poor and the elderly with adequate health care. Because of these new guidelines, these clinics will be placed in jeopardy. These new payback schemes are going to strangle them. Mr. Speaker, I say that a person's health should not be related to a person's wealth. Health care should be a basic human right for every American.

I have introduced a bill, H.R. 3649, which establishes new guidelines for payback schemes so that these rural health clinics, whether they are on an Indian reservation, in a Hispanic rural area, or in an inner city ghetto can survive.

I say, Mr. Speaker, that we cannot carry out these budget cuts to the point where those who can least afford to sustain them bear the brunt of this administration's excessive misguided priorities which produces inhumane regulations, which my bill will hopefully eliminate.

IN SUPPORT OF BILL MAKING A HOLIDAY OF MARTIN LUTHER KING, JR.'S BIRTHDAY

(Mr. ROEMER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ROEMER. Mr. Speaker, this Nation is built on a single, revolutionary principle that all men are created equal. No classes, no racial barriers, no regional divisions.

Dr. Martin Luther King, Jr., made that deeply American principle come alive for millions of our citizens. He reaffirmed the American dream, planted its deeds in ghetto deserts and reminded a Nation to honor and respect its most precious resource; its people, all of them.

Three historic events establish America as unique among all nations: Our Revolution to create equality of opportunity, our Civil War to preserve national unity and our civil rights struggle to confirm human dignity and rights. Dr. King was the founding father of the civil rights movement in this country. In that sense, not in the sense that he was perfect for he was very human, Dr. King is owed a debt of gratitude by every American, regardless of race, color, or creed.

For this reason, I cast my vote for the establishment of a national holiday in his name. This holiday will honor Martin Luther King. It also ought to be a day of reflection on why we, as a Nation, are different: Our freedom. And on why we, as a Nation are great: Our resolve to make that freedom real for us all.

ACTION ON RECONCILIATION BILL URGED

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, as the Members of the House know, we face from the budget resolution reconciliation instructions to cut down on spending by a given number of billions of dollars and to have a modest increase in revenue. The reporting date of that reconciliation bill is supposed to be near the end of September. I hope very much that the House will meet that deadline.

The National Governors Association met over the weekend. Gov. Scott Matheson, the association chairman, warned that without responsible budget actions to reduce Federal deficits, we will have a recovery that is just "a blip on the horizon." He said in particular, that if we are not willing to face up to more taxes and make the decisions soon, we can kiss the recovery goodbye.

Mr. Speaker, none of us wants to have this recovery die in its tracks. I hope very much that the House will act on the reconciliation bill by the end of September.

WHAT TO DO WITH PROCEEDS FROM THE CHRYSLER WARRANTS

(Mr. SCHUMER asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. SCHUMER. Mr. Speaker, the success of Chrysler and the Federal loan guarantee program has the Government in the anomalous position of holding 14.4 million very valuable Chrysler warrants. Two questions present themselves: How to dispose of the warrants and what to do with the revenues they bring.

The first question has been answered by the administration. Commendably, it plans to sell the warrants at fair market value, bringing in over $300 million to the Federal Government. To suggest that the Government should surrender the warrants or sell them at less than full market value, as Chrysler had, is like a patient cured of a fatal illness who later belittles the severity of his sickness in order to avoid paying the doctor.

The second question is what to do with these dollars. Today I will be circulating a letter among my colleagues urging the administration to use the profits of these proceeds to retrain unemployed workers in auto and auto-related industries. It is upon these people that the greatest burden has fallen. It is these people who will give up the most in the smaller and retrenched auto industry.

Mr. Speaker, the least the Government can do is use those profits to help find these unemployed auto workers new skills and new jobs.

OPPOSITION TO CHEMICAL WEAPONS PRODUCTION PROVISION IN DEFENSE AUTHORIZATION LEGISLATION

(Mr. PORTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PORTER. Mr. Speaker and ladies and gentlemen of the House, yesterday conferees on the Defense authorization bill agreed to include a provision in their conference report that would allow the production of chemical weapons. They did this despite the fact that the House voted against including such a provision, and the other body approved it only by a vote of 50 to 49, the 50th vote being that of the Vice President to break a deadlock—a vote of the administration, not a vote of a Member of that legislative body.

In my judgment, this country does not need chemical weapons and should not produce them but that is a question of public policy upon which reasonable minds might differ.

My objection today is that I believe it is an absolute outrage for any conference committee to insert a provision in a conference report that does not have the support of a majority of either House of the Congress. It seems

to me that we ought to change our rules so that conferees do not have authority to include such an unsupported provision.

But, Mr. Speaker, in any case, I, for one, do not intend to support the conference report on the Defense authorization bill if this provision is included.

CONTADORA'S ACHIEVEMENTS

(Mr. RUDD asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RUDD. Mr. Speaker, for the past 8 months the so-called Contadora group, made up of Mexico, Colombia, Panama, and Venezuela, has been running around Central America telling the world how peace can be achieved in that region of our hemisphere.

So far, the only thing that the four countries that make up the Contadora—Colombia, Mexico, Panama, and Venezuela—have been able to achieve is the establishment of a forum for our enemies to take pot shots at our Government.

Pravda, in an article on June 13, 1983, claimed that the United States was "sabotaging" the proposals made by the Contadora by refusing to support direct talks between Nicaragua and Honduras.

The following day, the China Daily wrote that the U.S. Government's refusal to hold dialog with the leftwing forces has met with opposition from the Central American countries.

We do not need this type of comment circulated among our friends throughout the world.

And we do not need the Contadora group and its highly suspicious motives.

If a joint government effort is needed to halt Communist terrorism in Central America and bring peace to that region—and one may very well be needed—then it should come from the already established Organization of American States, whose primary goals are to preserve peace and security and to promote the integral development of the member states.

WASHINGTON PARTY HOSTED TO CALL ATTENTION TO PLIGHT OF THE AFGHAN PEOPLE

(Mr. RITTER asked and was given permission to address the House for 1 minute.)

Mr. RITTER. Mr. Speaker, this House has recently been exposed to some very pointed differences on our policy in Central America. I would like to call attention to an area of the world where those differences do not exist. That is the country of Afghanistan, suffering since 1979 under the weight of a brutal, Soviet invasion.

Last night in Washington, D.C., the Dawsons, Jane and Sam Dawson, two very gracious Washington hosts, held a gathering in their home to call attention to the plight of the Afghan people. Attending that party were Members from both sides of the aisle, including leadership Members of the House and the Senate. The Dawsons are part of a growing number of Americans who are sympathetic to the cause of the Afghan freedom fighters and who have decided to help.

Mr. Speaker, I think it is instructive to our friends in the Soviet Union who are listening to our debates on the floor of the House to recognize that the subject of Afghanistan is one which unifies both parties in the Congress. Members of this House can look forward to a sense-of-the-Congress resolution which I and others will be introducing shortly in bipartisan fashion to call attention to the plight of the Afghan people at the hands of the U.S.S.R. The resolution will also address the need for an appropriate response on behalf of the American people.

□ 1245

BINARY CHEMICAL WEAPONS

(Mr. ANTHONY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. ANTHONY. Mr. Speaker, several of my colleagues have come before the House today to complain about the fact that the conferees on the defense authorization bill have included the binary project. They have used typically emotional arguments. We cannot win that argument on an emotional basis, but if you will just stop momentarily and listen to the facts. Chemical weapons are abhorrent to everybody. That is a given fact; but we have chemical weapons now. That is not the issue.

The issue is very simply this: Are we going to have the capability as a deterrent effect to be able to safely transport and protect our soldiers in the battlefield? If we do not in this particular area, we are not doing our armed services justice.

I encourage my colleagues to vote on the defense authorization bill on the facts and not on emotion.

BINARY CHEMICAL WEAPONS—A REPLY

(Mr. BONIOR of Michigan asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. BONIOR of Michigan. Mr. Speaker, I would like to address the issue my colleague, the gentleman from Arkansas, has just raised.

I want to rise and express my strong objection to the agreement to end the moratorium on the production of chemical weapons, which was approved yesterday by the conferees on the defense authorization bill.

The language that was accepted by the conferees is no compromise at all. It is merely a new package for an old request, one that was defeated in the House and which passed only by a single vote margin in the Senate.

Binary chemical weapons are morally repugnant. They have not been adequately tested. They will not, I believe, provide the safety that the gentleman previous to me spoke of and they will not contribute to our national security.

To approve funding for them at this time is not only unwise, but runs contrary to the express wishes of a majority of this Congress and to the bipartisan relationship that this issue has gathered in the White House over the past three or four Presidents.

SUPPORT A NATIONAL HOLIDAY FOR MARTIN LUTHER KING

(Mr. LUNGREN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, today I rise to encourage all in this body, but particularly those on the Republican side, to support H.R. 3706, establishing a national holiday commemorating the life of Dr. Martin Luther King, Jr.

I was one of those who voted against this on suspension the last time it was up; but I have looked at it again. I have reviewed my position on it and have had a change of heart and vision as it relates to this bill.

I hope others will similarly take a look at this. It seems to me, reflecting on this issue, that I have to concude that the importance of this occasion, the importance of the memory of Dr. Martin Luther King, Jr., and all he symbolizes with respect to the civil rights movement is such that if it takes a national holiday which happens to fall on a work day that we should go ahead and do that.

There is no doubt that Dr. Martin Luther King stands as a symbol to the black community; but it seems to me that he stands as a symbol to more than the black community, to all of us, black, white, red and brown, to suggest that we have a concensus of conscience in this country dedicated to the securing of civil rights for all. We may disagree from time to time as to how we achieve those goals, but it seems to me we ought to rally around his memory in support of this consensus.

PERMISSION FOR SUBCOMMITTEE ON MERCHANT MARINE OF COMMITTEE ON MERCHANT MARINE AND FISHERIES TO SIT DURING THE 5-MINUTE RULE ON WEDNESDAY, AUGUST 3, 1983

Mr. BIAGGI. Mr. Speaker, I ask unanimous consent that the Subcommittee on Merchant Marine of the Committee on Merchant Marine and Fisheries be permitted to sit at 10 a.m. on Wednesday, August 3, 1983, for the purpose of holding a hearing on H.R. 3156—a bill to amend the Merchant Marine Act of 1936 and for other purposes ("Merchant Marine Act of 1983").

The ranking minority member of the committee, the gentleman from New Jersey (Mr. FORSYTHE) and the ranking minority member of the subcommittee, the gentleman from Kentucky (Mr. SNYDER) have been apprised of the hearing date and time and are in accord with this request.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

EMERGENCY VIETNAM VETERANS' JOBS TRAINING ACT OF 1983

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H.R. 2355) to establish an emergency program of job training assistance for disabled veterans and veterans of the Vietnam era, with Senate amendments thereto, and concur in the Senate amendments with amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments and the House amendments to the Senate amendments, as follows:

Senate amendments: Strike out all after the enacting clause and insert:

That this Act may be cited as the "Veterans' Emergency Job Training Act".

TITLE I—VETERANS' EMERGENCY JOB TRAINING PROGRAM

SEC. 101. (a) Title 38, United States Code, is amended by inserting after chapter 43 the following new chapter:

"CHAPTER 44—VETERANS' EMERGENCY JOB TRAINING PROGRAM

"Sec.
"2101. Purpose.
"2102. Establishment of program; administration.
"2103. Eligibility; application; certification.
"2104. Employer job training programs.
"2105. Approval of programs.
"2106. Training establishments.
"2107. Nonqualifying programs of training.
"2108. Payments to employers.
"2109. Discontinuance of approval of employer programs; overpayments; penalties.
"2110. Coordination; information and outreach.
"2111. Inspection of records; investigations.
"2112. Termination of program.
"2113. Authorization of appropriations.

"§ 2101. Purpose

"The purpose of this chapter is to address the problem of severe and continuing unemployment among veterans by providing incentives to employers, in the form of payments to defray the costs of training or retraining, to hire wartime veterans who have been unemployed for long periods of time or have job skills that have been rendered obsolete by advances in technology or other industrial changes, for employment in stable, permanent positions that involve significant training or retraining.

"§ 2102. Establishment of program; administration

"(a) The Administrator and the Secretary of Labor (hereinafter in this chapter referred to as 'the Secretary') shall jointly carry out a program in accordance with the provisions of this chapter to assist eligible veterans in obtaining employment in stable, permanent positions that involve significant training or retraining. Assistance under the program shall be in the form of payments made to employers to assist them in defraying the costs of training or retraining eligible veterans employed in such positions.

"(b) Not later than sixty days after the date of the enactment of this chapter but in no event later than October 1, 1983, the Administrator and the Secretary shall enter into an agreement specifying their respective responsibilities for the administration of the provisions of this chapter. The agreement shall include specifications that the Administrator shall be responsible for the determination of whether a veteran meets the service requirements under section 2103 of this title and for payments to employers under section 2108 of this title, and that the Secretary shall be responsible for the determination of whether a veteran meets the unemployment requirements under section 2103 of this title and for job development activities under section 2110 of this title. The term 'administering agency' as used hereinafter in this chapter refers to the Veterans' Administration or the Department of Labor or both as specified in such agreement.

"(c) The Secretary shall carry out responsibilities under this chapter through the Assistant Secretary of Labor for Veterans' Employment established under section 2002A of this title.

"§ 2103. Eligibility; application; certification

"(a) For the purposes of this chapter, an eligible veteran is a veteran who—

"(1) acquired entitlement to educational assistance benefits from the Veterans' Administration under a program enacted by the Servicemen's Readjustment Act of 1944, the Veterans' Readjustment Assistance Act of 1952, or the Veterans' Readjustment Benefits Act of 1966 and who served during a period of war; and

"(2)(A) is unemployed and has been unemployed for at least fifteen of the twenty weeks immediately preceding the date of application for participation in a program under this chapter; or

"(B)(i) is unemployed and has been terminated or laid off from employment and is eligible for or has exhausted entitlement to unemployment compensation, and (ii) has no realistic opportunity to return to employment in the same or a similar occupation in the geographical area where the veteran previously held employment.

For the purposes of clause (2) of this subsection, a veteran shall be considered unemployed when the veteran is without a job and wants and is available for work.

"(b) A veteran who desires to undertake a program of job training under this chapter shall submit to the administering agency an application which shall specify the training objective to be pursued and shall be in such form and contain such information as the administering agency shall prescribe. The administering agency shall approve such application unless the administering agency finds that the veteran is (1) not eligible to participate in a program under this chapter, or (2) already qualified for the specified training objective.

"(c) A veteran who has been determined to be eligible under this section shall be certified as such by the administering agency, and the administering agency shall furnish such veteran with a copy of a certification of eligibility for presentation to an employer offering a program of job training under this chapter.

"§ 2104. Employer job training programs

"(a)(1) Except as provided in paragraph (2) of this subsection, in order to qualify as a program of job training under this chapter, a program of job training of an employer must provide training approved under this chapter for a period of not less than six months in an occupation in a growth industry, an occupation requiring the use of new technological skills, or an occupation for which demand exceeds supply.

"(2) A period of training of between three and six months may be approved where the administering agency determines, in accordance with standards which the administering agency shall prescribe, that the purpose of this chapter would be met.

"(b) The maximum period of training for which assistance may be paid on behalf of an eligible veteran under this chapter is twelve months, except that such period may be extended by the administering agency for a period of up to six additional months in the case of a veteran with a service-connected disability rated at (1) 30 percent or more, or (2) 10 or 20 percent if such veteran has been determined under section 1506 of this title to have a serious employment handicap.

"(c) Subject to the provisions of this chapter, an eligible veteran approved for participation in a program under this chapter may accept an approved program of job training offered to the veteran by any employer.

"§ 2105. Approval of programs

"(a) An employer may be paid assistance under section 2106 of this title on behalf of an eligible veteran employed by such employer and participating in a program of job training offered by such employer only if such program is approved in accordance with such procedures as the administering agency may by regulation prescribe and if the program meets the other requirements established under this chapter.

"(b) An employer offering a program of job training that the employer desires to have approved for the purposes of this chapter shall submit a written application for such approval. Such application shall be in such form and contain such information as the administering agency shall prescribe and shall contain a certification by the employer—

"(1) that the employer has planned for the employment of the eligible veteran in a position for which such veteran is to be trained and that the employer has no reason to expect that such position will not be available on a stable, permanent basis to such veteran at the end of the training period;

"(2) that the wages and benefits to be paid to an eligible veteran participating in the employer's program of job training will be not less than the wages and benefits normally paid to other employees participating in a comparable program of job training;

"(3) indicating the total number of hours of training to be offered for each eligible veteran, and describing the training content of the program and the objective of the training;

"(4) that the employment of an eligible veteran under this chapter—

"(A) will not result in the displacement of currently employed workers (including partial displacement such as a reduction in the hours of nonovertime work, wages, or employment benefits); and

"(B) will not be in a job (i) while any other individual is on layoff from the same or any substantially equivalent job, or (ii) the opening for which was created as a result of the employer having terminated the employment of any regular employee or otherwise having reduced its work force with the intention of hiring a veteran in such job under this chapter;

"(5) that the training content of the program is adequate, in light of the nature of the occupation for which training is to be provided and comparable training opportunities in such occupation, to accomplish the training objective certified under clause (3) of this subsection;

"(6) that the occupation or job for which training is to be provided customarily requires training of not less than an average of thirty hours per week for a period of not less than six months or such other period as may be approved under section 2104(a)(2) of this title;

"(7) that the length of the training period under the proposed program is not longer than the length of programs that employers in the community customarily require new employees to complete in order to become competent in the occupation or job for which training is to be provided;

"(8) that there is in the training establishment or place of employment such space, equipment, instructional material, and instructor personnel as are needed to accomplish the training objective certified under clause (3) of this subsection;

"(9) that the employer will keep records adequate to show the progress made by each veteran participating in the program, and otherwise to demonstrate compliance with the requirements of this chapter; and

"(10) that the program meets such other criteria as may be established by the administering agency.

"(c)(1) Except as provided in paragraph (2) of this subsection, the administering agency shall approve the proposed program of job training unless the administering agency finds that the application does not contain a certification and other information meeting the requirements of subsection (b) of this section.

"(2) The administering agency may withhold approval pending the outcome of an investigation of any matter under section 2111(c) of this title, and, based on such outcome, may disapprove such program, in accordance with regulations which the administering agency shall prescribe.

"(d) For the purposes of this section, approval of a program of apprenticeship or other on-job training for the purposes of section 1787 of this title shall be considered to meet all requirements for approval of a program of job training under this chapter.

"§ 2106. Training establishments

"Any employer may enter into an arrangement or agreement with an educational institution that has been approved for the enrollment of veterans under chapter 34 of this title in order that such institution may provide a program of job training (or a portion thereof) under this chapter. When such an arrangement or agreement has been entered into, the application of the employer shall so state and set forth a description of the training to be so provided.

"§ 2107. Nonqualifying programs of training

"No assistance under this chapter may be paid on behalf of an eligible veteran participating in a program of job training—

"(1) for employment in a seasonal, intermittent, or temporary job;

"(2) for employment under which commissions are the primary source of income;

"(3) for employment which involves political or religious activities;

"(4) for employment with any department, agency, instrumentality or branch of the Federal Government (including the United States Postal Service and Postal Rate Commission); or

"(5) if the training program will not be carried out in the United States.

"§ 2108. Payments to employers

"(a) Except as provided in subsections (b) and (c) of this section, the administering agency shall make quarterly payments to an employer of an eligible veteran participating in an approved program of job training under this chapter. The amount paid to an employer on behalf of an eligible veteran may not exceed the lesser of—

"(1) 50 percent of the wages paid to the veteran by the employer during the period for which payments are made; or

"(2) an amount for such period calculated on the basis of an annual rate of (A) $9,000 in the case of an eligible veteran with a service-connected disability rated at (i) 30 percent or more, or (ii) 10 or 20 percent if such veteran has been determined to have a serious employment handicap under section 1506 of this title, or (B) $6,000 in the case of any other eligible veteran.

"(b) If an employer to whom payments are made under this chapter is a private, for-profit enterprise employing five hundred or fewer employees, the administering agency may make such payments on a monthly basis.

"(c) Payment may not be made to an employer for a period of training under this chapter on behalf of a veteran until the administering agency has received—

"(1) from the veteran, a certification as to the veteran's actual employment and training with the employer during such period; and

"(2) from the employer, a certification—

"(A) that the veteran was employed, and that the veteran's performance and progress were satisfactory during such period; and

"(B) with respect to the first such certification, indicating the date on which the employment of such veteran began.

"(d) No assistance may be paid on behalf of an eligible veteran under this chapter—

"(1) and to such veteran under chapter 31, 34, or 36 of this title for the same period;

"(2) if the employer is receiving any other form of assistance on account of the training or employment of such veteran, including assistance under the Job Training Partnership Act (96 Stat. 1322; 29 U.S.C. 1501 et seq.); or

"(3) if such veteran has completed a program of job training under this chapter.

"§ 2109. Discontinuance of approval of employer programs; overpayments; penalties

"(a) If the administering agency finds at any time that a program of job training previously approved by the administering agency for the purposes of this chapter thereafter fails to meet any of the requirements established under this chapter, the administering agency may immediately disapprove further participation by eligible veterans under that program. The administering agency shall provide to an employer whose program is disapproved under this section, and to each eligible veteran participating in such program, a statement of the reasons for, and an opportunity for a hearing with respect to, such disapproval. Such employer and such veteran shall be notified of such disapproval, such reasons, and such opportunity by a certified or registered letter, and a return receipt shall be secured.

"(b)(1) Whenever the administering agency finds that an overpayment of assistance under this chapter has been made to an employer on behalf of an eligible veteran as a result of a certification or information contained in an application submitted by an employer which was false or clearly unsupportable in any material respect, the amount of such overpayment shall constitute a liability of the employer to the United States.

"(2) Whenever the administering agency finds that an overpayment of assistance under this chapter has been made to an employer on behalf of an eligible veteran as a result of a certification or information contained in an application submitted by a veteran which was false or clearly unsupportable in any material respect, the amount of such overpayment shall constitute a liability of the veteran to the United States.

"(3) Any overpayment referred to in paragraph (1) or (2) of this subsection may be recovered in the same manner as any other debt due the United States.

"(c) Whenever the administering agency finds that an employer, willfully or with reckless disregard of the facts, has made a false certification under section 2105 or 2108(c)(2) of this title, or any regulation issued thereunder, or has caused the administering agency to make a certification or give approval contrary to such sections, or such regulation, such employer shall be subject to a civil penalty, imposed by the administering agency after an adjudication determined on the record after opportunity for a hearing before such agency, of not to exceed $1,000 for each such violation. Such violation shall constitute a separate violation with respect to each individual employed by reason of such wrongful certification or approval. Actions by the administering agency to impose a civil penalty under this subsection shall be reviewable in the district courts of the United States.

"§ 2110. Coordination; information and outreach

"(a) The administering agencies shall provide for an outreach and public information program to inform private industry and business concerns (including small business concerns), educational institutions, trade associations, and labor unions of opportunities under this chapter, and to promote job development by encouraging employers and unions to make training programs available for eligible veterans. The administering agencies shall coordinate such program with those job counseling, placement, job development, and other services provided for under chapters 41 and 42 of this title and

with other similar services offered by other public agencies and organizations.

"(b) The administering agencies shall request and obtain from the Administrator of the Small Business Administration a listing of small business concerns, and, on a regular basis, update such listings. Such listings shall be used to identify and promote possible training and employment opportunities for eligible veterans.

"(c) The administering agencies, in consultation and cooperation with the Secretary of Education, shall take appropriate actions to advise educational institutions of the opportunities made available to veterans under this chapter and the opportunity for such institutions to enter into arrangements or agreements with employers pursuant to section 2106 of this title.

"(d) The administering agencies shall assist veterans and employers desiring to participate under this chapter in making application and completing necessary certifications.

"(e) In carrying out responsibilities under this chapter, the Secretary shall make maximum use of the services of State and Assistant State Directors for Veterans' Employment, disabled veterans' outreach program specialists, and employees of local offices appointed pursuant to sections 2003, 2003A, and 2004 of this title. The Secretary shall also use such resources as are available under title IV-C of the Job Training Partnership Act (96 Stat. 1322; 29 U.S.C. 1501 et seq.).

"(f) In carrying out the provisions of this section, the administering agencies shall endeavor to achieve an equitable regional distribution of training opportunities, based on a comparison of regional data concerning the rate of unemployment among veterans of a period of war, and taking into consideration the regional distribution of eligible veterans and approved programs of job training.

"§ 2111. Inspection of records; investigations

"(a) The records and accounts of employers pertaining to veterans on behalf of whom assistance has been paid under this chapter, as well as other records which the administering agencies determine are necessary to ascertain compliance with the requirements established under this chapter, shall be available at reasonable times for examination by authorized representatives of the Federal Government.

"(b) The administering agencies may monitor all participants under this chapter to determine whether they are complying with the requirements established under this chapter.

"(c) The administering agencies may investigate any matter they deem necessary to determine compliance with the requirements established under this chapter. The investigations authorized by this subsection may include examining records (including making certified copies thereof), questioning employees, and entering into any premises or onto any site where any part of a program of job training is conducted under this chapter, or where any of the records of the employer offering or providing such program are kept.

"§ 2112. Termination of program

"Assistance may not be paid to an employer under this chapter—

"(1) on behalf of a veteran who applies for a program of job training under this chapter after September 30, 1984; or

"(2) for any such program which commences after December 31, 1984.

"§ 2113. Authorization of appropriations

"There is authorized to be appropriated to the Administrator $150,000,000 for the purpose of making payments to employers under this chapter.".

(b) The table of chapters at the beginning of such title and at the beginning of part III of such title are each amended by inserting after the item relating to chapter 43 the following new item:

"44. Veterans' Emergency Job Training Program ..... 2101.".

(c)(1) Notwithstanding the provisions of section 2112 of title 38, United States Code (as added by subsection (a)), in the event that funds are not both appropriated under section 2113 of such title (as added by subsection (a)) and made available by the Director of the Office of Management and Budget to the Veterans' Administration on or before October 1, 1983, for the purpose of making payments to employers under chapter 44 of such title (as added by subsection (a)), assistance may be paid to an employer under such chapter on behalf of any eligible veteran if such veteran—

(A) applies for a program of job training under such chapter within one year after the date on which funds so appropriated are made available to the Veterans' Administration by the Director, and

(B) commences participation in such program within fifteen months after such date.

(2) For the purposes of this subsection, the term "eligible veteran" shall have the meaning provided in section 2103(a) of such title (as added by subsection (a)).

SEC. 102. The amendments made by this title shall take effect on October 1, 1983.

TITLE II—VETERANS' ADMINISTRATION REORGANIZATION

SEC. 201. The requirements of section 210(b)(2)(A) of title 38, United States Code, shall not apply to the planned administrative reorganization at the Veterans' Administration Rehabilitation Engineering Center (hereinafter in this section referred to as "VAREC") at 252 Seventh Avenue, New York, New York, involving—

(1) the transfer to the Veterans' Administration Medical Center, New York, of twenty-four full-time equivalent employees from the VAREC Special Clinic team, five full-time equivalent employees from the VAREC Restoration Laboratory, and four full-time equivalent employees from the VAREC Research and Development Service;

(2) the administrative reassignment from the VAREC of eight employees (in addition to those described in clause (1)) who are orthotists or prosthetists and whose work stations are at nearby Veterans' Administration medical centers to those medical centers; and

(3) the reorganization of elements of the VAREC not providing direct patient services so as to continue them at 252 Seventh Avenue as the "Veterans' Administration Prosthetic Technology and Information Center", under the direct supervision of the Director, Prosthetic and Sensory Aids Service, Department of Medicine and Surgery, Veterans' Administration Central Office.

Amend the title so as to read: "An Act to amend title 38, United States Code, to establish an emergency job training program for wartime veterans.".

House amendments to the Senate amendments:

In lieu of the matter proposed to be inserted by the Senate amendment to the text of the bill, insert the following:

SHORT TITLE; TABLE OF CONTENTS

SECTION 1. This Act may be cited as the "Emergency Veterans' Job Training Act of 1983".

TABLE OF CONTENTS

Sec. 1. Short title; table of contents.
Sec. 2. Purpose.
Sec. 3. Definitions.
Sec. 4. Establishment of program.
Sec. 5. Eligibility for program; duration of assistance.
Sec. 6. Employer job training programs.
Sec. 7. Approval of employer programs.
Sec. 8. Payments to employers; overpayments.
Sec. 9. Entry into program of job training.
Sec. 10. Provision of training through educational institutions.
Sec. 11. Discontinuance of approval of participation in certain employer programs.
Sec. 12. Inspection of records; investigations.
Sec. 13. Coordination with other programs.
Sec. 14. Counseling.
Sec. 15. Information and outreach; use of agency resources.
Sec. 16. Authorization of appropriations.
Sec. 17. Termination of program.
Sec. 18. Expansion of targeted delimiting date extension.
Sec. 19. Effective date.

PURPOSE

SEC. 2. The purpose of this Act is to address the problem of severe and continuing unemployment among veterans by providing, in the form of payments to defray the costs of training, incentives to employers to hire and train certain wartime veterans who have been unemployed for long periods of time for stable and permanent positions that involve significant training.

DEFINITIONS

SEC. 3. For the purposes of this Act:

(1) The term "Administrator" means the Administrator of Veterans' Affairs.

(2) The term "Secretary" means the Secretary of Labor.

(3) The terms "Veteran", "Korean conflict", "compensation", "service-connected", "active military, naval, or air service", "State", and "Vietnam era", have the meanings given such terms in paragraphs (2), (9), (13), (16), (20), (24), and (29), respectively, of section 101 of title 38, United States Code.

ESTABLISHMENT OF PROGRAM

SEC. 4. (a) The Administrator and, to the extent specifically provided by this Act, the Secretary shall carry out a program in accordance with this Act to assist eligible veterans in obtaining employment through training for employment in stable and permanent positions that involve significant training. The program shall be carried out through payments to employers who employ and train eligible veterans in such jobs in order to assist such employers in defraying the costs of necessary training.

(b) The Secretary shall carry out the Secretary's responsibilities under this Act through the Assistant Secretary of Labor for Veterans' Employment established under section 2002A of title 38, United States Code.

ELIGIBILITY FOR PROGRAM; DURATION OF ASSISTANCE

SEC. 5. (a)(1) To be eligible for participation in a job training program under this Act, a veteran must be a Korean conflict or Vietnam-era veteran who—

(A) is unemployed at the time of applying for participation in a program under this Act; and

(B) has been unemployed for at least 15 of the 20 weeks immediately preceding the date of such veteran's application for participation in a program under this Act.

(2) For purposes of paragraph (1), the term "Korean conflict or Vietnam-era veteran" means a veteran—

(A) who served in the active military, naval, or air service for a period of more than 180 days, any part of which was during the Korean conflict or the Vietnam era; or

(B) who served in the active military, naval, or air service during the Korean conflict or the Vietnam era and—

(i) was discharged or released therefrom for a service-connected disability; or

(ii) is entitled to compensation (or but for the receipt of retirement pay would be entitled to compensation).

(3) For purposes of paragraph (1), a veteran shall be considered to be unemployed during any period the veteran is without a job and wants and is available for work.

(b)(1) A veteran who desires to participate in a program of job training under this Act shall submit to the Administrator an application for participation in such a program. Such an application—

(A) shall include a certification by the veteran that the veteran is unemployed and meets the other criteria for eligibility prescribed by subsection (a); and

(B) shall be in such form and contain such additional information as the Administrator may prescribe.

(2)(A) Subject to subparagraph (B), the Administrator shall approve an application by a veteran for participation in a program of job training under this Act unless the Administrator finds that the veteran is not eligible to participate in a program of job training under this Act.

(B) The Administrator may withhold approval of an application of a veteran under this Act if the Administrator determines that, because of limited funds available for the purpose of making payments to employers under this Act, it is necessary to limit the number of participants in programs under this Act.

(3)(A) The Administrator shall certify as eligible for participation under this Act a veteran whose application is approved under this subsection and shall furnish the veteran with a certificate of that veteran's eligibility for presentation to an employer offering a program of job training under this Act. Any such certificate shall expire 60 days after it is furnished to the veteran. The date on which a certificate is furnished to a veteran under this paragraph shall be stated on the certificate.

(B) A certificate furnished under this paragraph may, upon the veteran's application, be renewed in accordance with the terms and conditions of subparagraph (A).

(c) The maximum period of training for which assistance may be provided on behalf of a veteran under this Act is—

(1) fifteen months in the case of—

(A) a veteran with a service-connected disability rated at 30 percent or more; or

(B) a veteran with a service-connected disability rated at 10 percent or 20 percent who has been determined under section 1506 of title 38, United States Code, to have a serious employment handicap; and

(2) nine months in the case of any other veteran.

EMPLOYER JOB TRAINING PROGRAMS

SEC. 6. (a)(1) Except as provided in paragraph (2), in order to be approved as a program of job training under this Act, a program of job training of an employer approved under section 7 must provide training for a period of not less than six months in an occupation in a growth industry, in an occupation requiring the use of new technological skills, or in an occupation for which demand for labor exceeds supply.

(2) A program of job training providing training for a period of at least three but less than six months may be approved if the Administrator determines (in accordance with standards which the Administrator shall prescribe) that the purpose of this Act would be met through that program.

(b) Subject to section 10 and the other provisions of this Act, a veteran who has been approved for participation in a program of job training under this Act and has a current certificate of eligibility for such participation may enter a program of job training that has been approved under section 7 and that is offered to the veteran by the employer.

APPROVAL OF EMPLOYER PROGRAMS

SEC. 7. (a)(1) An employer may be paid assistance under section 8a on behalf of an eligible veteran employed by such employer and participating in a program of job training offered by that employer only if the program is approved under this section and in accordance with such procedures as the Administrator may by regulation prescribe.

(2) Except as provided in subsection (b), the Administrator shall approve a proposed program of job training of an employer unless the Administrator determines that the application does not contain a certification and other information meeting the requirements established under this section or that withholding of approval is warranted under subsection (g).

(b) The Administrator may not approve a program of job training—

(1) for employment which consists of seasonal, intermittent, or temporary jobs;

(2) for employment under which commissions are the primary source of income;

(3) for employment which involves political or religious activities;

(4) for employment with any department, agency, instrumentality, or branch of the Federal Government (including the United States Postal Service and the Postal Rate Commission); or

(5) if the training will not be carried out in a State.

(c) An employer offering a program of job training that the employer desires to have approved for the purposes of this Act shall submit to the Administrator a written application for such approval. Such application shall be in such form as the Administrator shall prescribe.

(d) An application under subsection (c) shall include a certification by the employer of the following:

(1) That employer is planning that, upon a veteran's completion of the program of job training, the employer will employ the veteran in a position for which the veteran has been trained and that the employer expects that such a position will be available on a stable and permanent basis to the veteran at the end of the training period.

(2) That the wages and benefits to be paid to a veteran participating in the employer's program of job training will be not less than the wages and benefits normally paid to other employees participating in a comparable program of job training.

(3) That the employment of a veteran under the program—

(A) will not result in the displacement of currently employed workers (including partial displacement such as a reduction in the hours of nonovertime work, wages, or employment benefits); and

(B) will not be in a job (i) while any other individual is on layoff from the same or any substantially equivalent job, or (ii) the opening for which was created as a result of the employer having terminated the employment of any regular employee or otherwise having reduced its work force with the intention of hiring a veteran in such job under this Act.

(4) That the employer will not employ in the program of job training a veteran who is already qualified by training and experience for the job for which training is to be provided.

(5) That the job which is the objective of the training program is one that involves significant training.

(6) That the training content of the program is adequate, in light of the nature of the occupation for which training is to be provided and of comparable training opportunities in such occupation, to accomplish the training objective certified under clause (2) of subsection (e).

(7) That each participating veteran will be employed full time in the program of job training.

(8) That the training period under the proposed program is not longer than the training periods that employers in the community customarily require new employees to complete in order to become competent in the occupation or job for which training is to be provided.

(9) That there are in the training establishment or place of employment such space, equipment, instructional material, and instructor personnel as needed to accomplish the training objective certified under clause (2) of subsection (e).

(10) That the employer will keep records adequate to show the progress made by each veteran participating in the program and otherwise to demonstrate compliance with the requirements established under this Act.

(11) That the employer will furnish each participating veteran, before the veteran's entry into training, with a copy of the employer's certification under this subsection and will obtain and retain the veteran's signed acknowledgment of having received such certification.

(12) That the program meets such other criteria as the Administrator may determine are essential for the effective implementation of the program established by this Act.

(e) A certification under subsection (d) shall include—

(1) a statement indicating (A) the total number of hours of participation in the program of job training to be offered a veteran, (B) the length of the program of job training, and (C) the starting rate of wages to be paid to a participant in the program; and

(2) a description of the training content of the program (including any agreeement the employer has entered into with an educational institution under section 8) and of the objective of the training.

(f)(1) Except as specified in paragraph (2), each matter required to be certified to in paragraphs (1) through (11) of subsection (d) shall be considered to be a requirement established under this Act.

(2)(A) For the purposes of section 8(c), only matters required to be certified in

paragraphs (1) through (10) of subsection (D) shall be so considered.

(B) For the purposes of section 11, a matter required to be certified under paragraph (12) of subsection (d) shall also be so considered.

(g) In accordance with regulations which the Administrator shall prescribe, the Administrator may withhold approval of an employer's proposed program of job training pending the outcome of an investigation under section 12 and, based on the outcome of such an investigation, may disapprove such program.

(h) For the purposes of this section, approval of a program of apprenticeship or other on-job training for the purposes of section 1787 of title 38, United States Code, shall be considered to meet all requirements established under this Act for approval of a program of job training.

PAYMENTS TO EMPLOYERS; OVERPAYMENT

SEC. 8. (a)(1) Except as provided in paragraph (3) and subsection (b) and subject to the provisions of section 9, the Administrator shall make quarterly payments to an employer of a veteran participating in an approved program of job training under this Act. Subject to section 5(c) and paragraph (2), the amount paid to an employer on behalf of a veteran for any period of time shall be 50 percent of the product of (A) the starting hourly rate of wages paid to the veteran by the employer (without regard to overtime or premium pay), and (B) the number of hours worked by the veteran during that period.

(2) The total amount that may be paid to an employer on behalf a veteran participating in a program of job training under this Act is $10,000.

(3) In order to relieve financial burdens on business enterprises with relatively few numbers of employees, the Administrator may make payments under this Act on a monthly, rather than quarterly, basis to an employer with a number of employees less than number which shall be specified in regulations which the Administrator shall prescribe for the purposes of this paragraph.

(b) Payment may not be made to an employer for a period of training under this Act on behalf of a veteran until the Administrator has received—

(1) from the veteran, a certification that the veteran was employed full time by the employer in a program of job training during such period; and

(2) from the employer, a certification—

(A) that the veteran was employed by the employer during that period and that the veteran's performance and progress during such period were satisfactory; and

(B) of the number of hours worked by the veteran during that period.

with respect to the first such certification by an employer with respect to a veteran, the certification shall indicate the date on which the employment of the veteran began and the starting hourly rate of wages paid to the veteran (without regard to overtime or premium pay).

(c)(1)(A) Whenever the Administrator finds that an overpayment under this Act has been made to an employer on behalf of a veteran as a result of a certification, or information contained in a application, submitted by an employer which was false in any material respect, the amount of such overpayment shall constitute a liability of the employer to the United States.

(B) Whenever the Administrator finds that an employer has failed in any substantial respect to comply for a period of time with a requirement established under this Act (unless the employer's failure is the result of false or incomplete information provided by the veteran), each amount paid to the employer on behalf of a veteran for that period shall be considered to be an overpayment under this Act, and the amount of such overpayment shall constitute a liability of the employer to the United States.

(2) Whenever the Administrator finds that an overpayment under this Act has been made to an employer on behalf of a veteran as a result of a certification by the veteran, or as a result of information provided to an employer or contained in an application submitted by the veteran, which was willfully or negligently false in any material respect, the amount of such overpayment shall constitute a liability of the veteran to the United States.

(3) Any overpayment referred to in paragraph (1) or (2) may be recovered in the same manner as any other debt due the United States. Any overpayment recovered shall be credited to funds available to make payments under this Act. If there are no such funds, any overpayment recovered shall be deposited into the Treasury.

(4) Any overpayment referred to in paragraph (1) or (2) may be waived, in whole or in part, in accordance with the terms and conditions set forth in section 3102 of title 38, United States Code.

ENTRY INTO PROGRAM OF JOB TRAINING

SEC. 9. Notwithstanding any other provision of this Act, the Administrator may withhold or deny approval of a veteran's entry into an approved program of job training if the Administrator determines that funds are not available to make payments under this Act on behalf of the veteran to the employer offering that program. Before the entry of a veteran into an approved program of job training of an employer for purposes of assistance under this Act, the employer shall notify the Administrator of the employer's intention to employ that veteran. The veteran may begin such program of job training with the employer two weeks after the notice is transmitted to the Administrator unless within that time the employer has received notice from the Administrator that approval of the veteran's entry into that program of job training must be withheld or denied in accordance with this section.

PROVISION OF TRAINING THROUGH EDUCATIONAL INSTITUTIONS

SEC. 10. An employer may enter into an agreement with an educational institution that has been approved for the enrollment of veterans under chapter 34 of title 38, United States Code, in order that such institution may provide a program of job training (or a portion of such a program) under this Act. When such an agreement has been entered into, the application of the employer under section 7 shall so state and shall include a description of the training to be provided under the agreement.

DISCONTINUANCE OF APPROVAL OF PARTICIPATION IN CERTAIN EMPLOYER PROGRAMS

SEC. 11. If the Administrator finds at any time that a program of job training previously approved by the Administrator for the purposes of this Act thereafter fails to meet any of the requirements established under this Act, the Administrator may immediately disapprove further participation by veterans in that program. The Administrator shall provide to the employer concerned, and to each veteran participating in the employer's program, a statement of the reasons for, and an opportunity for a hearing with respect to, such disapproval. The employer and each such veteran shall be notified of such disapproval, the reasons for such disapproval, and the opportunity for a hearing. Notification shall be by a certified or registered letter, and a return receipt shall be secured.

INSPECTION OF RECORDS; INVESTIGATIONS

SEC. 12. (a) The records and accounts of employers pertaining to veterans on behalf of whom assistance has been paid under this Act, as well as other records that the Administrator determines to be necessary to ascertain compliance with the requirements established under this Act, shall be available at reasonable times for examination by authorized representatives of the Federal Government.

(b) The Administrator may monitor employers and veterans participating in programs of job training under this Act to determine compliance with the requirements established under this Act.

(c) The Administrator may investigate any matter the Administrator considers necessary to determine compliance with the requirements established under this Act. The investigations authorized by this subsection may include examining records (including making certified copies of records), questioning employees, and entering into any premises or onto any site where any part of a program of job training is conducted under this Act, or where any of the records of the employer offering or providing such program are kept.

(d) The Administrator may administer functions under subsections (b) and (c) in accordance with an agreement between the Administrator and the Secretary providing for the administration of such subsections (or any portion of such subsections) by the Department of Labor. Under such an agreement, any entity of the Department of Labor specified in the agreement may administer such subsections, notwithstanding section 4(b).

COORDINATION WITH OTHER PROGRAMS

SEC. 13. (a)(1) Assistance may not be paid under this Act to an employer on behalf of a veteran for any period of time described in paragraph (2) and to such veteran under chapter 31, 32, 34, 35, 36 of title 38, United States Code, for the same period of time.

(2) A period of time referred to in paragraph (1) is the period of time beginning on the date of which the veteran enters into an approved program of job training of an employer for purposes of assistance under this Act and ending on the last date for which such assistance is payable.

(b) Assistance may not be paid under this Act to an employer on behalf of an eligible veteran for any period if the employer received for that period any other form of assistance on account of the training or employment of the veteran, including assistance under the Job Training Partnership Act (29 U.S.C. 1501 et seq.) or a credit under section 44B of the Internal Revenue Code of 1954 (26 U.S.C. 44B) (relating to credit for employment of certain new employees).

(c) Assistance may not be paid under this Act on behalf of a veteran who has completed a program of job training under this Act.

COUNSELING

SEC. 14. The Administrator and the Secretary may, upon request, provide employment counseling services to any veteran eligible to participate under this Act in order

to assist such veteran in selecting a suitable program of job training under this Act.

INFORMATION AND OUTREACH; USE OF AGENCY RESOURCES

SEC. 15. (a)(1) The Administrator and the Secretary shall jointly provide for an outreach and public information program—

(A) to inform veterans about the employment and job training opportunities available under this Act, under chapters 31, 34, 36, 41, and 42 of title 38, United States Code, and under other provisions of law; and

(B) to inform private industry and business concerns (including small business concerns), public agencies and organizations, educational institutions, trade associations, and labor unions about the job training opportunities available under, and the advantages of participating in, the program established by this Act.

(2) The Secretary, in consultation with the Administrator, shall promote the development of employment and job training opportunities for veterans by encouraging potential employers to make programs of job training under this Act available for eligible veterans, by advising other appropriate Federal departments and agencies of the program established by this Act, and by advising employers of applicable responsibilities under chapters 41 and 42 of title 38, United States Code, with respect to veterans.

(b) The Administrator and the Secretary shall coordinate the outreach and public information program under subsection (a)(1), and job development activities under subsection (a)(2), with job counseling, placement, job development, and other services provided for under chapters 41 and 42 of title 38, United States Code, and with other similar services offered by other public agencies and organizations.

(c)(1) The Administrator and the Secretary shall make available in regional and local offices of the Veterans' Administration and the Department of Labor such personnel as are necessary to facilitate the effective implementation of this Act.

(2) In carrying out the responsibilities of the Secretary under this Act, the Secretary shall make maximum use of the services of State and Assistant State Directors for Veterans' Employment, disabled veterans' outreach program specialists, and employees of local offices appointed pursuant to sections 2003, 2003A, and 2004 of title 38, United States Code. The Secretary shall also use such resources as are available under part C of title IV of the Job Training Partnership Act (29 U.S.C. 1501 et seq.). To the extent that the Administrator withholds approval of veterans' applications under this Act pursuant to section 5(b)(2)(B), the Secretary shall take steps to assist such veterans in taking advantage of opportunities that may be available to them under title III of that Act or under any other program carried out with funds provided by the Secretary.

(d) The Secretary shall request and obtain from the Administrator of the Small Business Administration a list of small business concerns and shall, on a regular basis, update such list. Such list shall be used to identify and promote possible training and employment opportunities for veterans.

(e) The Administrator and the Secretary shall assist veterans and employers desiring to participate under this Act in making application and completing necessary certifications.

AUTHORIZATION OF APPROPRIATIONS

SEC. 16. There is authorized to be appropriated to the Veterans' Administration $150,000,000 for each of fiscal years 1984 and 1985 for the purpose of making payments to employer under this Act and for the purpose of section 18 of this Act. Amounts appropriated pursuant to this section shall remain available until September 30, 1986.

TERMINATION OF PROGRAM

SEC. 17. (a) Except as provided under subsection (b), assistance may not be paid to an employer under this Act—

(1) on behalf of a veteran who applies for a program of job training under this Act after September 30, 1984; or

(2) for any such program which begins after December 31, 1984.

(b) If funds are not both appropriated under section 16 and made available by the Director of the Office of Management and Budget to the Veterans' Administration on or before October 1, 1983, for the purpose of making payments to employers under this Act, assistance may be paid to an employer under this Act on behalf of an veteran if the veteran—

(1) applies for a program of job training under this Act within one year after the date on which funds so appropriated are made available to the Veterans' Administration by the Director; and

(2) begins participation in such program within 15 months after such date.

EXPANSION OF TARGETED DELIMITING DATE EXTENSION

SEC. 18. (a) Subject to the limitation on the availability of funds set forth in subsection (b), an associate degree program which is predominantly vocational in content may be considered by the Administrator, for the purposes of section 1662(a)(3) of title 38, United States Code, to be a course with an approved vocational objective if such degree program meets the requirements established in such title for approval of such program.

(b) Funds for the purpose of carrying out subsection (a) shall be derived only from amounts appropriated pursuant to the authorizations of appropriations in section 16. Not more than a total of $25,000,000 of amounts so appropriated for fiscal years 1984 and 1985 shall be available for that purpose.

EFFECTIVE DATE

SEC. 19. This Act shall take effect on October 1, 1983.

In lieu of the Senate amendment to the title of the bill, amend the title so as to read: "An Act to establish an emergency program of job training assistance for unemployed Korean conflict and Vietnam-era veterans, and for other purposes.".

Mr. MONTGOMERY (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendments and the proposed House amendments to the Senate amendments be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

Mr. HAMMERSCHMIDT. Reserving the right to object, Mr. Speaker, and I do not plan to object, but I would like to take this reservation to inquire of our distinguished chairman and to inform the Members of the House what we have conferred in with the Members of the other body.

I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Speaker, I thank the gentleman for yielding.

The distinguished chairman of our Subcommittee on Education, Training, and Employment, Mr. LEATH, is on the floor and will explain the differences between the bill as it originally passed the House and the proposed amendments in some detail; however, before he does that, if the gentleman will yield to me further, I would like to respond briefly. The committee is fortunate to have a leader as capable as the gentleman from Texas (Mr. LEATH). As chairman of the Subcommittee on Education, Training, and Employment, he made a decision early on that if Congress passed any jobs bill this year, he would make certain that Vietnam veterans were included. Various job proposals have surfaced in the Congress but this authorization for training for Vietnam and Korean veterans to qualify them for better jobs will be the first authorization to get to the President. The gentleman from Texas has delivered what he said he would earlier this year. We are all grateful for his dedication and hard work.

I want to thank the very able ranking minority member of the full committee, Mr. HAMMERSCHMIDT, for his splendid leadership and cooperation in helping to get this legislation enacted. We would not have been successful in getting a bill to the President without tremendous work on the part of the gentleman from Arkansas.

I also want to commend the gentleman from New York, the very able ranking minority member of the subcommittee, Mr. SOLOMON, for his leadership as well. He was totally committed to doing something to help reduce the high unemployment of Vietnam veterans; and this bill, which he has helped shape, will, to some degree, help bring that about. I am grateful to the gentleman.

Finally, I want to thank the very able and distinguished chairman of the Senate Committee on Veterans' Affairs, Mr. SIMPSON. The gentleman has been most understanding in helping us resolve differences between the bill passed by the House and the Senate amendments thereto. The distinguished gentleman from Wyoming has been most fair in his dealings with me and I am grateful for his cooperation. I also want to thank the distinguished ranking minority member of the committee, the gentleman from California (Mr. CRANSTON), for his willingness to work with us to get a bill to the President as quickly as possible. All members and staff of the Senate committee have been very helpful to those of us who have been working on this bill.

I appreciate the hard work of the members and staffs of both committees in developing this bill.

If the gentleman will yield further, the chairman of the subcommittee is on the floor and will briefly explain the major provisions of the proposed agreement.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield to the gentleman from Texas (Mr. LEATH).

Mr. LEATH of Texas. Mr. Speaker, as chairman of the Subcommittee on Education, Training and Employment, I am pleased to join with the distinguished chairman of the Veterans' Affairs Committee is urging the House to accept the amendments to H.R. 2355 we are considering today.

On June 7, the House overwhelmingly passed H.R. 2355 by a vote of 407 yeas to 10 nays. The Senate passed H.R. 2355, amended, by unanimous voice vote on June 15. Obviously, broad bipartisan support for this legislation has been clearly established in both Houses of Congress.

Veteran unemployment remains very high. In June, 365,000 Vietnam-era veterans between the ages of 25 and 44 had been unemployed 15 weeks or longer. In addition to this disturbing statistic, the rate of unemployment among Vietnam-era veterans was higher than that for nonveterans in all age groups. This situation has existed for many, many months. Although we are all greatly concerned by the high unemployment being experienced by so many segments of our population, we, as a nation, have made a particular commitment to provide special assistance to those who wore the uniform during time of war. Historically, too many Vietnam era and disabled veterans have experienced difficulty finding and maintaining suitable employment. Added to the chronically unemployed are veterans who, prior to the recent recession, were sucessfully employed but are currently out of work due to shifting industries and changing technology. Every effort must be made to assist all veterans who desperately need jobs. H.R. 2355 will go a long way toward assisting these long-term unemployed wartime and disabled veterans.

The amendments before us today blend the best features of H.R. 2355 as passed by the House and the Senate's amendments to this bill. Although a detailed discussion of the compromise will follow my statement, there are a few provisions I want to point out to my colleagues.

As passed by the House, H.R. 2355 would extend eligibility for job training to veterans of the Vietnam era and veterans disabled after August 4, 1964. The Senate amendment would extend eligibility for job training to all wartime veterans who have eligibility for GI bill benefits; that is, veterans of World War II, Korea, and Vietnam. The compromise agreement limits eligibility to Korean conflict and Vietnam-era veterans. I want to emphasize that the broadcasting of the pool of eligibles beyond those included in the House-passed bill will in no way increase the cost of the bill. While the House-passed H.R. 2355 limited eligibility to the younger Vietnam-era veteran, we feel that it is equally important to provide training to Korean veterans who also have been displaced from their jobs and must acquire new skills in order to achieve meaningful employment.

Another issue of particular concern is the funding level provided for this job training program. The House-passed bill would provide $25 million for fiscal year 1983, $150 million for fiscal year 1984 and an additional $150 million for fiscal year 1985. The Senate amendments would provide a total of $150 million for the program. The compromise agreement establishes a funding level of $150 million for fiscal year 1984 and $150 million for fiscal year 1985. We are very pleased with this funding level and believe it will effectively accomplish the purpose of the bill to assist a substantial number of long-term unemployed wartime veterans.

The first concurrent budget resolution (H. Con. Res. 91) specifically allows for the funding level we have agreed on with the Senate. It is imperative that funds for this legislation be appropriated as soon as practicable. We had expected the HUD-Independent Agencies Appropriations Act for 1984 (Public Law 98-45) to include a Senate approved $150 million for a veteran emergency job training program. We were deeply disappointed when the $150 million was dropped by the conferees on that legislation (H.R. 3133). My good friend ED BOLAND, chairman of the Subcommittee on HUD-Independent Agencies of the Appropriations Committee, however, stated very clearly on the floor that when the authorizing legislation is enacted, the Appropriations Committee will act swiftly to approve the authorized funds. I very much appreciate that assurance and feel confident that that commitment will be met.

I also want to emphasize our expectation that, following congressional approval of funding for the job training program contemplated by H.R. 2355, the Office of Management and Budget will expeditiously allocate the funds and the Veterans' Administration will implement this program without delay. During the consideration of this legislation, the administration demonstrated an incredible insensitivity to the needs of unemployed Vietnam veterans by opposing H.R. 2355. Administration representatives argued lamely that veterans needed no additional job training assistance, referring to the Jobs bill (Public Law 98-8) and Job Training Partnership Act (JTPA) (Public Law 97-301). Public Law 98-8 has no money earmarked for jobs for veterans. The $9.4 million provided for veterans under JTPA for fiscal year 1984 is woefully inadequate for this purpose and will not begin to address the needs of the hundreds of thousands of unemployed veterans. Make no mistake about it, it is the intention of the Congress that eligible veterans of Korea and Vietnam, who so badly need the job training assistance authorized in this legislation, will receive that assistance beginning October 1 of this year. There must be no delay.

Members should also note the compromise reached regarding the duration of assistance paid on behalf of each eligible veteran. The House bill would provide that training assistance would be paid for a period of up to 12 months for a veteran with a service-connected disability rated at 30 percent or more, or, for any other eligible veteran, 6 months with up to an additional 6 months of assistance available at the discretion of the Administrator. The Senate amendment on this provision would provide a maximum period of 12 months assisted training, except that an additional 6 months could be allowed for veterans with service-connected disabilities rated at 30 percent or more or at 10 or 20 percent if the veteran has been determined to have a serious employment handicap. The compromise agreement would provide 15 months of assistance in the case of a veteran with a service-connected disability rated at 30 percent or more and to a veteran with a service-connected disability rated at 10 or 20 percent who has been determined to have a serious employment handicap. Any other eligible veteran may receive up to 9 months of assistance.

As passed by the House, the payment made to an employer on behalf of a veteran participating in a program of job training would be limited to 50 percent of the veteran's starting wage. The Senate provision would limit the payment to 50 percent of the veteran's starting wage up to a maximum of $9,000 for service-connected disabled veterans and $6,000 for other eligible veterans. The compromise establishes a cap of $10,000 on the total amount that may be paid to an employer on behalf of a veteran.

Finally, regarding the administration of the program, the House bill would provide that the program be carried out by the Administrator of Veterans' Affairs in cooperation with the Secretary of Labor. The Senate provision would provide that the program be carried out jointly by the Secretary and the Administrator, and that the responsibilities of each would be specified in an interagency agreement. The compromise agreement

would provide that the program shall be carried out by the Administrator and, to the extent specifically provided in the act, the Secretary. It is the feeling of the House Committee that through the years the VA has gained invaluable experience in handling programs of the kind authorized by H.R. 2355 and has in place a nucleus of professional people who are cognizant and sensitive to the many problems of administering a training program for veterans. The Veterans' Administration knows the problems of the past and is in an excellent position to assure that the program will be administered with a minimum of abuses. This long experience with on-job training makes the VA the logical agency to have primary responsibility for the program. The compromise agreement, however, specifically assigns to the Secretary primary responsibility for promotion and development of employment and job training opportunities. It is expected that the Disabled Veterans Outreach Program (DVOP) will be fully utilized in the outreach aspect of this new program as will be the field personnel of the Veterans Employment and Training Service—that is, the Regional and State Directors for Veterans Employment.

Mr. Speaker, we believe the amendments before us today are good ones. This modest program is designed to get veterans working again and to narrow the gap between veterans and their civilian counterparts whose education and employment were not interrupted by military service—and to do so on a short-term emergency basis in order to ride out these tough economic times that have hit all Americans so hard.

In closing, I would like to thank the distinguished gentleman from Mississippi, (Mr. MONTGOMERY) the chairman of the Veterans' Affairs Committee, and the ranking minority member of the committee, JOHN PAUL HAMMERSCHMIDT, for their assistance and cooperation in the development of this legislation. I also want to express my appreciation to GERALD SOLOMON, the ranking minority member of the subcommittee, whose cooperation and hard work has been most helpful in considering and advancing this legislation. I congratulate all members of the Subcommittee on Education, Training and Employment for their contribution in helping bring this most important bill to a successful conclusion.

I urge my colleagues to support these amendments.

There follows an explanatory statement of the House-passed bill, the Senate amendment (S. 1033), and the compromise agreement on H.R. 2355:

EXPLANATORY STATEMENT OF HOUSE BILL, SENATE AMENDMENT (S. 1033), AND COMPROMISE AGREEMENT ON H.R. 2355, THE "EMERGENCY VETERANS' JOB TRAINING ACT OF 1983"

This explanatory statement explains the provisions of H.R. 2355 as passed by the House of Representatives, the provisions of the bill as passed by the Senate with an amendment incorporating the provisions of S. 1033 as reported, and the provisions of a compromise agreed to by the Committees. The differences between the House bill, the Senate amendment, and the compromise agreement are noted below, except for clerical corrections, conforming changes made necessary by agreements reached between the Committees, and minor drafting, technical, and clarifying changes.

This explanatory statement is being presented in lieu of a joint explanatory statement of a committee of conference.

GENERAL

Both the House bill and the Senate amendment would establish a new, emergency program of job training for certain veterans, providing a system of payments to employers who hire and train eligible veterans who have been unemployed 15 out of the 20 weeks immediately preceding their application for participation in the program. Both would provide some administrative role for both the Veterans' Administration and the Department of Labor. Finally, the program established by the House bill and the Senate amendment would generally be closed to new applicants at the end of fiscal year 1984.

STATUTORY FORMAT

The House bill is in the form of a free-standing law. The provisions of the Senate amendment establishing the new program would be set forth in a new chapter 44 proposed to be added to title 38, United States Code.

The compromise agreement adopts the format of the House bill.

Hereinafter, citations to provisions in the Senate amendment that would be set forth in the proposed new chapter 44 of title 38 are made by reference to the "new section" number in title 38. For example, the reference to proposed new section 2102 of title 38 is referred to as "new section 2102".

PURPOSE

The House bill (section 2(b)) states the purpose of the legislation in terms of promoting job training and employment of unemployed Vietnam-era and disabled veterans; the Senate amendment (new section 2101), in terms of addressing veterans' unemployment problems by providing employers with financial incentives to employ and train certain unemployed wartime veterans.

The House bill (section 2 (a) and (c)), but not the Senate amendment, also contains Congressional findings relating to the need for this legislation and would require the Administrator of Veterans' Affairs and the Secretary of Labor to administer the new program in a vigorous and expeditious manner.

The compromise agreement (section 2) follows the Senate amendment.

ADMINISTRATION OF PROGRAM

The House bill (section 4) would provide that the program shall be carried out by the Administrator in cooperation with the Secretary of Labor.

The Senate amendment (new section 2102) would provide that the program shall be carried out by the Administrator, jointly with the Secretary, and that the respective responsibilities of each must be specified in an interagency agreement (with certain responsibilities required to be assigned as specified in the legislation) entered into within 60 days after enactment but in no event later than October 1, 1983.

The compromise agreement (section 4(a)) would provide that the program established under this Act shall be carried out by the Administrator and, to the extent specifically provided in the Act, the Secretary.

As noted below under the heading "Inspection of Records; Investigations", the compromise agreement specifies (section 12(d)) that the Administrator may elect to enter into an agreement with the Secretary providing for Department of Labor entities specified in the agreement to carry out certain responsibilities of the Administrator relating to the monitoring of compliance (section 12(b)), and the conduct of any investigations necessary to determine compliance (section 12(c)). The compromise agreement also (section 15) assigns to the Secretary primary responsibility for promoting the development of employment and job training opportunities and joint responsibilities with the Administrator with respect to outreach and public information and assisting veterans and employers in applying to participate in the new program, and (section 14) authorizes the Secretary to provide certain employment counseling services.

An important goal of the Committees has been to minimize the administrative obstacles to swift implementation of the program, in order that veterans and employers might be brought into the program as expeditiously as possible, consistent with the emergency nature of this legislation.

The Senate amendment (new section 2102(c)), but not the House bill, would provide that the Secretary of Labor shall carry out the Secretary's responsibilities through the Assistant Secretary of Labor for Veterans' Employment established under section 2002A of title 38.

The compromise agreement (section 4(b)) contains this provision.

ELIGIBILITY FOR PROGRAM

The House bill (section 3(1)) would provide eligibility for veterans of the Vietnam era, as defined in section 101(29) of title 38 (the period beginning August 5, 1964, and ending on May 7, 1975), and for disabled veterans entitled to receive service-connected disability compensation from the VA for a disability incurred or aggravated any time after August 4, 1964.

The Senate amendment (new section 2103(a)) would provide eligibility for veterans of World War II (defined in section 101(8) of title 38 as the period beginning December 7, 1941, and ending December 31, 1946), the Korean conflict (defined in section 101(9) of title 38 as the period beginning June 27, 1950, and ending January 31, 1955), and the Vietnam era. Service during those periods would be specifically defined by reference to entitlement standards established under the GI Bills of those periods—generally, that the veteran was discharged under conditions other than dishonorable, and met certain minimum-service requirements: World War II—90 days; Korean conflict—90 days; and Vietnam era—180 days. These minimum service requirements would not be applicable to veterans discharged for service-connected disabilities.

Under both the House bill (section 5(a)) and the Senate amendment (new section 2103(a)), eligibility would further be condi-

tioned upon the veteran having been unemployed for not less than 15 of the last 20 weeks at the time of applying for participation in the program. A veteran would be considered "unemployed" when the veteran is without a job (to be determined, under the House bill, in accordance with the criteria used by the Bureau of Labor Statistics of the Department of Labor) and wants and is available for work. Under the Senate amendment, but not the House bill, eligibility would be further conditioned upon the veteran being unemployed when applying to participate. As an alternative to unemployment for 15 out of 20 weeks, the Senate amendment, but not the House bill, would provide eligibility to an unemployed veteran who has been terminated or laid off from employment, is eligible for or has exhausted entitlement to unemployment compensation, and has no realistic opportunity to return to employment in the same or a similar occupation in the geographical area where the veteran previously held employment.

The compromise agreement (section 5(a)) would provide eligibility for a Korean conflict or Vietnam-era veteran who is unemployed and has been unemployed for at least 15 of the 20 weeks immediately preceeding the date of application for participation in a program of job training. The term "Korean conflict or Vietnam-era veteran" would be defined to mean a veteran who served for one day or more during either of those periods and who (1) has served at least 181 days or (2) was discharged from service for a service-connected disability or is entitled to compensation for a service-connected disability. The term "unemployed" would apply to any period during which the veteran is without a job and wants and is available for work.

Although the compromise agreement does not contain the language from the House bill mandating the use of criteria from the Bureau of Labor Statistics in determining whether a veteran is without a job, it is the Committees' general contemplation that these criteria will be applied. However, the Committees wish to emphasize their intention that the fact that a veteran is or has been a "discouraged worker"—i.e., one who ceased looking for work because he or she believed none was available—should in no way preclude participation in the new program.

Veterans' applications

Both the House bill (section 5(b)) and the Senate amendment (new section 2103(b)) would require that veterans seeking to participate in a program of job training submit an application in such form and containing such information as is prescribed administratively. The Senate amendment, but not the House bill, would require the application to specify the training objective to be pursued.

The compromise agreement (section 5(b)(1)) follows the House bill with modifications that would clarify that a veteran's application is not for participation in a particular employer's program of job training and would require that an application contain the veteran's certification regarding unemployment status and military service requirements.

Approval of veterans' applications

The House bill (section 5(b)) would provide that an application of a veteran may not be approved if it is found that the veteran is already qualified for the job for which the training would be provided.

The Senate amendment (new section 2103(b)) would provide that a veteran's application must be approved unless it is found that the veteran either is not eligible or is already qualified for the specified training objective. In addition, under the Senate amendment, a veteran who has been determined to be eligible would be certified as such and would be furnished with a copy of a certificate of eligibility for presentation to an employer offering a program of job training.

The compromise agreement (section 5(b)(2)) follows the Senate amendment with three modifications:

First, the provision for disapproval of the veteran's application if the veteran is already qualified for the training objective is deleted. The Committees recognize that at this early stage of determining a veteran's basic eligibility, it would often be premature to require veterans to commit themselves to a particular training objective. The goal of precluding the payment of training assistance under this legislation on behalf of veterans who are already qualified in the proposed field of training should be adequately served by the requirement, derived from the House bill and contained in section 7(d)(4) of the compromise agreement (discussed below), that an employer certify that training will not be provided to veterans who are already qualified.

Second, approval of the veterans' application could be withheld if the Administrator determines that such withholding of approval is necessary in order to limit the number of veteran participants in a program of job training under this measure where it is determined that sufficient funds are not available to permit that veteran's participation. This change is designed to clarify the Administrator's authority to ensure that spending under the program does not exceed the funds appropriated. It corresponds to section 9 of the compromise agreement, which gives the Administrator authority to withhold or deny approval of an eligible veteran's entry into a program of job training on the basis of funding limitations. Thus, the Act contains two separate mechanisms for controlling obligations within the bounds of available funds: As an initial safeguard, the pool of veteran applicants having certificates may be limited, and, at a subsequent point in the pre-obligation process, the entry of veterans previously certified as eligible into VA-assisted training may be postponed or stopped in order to keep obligations within those bounds.

Third, the certificate of eligibility furnished to the veteran would be valid for only 60 days, would be required to specify the dates of issuance and expiration, and could be renewed upon application by the veteran. This provision is designed to provide both the Administrator and employers with a mechanism for ensuring that a veteran's eligibility is reasonably current and the Administrator with a further mechanism for estimating potential obligations of funds. Consistent with the provisions of section 10 of the compromise agreement, the Committees intend that the certificate also specify that it is subject to the availability of funds, that a veteran may not enter an approved program of job training under it until the employer has given the VA two weeks notice of intention to enter the veteran into such training, and any other matters that would be useful from the standpoint of the effective implementation of this legislation.

DURATION OF ASSISTANCE

The House bill (section 5(c)) would provide that training assistance could be paid for a period of up to twelve months in the case of a veteran with a service-connected disability rated at 30 percent or more, or, in the case of any other eligible veteran, for a period of six months with up to an additional six months of assistance available at the discretion of the Administrator.

Under the Senate amendment (new section 2104(b)), the maximum period of assisted training would be twelve months, except that an additional six months could be allowed for veterans with service-connected disabilities rated either at 30 percent or more or at 10 or 20 percent if the veteran has been determined to have a serious employment handicap under section 1506 of title 38, relating to vocational rehabilitation for certain veterans with service-connected disabilities.

The compromise agreement (in section 5(c)) contains the following maximum training-period provisions: fifteen months—across the board, without the need for individual extensions—in the case of certain veterans with service-connected disabilities rated either at 30 percent or more or at 10 or 20 percent if the veteran has been determined to have a serious employment handicap under section 1506 of title 38, and nine months in the cases of other veterans.

EMPLOYER JOB TRAINING PROGRAMS

The House bill (section 6(a)) would provide that, to qualify as a program for which assistance may be paid, a program of job training must provide training for a period of at least six months. Under the Senate amendment (new section 2104(a)), an assisted program must generally be for no less than six months, except that a program of between three and six months could be approved where the purposes of the program would otherwise be met.

The compromise agreement (section 6(a)) follows the Senate amendment.

The House bill (section 6(b)) would provide that an eligible veteran may select an approved program of job training with any employer. Under the Senate amendment (new section 2105(c)), an eligible veteran may accept an approved program offered to the veteran by any employer.

The compromise agreement (section 6(b)) provides that a veteran approved for participation and having a current certificate of eligibility may enter any approved program offered to the veteran by the employer.

The Senate amendment (new section 2104(a)), but not the House bill, would require that in order to qualify as a program of job training, an employer's program must offer training in an occupation in a growth industry, an occupation requiring the use of new technological skills, or an occupation for which demand for labor exceeds supply.

The compromise agreement (section 6(a)(1)) contains this provision. The Committees intend that the Administrator shall construe these terms liberally—that is, in the case of an occupation with respect to which there is some doubt as to whether it should be included in one of these three categories, that doubt should be resolved in favor of including it. In case of such doubt, it might be useful for the Administrator to consult with the Secretary of Labor or other appropriate entity in construing the statutory terms.

APPROVAL OF EMPLOYER PROGRAMS

Approval process

The House bill (section 8) would establish basically a two-step approval process for programs of job training. First, the employer would submit a written application containing a certification that certain criteria would be met; and, second, the Administrator would be required to conduct an investigation regarding the criteria for approval in order to determine whether the criteria are met.

The Senate amendment (new section 2105(c)) would require the employer to submit with the application a certification that all applicable criteria for job training programs would be met, and would essentially eliminate the requirement for the second step under the House bill, by mandating generally that a proposed program of job training with respect to which the application and certification comply on their face with the requirements of the legislation be approved without the need for any prior investigation. Investigation would be authorized, but not required, and approval of the proposed program being investigated could be withheld pending the outcome of the investigation, whereupon, depending on the outcome, the program could be disapproved.

The compromise agreement (section 7(a)(2) and (g)) follows the Senate amendment. The Committees believe that this approach will minimize administrative difficulties, enhance the attractiveness of the program to employers, and expedite implementation of the program. To the extent that such limited prior approval proves to be a less effective safeguard than mandatory prior investigation, the Committees believe that the post-approval safeguards in the compromise agreement—including the authorities regarding inspection of records, monitoring, investigation, discontinuance of approval, periodic certifications connected with each payment of assistance, and overpayment remedies with respect to both employers and veterans, as well as the availability of civil penalties under the Federal False Claims Act (31 U.S.C. § 3729-31) and criminal penalties under the Federal False Statements Act (18 U.S.C. § 1001)—should be sufficient to ensure that the requirements of this legislation will be able to be properly enforced so that limited resources will not be expended for nonqualified programs of training.

Criteria for approval of employer programs

Both the House bill (section 9) and the Senate amendment (new section 2107) would preclude assistance to programs of job training for employment in seasonal, intermittent, or temporary jobs (the House bill, but not the Senate amendment, providing an exception for seasonal jobs as determined to be appropriate), for employment under which commissions are the primary source of income, for employment involving political or religious activities, or where the training program would be carried out outside the United States. The House bill (section 6(b)), but not the Senate amendment, would exclude employers other than for-profit private employers. The Senate amendment (new section 2107(4)), but not the House bill, would exclude federal agencies.

The compromise agreement (section 7(b)) follows the Senate amendment.

The House bill (section 8(b)(3)) would require the employer to certify that there is a reasonable certainty that a position of the type for which the veteran is to be trained will be available to the veteran at the end of the training period.

The Senate amendment (new section 2105(b)(1)) would require the employer to certify that the employer has planned for the employment of the veteran in an appropriate position at the conclusion of the training period, and that the employer has no reason to expect that such a position will not then be available to the veteran on a stable, permanent basis.

The compromise agreement (section 7(d)(1)) follows the Senate amendment.

Both the House bill (section 8(b)(1)) and the Senate amendment (new section 2105(b)(2)) would require the employer to certify that veterans participating in its program of job training will be paid no less than other employees in such a program or, under the Senate amendment, a comparable program.

The compromise agreement (section 7(d)(2)) follows the Senate amendment.

The House bill, but not the Senate amendment, would require a pre-approval finding, upon investigation, that the program of job training will not be given to veterans who are already qualified for the job for which training is to be provided.

The compromise agreement (section 7(d)(4)) follows the House bill, with an amendment modifying this provision so as to require that the matter be included in the employer's certification (rather than necessarily be subject to pre-approval investigation). The Committees note that this provision is intended only to require the employer to conduct a reasonable, good-faith inquiry into a veteran's qualifications, and that section 8(c) of the compromise agreement would impose upon the veteran, and not upon the employer, liability for overpayments to the employer which result from false or incomplete information furnished to the employer by the veteran.

The House bill (section 8(c)(1)), but not the Senate amendment, would require a pre-approval finding, upon investigation, that the job for which training is to be provided is one in which progression and appointment to the next higher classification are based upon skills learned through organized and supervised training on the job rather than on factors such as length of service and normal turnover.

The compromise agreement (section 7(d)(5)) contains a provision requiring the employer to certify that the job in question is one that involves significant training.

The House bill (section 8(c)(10)), but not the Senate amendment, would require a pre-approval finding that the training program will be stated in a written agreement signed by the employer and the veteran, and that a copy of the signed agreement will be provided to both the veteran and the VA.

The compromise agreement (Section 7(d)(11)) follows the House bill with an amendment modifying this provision so as to require that the matter be included in the employer's certification (rather than necessarily be subject to pre-approval investigation) and to refer to a copy of the employer's certification under this subsection (subsection (d) of section 7 of the compromise agreement) rather than to a written agreement.

Six other approval criteria which were included in substantially similar form in both the House bill (section 8(c)), as matters requiring pre-approval findings but not certification, and the Senate amendment (new section 2105(b)), as matters subject to certification, are included in the compromise agreement. These criteria relate to the nondisplacement of current or laid-off workers (paragraph (3) of section 7(d)), the adequacy of training content (paragraph (6)), the full-time employment of participating veterans (paragraph (7)), the length of the period of training as compared to that customarily required by employers (paragraph (8)), the availability of adequate training facilities (paragraph (9)), and the maintenance of records adequate to show employer compliance (paragraph (10)).

The House bill (section 8(c)(11)) would authorize the imposition of additional criteria as to which pre-approval findings would be required. The Senate amendment (new section 2105(b)(10)) would similarly authorize additional criteria as to which certification, rather than pre-approval findings, would be required.

The compromise agreement (section 7(d)(12)) contains a provision authorizing additional criteria that the Administrator determines are essential for the effective implementation of the program established by the compromise agreement.

The Committees note their intention that this authority to impose additional criteria is intended to meet unforeseen problems clearly necessitating the imposition of additional requirements. The Committees stress that this provision is not intended to give the VA authority to impose undue restrictions as was done with respect to the targeted delimiting date extension program (enacted in section 201(a) of Public Law 97-72) and required Congressional action (section 201(a) of Public Law 97-306) undoing the restrictions and extending the program for a year.

The Senate amendment (new section 2105(b)(3)), but not the House bill, would require the employer's certification to indicate the number of hours of training and to describe the training content of the program and the training objective.

The compromise agreement (section 7(e)) contains this provision with amendments requiring that the cerification also specify the length of the program and the starting rate of wages and describe any agreement the employer has entered into under section 8 of the compromise agreement, relating to the provision of training through educational institutions.

The compromise agreement (section 7(f)) would also clarify that generally each of the matters specified in section 7 (d) (1) through (11) of the compromise agreement as requiring employer certification prior to approval of a program of job training (i.e., not including matters that may be administratively required to be certified under paragraph (12) of section 7(d)) shall be considered to be affirmative substantive requirements. However, for purposes of section 8(c) of the compromise agreement, relating to overpayments, only the matters covered by paragraphs (1) through (10) would be considered requirements. Thus, a failure to provide a participating veteran with a copy of the employer's certification would not be grounds for an overpayment. For the purposes of section 11 of the compromise agreement, relating to the discontinuance of approval of veterans' participation in employer programs that fall out of compliance with requirements established under this legislation, the matters covered by all twelve paragraphs of section 7(d) would be considered such requirements. Hence, failures to provide participating veterans with copies of the employer's certificate and to meet requirements established administratively

under the authority in paragraph (12) could, be virture of section 7(f)(2)(B), result in discontinuance of approval.

The Committees note, with repect to the requirement (under subsections (d)(1) and (f) of section 7 of the compromise agreement) that the employer plan for the permanent employment of the veteran after training, that it is not their intention that an employer's failure to continue a veteran's employment after the completion of training should, in and of itself, result in the creation of an overpayment. An overpayment on the basis of subsection (d)(1) would result only where there is an affirmative finding, based upon an investigation or other action under section 12, that the employer had in fact, at the time of making the certification under subsection (d), failed to make plans for the continuing employment of such veterans as may complete training under the employer's program, had made other plans inconsistent with such continuing employment, had no reasonable basis at that time for expecting that a position would be available to the veteran on a stable and permanent basis at the end of the training period, or did have some affirmative basis for expecting that such a position would not then be available. In the making of such an affirmative finding, the record of the employer in continuing or not continuing the employment of veterans would certainly be relevant.

PAYMENTS TO EMPLOYERS

Computation of amounts

The House bill (section 7(a)) would provide that the amount paid to an employer on behalf of a veteran for any period may not exceed 50 percent of the wages paid for that period, computed on the basis of the starting wage rate.

The Senate amendment (new section 2108(a)) would provide that the amount paid to an employer on behalf of a veteran may not exceed the lesser of 50 percent of the wages paid during the training period in question, or a specified annual dollar limit. That limit would be $9,000 in the cases of certain veterans with service-connected disabilities (including all veterans with disabilities rated at 30 percent or more, as well as those rated 10 to 20 percent disabled who have been determined to have a serious employment handicap under section 1506 of title 38), and $6,000 in the case of any other veteran.

The compromise agreement (section 8(a)) provides that the training assistance amount paid to an employer on behalf of a veteran for any period shall be 50 percent of the veteran's wages for that period—not counting any increase over the starting rate and without regard to overtime or premium pay—up to a total of $10,000 payable on behalf of any individual veteran.

The Committees stress that the rule relating to overtime and premium pay would apply regardless of the frequency or regularity with which such pay is paid for the job for which training is being provided.

Payment periods

Both the House bill (section 7(b)) and the Senate amendment (new section 2108(a)) would provide for payments to be made to employers on a quarterly basis. The Senate amendment (new section 2108(b)), but not the House bill, would authorize the making of payments on a monthly, rather than quarterly, basis to private, for-profit businesses with 500 of fewer employees.

The compromise agreement (section 8(a)(1) and (3)) follows the Senate amendment with an amendment deleting the requirement that businesses be private and for-profit and establishing a requirement that the Administrator set a numerical limit by regulation.

The Committees recognize that cash flow problems sufficiently significant to warrant monthly payments may vary from one type of business or industry to another. Thus, the Committees believe that the Administrator should have considerable latitude in setting such limits, with the goal of attracting employers with relatively few employees into the program established under this legislation.

Certifications

Both the House bill (section 7(b)) and the Senate amendment (new section 2108(c)) would provide that no payment for a period of training may be made until individual certifications have been received from both the employer and the veteran. The veteran would be required to submit a certification as to the veteran's actual employment and training with the employer during the training period for which payment is to be made; and the employer would be required to certify that the veteran was employed and progressing satisfactorily during that period. The Senate amendment (new section 2108(c)(2)(B)), but not the House bill, would require the employer to indicate, in the first of these periodic certifications, the date on which the employment of the veteran began.

The compromise agreement (section 8(b)) contains these provisions with two modifications. First, each periodic certification by an employer would be required to include an indication of the number of hours worked by the veteran during the period for which payment is to be made; and, second, the employer's initial certification would be required to indicate the starting rate of wages paid to the veteran.

The House bill (section 7(a)), but not the Senate amendment, would specify that payments to employers employing disabled veterans may be used for the purpose of defraying the costs of making structural changes to the employer's workplace to remove architectural barriers.

The compromise agreement does not contain this provision.

The Committees note that nothing in the language of the compromise agreement would preclude employers from using training assistance payments to make reasonable accommodations to the needs of disabled veterans, which in the cases of certain types of disabilities (for example, blindness and deafness would not necessarily be structural. The compromise agreement, in providing that the purpose of such payments is to assist employers in defraying the cost of necessary training, specifies no limitations on the uses to which payments may be put by employers.

OVERPAYMENTS

The House bill (section 7(c)) would provide that, if a willful or negligent false certification by either an employer or a veteran were to result in an overpayment of training assistance, the amount of the overpayment would be a liability to the United States of the party making the false certification, subject to collection in the same manner as any other debt due to the United States.

The Senate amendment (new section 2109(b)) would provide that, if a certification or application which was false or clearly unsupportable in any material respect were to result in an overpayment of assistance, the party submitting that certification or information would be liable for the overpayment. As in the House bill, the overpayment could be collected in the same manner as any other debt due to the United States.

The compromise agreement (section 8(c)(1)(A)) would provide that an employer would be liable for any overpayment of assistance resulting from a certification, or information contained in an application, submitted by an employer that was false in any material respect. Also (under section 8(c)(1)(B)), if the Administrator finds that the employer has failed in any substantial respect to achieve compliance with any requirement (including matters deemed to be requirements for this purpose by virtue of section 7(f)(2)(A) of the compromise agreement—clauses (1) through (10) of section 7(d)) established under the compromise agreement (unless the employer's failure is the result of false or incomplete information provided by the veteran), any payment for the period of noncompliance would be an overpayment for which the employer would be liable.

A veteran's liability (section 8(c)(2)) for an overpayment would depend upon a finding by the Administrator that the veteran submitted material which was willfully or negligently false in any material respect in a certification or application submitted by the veteran to the Administrator or in information provided to an employer.

The compromise agreement (section 8(c)(3)) would further provide that overpayments recovered would be credited to funds available for payments under the compromise agreement and that, if no such funds remain, the amount of the overpayment recovered would be deposited into the U.S. Treasury. Finally, the compromise agreement (section 8(c)(4)) would authorize the Administrator to waive, in whole or in part, any such overpayment, in accordance with the terms and conditions of section 3102 of title 38, which authorizes waiver of recovery of claims under laws administered by the VA whenever the Administrator determines that recovery would be against equity and good conscience, and where application for relief from recovery has been made within 180 days of the date of notification of the indebtedness to the debtor.

Civil penalty

The Senate amendment (new section 2109(c)), but not the House bill, would authorize the administrative imposition of a civil penalty (up to $1,000 for each individual wrongfully employed in a program of job training under the Senate amendment), after an adjudication determined on the record after opportunity for an agency hearing, on an employer who has, willfully or with reckless disregard of the facts, made a false certification or has caused the administering agency to give approval contrary to the requirements of the legislation. Actions to impose such a penalty would be reviewable in the Federal courts.

The compromise agreement does not contain this provision.

The Committees note the existence of general authority, under the False Claims Act (31 U.S.C. §§ 3729–31), regarding the assessment and collection of civil penalties, as well as criminal sanctions (18 U.S.C. § 1001), through judicial rather than administrative processes, in cases of knowingly false, fictitious, or fraudulent claims or statements made to representatives of the Federal Government. The Committees strongly urge the Administrator (and, where appropriate, the

Secretary of Labor) to ensure that, whenever in the implementation of the compromise agreement evidence of a violation of such a statute comes to light, the matter is vigorously pursued and, where appropriate, referred to the Department of Justice for action.

The Committees also note the existence of authority for the Department of Justice to provide, at the request of the agency involved, certain legal services in conducting investigations and examining witnesses, in connection with a claim before the agency (28 U.S.C. § 514), and believe that this authority may prove useful in determining whether any particular employer has acted knowingly and willfully in connection with the submission of a false claim, has submitted fraudulent materials, or has otherwise demonstrated conduct which would render that employer subject to the civil or criminal penalties noted above, or to any other applicable sanction established by law or regulation. In all such matters, the Committees urge prompt and full cooperation between the Administrator (and, where appropriate, between the Secretary) and the Attorney General, consistent with the terms and provisions of sections 514 and 516 (regarding representation by the Attorney General in any action in which the United States is a party) of title 28, and of applicable interagency agreements.

ENTRY INTO PROGRAM OF TRAINING

As noted above in the discussion of section 5(b) of the compromise agreement, under the subheading "Approval of Veterans' Applications", the compromise agreement (section 9) authorizes the Administrator to withhold or deny approval of a veteran's entry into an approved program of job training when necessary to avoid incurring obligations in excess of the funds available. The compromise agreement also requires that employers give the VA two weeks notice prior to a veteran's entry into VA-assisted training. That notice is intended to enable the Aministrator to withhold or deny approval for the purpose of ensuring that obligations are not incurred in excess of available funds.

PROVISION OF TRAINING THROUGH EDUCATIONAL INSTITUTIONS

The Senate amendment (new section 2106), but not the House bill, would permit an employer to enter into an arrangement or agreement with an educaitonal institution that has been approved for the enrollment of veterans under chapter 34 of title 38 for that institution to provide the program of training (or a portion thereof). When such an arrangement or agreement has been entered into, the application of the employer would be required to disclose that fact and describe the training to be provided by the institution.

The compromise agreement (section 10) contains this provision with amendments deleting any reference to "arrangements".

DISCONTINUANCE OF PAYMENTS FOR UNSATISFACTORY CONDUCT OR PROGRESS

The House bill (section 10), but not the Senate amendment, would authorize the Administrator to discontinue payments on behalf of a veteran based upon a finding by the Administrator that the conduct or progress of the veteran is unsatisfactory due to circumstances within the control of the employer.

The compromise agreement does not contain this provision. The Committees note that, under section 8(b)(2)(A) of the compromise agreement, quarterly payments may not be made until the Administrator has received from the employer a certification that the veteran was employed by the employer during the period for which payment is to be made and that the veteran's performance and progress during that period were satisfactory. The Committees also note that such a certification is subject to investigation under section 12(c) and overpayment collection under section 8(c).

DISCONTINUANCE OF APPROVAL OF PARTICIPATION IN CERTAIN EMPLOYER PROGRAMS

Both the House bill (section 11) and the Senate amendment (new section 2109(a)) would provide a mechanism for the disapproval of further participation by veterans in a program of job training which, subsequent to its approval has fallen out of compliance with any of the requirements established under the legislation. The Senate amendment would authorize such disapproval (while the House bill would mandate it), and would establish a notice and hearing process to govern the disapproval process.

The compromise agreement (section 11) follows the Senate amendment.

INSPECTION OF RECORDS; INVESTIGATIONS

Both the House bill (section 12) and the Senate amendment (new section 2111(a)) would authorize examinations of the records and accounts of participating employers. The Senate amendment (new section 2111(b)) would also authorize the monitoring of program participants in order to determine compliance with the program requirements and investigation of any matter deemed necessary to determine compliance.

The compromise agreement (section 12 (a), (b), and (c)) follows the Senate amendment with an amendment adding a provision (section 12(d)), derived from the Senate amendment (new section 2102(b)), authorizing, but not requiring, the Administrator to enter into an agreement with the Secretary of Labor to provide for the administration of the provisions regarding monitoring and investigations, or any portion of those provisions, by the Department of Labor. Duties undertaken by the Department of Labor pursuant to such an agreement would be authorized to be carried out by any appropriate branch of the Department of Labor, notwithstanding the general requirement, contained in section 4(b) of the compromise agreement, that the responsibilities of the Secretary of Labor under the compromise agreement be carried out by the Assistant Secretary of Labor for Veterans' Employment.

COORDINATION WITH OTHER PROGRAMS

The House bill (section 14) would provide that a veteran may not receive benefits both under the House bill and under chapters 31 (relating to training and rehabilitation for veterans with service connected disabilities), 32 (relating to post-Vietnam era veterans' educational assistance), 34 (relating to the so-called "Vietnam-era GI Bill"), or 35 (relating to survivors' and dependents' educational assistance) of title 38, or chapter 107 of title 10 (relating to educational assistance for current enlistees), for the same period.

The Senate amendment (new section 2108(d) (1) and (2)) would similarly preclude simultaneous payments of assistance under the Senate amendment and under chapter 31 or 34, under chapter 36 (which includes provisions for the payment of Vietnam-era GI Bill benefits for correspondence courses and for apprenticeship or other on-job training) of title 38, or where the employer is receiving any other form of assistance on account of the training or employment of the veteran. The Senate amendment (section 2108(d)(3)), but not the House bill, would prohibit the payment of assistance under the Senate amendment where the veteran on behalf of whom assistance is to be paid had already completed a program of job training under the program that would be established by the Senate amendment.

The compromise agreement (section 13) follows the Senate amendment with additional references, derived from the House bill, to chapters 32 and 35 of title 38.

COUNSELING

The House bill (section 16), but not the Senate amendment, would require the Administrator and the Secretary of Labor to provide counseling services, upon request, to eligible veterans in order to assist them in selecting a suitable program of job training.

The compromise agreement (section 14) contains this provision, with an amendment authorizing, rather than requiring, the provision of such counseling services.

INFORMATION AND OUTREACH; USE OF AGENCY RESOURCES

Both the House bill (section 15) and the Senate amendment (new section 2110) would provide that the responsibilities for information and outreach would be shared between the Veterans' Administration and the Department of Labor. Information and outreach activities would be targeted toward both veterans and employers; would be coordinated with services and opportunities provided for under chapters 41 (relating to job counseling, training, and placement services for veterans) and 42 (relating to employment and training of disabled and Vietnam-era veterans) of title 38, and with resources and programs available under the Job Training Partnership Act (Public Law 97-300) and would emphasize reliance on disabled veterans' outreach program specialists and other personnel appointed under relevant provisions of title 38. The Senate amendment, but not the House bill, would require coordination of such information and outreach efforts with the Small Business Administration and with the Department of Education, would require the administering agencies to assist veterans and employers in completing applications and certifications, and would require the administering agencies to endeavor to achieve an equitable regional distribution of the limited training funds available.

The compromise agreement (section 15) would require the Administrator and the Secretary of Labor to conduct jointly an outreach and public information program directed to both veterans and employers, as well as to educational institutions and labor unions, and would assign to the Secretary of Labor primary responsibility for promoting the development of employment and job training opportunities. It would require the Administrator and the Secretary to coordinate outreach and public information activities with other job counseling, placement, job development, and other services available through the VA and the Department of Labor, as well as with similar services offered by other public agencies and organizations (including Federal agencies). It would require the Administrator of Veterans' Affairs and the Secretary of Labor to make available sufficient personnel for facilitating effective implementation and to provide assistance to veterans and employers making applications and completing certifications. Further, it would require the Secretary to make maximum use of personnel currently available through the Office of

the Assistant Secretary for Veterans' Employment and Resources under the Job Training Partnership Act. Finally, the Secretary would be required to request and obtain certain information from the Small Business Administration in order to promote maximum training opportunities for veterans.

The Senate amendment (new section 2110(b)), but not the House bill, would require efforts to achieve an equitable regional distribution of training opportunities.

The compromise agreement does not contain this provision. However, the Committees note their belief that it would be useful for consideration to be given to developing a mechanism, if feasible, for equitable distribution.

AUTHORIZATION OF APPROPRIATIONS

The House bill (section 19) would authorize the appropriation to the VA of $25 million for fiscal year 1983, $150 million for fiscal year 1984, and $150 million for fiscal year 1985, to carry out the House bill.

The Senate amendment (section 102) would authorize the appropriation to the VA of a total of $150 million for the purpose of making payments to employers under the Senate amendment.

The compromise agreement (section 16) would authorize the appropriation of $150 million for each of fiscal years 1984 and 1985 for the purpose of making payments under the compromise agreement, to remain available until September 30, 1986. The Committees note that these amounts have been specifically approved by the Congress for this purpose, in H. Con. Res. 91, the First Concurrent Resolution on the Budget for Fiscal Year 1984, and that such amounts have been set apart in that resolution from other amounts provided for in Function 700 for veterans' benefits and services generally.

The Committees expect that, if additional personnel ceilings and funds are necessary for the effective implementation of the provisions of the compromise agreement, the VA will request such additional ceilings and funds.

TERMINATION OF PROGRAM

The House bill program would (under section 18) be open to new veteran applicants during the 15-month period beginning July 1, 1983, and ending September 30, 1984. No assistance would be authorized to be paid after September 30, 1985.

The Senate amendment program would (under new section 2112) be open to new veteran applicants during the 12-month period beginning October 1, 1983, and ending September 30, 1984. No assistance would be authorized to be paid for any program commencing after December 31, 1984. The Senate amendment (section 101(c)) would also provide that, in the event that funds are not both appropriated and made available by the Office of Management and Budget (OMB) on or before the effective date, October 1, 1983, the termination dates for the program would be extended by periods equal to the period beginning October 1, 1983, and ending on the date funds are made available by OMB.

The compromise agreement (section 17) follows the Senate amendment.

EXPANSION OF TARGETED DELIMITING DATE EXTENSION

The House bill (section 13), but not the Senate amendment, would permit veterans, in lieu of participating in a program of job training, to pursue at an educational institution approved under chapter 34 of title 38 a full-time program of training with a vocational objective or a full-time associate degree program with a vocational objective. Such programs would be required to be of at least six-months duration and in an employment field where it is found that there is a specified level of probability of long-term employment. Payments for periods of such training would be made monthly to reimburse the veteran for the cost of tuition, fees, books, supplies, and equipment, but could not exceed $500 a month. Not more than $25 million could be obligated for such a program in any fiscal year.

The compromise agreement (section 18) would authorize the VA to provide educational assistance, using up to $25 million of funds appropriated under the compromise agreement, for the pursuit of an associate degree program (meeting the applicable title 38 requirements for such degree programs) with a predominantly vocational content. This assistance would be in the same amounts and be available under the same terms and conditions as are applicable to the pursuit of vocational objective courses under the targeted delimiting date extension provisions (section 1662(a)(3) of title 38) that were enacted in Public Law 97-72 and amended by Public Law 97-306 to provide certain Vietnam-era veterans whose GI Bill eligibility periods have expired a further opportunity to use their GI Bill benefits for vocational training. Thus, such assistance could be made available, until not later than December 31, 1984, for all Vietnam-era veterans who ever established GI Bill eligibility under chapter 34 of title 38 except in those cases in which it is determined that the veteran is not in need of the course involved in order to obtain a reasonably stable employment situation consistent with the veteran's abilities, aptitudes, and interests.

A ceiling of $25 million of the total of the amounts appropriated under section 17 for both fiscal years 1984 and 1985 would be placed on expenditures for such assistance; no statutory minimum would be established for such expenditures.

This assistance—as in the case of GI Bill educational assistance and contrasted with training assistance in connection with veterans' participation in programs of job training under the compromise agreement (which is payable to veterans' employers)—would be payable to veterans.

EFFECTIVE DATE

The House bill would (under section 19) take effect on July 1, 1983. The amendments to title 38, United States Code, that the Senate amendment would make to add a new chapter 44 would (under section 102) take effect on October 1, 1983.

The compromise agreement (section 19) has an October 1, 1983, effective date.

The Committees intend that the VA and the Department of Labor develop now the necessary regulations and procedures for implementing this legislation and expect that the entire $150 million authorized for fiscal year 1984 will be appropriated in the continuing resolution for fiscal year 1984. If the VA and the Department thus make the necessary preparations and funds are so appropriated, the program could begin on or about October 1, 1983.

VAREC REORGANIZATION

The Senate amendment, but not the House bill, would exempt the planned administrative reorganization of the Veterans' Administration Rehabilitation Engineering Center (VAREC) from the requirement, established under section 210(b)(2)(A) of title 38, that such reorganizations be proposed in a detailed report submitted to the appropriate Committees of Congress not later than the date that the President's budget is transmitted and not commence until the following October 1.

The compromise agreement does not contain this provision.

Mr. HAMMERSCHMIDT. Mr. Speaker, further reserving the right to object, I want to thank the gentleman for his explanation.

I congratulate the chairman of the Veterans Affairs Subcommittee on Education, Training and Employment, the gentleman from Texas (Mr. LEATH), and the ranking member, the gentleman from New York (Mr. SOLOMON) for their efforts in introducing and working so hard on this important measure.

At this time, under my reservation, Mr. Speaker, I yield to the gentleman from New York (Mr. SOLOMON), the ranking member.

Mr. SOLOMON. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the bill before the House, H.R. 2355, the Emergency Veterans Job Training Act. I would also like to commend my distinguished subcommittee chairman, Mr. LEATH, the chairman of the full Veterans Affairs Committee, the distinguished gentleman from Mississippi, Mr. MONTGOMERY, and of course, the distinguished ranking member of the full committee, Mr. HAMMERSCHMIDT, for their leadership and diligence in helping to bring this important measure before the House today.

Mr. Speaker, H.R. 2355 is not just another "recession relief" bill, or which we have seen so many this year. To the contrary, H.R. 2355 is designed to address a serious problem of long standing and grave dimensions—the problem of high unemployment among our active duty and service connected disabled veterans. This is not a problem created by the recession which is now virtually ended, but rather a problem that has existed for many years.

As has been pointed out already today, this measure will not create added bureaucracies, and it will not increase Federal intervention in private businesses. Instead, H.R. 2355 is simple in approach and modest in cost. It simply authorizes an expansion of existing on-the-job training programs already administered by the Veterans' Administration. These VA employment training programs have already proved themselves to be highly successful in leading to worthwhile, permanent careers. The VA is prepared to move swiftly to fully implement the expansion of training programs authorized by this bill, with no major staff additions or administrative delays.

This is a carefully drafted approach to a problem that we have studied and

investigated in great depth during hearings earlier this year.

I strongly urge my colleagues to lend their wholehearted support to this legislation.

Mr. HAMMERSCHMIDT. Further reserving the right to object, Mr. Speaker, I commend the distinguished chairman of our full committee, the gentleman from Mississippi (Mr. MONTGOMERY) for his usual excellent leadership.

I yield to the gentleman if he has any further remarks to make at this time.

Mr. MONTGOMERY. Mr. Speaker, I would say there were only 10 Members who voted against this bill. Over 400 voted for it when it came up several months ago. This would be a great help to the Vietnam and Korean veterans and I certainly hope that we can get this unanimous request.

Mr. HAMMERSCHMIDT. Mr. Speaker, further reserving the right to object, as the distinguished chairman of the House Veterans' Affairs Committee and the subcommittee chairman has indicated, we have before us today a modest approach to addressing the problem of chronically high unemployment among some of our active duty and service-connected disabled veterans.

I congratulate the chairman of the Veterans' Affairs Subcommittee on Education, Training, and Employment, the gentleman from Texas (Mr. LEATH), and the ranking member, the gentleman from New York (Mr. SOLOMON), for their efforts in introducing and working so hard on this important measure. And of course, I commend the distinguished chairman of our full committee, the gentleman from Mississippi (Mr. MONTGOMERY), for his usual excellent leadership.

Mr. Speaker, the bill before us today is carefully designed to correct the unacceptable unemployment rates among our Nation's veterans. H.R. 2355 is a cautiously drafted, modest approach to providing useful on-the-job training. The term "on-the-job training" is chosen purposefully to underscore the point that by passing this bill today, we are not creating more public works jobs or make-work positions with Government entities.

Instead, this bill will expand existing VA on-the-job training programs, placing eligible veterans with private businesses across the United States.

I would also like to stress to my colleagues that the program expansion authorized under H.R. 2355 is ready to be fully implemented almost immediately. During hearings on this proposal, the Veterans' Administration testified that administrative costs will consume less than 3 percent of the total amount of funds authorized.

Mr. Speaker, I think we can all agree that this is a reasonable approach to a problem which has been fully studied by our Veterans' Affairs Committee. Favorable action on H.R. 2355 will mean substantive progress in helping our unemployed veterans train for jobs in growth industries.

I strongly urge passage of this legislation.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi that the amendments be considered as read and printed in the RECORD?

There was no objection.

The SPEAKER pro tempore. Is there objection to the initial request of the gentleman from Mississippi?

There was no objection.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous material on the legislation just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

EIGHTH ANNUAL REPORT OF NUCLEAR REGULATORY COMMISSION FOR FISCAL YEAR 1982—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES

The SPEAKER pro tempore laid before the House the following message from the President of the United States; which was read, and together with the accompanying papers, without objection, referred to the Committee on Interior and Insular Affairs and the Committee on Energy and Commerce.

(For message, see proceedings of the Senate of today, Tuesday, August 2, 1983.)

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to clause 5 of rule I, the Chair will now put the question on each motion on which further proceedings were postponed on Monday, August 1, 1983, in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 3409, by the yeas and nays;

H.R. 3564, by the yeas and nays;

H. Con. Res. 40, by the yeas and nays; and

S. 64, by the yeas and nays.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

FEDERAL SUPPLEMENTAL COMPENSATION ACT AMENDMENTS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 3409, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Illinois (Mr. ROSTENKOWSKI) that the House suspend the rules and pass the bill, H.R. 3409, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 338, nays 84, not voting 11, as follows:

[Roll No. 300]

YEAS—338

Ackerman	DeWine	Horton

□ 1300

Messrs. McDADE, BATEMAN, and LEWIS of Florida changed their votes from "yea" to "nay."

Messrs. BONKER, McGRATH, LENT, and CORCORAN changed their votes from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will reduce to a minimum of 5 minutes the period of time within which a vote by electronic device may be taken on all the additional motions to suspend the rules on which the Chair has postponed further proceedings.

ANNOUNCEMENT OF ACREAGE LIMITATION AND SET-ASIDE PROGRAMS

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 3564, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas (Mr. DE LA GARZA) that the House suspend the rules and pass the bill, H.R. 3564, as amended, on which the yeas and nays are ordered.

The Chair will announce that this is a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 329, nays 93, not voting 11, as follows:

□ 1315

Messrs. HORTON, BURTON of Indiana, and WYDEN changed their votes from "yea" to "nay".

Mr. CAMPBELL and Mr. LEVITAS changed their votes from "nay" to "yea".

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title of the bill was amended so as to read: "A bill to require the Secretary of Agriculture to make an earlier announcement of the 1984 crop feed grain program and of the 1985 crop wheat and feed grain programs."

A motion to reconsider was laid on the table.

MAINTAINING CURRENT EFFORTS IN FEDERAL NUTRITION PROGRAMS TO PREVENT INCREASES IN DOMESTIC HUNGER

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and agreeing to the concurent resolution (H. Con Res. 40) as amended.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Texas. (Mr. DE LA GARZA) that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 40) as amended, on which the yeas and nays are ordered.

This will be a 5-minute vote.

The vote was taken by electronic device, and there were—yeas 407, nays 16, not voting 10, as follows:

NOT VOTING—9

Goodling	Lundine	Siljander
Hansen (ID)	Rose	St Germain
Heftel	Savage	Weaver

So the Senate bill, as amended, was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF H.R. 2250

Mr. DICKS. Mr. Speaker, I ask unanimous consent that my name be removed from the list of cosponsors of the bill, H.R. 2250.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

DESIGNATION OF THE BIRTHDAY OF MARTIN LUTHER KING, JR., AS A LEGAL PUBLIC HOLIDAY

Mrs. HALL of Indiana. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3706), to amend title 5, United States Code, to make the birthday of Martin Luther King, Jr., a legal public holiday.

The Clerk read as follows:

H.R. 3706

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 6103(a) of title 5, United States Code, is amended by inserting immediately below the item relating to New Year's Day the following:

"Birthday of Martin Luther King, Jr., the third Monday in January.".

SEC. 2. The amendment made by the first section of this Act shall take effect on the first January 1 that occurs after the two-year period following the date of the enactment of this Act.

The SPEAKER pro tempore. Does the gentlewoman from Indiana include an amendment in her motion?

Mrs. HALL of Indiana. Mr. Speaker, I do not.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentlewoman from Indiana (Mrs. HALL) will be recognized for 20 minutes, and the gentleman from California (Mr. DANNEMEYER) will be recognized for 20 minutes.

The Chair recognizes the gentlewoman from Indiana (Mrs. HALL).

□ 1340

Mrs. HALL of Indiana. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3345 designates the third Monday in January of each year a legal public holiday to commemorate the birthday of Dr. Martin Luther King, Jr., to take effect on the first January that occurs 2 years after enactment.

Martin Luther King gave to this great Nation a new understanding of equality and justice for all. He taught us that our democratic principles could be seriously impaired if they were not applied equally, and that tailoring these principles through nonviolence would have a lasting effect.

Mr. Speaker, the legislation before us will act as a national commitment to Dr. King's vision and determination for an ideal America, which he spoke of the night before his death, where equality will always prevail.

Next year marks the 20th anniversary of Dr. Martin Luther King's Nobel Peace Prize Award, where he was recognized by all people of the world for bringing about a peaceful social revolution which changed the hearts and minds of men and women everywhere.

Mr. Speaker, the time is before us to show what we believe, that justice and equality must continue to prevail, not only as individuals, but as the greatest Nation in this world. It is America's turn to say thank you to Dr. Martin Luther King, Jr., and it is our duty as elected Representatives to nationalize this tribute.

H.R. 3345 has received overwhelming support from both the Committee on Post Office and Civil Service and the Subcommittee on the Census and Population, by reporting this bill to the House of Representatives with only one dissenting vote. I urge my colleagues to recognize the bipartisan support this legislation carries.

Mr. Speaker, let us all hold the memory of Dr. King and his vital contributions to this country in the highest esteem by supporting the Martin Luther King, Jr., public holiday.

Mr. Speaker, I urge the House to approve this legislation and I reserve the balance of my time.

Mr. DANNEMEYER. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I rise in support of an amendment to this bill that would designate the third Sunday in January as the date on which we recognize and honor the contribution of Dr. Martin Luther King, Jr., to this country. Unfortunately, that amendment is not in order under the procedure under which we are proceeding; namely, the suspension procedure, and it is for this reason that reluctantly I must oppose this measure in the form that it is brought to us at this time.

It is interesting that the given name of Martin Luther King, Sr., the father of Martin Luther King, Jr., was Michael; Michael King decided to become a great preacher, so he looked back in history to select the name of a great preacher and theologian, and he choose Martin Luther. That is how Michael King become Martin Luther King, Sr.

And since the man that we are talking about today, Mr. Martin Luther King, Jr., is named after a great name in the history of Western civilization, Martin Luther, I thought it would be appropriate to draw an analogy between these two men.

For example, Martin Luther was a great preacher. So was Martin Luther King, Jr. Martin Luther was a reformer. In the 16th century he brought great reform to the church as it existed at the time. Martin Luther King, Jr., has also brought reform to this country in the form of raising the sights and attitudes of people to recognize that we Americans are committed to the enjoyment of civil rights for all people.

Martin Luther was a great political leader of his time. Out of the thoughts which he brought to Western civilization came the writings that ultimately found their way in the Declaration of Independence and the Constitution of this country. Martin Luther King, Jr., was also a great political leader of his time.

Martin Luther was a theologian and a hymn writer and the translater. I do not think it has ever been said of Martin Luther King, Jr., that he was involved in these activities.

And the reason that I made this analogy is quite simple. Our society has chosen to recognize the contributions that Martin Luther made to Western civilization. How? The fourth Sunday in October is historically recognized in Germany, the birthplace of Martin Luther, and in this country and throughout Christiandom as Reformation Sunday. And if our society can recognize the contributions of Martin Luther on a Sunday in October, it would seem appropriate and fitting that we recognize the contributions of Martin Luther King, Jr., on a similar day in our society.

We have nine holidays in this country. Three of them relate to recognition of persons—Washington's Birthday, Columbus Day and Christmas Day. These persons whom we recognize on these 3 days are, of course, noted in history. I question whether or not the contribution of Martin Luther King, Jr., is of equal stature to these three persons.

The House considered this matter 4 years ago. When it was brought up on suspension 4 years ago, it was defeated, and then subsequently came up under a rule, and we adopted an amendment. By a vote of 207 to 191, we adopted the third Sunday in January as the day on which we recognized Dr. Martin Luther King, Jr.

It has been estimated that the cost of this to the taxpayers, Federal taxpayers, is $225 million in lost productivity in our Federal work force, per year. The private sector loss has been estimated at three times this amount.

And my final point is that the administration is opposed to the bill in its present form, that is, being brought up under the Suspension Calendar. The administration prefers that the bill be brought up under the amendment process so that amendments can be offered and considered, and let the House work its will in that form rather than under the suspension process that we now have before us.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentleman from Maryland (Mr. MITCHELL).

Mr. MITCHELL. Mr. Speaker, I cannot really say what I want to say in 1 minute. It is impossible. I can just point out to you that when I was a young man I dreamed that the only way I could participate in this society was by being a revolutionist. I was absolutely convinced that the only way I would achieve equality in this Nation was by armed warfare. I was convinced of that because I was segregated in my schools, I had been segregated in the military, I had been segregated in my neighborhood.

When I was a young man I had absolute contempt for those older blacks who had been so brutalized and debased by this evil thing in this Nation that they were what we called Uncle Toms—stripped away of almost any sense of manhood, personhood, and womanhood.

And then came this man King, who somehow or another took that young militant and said to him: There is another way through nonviolence. He lifted a whole nation, a whole race of people. And more importantly than that, he took the tenets of the Judeo-Christian ethic and turned them into a weapon that changed the face of this Nation, and indeed the world.

What do you mean, "cost"? What was the cost of keeping us blacks where we were? All these extraneous things do not mean a thing to me. I am talking about what is the right and decent thing to do, and to urge a vote for this bill in the form that it is.

Mr. DANNEMEYER. Mr. Speaker, I yield 2 minutes to the gentleman from New Jersey (Mr. COURTER).

Mr. COURTER. Mr. Speaker, first, I would like to ask the gentlewoman from Indiana (Mrs. HALL) for 1 additional minute.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentleman from New Jersey (Mr. COURTER).

Mr. HOYER. Mr. Speaker, will the gentleman yield?

Mr. COURTER. I yield to the gentleman from Maryland.

Mr. HOYER. Mr. Speaker, I rise in support of passage of this bill.

Mr. Speaker, 20 years ago this month, Dr. Martin Luther King, Jr., led over half a million people to the Nation's Capital to sound a joint declaration of protest: That America had defaulted on a promissory note to which all Americans were to have been heirs. That note contained the promise that all men and women would enjoy the riches of freedom and the security of justice.

But as he spoke the words which have become as integral a part of American history as the Great Lincoln and Douglas debates, Dr. King reminded us that for far too long, the benefits of liberty and opportunity—the basis of our democratic state—had been routinely denied to impoverished Americans, the overwhelming majority of whom were black.

Twenty years ago this month, Dr. Martin Luther King was able to pierce the veil of withering injustice and visualize a nation, his nation, where man's inhumanity to man would not flourish. As he shared with us his vision, he challenged each of us to make ours a world where "we will be able to work together, to pray together, to struggle together, to go to jail together, to stand up for freedom together, knowing that we will be free one day."

In challenging us to work toward greatness, Dr. King planted the seed whose progeny will endure as long as the struggle against injustice endures.

Tragically, we find that 20 years later the disparity between the haves and the have nots is even greater. Within our borders, poverty is more and more a condition suffered by women and minorities and families are feeling the oppression of an economic crisis unparalleled since the Great Depression.

There is much work to be done, and while the dreamer has been silenced by an assassin's bullet, 20 years later his words live on with new applications to new oppression. The challenge is for us now to act in a responsible manner to insure that Dr. King and

his dream for his America—our America—are not forgotten.

Mr. Speaker, I am pleased to rise in support for the legislation making the third Monday in January a national holiday to celebrate the life and words of Dr. Martin Luther King, Jr. As a Federal holiday, each year we will be reminded of the higher goals and ideals which form the basis of this Nation. Each year we will be reminded of the path along which we have come and will see the new path to be forged ahead in our goal of freedom and justice for all people.

Mr. Speaker, Dr. King's contribution to our heritage was immeasurable. He forced us to see our faults, when we did not wish to see them. Yet he was able to address them in a manner in which we all came to see was a voice for opportunties that America needed to heed in order to continue to demonstrate her greatness.

Today, 20 years after the march on Washington, we have an opportunity to say to those for whom Dr. King's struggle meant the most—we have heard, and we will strive to make his America a reality. And if we continue to try, then his dream will live. For his contribution, a Federal holiday is only a small part in bringing that dream to reality. Such recognition, however, is the only fitting recognition for a man who has done so much for our Nation.

I urge my colleagues to support this legislation and to support our continued efforts to provide all Americans with the reality of liberty and the guarantee of justice.

Mr. COURTER. Mr. Speaker, I would like to make it clear that I am against bringing the legislation to the floor under suspension of the rule. My feeling on this point stems from my concern about the proliferation of the number of legal holidays we have in the United States.

In the past several months I have attempted to work out a compromise for this particular bill which would freeze the number of legal holidays to 9 rather than permitting their increase to 10 and then perhaps one day to 11 or 12.

A number of proposals were considered to this end. But all proved to be unworkable, for one reason or another. In addition, I was concerned that no optional holiday format should have the effect of giving lesser concern and stature to the day for Martin Luther King. This was also my concern with the proposal to establish a Martin Luther King Day on a Sunday, which seems to me similar to the argument that you can ride on the bus but you have to go to the back.

Nevertheless, I continue to believe that Congress must in the very future place a limit on the number of legal public holidays created in this country.

□ 1350

To this end, I have introduced legislation today to do just that, freezing the number of holidays not at the present 9, but permitting 1 more for Dr. King, but then freezing it at 10.

Mr. Speaker, Dr. King had a dream of equality, equality of rights and opportunities for all children. It was for this dream that Dr. King lived, and it was for this dream that he died. It has been 15 years since the assassination of Dr. King, and his memory has only grown in stature. The impact of his gospel has grown in historical perspective.

Martin Luther King taught us that the greatest power in human history is not the power of armies or generals, but the power of one individual with moral strength. Dr. King asked for a society which judged men and women not by the color of their skin, but by the content of their character.

A holiday honoring Dr. Martin Luther King would acknowledge our debt to this great man and our national acceptance of his dream, a dream of a society free from hatred, free from prejudice, and free from violence, where there is equal opportunity for all Americans.

The legislation before us, Mr. Speaker, calls for creating the third Monday in January as a day in honor of the memory of Dr. Martin Luther King not only because of the strength of his leadership and the courage of his commitment, but also because of the unique contribution he made to the fundamental principle that all people are created equal.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. GARCIA).

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. GARCIA. I yield to my colleague, the gentleman from New York.

Mr. ADDABBO. Mr. Speaker, once again we find ourselves considering a resolution honoring Dr. Martin Luther King, Jr. The obligation to pay tribute to Dr. King with a Federal holiday has been overdue for some time. Surely, Mr. Speaker, few Americans have ever done as much to heal this Nation in a time of lingering crisis.

When America showed signs of becoming a nation divided in hatred along racial, generational, and ideological lines, Dr. King fought that hatred. He reached across those barriers with a clear vision of a republic firmly grounded in equality, and justice. Without violence indeed, with a powerful gentleness that demanded attention, Dr. King forced an entire country to see, some for the first time, the many injustices lurking within our system.

Mr. Speaker, Dr. King sought truth as the means to end injustice. No higher example can be found of a man's dedication to his country.

A Federal holiday honoring Dr. King will keep his actions, his methods, his principles forever in the minds of Americans. It will insure the survival of those principles long after those of us with a vived memory of all he lived through, and died trying to solve, have made way for a new generation, molded by different experiences.

I have cosponsored resolutions honoring Dr. King in this way many times, and proudly do so again. I urge my fellow Members to give this resolution their full support, in the hope that we, in the spirit of Dr. King, can rekindle and maintain the commitment to equality so necessary in our struggle to build a truly just society.

Mr. STRATTON. Mr. Speaker, will the gentleman yield?

Mr. GARCIA. I yield to my colleague, the gentleman from new York.

Mr. STRATTON. Mr. Speaker, I rise in favor of the bill.

Mr. Speaker, as the original author of the Monday holiday legislation, I am delighted that the bill before us now proposes to honor the late Dr. King with a Monday holiday.

In fact, when the movement to create a national holiday on the birthdate of Dr. Martin Luther King, Jr., was first proposed, I recall a meeting of clergy and laymen that was convened in Albany, N.Y. in early January 1971, at the Sweet Pilgrim Baptist Church to generate support, for the proposal. When I was called on during the meeting to express my views, I expressed my strong support, as a longtime admirer of Dr. King, and then suggested that the most appropriated and acceptable procedure might be to make the King holiday a Monday holiday. This suggestion received the enthusiastic support of the assembled guests.

Shortly thereafter I introduced a bill to that effect, and over the years I have pressed for that solution.

I therefore want to commend the gentlelady from Indiana (Mrs. HALL) for her sponsorship of this legislation. And I would also point out that this arrangement places the commemoration of Dr. King on the very same place as we commemorate the discoverer of America, Christopher Columbus, the Father of his Country, George Washington, and the preserver of the Union, Abraham Lincoln.

Surely this is in my opinion, the finest possible tribute that a grateful Government can pay to Dr. King.

Mr. DOWNEY of New York. Mr. Speaker, will the gentleman yield?

Mr. GARCIA. I yield to the gentleman from New York.

Mr. DOWNEY of New York. Mr. Speaker, what an outrage. Can you imagine anything more preposterous than not recognizing one of the greatest men of all time. Peacemakers are God's children they allow all of us to

live and love. We have nothing without them. Who can we consider something or cross or cost compared to the limitless contributions of Dr. King.

Mr. GARCIA. Mr. Speaker, in the 1 minute that is allowed to me, I just want to make it very clear to my colleague from Indiana, having been down this road twice before as the floor manager of this bill, I want to congratulate her because of all the hard work that she has done.

Let me go a step further with my colleagues here. The question about whether Dr. Martin Luther King deserves a national holiday is one that, as far as I am concerned, means a resounding yes. To many of us, especially myself, I was elected to the New York State Legislature in 1965 as a result of the Voting Rights Act which passed in 1964. Had it not been for the work of Martin Luther King, walking the corridors of Congress to get that Voting Rights Act through, many of us in this Congress, especially those with brown faces and black faces, would not be sitting here today.

On behalf of this legislation, I believe that this holiday is long overdue.

Mr. Speaker, the issue today is clear cut: is Dr. Martin Luther King, Jr., deserving of a national holiday bearing his name and dedicated to his memory? The answer is a resounding "Yes."

Believe me, I have heard all the arguments against this bill; the costs are too great, the man is too controversial; the legacy is unsettled; and so forth. We have heard them before and they most asssuredly will be heard today. Yet we, who are the beneficiaries of Dr. King's long march for justice and equality, are unmoved and unsympathetic to such attacks which can only be described as weak attempts to discredit the memory and contributions of this great American.

King's greatness is measured not only in the causes and struggles he championed, but in the spirit he aroused and the response he evoked from the American people to his lifelong pilgrimage for justice and equality.

Dr. King's struggle on behalf of black Americans evolved into a crusade for all Americans who were unemployed, poorly housed, disenfranchised, uneducated or undernourished.

Dr. King forced the Nation to confront these problems, and devise fair and compassionate remedies at a time when it would have been far easier to look the other way. But Dr. King would not let us look away. He challenged us to join his march and bring America's underclass and underprivileged out from shadows of discrimination and into the Nation's mainstream.

He made us look into the faces of America's homeless, its poor and unfed and not turn away—and then he made us act because it was the only right thing to do.

That simply is the choice for us today: to do the right thing and pass this bill.

I am as convinced as even before that the spirit of Dr. King lives on, and the commitment to pursue his goals grows stronger with the passage of time. It is up to us, his beneficiaries, to see that his spirit lives on and his work progresses until the dimensions of Dr. King's dream are fully realized by all Americans.

I urge my colleagues to support this legislation.

Mr. DANNEMEYER. Mr. Speaker, I yield such time as he may consume to my colleague, the gentleman from South Carolina (Mr. CAMPBELL).

Mr. CAMPBELL. Mr. Speaker, it is with a great sense of regret that I cast my vote today against H.R. 3706, designating the third Monday of January as a Federal holiday commemorating Dr. Martin Luther King, Jr. The fact is, I believe that Dr. King made significant contributions to the cause of equal rights, and I believe as strongly as anyone that it is entirely appropriate that he be honored. I have proved this with my votes in favor of a Sunday holiday to recognize his accomplishments and to provide for a statue of Dr. King in the U.S. Capitol.

But I cannot in good conscience vote to create another paid holiday which will, according to the Library of Congress, cost this Nation's taxpayers $270 million for the pay and benefits and lost productivity of Federal workers alone, and up to another $796 million assuming State and local governments follow Washington's lead. That is a combined cost to the taxpayers of over $1 billion in direct costs and lost productivity. If one takes the gross national product, which last year was over $3 trillion, and divides it by the number of working days in a year (about 250), the potential cost to the whole of American society for another holiday is a staggering $12 billion. Now, I do not think the pricetag would reach that level, but the top dollar cost potential is a figure that must be considered.

I cannot in good conscience vote to create a paid holiday which would honor an individual, when no other American is so honored now that George Washington's Birthday has been redesignated President's Day.

And, I cannot in good conscience vote to send exactly the wrong signal when our economy is beginning to come around and productivity is finally on the rise.

Mr. Speaker, surely the great majority of us do want to honor Dr. King's memory and his contributions, but many of us also see the economic pitfall of creating another day of idleness for the American workforce. Very frankly, I resent those who would question our motivations. I resent the tactics of the leadership who have denied us the chance to vote for a Sunday day of commemoration which would be so appropriate for a man who was an ordained minister of the Gospel and which is equally as appropriate as the Monday holiday proposed which would not even fall on Dr. King's birthday. I have to question if there is not a political motivation here, one that is particularly ugly in that it calls into question what should be unquestioned—the nearly universal respect of the American people and the Congress for Dr. King's memory and accomplishments.

In fact, Mr. Speaker, that is not the issue. The issue is only whether the holiday should fall on a weekday with substantial costs to our national economy, or whether we should designate the holiday on a Sunday. To me, the answer is clear. Shutting down the productive machine of this country would hurt most those that Dr. King was concerned about. Indeed, I believe Dr. King himself would far rather see tax dollars going to programs with real and tangible benefits to the Nation's needy.

I do not agree with everything Dr. King did, but I do acknowledge his great contributions to the black community and to achieving equal rights and opportunity for all. I do agree that he should be honored, either by a Sunday holdiay or perhaps by changing one of our other holidays to Heroes' Day. Finally, however, I had to reject the spending priority embodied in H.R. 3706 which would have us allocate up to $12 billion in lost production for a symbolic gesture which will not provide food nor jobs or security for those in need.

Mr. DANNEMEYER. Mr. Speaker, how much time has the minority consumed so far?

The SPEAKER pro tempore. The Chair will state that the gentleman has 13 minutes remaining.

Mr. DANNEMEYER. And Mr. Speaker, how much time does the majority have remaining?

The SPEAKER pro tempore. The gentlewoman from Indiana (Mrs. HALL) has 16 minutes remaining.

Mr. DANNEMEYER. Then perhaps the gentlewoman from Indiana (Mrs. HALL) should take some time at this time. Would that be appropriate?

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentlewoman from California (Mrs. BURTON).

Mr. FORD of Tennessee. Mr. Speaker, will the gentlewoman yield?

Mrs. BURTON of California. I yield to the gentleman from Tennessee.

Mr. FORD of Tennessee. Mr. Speaker, I rise in support of H.R. 3706, the Martin Luther King, Jr., holiday bill, and urge my colleagues to support this legislation. I wish to commend my col-

league Congresswoman KATIE HALL for her efforts in bringing this bill to the floor. However, I do wish to state for the record that this bill, which designates the third Monday of January of each year as a legal public holiday to commemorate the birthday of Martin Luther King, does not provide the full status of a national public holiday, and will not even conform to the 17 States, the District of Columbia, and the Virgin Islands, and the hundreds of cities, municipalities, and institutions across the Nation that have made his actual birth date a time of formal observance.

I will continue to support consistent efforts being made now and in prior Congresses to have Dr. King's actual birthday designated as a national holiday. The first bill to recognize the birthday of Dr. Martin Luther King, Jr., was introduced 15 years ago in 1968 by Congressman JOHN CONYERS. And, each year thereafter, Mr. CONYERS has introduced a bill to designate Dr. King's actual birthday a national holiday. In my 9 years of serving in the Congress, I have always supported legislation that would establish January 15 as a national public holiday in honor of Dr. King, and I wish to commend Mr. CONYERS for his unrelenting efforts and determination in introducing and pursuing the establishment of a King national holiday.

Fifteen years have passed since Dr. King's tragic assassination in my home city of Memphis. Dr. King devoted his entire life to the struggle for human rights and justice for all mankind. Arrested frequently, physically abused, and constantly threatened with the possibility of death, Dr. King never ceased his fight for our freedom. He perceived a dream and called on us to realize it, an American fitted to the specifications of its own constitution and ideals. Martin Luther King, a national figure dedicated to dependence on democratic processes, morality and nonviolence as a method of protest, epitomized the American political philosophy.

What remains is to make Dr. King's actual birthday a national holiday, to permit the Nation as a whole to commemorate his life and to reflect upon, and rededicate itself to, the ideals that he lived and gave his life for on the very date of his birth.

The mood of Congress and the country can only be called tragic if monetary or other concerns are placed above such ideals as justice and human rights. Anything less than a full legal holiday is an affront to the millions of Americans, black and white, who regard Dr. King as the individual who had the greatest positive impact on American life in this century. His supporters in the Congress will continue to push for a fitting memorial for him on the date of his birth.

Mr. PATTERSON. Mr. Speaker, will the gentlewoman yield?

Mrs. BURTON of California. I yield to the gentleman from California.

Mr. PATTERSON. Mr. Speaker, I rise in support of this legislation.

Mr. Speaker, as a sponsor of legislation to honor the achievements and the ideals of the late Dr. Martin Luther King, Jr., I am a proud American, ready to vote to designate his birthday as a national holiday.

It is fitting that we take this long overdue action as we approach the 20th anniversary, on August 27, of Dr. King's historic march on Washington—a march in which he proved himself to be a drum major for equality and for peace.

Dr. King's famous "I Have a Dream" speech, delivered on the steps of the Lincoln Memorial, has inspired many generations to continue the quest for equality and peace. Indeed, the speech had a profound effect on me and contributed to my embarking on a public service career to work toward these American ideals.

The history of mankind, it is said, records the course of human events, influenced and shaped by its leaders. Dr. King will surely be recorded for posterity as one who influenced and shaped the course of history in this century.

But I am not here so much to praise Dr. King, the man. His courage, dedication, and conviction have been well documented. Posthumously, he has earned the highest honors, including the Nobel Prize.

I am here to urge my colleagues to approve the legislation before us today to demonstrate our commitment to the ideals which inspired Dr. King—applied equality, nonviolence in the political and social processes, and human rights.

Dr. King supported the basic tenets of our Constitution, the right of equality and freedom for all. He was the spokesperson for minorities, the disenfranchised, and the poor. The Civil Rights Act is a living memorial to Dr. King's determination. Because of his work, many people have a better way of life.

Now, more than ever, we need to reflect and renew our commitment to Dr. King's goals. Over the last 30 months, the White House has tried to turn back the clock on gains we have made for civil rights. For example, the President supports a subsidy to private schools that discriminate racially, at the expense of public education. The administration has targeted tax cuts to the rich and budget cuts to the poor. Black unemployment has climbed to 20 percent. Working women earn only 59 cents on every dollar earned by their male counterparts. We must demand from our President, and other leaders, a renewed commitment to justice and equality for all.

Dr. King's commitment to peace in the struggle for freedom is even more poignant today. In 1983, we must approach our problems abroad through a determined program of conflict resolution. In a world where nuclear stockpiles threaten our very existence, the importance of peace is paramount.

Finally the lesson we should learn from Dr. King's life is that we cannot close our eyes to the plight of the poor and oppressed people in our Nation and throughout the world. When a nation loses its regard for human rights, it loses its standing in the global community, and with its own people. America must set an example that our less fortunate neighbors can follow. We must help the developing countries and insist on respect for human rights.

America must turn Dr. King's dreams, for equality, peace, and human rights, into reality for the benefit of all. Declaring this great man's birthday a national holiday is a positive step in the right direction. It shows our neighbors that we are a nation truly committed to the ideals of peace and equality—at home and abroad.

Mrs. BURTON of California. Mr. Speaker, I speak today for the first time in my brief career as a Member of the House in support of a bill of major symbolic importance to this Nation—establishing Martin Luther King, Jr's., birthday as a national holiday. Recognizing Dr. King in this way will affirm this country's commitment to the rights of all men and women and to the pursuit of world peace.

Dr. King was a man of enormous courage and wisdom. Like Ghandi, he was truly among the great men of peace. He was the first civil rights leader to speak out against the war in Vietnam—an action which was condemed by many, both black and white. But he had the courage to do what was right and the vision to see that war is always begun by those in power but is fought by the powerless. As we find ourselves on the verge of another ill-advised military adventure, it is especially important to remember Dr. King.

I fervently hope the House passes this legislation and gets on with the effort to realize Dr. King's dream of racial, social, and economic justice.

Mr. Speaker, I yield the balance of my time to the gentleman from Georgia (Mr. WYCHE FOWLER).

The SPEAKER pro tempore. Without objection, the gentleman from Georgia (Mr. FOWLER) is recognized for one-half minute.

There was no objection.

Mr. FOWLER. Mr. Speaker, I believe that history will attest that the greatness of a nation is not measured by the esteem in which it holds it politicians and its generals, but how it

treats its prophets and its poets. Martin Luther King, Jr., was a prophet and a poet and a patriot.

By honoring him, we honor all Americans of whatever color or faith who believe that the greatness of our country is living up to our patriotism by adhering to our principles.

Mr. RANGEL. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from New York.

Mr. RANGEL. Mr. Speaker, I rise to express my great joy and satisfaction that the House of Representatives has finally voted to honor Dr. Martin Luther King's legacy. By declaring his birthday a national holiday, we have made certain that his day will be forever enshrined.

Dr. King was the greatest advocate for peace in U.S. history, an advocate for the equality of all men regardless of race, class, or nationality. The American dream was enriched by his philosophy of brotherhood. If his memory is to live on to nourish this dream, we must be reminded of him periodically. This is the essence of why we did the right thing today. His memory will remain long after this generation has passed away, and his dream will never die.

The course of history was changed by this great man's dedication to his cause. Who can say what would have happened had he not committed himself to lifting up his people? We must never forget that it was for their sake that he lived, and for their sake that he was struck down. I hope that we never forget this.

Mr. WOLPE. Mr. Speaker, will the gentleman yield?

Mr. FLOWER. I yield to the gentleman from Michigan.

Mr. WOLPE. Mr. Speaker, I rise in strong support of this legislation.

In establishing a Martin Luther King national holiday, we will not only be giving recognition to the life and accomplishments of a truly great American, but we will be providing a living memorial that can serve to inspire both present and future generations of Americans to a renewed dedication to the principle upon which this Nation was founded.

Surely no contemporary American better exemplified—in his words and in his actions—American values and traditions. For Americans everywhere—black and white, young and old, North and South—Dr. King symbolized the best in the Nation: the continuing struggle to achieve a truly open society, in which all Americans will have an equal opportunity to achieve their full human potential; the commitment to an ultimately integrated society in which racial and ethnic and religious prejudice and discrimination will not limit the ability of Americans to learn from and to enjoy one another; the advocacy of nonviolent social change; the historical affirmation by Americans of the value and importance of the individual citizen.

I want to give particular emphasis to this last point, because in this period of public cynicism about politics and government, there is heard throughout our land the constant refrain that the individual citizen no longer counts in our country, that there is no way an individual can have impact on the economic and political decisions that affect all of our lives, that events are effectively out of control. Dr. Martin Luther King recognized, as have few other contemporary Americans, the ways in which such feelings of powerlessness can become their own self-fulfilling prophecy. His life was a direct and eloquent refutation of the alleged impotence of the individual citizen. It was a statement, by actual deeds, of the tremendous power available to a single individual who refuses to acquiesce to the established power, who refuses to accept social injustice in any form, and who is prepared to assume the risks that are inevitably associated with efforts to change the status quo.

There is a tendency to endow Martin Luther King with superhuman characteristics, but I suspect that Dr. King would far prefer to be remembered not for his extraordinary qualities, but his ordinary qualities; not for his strength but for his vulnerability; not for his courage, but for his fears. Because what Dr. King recognized, as few others have, is the revolutionary potential of a single individual's action and commitment.

He recognized, and showed us by his own personal example, that a single individual can make a difference—and that perfectly ordinary people, possessed of little more than a belief in themselves and in the rightness of their cause, and a willingness to accept risk; can turn our country around.

The establishment of a national holiday to pay tribute to the life of Dr. Martin Luther King is the least that can be done to assure that this message of commitment and inspiration will be forever before the American people.

Mr. CLAY. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from Missouri.

Mr. CLAY. Mr. Speaker, I rise in support of H.R. 3706. This legislation is very special for all who cannot forget America's commitment to social and economic justice. This legislation will bring the overdue recognition to a man who exemplifed what social justice is all about and who died as a result of that struggle.

This nonviolent apostle from Atlanta laid the foundation for the civil rights movement in our country and generated the drive for human rights around the world. He was a champion in the battles for equal treatment, in jobs, housing, and educational opportunities. He was a champion in the battles for peace and freedom.

I known, Mr. Speaker, and fellow Members of the House that it will come as no surprise to you to hear me say as a legislator who is uniquely affected by the possible outcome of this debate that I favor the passage of legislation which would declare a national holiday in Dr. King's honor. I do, however, want you to know that I see broader implications in our decision at this point in history pertaining to the very future, and destiny of, not only black and other similarly affected minorities, but of our Nation as a whole.

We as a nation are strong, but nonetheless divided by differing sociocultural, political, and economic backgrounds. Are we willing to continue our forward momentum in America's bold and noble attempt to achieve a free and just democratic society?

It is significant that a statement of his hope for the world was symbolized twenty years ago in this man's famous "I have a dream" speech right herein the Nation's Capitol. He proclaimed universal truth when he stated, "I hope that my 4 little children will not be judged by the color of their skin, but by the content of their character." Regrettably, 20 years later, Dr. King's four little children, now all young adults, are not judged by the content of their character, but by the color of their skin.

Dr. King's life has meaning for each of us today and we should all work diligently in order that a national holiday will be declared in his honor.

Mr. Speaker, I attended a national meeting the other day of individuals who are professionally involved in the cause of education, and to my surprise and amazement, one of the public school teachers, said, "Some of our young people who were born in the latter sixties and early seventies do not even know who Martin Luther King, Jr. is. This is both a shame and disgrace to all of America."

Mr. Speaker, we cannot allow this to happen. Dr. King was persistent in support of his dream and all of us are richer and stronger because of this nonviolent apostle from Atlanta.

Mr. Speaker, a national holiday declared in Dr. King's honor will not allow our young people to forget a man who laid the foundation for the civil rights movement in our country and generated the drive for human rights around the world. Mr Speaker, this would be a major failure on our part as legislators.

Dr. King's advocacy for "personhood" for all people is now dead. But he still lives. He lives in the hearts and minds of all people who treasure and support the sanctity of human life, human dignity, and social justice. If he were alive today, his voice would be

heard against the divisive and oppressive policies of the current administration. He would be in the forefront as a "drum major" for justice and for righteousness.

It is significant that Dr. King's remarkable contributions were fully in accord with and supportive of America's ideals and principles in our declaration of independence which declared more than 200 years ago that "all men are created equal, that they are endowed by their creator with certain inalienable rights, that among these are life, liberty, and the pursuit of happiness."

Dr. King's brilliant life gave meaning to this national declaration of liberty and justice. Further, he practiced nonviolence and initiated direct action reminding our country to live by the principles upon which it was founded. Dr. King awakened a nation that had for centuries deprived many Americans from participating in the social, economic, and political institutions of the society. His basic philosophy was that every man still does have his chance, his opportunity, his right to live, to work, to be himself and become whatever his manhood and courage combine to make him. This is the promise of America.

The dreamer is gone but the dream lives on. We can take hope in the fact that Dr. King, in the face of adversity and enormous oppression never quit, but he resolved to keep on serving human kind. He never allowed his dream to die as he worked from Montgomery to Memphis where he met his tragic end in 1968. His life, in the midst of manifold activities that confront poor Americans is a radiant example that love can conquer hate and unity can come from division. This should serve as a beacon for all of us in a period of travail.

Mr. Speaker, and esteemed fellow Members, I shall not use this occasion to castigate those who pretend not to hear the roar and demands for justice. I shall not reproach those who pretend that they cannot see a further need for honoring Dr. King and declaring a national holiday in his honor to insure that Americans do not forget the monumental contribution of this man.

I will not criticize those who do not see a need for such a holiday. Nor will I question the motives, wisdom, and patriotism of those who speak out in opposition to this legislation. Or worst yet, I do not begrudge those who dare not speak because of cowardice and trepidation. I can only hope that greater than any notions to the contrary, the principles of simple decency and fairness will ultimately prevail.

Let me say further, in paraphrasing a quote from William Lloyd Garrison, you can be certain that those Americans who support this legislation are in earnest on this issue—we will not equivocate, we will not excuse, we will not retreat a single inch.

Mr. Speaker, let the record show that I stand in favor of the declaration of a national legal public holiday in honor of Dr. Martin Luther King.

Let the record show, Mr. Speaker, that I stand shoulder to shoulder with all people of good conscience and firm convictions to work unceasingly for a better America.

Mrs. COLLINS. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to the gentlewoman from Illinois.

Mrs. COLLINS of Illinois. Mr. Speaker, I rise in strong support of this measure to make the birthday of Dr. Martin Luther King, Jr., a national holiday because it is long, long overdue.

In the sixties, during the awful times when I saw flashed across my television screen firemen turning water hoses on black Americans who were peacefully marching for their God-given rights, and policemen beating and dragging into paddywagons black men, women, and children as we sought our human rights, and segregationsists standing in the doorways of schools to keep blacks from becoming educated, and ax wielding restauranteurs standing menacingly in front of restaurants threatening blacks who tried to eat there, and so forth.

But the scene I remember the most Mr. Speaker, is that of a big burly white policeman snatching the American flag out of the hands of a tiny little black boy, who was struggling mightily to keep it. That, Mr. Speaker, is a picture which will forever stay in my mind because it so clearly portrayed the visceral feeling embodied in this issue. On one side of the issue was the little black boy proudly waving the flag of his country and holding on to it tightly. On the other side was the big bad white policeman snatching away his hopes and his dreams—telling him in no uncertain terms that America, the land of his birth, didn't want to include him among her citizenry.

Mr. Speaker, I sincerely believe that if we fail to pass this measure in the House today, we will have again snatched the flag out of the hands of black Americans. We will have again indicated to those black kids sitting up there in the galleries, to their parents and grandparents, and to all folk the world over that this body of our democractic government does not live up to the preamble of the Declaration of Independence: "that all men are created equal." To my colleagues I say: Let us not live with the shame any longer. Let us—all of us—vote for this long, overdue measure to recognize the greatness of the accomplishments of Dr. Martin Luther King, Jr.

Mr. FAUNTROY. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from the District of Columbia.

Mr. FAUNTROY. Mr. Speaker, it was Tchaikovsky who said of Marian Anderson: "A voice like this comes once in a hundred years." In the hearing room, where the Subcommittee on Census and Population marked up H.R. 3345 last month, there hang the pictures of two great Americans who were truly the men of their centuries. The first is that of George Washington, the founding father and first President of our great Republic. No one questions that he was indeed the man of the 18th century. The second is that of Abraham Lincoln. No one questions the fact that the valiant leadership of Abraham Lincoln as saving our Union made him the "Man of the 19th Century."

When the history of the 20th century is written, few will question the fact that Martin Luther King, Jr., was the singularly most important man, with the most important message for this, the most violent century in the history of mankind. That message was this: "We must either learn to live together as brothers or we are all going to perish together as fools."

That message and the life work of Dr. Martin Luther King, Jr., which shaped it, has made the name of Martin Luther King, Jr., a trigger to the deep longings of people in every corner of this globe, particularly those who have survived the savagery of war in Europe, in Asia, and on the continent of Africa. America honors herself when she honors this man of world renown with a legal holiday.

The New York Times captured his significance from his time when it wrote:

> It can be said of him as of few men in like positions, that he did not fear the weather and did not trim his sails, but instead challenged the wind itself to improve its direction and to cause it to blow more softly and more kindly over the world and its people.

There are those who say that nonviolence can never again be an effective tool for resolving human conflict; nevertheless, the vision of Martin Luther King, Jr., nags uncomfortably at the minds of statesmen and generals alike—a strange, brooding figure, standing somewhere in the distance with a beckoning truth, waiting for the world to catch up.

Favorable action of this measure today will assure that that truth will be forever etched in the mental skies of our everbroadening horizon as a nation.

It was Goethe who said:

> What we have inherited from our fathers, we must earn again for ourselves, else we lose it.

Let us pass this bill that generations unborn might be inspired as Martin Luther King, Jr., inspired us to

become answers to Josiah Holland's prayer:

GOD, GIVE US MEN!

God, give us men! A time like this demands
Strong minds, great hearts, true faith and ready hands;
Men whom the lust of office does not kill;
Men whom the spoils of office cannot buy;
Men who possess opinions and a will;
Men who have honor; men who will not lie;
Men who have can stand before a demagogue
And damn his treacherous flatteries without winking!
Tall men, sun-crowned, who live above the fog
In public duty and in private thinking;
For while the rabble, with their thumb-worn creeds,
Their large professions and their little deeds,
Mingle in selfish strife, lo! Freedom weeps,
Wrong rules the land and waiting justice sleeps.

Mr. CONTE. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from Massachusetts.

Mr. CONTE. Mr. Speaker, I rise in support of H.R. 3706, designating the birthday of Martin Luther King as a legal, public holiday.

Let me take this opportunity to commend the leadership of the gentlelady from Indiana (Mrs. HALL) for bringing this legislation to the House floor.

The work of Martin Luther King, Jr., and his followers had a tremendous impact on the history of this country. As a religious leader, Dr. King preached to a national congregation about the human dignity of every man and woman. As a civil rights advocate, he spoke out against the inequality and injustice in American society. As a national political figure, Martin Luther King led the civil rights movement in an effective, but nonviolent way, despite the hatred and violence he faced. His memory, his work, and his words have become a permanent part of this country's memory and conscience.

Most Americans agree—whatever political philosophy—that this man deserves special recognition. I can think of no better way to honor this great man, to remember his works and words, or to reflect on the progress that must be made in the future, than a national, Federal holiday. Any other tribute—an observance or remembrance day—would fall short of our duty to focus on the message of Martin Luther King, Jr.

Twenty years ago this month, Dr. King published his "Letter from the Birmingham Jail." To me, one sentence in this letter capsulizes the message of this man. King wrote: "Injustice anywhere is a threat to justice everywhere."

Mr. Speaker, since 1971, Dr. King's birthday has been a legal holiday in my own State of Massachusetts. I urge the House today to take the first step, to nationally recognize the accomplishments and contributions of Dr. Martin Luther King, Jr. I urge my colleagues to support H.R. 3706.

Mr. HUBBARD. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from Kentucky.

Mr. HUBBARD. Mr. Speaker, I rise today in support of this important legislation to designate the birthday of Dr. Martin Luther King, Jr., as a national holiday.

Through Dr. King's leadership and faith, the American people were made aware of the dangers of segregation and discrimination which had divided our country. Dr. King's ideals became real for millions in this Nation, and they sparked a nonviolent movement which sought peaceful change and the complete removal of barriers due to race, creed, or religion.

I support this legislation, Mr. Speaker. I believe we should establish this holiday in order to say to our fellow countrymen that Dr. King's ideals must still be pursued and that America will truly be a Nation undivided for one and all.

Mr. LEVIN of Michigan. Mr. Speaker, will the gentleman yield?

Mr. FOWLER. I yield to the gentleman from Michigan.

Mr. LEVIN of Michigan. Mr. Speaker, I rise in strong support of this legislation.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentleman from New Jersey (Mr. RODINO).

Mr. CONYERS. Mr. Speaker, will the gentleman yield?

Mr. Speaker, I rise in strong support of the bill.

The House of Representatives in considering legislation that would designate the birth date of Dr. Martin Luther King, Jr., a national holiday is taking a significant step in the direction of giving proper national recognition to one of our great leaders.

As you know, I have for at last 15 years been introducing legislation that would designate the birth date of Dr. King a national holiday. In each session of Congress since the initial introduction, the legislation has gained in support and is now again being considered by the House. I trust that my colleagues will support the legislation and join the great majority of Americans who presently support a national holiday in honoring of Dr. King. We would be joining 16 States, the Virgin Islands, and the District of Columbia if we passed the legislation before us. It is time for us to move this legislation so that we can offer our support to those who are working to have the Senate pass a national holiday in honor Dr. King.

In introducing legislation that would designate the birthday of Dr. King a national holiday, I never viewed it as an isolated piece of legislation to honor one man. Rather, I have always viewed it as an indication of the commitment of the House and the Nation to the dream of Dr. King. When we pass this legislation it should signal our commitment to the realizaiton of full employment, world peace, and freedom for all.

The legislation we are considering today concerns a person who contributed much to American life. I do not think it is an exaggeration to say that Dr. King changed the face of America with the deeds and words. The sovereignty of the people is the central purpose of the American system of government. That purpose at various times in our history has manifested itself in public protests and petitioning of our government for the redress of grievances. Dr. King was the preeminent leader of popular political action in modern history. In practicing nonviolent direct action, he embodied a great tradition that originated with the Pilgrim settlement in the 17th century.

If we pass this legislation, we will be recognizing the heroic dimensions of Dr. King's life. We would also be expressing an appreciation of the fact that Dr. King's stature depended on many vaired qualities; a singular self-discipline and steadiness; an unshakable faith in the basic goodness of human beings, a single-handed dedication to raising up the lives of the disadvantaged; his inspiring and unforgettable speech; and his exceptional courage. In passing this legislation, we would also be saying that Dr. King was more than a spokesman for black people in America, rather that he was speaking to the aspirations and interests of our Nation. This reality is best summarized in the following statement by Dr. King:

The struggle for peace and the struggle for civil rights as we call it in America, happened to be tied together . . . I feel that the people who are wofking for civil rights are working for peace; I feel the people who are working for peace are working for civil rights and justice.

It is clear that Dr. King taught us much about life and death during this brief stay on this Earth. Lerone Bennett, the historian and Dr. King's biographer, wrote the following with respect to what Dr. King taught us about life and death:

His grace, like Ghandi's grows out of a complicated relation not to oppression, but to the ancient scourges of man, to pain, to suffering, to death. Men who conquer the fear of these things in themselves acquire extraordinary power over themselves and others. . . . Reverend Martin Luther King, Jr. has taught us not only how to die, but also, and more importantly, how to live.

I am very pleased to be a part of the bipartisan effort which is behind the movement of the legislation in the House. I will vote in favor of the legislation and I encourage my colleagues to do the same.

Mr. RODINO. Mr. Speaker, 20 years ago this month Dr. Martin Luther King, Jr., stirred the conscience of the Nation with his eloquent "Let Freedom Ring" address here in Washington. It has been 15 years since Dr. King—at the pinnacle of his leadership and in the prime of his life—was assassinated in Memphis. Yet, we still do not have a national holiday to honor this man, the greatest leader in history in the struggle for full equality for black citizens. We should no longer delay honoring this great American and all that he represents. We should act now and designate the third Monday in January as a national holiday to honor Dr. King.

I am an original sponsor of legislation to so honor this man and the principles that he preached and for which he lived and died. For more than a decade, I have espoused this cause so that we Americans can set aside one special day to rededicate ourselves to the principles of social, political, and economic justice for all.

I do not propose this national holiday lightly. It takes a rare person of an extraordinary event to justify a national holiday. Dr. King was more than a rare person; he was unique. And the changes that grew out of his leadership were so extraordinary that they continue to have a profound and historic effect on the American way of life.

It is time for us to honor this man and his inestimable contribution to this Nation and the world by setting aside a public holiday in his name.

In 1975, I told the Southern Christian Leadership Conference:

> They shot down the man—and they snuffed out his life—but they could not shoot down his dream. For his dream was stronger than life and more powerful than death. And the dream lives on.

Yes, the dream for which Dr. King gave his life lives on. But the dream—"That one day this Nation will live out the true meaning of its creed: 'We hold these truths to be self-evident, that all men are created equal' "—is still for too many a dream deferred. We have moved closer to the ideal of Dr. King's but the journey is far from complete.

As we continue the struggle to reach "the sunlit path of racial justice," let us set aside this day to honor Dr. King's life and his great works. Let this day stand forever as a shining symbol of our commitment to the brotherhood of man—as an enduring expression of our determination to make the dream of Dr. Martin Luther King, Jr., a dream fulfilled.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentlewoman from Ohio (Ms. OAKAR).

Ms. OAKAR. Mr. Speaker, it has been a privilege to cosponsor H.R. 3706, and I count it an honor to rise in support of this bill to designate a public holiday in honor of Dr. Martin Luther King, Jr.

Federal law currently recognizes nine public holidays. Two of these holidays specifically recognize individuals, Christopher Columbus and George Washington. Both individuals played major roles at crucial points in American history. Without their vision, leadership and contribution, America would not be the oasis of freedom and democracy it is today.

The issue before us now is whether we should recognize another great and historic period in the life of the United States and commemorate a man who made major contributions to that era by designating a national holiday to honor Dr. Martin Luther King, Jr.

Mr. Speaker, like Columbus and Washington, Martin Luther King, Jr., was a visionary leader who made lasting contributions to our country at a critical time in our history. He impacted all of us regardless of our race, religion, sex, or economic status. He touched our conscience in a spirit of nonviolence and peace, for which he received the Nobel Peace Prize. He made us question our policies, our practices, and our beliefs. More importantly, he taught us a good deal about ourselves and our national commitment to the principles of justice and equality. I urge my colleagues to compare the America of 1958 with the America of 1968 to see what Dr. King meant to this country.

We are a better country because Martin Luther King, Jr., was here. And I urge my fellow Members to vote the recognition Dr. King's principles deserve.

□ 1400

Mr. OWENS. Mr. Speaker, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentleman from New York.

Mr. OWENS. Mr. Speaker, I rise in support of this bill.

Mr. Speaker, Martin Luther King is a great American who deserves to have a Federal holiday designated for him as a monument to his achievements. Such a holiday would also be a national endorsement of the principles of nonviolent activism as a means of accomplishing peaceful change.

All Americans can take pride in the fact that Martin Luther King's life exemplified the very best of American traditions and philosophy. Martin Luther King was a pragmatist in the best sense of the word. While he devoutly believed that there was a heaven after death, he worked tirelessly to make life on Earth more bearable for the least among us. Martin Luther King was a fervent exponent of the Judeo-Christian ethic which has guided this Nation since it was founded.

Above all, Martin Luther King was an apostle of nonviolence. In a world which is now threatened with extinction by violent nuclear war, the way of nonviolence must be promoted with new vigor. At this moment riots and wars are raging in several parts of the world. Those who worship the false gods of war and violence continue to create new bitterness and new cycles of revenge-seeking. This special recognition of Martin Luther King would send a message around the world that American stands for freedom and justice achieved through nonviolent and peaceful means.

The struggle for equality and justice in our society is ongoing. Despite major accomplishments of recent history, legislation such as the Voting Rights Act and the abolition of Jim Crow laws, there exists an undeniable imbalance between the races. Predjudices and misconceptions which are longstanding contribute to this imbalance and cause the problem to fester. These attitudes must change if America's inequities are to change. Passage of this legislation to make Martin Luther King's birthday a national holiday will make a significant contribution to that healing process. While we cannot legislate people's attitudes or perceptions, we can set aside a day for them to consider Dr. King's accomplishments. As an apostle of nonviolence, Dr. King led freedom marches, boycotts, and rallies in a successful effort to redirect the conscience of America, to resolve the problem of physical segregation and economic and social subjugation of people of color. He was a pragmatic leader, but he never lost sight of his ideals—freedom, equality, and justice.

Dr. King's life and struggle for mutual understanding and respect between the races is exemplary. It is my hope that consideration of his example will lead to acceptance of his example, and ultimately, a just society. So not only will this day allow us to look back upon Dr. King's great achievements, it will foster an understanding so vital if we are to realize Martin Luther King's dream.

Throughout the world the greatness of Martin Luther King is recognized and acknowledged. The Nobel Peace Prize was only symbolic of the millions of awards Martin Luther King won in the hearts of people everywhere. The vote for this holiday is a vote to enshrine an example of the very best that America has produced.

Mr. MOODY. Mr. Speaker, will the gentlewoman yield?

Ms. OAKAR. I yield to the gentleman from Wisconsin.

Mr. MOODY. Mr. Speaker, I rise in support of the bill.

Mr. Speaker, I am honored to be a cosponsor of H.R. 3706, a bill which would designate the third Monday in January as a Federal holiday to commemorate the life and work of Dr. Martin Luther King, Jr.

Dr. King was an extraordinary American, who sought to put an end to centuries of racial and social oppression through nonviolent action. He struggled, with other dedicated civil rights leaders, for the freedom and human dignity of all Americans.

Dr. King's work in civil rights was for the realization of the principles upon which this country was founded: liberty, justice, equality, and peace. He knew that if one person is denied freedom of opportunity, no one is truly free.

I was fortunate enough to be on the Lincoln Memorial 20 years ago this month when Dr. King delivered his inspiring "I have a dream" speech. His dream was that Americans would not be "judged by the color of their skin, but by the content of their character." All caring people share this goal for our Nation.

This country has come a long way in 20 years toward correcting the social and political injustices of the past. Yet, there is much left to be done if we are to realize fully Dr. King's dream. A day of recognition for the accomplishments and goals of Dr. King is a great tribute to a worthy American.

Ms. OAKAR. Mr. Speaker, I urge the adoption of this bill.

Mr. DANNEMEYER. Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. DANIEL B. CRANE).

Mr. DANIEL B. CRANE. Mr. Speaker, Martin Luther King, Jr., will be remembered in history as a very important man. He had a very definite impact on everyone of our lives, and was responsible for a change in the course of this great Nation. The civil rights movement was a period in our history that many have referred to as a second American revolution. A time when people of all races and creeds began to envision a dream of equal opportunity and social economic progress for all.

I feel that it is entirely proper and I support fully the concept of a commemorating birth date for this American. In recognizing this man and this period in history we would preserve for future generations the memory of a man who changed the lives of millions of Americans.

The question we are facing today is not whether we should recognize this man but rather in what manner. We are already facing a huge budget deficit, if not the largest in the 208 years of our history, and every effort we can make at holding the line on these types of expenditures should be exercised. The cost of a national holiday on a regular workday is estimated at $237 million including the premium pay for those individuals who would receive it. The spirit and intent of commemoration can be realized by the designation of another day, a nonwork day as a national day of recognition. In my estimation that would serve the purpose of recognizing the achievements of this man and this period of our history. I come from the great State of Illinois, the home of Abraham Lincoln. I am sure you will agree with me that history has shown he was a great man, one who also had an impact on the lives of millions of his fellow Americans. We do not commemorate his birthday with a separate national holiday.

It is for these reasons, I oppose this bill under suspension of the rules, I would rather support an amendment to this bill to recognize a Sunday in January as a national day of recognition. I would respectfully urge my colleagues to do the same.

Mr. MITCHELL. Mr. Speaker, will the gentleman yield?

Mr. DANIEL B. CRANE. I yield to the gentleman from Maryland.

Mr. MITCHELL. Mr. Speaker, the gentleman talks about cost. What about the cost to my race under that system of segregation that was so rigid in this Nation?

You talk about cost. What about the cost to my life when I had to endure what this Nation put on me as a black man?

Costs become irrelevant in this business, and I certainly hope that we do not hear any more of it.

Mr. Speaker, I thank the gentleman for yielding.

Mr. DANIEL B. CRANE. Mr. Speaker, I hope the gentleman will feel the same way about the Defense budget.

The SPEAKER pro tempore. The time of the gentleman from Illinois (Mr. DANIEL B. CRANE) has expired.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentleman from South Carolina (Mr. TALLON).

Mr. MORRISON of Connecticut. Mr. Speaker, will the gentleman yield?

Mr. TALLON. I yield to my colleague, the gentleman from Connecticut.

Mr. MORRISON of Connecticut. Mr. Speaker, I rise in strong support of this legislation.

Few people would deny that Martin Luther King, Jr., was a great man. This is not the issue. Rather, the issue is the absence of an appropriate formal occasion to call attention to Dr. King's life, his social commitment, his determination, and the values of justice and equality that he preached and lived.

We in this Chamber—on both sides of the aisle—witnessed the growth and development of the civil rights movement during the 1950's and 1960's, but children growing up today will never experience the power and leadership that Dr. King brought to our Nation. He preached a message of patriotism, brotherhood, and human dignity, cornerstones of a strong nation. A national holiday commemorating the birth of Dr. King will help to keep his dream alive by teaching our young people how much we value his memory and the principles he gave up his life advancing. It will also compel us, on an annual basis, to examine whether this Nation continues to make progress toward insuring that all of its citizens enjoy the benefits promised by our Constitution and laws.

The people of my district strongly support this legislation. Last January, 10 members of the Dixwell Community House Bikila Track Club of New Haven ran a 400-mile relay from Washington, D.C., to New Haven, Conn., to generate support for the movement to win this holiday. Later this month, hundreds of people from the New Haven area will travel to Washington to relive the historic march which took place here 20 years ago and which culminated in Dr. King's "I Have a Dream" speech, an address which electrified the Nation.

In his book "Why We Can't Wait," Dr. King made reference to a quotation which I would like to repeat, that "justice too long delayed is justice denied." Currently, 19 State governments—including my own State of Connecticut—have acted to memorialize his birthday. A bill to make January 15 a legal national holiday has been introduced in every Congress since Dr. King's death in 1968. The American people have waited long enough for this legislation. I am proud to be a cosponsor of this bill. I urge Members to reaffirm the principles Dr. King's life symbolized by voting in favor of establishing this national holiday.

Mr. TALLON. Mr. Speaker, today I rise in support of H.R. 3706, legislation to make the third Monday in January each year a national holiday in observance of the birthday of Martin Luther King, Jr.

The 1960's were volatile times that could have erupted in harsh, widespread violence at any time. Racial hostility and social injustice were to the point of irreparably tearing our country apart, and were a nation divided.

Lives were lost in this battle for principles that are founded in our Constitution. Yet, even more would have been lost had the man leading the movement for social justice and equal opportunity not been a man of nonviolence. A man who understood, like Ghandi, that long-lasting change

could best be accomplished through peaceful means.

That man was Dr. Martin Luther King, Jr.

Historically, since his death, his birthday has been a day to reflect on and rededicate the Nation to the purposes that he developed and gave his life for—achieving the American dream of freedom, equality, reconciliation and justice at home, as well as peace in the world.

Usually, as time goes by, the memory of our national leaders fades or tarnishes. Yet this is not the case with Dr. King. He stands among the small number of great leaders who gave their lives and for whom respect, honor, and admiration have grown with each passing year.

But most importantly, a national holiday in Dr. King's name would not be just a celebration of one man's life. It would be a time to memorialize the ideals he stood for and fought for—ideals that many in our Nation now take for granted.

We are fortunate to have lived in the same generation as this man. We remember his struggle. It is only fitting to recognize his birthday as a national holiday for future generations to learn from as well.

Mr. DANNEMEYER. Mr. Speaker, I yield 2 minutes to the gentleman from Georgia (Mr. McDONALD).

Mr. McDONALD. Mr. Speaker, I rise in strong opposition to H.R. 3706, a bill designating the third Monday in January of each year a legal public holiday to commemorate the birthday of Martin Luther King, Jr.

At best, Martin Luther King, Jr.'s, prior associations and activities are questionable. This fact is reflected in the action taken by Attorney General Robert F. Kennedy, certainly one of the most liberal men to hold that high post, when he authorized wiretaps and other forms of surveillance of Martin Luther King, Jr. after the FBI developed evidence that King was associated with and being manipulated by Communists and secret Communist agents.

Consider the effusion from Political Affairs, official theoretical journal of the Communist Party, U.S.A., for May 1968, a month after King's assassination:

> The Reverend Martin Luther King, Jr., the voice, inspiration and symbol of the Negro people's struggle for freedom and equality, is dead * * *. The man who, more than anyone else, personified the heroic determination of the black people to win their liberation now. One of humanity's great leaders has been silenced forever * * *. We must see that his memory not be desecrated. We must not fail to do all in our power to realize the dream for which he died.

I would like to emphasize that this is not a quote from the Washington Post or the Atlanta Constitution but from an official publication of the Communist Party, U.S.A.

Unfortunately, neither the Congress nor the American people have any idea what information was gathered by the FBI. Under court order in 1977, the FBI's surveillance records and tapes on Reverend King were sealed in the National Archives for 50 years or until the year 2027. Those who intend to vote for H.R. 3706 might well want to ask themselves why this action was taken? It would seem that those who support elevating Martin Luther King, Jr., to the status of a national hero by making his birthday a Federal holiday would wish to dispel those who have doubts and who question why King's record has been sealed in secrecy. Before acting prematurely, this House should either request that the records be made available or delay consideration until the information is released.

Recently, the tapes of Franklin D. Roosevelt and John F. Kennedy were made public. Similar review of Martin Luther King's tapes should also be permitted lest, after proclaiming his birthday a National holiday, any possible embarrassment to this Congress and the American people may occur when the tapes are eventually made public.

Let us take appropriate congressional action to have the records and tapes released. If there is nothing to hide, who would object?

This is not a measure to be taken lightly. In addition to the reasons cited, if King's birthday is made a national holiday, he will be the only American to be honored by name.

Mr. Speaker, so Members of this House can make a valued and informed judgment on the question before us, I strongly urge my colleagues to vote in opposition to legislation to designate the birthday of Martin Luther King, Jr., a legal public holiday until all the facts are before us.

At this point in the RECORD, I include the following:

[From the Congressional Record, Dec. 8, 1975]

MARTIN LUTHER KING, JR.'S RELATIONSHIP WITH THE COMMUNISTS

Mr. McDONALD of Georgia. Mr. Speaker, it is indeed interesting that Washington Post staff reporter Laurence Stern in a bylined story on December 8, 1975, has "revealed" that the identity of the "important secret member of the Communist Party" who was discovered by the Federal Bureau of Investigation to be a major "political influence" on Martin Luther King, Jr., was New York attorney Stanley Levison.

The article quotes an unnamed spokesman for the Senate Select Committee on Intelligence that the formal confirmation of Levison as the King associate who triggered the close FBI monitoring of King's activities was being kept secret for "national security" reasons.

In this context, "national security reasons" strongly imply the involvement of a foreigh power in the Levison/King contacts. Has there been an enemy foreign power or powers involved with King and his organization, the Southern Christian Leadership Conference? The answer is "Yes." Both the Russians and their East German subsidiaries have made every effort to court King, his successor, Ralph Abernathy, and the SCLC organization as a whole. If a person were acting as a Soviet KGB or East German intelligence agent, all of their contacts and all organizations and persons they influenced would be legitimate subjects for intensive investigation.

Stern's article cites the 1971 book, "Kennedy Justice," by Victor Navasky, for a detailed account of Levison's role in making the surveillance of King's activity as a high priority necessity. Navasky noted that Levison had been King's adviser on both legal and financial matters from the days of the Birmingham bus boycott. Mrs. Coretta Scott King's memoirs recount Levison's influence over a 12-year period, noting that he was always there "to offer assistance * * * always working in the background, his contribution has been indispensable."

Whatever the precise nature of Levisons contribution which caused the Justice Department to send an official to meet with King to entreat him to have no further contact with Levison—which King would not do—the public record of Communist and pro-Communist affiliations and activities of other close associates of Martin Luther King, Jr., are not being brought to the attention of the American people by the mass media.

The activities of these people are quite a different matter than the shadowy activities of Stanley Levison; and in the December 3, 1975, issue of Review of the News, Robert H. Reeder has done a public service by compiling the public records of a number of top King aides and associates. The article reads:

THE KING FILE

(By Robert H. Reeder)

Senator Frank Church (D-Idaho) has turned the Senate Intelligence Committee into a vehicle for smearing the late F.B.I. Director J. Edgar Hoover. Hoover's private files show that he had become convinced that Martin Luther King was a person of low moral character who had fallen under the control of the Communists. Church claims to find this absurd. Attorney General Robert Kennedy, however, did not find it absurd in the least and authorized F.B.I. surveillance of King—including wiretaps, which were maintained between 1963 and 1966.

Those wiretaps and other evidence proved that Martin Luther King was indeed a person of low moral character who had fallen under the control of the Communists. But Senator Church has, like Richard Nixon, ducked the issue by refusing to release the damning tapes. And the "Liberal" press has cooperated by laboring to create the myth that Martin Luther King was an innocent victim of Director Hoover's bad temper.

The F.B.I. has been accused of playing "dirty tricks" on Martin Luther King. It has been accused of threatening to release information in its files that would have been damaging to King's respectability. And almost nothing has been said about Martin Luther King's notorious immorality and Communist associates. The New York Times, on November 19, 1975, commented: "The committee staff members said they could find no justification for the bureau's attack on Dr. King." The Senate Intelligence Committee would like us to believe

that Martin Luther King was under surveillance because he criticized the F.B.I.

We do not know what information is in the substantial F.B.I. file on Dr. King but we do know that even the most cursory look at Martin Luther King's public record should convince the merest tyro that there was very good reason for Director Hoover to consider King "dangerous."

Martin Luther King was quoted in the New York World Telegram of July 23, 1964, as declaring: "[I am] sick and tired of people saying this movement has been infiltrated by Communists and Communist sympathizers. There are as many Communists in this freedom movement as there are Eskimos in Florida." One hardly has to look at the entire "freedom movement" to find evidence of Communist infiltration—though the level of infiltration was overwhelming when the whole movement is considered. Rather, to be scrupulously fair, let us look directly under Dr. King's nose—at those persons closest to him—and see what we find.

Hunter Pitts O'Dell came to work for the Southern Christian Leadership Conference (S.C.L.C.) late in 1960 as Dr. King's staff consultant. In the fall of 1962 he was promoted to acting staff director in charge of voter registration and integration workshops. During this period, O'Dell was a member of the National Committee of the Communist Party. The "Liberal" press ignored it. Finally, on October 26, 1961, the St. Louis Globe-Democrat revealed that in 1956 and 1958 Hunter Pitts O'Dell had been identified under oath as a Communist organizer.

What did Martin Luther King do? He announced that he had discharged Comrade O'Dell.

A few months later it was discovered that O'Dell had not been fired but promoted, and was now running King's large New York office! When the story hit, Dr. King claimed to have discharged O'Dell a second time. A subsequent check by U.P.I. determined that Hunter Pitts O'Dell of the National Committee of the Communist Party was still employed by Dr. Martin Luther King.

Bayard Rustin is the notorious homosexual King called "a brilliant, efficient and dedicated organizer and one of the best and most persuasive interpreters of nonviolence." He was secretary and advisor to King from 1956 to 1960, and went with him to Oslo to receive the Nobel Prize in 1964.

Rustin was an organizer, recruiter, and fund-raiser for the Young Communist League, served 28 months in prison during World War II for refusing to do work required of those who were conscientious objectors, was given 60 days in jail in California for lewd vagrancy in 1953, and while working for King was one of only five "impartial observers" at the Communist Party's closed-door 16th national convention in 1957. That is only part of the record.

Fred Shuttlesworth, longtime field secretary of King's S.C.L.C., was president of the Southern Conference Educational Fund (S.C.E.F.). This group was thoroughly investigated by Committees of both the House and Senate and repeatedly found to have been a major Communist operation. On November 26, 1963, Shuttlesworth was one of two honored guests at the 15th anniversary dinner of the National Guardian, described by a Congressional Committee as "a virtual official propaganda arm of Soviet Russia." A former bootlegger, Fred Shuttlesworth's Communist, Communist Front, and radical activities fill three typewritten pages. King said of Shuttlesworth: "Reverend Shuttlesworth is my principal aide. Why, he gave me my start and he advised me from the very first. I depend on him."

James Bevel was Martin Luther King's chief aide in Chicago. He has declared: "We must move to destroy Western Capitalism." At a Black Power rally at Berkeley, California, in 1966 Bevel announced: "One of the problems of not being able to burn down the slums of Chicago is at this point not having the proper discipline required for the problems of carrying out that kind of a mission. That is why we haven't burned it down. . . . We are going to be part of an international revolution to end slavery. . . . I guess I hate Western Civilization more than most people. . . ."

The "Reverend" Bevel continued to emphasize the destruction of capitalism, and then he told the crowd that, when John Kennedy was President, Bevel had told people: "If the Vietcong jumped Jackie in my back yard, I wouldn't pull them off her."

Wyatt T. Walker, staff aide to Martin Luther King, was editorial adviser to the Marxist-Leninist Progressive Labor Movement. He was a familiar supporter of Communist Fronts.

Myles Horton was director of the Highlander Center, an outgrowth of the Highlander Folk School, in Tennessee, where King was trained. Martin Luther King was in fact listed as a sponsor of the Highlander Center on its stationery. Horton conceived the Highlander Folk School, described by a Joint Committee of the Tennessee Legislature as "a meeting place for known Communists and fellow travelers." The Georgia Commission on Education termed it a "Communist Training School."

James Dombrowski was another member of the Communist Party who was a close friend and advisor to Martin Luther King. Law enforcement authorities obtained a cancelled check made out to King from the Communist Front S.C.E.F. which was signed by Dombrowski and Benjamin Smith. Smith, according to Senator James O. Eastland (D.-Mississippi), ". . . . is registered under the Foreign Agents Registration Act as an agent of Fidel Castro."

In a letter discovered by government investigators, King wrote to Comrade Dombrowski: "Dear Jim: This is just a note to acknowledge receipt of your letters of recent date. We, too, were more than happy to have you in our home, the fellowship was very very rewarding . . . . Very sincerely yours, Martin."

Carl and Anne Braden have both been longtime, notorious members of the Communist Party working in the Louisville area. The Bradens, officers of the S.C.E.F., were part of the "Louisville Seven"—a group responsible for purchasing a house in an all-white area of Louisville, selling it to a Negro family, *and then dynamiting it to stir up racial trouble.*

King wrote a letter to the Bradens in 1959 urging them to become permanently associated with his Southern Christian Leadership Conference.

A photograph taken at the 6th annual conference of the S.C.L.C. in 1962, and found in the files of James Dombrowski, shows Martin Luther King, Carl and Anne Braden, and James Dombrowski, and describes King on the back as "responding to Anne Braden's speech."

Aubrey Williams was president of S.C.E.F. until 1963. In 1945 the U.S. Senate rejected his appointment to a government post because of his affiliations with the Communist apparatus. In 1954, Williams was identified under oath as a member of the Communist Party by two witnesses.

Two years later, in 1957, King was photographed with Williams, Myles Horton, Abner Berry (a member of the Central Committee of the Communist Party), and other Comrades at a Communist training school in Tennessee. King referred to Williams as "one of the noble personalities of our times."

Ralph David Abernathy was Martin Luther King's top aide from the time of the Montgomery Bus Boycott. He succeeded King as head of the S.C.L.C. Abernathy accompanied Dr. King to that Communist training school in Tennessee in 1957. And they had more than their radical commitment in common. In the 1958 case of *Alabama v. Davis,* sworn testimony was introduced regarding sexual aberrations committed by Abernathy on a 15-year-old girl who sang in the choir of his church.

Not only is Abernathy an active supporter of such Communist causes as the effort to free Communist Angela Davis, but in 1972 he was an honored guest of the Soviet Union and of Communist East Germany (G.D.R.), where he declared: "As pastor and theologian, I am of the opinion that the G.D.R. embodies what we aspire to in the world." Two hours before his departure he told a Communist Party press conference: "What we are still fighting for in the U.S.A. is what has already been achieved in the G.D.R."

The East German Communists gave Abernathy a medal, and reported that agents of their leading religious Front had "for many years" been in correspondence with Martin Luther King. They presented the "Reverend" Abernathy with a German edition of Coretta King's My Life with Martin Luther King, and he declared: "President Kennedy once said in West Berlin that he was a Berliner. I want to change that and say: 'I am a Citizen of the [Communist] German Democratic Republic.'"

Little wonder that after lengthy investigation the Joint Legislative Committee on Un-American Activities for the State of Louisiana concluded in its three-part Report on the activities of S.C.E.F. that the Southern Christian Leadership Conference, headed by Martin Luther King, was "substantially under the control of the Communist Party through the influence of the Southern Conference Educational Fund [S.C.E.F.] and the Communists who manage it."

If Martin Luther King was "sick and tired of people saying this movement has been infiltrated by Communists and Communist sympathizers," it was because he knew it was true.

And so did J. Edgar Hoover and the F.B.I. Director Hoover spoke out many times to warn of Communist involvement in the "civil rights" movement. On one occasion, he said: "We do know that Communist influence does exist in the Negro movement and it is this influence which is vitally important." Hoover declared that the Communist Party "strives only to exploit what are often legitimate Negro complaints and grievances for the advancement of Communist objectives. . . . Racial incidents are magnified and dramatized by Communists in an effort to generate racial tensions."

Mrs. Julia Brown is a brave and gracious Negro lady who spent more than nine years as a member of the Communist Party in Cleveland, serving as an undercover operative for the Federal Bureau of Investigation. According to Mrs. Brown:

". . . Mr. King was one of the worst enemies my people every had.

"I know that it is considered poor taste to speak ill of the dead. But when someone served the enemies of our country while alive, and his name is still used by his comrades to promote anti-American activities, shouldn't people who know the truth speak out?

"I learned many surprising things while I served in the Communist Party for the FBI. Communist leaders told us about the demonstrations that would be started, the protest marches, the demands that would be made for massive federal intervention. Every Communist was ordered to help convince American Negroes that we are no better off than slaves. Wherever we went and whatever we did, we were to promote race consciousness and resentment, because the Communists know that the technique of divide and conquer really works.

"We were also told to promote Martin Luther King, to unite Negroes and whites behind him, and to turn him into some sort of national hero. We were to look to King as the leader in this struggle, the Communists said, because he was on our side!

"I know they were right, because while I was in the Communist Party I learned that Martin Luther King attended a Communist training school. I learned that several of his aides and assistants were Communists, that he received funds from Communists, and that he was taking directions from Communists.

"Most Americans never look at the Communist press in this country. If they did, they would learn that the Communists loved Martin Luther King. He was one of their biggest heroes. And I know for a fact the Communists would never have promoted him, financed him, and supported him if they couldn't trust him. He carried out their orders just as slavishly as Party members in Cleveland, Ohio."

Little wonder that F.B.I. Director J. Edgar Hoover called Martin Luther King "the most notorious liar in the country."

We do not know what additional information Mr. Hoover had on King, but after years of electronic surveillance he certainly knew much more than we have been able to present in this brief survey from the public record. Yet the Senate Intelligence Committee has refused to release the F.B.I. file on King. They chose instead to attack the F.B.I. for using "dirty tricks," and members of the Committee staff said "they could find no justification for the bureau's attack on Dr. King." Incredibly, a U.P.I. release on November 19, 1975, declared: "A top FBI official said Wednesday that the Bureau had no legal justification for its smear campaign against Dr. Martin Luther King, Jr. but suspected, without evidence, he might be under 'Communist influence.' "

"Suspected, without evidence. . . ." That is, as we have seen simply not true. And the distortion is intended to damage the reputation of both the F.B.I. and the late Director J. Edgar Hoover.

John J. McDermott, Assistant Director of the F.B.I., spoke on November 21, 1975, before a Connecticut group which aids families of policemen, firemen, and corrections officers killed in the line of duty. He said the F.B.I.'s six-year surveillance of Martin Luther King was justified because of concern that King was influenced by subversives. He put it this way: "We did what we felt we had to do for the welfare of the nation at the time. Don't forget they [radicals and Communists] were bombing the Pentagon. They said they were going to shut down the government." Another F.B.I. official reminded us that the King projects "were started at a time when cities were being burned. . . ."

We believe most Americans would agree that our law enforcement authorities should keep under surveillance any person or group about which there is substantial evidence of involvement in such crimes as revolutionary violence, Communist subversion, and conspiracy with agents of a foreign power to overthrow the U.S. Government by force and violence. To the extent the F.B.I. maintained such surveillance under J. Edgar Hoover, we heartily applaud its efforts.

[From the CONGRESSIONAL RECORD, Oct. 31, 1979]

LEST WE FORGET

Mr. McDONALD. Mr. Speaker, today we were supposed to consider H.R. 5461—a bill to make Martin Luther King's birthday a paid Federal holiday. There are many reasons to be opposed to another Federal holiday, but lest we forget some of King's prior associations and activities, I would like to place in the RECORD at this point an article from the Review of the News for April 24, 1968. I commend it to the attention of my colleagues:

LEST WE FORGET

Who killed Martin Luther King? And why?

Well, who stood to profit?

You will recall that King first came to notice in 1955, as head of the Montgomery Bus Boycott launched by Mrs. Rosa Parks. Mrs. Parks was a student at the Highlander Folk School, which was organized with the help of Don West, then district director of the Communist Party of North Carolina, and which was of course a Communist training school—cited as such by several government agencies. And King ran the boycott of the Montgomery Improvement Association, which had been formed by the Rev. Fred Shuttlesworth, who is a former convict, says the Joint Legislative Committee on Un-American Activities of the State of Louisiana, and "has been affiliated with several communist-front organizations."

Another former convict is Bayard Rustin, who in 1953 was arrested by the Pasadena Police Department for homosexual activities. The Allen-Scott Report for August 16, 1963, reports that in 1936, as a college student, Rustin joined the Youth Communist League, "and was active in its operation on the campus and elsewhere"; and that in World War II, he was arrested for making speeches opposing our war against Hitler, and served twenty-six months in federal prison.

And in 1955 he became Dr. King's "secretary."

In March, 1957, at a meeting in Atlanta, they formed the Southern Christian Leadership Conference. The meeting probably couldn't have been called in February, because Mr. Rustin, Dr. King's secretary, was then attending the sixteenth national convention of the Communist Party.

The president of SCLC was of course the Rev. Dr. King. The vice-president of SCLC was the Rev. Fred Shuttlesworth. And Shuttlesworth later became the new president of the Southern Conference Educational Fund—which has been described by three government agencies as a department of the Marxist Conspiracy. It was organized by Communists, is run by Communists and is the most important Communist organization in the South.

Mr. Carl Braden has served as field director and has been named under oath as a Communist Party member. His wife Anne, an SCEF official, has also been named under oath as a Communist.

Mr. Braden is a former convict, of course. You have to be to get anywhere in the Movement. While in Louisville, he was convicted of a felony—a little matter involving some dynamite.

Mr. Aubrey Williams was SCEF president until 1963. In April, 1954, he was named under oath as a Communist. It was Williams, a Communist, whom Shuttlesworth—King's vice president—replaced as president of SCEF, a Communist organization.

And there was James A. Dombrowski, executive director of SCEF, who has also been named under oath as a Communist Party member.

On October 7, 1958, Dr. King wrote a letter to Anne Braden, in which he urged her and her husband Carl—both already well known as Communists—to become permanently associated with his SCLC.

And on August 16, 1960, King wrote the following letter to Communist Dombrowski: "Dear Jim. This is just a note to acknowledge receipt of your letters of recent date. We, too, were more than happy to have you in our home, the fellowship was very rewarding. I will expect to hear from you when Bishop Love returns to the country. At that time we can set the date for an Atlanta meeting. Very sincerely yours, Martin."

In fact, King actually filed an affidavit in federal court in New Orleans, strongly supporting Dombrowski and SCEF—and refused to repudiate the affidavit even after being shown proof that he was actually a Communist.

Indeed, a photograph exists which shows Martin Luther King along with Anne Braden, Carl Braden and James Dombrowski (the last three all identified Reds), the back of which reads as follows in Dombrowski's handwriting: "The 6th Annual Conference of the Southern Christian Leadership Conference, Birmingham, Alabama, September 25 to 28, 1962."

And there is a check, issued by the Southern Conference Educational Fund, signed by James A. Dombrowski, and dated March 7, 1963, to the order of Martin Luther King, in the amount of $167.74, with a notation on it: "New York expenses"—and Dr. King's endorsement on the back.

The Louisiana Committee on Un-American Activities concludes that the Southern Christian Leadership Conference—founded by Dr. King—is "sustantially under the control of the Communist Party through the influence of the Southern Conference Educational Fund and the Communists who manage it."

There is also the fact that on the Labor Day weekend of the year 1957, in a speech at the Communist Highlander Folk School, King called Communist Aubrey Williams "one of the noble personalities of our times," and had his picture taken with Abner W. Berry, of the Central Committee of the Communist Party.

And there is Hunter Pitts O'Dell, who was exposed in 1956 as a southern district organizer for the Communist Party, in 1962 as a member of the National Committee of the Communist Party—and as late as the summer of 1963, was still employed by Dr. King to help run the SCLC.

In fact, we read in the *Boston Globe* of April 15, 1964: "Official warnings have again been given to King about another, even

more important associate who is known to be a key figure in the covert apparatus of the Communist Party. After the warnings, King broke off his open connection with this man, but a second-hand connection none the less continues. . ."

And last September, the nationally syndicated *Allen-Scott Report* revealed that "the FBI has unimpeachable evidence, including photographs, showing that King is now listening to a man who . . . has been one of the Communist party's biggest money raisers in this country." He it was apparently who wrote King's statement in April, 1967, at the UN, that Congress is "wild with racism"; and his statement later in the year, at his SCLC convention, that the U.S. is the "greatest purveyor of violence in the world today."

Dr. King of course was the inventor of "nonviolence." What actually was "nonviolence?" How did it work? Well, in *Saturday Review* for April 3, 1965, he tells us:

"1. Nonviolent demonstrators go into the streets to exercise their constitutional rights.

"2. Racists resist by unleashing violence against them.

"3. Americans of conscience in the name of decency demand federal intervention and legislation.

"4. The Administration, under mass pressure, initiates measures of immediate intervention and remedial legislation."

Now, remember, this isn't my idea. This is straight from King himself. And observe that according to Dr. King himself, the violence that usually occurred in one of his demonstrations wasn't unexpected, wasn't to be avoided, wasn't something to be sorry about. It was exactly what he wanted. It was the point to the whole Production.

It was in fact, said Dr. King, the *only reason* for a "non-violent" demonstration: to generate more pressure on the Congress to install more collectivism.

"For weeks," explains Newsweek of March 22, 1965, "Martin Luther King had been escalating his Selma voter-registration campaign toward the state he calls 'creative tension'—the setting for a paroxysm of segregationist violence that can shock the nation to action. . . ."

"The Negroes' rationale in holding night marches," explains the New York Times of February 24, 1964, "is to provoke the racist element in white communities to show its worst."

So King's "nonviolence," to repeat, not only wasn't in any way an attempt to avoid violence—according to King himself, violence was an inescapable, essential, desirable part of it. "Nonviolence" meant only that King himself did not use the violence—he caused it. He provoked it, finally forcing "racists"—everyone who doesn't own a pair of sandals and doesn't need a bath—either to lie down and die or to retaliate, so that King could play the innocent victim. "Nonviolence" in short was nothing else but a demonstration of dialectical materialism, the pseudoscience invented by Marx, according to which Marxists advance by controlling both sides of the conflict; by advancing a thesis, which provokes an antithesis—a reaction by reactionaries—a struggle which produces a synthesis, which becomes a new thesis, and continues until the complete victory of Socialism.

"In short," said King in Stride Toward Freedom (New York, Harper & Row, 1958, pp. 94-95), "I read Marx as I read all of the influential historical thinkers—from a dialectical point of view, combining a partial yea and a partial no. . . . The Kingdom of God is neither the thesis of individual enterprise nor the antithesis of collective enterprise, but a synthesis which reconciles the truths of both."

So the ironic truth is that King contributed to his own murder. For in Memphis he was once again applying his philosophy of "nonviolence," was he not? Once again, he was trying to provoke violence according to stage 2 of his tactics.

And he succeeded.

And what were the "immediate intervention and remedial legislation" King was after according to stage 4?

In the Selma March, for instance, in 1965, the violence he provoked according to stage 2, followed on schedule by the sympathy of stage 3, caused the lightning passage of the "voting rights" bill, under which the federal government grabbed from the state power to register voters—the point being, of course, that in any dictatorship, whether Communist or Nazi, all the power must be centralized.

And soon King's organization will launch his "Poor People's March" on Washington. The plan as you know envisions the actual interruption of Congress unless "poor people" are handed about $100 billion—which would be used as usual to recruit, train, finance and defend the Communist gangs which are destroying our country, through the "war on poverty." For such an amount of course you have to put on a good show. You need some really bloody "nonviolence."

And where is it all heading? What is the goal? Suppose the "Poor People's March" does manage to interrupt Congress. Suppose in fact that so many "poor people" physically occupy the government, that the government is paralyzed and cannot function. What would we have?

What we would have of course is the Russian Revolution. We would have a coup—the seizure of our government by "nonviolence": by force.

Now imagine once again that you are one of the small band of rich, educated and not at all oppressed conspirators secretly running the communization of America. And once again you are looking down from your skyscraper in New York. Your scheme to create a race war is going very well. You are sorry you had to wait so long, of course—you remember wishing years ago that you could immediately indulge your great love of killing—but you knew that Americans of both colors had to be properly prepared. So you began with something Americans could be sold: "nonviolent integration," and you used a clergyman named King to sell it—to capitalize on the fact that black Americans have sometimes been the victims of injustice—and to sell it so as deliberately to create the bitterness you need.

But now it's 1968, and your scheme is going very well. There's lots of beautiful killing and blood. "Watts was glorious," you said, if you happen to be Herbert Aptheker. Now you no longer need to bother with such nonsense as "integration." Yet at the same time, you have serious problems. Your use of King is being more and more exposed. His use of violence is becoming understood. Everybody says he is becoming unpopular. In fact, he is turning from an asset into a liability. "Reactionaries" are preventing the passage of important Communist legislation. King is doing his best, but you are having difficulty, for instance, getting that $100 billion.

Suppose King were violently removed? you ask yourself. You no longer need him—so suppose he were brutally murdered as part of his next demonstration of dialectical materialism. That would be the ultimate in "nonviolence." With one 30.06 bullet you could blame "white racism," as usual, restore King's reputation, further accustom Americans to martial law, pass your Communist legislation—and at the same time notify your troops around the country that "nonviolence" is dead, too, and should be replaced by guerrilla warfare.

So you call in your shooters and you order the hit.

Observe the first results of the murder. Riots and looting raged for a week making Americans of both races furious. Many feel great sympathy for the victim. And in New York, Nelson Rockefeller was able to ram through a $6 billion "urban renewal" program which lets the state intervene over the heads of the mayors.

Rockefeller participated by the way in a memorial march for King, arm linked with Charles Kenyatta, head of Harlem's Mau Mau Society—named for the Communist terrorists of Kenya. Whether or not Kenyatta is just another psycho, I don't know, but he specializes in appearing in public with a machete on which a Bible has been impaled.

In fact that's what he was carrying when Rockefeller took his arm.

And in Washington, Johnson's Communist housing bill was passed. When the Communists grabbed Russia, they naturally also grabbed housing, using the welfare of workers as the excuse. They didn't say they were doing it for black people, because no black people are there. They said that everyone had the "right" to a certain living space, and moved those who had less in with those who had more. Remember that no black people were involved—everybody who was, was as white as the Governor of Mississippi—so those who resisted weren't racists, were they? They resisted because the point as always was not to establish "racial justice," but to control the population. And Party members and sympathizers naturally got the best.

The same thing will now begin to happen here.

This is why we must continue telling the truth about Martin Luther King; not for revenge, or just to destroy a phony reputation, but because of the use to which his murder—like that of John F. Kennedy—is being put.

So who killed King?

The fact that Ramsey Clark heads the investigation is suspicious enough. Anybody who believes Clark has any interest in truth should be sent immediately to me. I'm trying to sell the Brooklyn Bridge. And observe that his investigation already smells like last week's mackerel.

If and when Clark ever presents a suspect, you can bet we will be told he is a "right-wing extremist."

So what should Americans do now?

1) Demand that we be told all the facts and that the investigation continue until King's killers are found. Then we might as well also find out who killed Medger Evers, blew up the four little black girls in that church in Birmingham in 1963, and helped Communist Oswald kill Kennedy.

2) Refuse to be intimidated. King was almost entirely a creation of public relations—of a bunch of crooked reporters, most of them white. Like the barrage of publicity after the Kennedy assassination, The current propaganda is designed not only to advance Communism but to demoralize the

opposition—to make Americans uncertain and guilty. In fact, on Long Island, for instance, hoodlums stoned automobiles whose drivers refused to turn on their headlights "for the King." Needless to say, the growing number of Americans of both colors aware of what King really was, and really was doing, will not be given coverage on CBS. You are not as alone as that lie net would have you think.

3) Continue exactly as we have been—telling the truth—explaining that "free handouts" are nothing but the bait of dictators: that the trouble in this country isn't caused by black people, but by the small band of criminals—most of them white—who have been framing them; and that the "civil rights movement," which now has taken the life of Martin Luther King, was designed from the beginning to enslave us all.

[From the Congressional Record, Nov. 9, 1979]

VIRGINIA TAXPAYERS ASSOCIATION OPPOSES MARTIN LUTHER KING HOLIDAY

Mr. MCDONALD. Mr. Speaker, in view of the fact that I am told we will again be considering next week, legislation to make Martin Luther King's birthday a paid Federal holiday, I believe it to be appropriate to include in the CONGRESSIONAL RECORD the testimony by the Virginia Taxpayers Association before the Senate Judiciary Committee in opposition to that measure on June 21, 1979. This is especially true, since, to the best of my knowledge, the Senate Judiciary Committee has never published their hearings. Therefore, I commend this statement to the attention of my colleagues:

TESTIMONY OF KENNETH WHITE, PRESIDENT, VIRGINIA TAXPAYERS ASSOCIATION

Mr. Chairman, my name is Kenneth White and I am President of the Virginia Taxpayers Association, a federation of local taxpayer organizations and individuals from all 10 congressional districts in Virginia. The Virginia Taxpayers Association was organized six years ago as a broad-based taxpayer organization working to reduce government taxes and spending at all levels of government—local, state and federal—and to preserve the freedom of the individual American citizen. The VTA has become widely known not only across Virginia but among followers of the taxpayer movement all over the United States, and reports of our activities have been carried in publications printed in many other states.

Immediately following the success of Proposition 13 in California a year ago, we called a state capitol press conference attended by the principal Virginia media in Richmond where we announced plans to obtain property tax reductions similar to those in California and where we made the statement: "Taxpayers are the boss", a slogan that was immediately carried as the lead item in a national Associated Press news story and was featured on network television. A Lynchburg, Va. News lead editorial specifically favoring our VTA position on the Panama Canal treaty was carried in the Congressional Record July 18, 1978. For the last six years we have represented taxpayers of our state at the annual legislative sessions of the Virginia General Assembly in Richmond on a wide variety of taxpayer matters, we have twice appeared in televised debates with the Virginia attorney general on the subject of state general obligation bonds, we have assisted in the continuing defeat of the so called Equal Rights Amendment in the Virginia legislature, and we are currently promoting vigorously a constitutional amendment that would give Virginia taxpayers the right of initiative and referendum as now enjoyed in some 22 other states and the District of Columbia.

Regarding the proposal now before the Senate Judiciary Committee to establish a federal holiday on January 15, Martin Luther King's birthday, we do not believe the present economic situation will permit the United States to afford any more federal holidays for any reason whatsoever. As a result of destructive policies tolerated and deliberately encouraged by Congress over many years, capital has been exported from the United States to foreign countries to a point where today many industries are more efficient and productive in advanced nations overseas than here at home, and the United States is no longer competitive in producing many kinds of goods. Intolerable ever-increasing minimum wage laws passed by Congress are only one of the reasons for this. Also Congress has by its beneficence with taxpayers' resources made federal employees a specially privileged class—as well as increasing beyond reason the number of such employees—and U.S. News & World Report revealed in its June 18, 1979 issue that each workday federal offices are closed costs taxpayers $194.5 million. (Of course this figure is in Federal Reserve Notes, or what the January, 1979 Reader's Digest admits is "phony money", but this really counterfeit currency, for which we have Congress to thank also, is the only thing made available for use in most statistics today.) So what is really the proposal now before this committee is the insane idea of declaring another federal paid holiday in a less and less productive nations which is already bankrupt, and where the country's national debt can never possibly be paid by the taxpayers. Frankly, for any congressional committee to seriously consider such a proposal is a farther reason why members of Congress as a class today rate so low in all the public opinion. polls. Do members of this committee really wonder why there is a national tax revolt today?

Of course, the cost of the holiday cannot be limited to federal pay alone, since state and local government employees also would be affected and a great many private employers would feel compelled to pay their employees for not working also. So the total economic consequences would be disastrous. Moreover, coming at a time so soon after Christmas and New Year's Day the January 15 date would be particularly unnecessary for an additional holiday.

There is now no federal legal holiday honoring any American except our first and greatest President, George Washington. In the light of all the other great American patriots who are not so honored, including Thomas Jefferson and Patrick Henry, it would be singularly inappropriate to devote a holiday to one who did as much to increase federal bureaucracy, federal regulation and federal encroachment on American life as Martin Luther King. Representative John Ashbrook of Ohio has placed massive documentation in the Congressional Record of King's unwavering service to Communist causes, and it would be impossible in this brief time to restate all of Ashbrook's unchallengable facts, but we would like to incorporate herewith by reference Congressman Ashbrook's lengthy and authoritative material. We should keep in mind that it was a very liberal Democrat attorney general, Robert Kennedy, who ordered government personnel to investigate thoroughly King's subversive connections and activities. All of this might perhaps be considered by some King adulators to be merely academic history of no account in today's world, except for its extreme importance in the area of ideals and symbolism. The honorable ranking minority member of this Judiciary Committee, Senator Thurmond, is certainly as well informed as any member of Congress on the overwhelming importance given by Communist forces to symbolism, for it was the honorable Senator from South Carolina who single-handedly gave to the American public some years ago his historic report in Muzzling American Military Forces in which many significant but sometimes hidden Communist devices and influential symbols were revealed. It was just a few days ago from this hearing date, June 11, 1979, that Communist interest in Martin Luther King was confirmed by a most unimpeachable source, Tass, the Soviet news agency. It was on that date that the Soviet propaganda machine declared, according to an Associated Press dispatch from Moscow that President Carter's decision to submit a bill to Congress making Martin Luther King's birthday a national holiday was "a serious success for the progressive forces in the U.S.A." (the Tass agency).

It needs to be asked publicly, and also answered publicly, why are the ruthless Communist butchers so interested in making Martin Luther King's birthday a holiday in a foreign country (that is, foreign to the Soviet Union), and why should the United States do anything of this kind and of such symbolic importance to bring special pleasure to such enemies of mankind?

We can only conclude by warning this committee that if the committee wishes by its actions to add further fuel to the fast-growing national tax revolt, an affirmative vote on the question now before us will certainly do it.

Thank you very much.

[From the Congressional Record, Nov. 13, 1979]

Mr. MCDONALD. Mr. Speaker, it has been suggested that the birthday of Martin Luther King, Jr., be declared a national holiday. I strongly oppose this plan. King practiced and preached confrontation politics. Nonviolence was the facade behind which hatred and violence were nurtured. The American Nazi Party in its obscene plan to march in the predominately Jewish town of Skokie, Ill., was merely emulating King's provocative confrontation tactics in white communities in the past.

Recently, the Washington Post contained a column by William Raspberry, a strong supporter of King, protesting the action of Hosea Williams, head of the Atlanta chapter of the Southern Christian Leadership Conference, in presenting the "Martin Luther King, Jr., Peace Medal" to the Libyan dictator, Qaddafi. According to Raspberry, while Williams heads a dissident faction in SCLC, other black leaders refuse to condemn his presentation of the medal. Corretta Scott King, widow of Martin Luther King, Jr., would only say that the medal was not an official medal of the SCLC.

In many ways, Qaddafi is an appropriate recipient. He, like King, collaborates with the Communists. You will remember that Attorney General Robert Kennedy authorized wiretaps of King's home and office to obtain evidence of his relationship with Communists. Qaddafi, also, mouths phrases

about peace while providing training to terrorists and support for other dictators such as Idi Amin in Uganda.

As I have pointed out in the past, terrorism is a violent attack on noncombatants for the purpose of intimidation to gain a military or political objective. Terrorists are not freedom fighters—neither were the young hoodlums set loose in our streets by the inflammatory rhetoric of Martin Luther King, Jr.

The recent embrace of Yasser Arafat by those who interited MLK's mantle makes it clear who will benefit from the suggested national holiday. Arafat, the Soviet cutting edge in the Middle East, heads the most vicious international terrorist organization currently functioning. A national holiday on MLK's birthday will bring aid and comfort to those who want Arafat to "overcome."

[From the Congressional Record, June 18, 1980]

AMERICANS, STOP THINKING LIKE COMMUNISTS

Mr. MCDONALD. Mr. Speaker, Julia Brown, who was for many years an undercover member of the Communist Party of the United States for the FBI addressed the council of the John Birch Society here in Washington on June 9, 1980. She felt it appropriate at that time to restate her testimony before the Senate Judiciary Committee of 1 year ago pertaining to the possible enactment of a Federal paid holiday in honor of the late Martin Luther King. Her testimony, then, as now, is deserving of wider attention. This lady has given a lot to her country and her views are not popular in some circles but they are valid in my view. I commend it to the attention fo my colleagues.

Her testimony follows:

MRS. JULIA BROWN—JUNE 9, 1980

Thank you, Mr. Welch.

Members of the council, ladies and gentlemen, it is an honor to attend a gathering such as this—even more of an honor to be asked to speak.

I have done a great deal of speaking throughout the United States, and I have come to Washington on many occasions to testify before various government agencies. I believe this is the first time that I have ever appeared before an audience in this city to deliver a speech, instead of to provide testimony.

My most recent visit to Washington occurred just about one year ago when I addressed the Senate Judiciary Committee. The matter under consideration was a bill to declare a national holiday in honor of Martin Luther King. As you know, the measure did not pass last year. Unfortunately, however, it is still being promoted by a large number of Senators and Congressmen. I am strongly opposed to such a proposal. If I may, I would like to repeat the short testimony I gave to the Senate Judiciary Committee last June.

Mr. Chairman, I, Julia Brown, joined the Communist Party in December, 1947, thinking I was joining a legitimate civil rights movement. Finding out that I was a true member of the Communist Party which advocated the overthrow of the U.S. Government, I decided to leave the organization, but I had to bide my time to avoid suspicion. Subsequently I went to the FBI to report what I had heard and seen. In 1951, I was asked by the FBI to go back into the Communist Party as an undercover agent to report on their subversive activities.

While at the Communist Party meetings, which only Party members attended, I frequently heard Martin Luther King discussed, and was told by Frieda Catz that he was in training for a civil rights movement. Frieda Catz was a Party member from Cleveland, Ohio, who had been assigned to my training and education within the Communist Party. On learning this, I reported it to my contact in the FBI. He told me that the Bureau knew that Martin Luther King had high level connections with the Communist Party, and I should report anything else that I heard about his activities. I continued to report until 1960, over ten long years.

In Martin Luther King's early years of agitation, he was the hero of America's communists. The cells that I was associated with in Cleveland were continually being asked to raise money for Martin Luther King's activities and to support his civil rights movement by writing letters to the press and influencing local clergymen, and especially black clergymen, that Martin Luther King was a good person, unselfishly working for the American Negro, and in no way connected with the Communist Party.

There are many great American Negroes such as George Washington Carver and Booker T. Washington who provide the youth of America with an example they can follow. Martin Luther King provides an example of agitation and manipulation for goals dictated by hatred and envy. The memory of Carver and Washington would be dishonored if your committee acts favorably in this matter.

Mr. Chairman, while I was in the Communist Party, as a loyal American Negro. I knew Martin Luther King to be closely connected with the Communist Party. If this measure is passed honoring Martin Luther King, we may as well take down the stars and stripes that fly over this building and replace it with a red flag.

And that was my message to the Senate Judiciary Committee on June 2, 1979.

I would like to believe that what I said would have been enough to stop the glorification of Martin Luther King. But we all know that, even if they never name a holiday after him, there are still too many Americans who hold that man to be like a god. What has happened, of course, is that there are too many of our fellow citizens who actually have been conditioned to think exactly the way Communists want them to think.

And not just about Martin Luther King! Right now, in America, huge numbers of our people have been convinced that they should rely on government to provide all the necessities of life, and even to provide the distinction between right and wrong. Government has become the source of everything for many Americans. Such attitudes never built this great country and made it such a wonderful land of plenty.

On the contrary, the attitude that holds that government is the provider is the one that dominates countries like Soviet Russia, China and Cuba. But Americans who think like the Communist do not appreciate the difference between a free country such as ours, and a slave country such as exists in Red Russia.

When I was working for the FBI as a member of the Communist Party, it became evident to me that the Party's open and announced intention regarding our country was quite different from its quiet and more important intention. The announced intention was to overthrow the United States government by force and violence.

But, while all Communists were told to build for the day when that overthrow could be accomplished, a great deal more of the Party's efforts were directed towards making the United States government larger and more of a dominant influence over the lives of the American people. Actually, Communists were seeking to strengthen the federal government all the time—through socialistic legislation and through increasing government control over the free enterprise system. Communists were seeking to destroy the U.S. government and to build it into an all-powerful force at the same time.

Except for the area of military defense, no American should want a powerful central government. This is what Communists want, yet, today, millions of Americans not only want a big, federal bureaucracy—they also want to cut back on needed military and defense programs. They have been led to think exactly like the Communists want them to think.

A good example of what is happening to America came to mind with the establishment of the new cabinet-level Department of Education. This is something that Communists have always wanted. And just a few weeks ago, this new Department came into existence.

William Z. Foster called for this Communist goal in a very explicit way in his famous book "Toward Soviet America". In that book, Foster, who was the National Chairman of the Communist Party of the United States actually stated that one of the steps toward the creation of a Communist America was the creation of a National Department of Education. And he wrote his book in 1932! His book was so important to the Communists that it was published simultaneously by two publishing houses, only one of which was openly Communist.

Only a short time after Foster wrote his book, however, American Communists received orders to suppress it. The book turned out to be too explicit. And so, from that time on American Communists did whatever they could to hide the publication of Foster's plans by destroying Toward Soviet America. Communists were allowed to read it, but no one else was to see it. Through the efforts of some patriotic anti-Communists, however, this book was re-published in 1961. It carried a Foreword by Congressman Francis Walter, who was at that time the Chairman of the House Committee on Un-American Activities.

On page 316 of Toward Soviet America, Communist Party Chairman William Z. Foster wrote as follows: "Among the elementary measures the American Soviet government will adopt to further the cultural revolution are the following; the schools, colleges and universities will be coordinated and grouped under a National Department of Education and its state and local branches." Then he said: "The studies will be revolutionized, being cleansed of religions, patriotic and other features of the bourgeois ideology. The students will be taught internationalism and the general ethics of the new Socialist society."

So, here we have the national Chairman of the Communist Party calling for the establishment of a National Department of Education. And he wanted it to remove religion and patriotism from the schools, and at the same time promote internationalism and Socialist ethics. Socialist ethics means that whatever is good for the state is right; whatever is not good for the state is wrong. That amounts to no real ethics at all.

In 1979, Congress passed the legislation which set up this Communist-desired Education Department. Then, President Carter selected as the nation's first Secretary of Education a Los Angeles Judge named Shirley Hufstedler who is a member of the Board of Trustees of the Aspen Institute for Humanistic Studies. In other words, the lady chosen to run the Department of Education, which Communists have wanted since 1932, is a Humanist.

What do Humanists believe in? Well, the Humanist Manifesto published in 1973 says that Humanists do not believe in God; reject any standard of ethics; and oppose national sovereignty. According to the same document, Humanists are for: world government, sexual freedom, abortion, and an end to parental control over children. Does any of that differ from William Z. Foster or any other Communist's design for America? No, it does not!

Am I saying that Mrs. Hufstedler is a Communist? No, I'm saying that she is a Humanist. And although not all Humanists are Communists, my experience tells me that all Communists are Humanists.

So, not only have Congress and the President followed Communist desires in creating a federal Education Department, but an ideal Communist choice to head it has been chosen by Mr. Carter.

You are not going to read or hear about this shocking information in the public news media. It takes a group like The John Birch Society to focus attention on these matters. And, without information such as this, most of the American people will end up thinking exactly as Communists want them to think—that a federal Department of Education is a good thing, and that the lady judge will be a good administrator.

Years ago, this Society produced a film about the civil rights movement called Anarchy USA. I was pleased to appear in a portion of that film. And I was even more pleased to know that the film did a great deal of good.

Many times, in Anarchy USA, Soviet dictator Lenin was quoted as saying: "Communism must be built with non-Communist hands." That lesson was drummed into all Party members when I was in the Party. The Communist strategy aimed at deceiving people into accepting and working for Communist programs, without ever letting it be shown that Communism was the result.

This strategy is still working very well today. If you need proof that it is, I ask you: How long has it been since you took a look at the Communist Manifesto? Or, have you ever looked at it? If you have, you know how many present federal programs have been called for by Karl Marx in his famous document. And you know how many other programs dreamed up by Marx are being proposed.

The heavy progressive income tax and the Federal Reserve System are planks in the Communist Manifesto. Federal takeover of land and land-use controls can be found in it. The Manifesto calls for an end to the rights of inheritance, which has largely been accomplished. Yet, all these Communist programs were sold to Americans as something else.

The Manifesto calls for federal control of communications and transportation—and the appropriate federal agencies are already in place to accomplish those tasks. Government ownership of business is called for, and we are well along this road. Establishment of industrial armies is proposed, and we have VISTA, CETA and other such agencies. Finally, the Communist Manifesto calls for free education for all in government schools. The Communists want no diversity in education. They want a government controlled by them to be everyone's teacher.

Maybe we should extend a great big thank you to all the people who in recent years, have started private schools. They may not know that they are refusing to go along with Karl Marx's program, but they know enough to know that something is terribly wrong in the government schools. I certainly hope that the private school movement grows stronger and stronger in America.

What I am telling you, of course, is that America is being converted into a Communist country. It is not hard to see this if you know what to look for. This conversion is certainly being accomplished by Communists. But they get tremendous help from Democrats and Republicans. The problem is that the American people do not know what the Communist program is. And they also do not know what the American system is supposed to be.

One of the greatest goals of Communism has always been to get people dependent on government. The American system has always meant that government should leave us alone and merely protect our rights.

The Communist way costs tremendous amounts of money. The taxes and controls that result from government taking care of huge numbers of people actually lead to a destruction of jobs and businesses. In turn, this leads to more people becoming dependent on government.

We all read recently about the horrible riot in Miami. It resulted in fifteen deaths, 370 injuries and millions of dollars in property damage. The riot was a chilling reminder of what happened twelve to fifteen years ago—in Watts, Detroit, Newark and so many other places.

One aspect of the Miami riot that has received little attention was its terrible savagery. One of the victims was killed after being dragged from his car and beaten. He died when a car was driven back and forth over his body—several times. A group standing by cheered! Another victim was so badly mutilated that he could not even be identified.

We like to think that, because there have been no large riots in over a decade, there has been a big improvement in race relations. I wish I could say that such was the case.

What has happened is that Communists and those who do their will have accomplished two major goals. First, they have convinced a great many Americans that government is supposed to be the provider. And, second, they have slowed down American industry—which means that there are fewer jobs, fewer opportunities to start a small business, and fewer Americans able to be independent of government.

When America's productivity slows down, who gets hurt first? The unskilled worker who lives in the inner city gets hurt first. And, because of what he has been told, he immediately looks to government to take care of him. What he doesn't know, and what leaders like Martin Luther King never told him is that too much government took away his job in the first place.

The government programs that are supposed to help him actually turn out to make him a slave—to government! Deep down, he knows this. He ends up hating the system, and hating the people who administer it. It is then very easy to make his hatred racial in nature.

As I see reports in the newspaper about steel mills closing, and automobile plants shutting down, and America not growing the way it always has grown, I become very concerned. It has been almost twenty years since I served the FBI in the Communist Party. The Party members that I know were all trained to use this type of economic disorder to further the cause of Communism and to further the destruction of America. And, even though the Communist Party receives little attention today, its people are still active and still able to turn many things to a Communist purpose.

Even worse, self-serving politicans of all races continue to push for the same goals as the Communists. They have no regard for the people they claim to be helping. And they have no regard for the country they are supposed to be serving.

It is more than foolish to make government larger and more powerful. Doing so is the certain road to a Communist America. And I, for one, think that the Carters, the Kennedys and lots more like them don't even care about what they are doing to America—as long as their own nests are feathered.

The task that remains for real Americans is to tell the truth about where this country is headed—and who is taking all of us down the road to a Communist America. What has to be done is to get more Americans to stop thinking like the Communists want them to think.

It has been obvious to me for a long time that this organization is doing the right thing. I have travelled all over the United States to speak for the John Birch Society's speakers bureau. The Society members that I met in cities and towns everywhere were fine people who were not taken in by Communist propaganda.

They helped to slow down the rush toward Soviet-style rule here in America. But there is still plenty left to be done. Only now, there is less time to do it.

So I urge all of you who are part of this wonderful group to keep working hard. You're on the right track. And, to those of you who are not members, or who are not hard-working members, I ask you to get busy. If you don't, the Communists will win with all the help that they're getting from those Democrats and Republicans. They will win because the American people did not know the difference between Americanism and Communism.

Julia Brown does not ever want a situation to develop where she has to say: "I told you so!"

Julia Brown would much rather be able, in a few years to say: "I was part of a great team that helped to save America."

Thank you very much.

[From the Congressional Record, Sept. 14, 1981]

Mr. McDONALD. I thank the chairman for yielding me this time.

Mr. Speaker, I rise in opposition to House Concurrent Resolution 153, a resolution authorizing a statue of Martin Luther King, Jr. to be placed in the U.S. Capitol. At best, Martin Luther King's prior associations and activities are questionable. Until all information is available, passage of this measure could prove an embarrassment to this Congress and the American people.

Under court order in 1977, the FBI's surveillance records and tapes on Reverend King were sealed in the National Archives for 50 years or until the year 2027. The sup-

porters of this resolution might want to ask themselves why this action was taken? Before acting prematurely, we should either request that the records be made available or delay consideration until the information is released. At this point in time we should not authorize putting a statue of Martin Luther King, Jr., in a place of honor in our Nation's Capitol until all the facts are before us.

Rev. Martin Luther King, Jr., who professed nonviolence, in fact was wedded to violence. He sought out violence; he courted and provoked violence against his followers and by his followers because he believed violence was necessary to the achievement of his ends. Reverend King said as much in an article he wrote for the Saturday Review of April 3, 1965.

In this article he wrote:

"The goal of the demonstrations in Selma, as elsewhere, is to dramatize the existence of injustice and to bring about the presence of justice by methods of nonviolence."

He continued by writing that that goal can be achieved when four things occur:

"1. Nonviolent demonstrators go into the streets to excercise their constitutional rights.

"2. Racists resist them by unleashing violence against them.

"3. Americans of conscience in the name of decency demand federal intervention and legislation.

"4. The Administration, under mass pressure, initiates measures of immediate intervention and remedial legislation."

In other words, the demonstrations were a staged media event, a dramatization to attract the newspaper reporters and television cameramen and make a local event into a national issue. But the second necessary ingredient for Reverend King's scenario was violence.

In communities where ad hoc gangs of thugs did not appear to attack demonstrators, night marchers were staged to lure out nightriders. And when all else failed to provoke violence, demonstrators led by Reverend King and his Southern Christian Leadership Conference deliberately violated the laws by holding marches and parades without permits, violating court injunction and provoking police officers. In some areas such as Birmingham and Selma, Reverend King was successful in provoking the violence he felt was necessary for him to win his goals.

During the Albany, Ga., protests in 1962, where the law enforcement authorities avoided confrontation despite provocations, King generated little publicity. When he was eventually arrested leading an illegal demonstration in July, Reverend King refused to pay the fine so that he could remain in jail as a so-called martyr. After a black man paid Reverend King's fine and he had to leave jail, he called the event having been "kicked out of jail."

In Birmingham, Reverend King welcomed truant students from high schools and even younger into the demonstrations although they were in great danger. Let us remember what he said after the murder of four young girls attending Sunday school in a bomb explosion and after two teenaged boys were shot to death during the riot that followed. In the Nation of March 9, 1964, Reverend King worte:

"The keys to victory in Birmingham were the refusal to be intimidated; the indomitable spirit of Negroes to endure; their willingness to fill the jails; their ability to love their children—and take them by the hand into battle; to leave on that battlefield six murdered Negro children, to suffer the grief, and resist demoralization and provocation to violence."

And so for Reverend King, "six murdered Negro children" were "keys to victory." In other words, martyrs helped him achieve his ends and he saw this, and he deliberately continued to court violence.

In his book, "Why We Can't Wait," Reverend King wrote:

"Looking back, it is clear that the introduction of Birmingham's children into the campaign was one of the wisest moves we made."

But the New York Times editorially disagreed, stating that—

"The presence of hundreds of children among the marchers made all these marches especially perilous adventures in brinksmanship."

It is also appropriate to question whether or not Rev. Martin L. King, Jr., really found racism repugnant in light of his support of discrimination in jobs and housing so long as the discrimination was in favor of blacks; in light of the formation in February 1966, in Chicago of what Reverend King called a common front with the violence-oriented, virulently racist Nation of Islam (NOI) or Black Muslims; and in light of the statements of some of Reverend King's closest aides such as Rev. James Bevel.

During the 1963 Birmingham disorders, Reverend Bevel told students:

"We need an army of captains and sergeants and privates to fight the white man this summer. I want captains to march whole schools to jail after graduation."

While Reverend King did not advocate race hatred, he did not bar alliances with racists and he did not keep them from his personal staff.

In 1966 during the Chicago housing campaign, the association of Reverend King and his Southern Christian Leadership Conference with violence was evern more open. With Reverend King's knowledge, his aide, Reverend Bevel, showed films of the violence during the Watts riots in Los Angeles to Chicago residents being recruited to participate in his equal housing campaign. Among those particularly singled out for contacts and for those film showings were the leaders and members of Chicago's notoriously violent criminal youth gangs.

Reverend King told newsmen that the film showings had been intended "to show the negative results of rioting" and to demonstrate that rioters who destroyed their own communities accomplished nothing. But that is not how the Chicago street gangs interpreted the films. Whenever the film showed a black rioter attacking a police officer, they cheered. And whenever law enforcement officers were shown, they hissed and booed. In fact, Reverend Bevel's film shows for youth gang members were nothing other than audiovisual seminars in mayhem.

One might have expected after the riot that Rev. Martin L. King, the noted advocate of nonviolence, would have broken all contact between SCLC and the gangs; but that is not what happened. Instead Reverend King and SCLC executive director Rev. Andrew J. Young met with the gang leaders for several hours. The gang leaders pledged a truce and said they would "try nonviolence." The truce did not last till the end of that day. Five young men were shot and violence increased to include 2 deaths and 13 wounded so that a State curfew was imposed 2 weeks after the truce.

As one of Rev. Martin L. King, Jr.'s, critics, Dr. Joseph Harrison Jackson, then president of the National Baptist Convention, noted at the time:

"There is a danger of using nonviolence in such a way that it will create violence."

One of these ways is to teach the young contempt for the law. Reverend King's "nonviolent civil disobedience" taught that any law an individual personally and subjectively disagrees with or feels is unjustly restrictive can be arbitrarily broken at will.

This is not the lesson we should teach young Americans, but it is the lesson we would teach them by making a hero of Rev. Martin L. King, Jr., and by placing a statue of him in our Nation's Capitol.

COMMUNIST MANIPULATION OF REVEREND KING AND HIS MOVEMENT

The Communist Party, U.S.A., has attempted to use virtually every real or imagined grievance of evey segment of American society—the young, the old, women, American Indians, blacks, Latinos and European ethnic groups—to develop and exacerbate divisions among us. The Communists made the most of the opportunity to stir up race hatred provided by the civil rights movement, and the man around whom the Moscow-line Communists collected was Rev. Martin L. King.

The whole range of Communist Party members, sympathizers, and front groups were mobilized to aid Reverend King's campaigns.

Some of the support was via the former Highlander Folk School, now the Highlander Research and Education Center. In sworn testimony before the Senate Internal Security Subcommittee in 1954, Paul Crouch, a former CPUSA official and organizer described Highlander as being run "ostensibly as an independent labor school, but actually working in close cooperation with the Communist Party," Prominent among Highlander's supporters was the old International Union of Mine, Mill & Smelter Workers, now merged with the United Steelworkers of America, Mine-Mill was found by the Subversive Activities Control Board to be Communist-infiltrated.

Reverend King, in a very famous photograph, is shown attending a 1957 Labor Day Weekend seminar at the Highlander Folk School. The man sitting next to Reverend King in the photograph, Abner W. Berry, a top official of the CPUSA, wrote in the Daily Worker that the seminar had enabled those attending to reestablish communications with each other "that had been disconnected during the past few years." The disconnection had taken place after the Civil Rights Congress disbanded rather than register as a Communist Party front.

Reverend King's support of Highlander goes beyond attendance at one seminar. In its 1958-59 27th Annual Report of the Highlander Folk School quoted Reverend King as saying:

"You have given the South some of its most responsible leaders in this great period of transition."

Two years later, Highlander and Reverend King's Southern Christian Leadership Conference ran joint training programs for civil rights activists.

One of Reverend King's closest SCLC aides was Jack H. O'Dell, now with Rev. Jesse Jackson's Operation PUSH. Under the name, Hunter Pitts O'Dell, Jack O'Dell had been one of the Communist Party's top organizers in the South. When his affiliation with this totalitarian party became known,

Reverend King, under pressure, fired O'Dell. The controversy was reopened when it was discovered that O'Dell had been rehired by Reverend King's New York SCLC chapter.

The important point is not that a Communist Party organizer had penetrated Reverend King's confidence, because a Communist could sneak into almost any organization. What is important is that when this man was exposed to Reverend King as a member of an organization that proposes to impose a systematic totalitarian regime on this country, that has been repeatedly demonstrated to be controlled by the Soviet Union, a dictatorship whose troops only a few years earlier in 1956 had slaughtered Hungarian freedom fighters; with all this, Rev. Martin L. King fired O'Dell only because his continued presence would give ammunition to segregationists and race-baiters.

But then, he had O'Dell rehired in New York. And their association continued. O'Dell, who is still an editor of Freedomways magazines, the Communist Party's propaganda arm directed at blacks, appeared with Reverend King at a Freedomways affair in Carnegie Hall in February 1968.

That Freedomways magazine affair was to celebrate the 100th anniversary of the birth of W. E. B. DuBois who in his senility married a young Communist and joined the CPUSA. In his prime, W. E. B. DuBois understood how the Marxist-Leninists wanted to use black people. He wrote in 1931:

"The Communists, seizing leadership of the poorest and most ignorant blacks head them toward inevitable slaughter and jail-slavery, while they hide safely in Chattanooga and Harlem.

"DuBois responded to the Communists' plan:

"American Negroes do not propose to be the shock troops of the Communist Revolution, driven out in front to death, cruelty and humiliation in order to win victories for white workers.

"DuBois pointed out further that the Communists only pretend to speak for white workers and actually serve to polarize tensions between black and white workers.

"DuBois denounced the American Communists for being the mouthpiece of Moscow, and went on to say:

"Unfortunately, American Communists are neither wise nor intelligent."

In his keynote speech that evening, Reverend King said:

"So many would like to ignore the fact that Dubois was a Communist in his last years."

And he went on to denounce anticommunism as "irrational" and "obsessive."

A key point of Reverend King's speech was to attack U.S. support for the South Vietnamese against Communist aggression. The struggle against the Vietcong he termed a "senseless, cruel unjust war." For the record, it should be noted that it is the Vietnamese Communists who have proved to be senseless and cruel. In May 1979, more than 80 persons, organized by entertainer Joan Baez, most of whom had once opposed U.S. participation in the Vietnamese war, published an advertisement charging that the Communist conquerors of Vietnam held 200,000 political prisoners, that they starved and tortured prisoners and that some were used as living mine detectors, clearing minefields with their hands and feet.

Reverend King had more Communist agents than merely Jack O'Dell in his entourage. King's long-term adviser was New York attorney Stanley Levison, who FBI investigations revealed to be a "Communist agent," Levison says he was not a party member, but that is not what the FBI found him to be. You do not have to be a party member to be an agent, and you do not have to be working for the Russians to be a Communist agent.

After the FBI produced for King the evidence that Levison was a Communist agent, acting for a foreign power, he declined to separate himself from this adviser.

Communists other than those in the CPUSA were involved with Reverend King's activities. His wife, for example, was active with Women Strike for Peace in the Early 1960's. In hearings before the House Committee on Un-American Activities, Women Strike for Peace was shown to be an affiliate of the Women's International Democratic Federation (WIDF), an internationally active Communist front controlled by the International Department of the Soviet Communist Party Central Committee. And starting with the marches in Selma in 1963, King had active support from a number of disarmament and ban-the-bomb groups who worked with the World Peace Council (WPC), like the WIDF which is virtually its women's auxiliary controlled by the KGB and the Soviet Communist Party Central Committee. A more detailed report on those international Soviet fronts by the Central Intelligence Agency was published in the House Intelligence Committee's hearing, "The CIA and the Media," in 1978.

It is not without significance that in 1971, when the East German regime welcomed Rev. Ralph D. Abernathy, whom they identified as Reverend King's successor, the GDR's propaganda brochure said:

"The GDR was on the side of Martin Luther King and Ralph Abernathy in the 1950's when they organized the historic boycott of the omnibuses of Birmingham * * *."

For these and other reasons in the public record, I urge rejection of this ill-conceived resolution.

[From the Congressional Record, Oct. 7, 1981]

"THE SPIKE" IN REALITY—AN EARLIER CHAPTER IN HOW THE SOVIETS FUNDED AMERICAN COMMUNISTS

Mr. McDONALD. Mr. Speaker, as was mentioned during the debate on the placing of a bust of Martin Luther King in the House or Representatives, there is a 50-year seal on the Martin Luther King file, but some facts are already before the public. These concern his connections with the Communist Party of the United States. These connections are firmly established and if there are those who still doubt it, please read the item I am today inserting by my colleague JOHN ASHBROOK. This statement appeared in Human Events for October 10, 1981. The statement follows:

[From Human Events, Oct. 10, 1981]

THE KING-U.S.S.R. CONNECTION—HOW THE SOVIETS FUNDED AMERICAN COMMUNISTS [1]

(By Representative JOHN M. ASHBROOK)

On Feb. 6, 1980, the House Intelligence Committee heard testimony from John McMahon, then the deputy director for operations for the Central Intelligence Agency. McMahon, one of the most experienced and highly regarded CIA officials, was describing to Committee how the Soviet Union carried out their covert action which they call "active measures" against the free world. These are the Soviet operations to influence events in the target countries. They include forgeries, media placement, agents of influence, and funding of Communist and subversive groups.

McMahon described how the Soviets channeled $50 million a year to the Communist parties of the free world. I asked him how much of that comes into the United States. He responded that the CIA does not trace Soviet operations in this country and that we should get the information from the FBI.

Actually, I already knew a great deal about this Soviet operation in our country. As the ranking minority member of the House Committee on Un-American Activities and later the Internal Security Committee, I was able to trace the Soviet subsidies for U.S. Communist party publications from the Soviet Bank for Foreign Trade through a Paris bank owned by the Soviet Union to the Chase Manhattan Bank and into the coffers of the Communist Party, U.S.A. The Paris bank, Banque Commerciale Pour L'Europe Du Nord, is often used to launder Soviet funds to Communist and terrorist groups in the free world.

I also knew something even more startling. Herb Romerstein, a House Intelligence Committee staffer who pays close attention to these matters, had briefed me on a top-secret FBI penetration of the Communist party apparatus that was smuggling in KGB cash for the use of the American Communists. I know much more, but unlike the liberals. I cannot reveal information that is still classified.

I am free to discuss this one aspect, however, because a recent book by David J. Garrow, the FBI and Martin Luther King, Jr., has now revealed the identities of the men who penetrated the supersecret Communist operations for the FBI.

For almost three decades two brothers, Morris and Jack Childs, had been FBI informants deep in the apparatus that transferred Soviet funds to the CPUSA for subversive activities in the United States. According to the book, they had revealed to the FBI that one of their co-workers in the apparatus was Stanley Levinson, a white lawyer who served as the chief, behind-the-scenes, adviser to Martin Luther King, Jr. Jack Childs died last year but his brother Morris continued to serve the FBI, undercover, until the publication of the Garrow book. In a rare example of FBI humor, the brothers were called by the code name "Solo."

The brothers had been Communist party members long before they agreed to cooperate with the FBI. Morris Childs was a member of the Communist party's National Committee. He had served as editor of the Daily Worker and as the state leader of the party in Illinois. But, even more important, he had close associations with the Soviet Communist party and intelligence agencies.

In 1931, he served as a Communist International official in Moscow directing the American Communist students at the Lenin School, the Soviet's international training school. He was a close associate of Soloman Lozovsky, a high Soviet official who ran the Communist-controlled Red International of

[1] Reproduced in the publication Human Events is a Chase Manhattan check for $20,000 made payable to the Communist party publication. The Worker. This check was drawn on the order of the Bank for Foreign Trade in Moscow through a Soviet-owned bank in Paris. It was one of many.

Labor Unions, which was closely linked to the Soviet intelligence service. Lozovsky was arrested by the Soviet secret police in 1949 or 50 and was murdered in 1952 during one of the periodic anti-Semitic purges. It may be that the brothers' break with communism was caused by their observations of the true nature of the Soviet regime.

The Garrow book is sympathetic to King and his adviser, Levison. Nevertheless, it confirms the information that many of us had concerning the Communist influence on King's activities. As the FBI files on the Martin Luther King case have been sealed for 50 years, to avoid embarrassment to King's family and supporters, the Garrow book becomes particularly significant.

According to the book, Levison dropped out of the Communist financial manipulations and established a relationship with King in the late 1950s. Members of Levison's family revealed to Garrow that Levison had been associated since 1965 with Victor Lessiovski, a top Soviet official at the United Nations. They told him that they suspected that Lessiovski was a KGB agent. Indeed, he is. Lessiovski, until recently the personal assistant to the secretary-general of the United Nations, is one of the highest-ranking KGB officers ever to serve in the United States. His relationship to Levison shows that the adviser to King remained under KGB control even after leaving the Communist party financial apparatus.

Garrow also reveals that it was Levison who recommended fellow Communist Hunter Pitts O'Dell, also known as Jack O'Dell, to be an employee of King's Southern Christian Leadership Conference. O'Dell, then a National Committee member of the Communist party, became a highly trusted King aide. He now works for Jesse Jackson in Operation PUSH.

It was the activities of these two Communists, Levison and O'Dell, that caused Atty. Gen. Robert Kennedy to authorize the famous wiretaps on King. According to Garrow, Kennedy tried on a number of occasions to convince King to get rid of his Communist advisers. King would promise to do so, but each time slipped Levison and O'Dell in through the back door.

The 50-year seal on the Martin Luther King file leaves many questions unanswered. One of these is: Did King get any of the Soviet Money? Another is: What role, if any, did the Soviets play in moving King from civil rights activities to anti-Vietnam War agitation?

Sooner or later skullduggery always gets revealed. Now we know some of the details of the Soviet financial support for Communist and subversive activities in the United States. Will we really have to wait 50 years before learning the whole truth about Martin Luther King?

TESTIMONY OF HON. LARRY P. MCDONALD OF GEORGIA BEFORE THE HOUSE RULES COMMITTEE ON THE CONSIDERATION OF THE RULE TO H.R. 5461, DECEMBER 4, 1979

Mr. Chairman, let me first thank you for the opportunity to address the subject of a national holiday for the late Dr. Martin Luther King, Jr. before your committee today, and for the openness in allowing public debate and testimony on the rules governing the final determination of this event. This is in fact what I am here to address, congressional openness and fairness.

It seems to me that the individuals who seek the institution of this holiday are at counter purposes with themselves by wanting to proceed under a closed or modified closed rule, in effect gagging public debate. Those who most openly advocate Dr. King's contribution claim it was based upon his support of the Democratic process, a process obviously steeped in the need for openness, candor, and accessibility to all the people. This is not a position which supports a limited public debate. If he was a man of the people and took his case directly to them, shouldn't we be willing to trust the outcome of this holiday to the full voice of the people; an open discussion and full amendment process in the House of Representatives? There is no question that clearly we should do so.

Parlimentary technicalities such as a modified open rule or a closed rule are the procedures used to expedite complicated legislation where amendments and debate become self defeating and bog down the congressional process. But to utilize them to cut down debate, generally, when it is unnecessary or, specifically in this case, when it is contrary to the need for a full national pronouncement of support; this is counter to reason and a violation of our congressional procedure. In my view it should be an embarrassment to the supporters of Dr. Martin Luther King to have him institutionalized in any other manner than a fully open rule.

If his fame and greatness are as genuinely accepted by this country that he deserves to be recorded in history as equal to George Washington in his contribution to society, let the voice of the people speak in his behalf through their representatives without restraint. An open rule is the only appropriate basis under which to consider this proposed holiday.

Thank you.

TESTIMONY OF HON. LARRY P. MCDONALD OF GEORGIA BEFORE THE HOUSE CENSUS AND POPULATION SUBCOMMITTEE ON REV. MARTIN LUTHER KING, JR. HOLIDAY LEGISLATION, FEBRUARY 23, 1982

Mr. Chairman, I wish to thank you for inviting me to testify on legislation to elevate Rev. Martin Luther King, Jr. to the status of a national hero by making his birthday a federal holiday. I strongly oppose such action.

There is ample documented evidence that Rev. Martin Luther King, Jr. was not the man of nonviolence he professed to be, but that he was in fact wedded to violence and willing to work with America's violent enemies to achieve his goals. Let's look at some facts.

Attorney General Robert F. Kennedy, certainly one of the most "Liberal" men to hold that high post, authorized wiretaps and other forms of surveillance of Rev. Martin Luther King, Jr. after the FBI developed evidence that Rev. King was collaborating with and being manipulated by Communists and secret Communist agents.

Martin Luther King's long-term advisor was New York attorney Stanley Levison, identified by the FBI as a "Communist agent." When the FBI produced for Rev. King the evidence that Levison was a Communist agent, acting for a foreign power, King declined to separate himself from this advisor and their collaboration continued until King died.

Supporters of Rev. Martin Luther King, Jr. obtained a court order in 1977 sealing the FBI's surveillance records and tapes on Rev. King in the National Archives for 50 years or until the year 2027. If the FBI files had not proved King's involvement with the Communists, we can rest assured that they would have been released as part of the attack on the FBI during the 1970's.

Stanley Levison was not the only Communist in Rev. King's entourage. One of King's closest aids in the Southern Christian Leadership Conference (SCLC) was Jack H. O'Dell, who now is an executive of Rev. Jesse Jackson's Operation PUSH. O'Dell was one of the Communist Party, U.S.A.'s top Southern organizers. When his Communist Party role became a public issue, King said O'Dell was fired. But a short time later, O'Dell was quietly rehired by King's New York City SCLC office and remained a King advisor until his death.

The point is not that a Communist could penetrate King's confidence, but that he refused to disassociate himself from those whose loyalty is to an aggressive, bloodstained enemy of the United States.

Rev. Martin Luther King was not a man of nonviolence. He sought out violence and provoked violence against his followers because he believed violence was necessary to achieve his ends. Rev. King wrote this in an article published in Saturday Review in April 1963, in which he said it was necessary to "Dramatize the existence of injustice and to bring about the presence of justice" in four steps. Rev. King wrote that these were: "1. Nonviolent demonstrators go into the streets to exercise their constitutional rights. 2. Racists resist them by unleashing their violence against them. 3. Americans of conscience in the name of decency demand federal intervention and legislation. 4. The Administration, under mass pressure, initiates measures of immediate intervention and remedial legislation."

Violence was a necessary ingredient in Rev. King's scenario. In communities where demonstrators were unable to provoke attacks, night marches were staged to lure out the nightrider element. When all else failed, Rev. King and his followers deliberately violated the laws by holding marches without parade permits, by violating court injunctions and provoking law enforcement officials—a tactic we saw repeated by the Nazi's in their provocations against the Jews of Skokie, Illinois.

A primary example of this tactic by King was in Albany, Georgia, in 1962. There law enforcement officials avoided confrontations with the result that Rev. King generated little publicity. When King eventually managed to be arrested while leading an illegal demonstration, he refused to pay his fine so he could stay jail as a so-called "martyr." After a black man paid the fine and he was freed, King called the event being "kicked out of jail."

I think it essential to keep in mind what Rev. King wrote in The Nation in March 1964, after the Birmingham campaign and bombing deaths of four young girls attending Sunday school followed by a riot in which two teenaged boys were killed. King wrote that the "keys to victory in Birmingham were the refusal to be intimidated; the indomitable spirit of Negroes to endure; their willingness to fill the jails; their ability to love their children—and take them by the hand into battle; to leave on that battlefield six murdered Negro children; . . . ." He was admitting that martyrs helped him achieve his ends and deliberately continued to court violence and create martyrs.

This is not the lesson we should teach young Americans, but it is the lesson we would teach them by designating Martin Luther King, Jr.'s birthday as a national holiday and, thus, making a hero of him.

If we wish to honor a black American, which I agree is long overdue, it would be certainly more appropriate to honor one

who has stood the test of time and proven without a doubt and without controversy that he is indeed a great American who deserves to be so honored. Two such individuals are Booker T. Washington and George Washington Carver. As you know, Booker T. Washington was a world-renowned and respected agricultural chemist and George Washington Carver was a respected black educational leader. They both literally rose "Up From Slavery" and epitomize the American spirit and determination to rise above poverty and adversity. By their statements, by their writings, by their actions, by their accomplishments, by their lives they represent achievement and ideals which black Americans, and all Americans for that matter, can be proud. These are the types of men we should consider honoring rather than Martin Luther King, Jr. whose prior associations and activities are questionable at best.

Until the FBI's records and tapes of Rev. King are heard by both the Congress and the American public, passage of legislation to designate a national holiday in his honor should not occur.

Recently, the tapes of Franklin D. Roosevelt and John F. Kennedy were made public. Similar review of Rev. King's tapes should also be permitted lest, after proclaiming his birthday a federal holiday, any possible embarrassment may occur when the tapes are eventually made public. Let's take one step at a time in the proper order.

It would seem that those who support this legislation would wish to dispel those who have doubts and who question why Rev. King's record has been sealed in secrecy.

Before acting prematurely, let us take appropriate Congressional action to have the records and tapes released. If there is nothing to hide, who could object?

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentleman from Arkansas (Mr. BETHUNE).

Mr. BETHUNE. Mr. Speaker, as a Republican and as a former FBI agent, I rise in strong support of the Martin Luther King holiday bill.

In the 1960's we in Arkansas rallied around Winthrop Rockefeller. I was a Democrat at the time. I became a Republican because we wanted to break the stranglehold that Orville Faubus and machine politics had had on our State for a long time which had suppressed not just black citizens but all citizens in our State, and we Republicans, in the finest tradition of Abraham Lincoln, brought blacks in government, and we Republicans, in the finest tradition of Abraham Lincoln, made changes in the election laws and opened up the political process for blacks in Arkansas.

And do you know what we learned out of all that? The great changes are not made here in the legislative chambers or in the judical halls. The great changes in this world are made in the hearts and minds of men and women. Attitudes are so important.

I think that this holiday for Martin Luther King will give us an annual opportunity to recommit ourselves to the proposition that all men are created equal. It will nourish the spirit of reconciliation that we need so desperately in this country right now.

Mr. Speaker, I urge all Members and I urge particularly the Members on my side of the aisle to support this bill. Let us make this a bipartisan effort, as it should be.

Mr. Speaker, this legislation is a long overdue testimonial to Dr. King and the thousands of Americans, black or otherwise, who worked and fought for an America where equality prevails for all citizens regardless of race, color, creed, sex, or national origin.

This legislation poses a positive symbol of recognition for the dedicated efforts expended for fundamental rights that are guaranteed by our Constitution—the guarantee of life, liberty, and the pursuit of happiness for all citizens of these United States. Dr. King stood for and died for the principles upon which this Government was established, the very principles which brought our forefathers to these shores. The principles, cherished by all, yet denied to a segment of our population simply because of the color of their skin.

I also believe this legislation has importance because of the need to commemorate the contribution that black Americans have made to the greatness of this country. There are and have been extensive efforts to recognize the accomplishments of Americans of other ethnic groups, but few paying just tribute to the contributions of black Americans. In my home State alone, we have erected monuments and/or named public facilities on behalf of Count Pulaski—a Polish American—Lafayette—a French American—native American tribes, and so forth. There is a McArthur Park named after the great Army general, who happened to have been born there, and there is recognition of Robert E. Lee.

It is my belief that black children need heroes and positive role models, just as much as children of other racial groups. The opportunity to identify with a national hero of one's own race lends itself to a type of pride that engenders an emotional desire to succeed or to emulate. Recogizing the accomplishments of black American heroes can only have a positive effect on our society. Dr. King is indeed a hero to Americans of all races, but especially to black Americans. Recognizing his birth is a tribute to all people who contributed to the civil rights movement. His dream of a society where all men of all races could live as brothers is not a black dream, but an American dream.

Dr. King was a great American and a man of Christ. He fought for and died for a greater America, and for this reason, we owe this legislation to his memory.

□ 1410

Mr. DANNEMEYER. Mr. Speaker, I yield 2 minutes to the gentleman from Virginia (Mr. BATEMAN).

Mr. BATEMAN. Mr. Speaker, I rise in reluctant opposition to H.R. 3706, the bill to designate the birthday of Martin Luther King, Jr., as a legal public holiday.

The roster of Americans who could reasonably be considered for the honor of having their birthdays designated as national holidays is a long one. It is apparent, given that fact, that not all can be so honored. Were we to follow such a course, we could reach the point where there are more holidays than workdays in the year—a pleasant prospect, perhaps, but not a practical one.

Therefore it is essential that we be extremely selective as to those whose birthdays are singled out as holidays. The cost of a holiday is considerable.

The Congressional Budget Office, in a cost estimate incorporated into the committee report on this legislation, notes that Federal premium pay alone amounts to $24 million, offset in part by $7 million in fuel savings. And this says nothing about the costs of a shutdown in the private sector, to the degree that the holiday is observed by business and industry, and the cost to State and local government.

In view of the contributions of Martin Luther King, Jr., I would concur in the proposal of the gentleman from California (Mr. DANNEMEYER), that we designate the third Sunday of each January as a commemoration of Dr. King's birthday. I think that would be an appropriate step.

But if we are to add a 10th Federal holiday to the calendar in honor of a distinguished American, it strikes me that one of America's greatest leaders should next be so honored. That preeminently great American is Thomas Jefferson.

It is no slur upon Dr. King to state that Jefferson should be the next American to have his birthday declared a legal holiday. After all, Jefferson is the author of the Declaration of Independence, one of our greatest Presidents, and more than any other, the man who articulated the ideals which animated the American Revolution and shaped the Republic in which we live. Moreover, we inherited, and procured by peaceful means, our transcontinental boundaries by the acquisition of the Louisiana Territory, an expanse of land secured for us by the diligence and boldness of Thomas Jefferson as President.

We also should consider that occasions as well as persons can rightly be the subjects of a tribute in the form of a national holiday. I hope that I will not be accused of parochialism if I suggest that there could appropriately

be a Yorktown Day to commemorate the military victory on October 19, 1781, when American independence was secured. Yorktown is indeed in my congressional district, but its significance to every American is obvious.

For all of these reasons, I find it impossible to support H.R. 3706 as reported to the House by the Committee on Post Office and Civil Service. My lack of support is not evidence of a lack of respect for Dr. King, but rather a reflection of the priorities and practicalities which I have recited.

Mrs. HALL of Indiana. Mr. Speaker, I yield 30 seconds to the gentleman from New York (Mr. SCHUMER).

Mr. SCHUMER. Mr. Speaker, I rise in strong support of H.R. 3706.

Today and throughout the committee proceedings on this bill, we have heard proposals for a plebiscite, for a Sunday holiday, and for other types of half-holidays.

The struggle for civil rights, the struggle between the races in this country has been a struggle for one thing, for one simple ideal—equality. It would be the ultimate irony if Dr. King's memory were commemorated by an unequal holiday.

Mr. CROCKETT. Mr. Speaker, will the gentleman yield?

Mr. SCHUMER. I yield to the gentleman from Michigan.

Mr. CROCKETT. Mr. Speaker, today we have before us a bill to honor a man of peace, the late Dr. Martin Luther King, Jr. He was a man whose thirst for justice and whose strength of will exemplified the best qualities of the American spirit. He was a pioneer of American history—not of the inhospitable 18th century settlements along the east coast, nor of the later efforts to tame the rugged lands of the plains and West.

Instead, Dr. King was a pioneer of the spirit—he showed us the new frontiers of human justice and equality that lay just beyond our grasp in this century. He led us through the difficult struggle to overcome the obstacles of prejudice and apathy, and let us share in his dream of a nation unbound by racial or ethnic hatred.

I urge my colleagues to join with me today in voting to honor Dr. Martin Luther King, Jr., by designating a national holiday in his honor.

Mr. DANNEMEYER. Mr. Speaker, I yield 1 minute to my colleague, the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, I rise as a Republican and as a fiscal conservative in support of this bill.

I also rise as someone who voted against this bill when it was on suspension the last time.

Ever since I cast that vote I have been thinking about it and wondering if I did the right thing. I have come to the conclusion that I did not; not that I now fail to realize there are costs involved here and certainly we ought not to minimize those costs, and not because there are no other great heroes that perhaps some think ought to be recognized in our galaxy of great Americans, but because I think we ought to recognize that this country is unique in a number of ways. One is exemplified by the founding of this Republic. The second is exemplified by the Civil War that decided that this country would remain unified because certain principles that originally brought this country together were worth preserving.

The third great unique movement in this country, in my judgment, is that of the civil rights movement.

What does Dr. Martin Luther King stand for? As a young person growing up in southern California, frankly, I was too young to be involved in the civil rights movement and probably would not have been involved in any way, either directly or indirectly, save for the example of Dr. Martin Luther King.

I reflected upon that after my vote several years ago.

The SPEAKER pro tempore. The time of the gentleman from California has expired.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 more minute to the gentleman from California (Mr. LUNGREN).

Mr. LUNGREN. Mr. Speaker, I appreciate the grant of additional time.

I reflected back on my experiences during my growing up years. I recall that Dr. Martin Luther King stood as an inspiration to me. He made me recognize that there were people in this country that were not accorded the same rights that I was given, that despite what our country's essential document said, not all men and women were created equal, at least as far as the implementation of our laws were concerned; that we had not fulfilled that obligation which we had so proudly promised in our beginning documents.

Dr. Martin Luther King stirred inside me a feeling that we had to walk together if we were going to work out the problems of this country.

So I suggest that this holiday is not just for the black Americans, but it is for all Americans—white Americans, red Americans, brown Americans, and black Americans.

The symbolism of this holiday is particularly important today because we have tremendous disagreements among all of us as to how we achieve those civil rights goals. Because we have these disagreements, it sometimes appears that the entire subject is divisive and we forget about the fact that we all are committed to a consensus of conscience on civil rights in this country. If this day does nothing else but give us 1 day to reflect, 1 day to pray, 1 day to think about and remember the commitment that we all have, then it will be worth it, no matter the cost.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. KEMP).

Mr. KEMP. Mr. Speaker, would the gentleman from California yield 1 more minute to me?

Mr. DANNEMEYER. Mr. Speaker, I yield 1 more minute to the gentleman from New York (Mr. KEMP).

The SPEAKER pro tempore. The gentleman from New York (Mr. KEMP) is recognized for 2 minutes.

Mr. KEMP. Mr. Speaker, I appreciate that.

You know, a number of years ago I watched a fascinating documentary, interviewing refugees from Vietnam in refugee camps in Thailand. The network interviewer went up to an old woman of almost 90 years of age and asked: "What keeps you going? What are you hoping to do with your life?"

She said: "I dream of living in the United States of America."

She did not know America from the newspapers. She did not know America from being able to speak very good English. She just knew America from the standpoint of what America means as an idea, as a dream. It was an idea and a dream that here was a place in which people were free to be all that God meant them to be. Here was a place in which all people were created equal and that the Government was instituted to help preserve those rights that were given to us, not by the Government, but by an inalienable source.

I just returned with my wife from the Soviet Union. They have beautiful documents about guaranteed rights in the Soviet Union, the right to emigrate, the right to join your family, the right to speak, the right to join a labor union; but, unfortunately, the rights which are given to them by the Government are denied by the Government because those rights do not come from that inalienable source. That which the Government gives, it can take away and thus the Russian Revolution was flawed from the beginning.

The Martin Luther King holiday is not just a holiday for a civil rights leader. It is more importantly, as the gentleman from California pointed out, a holiday to commemorate that idea, that dream that all people have all over this country and indeed the world, to live in freedom, justice, dignity, to be able to know that those rights are guaranteed by Government through our Constitution but are given to us by God, that inalienable source.

I have changed my position on this vote because I really think that the American Revolution will not be complete until we commemorate the civil rights revolution and guarantee those

basic declarations of human rights for all Americans and remove those barriers that stand in the way of people being what they were meant to be.

The gentleman from California suggested he changed his position and so did I because this is the time in which we must truly say that America is one nation, one people, one family, one country dedicated to rights not only for all Americans, but for all people everywhere. Ending racial segregation through constitutional means is as important a contribution to this country and our American Revolution as holding the Union together.

I want to see my party stand for that. If we lose sight of the fact that the Republican Party was founded by Mr. Lincoln as a party of civil rights, of freedom, and hope, and opportunity, and dreams, and a place where all people could be free. If we turn our backs we are not going to be the party of human dignity we want as Republicans to be known for.

I ask that we make this a unanimous vote today and vote for ourselves and for our country, and for the future of our children by showing the world this Nation is still the land of opportunity and freedom.

This is a vote to help make the American dream a reality.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentleman from Arkansas (Mr. ALEXANDER).

Mr. ALEXANDER. Mr. Speaker, I rise in support of H.R. 3706.

On April 4, 1968, I was visiting the nearby city of Memphis and was at a place only about 10 blocks away from the Lorraine Motel where Martin Luther King was slain.

The news of his death spread like an electric current throughout that city and throughout our Nation, and a pall of silence fell upon the people of Memphis and the people of America as well.

□ 1420

At the news of Dr. King's death, everyone realized that a great American leader had fallen.

Martin Luther King struggled so that all citizens could aspire to and share in the American dream. He gave his life for dignity, for equality, and for justice.

It is right; it is proper that we memoralize the life of Martin Luther King so that his vision of America can live forever.

"I don't care what happens to me now. I have been to the mountaintop," Dr. King said, a day before he was cut down by a sniper, in the prime of his life and mission.

Martin Luther King himself desired no glory. It is not for his sake that we should honor him with a national holiday, but for our own.

Let us prove, at long last, that this prophet of mankind does have honor in his own country.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentleman from Oklahoma (Mr. EDWARDS).

Mr. DANNEMEYER. Mr. Speaker, I yield 1 minute to the gentleman from Oklahoma (Mr. EDWARDS).

Mr. EDWARDS of Oklahoma. Mr. Speaker, I support this resolution and I do so not because Dr. King is more deserving of a tribute than, say, Andrew Jackson, or John Adams, or Dwight Eisenhower, but because what Martin Luther King did was to give real meaning to the promise that in this country every citizen is a first-class citizen.

Before Martin Luther King, before the marches, before the sit-ins, blacks in my district rode in separate seats in the back of the bus. They could not use the restaurants or the restrooms that the rest of us used. They could not go to the same schools we went to.

They stood outside the system, outside the professions, and outside the good jobs. The American dream, if you were black, was poverty and isolation.

Martin Luther King did not create violence and bloody revolution. He defused it by creating a new awareness, a disturbed conscience, and finally a new national cohesiveness.

It is less the man than the achievement that we celebrate with such a holiday.

Dr. King gave his life for the cause of freedom and equality. Let us have the courage to vote to celebrate that cause.

I agree with the gentleman from Maryland (Mr. MITCHELL) this issue transcends the cost of one holiday. This is an issue that goes to the heart of what America is all about.

What this resolution celebrates is what we as Republicans and conservatives believe in, and I ask all of my colleagues to vote for it.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentleman from Georgia (Mr. GINGRICH).

Mr. GINGRICH. Mr. Speaker, we should honor Dr. Martin Luther King, Jr.

Yesterday President Reagan was welcomed to Georgia by Mayor Andrew Young, a disciple of Dr. King, and the second black mayor of Atlanta.

Without Martin Luther King, Jr., the advances in ending segregation and establishing civil rights would almost certainly not have occurred.

While Dr. King was black and the fight to end segregation directly affected the black community, his birthday should be celebrated by all Americans as a demonstration of the virtues of freedom and a free society.

When America's conscience was challenged, Americans responded. Unlike the Soviet Union and South Africa, our Nation responded to a direct challenge by living up to our best ideals.

All Americans can be proud that our religious tradition was carried on by Reverend King, our intellectual tradition was extended by Dr. King, the great nonviolent protest theories of Henry Thoreau were put into practice by the man, Martin Luther King, Jr.

For all time, all lovers of freedom will look back to Dr. King's life and to America's response to his challenge as an inspiration; because he enriched freedom for all, we owe ourselves a day to remember and relearn the lessons he taught.

Mrs. HALL of Indiana. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. GILMAN).

Mr. DELLUMS. Mr. Speaker, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from California.

Mr. DELLUMS. Mr. Speaker, I rise in support of the legislation.

Last November, as a birthday present from two members of my staff, I received a copy of "Let the Trumpet Sound," the excellent recent biography of Dr. Martin Luther King, Jr., by Stephen B. Oates. Reading this book was a painful personal pilgrimage, as well as an act of intellectual, spiritual, and political homage to an extraordinary person who has been such a major force in my own life's commitment to the cause of world peace, human rights, and equal justice for all.

More important, reading this book reinforced my determination to see to it that the 98th Congress passes legislation insuring a national holiday of remembrance and reverence in memory of the achievements of Dr. Martin Luther King, Jr. He was much more than a great American and the most noble of our Nobel Peace Laureates: He was a great human being whose life of commitment, action, and sacrifice has been a beacon of hope and inspiration for nonviolent social change to literally millions of people around the world.

In America, he was the living embodiment of the highest principles professed in the Declaration of Independence: That all are created equal and endowed by their Creator with certain inalienable rights, among which are life, liberty, and the pursuit of happiness. He challenged the conscience of America by confronting both church and state on the spiritual and political immorality of segregation in our society. It was Martin Luther King, Jr., standing in the shadow of the Lincoln Memorial on August 28, 1963, who had the courage to stand up to white America on behalf of nonwhite America and say:

When the architects of our Republic wrote the magnificent words of the Consti-

tution and the Declaration of Independence, they were signing a promissory note to which every American was to fall heir * * *. It is obvious today that America has defaulted on this promissory note, insofar as her citizens of color are concerned. Instead of honoring this sacred obligaiton, America has given the Negro people a bad check; a check which has come back marked insufficient funds. We refuse to believe that there are insufficient funds in the great vaults of opportunity of this nation. And so we've come to cash this check, a check that will give us upon demand the riches of freedom and the security of justice.

As a citizen of the world, Martin Luther King, Jr.. carried his message into the global arena: The message of human rights, true brotherhood and sisterhood through the justice of shared equality, and the reconciliation of nations through diplomatic negotiation, rather than the violence of war and destruction. In accepting the Nobel Peace Prize in Oslo, Norway, in December 1964, he spoke of "the need to overcome oppression and violence without resorting to violence and oppression." He then went on to say:

I refuse to accept the cynical notion that nation after nation must spiral down a militaristic stairway into the Hell of thermonuclear destruction. I believe that unarmed truth and unconditional love will have the final word in reality. That is why right temporarily defeated is stronger than evil triumphant.

It was Martin Luther King, Jr., using his eminence as a Nobel Peace Laureate, who chose to speak out on the insanity and immorality of the war in Indochina, despite the warnings and threats of other so-called leaders in the civil righs movement. Early on, he warned that the bombs being dropped in Indochina would explode in the ghettoes of America. In a speech in Los Angeles, he directly challenged Lyndon B. Johnson's false claim that America could have both guns and butter with these words:

The promises of the Great Society have been shot down on the battlefields of Vietnam. The pursuit of this widened war has narrowed domestic welfare programs, making the poor, White and Negro, bear the heaviest burden * * *.

On April 4, 1967, in the speech at Riverside Church in New York City, he made one of the most cogent critiques of American cold war interventionism and escalation ever uttered by a public figure. His peroration was a cry from the heart that is even more poignant when read in the light of the madness of the contemporary nuclear arms race:

Somehow this madness must cease. We must stop now. I speak as a child of God and brother to the suffering poor of Vietnam. . . . I speak for the poor in America who are paying the double price of smashed hopes at home and death and corruption in Vietnam. I speak as a citizen of the world, for the world as it stands aghast at the path we have taken. I speak as an American to the leaders of my own nation. The great initiative of the war is ours. The initiative to stop must be ours.

Were Martin Luther King, Jr., still alive today, he would be in the forefront of the movement to reverse the course of the nuclear arms race, and to prevent this Nation from continuing its overt and covert military intervention in Central America. And he would be in the forefront of the opposition to this administration's concerted effort to turn back the clock on the progress that has been made in the fields of civil and human rights in the past 20 years—progress that has been achieved through the bloody sacrifice of many brave, brave women and men in this society.

As we prepare to commemorate the 20th anniversary of the march on Washington, the legacy of Dr. Martin Luther King, Jr., is still, tragically, an unfulfilled dream. During a lifetime that was all too brief—only 39 years—Martin Luther King, Jr., was cursed, reviled, and spat upon, beaten, jailed, and stabbed, denounced as an extremist by the media, and as a nigger, and a traitor in the highest councils of Government. Finally, in an attempt to slay the dream, they slew the dreamer.

It is for us, the living, to make certain that his dream never dies. It is for us, the living, to insure that his life's work will be remembered beyond a statue inside the Nation's Capital. It is for us, the living, to insure that a national holiday, commemorating the legacy of his commitment, achievement, and sacrifice will be a constant reminder of what this Nation can be—and ought to be. It is for us, the living, to fulfill his dream, in the words of the civil rights anthem, that "we shall live in peace someday * * *."

Mr. FORD of Michigan. Mr. Speaker, will the gentleman yield?

Mr. GILMAN. I yield to the gentleman from Michigan.

Mr. FORD of Michigan. Mr. Speaker, I rise to support H.R. 3345, which designates the third Monday in January of each year as a legal, public holiday commemorating the birthday of Dr. Martin Luther King, Jr.

There is no doubt in my mind that this is a responsible course of action, both in terms of the past and the future. Dr. King and the cause he represented are indeed deserving of this kind of national recognition.

Dr. King was a nonviolent man who dedicated his life to the cause of equality. He exemplified our Nation's commitment to social justice.

He led a national campaign that pricked America's social conscience. And in the end he gave his life in that struggle.

Without question Dr. King and his work set the stage for the civil rights movement in this country. His eloquence, his passion, and his personal commitment captured the minds and hearts of millions upon millions of Americans and set them on a course of action—blacks and whites alike.

Dr. King was only 39 years old when his life was snuffed out by an assassin's bullet. By most ways of reckoning such things, his most creative years lay ahead of him. His untimely death was a tragedy for all America.

To be sure Dr. King's life was one of unselfish dedication. He worked tirelessly and without thought of personal reward for justice, equality, peace, and dignity.

What impressed me most about his vision and his cause was that it far transcended the narrow confines of a race struggle. His dream was for all Americans—blacks, whites, Jews, Protestants, and Catholics.

In large measure this proposed Federal holiday would go far beyond recognizing the birth of Dr. King. I fervently hope it will be an occasion to celebrate freedom and tolerance in America.

I especially want to commend my distinguished colleague from Indiana, KATIE HALL, for her skillful and dedicated stewardship of this bill.

Mr. GILMAN. Mr. Speaker, I rise to join in honoring a distinguished American, Dr. Martin Luther King. This measure, H.R. 3706, designating Dr. King's birthday as a national holiday, is a befitting commemoration of his life and his significant contributions to mankind. In a time of struggle, Dr. King's leadership provided our troubled Nation with a renewed sense of values and purpose. He reminded us that the principles upon which this Nation was founded are meaningless unless applied equally to all, regardless of race, color, creed, sex, or national origin.

In recognizing Martin Luther King's birthday, we do far more than honor this leader. A national remembrance in his honor serves as an appropriate reminder that many of his dreams and struggles for civil rights remain unfulfilled. Dr. King touched the conscience of America, preaching that love and understanding would prevail in the ultimate struggle between good and evil. He shared with us his dream that someday all God's children would be free and equal. And yet, his dreams and ambitions came to a tragic end because of the very hatred and bigotry that Dr. King sought to end.

If, as a Nation, we remember Dr. King's birthday each year, it will help instill a spirit of purpose and determination in all of us to fulfill the dreams of this inspiring leader. Such an annual reminder of that troubled era, a legal holiday in King's name, would appropriately honor the man, and his dreams and, at the same time, remind us all of our continuing responsibility to pursue equal justice for all. As I have done in the past, I renew my sup-

port for this worthy proposal and urge my colleagues to do the same.

Mr. DANNEMEYER. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota (Mr. FRENZEL).

Mr. FOGLIETTA. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Pennsylvania.

Mr. FOGLIETTA. Mr. Speaker, I rise in support of the legislation.

Mr. Speaker, today we have the opportunity to recognize, finally, the unique contributions made to this Nation by the late Reverend Dr. Martin Luther King. I rise to urge every Member of the House to vote in favor of this resolution, which will make Dr. King's birthday a national holiday.

Dr. King was an extraordinary man, whose struggle was the ultimate American struggle. His cause was, and is, as basic to our history and to our future as the Declaration which founded this Republic: "We hold these truths to be self-evident, that all men are created equal." It is our loss as a nation that the truths which we have held to be self-evident have not been the truths to which we have dedicated ourselves. Dr. King lived those words, and fought to make them a reality, as few other men in our history have.

Martin Luther King was a voice for peace, a symbol of courage, and a light in the long struggle to equality. His determination gave people throughout this land who had no voice the courage to speak: his leadership as a man of nonviolence gave vent to 200 years of anger and frustration in a way which forced people to listen.

Without Dr. King there might never have been a Civil Rights Act. Without Dr. King there might never have been a march on Washington to bring to the legislature of this land a list, not of demands, but of rights which the Constitution guaranteed but which the Nation applied only selectively.

Mr. Speaker, Martin Luther King was a man of wisdom, of vision, of strength, and of courage. He helped shape the future we live today. His belief, his work, and his dreams should be a beacon as we set course for the future.

These are the characteristics which mark great men. These are the characteristics which made Washington, Lincoln, and Jefferson leaders, and examples to us, and to our children. Martin Luther King was such a leader, such an example.

We honor our Nation by marking the birth of this great man, even as we honor the man.

I urge the House to vote "aye."

Thank you.

Mr. SAVAGE. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Illinois.

Mr. SAVAGE. Mr. Speaker, I rise in support of the measure.

Mr. BOEHLERT. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from New York.

Mr. BOEHLERT. Mr. Speaker, I rise in support of the legislation.

Mr. Speaker, on April 4, 1968, I sat in a church basement meeting in suburban Washington and was both shocked and appalled at what I heard. I was angry and I was upset.

No, it was not because of the tragic news yet to come from Memphis. My shock, my anger came because there was underway in that place of reverence—keep in mind this was a meeting in a church, a house of worship, a place of God—a heated debate among my then neighbors over a major issue of the day: open housing.

I was appalled because I heard people with whom I lived in a comfortable suburb in this so-called land of opportunity talking of denying housing access in "our" area to what they referred to as "those" people.

Regretfully, the "those" people were distinguished, and clearly so, only by the color of their skin. What was taking place in that meeting was a far from orderly attempt to deny equality of opportunity for fellow citizens. It made me sick.

I had my say, and the more I reflect upon what I said, the prouder I am.

Memories fade in terms of the letter of what I said, but not the spirit.

I doubt if there was any special eloquence, but I do know I quoted liberally from the news reports of the time and about the work of Dr. Martin Luther King, not just the work of Dr. King, but the necessity of it.

I talked about opportunity, and equality, and fairness, and things like that.

The presentation was not long because, you see, the meeting was interrupted by a report on the events in Memphis. The horror of it all was not so much that a fellow human being had been killed, tragic though such a thing always is, no matter what the circumstances, but rather the horror of it all was the reason Dr. King was gunned down.

Dr. King's life was taken because of who he was, what he was doing, what he stood for. His crusade, and it is fair to call it that, was not simply for those of his own race, but rather for all of his brothers and sisters who were Americans. His crusade was for me. For us.

What this remarkable man achieved in his lifetime cannot be accurately measured. But I know what I have told my children. We as a country and a people have traveled a long way toward the cherished dream of equality for all in my lifetime. Dr. King, more than any other individual, is responsible for that progress. It cost him dearly. It benefits us greatly.

I do not want just another holiday, we probably have too many of them already and most have lost their significance and are viewed as simply another day off. And I realize it is costly in terms of dollars and cents for the Federal Government to approve another holiday.

I know all the arguments that have been mentioned but I also know, in my heart of hearts, that this special day of recognition is warranted. It is warranted for Dr. King who gave so much for so many and it is warranted as long overdue recognition for the oh so many positive contributions made by other black Americans from the early days of our Republic, contributions that have more often than not been overlooked or ignored.

In short, Mr. Speaker, this is a salute and a symbol. Let us do it for all the right reasons.

Mr. FISH. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from New York.

Mr. FISH. Mr. Speaker, I take great pride in joining my colleagues today in support of H.R. 3706, legislation designating Dr. Martin Luther King, Jr.'s, birthday a national holiday. I have long been a supporter of this effort and I congratulate the gentleman from Michigan (Mr. CONYERS) for his 15-year pursuit of this worthwhile cause and the gentlewoman from Indiana (Mrs. HALL) for bringing this measure before us today.

By furthering the civil rights of American blacks, Dr. King contributed to the cause of freedom for all Americans, regardless of race or creed. By strengthening the cause of justice, he inspired millions throughout the world in mankind's common aspirations.

Last year, the Congress partly recognized Dr. King's contributions by approving a bill to place a bust of him in the U.S. Capitol. Dr. King is the first black man to receive such an honor. While this is an important achievement, it is not enough. That is why I have again lent my support to H.R. 3706, to make Dr. Martin Luther King, Jr.'s, birthday a legal public holiday. Our desire to achieve this goal should override consideration of cost or inconvenience.

Dr. King's message of redemption and reconciliation is no less meaningful today than during his lifetime. His life's work and unyielding adherence to achieving social change through nonviolence serves as a great example during these turbulent and troubled times.

Bestowing such an honor on Dr. King would transcend his status as a

black civil rights leader. Such an act would recognize that Dr. King spoke as an American about the spiritual liberation of all people. This year we have a chance to make our commemoration of his dream a permanent reality. He spoke of brotherhood, an end to poverty, of justice, of peace, for all mankind. We must continue to work together in furthering his vision of the future.

Mr. SKELTON. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Missouri.

Mr. SKELTON. Mr. Speaker, I rise in support of the legislation.

Mr. GEKAS. Mr. Speaker, will the gentleman yield?

Mr. FRENZEL. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. Mr. Speaker, I, too, support the legislation.

Mr. Speaker, to recognize the life of Dr. Martin Luther King, Jr., is to salute the themes on which our country was founded. The dream that he articulated was the same one that inspired our forefathers to give birth to the ideal we call America.

The opportunity for full realization of American citizenry is the goal for which we should continue to strive for all citizens. In our continuing efforts, the vision of Dr. Martin Luther King, Jr., will be a driving force.

Mr. FRENZEL. Mr. Speaker, the bill before us, H.R. 3345, is not a new bill. The idea of adding another, new Federal holiday, to honor the late Dr. Martin Luther King, Jr., was thoroughly debated and voted on in 1979.

As I have emphatically stated and strongly believe, Martin Luther King was a distinguished and prominent American citizen who helped teach many of us the true meaning of brotherhood and equality. He was a good man, an effective leader, and one who deserves to be honored and remembered by a fitting memorial.

One such memorial that I supported in 1981 was the creation of a bust or statue of Dr. King, to be placed in the Capitol. This resolution passed and a commission is currently in the process of choosing a sculptor. I wholeheartedly support and applaud this memorial that will be enjoyed and revered by Americans and foreign visitors alike. I know it is not the final memorial, but it demonstrates the House's willingness to honor Dr. King.

But what is this alleged tribute that is before us again today? It is not a fitting memorial to give certain priviledged workers a day off to salute the ideals of Dr. King. Dr. King deserves a day, but do Federal employees, including ourselves, rate another day off with pay.

Government employees, as far as I know, already have more holidays than any other class of employees. They are supposed to be here, to serve and assist the public. On too many occasions already they are on holiday when the rest of our constituents are working and want Federal services.

And what is the cost of another Federal holiday? It is $235 million, unbudgeted. To spend another quarter of a billion with our budget already plagued by deficits seems to me to be an unsuitable memorial. And that is only the annual cost. It will grow and grow each year.

When the Federal Government gives a holiday it puts great pressure on the private sector to do the same. As this proposed holiday spreads, it will have a marked effect on productivity. The potential cost is in billions of dollars.

I know that many of those supporting this Federal holiday have noble intentions. Yes, I agree that we should have a day to pay respect, honor, and to reflect on a man of such great achievements, beliefs, and hopes. We can do so without giving an extra day's pay to a certain specific class of Americans. A commemorative day is a good idea. In my judgment, that would be a suitable memorial.

Another paid Federal vacation day is certainly not needed or in order. It is another dip into the taxpayers pockets to pay a special class of Americans which already has plenty of holidays. We do not have to be foolish with the taxpayers' money to honor Dr. King.

I submit the following:

[From the Congressional Record, Nov. 13, 1979]

Mr. FRENZEL. Mr. Speaker, Martin Luther King, Jr., was a distinguished and prominent American citizen who helped teach many of us the true meaning of brotherhood and equality. He was a good man, an effective leader, and one who deserves to be honored and remembered by a fitting memorial.

Unfortunately, H.R. 5461 does not provide a suitable memorial. This bill simply provides another day off with pay for bureaucrats.

It also provides about $200 million worth of inflation through a nonnegotiated raise to an elite group of people who have just received a 7-percent pay raise, and who already receive more paid holidays than most American employees.

It has been alleged that there is little or no extra cost to the taxpayers in this bill. If Government employees have been working at full capacity, and I believe we should give them the benefit of the doubt, somebody is going to have to do the work that would have been done on the holiday. That seems to work out to a $200 million kick in the head to the taxpayers.

If we were to canvass our constituencies we would surely find little enthusiasm to pay for another paid holiday for bureaucrats. Many taxpayers did not get the 7-percent pay raise, nor do they get the splendid pension benefits that Government employee get.

In addition to the costs to the taxpayer, inflationary costs would soon reverberate through the private sector, too. Whenever Government employees are handed a benefit, private employees will claim it, too. Another paid holiday will soon be stimulating inflation in private industry, too, perhaps by as much as $3 billion.

Dr. Martin Luther King, Jr., was too good a person for us now to attempt to exacerbate inflation in his name. There are many suitable noninflationary memorials which could be voted by this House. I believe this bill does not provide a fitting tribute, and it should be voted down.

□ 1430

I yield back the balance of my time.

The SPEAKER pro tempore. The gentleman from California (Mr. DANNEMEYER) has 1 minute remaining.

Mr. DANNEMEYER. I reserve the balance of my time.

Ms. OAKAR. Mr. speaker, I make a point of order that a quorum is not present.

Mr. DANNEMEYER. I yield to the gentleman from Kansas such time as he may consume.

Ms. OAKAR. Regular order.

The SPEAKER pro tempore. The Chair will not entertain the point of order at this time.

The gentleman from California yielded to whom?

Mr. DANNEMEYER. Mr. Speaker, I yield such time as he may consume to the gentleman from Kansas (Mr. SLATTERY).

Mr. SLATTERY. I thank the gentleman for yielding this time to me.

Mr. Speaker, I rise in support of the resolution.

Mr. Speaker, "holiday" is defined as "a day on which custom or the law dictates a halting of general business activity to commemorate or celebrate a particular event." The birth of Dr. Martin Luther King, Jr., is an event worthy of commerating and, as such, is worthy of being designated a national holiday.

In my lifetime and in the lifetimes of many of my colleagues, few individuals have had as profound an effect on America and on the world, as did Dr. King. Few others before or since Dr. King have committed themselves so fully and so steadfastly to the principles of equality, justice and harmony among all people.

Today, as we debate making Dr. King's birthday a national holiday, we must keep in mind several issues. The principles upon which Dr. King based his philosophy and his actions are the same principles upon which much of recent legislation has been founded. In Congress, these principles have been translated into enactment of voting rights, civil rights, fair housing, and economic opportunity legislation. Furthermore, the movement toward arms reduction and peaceful coexistence of all nations is predicated upon those same principles.

While some with a myopic perspective choose to view Dr. King's beliefs and his actions narrowly, I choose to view his beliefs and his actions on a worldwide scale. Because he believed

in the dignity of all people and devoted his life to achieving that ideal, the significance of Dr. King's contributions transcends all nations and races. At the time of his tragic death, Dr. King truly had become an international leader.

I am proud to have had the opportunity to cosponsor legislation designating Dr. King's birthday a national holiday. I am not proud, however, that we find ourselves again debating an issue that has been introduced every year since 1968. I am proud that the Senate of my home State, Kansas, has had the wisdom and foresight to pass a resolution earlier this year memorializing Congress to declare Dr. King's birthday a national holiday. The members of the Kansas Senate are concerned, as I am, that passage of this legislation is long overdue.

We can pay no greater tribute to Dr. King in the 20th anniversary year of the historic March on Washington, than to reaffirm our commitment to equality and justice and to make his birthday a national holiday.

Mr. DANNEMEYER. Mr. Speaker, I yield such time as he may consume to the gentleman from the Virgin Islands (Mr. DE LUGO).

Mr. DE LUGO. Mr. Speaker, I rise in support of the legislation.

Mr. Speaker, I wish to add to the voices of many of my colleagues who rise in support of Mrs. HALL's bill designating Martin Luther King's birthday as a holiday. I find it hard to view my comments as part of a debate on the issue since it seems that the conclusion must be foregone: This country needs to celebrate Martin Luther King's birthday. We need to celebrate the individual who epitomized the struggles of many black leaders in this country and whose discipline and strength of purpose brought black Americans further into the mainstream of this country than any single person in our history.

Martin Luther King's achievement is important for all Americans, for the further we are from discrimination, the closer we are to the pride and dignity we all want to feel about these United States. Thus, apart from the recognition due to a man to whom we all owe an immense debt, Americans need this day as a reminder of the commitment we all must have to the values set forth in our Constitution. These are values which we personally hold as immutable and which we have an interest in protecting for each other.

I urge any Member who may have doubts on this matter to consider the importance that celebrating Martin Luther King's birthday holds for the very spirit of our Nation.

The SPEAKER pro tempore. The gentlewoman from Indiana.

Mrs. HALL of Indiana. Mr. Speaker, I ask that the gentleman from California yield back the balance of his time.

Mr. DANNEMEYER. The gentleman from California reserves the balance of his time.

The SPEAKER pro tempore. The gentlewoman from Indiana.

Ms. OAKAR. Will the gentlewoman yield to me?

Mrs. HALL of Indiana. I yield to the gentlewoman.

Ms. OAKAR. Mr. Speaker, I make a point of order that a quorum is not present.

The SPEAKER pro tempore. The Chair does not have to entertain a motion for a call of the House at this time and chooses not to.

Ms. OAKAR. I am sorry, I did not hear the Speaker.

The SPEAKER pro tempore. The point of order cannot be made when the Chair has not put the pending question, and the Chair has discretion whether to entertain a motion for a call of the House at this time and now recognizes the gentlewoman from Indiana.

Mrs. HALL of Indiana. Mr. Speaker, I yield 2 minutes to the distinguished majority leader of the U.S. House of Representatives, the gentleman from Texas (Mr. WRIGHT).

Mr. STOKES. Mr. Speaker, will the distinguished leader yield to me?

Mr. WRIGHT. Yes, I yield to my friend, the gentleman from Ohio.

Mr. STOKES. Mr. Speaker, I rise in support of this legislation.

Mr. Speaker, it has been 14 years since Dr. Martin Luther King, Jr., was assassinated in Memphis at age 39. The first bill proposing to establish a Federal holiday in honor of Dr. King was introduced by my esteemed colleague, Mr. JOHN CONYERS, JR., on April 8, 1968, less than 1 year after Dr. King's tragic assassination by James Earl Ray. Since then, over 50 bills have been introduced to establish Dr. King's national holiday.

Mr. Speaker, during hearings on many of these bills, there has been no lack of eloquence or evidence concerning the extraordinary achievements of the man who was the Nobel Peace Prize winner in 1964. During hearings that have been held there has been no lack of recognition of the man's indelible impact on the consciousness and consciences of people throughout the world. His name has been linked with those of George Washington, Abraham Lincoln, and—for his nonviolence—the name of Gandhi. I find it ironic that Americans saw fit to select "Gandhi" as the best picture of the year in 1982 and yet, their Representatives have refused to award a native Gandhi the recognition that typically accompanies superhuman contribution to society.

The arguments that have been advanced to prevent the establishment of a national holiday in Dr. King's honor have, in fact, centered upon his being human. Whenever Dr. King was an ordinary man—and all extraordinary people throughout history have had their ordinary moments—Dr. King was singularly held accountable for not being extraordinary. Any political statements, viewpoints, or opinions, any behaviors or actions that were not unequivocally exceptional, have been held against him.

Mr. Speaker, what other man has inspired millions and who gave his life in the cause of every principle of decency imaginable—freedom, justice, equality, compassion, faith in humanity, hope, love, and nonviolence—has been so mercilessly scrutinized. Who, among those who would excoriate this man, expects that his or her own mortality will leave a more illustrious aftermath than that of the late Dr. Martin Luther King, Jr.?

When superhuman people exhibit human imperfections, they are somehow deemed, thereafter, to be subhuman. I do not agree with this logic, nor do I see the presence of human imperfections in anyone as a sufficient justification for denying him a national holiday although his achievements have been outstanding. The requirement of perfection has not been a condition for the awarding of national holidays to other leaders, and it ought not to be a condition that should be met by the only black man for whom such serious annual consideration has been given to be so honored.

Mr. Speaker, it is beyond my comprehension, and therefore beyond my belief, that dollars and cents arguments have also been adduced to justify the prevention of the establishment of a national holiday to honor Dr. King and the universal principles for which he stood. And yet these arguments have been presented. Every year someone ticks off the dollars and cents that this Nation would lose by honoring Dr. Martin Luther King, Jr., with a public holiday.

Various substitutes, therefore, have been proposed to recognize Dr. King. These substitutes have included the placing of a statue or a bust of Dr. King in the Capitol, or designating some Sunday as his day of recognitation. But the life that Dr. King gave was not a substitute. It was not a facsimile thereof. It was the genuine thing: his own and his only life. I cannot accept, therefore, Mr. Speaker, a substitute tribute, an ersatz award, for this man who was true to humanity, true to the causes of freedom and justice, true to his commitment to nonviolence, true to his belief in the basic integrity of the American people, true to his dream.

Thank you, Mr. Speaker, for hearing my words in support of the passage of H.R. 3706 which has been introduced

this year by the gentlewoman from Indiana, Mrs. KATIE HALL, to designate the third Monday of January each year as a legal public holiday to commemorate the birthday of Dr. Martin Luther King, Jr.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Yes, I yield to the gentleman from Louisiana.

Mr. ROEMER. Mr. Speaker, I rise in support of the measure.

Mr. Speaker, much has been made here by the opponents of this resolution of the cost to the taxpayer of the Martin Luther King, Jr., national holiday.

I have a long established, hard-earned reputation in the House as a fiscal conservative. I am cautious and careful when it comes to spending the taxpayers' money.

With that background I reviewed and ask other Members to review the Congressional Budget Office's estimate of the annual cost of this holiday. CBO estimates a cost of $18 million annually. That works out to a cost of 7.6 cents per citizen per year.

For 7.6 cents per citizen we honor a man who led the civil rights revolution in our country—a revolution which ranks with the Civil War and the Revolutionary War of 1776, as one of the three most important events in our Nation's history.

For 7.6 cents per citizen we honor a man who reaffirmed the American dream that all men are created equal, who planted its seeds in ghetto deserts, and who reminded a nation to honor and respect its most precious resource: its people—all of them.

For 7.6 cents per citizen we not only honor an imperfect man who fought and died for the perfect dream, we also set aside a day of reflection on why we as a nation are different: our freedom. And on why we as a nation are great: our resolve to make the dream of freedom real for every American.

Is honor and the American dream worth 7.6 cents per citizen? I believe that at any price it is worth the cost, at 7.6 cents it is a steal.

Mr. GRAY. Mr. Speaker, will the gentleman yield?

Mr. WRIGHT. Yes, I yield to the gentleman from Pennsylvania.

Mr. GRAY. I thank the gentleman for yielding.

Mr. Speaker, I too want to join my colleagues in expressing my strong support for H.R. 3706, which designates the third Monday in January as a legal public holiday, commemorating the birthday of Dr. Martin Luther King, Jr.

Mr. Speaker, a few Members in this Chamber have expressed reservations about supporting H.R. 3706, due to its potential costs to the Government. Well, according to the CBO, there may be a potential budgetary impact of approximately $18 million to the Federal Government resulting from additional Federal holiday.

However, there is every reason to believe that these costs will be partially offset by additional tax revenues which might be generated from increased retail sales and consumer activity on such a holiday. In my mind the costs involved here are immaterial, however.

Second, their are those who say there are too many Federal holidays already, and we will do just as well by commemorating Dr. King's Birthday on the third Sunday in January instead of Monday.

In response, national holidays have heretofore been reserved for some of the greatest persons in our history.

Martin Luther King was one of the greatest men in our history, and in fact was a major force in reshaping the history of the United States in the 20th century.

For those who argue for a Sunday commemorative holiday I say, let us not confuse a national holiday with a holy day.

This legislation honors Dr. King not only for the strength of his leadership and the courage of his commitment to human rights, but also for his unique contribution to the fundamental principle that all men are created equal.

Finally, Mr. Speaker, in Dr. King's last speech, he said that he has been to the mountaintop, and had a vision that true equality for all people would become a reality.

By honoring Dr. King's birthday, we bring that vision a little closer.

By honoring, Dr. King's birthday, we honor a man not only because he changed American peacefully, but because he was a man who symbolizes the hopes and asperations of millions of Americans.

Martin Luther King's day must be a day for all America, because Martin Luther King's dream is the American dream.

Mr. WRIGHT. Mr. Speaker, I hope we will pass this bill and establish this annual holiday commemorating the birth of Martin Luther King, Jr. What could be more fitting than to have a time near the beginning of each year to pause and reflect upon the basic principle of the oneness of humanity so eloquently espoused by this remarkable nonviolent man who served as a hair shirt to the Nation's conscience and, for doing that, was slain.

From his unjust imprisonment Martin Luther King wrote that our generation shall have to repent not only for the hateful things said and done by the bad people but for the unthinking silence of the good people.

We need in this and in recurring generations recurring reminders of that solemn truth. And we can use a recurrent opportunity to renew our commitment to this Nation's fundamental goals of equality, fairness, and freedom and human dignity.

It was 20 years ago this month that Martin Luther King stood in the shadow of the Lincoln Memorial and proclaimed his now famous phrase, "I have a dream." Is it not the same dream to which this Nation proclaims its allegiance enshrined in the Jeffersonian words "All men are created equal"?

While the full implication of that dream is elusive and may never be wholly fulfulled, it must be pursued, and the distance narrowed between the promise of American principles and the reality of American life.

Passage of this bill today will not fulfill that dream, but it will fuel it and provide an annual time of renewal.

Just as Martin Luther King called upon people to stand up and be counted on the side of justice and dignity and self-respect, I call upon my colleagues today to stand up and be counted in behalf of this bill.

The SPEAKER pro tempore. The Chair will announce that the majority has the right to close, and the minority must use its time before that time or yield it back.

Mr. DANNEMEYER. How much time does the minority have, Mr. Speaker?

The SPEAKER pro tempore. The minority has 1 minute remaining.

Mr. DANNEMEYER. I thank the Speaker.

Why this matter came on the Suspension Calendar has not been made clear to me or to other Members of the Chamber. As the Members know, when it comes on the Suspension Calendar, no amendment is in order.

I believe that the amendment that should be in order is the opportunity for the House to express its will as to whether or not we recognize what Martin Luther King, Jr., has contributed to this country in the form of a holiday on a workday or on a Sunday. I happen to believe that this recognition day should be on a Sunday in order that we save the private work force the cost of another day off for employees and also the public sector employers of that same cost impact.

We should not overlook the words of a Washington, D.C., supermarket clerk who said as follows: "The man died trying to help black garbagemen keep their jobs. Let us have a 'King Day' but make people stay in school an extra hour and let people work overtime."

I think that gentleman's observation is entitled to respect, but unfortunately the way this procedure has been brought in the House, we cannot even give the Members of the House the opportunity to vote on giving life to what this gentleman recommended.

I ask for a "no" vote.

The SPEAKER pro tempore. The time of the gentleman has expired.

Mrs. HALL of Indiana. Mr. Speaker, I yield the remainder of my time to the distinguished Speaker of the House of Representatives, the gentleman from Massachusetts (Mr. O'NEILL).

Mr. DIXON. Mr. Speaker, will the Speaker yield?

Mr. O'NEILL. I am happy to yield to the gentleman from California.

Mr. DIXON. Mr. Speaker, this month marks the 20th anniversary of Dr. King's historic march on Washington, and it is fitting that the House is voting today on legislation that gives much deserved recognition to the life and work of this truly great American.

Twenty years ago, Martin Luther King shared with us a dream. A dream which became a vision for millions of Americans. A dream that sparked a nonviolent movement that promoted a peaceful end to much of the inequality of treatment some Americans received because of their race, creed, or color.

Dr. King focused this country's attention on the democratic principals and ideals upon which it was founded, and made us live up to the fundamental tenets of the Declaration of Independence and the Constitution—the equality of man and our quest for a more perfect union.

Today, our House has the opportunity to take a step forward in developing a more perfect union.

In commemorating a holiday to honor Dr. King, we give ourselves the opportunity to reflect upon the growth of our country, and acknowledge the problems we have yet to overcome.

The resolution reported by the House Post Office and Civil Service Committee offers a thoughtful balance to holiday legislation that has been introduced in every Congress since Dr. King's untimely death in 1968.

In response to the concern that a floating holiday would cause difficulty for business and industry, it establishes the King observance on the third Monday of each January.

In recognition of the 16 States and many cities that have already enacted holidays in Dr. King's honor, the effective date of this observance is January 1985. This date provides State and local governments, as well as the private sector, the opportunity to bring their observances in line with the national holiday.

Conflicts persist, our Nation and the world face many problems which result from the separation of people because of ignorance and fear. In establishing this holiday, we can indicate our belief that the ideals Dr. King lived and died for must still be pursued.

I urge you to indicate this body's resolve to maintain a strong and visible posture in securing basic civil and human rights in all of this country's endeavors through peace, compassion, and understanding so purposefully advocated by Dr. King by voting in favor of H.R. 3706.

Mr. O'NEILL. Mr. Speaker, it was two decades ago that I had the privilege to hear Dr. Martin Luther King proclaim "I have a dream" in his magnificent oration at the Lincoln Memorial.

Probably 50 Members of Congress went down that day to join 250,000 people by the reflecting pool. I remember a few petty men in the Congress of the United States asked for unnecessary rollcalls and quorum calls in order to force us to leave that historic occasion and return to the floor.

Martin Luther King changed America—all of America. He changed it not by a force of arms but by moral force.

He asked us to become the country that we always claimed to be: a country of equal justice, of equal opportunity, a country where all men—all men—are created equal.

He asked America to be as good as its Declaration of Independence, to be as good as its Bill of Rights. He asked all of us to take the words of our Founding Fathers and make these words come alive for all people. He asked for an American society that judges men and women not by the color of their skin but by the content of their character.

Martin Luther King showed our country the way to achieve equal opportunity and equal justice through nonviolence, through the enforcement of civil rights.

Many of us still remember in 1955 when a tired black woman, in Montgomery entered a bus and sat up front, where blacks were not allowed to sit.

A white came aboard and she was supposed to move back. Tired, weary and proud, she accepted jail, rather than move to the back.

Martin Luther King started this movement. Because he protested, because he marched, he brought segregation to its knees. And justice prevailed in that southern city.

The great monument to Martin Luther King will not to be built by what we decide here today. That monument is the historic tide of black Americans into the American democratic system, as citizens, as teachers, as professionals, as politicians, as leaders.

This living monument will endure and flourish to remind future generations of what Martin Luther King did—and what he led the rest of us to do.

The decision we make in the House today is not on Martin Luther King's place in history. That place is already secure. It grows stronger each day.

What we must decide is whether to ratify the decision of history or to remain silent. I urge my colleagues not to remain silent but to give to this great man the official honor that history has already bestowed on him.

Greatness has been proven by this great Nobel Prize winner. Human rights and civil rights are his monument.

I urge my colleagues to give ourselves an annual memorial to a man who set the true standard of what our country stands for. I urge my colleagues: Give Martin Luther King his day.

● Mr. McGRATH. Mr. Speaker, I rise in strong support of this legislation, which would commemorate the birthday of Martin Luther King, Jr., as a national public holiday.

Mr. Speaker, this great Nation of ours has been built and sustained by great men and women. All of us can probably think of any number of individuals whose contributions to this Nation deserve to be remembered and commemorated in one manner or another.

Why, then, do we take this opportunity to single out one man among many, Dr. Martin Luther King?

I think the answer is simply that there have been few individuals in the history of this country—perhaps no others—who have been so deeply committed to the sacred principles on which this Nation was founded. There have been few individuals who have done more to stir the conscience of this Nation to extend the basic rights of our Constitution to so many people.

The American of today is different in many ways from the America of a generation ago. In some ways things have not improved for the better. But in some ways, at least, we are a significantly better society. We are better because we are more tolerant of each other. And we are better because the laws of this land now require fair housing, voting rights, equal employment opportunity, and more educational opportunity.

Would we have achieved this state of affairs had there never been a Dr. Martin Luther King? Probably.

Would we have achieved this state of affairs in the time we have without Dr. Martin Luther King? Absolutely not.

Martin Luther King was many things—a clergyman, a political leader, a statesman, and perhaps most important, a prophet. It is fitting and proper that we set aside a day in his honor, not only because of what he did in the short time God granted him on this earth, but because we need to rededicate ourselves at least 1 day a year, to the principles for which he stood and gave his life.

I urge all my colleagues, Republican and Democrat, black and white, to support this legislation.●

● Mr. BORSKI. Mr. Speaker, I rise to express my full support for passage of H.R. 3345, which would designate the birthday of Dr. Martin Luther King, Jr., as a national holiday.

We are long overdue in remembering the contribution of one of the greatest men in this Nation's history. Dr. King worked toward the achievement of equality and justice for all Americans. He courageously stood for the principles of equal rights, social justice, and political opportunity for all. His efforts awakened America to the fact that racial discrimination and inequality still exist, over a century after the Emancipation Proclamation and the passage of the 14th and 15th amendments to the Constitution. Efforts have been made ever since his tragic death in 1968 to establish this national holiday. It is time we formally recognize this great American by setting aside the third Monday in January to remember him.

Dr. King strove for social change through the use of nonviolence. He showed us those aspects of our society that required change, yet did so in a way that worked within the existing system. The period witnessed a dramatic upsurge in public support for the civil rights movement, with subsequent progress in equal housing, employment, and political participation. Dr. King's accomplishments are testament to the fact that an individual can make a difference in our society, and do so without violence.

The observance of Martin Luther King's birthday is more than the remembrance of a great man. It is a moment in which we can remember the principles on which this Nation was founded. This Nation was founded on the belief that every individual is equal under the law, and thus is afforded every opportunity for personal advancement. Our future depends on our continued dedication toward the goal of full equality for all our people. Dr. King once expressed his dream that people "not be judged by the color of their skin, but by the content of their character." The observance of this national holiday demonstrates our continued commitment to the ideals that Dr. King sought to teach us.

Mr. Speaker, I urge my colleagues to join me in supporting this legislation.●

● Mr. MOORE. Mr. Speaker, the House should be permitted to freely and openly construct the most meaningful way to annually observe and honor the contributions to our society left by Dr. Martin Luther King, Jr. Today a bill is brought to the House floor to declare the third Monday of each January a national legal holiday in honor of Dr. King. Others wish to set this observance on a Sunday or wish to establish a holiday in some manner without increasing the total number of holidays allowed Federal employees. These alternatives cannot be offered today as the procedure used to consider H.R. 3706 prevents consideration of any amendments.

The central question should be observance of a holiday with the Nation's attention drawn only to the message of Dr. Martin Luther King. Instead, we are presented with a bill and a procedure that violates the freedom of open debate and decision Dr. King held so precious. I cannot vote for H.R. 3706 under these terms. I cannot vote for a bill that places emphasis on Federal employees having another day leave in the same context as the genuine purpose of this holiday. I do support recognizing his birthday in an appropriate manner as determined through the full legislative process.

The last Congress with my support approved authorization for placement of a bust or statue of Dr. Martin Luther King, Jr., in the U.S. Capitol and I have urged the Joint Committee on the Library to act expeditiously in its selection of a sculptor for this purpose including consideration of a nationally recognized black sculptor from Louisiana. I trust time will not be lost in making sure this work is undertaken, completed, and the statue or bust placed in a prominent position in the Capitol for all to view and remember.●

● Mr. FIELDS. Mr. Speaker, I rise in opposition to this legislation, H.R. 3706, which would designate the third Monday in January as a legal public holiday to commemorate the birthday of Martin Luther King, Jr.

Mr. Speaker, I share my colleagues' respect and admiration for the late Dr. Martin Luther King. However, I cannot support the legislation before us here today for a number of reasons.

First of all, I oppose this legislation being brought before the House on the Suspension Calendar. I believe legislation dealing with Federal holidays should be brought up before the House on the regular Union Calendar so that other alternatives such as the one offered by Mr. DANNEMEYER would have the opportunity to be reviewed and debated by the whole House.

Additionally, I am most concerned about the cost of a new Federal holiday. The personnel cost of a holiday to the Federal Government alone is $221,000,000, according to the Office of Personnel Management. And although the Federal Government has no jurisdiction to propose national holidays for other Federal employees, individual States usually follow its lead. The added personnel costs of such action could result in 10 or 20 times the $221 million estimate for the Federal Government.

Mr. Speaker, I am also most concerned about the precedent we set here today if we were to pass this legislation. Presently, there are nine paid Federal holidays. The last time Congress enacted legislation designating a paid Federal holiday was in 1941. Mr. Speaker, I believe if we pass this legislation we will be opening the floodgates for future such actions. I feel as one of the earlier speakers that we in Congress should instead enact a Federal policy respecting Federal holidays and the procedures to be followed for such commemorative days.

Finally, Mr. Speaker, I find it quite interesting to note that of the nine current Federal holidays, none is dedicated to any of the great figures of American history, including George Washington, Abraham Lincoln, or Theodore Roosevelt. Instead of the legislation before us here today, I believe we should instead act on legislation which would recognize all great American historic figures including Dr. Martin Luther King, Jr.

Thank you, Mr. Speaker.●

● Mr. MINETA. Mr. Speaker, I rise to support this legislation.

Martin Luther King served all Americans by pursuing the promised land of equal opportunity peacefully and bravely. All public officials should recognize the force and importance of that example.

Martin Luther King was indeed an American hero. There can be no doubt about that. But he was and is much more than a hero. He lives on as a symbol—a symbol of freedom and compassion, of peace and equality.

And we should understand that by voting for this legislation, by voting to recognize this great man, we are voting to pay homage to our Nation's most basic and important principles.

I urge my colleagues to pay homage.

Thank you.●

● Mr. COYNE. Mr. Speaker, I rise in strong support of H.R. 3706, a bill to designate the third Monday of January as a holiday in honor of Dr. Martin Luther King.

If ever we needed to set aside a day of the year to reflect on the inspiration of a man of peace, now is the time. Dr. King's views on the arms race are as appropriate today as they were in 1964 when he accepted the Nobel Peace Prize. He then said:

> I refuse to accept the cynical notion that nation after nation must spiral down a militaristic stairway into the hell of nuclear destruction.

Dr. King, suggesting his own eulogy just 2 months before he died, remarked that if he were to be remembered he hoped it would be as a "drum major for justice and for peace." He said to his wife, Coretta Scott King:

> Yes, if you want to say that I was a drum major, say that I was a drum major for justice; say that I was a drum major for peace; I was a drum major for righteousness; and all the other shallow things will not matter . . .

What could be more fitting that a national holiday in honor of a man who devoted his life to peace and jus-

tice? I have heard the arguments against designating a day in January as Dr. Martin Luther King Day, arguments which suggest that it will somehow lessen worker productivity or increase Government costs. I do not find them convincing. The Commonwealth of Pennsylvania has had a State holiday in honor of Dr. King for a number of years. It continues to function as well as any other State. I hope this Congress will follow the example of Pennsylvania. Dr. King inspired not only our State, he inspired the Nation.

I urge my colleagues to vote yes on H.R. 3706.

At this point I would like to include in the CONGRESSIONAL RECORD the text of a 1981 Pittsburgh City Council resolution which calls on the Congress to declare a holiday in honor of Dr. Martin Luther King.

The resolution follows:

RESOLUTION No. 34

Whereas, the Reverend Martin Luther King, Jr. dedicated his life and endeavors to the achievement of a just and healthy society and the enhancement of respect and trust in our institutions and the insurance that all citizens are treated equally before the law; and

Whereas, his outstanding contributions included the Nobel Peace Prize and other forms of international recognition; and

Whereas, January 15 is the birthdate of this great American and is celebrated throughout the United States of America; and

Whereas, celebrations are held in schools, churches and community centers; and

Whereas the Commonwealth of Pennsylvania has designated January 15 as a State holiday; and

Whereas, the United States Congress has been petitioned to designate January 15 as a National legal holiday; Now, therefore, be it

Resolved, That the Mayor and the Members of Council of the City of Pittsburgh on behalf of the residents of the City of Pittsburgh do honor and recognize the birthdate of the Reverend Martin Luther King, Jr. and encourage the Congress of the United States to designate January 15 as a National legal holiday.●

● Mr. MARKEY. Mr. Speaker, today, we debate a bill that should pass the Congress 435 to 0. The need for Dr. King's birthday as a time of national rememberance should be self-evident. It would be a time to rekindle his call to us—black or white or brown or whatever—his call to us for justice and equality for all Americans.

After all, it was 20 years ago this summer that Dr. King came to Washington to bring the needs and demands of his people to our attention. Like so many high school students of the time, I heard Dr. King's message and was moved. It affected our generation, wherever we were, and changed our hearts and our minds.

But that was 20 years ago. Many American youths—and adults—have not heard Dr. King's message. Many lead lives which are still racially isolated, still insulated from the call of his words and his deeds and his accomplishments. A holiday to remind us of his work—1 day each year—would be more than an important means of honoring a slain national leader: It would be a needed national educational effort to keep us on track; on the road to freedom and justice for all people. It is our failure of the past few years, our failure to keep moving, keep rolling down this path which demonstrates how desparately this holiday is needed now. I urge my colleagues to vote for H.R. 3706.●

● Mr. LUKEN. Mr. Speaker, I urge the House of Representatives to pass H.R. 3706, legislation establishing a national holiday in honor of Dr. Martin Luther King, Jr.

I firmly believe that Dr. Martin Luther King made substantial contributions to the social, political, and spiritual foundations of this country. His courageous advocacy of peace, equal justice, and nonviolence establishes him as one of the truly great leaders in American history. His dream of an America with equal justice for all became a vision for millions of Americans and it sparked a movement which sought peaceful change and the removal of barriers due to race, creed, or religion. A national holiday commemorating the birth of Dr. King gives this great American leader the recognition which his life and work so richly deserve.

H.R. 3706 should be passed overwhelmingly by the House of Representatives, designating the third Monday of January of each year as a legal public holiday to commemorate the birthday of Martin Luther King, Jr. The effective date of this observance is January of 1985, which gives State and local governments, as well as the private sector, the opportunity to prepare for observance of this new national holiday. The Congress should recognize the important contributions of Dr. King and establish a national holiday which will allow all Americans to reflect upon the ideals for which he stood.●

● Mr. WIRTH. Mr. Speaker, our Nation has always celebrated its great leaders: People who, through foresight and wisdom have united our Nation in times of turmoil and apprehension and challenged us to be great. George Washington led us through a war and into our life as a new and uncertain nation. Abraham Lincoln held that nation together through its darkest and most painful crisis.

Mr. Speaker, in our time we have known such a man: Dr. Martin Luther King, Jr. Born without the advantage of skin color enjoyed by Washington and Lincoln, King brought to a confused and troubled nation a new understanding of its commitment to equality, justice, and human dignity.

To Dr. King, these were not simply words to be set in stone and then defended as one would a city or a strategic hill top. Rather, they were dynamic realities, born fresh every day of commitment and action. From his church in Atlanta, from the buses and highways and jails of the South, and from the streets of the North, King reminded this Nation of the human dignity and the equality which is everyone's "inalienable right."

From the steps of the Lincoln Memorial, Dr. King shared with us a dream which we must continually make our own. For it will only be through such vigilance that we will maintain not only those freedoms won by King and his nonviolent civil rights movement, but all those rights and liberties we have struggled for over 200 years to preserve.

Mr. Speaker, 1 day our Nation will realize "the true meaning of its creed." And when we do, we must remember Dr. Martin Luther King, Jr., the great American who pointed the way. That day will truly be his day. But we can start today by remembering King as we do all our heroes, and by dedicating a day each year to his memory, to his words and deeds, and to the work we have remaining to make his dream a beautiful reality.●

● Mr. DORGAN. Mr. Speaker, I was proud to vote today in favor of honoring Dr. Martin Luther King, Jr. Dr. King's vision of an America with true equality for all and his commitment to the pursuit of justice through nonviolent change should be recognized by this country.

It would be my preference, however, that we find a different way to memorialize this great man than by establishing another national holiday. That is costly to the Federal Government as well as to the private sector.

One specific suggestion is to establish a national day of remembrance on the third Sunday of January. Or, we could consider memorials or fitting tributes such as those memorials in Washington, D.C. which acknowledge the greatness of many for whom there is no formal holiday.

I would hope that the Senate might modify our bill so as to preserve the intent of the House action but not create a new Federal holiday. Dr. King was a truly extraordinary American. I believe his legacy must be appropriately honored, and that is why I voted for the concept embodied in this legislation.●

● Mr. TOWNS. Mr. Speaker, Dr. Martin Luther King, Jr. was undoubtedly one of the greatest men in the history of our country, who lived up to the highest ideals of humanity. He was instrumental in leading the search for freedom for all Americans, within an unbending framework of nonviolence.

Dr. King's ideals are as relevant today as they were in the 1960's, a decade which he influenced tremen-

dously. He is a man we must never forget, because the ideas and values which he so strongly and unselfishly believed in, were for the betterment of all mankind.

A national holiday in Dr. King's name would be a day in America for millions of citizens, of all races, to reflect on, and rededicate the Nation to, the purposes of his life's work. Time often diminishes the memory of great leaders. This is not the case with Dr. King. He is among a small number of great leaders for whom respect, honor, and admiration have grown increasingly with time.

Further, this holiday would not just be a celebration of one man's life, although extraordinary. Rather, it would be a day for the entire Nation to memorialize the ideas he represented and the moral purpose that we desperately need to recapture today.●

● Mr. PHILIP M. CRANE. Mr. Speaker, my vote in opposition to H.R. 3345, designating the birthday of Martin Luther King, Jr., a legal public holiday should not be interpreted as a statement that we should not honor the man and his vision. Rather it is the question of the effect of most legislation we pass—the cost to the taxpayer and to our Nation's business of removing another productive workday from the calendar year. It will cost $225 million in lost Federal work force productivity. The U.S. Chamber of Commerce estimates it will cost businesses $4.3 billion.

I also question the propriety of Dr. King's being so honored. Jesus Christ is the only individual whose birthday is now so recognized. We have discontinued honoring George Washington's birthday, instead we celebrate President's Day.

It should be noted that the States are at liberty to create whatever State holidays they choose; 17 States now honor Dr. King's birthday, two of them designate it a Sunday. In Illinois, we honor Lincoln, in Virginia they honor Robert E. Lee, and in Alabama they honor Jefferson Davis. Let the States take this action.

Finally, when the bill was considered in the House Committee on Post Office and Civil Service, an amendment was offered that would proclaim Sunday such a day. If it is the intent of the bill's proponents to provide a day commemorating Dr. King's efforts to gain equal justice for all, it seems to me the best way to do this is to designate a Sunday for such a day. It should be noted that this option was precluded by the procedure used to bring the bill to a vote. The Washington Post quoted a supermarket clerk who commented on the matter of establishing a Federal holiday for Dr. King:

The man died trying to help black garbagemen keep their jobs . . . Let's have a King Day, but make people stay in school an extra hour and let people work overtime.

Mr. Speaker, it is that sentiment which I am sure Martin Luther King would have endorsed.●

● Mr. GEJDENSON. Mr. Speaker, I rise to congratulate my colleagues in the House on the passage of H.R. 3706, a bill to make the third Monday in January a national holiday in commemoration of the birthday of Dr. Martin Luther King, Jr. It is particularly fitting that this bill has passed the House at this time while we are preparing to celebrate the 20th anniversary of Dr. King's historic 1963 march on Washington.

In my home State of Connecticut we have recognized Dr. King's birthday as a State holiday for several years, the time is long overdue for the Federal Government to officially honor this great man in the same way. I would hope that the Members of the Senate and the President will act swiftly to complete action on this very important measure.

Dr. King was one of our greatest leaders, in one of our most troubled times. By setting aside a day to honor his memory we can insure that future generations will learn of Dr. King's valiant struggle for civil rights and justice for all people. I can think of no man who would serve as a finer example for our young people, and with much of what Dr. King set out to accomplish still not achieved, we must do all we can to encourage others to follow in his footsteps. I was proud to vote with the majority of my colleagues in the House today to honor Dr. King and reiterate my hope that the Senate and the President will follow suit.●

● Mr. BIAGGI. Mr. Speaker, I not only rise in support of this legislation but also with a certain sense of indignation over how long it has taken us to achieve what this bill sets out to do. H.R. 3706 would designate the third Monday in January of each year as a legal public holiday to commemorate the birthday of Dr. Martin Luther King, Jr. We must pass this bill if we are to correct an injustice of history of tremendous magnitude.

The detractors from this legislation concentrate their efforts on raising arguments about the cost of establishing another legal Federal holiday. There are nine such holidays in existence today and I do not recall any of them being subjected to this degree of scrutiny if not outright delay.

A national holiday is perhaps the only real and fitting tribute this Nation could pay to the memory of Dr. Martin Luther King Jr. Dr. King was a man of enormous influence over this Natioan and remained so until he met a sudden death by assassination. Yet almost 14 years after the fact, we have failed to establish any appropriate national tribute to the memory of Dr. Martin Luther King.

I am not persuaded by the arguments of those who charge the cost of a new Federal holiday would be prohibitive and this serves as a justification for us not observing this holiday. It does seem to me that by having the day designated on a Monday would serve to minimize the extra costs.

The issue to me is basic—do we at long last pay an appropriate national tribute to the illustrious Dr. Martin Luther King, Jr., by designating his birthday as a national holiday—or do we continue to prolong this omission of history? I urge us to pass this bill in sufficient time for it to be the focal point at the upcoming 20th anniversary observance of Dr. King's famous march on Washington—an event which so acutely shaped the course of civil rights in this Nation. Let us not promote in this Congress the same type of injustice which Dr. King fought so hard to eliminate from our society. Therefore, I urge passage of H.R. 3706.●

● Mr. NICHOLS. Mr. Speaker, Dr. Martin Luther King, Jr., was a great leader of our generation, and, in the minds of many citizens, he is undoubtedly respected equally with President Abraham Lincoln, who brought about the end of slavery in this great Nation. We honor President Lincoln on the Sunday in February that falls nearest his birthday, and the House should at least be allowed this same choice when considering such an appropriate recognition of Dr. King.

By considering this bill under suspension of the rules, the Members' hands are tied, and the only choice is to accept another paid Federal holiday at the expense of the taxpayers, or not. This is not an appropriate way to consider honoring Dr. King. While the Congressional Budget Office has estimated the costs to be $24 million, I recall that when this was considered back in 1979, a figure of $212 million was noted in the RECORD.

As we are currently facing a budget deficit of $200 billion, and interest rates have started to climb again, another paid Federal holiday is simply the wrong signal for the House to send to the financial market. This will only serve to further increase prices and place additional burdens on our poor and elderly; another holiday for our postal workers will only serve to further increase the cost of postage for our citizens who cannot get about as easily, and who are more dependent on the mail.

Mr. Speaker, I would want to support some appropriate recognition of the work of Dr. King, but this legislation is too restrictive and offers no alternative. I do not believe that the taxpayers of our Nation can afford another Federal holiday at this time, and

the bill before us offers no other choice.●

● Mr. LEHMAN of California. Mr. Speaker, I rise today to express my support for H.R. 3345, designating the third Monday in January of each year a legal public holiday to commemorate the birthday of Dr. Martin Luther King, Jr.

Passage of a bill such as H.R. 3345 is long overdue. Dr. Martin Luther King, Jr., made monumental contributions to the Civil Rights Act and was responsible in large part for the U.S. greater national commitment to the achievement of equality.

Like many of the greatest men in history, Martin Luther King, Jr., proved that there is no limit to what can be accomplished by peaceful means. Today we are witnessing hostility in almost every corner of the world. Iran and Iraq have waged a senseless war for the last 32 months, religious turbulence continues in the Middle East, in Africa, Chad is struggling to counter the military dominance of Libya, and in Central America the United States is financing a covert war which most Americans know very little about.

Surely, today more than ever, we could benefit from a day which would serve as a constant reminder that peace can be a valuable tool in obtaining one's objectives.

Although Martin Luther King, Jr., is no longer with us, the perpetuation of his memory will serve as a reminder and a lesson for all of us that skin color and violence should play no role in our relations with the people around us.●

● Mr. RATCHFORD. Mr. Speaker, today I rise in remembrance of a dream, and of a dreamer, the late Dr. Martin Luther King, Jr. Dr. King, being the wise and sightful man that he was, had a vision that one day all men would rise up in recognition of the bond that we all share as human beings. King believed that man was capable of expressing a deeply rooted love and that his love could overshadow all of our differences, all of our hates and prejudices. I too believe in Dr. King's dream. Though he has been dead for many years now, I know that the dream is not dead. This is why I am here today asking my fellow Congressmen to join me in recognition of the important contributions Dr. King made to our Nation, by supporting his birthday as a national holiday.

Dr. King once said that,"The man who won't die for something is not fit to live." King did not simply die for the sake of blacks and the poor. He died for blacks and whites, for all of mankind. He believed as do I, that if we are to truly be a great world leader, we must caress all of our people, making everyone an equal part of our Nation. In his famous 1963 speech, Dr. King said:

We will be able to speed up that day when all of God's children, black men and white men, Jews and Gentiles, Protestants and Catholics, will be able to join hands and sing, Free at last! Free at last!

This is the caliber of man we had in Dr. King.

Everyone here today knows of Dr. King's heroic story and his quest for equality for all mankind. I, therefore, will not elaborate too much on his role in the civil rights movement and his use of nonviolent action. However, one campaign deserves particular praise. Dr. King's Birmingham campaign in 1962. Under Dr. King's leadership, the Gandhi method of nonviolent resistence was revised, tested, and proven to be an effective vehicle for bringing about social change in the United States. By attacking the economic power of Birmingham, King and his associates gave the civil rights movement life by bringing it to the attention of America. Protesters, trained in nonviolent resistance, were peaceful and turned the other cheek, even while being attacked by dogs. Hundreds at a time were jailed and beaten. Even more alarming to the millions of Americans, who viewed this movement on television, was the use of young children, also trained in nonviolent action. These children stood up to the fangs of police dogs and many were jailed. In the face of this revolution and bravery, the moral conscience of the Nation was deeply stirred. To all the country, Dr. King's fight became the fight of decent Americans of all races and creeds.

Priests and rabbis, young and old, black and white, followed King and were instrumental in his accomplishments. Members of every class, faith, and profession joined hands and marched alongside King. This army fought a long hard battle with their one weapon, love.

Progress toward the eradication of racial injustice was indeed one of Dr. King's accomplishments, yes. But there is a much larger story. Dr. King's movement enlarged the concept of brotherhood to a vision of total interrelatedness. Nonviolence, as practiced by Dr. King proved to not only be the answer to the needs of blacks, but to the most adequate needs of all humanity. Since Dr. King's heroic stand for human rights, we have seen the use of his tactics and philosophy by several groups seeking equality; womens groups, religious groups, war protestors, and students. Dr. King's struggle had a significant impact on the achievements made by these groups of all of America. We are all, therefore, deeply indebted to Dr. King for his guidance in the area of social change.

Dr. King and his dream inspired us to attempt to reach new heights, to reach beyond our wildest imagination, to a world of peace and love for mankind; a world where men are judged by their deeds instead of by the color of their skin, social status, or religion. He knew that the hate, so deeply embedded in our society, would destroy us; or at least prevent us from reaching our greatest potential. We must, therefore, preserve his legacy, and grasp this message, so that generations to come will know of this great man and his struggle for human rights. A day each year named in honor of this great American, is not simply a day of remembering his movement, but a day that we can stop and relish the dream he had for us, a day to explore the possibilities of his dream coming true. Dr. King's birthday, as a national holiday would symbolize our commitment to world peace and love of mankind.

Its been 5 years since legislation was introduced which would make King's birthday a national holiday. Those of us who believe in the dream have kept the faith and the dream alive. Many counties and cities already observe such a holiday. All arguments against the passage of this legislation have been fully considered and found without merit. The need for this holiday is indeed needed today more than ever.

Dr. King's contributions to our Nation, and certainly his sacrifice cannot possibly be measured. He was a man of love, who used love to obtain his objectives. King was jailed several times, beaten, stabbed, and had his house bombed. In the light of all of this, King continued to fight his enemy with love. "Hate is rooted in fear, and the only cure for fear is love," was a favorite saying of King's. With his undying love for mankind King helped to break still another chain which enslaved our country's black and poor. He forced America to take a look at itself and its hypocrisies. How many men in our lifetime, in this country, can you remember having such an impact on our Nation. We may never see such a man again. We must, therefore, not forget his courage or his sacrifice. He had but one message; that we must love one another. By doing so, Dr. King felt that we could overcome all of our barriers. We must remember King and his legacy, for as we strive to fulfill his dream, we are really striving for a better, more peaceful life for ourselves.●

● Mr. OTTINGER. Mr. Speaker, I urge the passage H.R. 3706, a bill which would establish a legal Federal holiday on the birthday of Martin Luther King, Jr.

Such a holiday would serve foremost as a tribute to and commemoration of Dr. King's lifetime of struggles on behalf of the cause of freedom and equality, a cause for which he gave his life. The extent of Dr. King's contributions to the movement for civil rights and social justice is beyond estimation.

As organizer, orator, lobbyist, leader, and as the great strategist of nonviolent protest, Dr. King gave every ounce of his energy to help build a more just society.

His accomplishments, however, cannot be measured merely in numbers of laws passed, numbers of institutions integrated, numbers of protest goals achieved as a result of his efforts. By all these measures, and many more, his accomplishments can only be described as superhuman. But perhaps even more important was Dr. King's accomplishment as the greatest moral leader of his generation, perhaps of this century. Dr. King inspired people of all backgrounds and faiths to defy a system which for so long had perpetuated discrimination and injustice; and he exhorted all Americans to live up to the vision of brotherhood embodied in our Bill of Rights. A member of one of the most alienated groups in American society, he became his generation's greatest expositor of the American dream.

A commemoration of Dr. King's birthday would also serve as a testament to all the thousands of individuals who gave their time, their strength, and in some cases their lives, in the cause which Dr. King so valiantly guided. His principal strategy was one of mass action, and it is fitting that a day of remembrance for Dr. King should be viewed equally as a day of remembrance for the anonymous thousands who shared his struggle. Those who fought, and those who continue to fight, the battles of the civil rights movement have, as Dr. King put it, "through tenacity and creative commitment, injected new meaning into the veins of American life."

Dr. King was also a vocal leader against our foolish participation in the Vietnam war. He was a great advocate of peace. Were he with us today I have no doubt he would be leading us in protest against our involvement in President Reagan's Central American war—as sadly no leader has arisen to do today.

The most important function of a holiday on Dr. King's birthday, then, would not be to look back in order to pay tribute, but to look forward, to dedicate ourselves to the causes for which Dr. King ceaselessly toiled. In his last book, "Where Do We Go From Here: Chaos or Community?" Dr. King observed that—

> Much has been done, but it has been accomplished by too few and on a scale too limited for the breadth of the goal. Freedom is not won by passive acceptance of suffering. Freedom is won by a struggle against suffering.

That observation remains equally accurate today.

A few weeks from today a coalition of groups from all across the country will hold a demonstration on the Mall to mark the 20th anniversary of the March on Washington. They will be calling on our Nation to take up Dr. King's unfinished agenda, to recommit ourselves to the fulfillment of the dream he expounded 20 years ago. The establishment of a Federal holiday on the birthday of Martin Luther King, Jr., would provide a national day of rededication to that dream, to the goal of a truly just national community.●

● Mr. IRELAND. Mr. Speaker, Dr. Martin Luther King's place in American history has been guaranteed by his commitment to equal justice for all and change through nonviolence.

Today, as that struggle to promote freer and more diverse access to this country's resources continues, the unrelenting growth of Government spending and deficits clearly stands as the greatest obstacle to full employment, equal access to opportunity and prosperity—matters of great concern to all Americans.

Given this reality, the creation of another Federal holiday—with its accompanying adverse fiscal implications—does not seem to be the proper vehicle to honor Dr. King. The cost to our government of a new Federal holiday would be a minimum of $235 million at the Federal level and an additional amount at the State level.

Dr. King's message was inspirational and spiritual. His day of recognition ought to reflect that fact.

I would support an alternative proposal to set aside a specified Sunday as the holiday, or declare a national day of prayer and meditation in his honor.

My feeling on this matter are very sincere and I would not be in favor of creating an additional holiday for any American.●

● Mr. MATSUI. Mr. Speaker, I rise in support of H.R. 3706 designating January 15 as a national holiday in honor of Dr. Martin Luther King.

A relentless campaigner for human rights, racial justice, and world peace, Dr. King's words remain insightful and much needed today. In fact, over the last 15 years the importance of Dr. King's efforts have become increasingly apparent.

In today's vote, the House can at long last provide the special recognition that this great American leader deserves. In designating this holiday, we not only recognize the contribution of black Americans to our Nation's progress; we as well underscore our society's awareness that greatness comes in many forms. As we rightly honor certain presidents and military achievements, we can also honor a man who did not hold elective office, but whose main achievement was to remold the conscience of an entire nation.

Mr. Speaker, I urge support today for this resolution in the interest of all Americans, for it is this vast constituency which Martin Luther King ultimately served so nobly.●

● Mrs. SCHROEDER. Mr. Speaker, I rise in support of this legislation to create a national holiday commemorating the birth of Dr. Martin Luther King, Jr. It is most appropriate, and long overdue, that we recognize Dr. King's great contribution to the struggle for civil rights and social justice in this country by creating a holiday in his honor.

Dr. King's actions have touched all our lives. He was able to focus the Nation's attention on the institutional barriers that prevented black Americans from voting, getting a quality education, and receiving just treatment from the courts. Numerous pieces of legislation, including the Civil Rights Act of 1964, and the Voting Rights Act, were enacted largely in response to Dr. King's persistence in demanding that all Americans, regardless of the color of their skin, receive the constitutional protection of equal protection under law.

The nine national holidays currently observed by Government agencies were created to remind us of something great in American history. We should create a national holiday honoring Dr. King because he personified the inexorable, irresistable yearning for social justice of the American people. He represents that part of the American soul which refuses to tolerate prejudice and injustice, surely one of our Nation's greatest strengths.

Creation of a national holiday to honor Dr. King's struggle for racial equality is particularly urgent now. Under the current administration, affirmative action in education and employment has fallen into disfavor as a national policy. The Assistant Attorney General for Civil Rights, William Bradford Reynolds, has repeatedly stated his opposition to any affirmative action programs. A King holiday will surely create renewed awareness of the cause to which Dr. King dedicated his life. It is my hope that renewed interest in the struggle for racial equality will prevent further erosion of the gains made by black Americans in recent years.

I urge my colleagues to vote in favor of this legislation.●

● Mrs. KENNELLY. Mr. Speaker, I rise in support of H.R. 3345, the bill to designate the birthday of Martin Luther King, Jr., as a national public holiday.

National recognition and commemoration of this great American and the ideals for which he stood is long overdue. In time of racial strife, he spoke eloquently for brotherhood, social justice, human dignity and peace in the world. He sought the achievement of these goals through nonviolent social protest—indeed his life epitomized the nonvolent struggle against injustice.

His visionary leadership enabled this country to move closer to the ideals of racial and social justice upon which it was founded than multitudes of armies ever could have done. Martin Luther King, Jr., laid the foundation for the civil rights movement in this country, and his legacy lives on in our lives today.

Not only was King a living embodiment of the ideals upon which America was founded, his message was a beacon of hope and inspiration to people of all races and creeds seeking nonviolent social change all over the world. Dr. King lived for his dream of America as a land of equal rights and equal opportunity for all. And he was killed for that dream. It is our responsibility to see that his dream lives on, and that it is visibly symbolized and honored by the creation of a national holiday. A national day of remembrance would accord King the prominent place he deserves in our Nation's history, and it would remind us each year that America still has a distance to go to realize Martin Luther King's dream. Each year on January 15, we must rededicate our lives to the struggle against bigotry and injustice.●

● Mr. BROWN of California. Mr. Speaker, the Reverend Dr. Martin Luther King, Jr. had a dream, a utopic vision in which humankind could coexist peacefully, productively, and harmoniously regardless of racial, religious, or ethnic differences. Dr. King did more and has come closer than anyone to allowing this dream to materialize. King was the catalyst for the dream of a world community in which all individuals would live together in humaneness and respect.

Dr. King devoted his life to eliminating racial prejudice and bigotry in all forms through nonviolent means. Dr. King's advocacy of passive resistance is modeled after that great sage and leader, Mahatma Gandhi. Dr. King is perhaps our country's foremost example of our national commitment to strive for equality without resorting to violence. To quote Dr. King:

> Nonviolence is the answer to the crucial political and moral questions of our time; the need for man to overcome oppression and violence without resorting to oppression and violence. Man must evolve for all human conflict a method which rejects revenge, aggression, and retaliation. The foundation of such a method is love.

Dr. King's life, education, and sacrifice stand as an inspiration to all of us. I believe that it is time to honor Dr. Martin Luther King, Jr. by establishing a Federal holiday to commemorate Dr. King's birthday. It is time not merely to recognize the contribution he has given to this country, but to dedicate a day each year to the everlasting imprint he has left on the world. As a long-time supporter of this effort, I urge the passage of this resolution.●

● Mr. SIMON. Mr. Speaker, I want to join my colleague, Mrs. HALL, the gentlelady from Indiana, my friends and colleagues in the Congressional Black colleagues in the Congressional Black Caucus—especially Mr. CONYERS—and other Members of the House in supporting passage of H.R. 3706.

I have a special purpose and personal reason for supporting enactment of legislation making Dr. King's birthday a national holiday. I joined Dr. King at the second anniversary celebration of the 1956 Montgomery bus boycott. As a freshman legislator in the Illinois House and the sponsor of major civil rights legislation in the Illinois legislator, Dr. King invited me to join him in a flight from southern Illinois to Atlanta and then to Montgomery to share in the celebration of one of the most significant civil rights achievements then on record. I had the opportunity during that time to better understand the man who was fast becoming a living legend in this Nation's civil rights history.

The self-styled "drum major for justice" was also a prophet of peace. He not only mobilized and lef the 382 day bus boycott in Montgomery, he also called on the Nation's leaders to reject nuclear war and human devastation in Southeast Asia, and fought for human dignity and living wage for sanitation workers in Memphis. During his all too brief lifetime, he became a national hero, a warrior for racial justice, a Nobel Prize winner, and a shepherd to the masses.

While enactment of this legislation has symphonic meaning for all American citizens, especially black Americans, it has substantive meaning as well. Today the House of Representatives should put behind it questions of cost an color, and lift up the character and achievements of Rev. Martin Luther King, Jr.

I urge my colleagues to join me in voting "aye" on H.R. 3706.●

● Mr. DONNELLY. Mr. Speaker, since 1968, the House has considered legislation to establish a national holiday in honor of Dr. Martin Luther King, Jr. This month marks the 20th anniversary of Dr. King's historical march on Washington, and I think it only fitting that today, we pass H.R. 3706, in order to once and for all give this great American the recognition he so deserves.

As a result of Dr. King's faith and leadership, the American people were awakened to the real damages of segregation and discrimination which had divided our Nation. Seventeen States, including my home State of Massachusetts have already enacted holidays in his honor. To approve legislation to designate 1 day in tribute to this great American leader is a small price for this bocy to pay in light of his many outstanding achievements.

The ideals that Dr. King lived and died for must continue to be pursued for the sake of world peaece. I sincerely hope that my colleagues will support passage of H.R. 3706.●

The SPEAKER pro tempore. All time has expired.

The question is on the motion offered by the gentlewoman from Indiana (Mrs. HALL) that the House suspend the rules and pass the bill, H.R. 3706.

The question was taken.

Mr. DANNEMEYER. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were refused.

Mr. DANNEMEYER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 338, nays 90, not voting 5, as follows:

[Roll No. 304]

NOT VOTING—5

Hansen (ID)	Scheuer	Weaver
Heftel	St Germain	

□ 1450

Mr. ROSE changed his vote from "nay" to "yea."

So (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 1500

GENERAL LEAVE

Mrs. HALL of Indiana. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on H.R. 3706, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Indiana?

Mr. EDWARDS of Oklahoma. Mr. Speaker, reserving the right to object, and I shall not object, I take the reservation only to notify the House that on this very historic occasion, a majority of both parties in the House voted for the bill just passed.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentlewoman from Indiana?

There was no objection.

CONFERENCE REPORT ON H.R. 3329, DEPARTMENT OF TRANSPORTATION AND RELATED AGENCIES APPROPRIATIONS, 1984

Mr. LEHMAN of Florida. Mr. Speaker, I call up the conference report on the bill (H.R. 3329) making appropriations for the Department of Transportation and related agencies for the fiscal year ending September 30, 1984, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of July 26, 1983.)

The SPEAKER pro tempore. The gentleman from Florida (Mr. LEHMAN) will be recognized for 30 minutes, and the gentleman from Pennsylvania (Mr. COUGHLIN) will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida (Mr. LEHMAN).

Mr. LEHMAN of Florida. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the conferees on the fiscal year 1984 transportation appropriations bill had two basic objectives: First, to provide the resources necessary to meet our Nation's transportation program objectives for the coming year; and second, to produce a conference agreement which will become a public law.

We believe we have achieved both of these objectives. The conference agreement would provide $10,932,207,225 in new budget authority. That is $367.7 million less than the House bill and $78.25 million more than the Senate bill. We have strong indications from the administration that the conference agreement is acceptable to them and that the bill will be signed into law.

Mr. Speaker, some Members might question why this conference agreement is so far below the House-passed bill. The major reduction from the House bill occurs in the FAA account—which has been cut by about $200 million in line with the Senate bill.

In my view, the House conferees would not have agreed to the Senate aviation figures but for a July 13 letter sent to the chairman of the Senate Appropriations Committee by Secretary DOLE. That letter states that the lower Senate figures would allow the department, which includes the FAA, to operate effectively and goes on to say that the FAA Administrator believes that the Senate figures would not severely impact the implementation of the national airspace system plan.

The purpose of this letter is to convey my appreciation for the actions taken by the Senate Subcommitee on Transportation in marking up the fiscal year 1984 DOT Appropriations Bill. The excessive appropriation levels of the House passed bill were dramatically reduced and much of the objectionable bill and report language was deleted. Barring any unforeseen circumstances, the Department can operate effectively within the Subcommittee's levels. In particular, FAA Administrator Helms has indicated that the FAA levels, although reduced below those requested by the Administration for fiscal year 1984, will not severely impact the implementation of the NAS plan in 1984—the Administration remains committed to the outyear funding requirements associated with the NAS plan.

I would recommend that an enacted Appropriations Bill along the lines of that of the Subcommittee be signed by the President.

Mr. Speaker, in agreeing to the lower aviation funding levels, we are taking the Secretary and the FAA Administrator at their word.

I will add, however, that the administration will have a lot of explaining to do at next year's budget hearing. I will be particularly interested to hear the FAA explain why it testified that $1 billion in the facilities and equipment account was essential for the continued implementation of the NAS plan only to learn 3 months later that they believe that a $750 million level would have no severe impact on the implementation of that plan. I will also be interested to know why the

FAA can apparently operate with $145 million less than the amount they claimed they required at our April budget hearing. Mr. Speaker, the statements made in the Secretary's July 13 letter combined with the FAA's reaction, or lack thereof, to the aviation funding levels contained in the Senate bill raise serious questions in my mind about the FAA's entire budget formulation process.

The other significant reduction from the House bill contained in the conference agreement is a $100 million cut in the section 9 mass transit block grant. Frankly, this was the price exacted by the administration to get this bill signed. Although the House conferees were reluctant to make this reduction, I would point out that the conference level of $2.39 billion is still $415 million more than the President's budget request for section 9 and does not include the cap on operating assistance requested by the President.

Other major highlights of the conference agreement are as follows:

For the Coast Guard, the conferees have provided a total of $2.45 billion. This is $51 million more than last year's level. This amount includes $369 million for acquisition, construction and improvements which will continue the major procurements of 13 new 270-foot cutters, 41 new jet aircraft, and 90 short-range helicopters. We read the Secretary's July 13 letter as endorsing these figures even though they are $45 million below the budget request.

As I mentioned earlier, the conference agreement contains over $3.6 billion in new budget authority for the FAA, and limits obligations for airport grants to $800 million. According to the Secretary, this will provide a sufficient funding level for the FAA in fiscal year 1984.

In the highway area, the conference agreements limits obligations for the Federal-aid highway program to $12.52 billion. This is a reduction of $80 million, or 6 tenths of 1 percent, from the House level. According to our best information, over the first 9 months of fiscal year 1983, the States have obligated highway funds at a rate of $915 million per month. This works out to about $11 billion for the year. If the same spending pattern holds true for fiscal year 1984, the conference level of $12.52 billion would provide a cushion of $1.5 billion for discretionary projects, administrative costs, and special nonformula funds. We think this spending level will not do damage to the highway program. But I can assure my colleagues that, if state highway spending patterns change significantly, we will give full consideration to revising the highway obligation limitation.

The conference agreement also includes up to $21 million for emergency assistance connected with the Mianus Bridge disaster in Connecticut, and $15 million for railroad-highway crossing demonstration projects.

For highway safety, the conference agreement provides $78 million in new budget authority for operations and research of the National Highway Traffic Safety Administration. In addition, obligation limitations totaling $142.9 million are established for three other highway safety programs.

I want to take this opportunity to caution NHTSA about a small matter, but one which has significant symbolic value. Over the years, various congressional committees have expressed concern about the proliferation of so-called advisory committees throughout the Federal Government. We may take an in-depth look at DOT advisory committees in next year's hearings. But I want to warn NHTSA that one of those whose effectiveness we question is the National Highway Safety Advisory Committee. This advisory committee seems to have a penchant for holding national conferences at taxpayers' expense, which appear to produce little of real value. I especially would like NHTSA to take a close look at the need for this group's proposed national conference in may 1984 in light of similar conferences planned in the same month, and the need for this group to establish subcommittees which hold national meetings in order to plan national meetings. I expect NHTSA to be much tougher in approving funds for these and similar activities and will examine NHTSA's actions during the fiscal year 1985 budget hearing. If no improvements are forthcoming the committee will take appropriate action.

For the Federal Railroad Administration, the conference agreement provides about $950 million in new budget authority. This includes $716.4 million for Amtrak, $100 million for the Northeast corridor project, and $35 million for Rock Island labor protection payments.

For mass transit, the conference agreement provides a total of $4.243 billion which is comprised of $3.02 billion in new budget authority and a limitation of $1.225 billion on contract authority obligations. In total, the conference agreement provides $477 million more for transit than was requested by President Reagan.

In the general provisions section, there are three provisions which are of keen interest to many Members. The first is section 314 which concerns National Airport. That provision requires the Secretary to hold in abeyance for 60 days her proposed rulemaking to adjust the annual passenger ceiling at National. The purpose of this provision is to allow further dialog on this issue among all interested parties and to afford congress another opportunity to address this issue in the upcoming continuing resolution should there continue to be major problems.

Another general provision of note is section 315 concerning the repayment of maritime Administration construction differential subsidies. The provision in the conference agreement would prohibit enforcement of the secretary's proposed construction differential subsidy rule for 60 days following promulgation of that rule. Section 315 also requires that enforcement of the CDS rule be held in abeyance for at least 60 days from the date of enactment.

Section 319 of the conference agreement prohibits the FAA from closing any facilities prior to December 1, 1983. In addition that provision requires the FAA to submit to Congress a detailed, site-specific, and time-phased plan for all facility closures by October 1, 1983. This will enable us to evaluate more fully the adequacy of the FAA's facility consolidation plans.

Mr. Speaker, all the House conferees signed the conference report. I want to single out in particular one of those conferees, the gentleman from Pennsylvania, the ranking minority member (Mr. COUGHLIN) for his cooperation and leadership in helping to fashion this conference report. I greatly appreciate his assistance.

Mr. Speaker, this conference agreement is fiscally responsible and meets the transportation needs of our Nation. I urge adoption of the conference report.

I insert at this point in the RECORD a table listing the conference figures in detail:

	FY 1983 Enacted	FY 1984 Estimates	House	Senate	Conference	Conference compared with Estimates
TITLE I - DEPARTMENT OF TRANSPORTATION						
Office of the Secretary						
Salaries and expenses	40,400,000	42,537,000	41,275,000	41,275,000	41,275,000	-1,262,000

□ 1510

Mr. COUGHLIN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the chairman of the subcommittee, the gentleman from Florida (Mr. LEHMAN), and the House conferees have, I think, brought home the bacon in an $11 billion transportation appropriations bill that can be signed by the President, and the Office of Management and Budget has so indicated.

I certainly rise in support of the bill. The subcommittee chairman did a superb job in representing the interests of the House in this bill which, as I said, contains some $10.9 billion in new obligational authority. It is $873 million less than fiscal year 1983, $367 million less than the House-passed bill, and $18 million over the budget estimates.

It is a compromise reached not only by the House and Senate, the majority and the minority, but also by the Department of Transportation and the Office of Management and Budget.

In order to get a bill that would be signable, the House and the Senate conferees often took the lower of the two figures, and let me just give some highlights of the bill.

For the Coast Guard, it contains $1,656 million for Coast Guard operations and $369 million for acquisition, construction, and improvements. Both of these levels, we are informed, are levels with which the Coast Guard can live.

With regard to aviation, the bill contains $2,500 million, with nothing from the trust fund, for Federal Aviation Administration operations. It contains $750 million for facilities and equipment, and it contains an $800 million limitations on obligations for airports grants in aid. The Federal Aviation Administration has signed off on all of these levels.

The bill contains $716,400,000 for Amtrak, which is $54 million above the administration's budget request.

It contains $2,388 million for Urban Mass Transportation Administration formula grants and $1,255 million for discretionary grants, including $195 million for bus, $545 million for rail modernization, and $339 million for new starts. In the statement of the managers, the conferees direct the Secretary to reprogram excess new starts into rail modernization.

The bill contains $18,400,000 for the CAB, the Civil Aeronautics Board, for a period of 10 months, and $60 million for the Interstate Commerce Commission, providing for 1,150 staff years.

With regard to National Airport, it holds the proposed rulemaking in abeyance for 60 days after enactment, and with regard to construction differential subsidy, it holds the enforcement of any rule in abeyance for 60 days after enactment.

It holds closures or consolidations of flight service stations in abeyance prior to December 1, 1983, and provides that that FAA shall report to Congress no later than October 1, 1983.

I certainly want to congratulate, particularly the subcommittee chairman, the staff, and the conferees on both the House and the Senate sides. It took a lot of bargaining, and it took a lot of work to get a bill that in its present form can be signed by the President.

Mr. Speaker, I urge adoption of the conference report.

Mr. GLICKMAN. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I am happy to yield to my colleague, the gentleman from Kansas.

Mr. GLICKMAN. Mr. Speaker, I know that we worked together on the issue of National Airport, and I know my colleague, the gentleman from Minnesota (Mr. SABO), was also involved. I think the conferees ended up with a good compromise on that issue, putting in abeyance for a couple of months a rules changes on the number of passengers at National Airport but still recognizing that there may need to be some limits.

It did not go as far as I wanted, but it did go far in recognizing that there must be reasonable changes in the way the entire airport structure in this area operates in order to protect the safety and convenience of passengers.

So, Mr. Speaker, I congratulate my colleague, the gentleman from Pennsylvania (Mr. COUGHLIN).

Mr. COUGHLIN. Mr. Speaker, I think it is important that the rulemaking be allowed to proceed to at least examine the passenger cap at national airport, to see if it is the appropriate passenger cap, and to see if some other more appropriate passenger cap might be desirable. That is what we were seeking to provide in the legislation.

Mr. WOLF. Mr. Speaker, will the gentleman yield?

Mr. COUGHLIN. I yield to the gentleman from Virginia.

Mr. WOLF. Mr. Speaker, I just want to follow that up and say that I appreciate the fact that the conference committee was able to work that out in a spirit of reconciliation with Mrs. Dole. I thank the gentleman, and I thank the members of the committee.

Mr. COUGHLIN. Mr. Speaker, I know that the gentleman from Virginia (Mr. WOLF) has worked very, very hard on this indeed. I appreciate his efforts, and I commend him for it.

Mr. Speaker, I reserve the balance of my time.

Mr. LEHMAN of Florida. Mr. Speaker, I yield 2 minutes to the gentleman from Connecticut (Mr. RATCHFORD), a member of the subcommittee.

Mr. RATCHFORD. Mr. Speaker, I think what we have here today is a good conference report and a conference report in the truest sense.

There was a lot of give and take in reaching the point at which we find ourselves today. The National Airport issue is a prime example. That just did not happen. There was the give-and-take back and forth, and finally a resolution. In addition to that, we now have a conference report that is defensible from the point of view of the budget. I think that is important, too. We are not just passing another appropriation bill; we are passing another appropriation bill which can be signed into law.

Third, it needs to be said that the emphasis now is on mass transit, and that is clearly where it needs to be. When we started out this February, this document containing the appropriation for transportation did not in my judgment clearly reflect the mass transit needs of this country. It did not reflect the difficult vote taken by Members of Congress last December in the form of a 5-cent increase in the gas tax, with 1 cent of that allocated to mass transit. That allocation, that difficult vote, that priority is now reflected in this bill.

From a State point of view, the Connecticut congressional delegation would like to thank both the members of the committee and the conferees for recognizing that we had a national problem that emerged after this bill left our Chamber. The Mianus River Bridge in Greenwich, Conn., which is truly the link between the Connecticut Thruway and the connecting point between the rest of the country and all of New England collapsed. We appealed to the committee, and the committee responded.

That particular bridge is in the district of the gentleman from Connecticut (Mr. MCKINNEY). Because of the emergency nature of the situation, we felt a response was needed by the Congress. The conferees on both sides of the aisle agreed. So the Connecticut delegation unanimously, Republicans and Democrats, come before you today to say, "Thank you."

Mr. Speaker, on balance this is a good report, a fair report, one that meets our mass transit needs and one that ought to be passed in a quick period of time this afternoon with limited debate.

Mr. COUGHLIN. Mr. Speaker, I yield 5 minutes to a distinguished member of the subcommittee, the gentleman from Michigan (Mr. PURSELL).

Mr. PURSELL. Mr. Speaker, I rise in support of the Transportation appropriations conference report for fiscal year 1984. The approval of this conference report will demonstrate that year after year Congress has met its responsibilities by approving a bill before the new fiscal year begins.

This is a tribute to Mr. LEHMAN, respected chairman of the subcommittee, Mr. COUGHLIN, ranking Republican of the subcommittee, Mr. WHITTEN, chairman of the full committee and their Senate counterparts. Most of all it is a tribute to this body. By avoiding unnecessary delays, by battling for a bill acceptable to the administration, and by addressing the critical transportation needs of America, we can be proud that by land, sea or air, America's transportation system is second to none.

I also want to make special reference to a small, but increasingly significant aspect of the Transportation appropriations bill. This is the St. Lawrence Seaway Development Corporation. The Corporation is much like the tip of an iceberg. It is visible to both the United States and Canadian shippers, but the great bulk of the corporation's work is visible only to those who depend daily on the St. Lawrence Seaway for their livelihood. From the grain farmers and merchants throughout the Midwest to the coal fields of Appalachia, the St. Lawrence Seaway opens the heartland of the United States to the world for navigation, trade and economic growth.

Just recently the Seaway Development Corporation witnessed the passage of the 1 billionth metric ton of cargo through its locks and channels. It is my belief that the potential of the seaway has not been fully realized. By modernizing the seaway, by increasing the annual tonnage passing through it, by providing greater access for the industries and shippers of the Midwest to the markets of the world, we can accelerate economic recovery. Based upon the actions taken during this session of Congress, it appears there is significant support for this effort.

This year, Congress has eliminated the seaway's construction debt. By so doing, we have saved shippers and consumers thousands of dollars. Congress has also continued to support the U.S. Army Corps of Engineers additional locks study by approving several hundred thousand dollars. The corps expects to complete this study and recommend to Congress several proposals to improve the operation of the locks and expand the seaway's usage.

Finally, Mr. Speaker, on a more personal note, I have prepared a slide presentation of the history and current status of the St. Lawrence Seaway. This 18½-minute presentation is intended to introduce and educate the public and potential seaway users, to the benefits and conveniences of the St. Lawrence Seaway system. During the August recess, I plan to travel throughout the Midwest and Canada showing this slide presentation. Included in my travels will be tours of the Soo Locks and the Welland Canal, as well as numerous conversations with Canadian seaway officials. I will also present this film to interested Members and staff this fall. In viewing the future of the St. Lawrence Seaway, I believe that we must make every attempt to coordinate the United States plans and actions with those of our Canadian counterparts.

The need for a strong partnership is paramount. Together we must move to recognize the seaway as a resource of unmatched opportunity. I urge the adoption of this report.

□ 1520

Mr. COUGHLIN. Mr. Speaker, I yield 5 minutes to the distinguished

gentleman from Kentucky (Mr. SNYDER).

Mr. SNYDER. Mr. Speaker, I thank the gentleman for yielding this time to me.

I have asked for this time, Mr. Speaker, to engage in a colloquy with the gentleman from Minnesota (Mr. SABO), who I understand authored the provisions with regard to the National Airport in the Appropriations Committee.

In that connection, Mr. Speaker, I want to compliment my colleague from Minnesota for his leadership and efforts to maintain the strong position the House has had for years with regard to preventing an undue reduction in service which would adversely impact scores of cities in the eastern half of the country in service to National Airport. While I regret that the House position did not prevail in conference, I recognize that if the method of calculating the passenger ceiling at the airport is revised satisfactorily, further reductions in the number of scheduled airline flights may be avoided. I would, however, appreciate a clarification of the conferees intent on this matter.

Mr. SABO. Mr. Speaker, if the gentleman will yield, I would be pleased to do so, and I might add, I appreciate the leadership my colleague from Kentucky has displayed throughout the years on this issue. It is my strong hope that the Secretary will adhere to the conferees' direction on this matter so that we will once and for all put this matter to rest.

The issue of National Airport was perhaps the most contentious of those dealt with in the transportation bill this year. Although there was concern of the conferees about lowering the passenger ceiling, we were all aware of Secretary Dole's strong desire to proceed with the proposed rulemaking. Therefore, in the interest of compromise, we decided not to prohibit the Secretary from proceeding with the rulemaking but to hold its effective date in abeyance for 60 days after enactment of this bill. During that time we expect the Secretary to establish a dialog among all of the interested parties in an effort to reach an accord on a final policy. This interval will give us the opportunity to review any changes in the policy, to insure that it reflects the wishes of the Congress and, to the greatest extent possible, that we are in agreement on a final policy.

Of primary importance is the desire of the conferees that the Secretary should reconsider the means by which the passenger level is calculated, especially whether certain connecting flight passengers or short runway and commuter operations—which may place a lesser burden on ground and/or air facilities—might be appropriately exempted, or calculated on less than a one-for-one basis. After extensive discussions on this matter, we believe that by recalculating the method of determining the level, the interests of the varying parties can more equitably be achieved. For example, passengers connecting from one flight to another do not burden the airport's crowded roadways, parking lots or curbs. In most instances they do not claim luggage. They simply move from one gate to another within the walls of the terminal buildings. It does not appear equitable that these connecting passengers should be included in the passenger count on a one-for-one basis. Additionally, the Secretary has proposed exempting 30 daily operations by 50 seat commuter airplanes from the commuter hourly limit. Perhaps those passengers carried on exempted flights should also be calculated on a different basis than is currently done.

The conferees have made it clear that we do not wish to draft the minute details of the regulations. This is properly within the jurisdiction of the Department. However, because of the historical involvement of the Congress in the development of National Airport policy, we fully retain the recourse to legislative remedies, if the regulations do not adhere to the wishes of the conferees with regard to changing the method by which the ceiling is calculated.

Mr. Speaker, I thank the gentleman for yielding to me, and I hope that explanation is satisfactory.

Mr. COUGHLIN. Mr. Speaker, I yield 2 minutes to the gentleman from Virginia (Mr. WOLF).

Mr. WOLF. Mr. Speaker, would the gentleman from Minnesota respond to a question?

I hope we are not doing something which is another way of exceeding the current cap there.

I think the gentleman is saying and I want to be sure that this is clear, that Mrs. Dole has the flexibility and the leeway to make a lot of different changes. The gentleman is not trying to have the people who then land and take off someplace else and not get out, not counted at all? The gentleman is not trying to change this totally, is he?

Mr. SABO. Mr. Speaker, if the gentleman will yield, in this bill we change nothing. We simply give some guidance to the Secretary, indicating that there well may be passengers who should be counted on a different basis than one on one.

We expect to review whatever regulations she may promulgate and make a judgment on whether they are fair. If they are not fair, the conference report indicates that the alternative of a legislative remedy remains for the future.

Mr. WOLF. I understand that, but the gentleman will have to acknowledge that Senator ANDREWS also has some opinions about this, too, and there are other people.

I think and I hope that we are doing this in a spirit of reconciliation. What we are doing has to be some sort of compromise. It cannot be all give or all take. I hope that is what the gentleman is trying to say.

I was a little concerned when the gentleman was talking about not counting these passengers, not counting this or not counting that, as to what kind of legislative history we were making. The gentleman is not suggesting that we go back up to where we are. There must be some give and take. Is that what the gentleman is saying?

Mr. SABO. That is a judgment we will have to make at a later date.

I would hope that the Secretary would seriously re-examine her suggested rules in light of the suggestions of the conferees, so that we might have a rational policy for the National Airport, one that can be agreed upon and one that also promotes the greatest efficiency within air transport.

Mr. WOLF. But the gentleman is again, if I may say, seeking a compromise. That is what the gentleman is interested in, is it not?

Mr. SABO. What we are seeking at this point is a serious review by the Secretary of her proposed rules.

Mr. WOLF. The Secretary has acknowledged that she is doing that; and I think she is doing that in a good faith effort. I think the gentleman is seeking, and I wanted the gentleman to say, hopefully, a compromise in a spirit of reconciliation, not binding the Secretary or binding anybody, asking to go back and look at this; but I think a compromise is what everyone is looking for. Is that what the gentleman's understanding is?

Mr. SABO. The gentleman from Minnesota is looking for sound policy. I do not intend to prejudge what the Secretary's decision might be at this point. I simply do not know what the result of the re-examination of National Airport policy by the Secretary will be.

The SPEAKER pro tempore. The time of the gentleman from Virginia has expired.

Mr. COUGHLIN. Mr. Speaker, I yield 2 additional minutes to the gentleman from Virginia.

Mr. WOLF. Mr. Speaker, I think there was a deficiency when we were speaking before, I think the gentleman should also acknowledge that it is important for the airlines to also work in a spirit of reconciliation with Mrs. Dole. Mrs. Dole attempted this process also and is not a single participant. It takes two to tango here. I would hope that the airlines also would participate.

Second, I hope Mrs. Dole is not taken advantage of here. The message

to Mrs. Dole is to approach this in a spirit of reconciliation, a compromise in the true sense of the word. I would hope that is what we are seeking here.

Mr. SABO. Mr. Speaker, if the gentleman will yield further, the conference report indicates that we would desire that the Secretary and the air carriers sit down together and work at achieving a goal that is rational and makes sense for the National Airport. That obviously will involve discussion by both the Secretary and the air carriers.

□ 1530

But it is also clear that the final people to make the policy judgment remains the Congress.

Mr. WOLF. I understand that and it has always been that way.

I thank the gentleman and I hope Mrs. Dole takes note of this and that the airlines take note that we are looking for a compromise.

I yield back the balance of my time.

Mr. COUGHLIN. Mr. Speaker, I yield such time as he may consume to the gentleman from Virginia (Mr. PARRIS).

Mr. PARRIS. Mr. Speaker, I rise in support of the conference report to the transportation appropriations for fiscal year 1984. As you know, within this legislation is language which will allow the Secretary of Transportation to set the cap at Washington National Airport at a level which is more conducive to air safety. Currently, the passenger level is set at 16 million. With the pending legislation in place, the passenger level may be set at a lower figure, thus allowing traffic to be carried over to Dulles and Baltimore-Washington Airports by the year 1985.

In addition to the flexibility allowed to the Secretary of Transportation on the setting of the cap after 60 days, I am also pleased that the conference language provides for a study of transportation to and from the airports. This would include analysis of bus transportation and Interstate 66 HOV lanes.

I have always said that National is an accident waiting to happen. Although there is room for improvement, I am glad that Congress is taking appropriate steps to make National Airport a safer, less congested facility.

In addition to that issue, I am particularly pleased that the conference committee has added an additional $20 million to the amount originally proposed by the Senate for the Washington metro system which will assist and permit that agency to continue their construction program without undue delay.

Mr. LEHMAN of Florida. Mr. Speaker, I yield 1 minute to the gentleman from Georgia (Mr. RAY).

Mr. RAY. Mr. Speaker, I want to thank the distinguished chairman of the committee and his committee for doing such a fine job in bringing this bill to the floor.

Mr. Speaker, I am a member of the Subcommittee on Procurement and Military Nuclear Systems of the House Armed Services Committee.

My subcommittee is very familiar with the waste isolation pilot project. This project will yield important and valuable information on the safe handling of nuclear wastes.

Mr. LEHMAN's motion is in support of some critical planning and design work to be done for roads associated with this project.

Both our subcommittee and the full committee strongly support this project, and I urge my colleagues to support Mr. LEHMAN's motion.

Mr. LEHMAN of Florida. Mr. Speaker, I yield 2 minutes to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Speaker, I rise in support of the conference report.

But I want to indicate my concern about the funding levels in two FAA accounts. The conference report appropriates about $235 million less than what came out of this House in the area of facilities and equipment in the airport airways trust fund. It does, however, appropriate roughly what we put in the House bill in the research and development part of the fund.

My concern is that last year we passed dramatic increases in the airline ticket taxes and the aviation fuel taxes and that tax money was supposed to go into the development of a national air space system to modernize the movement of aircraft in this country so that we will have a continued efficient and safe airline and aviation system in America. Now it appears that those increased revenues are not being spent is promised.

My concern is that the numbers as recommended by the conference may in fact result in a restriction in the development of that plan. The letter that Secretary Dole wrote that the gentleman from Florida referred to indicates that these figures will "not severely restrict the operations of this new air space plan."

But the implication is that while it will not severely restrict the operation, it might restrict it in some degree.

So I guess I would ask the gentleman from Florida this question: If it appears through the normal oversight of this committee and other committees, as well as the Public Works Committee and my own Committee on Science and Technology that we are unduly pushing back and delaying the procurement and related items in the operation of the national air space plan, will the subcommittee of the Appropriations Committee recommend a supplemental appropriation in order to insure that the millions of dollars that people are paying in airline ticket taxes and fuel taxes from general aviation and other airplane operations will be used for the moneys they were intended to be used?

Mr. LEHMAN of Florida. Will the gentleman yield?

Mr. GLICKMAN. I yield to the gentleman from Florida.

Mr. LEHMAN of Florida. I would assure the gentleman that should such occasion occur, the subcommittee would certainly consider a recommendation from the administration for a supplemental appropriation.

Mr. GLICKMAN. I would close by saying I think this is an important bill. But I think airline safety is one of the key functions of the Government and I know that the committee feels that way as well. And improving and modernizing our system will determine if we have an efficient airway system, and I hope that the committee will monitor this closely.

I thank the gentleman.

Mr. COUGHLIN. Mr. Speaker, I yield 5 minutes to the gentleman from Nebraska (Mr. BEREUTER).

Mr. BEREUTER. Mr. Speaker, I rise to discuss one particular section of the Department of Transportation Appropriations Conference Report, specifically the railroad-highway crossing demonstration projects portion found on page 10 of the report.

It is my understanding that this section provides $15 million for railroad-highway crossings demonstration projects. It presents a compromise—a disapppointing compromise from the standpoint of this Member.

The initial House version of the bill provided $35 million for these projects. It included specific earmarking language for key projects now ready to fully utilize the appropriated funds. Because of the failure of the other body to include any funds for the program, the conferees agreed to a much lower figure, and stripped the bill of any earmarked language for specific projects.

I want to commend the chairman and ranking Republican member of the transportation appropriations subcommittee and the ranking Republican member of the full committee for their efforts in support of the higher figure that incuded earmarking for specific projects. They have been key supporters in the battle to win recognition of, and support for, a demonstration project in Lincoln, Nebr. I know they tried to retain the House language, but the "zero" option position taken by the Senate gave them little maneuvering room in which to work.

Mr. Speaker, this railroad-highway crossing demonstration project was first authorized over 10 years ago largely at the urging of my predecessors in the Nebraska congressional delegation. The program has been a legislative priority for this Member since I

came to Congress in 1979. The program is designed to implement grade separations and other safety features at points where highways and tracks intersect and present life-threatening situations for the nearby residents.

Although Nebraskans in Congress supported the program at its inception and have supported it in the 10 years since, very little of the benefits from the program have gone to Nebraska. This year, however, the House bill earmarked $6.5 million for Lincoln, Nebr., the home of the first State-authorized "railroad safety transportation district." The funds were to go for completion of work on the North 27th Street Viaduct.

Needless to say, our momentary victory was short lived. Since the Nebraska Legislature created a Railroad-Highway Transportation Safety District, the local officials in Nebraska have planned and executed their portion of the project.

Realizing the stringent financial restrictions existing within Federal programs, they scaled their request back by two-thirds, from over $20 million to $6.5 million. Furthermore, the city has brought the project to the point where the Federal funding would be used immediately for right-of-way acquisition and construction, upon completion of which the project would be fully usable by the traveling public.

Having visited just a few minutes ago with the chairman of the Appropriations Subcommittee and acknowledging his reservations and limitations upon discussion in the colloquy of any specific references to projects, I would like to engage in a colloquy with the chairman and the gentleman from Pennsylvania working around that reservation.

The conference report notes that the projects listed in the House report are worthy of meritorious consideration by the Federal Highway Administration obligating the funds. That is clear enough and I appreciate that statement.

Mr. Chairman and Mr. COUGHLIN, the conference report on page 10 also directs the Federal Highway Administration to follow the House committee's report instructions to insure the development of a construction financing plan prior to the funding that is found on page 43 of the House report.

The language makes reference to advice not to obligate until there is a viable financing plan for construction of the project.

I understand that because of the position of the conferees of the other body that the earmarking would be impossible on your part now or counterproductive.

Now to the question. Is it safe to assume that this means funding preferences should be given to segments or sections of projects that could really be used by the traveling public upon completion of this particular segment funded?

I would ask the chairman if he would care to respond to that question.

Mr. LEHMAN of Florida. Will the gentleman yield?

Mr. BEREUTER. I yield to the chairman of the subcommittee.

Mr. LEHMAN of Florida. I certainly understand the gentleman's concern with this particular rail-highway crossing demonstration project and as the gentleman says, we have many more projects than can be funded with the $15 million in the conference report.

I can only reiterate what is in the conference report. It says:

> The conferees note that the projects listed in the House report are, among others, projects worthy of meritorious consideration.
>
> The Department should note the instructions contained in the House report regarding obligations in this program.

The facts of life are that we have more programs than we have money. I wish the gentleman the best of luck in seeking funding for his project.

Mr. BEREUTER. I thank the chairman. All I am really trying to find out is why the subcommittee specifically requires a financing plan. I assume it is so that we do not end up buying right-of-way on which a project then is eventually not constructed. That was my only question.

Mr. LEHMAN of Florida. The gentleman is correct; yes.

Mr. BEREUTER. I thank the gentleman. I wanted to make that clear.

Mr. COUGHLIN. Mr. Speaker, will the gentleman yield?

Mr. BEREUTER. I would yield to the gentleman from Pennsylvania if he has anything to say on this matter.

Mr. COUGHLIN. I think the gentleman is entirely correct, that the reason we ask that we insure the development of a construction financing plan was so that we would have projects that would be usable and that would be completed and that projects which had that in place would obviously proceed first.

Mr. BEREUTER. And be useful to the traveling public.

Mr. COUGHLIN. The gentleman is correct.

Mr. BEREUTER. I thank the gentleman for his comments and I thank the chairman for his indulgence and I yield back the balance of my time.

Mr. LEHMAN of Florida. Mr. Speaker, I yield 1 minute to the gentleman from New York (Mr. MRAZEK).

Mr. MRAZEK. Mr. Chairman, it is my understanding that Congress intends that the section 305 language apply to section 5 of the urban mass transit formula grants, and not to nonurban grants. I would like to know if the chairman has the same understanding.

Mr. LEHMAN of Florida. Will the gentleman yield?

Mr. MRAZEK. I yield to the gentleman from Florida.

Mr. LEHMAN of Florida. The gentleman is absolutely correct.

Mr. MRAZEK. I thank the chairman and yield back the balance of my time.

Mr. COUGHLIN. Mr. Speaker, I yield 2 minutes to the gentleman from Indiana (Mr. MYERS).

Mr. MYERS. Mr. Speaker, I thank the gentleman from Pennsylvania for yielding this time. I do so for the purpose of clarification.

On amendment No. 27 dealing with railroad highway crossing demonstration projects, when this bill left the House the report identified a number of projects throughout the country that should receive these funds as high priority items.

However, as has often happened on a number of occasions, the other body struck the identification and the recommendations by the House as far as identifying projects and also reduced the dollars from $35,700,000 down to $15 million.

□ 1540

In the report now coming out of the conference, the conferees note that the projects listed in the House report are, among other projects, "Worthy of meritorious consideration. The Department should note instructions contained in the House report regarding obligation of this program."

However, also the House report spoke about viable funding, that no construction funds should start until a new viable funding program.

My question is, obviously since we reduce the dollars, $15 million is not going to fund all these projects; it would seem to be wise until viable funding has been worked out with the Department that the projects that would complete design or engineering should be high priority items.

Is there any consideration as far as the committee is concerned about the funding for the design and engineering to complete those before we go to construction? I yield to the chairman for clarification.

Mr. LEHMAN of Florida. Mr. Speaker, I understand the gentleman's concern. I can only reiterate the conference report language and I think you have already read most of that. I can only speak for the House conferees.

Mr. MYERS. Of course, conferees are the ones that really write this conference and the ones that will give the direction and I hope the Department through the conference report. It would seem that the priority should go, and that the Department should be encouraged to fund these design and engineering and complete them, rather than try to start something we do not know if we can finish or not.

Mr. LEHMAN of Florida. As the gentleman knows, the conferees were silent on this issue. I think I would be ill-advised to give the gentleman any false encouragement at this time, though I wish him good luck on this project.

Mr. MYERS. I am not sure what that means but I thank the gentleman for his comment.

Mr. LEHMAN of Florida. Mr. Speaker, I yield 3 minutes to the gentleman from Minnesota (Mr. SABO).

Mr. SABO. I thank the gentleman for yielding.

Mr. Speaker, I think we have a very good bill before us. I expect all of us can think of things we would like to do if we had more money available but I think the chairman of our subcommittee, BILL LEHMAN, and the ranking Republican, LARRY COUGHLIN, have done a remarkable job in dealing with the variety of demands that so many of us had and all the desires we had in arriving at, in my judgment, a very fair and good bill.

So, to Mr. LEHMAN and Mr. COUGHLIN I say "Thank you on behalf of all of us who serve with you on the committee and in the House for doing such an excellent job" and presenting to us today a bill that we can be proud to vote for.

I yield back the balance of my time.

Mr. COUGHLIN. Mr. Speaker, I yield so much of my remaining time as he may consume to the distinguished ranking member of the full committee, the gentleman from Massachusetts (Mr. CONTE).

Mr. CONTE. Mr. Speaker, I rise in support of this conference report on the transportation appropriations bill for fiscal year 1984. The conference agreement provides for new budget authority of $10.9 billion, which is $18.7 million above the budget request, $367.7 million below the House-passed bill, and $78.3 million above the Senate-passed bill. Frankly, I was disappointed by many of the cuts made from the House levels. But we were under strong pressure to bring back a bill that could be signed by the President, and this was the maximum that OMB would accept.

Mr. Speaker, I would like to briefly outline some of the key items in this bill. For the Coast Guard, we have provided $8 million more than was in the Senate bill for operating expenses. The Coast Guard is going to have significant demands placed on it in 1984 by the summer Olympic games and by continued efforts against drug smuggling, and the amount in this bill is going to be the bare minimum for satisfactory levels of operations. If there should be any unforeseen conditions that arise, I would expect that there will be a need for a supplemental appropriation.

For the Federal Aviation Administration, the conferees privided $750 million for facilities and equipment, instead of the $985.5 million proposed by the House. This will necessarily slow down progress on the national airspace system plan implementation, but according to the FAA will not prevent the ultimate completion of the plan on schedule.

The conference agreement provides $800 million for grants-in-aid to airports. This is $50 million more than was provided in fiscal year 1983, and although it is lower than the authorized level this was the maximum amount that could be provided given our overall spending ceiling.

I know that a number of my colleagues have been concerned about funding for rail-highway crossing demonstration projects, for which the House had provided $35.7 million. The conference agreement provides $15 million for these projects, which should at least get most of them underway.

For our friends in Connecticut, and indeed for all of us who have occasional need to travel on Route 95 up and down the Atlantic coast, we have provided up to $21 million for repairs and related expenses associated with the collapse of the Mianus Bridge.

In the area of rail service assistance, the conference agreement provides $15 million for local rail service assistance, of which $2.5 million is for discretionary grants. The House report provided that $500,000 of this amount should be made available for a project in Massachusetts, and it is my hope that this money will be used for a rail yard improvement project in Deerfield, Mass.

The conferees have provided $716.4 million for Amtrak, an amount that will permit the continued operation of all current routes.

For feeder line assistance, we have provided $3 million for the so-called Bloomer Line in Illinois, which should permit the continued operation of that important line.

Mr. Speaker, there were a number of general provisions in the bill that had generated some controversy. With regard to National Airport, the conferees agreed to a provision that would require the proposed rulemaking to adjust the passenger ceiling at the airport to be held in abeyance for at least 60 days from the date of enactment of this measure. That will provide time for the Department of Transportation and the various interested parties to try to resolve their difference over this issue, while leaving open the opportunity for further congressional action should those negotiations not be successful.

The conferees took a similar approach to the construction differential subsidy (CDS) issue, by requiring that the enforcement of any rule with respect to the repayment of such subsidies be held in abeyance for 60 days following the enactment of this measure, and also be held in abeyance for 60 days following the promulgation of such a rule.

Mr. Speaker, this is a bill that provides funds for our critical transportation needs, consistent with the need to exercise fiscal restraint in light of our tremendous deficit problem. It is a bill that the administration can accept, and I urge its adoption.

I am pleased to say I was down at the White House this morning at the Republican leadership meeting and the President said he was going to sign the bill.

Mr. Speaker, I want to take this opportunity to commend Chairman BILL LEHMAN for his leadership. The conference was weighted with many controversial issues. He masterfully handled our deliberations and brought us to an amicable conclusion. I also want to commend LARRY COUGHLIN, our ranking member of our subcommittee, for his leadership and masterful work.

Mr. LEHMAN of Florida. I thank my good friend from Massachusetts, Mr. CONTE, for his most generous remarks. He played a masterful part, himself, in creating this bill. I also want to thank Mr. SABO for his remarks in my behalf and in behalf of the subcommittee. Without his position as ranking majority member, we would have had a much more difficult time.

Mr. Speaker, at this time I would yield 5 minutes to the gentleman from California (Mr. MINETA).

Mr. MINETA. Mr. Speaker, this conference report contains a number of essential programs. It is important that they be allowed to proceed.

But I think the Members should also be fully aware of some of the serious concerns this conference report raises, especially in aviation. In aviation funding, this conference report is not a compromise, it is the Senate number in every program of any real size. The Senate took the House bill and cut nearly half a billion dollars out of the major aviation programs, and the conference report follows those Senate funding levels exactly. I fully recognize that our conferees were put in an impossible situation when the administration totally backed the Senate numbers, even where those numbers were in many instances lower than the administration request level and violated previous commitments made by this administration.

But these cuts are made only at very real cost, and the Members should know what some of these costs are.

This gentleman from California has the privilege of chairing the Aviation Subcommittee for the House Public Works and Transportation Committee. One of my concerns is the damage done to the aviation trust fund. Less than a year ago, this Congress raised aviation user taxes to fund higher authorization levels for badly needed

aviation programs. We did so at the urging of this administration. As part of that package, trust fund authorizations totaled $3.9 billion for fiscal year 1984, and tax levels were set accordingly. However, this conference report adopts Senate numbers, cuts that $3.9 billion in trust fund spending to only $1.8 billion, and does so at the urging of the administration. We are cutting the spending we had planned on, and are taxing for, and by more than half, by $2.1 billion, while leaving the tax levels unchanged.

What does that do to the trust fund surplus? By my calculations it will nearly double the trust fund surplus in only 1 year's time. The unobligated balance at the end of fiscal year 1983 will be slightly more than $2.1 billion. As a result of the underspending for trust fund programs in this conference report, I calculate that the unobligated balance will hit $3.6 billion by the end of fiscal year 1984. This is the same trust fund surplus that we were assured, when we passed the administration's taxes, would decline to about $1.3 billion by the end of fiscal year 1984.

So you will not need to wonder where this trust fund surplus came from: it came from this conference report. When we cannot persuade the administration or the Senate to honor the commitments made to these programs when the taxes were raised, skyrocketing surpluses are the result. With these kinds of surpluses looming, I see no valid argument against cutting aviation user taxes across the board. We do not need the higher revenues: we are awash in the money we have already collected and are not spending. With this conference report, we have come to the point where aviation taxes should be reduced.

The second major area of concern is the effect of this conference report on FAA operations, which is cut $140 million below the administration request level, but again at the urging of the administration. There are only two possible consequences of this funding level. One is that we will come back and restore much of the difference in a supplemental appropriation. The other is that it will be impossible to continue restoration of the air traffic control system; it will be impossible to bring on new controller work force as planned; and slot restrictions and GAR restrictions, which have been easing for months, will have to remain with us. If those restrictions return, you will not need to wonder there they came from: they came from this conference report.

We have to get past the idea that this is all just a numbers game and that the numbers have no consequences in the real world. In the real world of aviation, the cuts insisted on by the Senate and the administration are going to have some serious consequences.

Mr. COUGHLIN. Mr. Speaker, I have no further requests for time.

□ 1550

Mr. LEHMAN of Florida. Mr. Speaker, I yield 1 minute to the gentleman from Oregon (Mr. AuCoin).

Mr. AuCOIN. Mr. Speaker, as a former member of this subcommittee, I want to extend my appreciation to the chairman of the subcommittee, the gentleman from Florida (Mr. LEHMAN), who has handled this bill all the way through the House, through the Conference, and now on the floor again.

I think that the balanced bill he and the members of the committee bring before us warrants our support.

This is a good bill. This bill balances the transportation needs of every region of the country. It does so in the most thoughtful and fair way. I especially appreciate the committee's sensitive attention to the problems faced by the Portland metropolitan area in Oregon. And I would be remiss if I did not stand up and echo some of the remarks of the colleagues of mine who have taken the well before me in extending my compliments to the leadership of the new chairman of the subcommittee, the members on the Democratic side, and to the ranking Republican and the Republican members of the committee as well.

I think this is a very sound bill. It has been stated that the President will sign it. I think it warrants an overwhelming vote of confidence by the full membership of the House.

Mr. LEHMAN of Florida. Mr. Speaker, I thank the gentleman from Oregon (Mr. AuCoin) for his kind remarks. I wish that he were still on our subcommittee, but I certainly understand his change to the Defense Committee where he is making such a valuable contribution.

Mr. Speaker, I yield 2 minutes to the gentleman from Illinois (Mr. Simon).

Mr. SIMON. Mr. Speaker, I thank the chairman of the subcommittee. And I would like to ask him to yield to engage in a brief colloquy about the railroad-highway crossing demonstration program.

The House bill provided $9.7 million for the Carbondale project in my district in southern Illinois. This was the highest allocation among several receiving funds under the House bill.

The total allocation of the House bill for the program nationwide had been set at $35.7 million out of the $50 million authorized for the program.

Do the conferees have any instruction for the Department of Transportation in the allocation of funds to these projects?

Mr. LEHMAN of Florida. I would only reiterate to my friend from Illinois that the conference report states that the conferees note that the projects listed in the House report, such as his, are among projects worthy of meritorious consideration. The Department should note instructions contained in the House report regarding obligations in this program.

I certainly hope the gentleman is successful with his project, but I would be remiss if I at this time gave him any false encouragement. I wish him the best of luck with the project because I know it is a worthwhile project.

Mr. SIMON. I thank the gentleman. And I know that the wish of good luck from the chairman of the subcommittee is significant to the Department.

And let me just add inasmuch as the House bill gives such high priority to the Carbondale project providing it with the largest allotment of any other project, and because of the strong community support and the strong record of good management of the Carbondale project, it seems clear that the Department has many compelling reasons to direct a share of program funds sufficient to continue the important work underway there.

I thank the gentleman.

Mr. LEHMAN of Florida. Mr. Speaker, I am happy to yield 1 minute to the gentlewoman from Louisiana (Mrs. Boggs).

Mrs. BOGGS. Mr. Speaker, I rise in strong support of this conference report and I thank the chairman and the ranking member and all the members of the committee for their very hard and successful work in bringing forth such a balanced piece of legislation.

I would like to especially thank them for including within the conference report the continuance of the vessel traffic system in New Orleans and in San Francisco by an offset of the fuel savings of $3 million. When all of us are so concerned about the transport of hazardous materials and hazardous goods, it is especially fitting that the committee of the House kept in place this, very, very necessary system, until it can be taken over by either local or State authorities, as the case may be.

I would like also, Mr. Speaker, if I may, to ask the chairman, as our colleague from Illinois did, if the railroad allocation for Metairie, La., was considered in the conference report.

Mr. LEHMAN of Florida. If the gentlewoman would yield to me, as the gentlewoman heard me state to other members here, including the gentleman from Illinois, the conferees note that the projects listed in the House report are among other projects worthy of meritorious consideration. And at this time I can only say that I would hope the gentlewoman's project does receive due consideration, but I

would be remiss if I offered any false encouragement at this time.

Mrs. BOGGS. I thank the gentleman.

Mr. LEHMAN of Florida. Mr. Speaker, I yield 1 minute to the gentleman from California (Mr. FAZIO), the chairman of the Legislative Subcommittee of the Committee on Appropriations, and a former member of this subcommittee.

Mr. FAZIO. Mr. Speaker, I appreciate the gentleman yielding and I appreciate even more the kind consideration that he gave to the California projects that were before the subcommittee this year.

I see the gentleman from Minnesota (Mr. SABO), the gentleman from Connecticut (Mr. RATCHFORD), and the gentleman from Michigan (Mr. CARR) and other members of the subcommittee here and I would like to include all of them in my laudatory comments that I would like to direct to the committee.

California has been known as a freeway-oriented society for many years now, but we are seeing the emergence of a number of new modes of transportation, particularly light-rail systems in San Diego and San Jose and Sacremento and in the San Francisco Bay area, the augmentation of the MUNI and BART systems and, particularly important in Los Angeles, the beginning of a fixed rail transit system.

And this committee, although confronted with some very difficult fiscal realities brought about by growth in other areas of the Sunbelt, has been very helpful. California is coming late to the fiscal table in historic terms. But the committee has gone beyond the call of duty in coming to our aid. We sincerely appreciate the attention the committee has given us, the ability those of us on the committee have had to participate in the process.

Mr. LEWIS of California. Mr. Speaker, will the gentleman yield?

Mr. FAZIO. I am hapy to yield to the gentleman from California.

Mr. LEWIS of California. I thank the gentleman for yielding.

It is not precisely a transportation matter, but may affect the movement of the gentleman. I thought the gentleman would like to know that the Sabastini election was just set aside in the courts.

Mr. FAZIO. I say to the gentleman from California (Mr. LEWIS), you could not have made my day with any greater finality than with that news. I probably have lost my train of thought as it relates to transportation.

So I simply will conclude by telling the chairman one more time how much we appreciate the way in which the chairman let us participate with him in allocating the funds that are available. And I thank the committee very much.

● Mr. FRENZEL. Mr. Speaker, the conference report on the Transportation appropriation is under the House-passed version by $367.7 million or 3.3 percent, but it is still too expensive to win my approval.

According to the House Budget Committee factsheet for June 21, 1983, the conference report is $23 million in budget authority and $452 million in outlays over the President's most recent request. Funding levels above the request include $352 million for mass transit, $51 million for Amtrak, and a total $100 million in Federal Railroad Administration funding.

Bills which are almost a half million above the amount requested by the administration ought not be ignored by the deficit conscious American public.

The conference report gives the appearance of responsibility since its $10.9 billion appropriation falls within the 302(a) perimeters of the budget resolution for fiscal year 1984. The appropriation conferees would have to be commended for their restraint were it not that the budget resolution and its allocations are so high. The conference report is $295 million below the spending allocations of the budget. That is a good start, but the reductions are not enough to warrant a vote in favor.

The Transportation conference report is not the worst spending bill that the Appropriation Committee has produced. In fact, this bill is an improvement over last year's bill which relied heavily on supplementals. Nevertheless, the bill is excessive.

Because I believe that difficult decisions must be made to bring down the looming deficits, I intend to vote against this bill.●

● Mr. SKEEN. Mr. Speaker, waste isolation pilot program (WIPP) is a research and development facility designed to demonstrate the safe disposal of radioactive wastes resulting from defense activities of the Department of Energy.

Construction of the WIPP is set to begin in mid-September—ahead of schedule and below budget. Last month the Department of the Interior ordered administrative land withdrawal, and on July 5, the Army Corps of Engineers awarded the actual construction contract.

As part of the original authorizing legislation (Public Law 96-164), the Secretary of Energy was directed to enter into a written agreement with the State of New Mexico as to how the DOE was to resolve the concerns of the State. That agreement is being overseen by the U.S. district court.

As part of that stipulated agreement, the DOE pledged to support the New Mexico congressional delegation in seeking appropriations for the purpose of upgrading certain highways which would typically be used for transporting wastes to the facility. The stipulated agreement set a figure of $57.9 million for the upgrade.

Obviously, a full $58 million is not necessary at this time, however, a need of $5.8 million was identified by the State of New Mexico.

On January 14, 1983, my colleague Senator PETE DOMENICI met with then Transportation Secretary Drew Lewis. Secretary Lewis noted at the meeting that under the terms of the stipulated agreement, the $5.8 million could not be met through existing programs. Therefore he agreed that a special appropriation would have to be pursued.

Secretary Lewis assured Senator DOMENICI of the Department's full support for upgrading the roads associated with the WIPP. Since that time, we have also been assured verbally of newly appointed Transportation Secretary, Elizabeth Dole's support.

In lieu of the decision to begin construction of the site in mid-September, the action on the part of the Senate appropriating $5.8 million for planning and design work must be accomplished. Congress should continue its strong support of the WIPP, and I do not believe anything should impede the drilling and excavation work for the project.●

● Mr. MITCHELL. Mr. Speaker, it has come to my attention that the FAA plans to lump together numerous support-type contracts, into a single contract. Such consolidation into an umbrella program known as "Systems Engineering Integration". RFP No. DFTA 0183 R 17144, will undoubtedly be damaging to small business firms and probably contrary to forthcoming revisions in OMB Circular A-76. It is clearly contrary to the House Small Business Committee's efforts over the past decade to enable small businesses to bid for Government procurement contracts.

Earlier this year, the Office of Federal Procurement Policy issued proposed revisions to OMB Circular No. A-76, which governs performance of commercial activities by the Government in-house versus through contract. In the draft—which shortly will be finalized—special efforts were made to preserve contracting activities for small and disadvantaged small businesses.

Over the past decade, the House Small Business Committee has worked with contracting officers to break out portions of work so that small businesses could bid for it. This policy has been accepted—it has provided the Government new sources of supply, saved the taxpayer many millions of dollars by increasing competition, and been of invaluable assistance to small entrepreneurs. It is beyond my understanding why the Department of Transportation would consider permitting FAA to reverse this policy. I trust it will not do so.●

● Ms. OAKAR. Mr. Speaker, I rise in support of the conference report on the Department of Transportation authorization bill. In particular, I rise in support of the provision contained therein which bans the implementation of the revised regulations issued by the Office of Personnel Management on July 14.

By the overwhelming vote of 75 to 18, the Senate has already voted to prohibit the implementation of these regulations, and I firmly believe the House should do likewise.

The July 14 regulations are certainly an improvement over the first set of OPM regulations issued on March 30 in that they are not as punitive. However, they still would make major changes in the pay, promotion and RIF procedures in the Federal work force. In my opinion, such significant changes require congressional review and oversight. Given that these new regulations have been out for less than a month, that review and oversight by this House has not been possible.

I would urge my colleagues, therefore, to support this provision of the bill.●

Mr. LEHMAN of Florida. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. Without objection, the previous question is ordered on the conference report.

There was no objection.

The conference report was agreed to.

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

Senate amendment No. 1 reads as follows:

Senate amendment No. 1: Page 2, line 6, strike out "$35,000" and insert "$38,000".

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 1 and concur therein with an amendment, as follows:

In lieu of the sum proposed by said amendment, insert "$36,500".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Mr. LEHMAN of Florida. Mr. Speaker, I ask unanimous consent that the Senate amendments numbered 10, 14, 47, 49, and 55 be considered en bloc and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The Senate amendments referred to are as follows:

Senate amendment No. 10: Page 5, line 25, strike out "$1,000,000" and insert "such sums as may be necessary".

Senate amendments No. 14: Page 7, line 22, after "$56,900,000" insert ": *Provided*, That the Secretary of Transportation is authorized to transfer appropriated funds between this appropriation and the Federal Aviation Administration appropriation for Operations: *Provided further*, That this appropriation shall be neither increased nor decreased by more than 7.5 per centum by any such transfers: *Provided further*, That any such transfers shall be reported to the Committees on Appropriations.

Senate amendment No. 47: Page 29, line 5, after "basic" insert ", including not to exceed $3,000 for official entertainment expenses to be expended upon the approval or authority of the Secretary of Transportation".

Senate amendment No. 49: Page 30, line 5, strike out "$25,895,000" and insert "$26,795,000, of which $900,000 shall be available only for necessary expenses of the Office of the Inspector General to augment the bid rigging investigative efforts currently underway.".

Senate amendment No. 55: Page 32, line 12, strike out all after "program" down to and including "entity" in line 15 and insert "unless the Commission is precluded from meeting this requirement because of circumstances beyond its control".

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN moves that the House recede from its disagreement to the amendments of the Senate numbered 10, 14, 47, 49, and 55 and concur therein.

The motion was agreed to.

□ 1600

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 21 reads as follows:

Senate amendment No. 21: Page 11, line 2, after "rescinded" insert ": *Provided further*, That, notwithstanding any other provision of law, of the foregoing limitation at least $80,000,000 shall first be made available to fund construction of all eligible portions of new air carrier runways, and related construction, at airports as to which joint Department of Transportation/Federal Aviation Administration Task Force Delay Studies have been prepared for issuance in 1983, or later, showing annual delay costs attibutable to inadequate runway capacity that will exceed the cost of construction, and as to which the sponsor's preapplication shall specify a 1984 project start date, whereafter the balance of the $80,000,000 shall revert to the discretionary funds".

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 21 and concur therein with an amendment, as follows:

In lieu of the matter inserted by said amendment insert the following: ": *Provided further*, That, notwithstanding any other provision of law, of the foregoing limitation at least $25,000,000 shall first be made available to fund construction of all eligible portions of new air carrier runways, and related construction, at airports as to which joint Department of Transportation/Federal Aviation Administration Task Force Delay Studies have been prepared for issuance in 1983, or later, showing annual delay costs attributable to inadequate runway capacity that will exceed the cost of construction, and as to which the sponsor's preapplication shall specify a 1984 project start date, whereafter the balance of the $25,000,000 shall revert to the discretionary funds".

Mr. LEHMAN of Florida (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The gentleman from Florida (Mr. LEHMAN) is recognized for 30 minutes.

Mr. LEHMAN of Florida. Mr. Speaker, I yield to the gentleman from California (Mr. MINETA).

Mr. MINETA. Mr. Speaker, I rise in opposition to the gentleman's motion to recede to the Senate amendment with an amendment.

I do so because there are many airports in every single State of this Nation which are seeking discretionary grants from the airport program and their projects are valid and their needs are real. What the Senate did is it first reduced the amount of money available to all these airports by cutting the total airport grants program by $100 million, to the point where the so-called pure discretionary funds for which most of these airports are competing total only $100 million for the entire country.

Having cut back the amount of funds available to everybody, they then attempted to designate most of those limited funds for just one airport, leaving all the rest of the airports in the country to fight over the leftovers.

What is before us now is an amendment that would mark $25 million for one airport—Houston—while leaving all the rest of airports in the country seeking discretionary grants to compete for the remaining $75 million in pure discretionary money. This amendment has the effect of taking money away from airports in every State, including from other airports in Texas.

The effect of defeating this motion will be to insist on the House position and to continue to give all airports in the country an equal shot at discretionary airport grants.

Mr. Speaker, I want to emphasize that this is not in any way a vote

against Houston or against this project. I am familiar with the project and I think it is a valid and needed project and that in any fair competition it will get discretionary grant assistance. But it should not receive preferential treatment to all other airports in the country. It should not be able to avoid having the need for this project weighed against the need for all other projects.

I would have no objection to Houston getting $25 million, or any other amount, in discretionary money, if that amount were found to accurately reflect the need for this project relative to applications from other airports all over the country.

In short, Mr. Speaker, I object not to funding for Houston's project, but to the way the other body has attempted to give preferential treatment to one airport at the expense of airports all over the country. Everybody should have to play by the same rules.

A vote against the pending motion will be a vote to insist on equal treatment of all airport grant applications. I urge a "no" vote.

Mr. LEHMAN of Florida. Mr. Speaker, I yield to the gentleman from Texas (Mr. LELAND).

Mr. LELAND. Mr. Speaker, I want to thank my friend, the gentleman from California (Mr. MINETA), the chairman of the Subcommittee on Aviation, for his remarks regarding the conference report on the transportation appropriations as they affect the much-needed improvements at Houston Intercontinental Airport.

I appreciate his concerns about the precedental impact of mandating the allocation of funds for Houston or any other airport. In fact, as Chairman MINETA points out, such a practice could in the future very well work to Houston's detriment.

I am grateful that in the expression of his reservations concerning the motion to accede to the Senate he noted the strong need Houston has demonstrated for improvement funding and that a vote against the motion to accede was not a vote against Houston.

Those of us who are vitally concerned about tranportation improvements at Houston Intercontinental take comfort in the chairman's observation that he is confident that Houston will receive the funding it needs if given fair treatment in the review process.

I would take this opportunity, Mr. Speaker, to emphasize once again the need which has been demonstrated for the runway improvements at Houston Intercontinental. As the House conference report correctly notes, there are substantial costs associated with the delays resulting from the need for additional runway capacity in Houston. In addition, these delays affect our Nation's air transportation system, of which Houston is a vital part.

The conference report is clear in its emphasis on Houston's pressing need and I very much appreciate the remarks of the gentleman from California, which serve to underscore that emphasis. I want to thank Chairman MINETA for his attention and assistance.

I would like too, to commend the gentleman from Florida (Mr. LEHMAN) for his leadership as chairman of the Transportation Subcommittee of the Appropriations Committee especially for his sensitivity to the very critical problems of Houston Intercontinental Airport during consideration of this most important issue. His leadership was simply invaluable.

Mr. LEHMAN of Florida. Mr. Speaker, I yield to the gentleman from Texas (Mr. FIELDS).

Mr. FIELDS. Mr. Speaker, I rise to clarify for my fellow colleagues that the Houston delegation does not seek to insist on Senate language earmarkings funds for Houston, nor to demand a rollcall vote on this technical amendment in disagreement.

Rather, Mr. Speaker, I seek to explain the importance of this runway project at Houston Intercontinental Airport to the traveling public and the aviation community in Houston, the Southwest, and nationwide.

Mr. Speaker, although I have serious concerns regarding the direction of future proposed runways at intercontinental, I nonetheless, feel strongly that the Department of Transportation and the Federal Aviation Administration should not only give priority consideration for funding Intercontinental's aviation concerns, but should also, through the Secretary's discretionary funds, provide $25 million for vitally needed runway construction funds at Houston Intercontinental Airport.

Mr. Speaker, Houston Intercontinental has three runways currently operating in excess of airfield design capacity. A recent FAA/industry task force study concluded that if a new runway is not constructed by 1985, the delay cost, expressed in 1980 dollars, to the aviation community using Intercontinental, will be $116.1 million annually. Commercial air carriers will bear $83.2 million of these delay costs directly attributable to lack of adequate runway capacity at Intercontinental. Further, the study estimates that there will be over 95,000 hours of aircraft delay annually if a new runway is not constructed by 1985. By 1990, the lack of a new runway will produce annual delay costs of $276.9 million based on 1980 dollars.

Mr. Speaker, there are serious airfield capacity problems at Houston Intercontinental Airport. For this reason, I believe it is imperative that the Department of Transportation and the FAA funds use $25 million for the construction of a new runway at Houston Intercontinental.

Mr. Speaker, both Houses of Congress underscored the need for and importance of the Houston runway project and gave it No. 1 priority in their respective committee reports on the Department of Transportation appropriations for fiscal year 1984.

The economic justification of the runway construction project cannot be debated. The cost of construction represents a small fraction of the delay costs experienced by the airlines and consumers without the runway. The one-time cost of construction at $87 million, of which $65 million is eligible for funding under the AIP program, compares with projected annual cost of delay estimated in a DOT/FAA report to be in excess of $116 million per year. By 1990, these delay costs will total almost $300 million a year.

Moreover, the project is one that has national significance. Delays at Houston Intercontinental produce air traffic delays that ripple across the country. Houston is a leading air traffic hub for both domestic and international operations and yet does not have enough runway capacity to meet the needs of air commerce and the traveling public. As a result, the failure to fund this runway project will produce adverse consequences of enormous magnitude.

Houston travelers contribute over $150 million annually into the aviation trust fund. The cost of the runway requiring $25 million in fiscal year 1984 and the remainder in fiscal year 1985 represents a small return for this contribution and a small portion of the approximately $330 million available in the total pool of discretionary funds for the fiscal year.

In short, this project is economically justified, has important national merits, and, therefore, must be accorded the highest priority by the FAA in its discretionary fund grants.

Mr. LEHMAN of Florida. Mr. Speaker, I yield to the gentleman from Illinois (Mr. LIPINSKI).

Mr. LIPINSKI. Mr. Speaker, I rise in strong support of the gentlemen from California's efforts to oppose Mr. LEHMAN's motion to recede and concur with the Senate amendment No. 21 concerning grants-in-aid for airports.

This amendment which was adopted by the Senate and House conferees is an unprecedented attempt to insert legislation in an appropriations bill.

Language was inserted in the conference report that would earmark a specific amount of money—$25 million for Houston Intercontinental Airport. In both the House and Senate reports that accompany H.R. 3329, 48 airports

were listed to receive priority funding for airport improvement projects. No other airport received a specific earmarking in the legislation. I am sure all of these 48 plus airports are worthy of airport improvement funding. But I do not feel it is fair for one airport to be singled out to receive a specific amount that would total one quarter of the available funds.

I urge all of my colleagues to support the motion made by the chairman of the Aviation Subcommittee.

Mr. LEHMAN of Florida. Mr. Speaker, I yield to my colleague, the gentleman from Florida (Mr. SHAW).

Mr. SHAW. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of the comments made by the gentleman from California (Mr. MINETA). In my home district of Broward County, Fla., we have under construction a large new airport the Fort Lauderdale-Hollywood Airport. In times of short funds it would be wrong to skim off the top large sums for one airport at the expense of the rest of the country.

Mr. LEHMAN of Florida. Mr. Speaker, I yield to the gentleman from Illinois (Mr. PORTER).

Mr. PORTER. I thank the gentleman for yielding.

Mr. Speaker, I think the points made by the gentleman from California are very important ones indeed. This priority earmarking for one airport project over all others would be, it seems to me, unprecedented. If we did it in this case, priority earmarking would be attempted again and again in the future. The Houston airports needs can stand on their own in competition with all others and without special treatment here. This proposal is simply not wise public policy, and I would support the gentleman from California and oppose the motion to concur by the gentleman from Florida.

● Mr. SNYDER. Mr. Speaker, I rise in opposition to the gentleman's motion and urge my colleagues to do the same.

As you have heard, if the gentleman's motion is adopted, $25 million in airport improvement discretionary funds would be specifically earmarked for the Houston Intercontinental Airport in fiscal year 1984. This would be in addition to the nearly $5 million in entitlement funds which the airport would receive in accordance with the provisions of the authorizing statute.

Mr. Speaker, I think it is very inappropriate to take a relatively small grant program, such as airport improvement program, and single out one airport for preferential treatment. Certainly, the airports in my district are not being guaranteed any of these discretionary funds and I do not see why Houston should be treated any differently.

In addition, I would like to emphasize to my colleagues that the entire amount of discretionary funds available for fiscal year 1984 will only be about $309 million, and two-thirds of this amount is required to be distributed to narrowly defined classes of airports and certain types of projects. Therefore, the total amount of pure discretionary funds which will be available for obligation will be about $100 million, of which 425 million or 25 percent would be guaranteed to the city of Houston if the gentleman's motion is adopted.

Mr. Speaker, the runway construction project at Houston Intercontinental may be one of the highest priority projects in the Nation, but it should be judged in the same way as other projects—on the merits. Accordingly, I would urge my colleagues to oppose the gentleman's motion and then to support a further motion that the House insist on its disagreement with the Senate amendment.●

The SPEAKER pro tempore. Without objection, the previous question is ordered on the motion.

There was objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN).

The motion was rejected.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I move that the House insist on its disagreement to the amendment of the Senate No. 21.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 23 reads as follows:

Senate amendment No. 23: Page 12, line 14, after "made" insert ": *Provided*, That notwithstanding any other provision of law, the Secretary of Transportation may hereafter issue notes or other obligations to the Secretary of the Treasury, in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury may prescribe. Such obligations may be issued to pay any necessary expenses required pursuant to the guarantee issued under the Act of September 7, 1957, Public Law 85-307, as amended (49 U.S.C. 1324 note). The number of such obligations when combined with the aggregate of all such obligations made during fiscal year 1983 shall not exceed $250,000,000 by September 30, 1984. Such obligations shall be redeemed by the Secretary from appropriations authorized by this section. The Secretary of the Treasury shall purchase any such obligations, and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. The purpose for which securities may be issued under such Act are extended to include any purchase of notes or other obligations issued under the subsection. The Secretary of the Treasury may sell any such obligations at such times and price and upon such terms and conditions as he shall determine in his discretion. All purchase, redemptions, and sales of such obligations by such Secretary shall be treated as public debt transactions of the United States".

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 23 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ": *Provided*, That notwithstanding any other provision of law, the Secretary of Transportation may hereafter issue notes or other obligations to the Secretary of the Treasury, in such forms and denominations, bearing such maturities, and subject to such terms and conditions as the Secretary of the Treasury may prescribe. Such obligations may be issued to pay any necessary expenses required pursuant to the guarantee issued under the Act of September 7, 1957, Public Law 85-307, as amended (49 U.S.C. 1324 note). The amount of such obligations when combined with the aggregate of all such obligations made during fiscal year 1983 shall not exceed $175,000,000 by September 30, 1984. Such obligations shall be redeemed by the Secretary from appropriations authorized by this section. The Secretary of the Treasury shall purchase any such obligations, and for such purpose he may use as a public debt transaction the proceeds from the sale of any securities issued under the Second Liberty Bond Act, as now or hereafter in force. The purpose for which securities may be issued under such Act are extended to include any purchase of notes or other obligations issued under the subsection. The Secretary of the Treasury may sell any such obligations at such times and price and upon such terms and conditions as he shall determine in his discretion. All purchase, redemptions, and sales of such obligations by such Secretary shall be treated as public debt transactions of the United States.".

Mr. LEHMAN of Florida (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 28 reads as follows:

Senate amendment No. 28: Page 17 after line 13, insert: Notwithstanding sections 125, 129, and 301 of title 23, United States Code, $21,000,000 from the Emergency Relief Fund authorized under section 125 of title 23, United States Code, shall be made available to repair or replace the Mianus Bridge on Interstate 95 in Greenwich, Connecticut, and for repair of local roads and for ancillary expenses incurred by the towns of Greenwich, Connecticut, and Port Chester,

New York as a result of the Mianus Bridge collapse. Of the funds made available under this section, not more than $1,000,000 is to be equally divided to the towns of Greenwich, Connecticut, and Port Chester, New York.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 28 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following:

EMERGENCY RELIEF

Notwithstanding sections 125, 129, and 301 of title 23, United States Code, an additional $20,000,000 shall be available from the Highway Trust Fund for the emergency fund authorized under section 125 of title 23, United States Code: *Provided,* That the Secretary shall give first priority to making funds available to repair or replace the Mianus Bridge on I-95 in Connecticut: *Provided further,* That the Federal funds provided herein shall not duplicate assistance provided by any other Federal emergency program, compensation received from Connecticut bridge insurance policies, or any other non-Federal source: *Provided further,* That regulations issued under section 125, title 23, United States Code, shall apply to the expenditure of such Federal funds: *Provided further,* That such funds shall not be available until the State of Connecticut enters into an agreement pursuant to section 105 of the Federal-Aid Highway Act of 1978 which covers the Mianus Bridge.

MIANUS BRIDGE EMERGENCY ASSISTANCE

For necessary expenses to help defray costs such as additional police and fire services and road repairs resulting from the Mianus Bridge collapse, $1,000,000: *Provided,* That such sum shall be equally divided between and allocated to the towns of Greenwich, Connecticut, and Port Chester, New York.

Mr. LEHMAN of Florida (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 30 reads as follows:

Senate amendment No. 30: Page 17, after line 18, insert:

WASTE ISOLATION PILOT PROJECT ROADS

For necessary expenses in connection with planning and design activities associated with the upgrading of certain highways for the transportation of nuclear waste generated during defense-related activities, not otherwise provided for, $5,800,000 to remain available until expended: *Provided, however,* That these funds become available when construction of the Waste Isolation Pilot Project commences.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 30, and concur therein.

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 36 reads as follows:

Senate amendment No 36: Page 20, line 17, strike out all after "amended" down to and including "purposes" in line 25.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 36 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment, amended to change: "fiscal year 1981" to "fiscal year 1979".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 39 reads as follows:

Senate amendment No. 39: Page 25, line 11, after "1984" insert ": *Provided,* That the Secretary of Transportation is authorized to issue to the Secretary of the Treasury notes or other obligations pursuant to section 512 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), as amended, in such amounts and at such times as may be necessary to pay any amounts required pursuant to the guarantee of the principal amount of obligations under section 511 through 513 of such Act, such authority to exist as long as any such guaranteed obligation is outstanding".

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 39 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment, insert the following: ": *Provided,* That the Secretary of Transportation is authorized to issue to the Secretary of the Treasury notes or other obligations pursuant to section 512 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Public Law 94-210), as amended, in such amounts and at such times as may be necessary to pay any amounts required pursuant to the guarantee of the principal amount of obligations under sections 511 through 513 of such Act, such authority to exist as long as any such guaranteed obligation is outstanding: *Provided further,* That the amount of such notes or other obligations, when combined with the aggregate of all such notes or obligations issued during fiscal year 1983, shall not exceed $150,000,000 by September 30, 1984.".

Mr. LEHMAN of Florida (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 41 reads as follows:

Senate amendment No. 41: Page 26, strike out lines 1 to 7, inclusive.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 41 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment, amended to read as follows:

ILLINOIS FEEDER LINE ASSISTANCE

(TRANSFER OF FUNDS)

For a grant related to the acquisition and rehabilitation of the railroad feeder line as authorized by section 511 of the Rail Safety and Service Improvement Act of 1982, $3,000,000, to be derived by transfer from the unobligated balances of "Redeemable preference shares": *Provided,* That such grant shall contain terms requiring (1) the repayment of the full amount of the grant to the United States in the event of the cessation of service on such line within five years after the first operation of such service after receipt of such grant, and (2) a liquidation priority for the United States in the event of bankruptcy within such five-year period.

Mr. LEHMAN of Florida (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 53 reads as follows:

Senate amendment No. 53: Page 31, line 11, strike out all after "expenses," down to and including "carriers" " in line 12 and insert "$16,100,000, for the period October 1, 1983 through June 30, 1984".

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 53 and concur therein with an amendment, as follows: In lieu of the matter stricken and inserted by said amendment insert the following: "$18,400,000, for the period October 1, 1983 through August 1, 1984".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 60 reads as follows:

Senate amendment No. 60: Page 41, strike out lines 16 to 24, inclusive.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 60 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows:

SEC. 314. The Congress intends and directs that the proposed rulemaking to adjust the annual passenger ceiling at Washington National Airport be held in abeyance for at least 60 days from the date of enactment of this Act.

Mr. LEHMAN of Florida (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 61 reads as follows:

Senate amendment No. 61: Page 42, strike out lines 1 to 6, inclusive.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 61 and concur therein with an amendment, as follows: Restore the matter stricken by said amendment amended to read as follows:

SEC. 315. None of the funds provided in this Act for the Department of Transportation shall be used for the enforcement of any rule with respect to the repayment of construction differential subsidy for the permanent release of vessels from the restrictions in section 506 of the Merchant Marine Act, 1936, until 60 days following the promulgation of any such rule.

Notwithstanding any other provision of law, the enforcement of any rule regarding the repayment of construction differential subsidy for the permanent release of vessels from the restrictions in section 506 of the Merchant Marine Act, 1936, shall be held in abeyance for at least 60 days from the date of enactment of this act.

Mr. LEHMAN of Florida (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 64 reads as follows:

Senate amendment No. 64: Page 42, after line 19, insert:

SEC. 315. No funds appropriated under this act shall be expended to pay for any travel by the Administrator of the Federal Aviation Administration as passenger or crew member aboard any Department of Transportation aircraft to any destination served by a regularly scheduled air carrier: *Provided,* That this limitation shall not apply if no regularly scheduled carriers' flight arrives at the destination of the Administrator within 6 hours local time of the desired time of arrival: *Provided further,* That this limitation shall not apply to costs incurred by any flight which is essentially for the purpose of inspecting, investigating, or testing the operations of any aspect of the Federal Aviation Administration system designed to aid and control air traffic, or to maintain or improve aviation safety: *Provided further,* That this limitation shall not apply to costs incurred by any flight in Department of Transportation aircraft which is necessary in times of emergency or disaster, or for security reasons, or to fulfill official diplomatic representation responsibilities in foreign countries: *Provided further,* That written certifications shall be issued quarterly on all flights initiated in the previous quarter subject to this limitation and shall be made readily available to Congress and the general public.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 64 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment insert "317".

The motion was agreed to.

□ 1610

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 65 reads as follows:

Senate amendment No. 65: Page 42, after line 19, insert:

SEC. 316. Section 120(j) of title 23, United States Code, is amended by inserting after the word "Representatives" the following: ", and for funds allocated under the provisions of section 155 of this title and obligated subsequent to January 6, 1983,".

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered and concur therein with an amendment, as follows: In lieu of section No. "316" named in said amendment insert "318".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 66 reads as follows:

Senate amendment No. 66: Page 42, after line 19, insert:

SEC. 317. None of the funds in this or any other Act shall be used by the Federal Aviation Administration for any facilities closures or consolidations prior to December 1, 1983: *Provided,* That the Federal Aviation Administration shall, no later than October 1, 1983, submit to the appropriate committees of the Congress a detailed, site-specific, and time-phased plan, including cost-effectiveness and other relevant data, for all facilities closures or consolidations over the next three years: *Provided further,* That, in the instance of any proposed closure or consolidation questioned in writing by a committee of the Congress, no such proposed closure or consolidation shall be advanced prior to April 15, 1984, in order to allow for the timely conduct of any necessary congressional hearings.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreements to the amendment of the Senate numbered 66 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following:

SEC. 319. None of the funds in this or any other Act shall be used by the Federal Aviation Administration for any facility closures or consolidations prior to December 1, 1983: *Provided,* That the Federal Aviation Administration shall, no later than October 1, 1983, submit to the appropriate committees of the Congress a detailed, site-specific, and time-phased plan, including cost-effectiveness and other relevant data, for all facilities closures or consolidations over the next three years: *Provided further,* That, in the instance of any proposed closure or consolidation questioned in writing by a committee of the Congress, no such proposed closure or consolidation shall be advanced prior to April 15, 1984, in order to allow for the timely conduct of any necessary congressional hearings.

Mr. LEHMAN of Florida. Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by

the gentleman from Florida (Mr. LEHMAN).

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 67 reads as follows:

Senate amendment No. 67: Page 42, after line 19, insert:

SEC. 318. Section 145 of Public Law 97-377, approved December 21, 1982, is amended (1) by designating the existing text thereof as subsection (a), and (2) by adding at the end thereof the following new subsection:

"(b) The amendment made by subsection (a) of this section shall be effective as of 5 o'clock ante meridian eastern daylight time, August 3, 1981.".

MOTION OFFERED BY MR LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 67 and concur therein with an amendment, as follows: In lieu of section No. "318" named in said amendment insert the following: "320".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Senate amendment No. 69 reads as follows:

Senate amendment No. 69: Page 42 after line 19, insert:

SEC. 320. (a) The Congress finds that—

(1) in this Nation there exist millions of handicapped people with severe physical impairments including partial paralysis, limb amputation, chronic heart condition, emphysema, arthritis, rheumatism, and other debilitating conditions which greatly limit their personal mobility;

(2) these people reside in each of the several States and have need and reason to travel from one State to another for business and recreational purposes;

(3) each State maintains the right to establish and enforce its own code of regulations regarding the appropriate use of motor vehicles operating within its jurisdiction;

(4) within a given State handicapped individuals are oftentimes granted special parking privileges to help offset the limitations imposed by their physical impairment;

(5) these special parking privileges vary from State to State as do the methods and means of identifying vehicles used by disabled individuals, all of which serve to impede both the enforcement of special parking privileges and the handicapped individual's freedom to properly utilize such privileges;

(6) there are many efforts currently underway to help alleviate these problems through public awareness and administrative change as encouraged by concerned individuals and national associations directly involved in matters relating to the issue of special parking privileges for disabled individuals; and

(7) despite these efforts the fact remains that many States may need to give the matter legislative consideration to ensure a proper resolution of this issue, especially as it relates to law enforcement and placard responsibility.

(b) The Congress encourages each of the several States working through the National Governors Conference to—

(1) adopt the International Symbol of Access as the only recognized and adopted symbol to be used to identify vehicles carrying those citizens with acknowledged physical impairment;

(2) grant to vehicles displaying this symbol the special parking privileges which a State may provide; and

(3) permit the International Symbol of Access to appear either on a specialized license plate, or on a specialized placard placed in the vehicles so as to be clearly visible through the front windshield, or on both such places.

(c) It is the sense of the Congress that agreements of reciprocity relating to the special parking privileges granted handicapped individuals should be developed and entered into by and between the several States so as to—

(1) facilitate the free and unencumbered use between the several States, of the special parking privileges afforded those people with acknowledged handicapped conditions, without regard to the State of residence of the handicapped person utilizing such privilege;

(2) improve the ease of law enforcement in each State of its special parking privileges and to facilitate the handling of violators; and

(3) ensure that motor vehicles carrying individuals with acknowledged handicapped conditions be given fair and predictable treatment throughout the Nation.

(d) As used in this section the term "State" means the several States and the District of Columbia.

(e) The Secretary of Transportation shall provide a copy of this section to the Governor of each State and the Mayor of the District of Columbia.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 69 and concur therein with an amendment, as follows: In lieu of the section number named in said amendment insert "321".

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

Senate amendment No. 70 reads as follows:

Senate amendment No. 70: Page 42, after line 19, insert:

SEC. 321. The Senate intends that the Benjamin Franklin Bridge connecting Philadelphia, Pennsylvania and Camden, New Jersey, be given priority consideration by the Secretary of Transportation.

MOTION OFFERED BY MR. LEHMAN OF FLORIDA

Mr. LEHMAN of Florida. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. LEHMAN of Florida moves that the House recede from its disagreement to the amendment of the Senate numbered 70 and concur therein with an amendment, as follows: In lieu of the matter inserted by said amendment insert the following:

SEC. 322. Notwithstanding any other provision of law, the limitation on total obligations for Federal-aid highways and highway safety construction programs for fiscal year 1984 contained in Title I of this Act shall be reduced by $80,000,000.

Mr. LEHMAN of Florida (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. LEHMAN).

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the conference report and the several motions was laid on the table.

GENERAL LEAVE

Mr. LEHMAN of Florida. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days within which to revise and extend their remarks on the conference report and amendments in disagreement on the bill, H.R. 3329, and that I may insert tabular material.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

PROVIDING FOR CONSIDERATION OF H.R. 2780, STATE AND LOCAL FISCAL ASSISTANCE AMENDMENTS OF 1983

Mr. HALL of Ohio. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 285 and ask for its immediate consideration.

The Clerk read the resolution, as follows:

H. RES. 285

Resolved, That at any time after the adoption of this resolution the Speaker may, pursuant to clause 1(b) of rule XXIII, declare the House resolved into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2780) to extend and amend the provisions of title 31, United States Code, relating to the general revenue sharing program, and the first reading of the bill shall be dispensed with. After general debate, which shall be confined to the bill and shall continue not to exceed two hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Government Operations, the bill shall be considered for amendment under the five-minute rule. It shall be in order to consider the amendment in the nature of a substitute recommended by the Committee on Government Operations now printed in the bill as an original bill for the purpose of amendment under the five-minute rule, and each section of said substitute shall be considered as having been read for amendment. At the conclusion of the consideration of the bill for amendment, the Committee shall rise and report the bill to the House with such

amendments as may have been adopted, and any Member may demand a separate vote in the House on any amendment adopted in the Committee of the Whole to the bill or to the committee amendment in the nature of a substitute. The previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit with or without instructions.

The SPEAKER. The gentleman from Ohio (Mr. HALL) is recognized for 1 hour.

Mr. HALL of Ohio. Mr. Speaker, I yield the customary 30 minutes to the gentleman from Missouri (Mr. TAYLOR) for purposes of debate only, and pending that, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 285 is an open rule providing for the consideration of H.R. 2780, the State and Local Fiscal Assistance Amendments of 1983.

The rule provides for 2 hours of general debate to be equally divided and controlled by the chairman and ranking minority member of the Committee on Government Operations.

It should be noted that the rule makes in order the Government Operations Committee amendment in the nature of a substitute as an original text for purposes of amendment. Each section of the substitute shall be considered as read.

House Resolution 285 further provides for one motion to recommit with or without instructions.

There are no waivers granted under this rule.

Mr. Speaker, H.R. 1780 extends the authorization for the general revenue sharing program for 5 years. This legislation is urgently needed because the authority for general revenue sharing will expire on September 30, 1983.

There is bipartisan support for extending revenue sharing, and I am not aware of any opposition to this open rule. I would urge my colleagues to adopt the rule.

Mr. TAYLOR. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, House Resolution 285 is an open rule under which the House will consider legislation authorizing a 5-year extension of the general revenue sharing program at a potential cost of as much as $38 billion.

The rule makes in order the committee amendments now printed in the bill, H.R. 2780, as original text for amendment under the 5-minute rule. Because of the nature of the controversy surrounding this reauthorization, two hours of general debate is provided.

Lastly, the rule provides for one motion to recommit, with or without instructions.

Mr. Speaker, this is a very simple rule, it does not contain any waivers and it was reported from the Committee on Rules by a voice vote.

The bill made in order by this rule, however, remains highly controversial. The administration strongly opposes the bill, unless it is amended to bring the funding levels in line with the President's request.

The distinguished chairman of the Committee on Government Operations, the gentleman from Texas (Mr. BROOKS) is also opposed to the bill. When he appeared before the Committee on Rules, he warned us that if the Members do not have the fiscal responsibility to limit this bill to the current levels—at a minimum—then we are not going to be able to cure our Federal deficit problems.

Mr. Speaker, I mention these two areas of opposition, from both the administration and the chairman of the Committee on Government Operations, so that our colleagues will be aware that amendments will be offered to reduce the funding levels.

Mr. Speaker, I have no other requests for time.

I think the rule is in order. It is an open rule and I support the adoption of the rule.

Mr. Speaker, I yield back the balance of my time.

Mr. HALL of Ohio. Mr. Speaker, I have no requests for time, and I move the previous question on this resolution.

The previous question was ordered.

The resolution was agreed to.

A motion to reconsider was laid on the table.

APPOINTMENT AS MEMBER OF CONGRESSIONAL AWARD BOARD

The SPEAKER. Pursuant to section 4(a) of Public Law 96-114, as amended by Public Law 98-33, the Chair appoints as a member of the Congressional Award Board Mr. Joseph J. Gouthro, of Atlantic Highlands, N.J., in lieu of Mr. A. J. F. O'Reilly of Pittsburgh, Pa., without objection.

There was no objection.

STATE AND LOCAL FISCAL ASSISTANCE AMENDMENTS OF 1983

The SPEAKER pro tempore (Mr. KILDEE). Pursuant to House Resolution 285 and rule XXIII, the Chair declares the House in the Committee of the Whole House on the State of the Union for the consideration of the bill, H.R. 2780.

IN THE COMMITTEE OF THE WHOLE

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H.R. 2780) to extend and amend the provisons of title 31, United States Code, relating to the general revenue sharing program, with Mr. SWIFT in the chair.

The Clerk read the title of the bill.

The CHAIRMAN. Pursuant to the rule, the first reading of the bill is dispensed.

Under the rule, the gentleman from Texas (Mr. BROOKS) will be recognized for 1 hour, and the gentleman from New York (Mr. HORTON) will be recognized for 1 hour.

The Chair recognizes the gentleman from Texas (Mr. BROOKS).

□ 1620

Mr. BROOKS. Mr. Chairman, I yield myself such time as I may require.

Mr. Chairman, regardless of its merits, or lack thereof, H.R. 2780 is a relatively uncomplicated piece of legislation. The bill calls for a 5-year extension of general revenue sharing. Local governments would be funded at a level of $5.3 billion per year on an entitlement basis. This figure represents a 16-percent increase from the current level of $4.6 billion per year. It also exceeds the funding level provided for in the first budget resolution by $280 million.

The bill includes an authorization of $2.3 billion per year for State governments, subject to the appropriations process. This is the same approach that has been used for the States for the past 2 years, though in neither year has a State share been appropriated. However, H.R. 2780 eliminates the State share "turn-back" provision adopted in 1980. Under that provision, if a State share had been appropriated, Each State would have been required to forego or turn back an equal amount of Federal categorical assistance as a condition of receiving its revenue sharing allocation.

H.R. 2780 improves the revenue sharing audit provisions by requiring governments receiving over $25,000 to obtain annual audits. However, an exception is provided for governments operating on a 2-year fiscal period. These governments may submit biennial audits so long as those audits cover both years. Under current law, an audit is required at least once every 3 years, though only 1 year of the 3-year period need be covered.

Finally, the bill discontinues the special allocation for sheriffs in Louisiana parishes and makes a number of technical amendments proposed by the administration.

Mr. Chairman, those Members who have been in the House for any length of time probably are aware of my views on the revenue sharing program. I opposed it in 1972, when the Nixon administration—in an election year—brought the program into existence. I opposed its reauthorization in 1976, another election year. I opposed it in the next Presidential election year, 1980, when it was reauthorized again, and I oppose it today. Revenue shar-

ing is a program that does not do what it purports to do and has serious and dangerous unintended side effects.

To understand why I have been opposed for so many years to this program, which has all the surface appeal of motherhood or cotton candy at the circus, it would be instructive to go back to the reasons that were originally advanced for revenue sharing to see whether it has done what its supporters originally said it would do. The Members will recall that revenue sharing was going to be a means of permitting State and local governments to share the benefits of the Federal taxing system. It was speculated that, in the post-Vietnam war years, the Federal Government would be faced with the problem of what to do with all the extra revenues rolling into its coffers. Turning these bothersome surpluses over to the State and local governments through revenue sharing was concocted as a means of solving the problem.

Well, of course the post-Vietnam war surpluses never materialized. Instead of a surplus, since 1972, we have been faced with an unbroken string of deficits. The stark truth is that the Federal Government has no revenue to share and it never had any revenue to share. From the outset, the program has been financed by piling billions of dollars on top of the basic deficit, requiring greater borrowing and greater cumulative interest payments on the national debt.

As I mentioned earlier, I opposed revenue sharing in 1972, 1976, and 1980. My opposition to the program is even stronger in 1983, because the defects of the program and its harmful effects are even more apparent in the current budget and economic situation we face. In 1972, the Federal Government ran a budget deficit of a mere $23 billion. In 1976, the deficit was a paltry $66 billion. In 1980, it was only $59.6 billion. But let me remind my colleagues that the Reagan administration itself, using its rosiest predictions and its most far-out wishes, projects a budget deficit for the next fiscal year of $180 billion. That is in 1 year, ladies and gentlemen. I want to remind you of the dangerous impact that a deficit of this size is going to have on the trade markets and on the Federal Government's borrowing requirements. The reality that we face is that deficits of this size pose the threat of strangling the economy just as it is beginning to recover from 3 years of recession, plunging us into even greater unemployment, stagnation, and misery.

The local governments cite the recession as a reason that they need revenue sharing reinstated. But if we do not attack the deficit for the coming year and the following years, and if the economy is plunged back into recession, local governments will be harmed far more than they can now imagine. The way we can help them in the long run is by eliminating this deficit enhancer of a program.

Instead, we are here today considering a bill to extend the program for 5 more years at an increased funding level and as an entitlement. At the same time, we are telling our constituents that we are determined to get control of Federal spending, we are being asked to put this program beyond our reach in the budget process for 5 years and pile another $26.5 billion on the national debt. Painful as it is for many of you, what we do here today may send the loudest signal yet as to our sincerity about fiscal responsibility.

Finally, Mr. Chairman, let me say that we are told we should renew revenue sharing because it is a success. Of course, it is a success to those who receive its funds. Christmas is a success, too, and birthday parties for 5-year-olds are a success, too, and for the same reason. Everybody likes getting gifts that they did not have to work for. But this success is a dangerous and costly expenditure that does not do what it was claimed it would do and that disburses Federal funds without any real accountability for their use at a time when the Federal Government can ill afford to disburse such funds.

Mr. Chairman, I reserve the balance of my time.

The CHAIRMAN. The gentleman from Texas (Mr. BROOKS) has consumed 8 minutes.

Mr. HORTON. Mr. Chairman, I yield myself 15 minutes.

Mr. Chairman, I rise in strong support of the extension of the general revenue sharing program. I am pleased that the House is moving expeditiously to renew this important legislation prior to the August district work period. Reauthorization of the program at this time is essential if local Governments are to be able to prudently plan their own budgets with a minimum of disruption.

General revenue sharing was created in 1972 and began a new era in American intergovernmental relations. For the first time, Congress and the President created a large-scale program of general purpose fiscal assistance to both State and local governments. This aid was provided with very few conditions, permitting State and local elected officials the opportunity to spend assistance dollars where they felt needs were greatest.

Unlike categorical grant programs, a State or locality does not have to apply for revenue sharing funds. Instead, it receives its program money automatically based on a formula founded on a number of important data elements, including population, personal income, and tax effort. Under the original legislation, State governments received one-third and local governments two-thirds of all available funds. An important element of the program's funding was its entitlements status. This removed revenue sharing from the annual discretionary appropriations process and thereby encouraged better State and local long-term budgeting.

The program was renewed in 1976, with the States receiving $2.3 billion per year and local governments $4.6 billion a year. I should add at this point that the local share of the program has remained at this level of $4.6 billion since that time.

The program was again extended in 1980 for 3 years, with the local share and allocation formula remaining unchanged. Yet, significant allocations were made in the State government portion of the program. The State share was totally revoked for 1981, and made subject to discretionary annual appropriation in 1982 and 1983. States would also be required to forgo $1 of Federal categorical aid for each dollar of revenue sharing they received. Since that time, no appropriation has been either requested or approved for the State share.

Today, we are considering legislation that would continue the program, which is set to expire on September 30 of this year. By renewing this program, this House will reaffirm its faith not just in revenue sharing, but also in the American system of cooperative federalism. By renewing this program, we will also provide aid to local governments at a time when many of them are financially pressed by varied and difficult economic circumstances. This aid will, to the benefit of the Federal taxpayer, be fairly distributed in an extremely efficient manner, with less than one-tenth of 1 percent of the total program funds going to Federal administrative expenses.

As I have stated earlier, revenue sharing requires no lengthy application for receipt of aid. It does not force a locality to add huge numbers of people to campaign for Federal money. It also does not need huge numbers of Federal bureaucrats to operate it. What other multibillion-dollar Federal program can be run by less than 140 Federal employees and a computer?

As the former Chairman of the Federal Paperwork Commission, I am particularly sensitive to the administrative costs and the paperwork burdens implicit in Federal programs. Revenue sharing is a model program in that regard and is one of the most streamlined of all Federal programs. This fact has been borne out time and time again by various government reports and hearings held by the Intergovernmental Relations and Human Resources Subcommittee of the Government Operations Committee.

The bill we have before us today, H.R. 2780, is a product of a great deal of work by the Intergovernmental Relations and Human Resources Subcommittee under the leadership of its chairman, Mr. WEISS, and its ranking minority member, Mr. WALKER. This bill extends the program, something I strongly support. Yet there are two major changes I would like to see made in the bill.

First, the bill extends the program for a 5-year period. This would be longer than any period for which Congress has reauthorized the program. Such a long extension is, I believe, unwise. It effectively prevents the Congress from making any changes in the program for that entire 5-year period. We live in a fast-changing world. None of us knows now what the fiscal situation of State and local governments might be even 2 or 3 years from now. An extension for a lesser period of time would have the significant advantage of allowing the Congress the opportunity to review the program to make sure it is effectively achieving its goals. The administration has recommended the traditional 3-year reauthorization period. It is my intention at the appropriate time to offer an amendment to reduce H.R. 2780's reauthorization from 5 years to 3 years.

My second item of concern is that the bill before us is over the amount contained in the House budget resolution, as well as that requested by the administration. Presently, this bill increases the funding for the local government entitlement share by $731 million for each of the 5 years of its reauthorization for a total increase of $3.65 billion. This $731 million annual increase not only exceeds the level of funding requested by the administration, but more importantly, it is well over the $450 million increase permitted under the first concurrent resolution on the budget. This is because the committee reported the bill prior to the adoption of the first budget resolution in order to comply with the Budget Act deadline. At that time, the House-passed resolution allowed a $731 million increase. It is my intention to offer an amendment to bring H.R. 2780 into conformity with the budget resolution.

Reducing the length of the authorization from 5 to 3 years, as I suggested earlier, and bringing the funding level in line with the budget resolution as I suggest now, is the best way to balance the demands of the President that we control spending and the needs of local officials that we provide some increase in aid to their governments. The result of my amendment is that the increase in the funding of the program is reduced from $3.65 billion over 5 years to $1.36 billion over 3 years. A funding increase of this size is much more appropriate in light of the deficits we expect in the coming years and also appropriate in light of the fact that the program has not seen an increase since 1976.

In summary, the two amendments I intend to offer will make this a fiscally responsible bill and at the same time provide some important financial relief to local officials across the country. My amendments are important, for make no mistake about it, too much money is in this bill, and we are courting a possible Presidential veto.

The administration has said, in the strongest possible terms, that it prefers an extension at the present annual funding level of $4.6 billion. The warnings of administration officials on this point have recently intensified. I would like to enter into the record a letter I received from the Director of the Office of Management and Budget, David Stockman, on June 20 on this matter and quote the relevant sentence:

Unless H.R. 2780 is amended to conform to a funding level of $4.6 billion per year for 3 years, the President's other senior advisers and I will not be able to recommend approval of the bill, should it be presented for the President's action.

This letter, combined with telephone conversations I have had with administration officials, clearly indicates that if the President is presented with a bill that increases revenue sharing too greatly, a veto is a definite possibility.

Mr. Chairman, the letter which I received from Mr. Stockman is as follows:

OFFICE OF MANAGEMENT AND BUDGET,
Washington, D.C., June 20, 1983.

Hon. FRANK HORTON,
House of Representatives
Washington, D.C.

DEAR FRANK: I am writing to apprise you of the Administration's serious objection to certain features of H.R. 2780, legislation that would reauthorize the General Revenue Sharing program.

As you know, H.R. 2780 would extend General Revenue Sharing for five years and would increase the entitlement portion of the program for the current level of $4.6 billion annually to $5.3 billion for each of these five years. The Administration's proposal, by contrast, would extend the program for three years at its current funding level. We believe that our recommended proposal is fair, prudent, and fiscally responsible.

H.R. 2780 in its current form is a budget buster. This bill would in a single year increase spending for General Revenue Sharing by sixteen percent. If enacted, it would result in fiscal year 1984-86 outlays that would exceed the Administration's request by over $2.1 billion. Increases of this magnitude are totally inappropriate, especially in light of the serious financial problems facing the Federal Government.

The Administration also cannot support the five-year reauthorization of the program contained in H.R. 2780. This would financially commit the Federal Government for much too long a period of time. A three-year extension would permit the Congress and the Administration to review the funding level, allocation formula, and the program operation on a much more timely basis.

To be sure that there is no misunderstanding, one point should be clarified. The Administration does not oppose the extension of revenue sharing. On the contrary, the President is personally on the record as favoring the program's reauthorization. What the Administration does oppose is the unnecessarily long extension and the fiscally irresponsible funding increase contained in H.R. 2780.

Unless H.R. 2780 is amended to conform to a funding level of $4.6 billion per year for three years, the President's other senior advisers and I will not be able to recommend approval of the bill, should it be presented for the President's action.

I have taken the liberty of sending an identical letter to the Chairman of the Committee on Government Operations.

Sincerely,

DAVID A. STOCKMAN,
Director.

Mr. Chairman, I must warn this House about another issue related to revenue sharing. As we take up this bill, amendments will be presented for your consideration that would alter the present formula for allocating revenue sharing funds. To do so would be a serious mistake. The present formula is strongly supported by a most important constituency, the program's recipients. Local elected officials have time and time again pleaded with the Government Operations Committee not to change the formula. I would like to place into the RECORD letters from the most important groups of local elected officials, including the National League of Cities and the National Association of Counties, which call for no formula changes. To quote from the letter from the league and NACo, the presidents of these two organizations state:

Most formula change proposals, even those with "hold harmless" provisions, would effectively disadvantage certain types of jurisdictions relative to other types in terms of the overall percentage increase received. We believe that the immediate and long-term impacts of such non-proportional distribution of an increase in funding should be studied in depth before implementing formula changes.

The letter goes on to say:

The National Association of Counties and the National League of Cities oppose changes to the current general revenue sharing formula on grounds of the general need of local governments for an increase in general revenue sharing funding and the danger of implementing formula changes without careful study and analysis of impacts.

Mr. Chairman, the full text of the letter to which I just referred is as follows:

JULY 26, 1983.

Hon. FRANK HORTON,
Ranking Minority Member, House Committee on Government Operations, Rayburn House Office Building, Washington, D.C.

DEAR CONGRESSMAN HORTON: As House floor action on H.R. 2780, the bill to reau-

thorize the general revenue sharing program, approaches, the National Association of Counties and the National League of Cities wish to make you aware of our position with regard to amendments pertaining to formula changes that may be offered on the floor. We support retention of the current revenue sharing formula as provided in H.R. 2780, and adamantly oppose any alterations. We take this position for several reasons:

First, we believe that if there is an increase in the level of funding for the program, as proposed in H.R. 2780, all local governments should share proportionately in that increase. Virtually all local governments are experiencing some degree of fiscal stress as a result of the recession and cutbacks in federal aid. They rely heavily on general revenue sharing to assist them in dealing with revenue shortfalls. Funding for the program has not been increased since 1976. During that period, NACo and NLC estimate that fifty percent of the buying power of revenue sharing dollars has been eroded by inflation. All local governments need some increase in their revenue sharing allocations to at least partially offset the effects of inflation and aid them in resolving their fiscal problems.

Second, most formula change proposals, even those with "hold harmless" provisions, would effectively disadvantage certain types of jurisdictions relative to other types in terms of the overall percentage increase received. We believe that the immediate and long-term impacts of such non-proportional distribution of an increase in funding should be studied in depth before implementing formula changes.

Finally, no formula is perfect and any type of formula change is bound to result in some anomalous allocations. Under the formula changes contained in S. 1426, for example, some of the neediest jurisdictions in certain states would receive no additional revenue sharing funds, even if the funding level for the program were increased by $450 million. Such anomalous distributions also indicate the need for extensive study and deliberation prior to the implementation of formula changes.

To summarize, the National Association of Counties and the National League of Cities oppose changes to the current general revenue sharing formula on grounds of the general need of local govenments for an increase in general revenue sharing funding and the danger of implementing formula changes without careful study and analysis of impacts. We support the efforts of Rep. Ted Weiss to institute such studies and await his findings with interset.

In the meantime, however, our organizations urge all House members to support H.R. 2780 in its retention of the current formula for general revenue sharing allocations and to oppose any amendments to alter the formula that may be offered on the House floor.

Sincerely yours,

CHARLES ROYER,
President, National League of Cities.
SANDRA R. SMOLEY,
President, National Association of Counties.

Mr. Chairman, altering the formula could, quite simply, endanger the fragile coalition that supports the program and spell its demise.

In conclusion, I must reiterate my very strong support for the continuance of revenue sharing. It is a "cornerstone" of our Federal domestic aid system and helps assure the financial viability of our federal system of government. H.R. 2780, if amended along the lines I have suggested, is an effective vehicle for extension of this important program.

□ 1640

Mr. BROOKS. Mr. Chairman, I yield 7½ minutes to the gentleman from New York (Mr. WEISS).

Mr. WEISS. Mr. Chairman, I rise in support of H.R. 2780, the State and Local Fiscal Assistance Amendments of 1983. This bill, which was overwhelmingly approved—37 to 2—by the Government Operations Committee, amends and extends the present general revenue-sharing legislation that will expire on September 30 at the end of this fiscal year.

To summarize briefly, the committee bill makes the following changes in the existing program:

First. General revenue sharing for local governments is reauthorized as an entitlement program for 5 additional years. This increase over the current 3-year authorization was approved in order to enable local units of government to plan for the most efficient utilization of these funds. In the committee bill, the annual funding level is increased 16 percent—from $4.57 billion to approximately $5.3 billion—to adjust for the loss in purchasing power of revenue-sharing dollars only since the last reauthorization of the program in 1980.

It is important to bear in mind that, aside from a one-time increase of $200 million voted in 1976, this program has not been adjusted for inflation since its inception in 1972. During this 11-year period, the purchasing power of the dollar has been reduced by 135 percent. In this context, a 16-percent increase in local payments is a very modest and long overdue adjustment. It is especially needed and justified today because of the sizable reductions that have been made in Federal categorical grants at the very time that State and local governments have experienced severe revenue losses due to recession. This additional funding was provided for in the first budget resolution initially passed by the House, but the budget conference report assumes an increase in general revenue sharing of $450 million per year, to approximately $5.01 billion per year. Although we would like to see a more generous increase in the program, the budget compromise is a realistic level, and I intend to support an amendment to this lower level to conform with the first budget resolution.

Second, revenue sharing for State governments is continued as an authorization, subject to annual appropriations, at the present level of $2.3 billion. Also, the bill eliminates the so-called Levitas amendment, which would negate the very purpose of revenue sharing by requiring the States to forfeit an equal amount of other Federal assistance.

Third, the requirement for an independent financial audit of governments receiving $25,000 or more each year is changed from once in 3 years to an annual audit, which is the prevailing practice today. However, any government operating on a biennial fiscal period would be permitted to audit its financial statements once in 2 years covering both years. An annual audit requirement was recommended by the Comptroller General, and it was generally supported by the witnesses who appeared before the subcommittee.

Fourth. The special provision for allocations to Louisiana sheriffs is discontinued because this parish office is not a general purpose unit of government and other limited purpose governments are not eligible for revenue-sharing payments.

The bill also incorporates a number of technical amendments requested by the Treasury Department or by the Legislative Counsel's Office for the purpose of clarifying and perfecting certain language in the existing law. In addition, the committee approved a provision, affecting only local governments within Massachusetts, to permit the crediting of certain taxes for fiscal year 1982 that were not collected until 1983 due to a court ordered change in the method of valuating property.

Mr. Chairman, I believe the committee bill is a sound and realistic measure, given the present budget limitations confronting the Congress. Except for the committee amendments, which are primarily technical in nature, H.R. 2780 is essentially the clean bill approved as a compromise measure by the subcommittee that I am privileged to chair. H.R. 2780 was approved by the subcommittee after a thorough study of the general-revenue-sharing program, which included 3 days of public hearings in Washington and 4 days of field hearings held in various sections of the country.

H.R. 2780 was approved by the committee without any change in the method of allocating funds. However, there was interest, both in the subcommittee and the full committee, in a proposal to raise the present 145 percent upper limit on per capita allocations to local governments, and a proposal to use the representative tax system (RTS), together with or as a substitute for per capita income, in the measurement of each State's fiscal capacity. Also given serious consideration was a proposal to advance revenue-sharing payments to the beginning of each calendar quarter instead of after the end of the quarter. In the final analysis, these proposals were not included in the bill mainly because

they would have required additional money to prevent some jurisdictions from losing funds.

With respect to the representative tax system, the bill directs the Secretary of the Treasury, in consultation with the Secretary of Commerce, the Comptroller General, and the Advisory Commission on Intergovernmental Relations, to study and further develop the RTS for possible use in allocating revenue-sharing funds in the future.

Similarly, the current budget stringency made it impractical to resume entitlement payments to State governments, although I believe there is strong justification for doing so.

I am sure you are all aware of the radically changed financial circumstances of State governments since the last revenue-sharing reauthorization in 1980. In place of the budget surpluses many States enjoyed at that time, most States today are trying desperately to reduce expenditures, cut their work forces, and increase taxes in order to avoid budget deficits, which are legally prohibited in virtually all of the States.

It should be noted also that many States are in very poor financial condition as the result of three national recessions in the past decade. Even our most prosperous States are feeling the pinch of increasing unemployment and declining revenues. I believe it is clear that the States need and deserve continued revenue-sharing assistance, and I would urge this body to restore these payments at the earliest possible moment.

Mr. Chairman, while I would prefer to see this legislation provide more assistance to our local and State governments, I recognize that H.R. 2780 is probably the best we can do under present budget conditions. It is my hope that the Congress will act quickly to reauthorize this vital program so that local governments can plan for the most efficient and responsible use of these revenue-sharing funds.

Before yielding, I would be remiss if I failed to acknowledge several Members of the House who have been instrumental in bringing this legislation to the floor.

The chairman of the Government Operations Committee, the gentleman from Texas (Mr. BROOKS), although personally opposed to this legislation, has been continually fair and forthright in his handling of H.R. 2780, and supportive of the subcommittee activities during the reauthorization process.

The ranking minority member of the Subcommittee on Intergovernmental Relations and Human Resources, the gentleman from Pennsylvania (Mr. WALKER), is likewise to be commended for his diligent efforts and support of the subcommittee's work; as should my distinguished colleague, the gentleman from New York (Mr. SOLARZ), who did such outstanding work in the operations of the Budget Committee in the consideration of this legislation.

Mr. Chairman, I thank the gentleman, for yielding this time, and I yield back the balance of my time.

Mr. HORTON. Mr. Chairman, I yield 5 minutes to the gentleman from Pennsylvania (Mr. WALKER). I also take this occasion to commend him for his work on the subcommittee in the role of the ranking minority member. He has done an outstanding job, and we thank him for it.

Mr. WALKER. I thank the gentleman for his comments and for yielding me the time.

Mr. Chairman, I strongly support the reauthorization of the revenue-sharing program. Symbolically, and in reality, revenue sharing epitomizes the best aspects of our federal system at work.

Revenue sharing is simple and effective. Money is returned to local governments by the Federal Government with minimum requirements and almost no administrative costs. Local governments benefit from the increased resources and the flexibility to make decisions and to be more responsive to their constituents.

In the decade since its inception, more than 465 billion in Federal revenue sharing funds have been returned to State and local governments. There can be no disputing the fact that this money has helped insure the financial integrity of recipient governments and help restore decisionmaking power to the local level.

Local governments must be reponsive governments. Local officials are not somewhat isolated from their constituents like Members of Congress or State legislators. When programs or projects are demanded by constituents, local officials need the resources and flexibility to act promptly. Revenue sharing without so many of the burdens and restrictions that accompany other Federal programs, provides local officials with the steady support they need.

As local officials came before the Subcommittee on Intergovernmental Relations and Human Resources, chaired so ably by the gentleman from New York (Mr. WEISS), we continually heard how vital revenue sharing was to the fiscal integrity of our cities, counties, and townships.

□ 1650

We continually heard of police protection, fire equipment, recreational facilities, libraries, and other worthwhile projects purchased with revenue sharing funds. That is an aspect of this program that I think speaks to the concern legitimately raised by the gentleman from Texas, the distinguished chairman of the full committee.

He makes the point that we have no real revenue to share at the Federal level and that is true. But it is also true that the very kind of programs that the local governments are using revenue sharing funds to meet are programs that we would otherwise have to design categorical programs to meet. These categorical programs would be fantastically expensive for the Federal Government, they would cost far more than the revenue sharing program has cost or will cost in the future. It is that kind of concern that I bring to this discussion because I think that what we have got to have is this kind of program which allows local governments to act selectively, use Federal funds selectively and thereby save vast resources that otherwise might get spent at the Federal level.

It was those kinds of comments that we heard from local officials and they reflected the local decisions made by all levels of government which are closest to the taxpayers. I like the fact that the revenue sharing program makes a lot of that kind of thing possible. I must say, however, that I have some problems with the bill as it comes to the floor.

Certain aspects of it bother me and I will offer at least one amendment to make a change. The funding level, for example, is too high. I will vote to lower it. As a matter of fact, I think that it is extremely important that we adopt the amendment that will be offered by the gentleman from California (Mr. MCCANDLESS) that brings the funding level back down to current funding levels.

The threat of the administration to veto this bill, if it is not brought into that kind of funding level compliance, I think is a real threat, indeed. It jeopardizes this worthwhile program for the future and I hope that the gentleman from California will see his amendment adopted.

Other changes also may be needed. But the concept of revenue sharing is sound. The program should be reauthorized.

I thank the gentleman for yielding me the time and I yield back the balance of my time.

Mr. HORTON. Mr. Chairman, I yield 5 minutes to the gentleman from Florida (Mr. LEWIS).

Mr. LEWIS of Florida. Mr. Chairman, I thank the distinguished minority member from New York for allowing me this time.

Mr. Chairman, when we talk about revenue sharing we are talking about a no-string revenue sharing for each individual community, county, and State.

When you are talking about New Federalism the best form of assistance is revenue-sharing. And I rise in support of the Federal revenue-sharing

program and more specifically, H.R. 2780.

I served for four terms as mayor/councilman of the village of North Palm Beach, Fla., before the revenue-sharing program existed. Problems that the community faced then, were not unlike those it faces today.

Without the additional sources of revenue to support important municipal projects and purchase necessary capital equipment—the overall budget for the village had to be stretched as far as possible—and difficult choices had to be made due to limited funds.

Small cities with populations of less than 10,000 in particular benefit from this program. My district includes a number of these small cities.

The city managers advise me that this money allows them to purchase expensive capital equipment such as police cars, fire trucks, garbage trucks, bulldozers, and dumptrucks.

Some municipalities apply these funds to improve their water and sewer systems. Other cities will use a portion of their funds to purchase lawnmowers for the city parks and to build shuffleboards for elderly residents.

Thus revenue-sharing money is an important supplement to these local communities' budgets. Furthermore, I have always believed that there is a need to return some of the taxpayers' hard-earned money to their local communities. With no Federal strings attached, these dollars make it possible for localities to improve community life for their residents.

Mr. Chairman, I serve as cochair of the Local Government Caucus with my distinguished colleague from California, Congresswoman BOXER. We both have local government experience and can attest to the strong support local governments have voiced to us for continuing the Federal revenue-sharing program.

The caucus was formed this year to bring together those Members of Congress with experience and interest in local government issues and to promote those interests. Just as the caucus membership is bipartisan, the issue of revenue sharing cuts across party lines.

Therefore, I urge my colleagues on both sides of the aisle to vote to continue this program and to provide local governments with an important source of supplemental funding to carry out their municipal responsibilities.

I thank the chairman. I yield back the balance of my time.

● Mr. DASCHLE. Mr. Chairman, I rise in strong support of the passage of HR 2870, the reauthorization of the general revenue-sharing program. There is little doubt in my mind that, of all the programs of assistance to people in this country, the general revenue-sharing program is one which most effectively meets the criteria of what a good Federal program should be. I say that because of the particular strength of the revenue sharing program. This is one Federal program which delivers financial assistance to local governments throughout the country, and makes no pretense, as we do all too often here in Washington, that those local governments cannot be trusted to make a decision on how to best spend those funds. General revenue sharing makes the logical assumption that those closest to their own citizens can make the best determination as to how most effectively and efficiently make use of those funds, without Federal interference, guidelines, or onerous regulations.

There are several elements in the legislation today which make this reauthorization desirable. Although I would have preferred the extension of the authorization to a full 5 years instead of the 3 years which is now the case, it appears that the threat of an adminstration veto makes the 3-year extension the best possible that we can do at this time. This is regrettable, since the 5-year period would have enabled local units of government to better plan how to most effectively use these funds. It is, however, I suppose better to take the 3-year reauthorization than none at all. Frankly, I feel that this limitation is a foolish one, since there is no doubt that, whether it is in 3 years or 5 years, we certainly will reauthorize this program again. The administration's shortsightedness and false economies exhibited once again in this instance, continue to disturb me.

As amended to conform with the first budget resolution, this bill will also provide for a 9.9-percent increase in authorized funding for this program. While, frankly, I might have preferred the 16-percent increase reported out by the authorizing committee, budget concerns, as well as the threat of negative action from the President, have convinced me that this level of funding appears to be the best we can manage at this time, and I am in full support of it.

This 9.9-percent increase means that my State of South Dakota, whose local units of government were eligible for $15.9 million in general revenue sharing in 1983, will be eligible for a total of $17.5 million in 1984 and beyond. Given the depressed state of the farm economy, and the reduced tax base that this tends to cause in primarily agricultural States like South Dakota, this is an increase that is long overdue, and is certainly welcomed. The level of authorization for general revenue sharing has not been increased, with one small exception in 1976, since its inception in 1972. It has not even been adjusted for inflation, although the costs to local governments have certainly been drastically increased by this same economic scourge. The result of this lack of adjustment has been that the amount of the dollars purchasing power since 1972 has been reduced by 135 percent. The modest 9.9 percent increase in funding now by no means recaptures this inflation-lost purchasing power, but at least it is a small step in the right direction.

I know of no responsible legislator who will deny that revenue sharing is one program which, because of the direct control it affords to local governments, is one of our most efficient, effective programs designed to give assistance to the local governments which are closest to the people they represent. I urge my colleagues to join me in strong support of this legislation.●

● Mr. BIAGGI. Mr. Chairman, I rise in strong support of H.R. 2780 as reported by the Government Operations Committee. This legislation would give a new and vitally needed 5 year lease on life for the general revenue sharing program of such fundamental importance to local governments in this Nation.

My support of this bill is based on the fact that it seeks to remedy the effects which inflation has had on the revenue-sharing program since it received its last funding increase in 1980. While some would view with concern a 16-percent increase in funding, one should view it in the context of the timeframe since 1980.

What is the importance of general revenue sharing in this Nation. According to the National League of Cities—revenue sharing represents the only direct Federal assistance program in one-third of all cities. For cities with populations under 10,000, it is the only direct assistance for 62 percent. It is little wonder that the League writes, "Prompt reauthorization of revenue sharing is clearly the No. 1 priority of American cities this year."

When one looks at the particulars of this bill—the length of the reauthorization as well as the funding levels stand out as the most prominent issues for us to determine. With respect to the 5-year reauthorization, let us evaluate it from the context of the units of local government who receive these funds. For them it makes infinitely more sense to be able to plan for a 5-year time period than for a 3-year period. Most local governments have fiscal years commencing prior to October 1 so that budget and planning is disrupted each year reauthorization occurs after a city's fiscal year has already begun. A 5-year reauthorization would certainly relieve that problem.

A reauthorization of revenue sharing is especially vital in these times when States and localities are in the midst of their most severe fiscal crisis since the Great Depression. It is being felt in every conceivable way—from in-

creased hunger among people—to crumbling bridges and highways. These are growing problems which are being met with reduced resources especially at the Federal end. The American Federation of State-County and Municipal Employees estimates "The Reagan administration's spending reductions have come disproportionately out of State and local government aid—which will be down $24 billion in 1984 as a result of the cumulation of Federal cuts."

All in all the case for H.R. 2780 seems both clear and compelling. Revenue sharing is a program which has worked and continues to work and should be rewarded by getting reauthorized. Revenue sharing represents the very best in our governmental system—Federal aid directly to local governments for their use to meet their most critical needs. It is a program which has been largely free from scandal and waste and has much good to show for itself. It deserves support. I know my home city of New York has been greatly aided by general revenue sharing and any reduction in funds would cause great strain on a city which is clearly on the fiscal rebound.

We must not allow ourselves to become victims of misguided economics. If we cut revenue sharing today or reduce its life span, we are only hurting ourselves somewhere else. These funds serve as seed moneys for certain projects—they help to secure private sector funding. Conversely, if the resources are reduced, the strains and competition for other dollars becomes that much more intense and it is people who suffer. Cities, towns, and villages will have to start choosing between which vital services they can fund—will it be fire instead of energy assistance and the like.

I for one believe that revenue sharing over the years has insulated itself from the political process and has produced results across this Nation. It is not the right time to inject either politics or misguided economics into the program. Therefore, a vote for H.R. 2780 as reported is the only way to proceed for the good of the Nation.●

● Mr. BOUCHER. Mr. Chairman, I rise in support of H.R. 2780, the reauthorization of the general revenue-sharing program.

H.R. 2780 authorizes annual general revenue-sharing payments to local governments of $5.3 billion through fiscal year 1988, an increase of 16 percent over the program's last reauthorization in 1980. This increase is appropriate in view of the rate of inflation since 1980 and the hardships incurred by localities arising from the current recession.

In my district of southwest Virginia, funds obtained through the general revenue-sharing program have been applied toward the construction of schools, parks, sewage systems, and a whole host of other projects which have advanced economic development. The administrators of local governments in southwest Virginia believe that without general revenue sharing, they would have to compete with larger, wealthier units of government for limited Federal resources. The complex application requirements of the categorical grant programs force local governments to employ personnel who are highly specialized and technically proficient in limited policy areas. Revenue sharing addresses this problem by disbursing Federal funds in an equitable manner to all local governments, regardless of their size, grant seeking expertise, or economic resources.

I congratulate my colleagues on the Government Operations Committee for resisting administration attempts to limit the size of this reauthorization, and I hope that the House will defeat any weakening amendments to H.R. 2780. Annual payments to local governments through the general revenue-sharing program have not been increased since fiscal year 1978, and in view of the devastating effect which the recession has had upon local governments, I believe that the funding increase contained in this legislation is warranted.●

● Mr. UDALL. Mr. Chairman, I rise today in support of H.R. 2780, the reauthorization of the general revenue-sharing program. Revenue sharing is one aspect of federalism that has clearly worked. It is a flexible and efficient program. For one-third of all cities it is the only direct form of Federal assistance.

I support an increase in the funding of the general revenue sharing program. There has been no change in the funding level since 1976. Nearly half of the program has been lost to inflation since that last increase. An increase is clearly needed. All across the country, costs are increasing faster than revenues, forcing many communities to increase taxes, lay off workers, and cut vital services. Recent cutbacks in other Federal aid programs, combined with the effects of recession and high interest rates, have increased the need for this legislation.

Revenue-sharing moneys are providing critically needed support for such things as emergency shelter, food banks, and police and fire protection. Revenue sharing affords communities the flexibility they need in dealing with such problems.

Finally, let me say that I hope we move swiftly in approving this reauthorization. Time, in a matter such as this, is of the essence. The program's authority expires on September 30 of this year; let us act well in advance of that deadline.●

● Mr. ALBOSTA. Mr. Chairman, I rise in strong support of H.R. 2780, the State and local fiscal assistance amendments of 1983. This legislation reauthorizes the Federal revenue sharing program for 5 years and increases the amount of funds to $5.3 billion per year. This represents a 16-percent increase from the current appropriations level and will compensate for the effects of inflation since the program was last authorized in 1980. The bill will continue the current allocation formula and all units of general local government will continue to be eligible for revenue sharing payments.

As a former county commissioner, I have always supported the revenue sharing program. I strongly believe revenue sharing is effective because the program allows the local units of government to decide which programs and projects to fund in their community. Instead of bureaucrats sometimes located thousands of miles away deciding what a community needs, local officials make these decisions under the revenue-sharing program. As a result, funds are spent on a more cost-effective basis.

Too often people alienated from their Government because decisions are made without local input. The revenue sharing program has been unique in returning decisionmaking to the local level. As a former local official, I feel we must continue this program and make sure it is adequately funded. Numerous projects in my district have been funded with revenue-sharing moneys including parks, firehouses, community centers, roads, bridges, and police protection. I urge my colleagues to support H.R. 2780 so that this legislation can move forward quickly and the Federal revenue-sharing program can continue to benefit this country.●

● Mr. PATMAN. Mr. Chairman, I rise in strong support of H.R. 2780.

Over the past 11 years, revenue sharing has put tax dollars back into cities and counties in Texas. Officials of cities and counties throughout my district have emphasized to me the great help that this program has been to their communities. It has been a reliable and consistent source of funds to financially distressed areas, with no strings attached. These local units of government have been able to set their own priorities and fund the programs of greatest need to the people whose needs they are in the best position to know. These funds have paved streets in some communities; in others, they have helped to pay police or firefighters. In short, the program has provided flexibility in a broad range of community improvements.

Now, more than ever, this program is needed and it deserves our support. Cuts in other Federal grant programs have forced many communities to raise local taxes, to lay off workers, and to reduce important public services. Costs are going up faster than the revenues can be raised to pay

them. To deny these communities an increase in their Federal revenue shares under these circumstances would be dangerously shortsighted and counterproductive. I urge my colleagues to reauthorize this valuable assistance program, to increase its payment levels as proposed, and to do so promptly enough that there will be no danger of a lapse when September 30 arrives.●

● Mr. ROEMER. Mr. Chairman, I support revenue sharing. Unfortunately, this bill exceeds the freeze budget that is so essential if we are to limit Federal spending, reduce the deficit, lower interest rates, and put people back to work again.

Revenue sharing has been of great benefit to local governments in Louisiana and is a relative efficient use of tax dollars. We should continue the progream at current levels—no cuts, no increases.

Because of the increased funding in this bill I will vote no. That vote should not be construed as opposition to the concept of our level funding for revenue sharing.●

● Mr. WEISS. Mr. Chairman, I include the following information pertinent to this debate for the benefit of my colleagues.

U.S. CONFERENCE OF MAYORS,
Washington, D.C., July 18, 1983.

DEAR MEMBER OF CONGRESS: The House will soon consider H.R. 2780, legislation reauthorizing the general revenue sharing program for five years. The U.S. Conference of Mayors strongly urges you to support the bill as reported by the Government Operations Committee, and to oppose any weakening floor amendments.

The revenue sharing program is of vital importance to cities around the country, the vast majority of which have been forced to raise taxes, cut services, lay off employees, and defer important infrastructure investments. Cities have suffered through two years of crippling cuts in federal and state aid, extremely high urban unemployment, a declining property tax base in many areas, high interest rates, and unprecedented problems in the municipal bond market. The revenue sharing program is one of the few sources of federal assistance remaining to many of these jurisdictions. Without it, there would be massive property tax increases at the local level.

Moreover, timing is important. It is urgent that the Congress take quick action on revenue sharing, so as to allow local governments to plan their fiscal 1984 budgets. Many local governments cannot include revenue sharing funds in their budgets until the program is enacted, a fact which has unduly complicated their budget formulation so far.

H.R. 2780, reported overwhelmingly by the Government Operations Committee, would reauthorize the revenue sharing program for five years, with a one-time increase of 16 percent or $732 million. The Conference of Mayors supports this increase as reasonable and just. The revenue sharing program has not been increased since 1976, and has declined over 50 percent in purchasing power since that time. Thus, the 15 percent increase does not fully adjust for the inflation of the last eight years, but, it does show that Congress accepts revenue sharing for the valuable program that it is.

The Conference of Mayors hopes you will vote to support H.R. 2780, and will oppose any amendments to cut the level of funding or weaken the bill. The five-year extension and modest increase in funding proposed by the bill are vitally important for cities and other local governments across the country.

Sincerely,

RICHARD H. FULTON,
Mayor of Nashville, President.

NATIONAL ASSOCIATION OF COUNTIES
Washington, D.C., July 27, 1983.

DEAR REPRESENTATIVE: House floor action on H.R. 2780, the general revenue sharing reauthorization bill, is fast approaching. Reauthorization of the general revenue sharing program is the top legislative priority of the National Association of Counties. NACo wholeheartedly supports H.R. 2780 and urges you to vote in favor of it.

We believe that it is a good bill for local governments nationwide because:

It provides for a five-year reauthorization period for general revenue sharing;

It increases funding for the program by $733 million;

It makes no changes to the current allocation formula; and

It provides for state participation in the program on an authorized basis, subject to annual appropriations.

The bill's five-year reauthorization period will permit local governments to plan their budgets with greater confidence. The funding increase will partially compensate for the erosion of the buying power of revenue sharing dollars due to inflation that has occurred since the funding level for the program was last increased in 1976. Retention of the current formula will ensure that revenue sharing funds will continue to be distributed to local jurisdictions on an equitable basis. Inclusion of the states in the program will provide a potential for assisting the later in solving pressing fiscal problems.

We urge you to support this bill vigorously. Please vote against any amendments to reduce the reauthorization period, eliminate the increase, change the allocation formula, or exclude the states from the program.

We thank you for your consideration of our views.

Sincerely yours,

SANDRA R. SMOLEY,
President.

NACO RESOLUTION ON REAUTHORIZATION OF GENERAL REVENUE SHARING

Whereas, General Revenue Sharing is a vital program for county governments because it distributes funds to be spent on local priorities, according to the discretion of county officials; and

Whereas, General Revenue Sharing is among the most efficient of federal grant programs, with administrative costs of approximately one percent; and

Whereas, the current general revenue sharing program is scheduled to expire on September 30, 1983; and

Whereas, the National Association of Counties has designated renewal of revenue sharing as its first legislative priority in 1983; and

Whereas, Section 11.1.1 of the American County Platform states those principles according to which the general revenue sharing program should be structured;

Therefore, be it resolved, that the National Association of Counties support legislation for the renewal of revenue sharing that reflects these Platform principles and two additonal principles, namely that (1) general revenue sharing allocations be increased to reflect needed increases in local program costs due to inflation, and (2) the state share of general revenue sharing be restored to the program without a reduction in the local share; and

Be it further resolved, that the National Association of Counties urge that general revenue sharing be dealt with on its own program merits in an expeditious manner and not be delayed by the consideration of other proposals.

RESOLUTION ON LEGISLATION TO ACCELERATE GENERAL REVENUE SHARING PAYMENTS

Whereas, General Revenue Sharing is a vital program for county governments because it distributes funds to be spent on local priorities, according to the discretion of county officials; and

Whereas, many county governments are providing services under severe fiscal constraints because of the recession and cutbacks in intergovernmental aid; and

Whereas, all county governments allocate revenue sharing dollars to programs and services which can abate the impact of the recession; and

Whereas, county governments currently receive general revenue sharing payments five days after the end of quarter for which the funds have been allocated; and

Whereas, receipt of revenue sharing funds earlier in the quarter would facilitate more rapid deployment of these funds to assist the needy and for other urgent purposes; and

Whereas, legislation has been introduced in both the Senate and the House to accelerate revenue sharing payments to the fifth day after the beginning of a quarter;

Therefore, be it resolved, that the National Association of Counties support the immediate passage of such legislation, but only if such acceleration of payment will not be used as a reason for Congress to fail to approve an inflationary adjustment in general revenue sharing in the future.

AMERICAN FEDERATION OF STATE, COUNTY AND MUNICIPAL EMPLOYEES,
Washington, D.C., July 27, 1983.

DEAR REPRESENTATIVE: On behalf of the more than one million public employees who are represented by the American Federation of State, County and Municipal Employees, I urge you to support H.R. 2780, the bill which reauthorizes general revenue sharing and increases the funding level for the local share of the program.

Local revenue sharing has not been increased since 1976, even though the cost of living has risen by over sixty percent since then. To partially compensate for the erosion of the value of revenue sharing and to address the most severe fiscal crisis confronted by cities, counties and townships, the Government Operations Committee, consistent with the House Budget Resolution, included an increase of $732 million in the bill it reported in May. Since then, the House and Senate have agreed on a Budget Resolution which includes a $450 million increase in local revenue sharing. It is my understanding that an amendment will be offered to bring H.R. 2780 in line with the Budget Resolution. We support that amendment and vigorously oppose any other amendments to further reduce the increase in the program.

AFSCME has supported revenue sharing since its inception and we have made its reauthorization and an increase in the local share of our major priorities for the 98th Congress.

We have supported revenue sharing because we believe it is critical to the effective functioning of our Federal system. Under our form of Federalism the responsibility for providing the most crucial and vital services, ranging from water supply, to sewers, to sanitation, to police and fire protection, to education, has been rightfully assigned to state and local governments so that individual communities can best decide for themselves how to administer these functions.

However, under our structure of government, it is the Federal government with its broad and relatively progressive tax system that is best able to finance a decent level of public service. Revenue sharing is needed because it is the program which most efficiently facilitates the use of the Federal govenment's tax base to fund the critical services performed by state and local governments.

Without revenue sharing, many communities would not have the capacity to provide essential services, while others would have to fund these services through increased regressive taxes on user fees.

The modest increase in revenue sharing is especially needed now. As the fact sheet I am enclosing with this letter documents, state and local governments are experiencing the worst fiscal crisis since the Great Depression. The deep and prolonged recession has greatly diminished their revenue raising capacity, while the Administration budget cuts have reduced Federal grant-in-aid programs by forty percent in real terms. The result has been massive cuts in services, tax increases and continuing budget crisis.

While some expect the recovery will help solve this crisis, the fact is that the economic upturn has yet to be felt in the state and local sector. Furthermore, Data Resources Inc., the most respected economic forecasting firm, predicts that without additional Federal aid the local government sector will grow far less than the private economy and, as a result, will remain anemic. It is, therefore, likely that the recovery will be retarded, or aborted, by a crumbling and decaying infrastructure of state and municipal services on which business must inevitably rely. An increase in revenue sharing would help avoid such a crisis and promote a sustained and balanced recovery.

I believe the case for a $450 million increase in revenue sharing is overwhelming given the history of this valuable program and given the economic need. I, therefore, urge you to support H.R. 2780, with the one amendment to bring it in conformance with the Budget Resolution, and to oppose all other amendments.

Sincerely,

GERALD W. MCENTEE,
International President.

AMERICAN FEDERATION OF STATE, COUNTY AND MUNICIPAL EMPLOYEES,
Washington, D.C., July 22, 1983.

THE NEED FOR GENERAL REVENUE SHARING

SUMMARY

After having been among the hardest hit victims of the recent recession, state and local governments are now projected to lag behind other sectors of the economy in recovery. To promote economic growth and relieve the great fiscal pressure now weighing on America's cities and counties, Congress should reauthorize General Revenue Sharing at the $5.05 billion level agreed on in the Budget Resolution. That level represents a $450 million, or less than ten percent, increase in the program which has not been increased since 1976.

State and local government fiscal crisis

States and localities are in the midst of their most severe fiscal crisis since the Great Depression. A recession-induced fall in tax collections combined with steep reductions in federal aid has forced most states, counties and municipalities to implement major service cutbacks and tax increases.

Evidence of the fiscal crisis and its effects is widespread:

1. Human services:

A recent Conference of Mayors survey showed that Health, Employment and Senior Citizen Services are the human services most widely cutback because of reductions in federal aid. From fiscal year 1981 to fiscal year 1983 city expenditures for these programs fell by 52 percent, 68 percent and 12 percent respectively.

The Conference of Mayors also reports that its membership could only meet 43 percent of the demand for emergency services in fiscal year 1982.

2. Infrastructure:

Cities and counties have had to sharply reduce spending for construction and maintenance of infrastructure. This has accelerated an already serious deterioration of roads, schools, water systems and other public facilities. Each passing day of continued underinvestment increases the risk of another disaster like the recent collapse of I-95 in Connecticut.

Construction spending by state and local governments fell 9.4 percent in 1981 and 7.0 percent in 1982. A further decline is projected for this year.

A study by the Joint Economic Committee found that cities realized only 60 percent of the spending they had budgeted for capital purposes in 1981.

The needs for infrastructure investment are tremendous. Just to maintain their water systems, cities will have to spend up to $100 billion over the next two decades.

3. Employment:

At a time when demands for services are at record levels, states and localities are being forced to cut their workforces. Over 400,000 state and local government jobs have been lost in three years, according to the Bureau of Labor Statistics.

Previous economic downturns were usually moderated by increased state and local spending and employment. This time, however, the state and local public sector was hit even harder than the private sector. In large part, this accounts for why the current recession is so severe.

In 1982 state and local employment fell by 1.5 percent, while national employment was down by only 0.9 percent.

4. Losses of Federal and State aid:

The Reagan Administration's spending reductions have come disproportionately out of state and local government aid—which will be down $24 billion in 1984 as a result of the cumulation of federal cuts.

State aid to local governments is also being cutback as states attempt to balance their budgets. Eighty-eight percent of the cities contacted in a JEC survey expected decreases in state aid.

5. Tax increases:

A recent National League of Cities survey showed that 71 percent of the cities covered raised user fees. Thirty-two percent property tax rates (and many more would have but for tax limitation laws like Proposition 13).

Most state governments are also finding it necessary to sharply boost taxes while reducing services.

The Outlook for State and local governments

As evidenced by sharp employment and service cutbacks and record tax increases, state ald local governments are trying hard to cope with their financial problems. Unfortuately they just do not have the resources necessary to meet the increased responsibilities that they face in these times of high unemployment. Moreover, the economic recovery will not by itself provide the needed fiscal relief. In fact, state and local governments will be lagging even further behind the national economy in recovery than they did in recession.

Data Resources, Incorporated forecast that state and local employment will continue to decline this year and will show only very small gains from current depressed levels in 1984 and 1985:

[In percent]

	1982	1983	1984	1985	1981–85
Total U.S. employment	−0.9	+0.8	+3.3	+2.7	+6.0
State and local government employment	−1.5	−0.4	+0.6	+1.1	−0.2

Ten percent increase in both prudent and needed

Inflation has ended the benefits of GRS. Local revenue sharing has not been increased since FY 1977, even though the cost of living has increased by over sixty percent since then. In addition, H.R. 2780, which was reported by the Government Operations Committee, reauthorizes the program for five years, while S. 1426, which was reported by the Senate Finance Committee, extends the program for three years. In either case, the rise in the cost of living will surely increase by more than ten percent, causing a further decline in the real value of the program, despite the ten percent increase.

CONCLUSION

State and local budgets will continue to be under great strain over the next several years. Consequently, reauthorization of General Revenue Sharing, with the 10 percent increase in funding recommended by the House-Senate Conference Committee, is essential to prevent further cutbacks in state and local human services and infrastructure investment. In addition, the stimulus which GRS provides to state and local economies throughout the country will help ensure that the national recovery is balanced and sustained.

NATIONAL LEAGUE OF CITIES,
Washington, D.C., July 29, 1983.

DEAR REPRESENTATIVE: We are writing on behalf of the 15,000 nation's cities our organization represents to urge your support for the re-enactment of General Revenue Sharing as provided in H.R. 2780, the State and Local Fiscal Assistance Amendments of 1983.

Our organization strongly supports passage of the bill as reported, and we urge you to oppose any amendments.

Prompt reauthorization of revenue sharing is clearly the number one priority of

American cities this year. It is the most comprehensive of all federal aid programs to cities. Not only is it the most flexible and efficient of all federal aid programs, but for a third of all cities, it is their only direct federal assistance. For cities of under 10,000, it is the only direct assistance for 62 percent.

We urge you to support the modest increase in the bill—the first since 1976. Since that time, we estimate that at least half the value of the program has been lost to inflation. Our survey of fiscal conditions indicates that costs are increasing faster than revenues, forcing almost all cities to increase fees, lay off employees, and cut services. With the impact of the recession, high interest rates, and reductions in federal aid to cities since 1981 in programs such as community development block grants and wasterwater treatment grants, revenue sharing has become a more and more critical tool to meet life support services such as emergency shelter, food banks, fuel assistance, health, police and fire protection. Revenue sharing gives cities the opportunity to respond quickly to such problems in a manner suited to the circumstances of each situation.

The Government Operations Committee, after careful deliberation, rejected all efforts to amend the distribution formula. We urge you to support the committee's position and oppose any formula amendments. All local governments should receive an increase because of the fiscal stress they are experiencing. While the existing formula is not perfect, there is much to say for it.

The important role of the tax effort factor in relation to a community's wealth assures assistance on the basis of need and a community's efforts to help itself. Although any formula could be changed, the current GRS formual is widely considered to be fair and effective. We do not believe it ought to be changed without major and convincing reasons.

Finally, we urge you to support the 5 year reauthorization provided in the bill. Most local governments have fiscal years commencing prior to October 1, so that budget and planning is disrupted each year reauthorization occurs after a city's fiscal year has already begun. A longer reauthorization period would assist municipal officials in their budget processes by removing another uncertainty as we grapple with our efforts to raise revenue and cut services.

Thank you for your consideration of our views. We are grateful for the expeditious scheduling on the part of the House.

Sincerely,

CHARLES ROYER,
President, NLC, Mayor of Seattle.
WILLIAM H. HUDNUT,
Co-Chair, Revenue Sharing Task Force, Mayor of Indianapolis.
FERD L. HARRISON,
Immediate Past President, Mayor of Scotland Neck, NC.
DANIEL WHITEHURST,
Co-Chair, Revenue Sharing Task Force, Mayor of Fresno, Calif.

AMERICAN SOCIETY FOR PUBLIC ADMINISTRATION,
Washington, D.C., July 22, 1983.

Hon. TED S. WEISS,
Chairman, Subcommittee on Intergovernmental Relations and Human Resources, Washington, D.C.

DEAR CONGRESSMAN WEISS: The National Council of the American Society for Public Administration (ASPA) had adopted a resolution supporting the reauthorization of the general revenue sharing program. This resolution was adopted July 10, 1983 and a copy is enclosed for your consideration.

ASPA is a national professional organization dedicated to better government and improved public service. Organized in 1939, we are a broadly representative body of public administrators from the local, state, and federal levels of government and the academic community.

Our Society is concerned about the fiscal viability of state and local government as well as the condition of intergovernmental relations. We, therefore, request that you seek and support the reauthorization of the general revenue sharing program, essentially following the format of the program as initially established, with funding for both state and local governments. ASPA stands ready to assist you in any way it can to achieve this objective.

Sincerely,

PATRICIA S. FLORESTANO,
ASPA President.

Enclosure.

RESOLUTION

Whereas, the general revenue sharing program expires on September 30, 1983; and

Whereas, the general revenue sharing program distributes federal funds to state and local governments to be allocated according to their perceived needs; and

Whereas, state and local governments have had their revenues seriously depleted by the recent recession; and

Whereas, the American Society for Public Administration is the national professional organization dedicated to better government and excellence in the public service; and

Whereas, the American Society for Public Administration is concerned about the fiscal viability of state and local governments as well as the condition of intergovernmental fiscal relations;

Now therefore be it resolved, That, the American Society for Public Administration supports the reauthorization of the general revenue sharing program, essentially following the format of the program as initially established, with funding for both state and local governments.

CENTRAL NEW YORK REGIONAL PLANNING AND DEVELOPMENT BOARD,
Syracuse, N.Y., April 12, 1983.

Hon. TED WEISS,
Chairman, Subcommittee on Intergovernmental Relations and Human Resources, House Government Operations Committee, Washington, D.C.

DEAR CONGRESSMAN WEISS: On behalf of the Central New York Regional Planning and Development Board, representing the 130 communities of the Central Region in Upstate New York, I enclose for your attention the attached correspondence which was sent to each of our Congressional representatives, expressing our full support for the continuation of the General Revenue Sharing Program.

In your position as Chairman of the Subcommittee on Intergovernmental Relations, you have great responsibility in leading Congressional support for continuation of this program, which is vital to local communities in our Region. Given this leadership role, we ask that you work with your colleagues in the House to reauthorize the General Revenue Sharing program.

Sincerely,

NATALIE W. GUSTAFSON,
Chairwoman.

NEW YORK COMMISSION ON STATE-LOCAL RELATIONS,
Albany, New York, April 14, 1983.

Hon. TED WEISS,
U.S. House of Representatives, Washington, D.C.

DEAR CONGRESSMAN WEISS: As Chairman and Vice Chairman of New York's bi-partisan Legislative Commission on State-Local Relations, we want to strongly urge reauthorization of the federal General Revenue Sharing (GRS) Program. It is a topic of prime importance to State and local government officials in New York. The reasons are simple.

The program is conceptually correct. It is consistent with the doctrine of home rule, and recognizes the federal government's fiscal responsibilities as a partner in the intergovernmental system.

The program is fiscally important. Local governments in New York rely heavily on these monies, and even more so now with the retrenchments inherent in shifting to block grant funding.

The program can be an effective policy tool. Revenue sharing distribution formulas have attempted to target aid based on measures of fiscal need. This is but one of several laudable goals that are most easily addressed by such a general purpose program.

Several bills have been introduced in this session of Congress which would reauthorize the General Revenue Sharing (GRS) Program. They focus debate on three major issues: (1) the number of years the program should be reauthorized for, (2) the total level of funding authorized and whether the states should once again receive a share, and (3) whether any changes should be made in the way monies are allocated to the states and sub-state regions.

During the past year, our Commission has extensively analyzed New York State's Per Capita Revenue Sharing Program and we believe that our work can contribute to the debate. For example, our June 1982 survey of local government officials showed strong support for:

Providing a greater percentage of total aid in the form of "no strings attached" general purpose aid (especially revenue sharing);

Reviewing questions of equity, both interclass and intraclass, within the distribution formulas;

Adjusting the distribution formulas to reflect differing levels of poverty, aged population, services provided, and levels of tax effort; and

Providing a "permanance" to the distribution so local officials know how much they are going to receive and can budget that amount with confidence.

Based on these results, and after reviewing the major bills before the Congress and analyzing the issues they raise, we feel that inclusion of the following three components will encourage rational fiscal development in New York and should be included in any reauthorization bill eventually approved by the Congress.

1. LENGTHEN THE GRS AUTHORIZATION PERIOD

As in other states, New York's state and local governments are moving towards a more rational approach to capital budgeting, one that emphasizes planning capital expenditures five years in advance.

This becomes very important in light of the need to finance billions of dollars worth of infrastructure replacement at the State and local level. The New York State Legislature, for example, is presently considering a bill which would require the State to assemble a five-year plan for financing and scheduling capital construction projects. Consequently, the longer the authorization period of the revenue sharing program, the more local and state governments will be able to tie federal funds into their own investment plans and use those funds to leverage money from other sources.

Secondly, lengthening the authorization period will institutionalize a program which has served New York municipalities and, until 1980, the State well. Since the program grants general purpose aid, it allows governments the flexibility to spend monies where they see the most urgent need.

New York local government officials have welcomed the revenue sharing program because it has proven helpful in two major ways. The New York State Department of Audit and Control has found that federal GRS funds have alleviated, somewhat, local reliance on regressive real property and sales taxes. After the program was first initiated, local governments experienced a downward trend in their tax rates. For those municipalities that are "up against" their constitutional property tax limits, the additional revenue sharing funds forestall local cutbacks in services and other more expensive forms of financing local improvements.

This is particularly true for New York's cities. Over the last five years, New York's five largest cities (New York City, Buffalo, Rochester, Syracuse and Yonkers) have experienced problems with their tax limits. For the local fiscal years ending in 1982, all were above 90 percent of their property taxing power, except for Syracuse. New York City, in fact, was at 100 percent of its tax limit in 1982.

There is one more reason to lengthen the authorization period. New York State's own program of general purpose aid to its localities operates under a permanent authorization, as do most state categorical aid programs. A permanent or lengthier authorization period for federal revenue sharing would parallel the structure already established in New York State, and greatly facilitate the annual budget process.

2. INCREASE FISCAL RESOURCES DISTRIBUTED TO LOCAL GOVERNMENTS THROUGH GRS AND REINSTITUTE STATE PARTICIPATION IN THE PROGRAM

There are many arguments for once again allowing the states to participate in the revenue sharing program. First, the reason states were excluded in 1980 is no longer valid. At that time states were in a better fiscal condition relative to the federal government. This argued for increasing state financing of their own services and public improvements. Today, however, states find themselves in much worse financial shape than they were a few years ago. This is a result of not only a fall-off in total federal aid to the states, but also by decreases in anticipated own source revenues due to the current recession.

These forces caused New York State to experience a $579 million revenue shortfall in 1982-83, and to face a possible $1.8 billion deficit in the 1983-84 State fiscal year. Measures taken by the New York State Legislature to close this deficit included the authorization of $985 million in new State taxes, decreases in appropriations for State operations, State capital projects, certain local aid programs, and the elimination of about 3,400 state jobs.

Secondly, states are being called upon by the present administration to take a more active role in the intergovernmental system. The aggregating of over sixty categorical programs into nine block grants in 1981 placed new administrative burdens on the states. Although a streamlining of federal regulations, accompanying the passage of the block grants, has resulted in some savings to State administrators, New York officials felt that these savings were not significant enough to compensate for cuts in funding. The President's New Federalism Initiative envisions turning even more administrative and financial responsibilities over to states. If states were to again become full partners in the federal GRS program, they would be more amenable to accepting these additional responsibilities.

Thirdly, expenditures in areas of both State and local concern would increase. When New York's State government received funds under the GRS Program, approximately 30 percent of the entitlement went towards education expenditures and approximately 30 percent for health programs. Ten percent of the federal revenue sharing funds were used for the functions of highways and corrections each. Remaining funds were spent in numerous other functional areas.

Increasing GRS entitlements to local governments would compensate for losses and purchasing power New York's local governments have experienced due to inflation. The last time funding for general revenue sharing was increased was as part of the 1976 reauthorization. In 1978, the first full year that the increase took effect, New York municipalities received $515 million in revenue sharing dollars. This year, only $447 million will be distributed. Although this represents an actual decrease of $68 million, due primarily to a decrease in the state's population relative to other states, it represents a whopping "real" dollar decrease of $127 million, or 25 percent, over the 1978 level.

In addition to a decrease in GRS dollars flowing to local governments in New York State, total real federal aid to New York State has decreased over the past decade. Dr. Seymour Sacks of Syracuse University pointed out in a recent paper on the patterns of local government revenue, while federal aid to New York State increased at a rate greater than inflation between 1970 and 1975 (22.3 percent in actual terms and 15.6 percent in real dollars) between 1975 and 1980 actual federal aid to New York State increased at only 3.25 percent—a real decrease of 4.5 percent. And this figure does not account for decreases in aid due to federal cuts since 1980. Proposals designed to offset these real dollar decreases in revenue sharing and other federal aid would serve to help compensate local governments for some of the losses they have experienced in the last decade.

Basing future growth in program revenues to a federal revenue source tied to economic growth, such as the income tax, would additionally assure local governments that their revenue sharing payments would at least remain constant in real dollars.

Our Commission recently sent a survey to all local officials requesting their opinions on the effectiveness and mix of State aid they are presently receiving. One question asked was how they might use each additional revenue sharing dollar. Although the question was specific to New York's revenue sharing program, we believe the responses would be similar for the federal revenue sharing program. New York's local officials indicated about 19 cents would go for current expenditures, 25 cents for capital expenditures, 38 cents to reduce property taxes, 13 cents to reduce outstanding debt, and the remaining five cents would be used for "other" purposes.

Data compiled by the U.S. Treasury Department indicates, present revenue sharing funds have been targeted towards financing essential local functions in New York State. In our counties, approximately 20 percent of revenue sharing dollars are directed towards health and highway purposes each. New York's cities have used more than 50 percent of their funds for police expenses and around 25 percent for fire expenses. Towns use a large portion of their funds, around 25 percent, in the functional area of highways.

3. REEXAMINE THE GOALS OF THE GRS PROGRAM IN LIGHT OF THE PAST DECADE OF EXPERIENCE

When first authorized by Congress in 1972, the program's primary purpose was to allow local governments flexibility in how they spent federal dollars. Since then numerous studies and audits on the expenditure of revenue sharing dollars have been completed. Analysis of these data with other supporting data would indicate whether the GRS Program has met its goal, and determine what its role has been in the intergovernmental system. For example, low tax capacity governments may now depend on revenue sharing dollars to keep their local tax burdens in line with other localities.

Once the program's "mission" and role is reassesed, additional study and consideration should be given to distributing funds along more equitable lines, in which local governments' needs are taken into consideration. Such comprehensive analysis and subsequent debate would span several years and, thus, would not conflict with a call for extending the length of the authorization period of the program.

Components which we feel should be considered, when trying to improve the targeting of GRS aid to those states and localities with the most fiscal need, include the following: eliminating the tiering of revenue sharing funds at the county level so that municipalities of similar need receive similar grants; and, revising the estimates of fiscal resources on which aid is distributed among the states. For example, an income estimate which takes into account a state's capacity to tax different revenue sources as well as the effort the State is already making to finance its services would assist a State which is up against its fiscal limits. For example, according to existing work ACIR has already done in this area, New York State already taxes its corporate income, total property, and personal income bases approximately twice as much as the average state. Its total tax effort, given its resources, is 72 percent higher than the average state (the highest of all states) and 173 percent above the state showing the least tax effort given its resources, Alaska.

As this letter emphasizes, New York State would benefit from a number of short-term

and longer term changes presently being considered by the Congress. Revenue sharing funds have served useful purposes in the intergovernmental system. Its continuation is essential to the fiscal health of our State's local governments. Its revision along the lines we've mentioned can only serve to increase its usefulness as a tool to meet the service needs of New York State's citizens.

Your consideration of these views is greatly appreciated.

Sincerely,

JAMES W. MCCABE, Sr.,
Chairman.
JAMES H. DONOVAN,
Vice Chairman.

THE INTERNATIONAL INSTITUTE OF MUNICIPAL CLERKS,
Pasadena, Calif., June 13, 1983.

Hon. TED WEISS,
House of Representatives,
Washington, D.C.

DEAR MR. WEISS: The Membership of the International Institute of Municipal Clerks, on May 26, 1983, unanimously adopted a resolution urging Congress to extend the General Revenue Sharing Program.

Our membership, which consists of 6,500 city, village, town and borough clerks located in every state, feels that General Revenue Sharing is a crucial source of funding for thousands of small communities that use monies for a wide range of vital local projects.

I should add that 40 percent of our members are from communities below 5,000 population. They know that their cities and towns will suffer severe financial consequences if the General Revenue Sharing Program is allowed to expire on September 30, 1983.

IIMC, as an organization of concerned public officials, has gone on record in support of General Revenue Sharing in 1976 and 1980.

It respectfully urges that every effort be made to re-enact this program.

Sincerely,

JOHN J. HUNNEWELL.
Executive Director.

A RESOLUTION URGING THE MEMBERS OF CONGRESS OF THE UNITED STATES TO MAKE EVERY EFFORT TO REENACT THE GENERAL REVENUE SHARING PROGRAM

Whereas, General Revenue Sharing is a crucial source of funding for thousands of small communities that use monies for a wide range of vital local projects; and

Whereas, testimonies and studies by local government officials have shown that severe consequences to the nation's cities and towns will result if General Revenue Sharing is allowed to expire on September 30, 1983; and

Whereas, the International Institute of Municipal Clerks has gone on record in 1976 and in 1980 favoring this program when it was before Congress for renewal; and

Whereas, the IIMC Federal Legislation Committee, and the IIMC Board of Directors, have in October of 1982, supported the continuation of the General Revenue Sharing Program:

Now, therefore, be it resolved by the Members of the International Institute of Municipal Clerks at the 37th Annual Conference, held in Minneapolis, Minnesota, May 22-26, 1983; That the Congress of the United States be urged to make every effort to re-enact the General Revenue Sharing Program.

Be it further resolved, That a fully executed copy of this resolution be sent to key legislative leaders of Congress involved in the re-enactment of the General Revenue Sharing Program.

Unanimously adopted this 26th Day of May 1983, by the International Institute of Municipal Clerks.

AFL-CIO,
Washington, D.C., August 1, 1983.

DEAR REPRESENTATIVE: The AFL-CIO urges your support for H.R. 2780, the bill which reauthorizes general revenue sharing and increases the funding level for the local share of the program.

The need for revenue sharing has greatly increased in the past few years as costs of local services have increased with inflation, federal grants for services and other expenditures have substantially decreased, and state and local revenues have drastically diminished as a result of a poor economy and federally-tied state tax laws. The funding level for local revenue sharing has not been increased since 1976, even though the cost of living has risen by over sixty percent since then.

While the $732 million increase for revenue sharing reported by the Government Operations Committee was consistent with the House Budget Resolution, the budget resolution conference agreement reduced that increase to $450 million. The AFL-CIO would not oppose an amendment to bring the increase to $450 million but we do oppose any further reductions or any other amendments to the bill.

It is expected that Congressman Walker will offer to this bill the same amendment which he offered last month to the Public Works and Economic Development Act which would allow the Secretary of Labor to waive certain labor standards, including Davis-Bacon wage standards, in local areas. Congressman Walker's earlier attempt was defeated 148 to 270; we urge you to again vote against this spurious amendment.

We urge your support for H.R. 2780 with a funding increase of at least $450 million for local revenue sharing and rejection of all other amendments.

Sincerely,

RAY DENISON,
Director, Department of Legislation.●

● Mr. GEJDENSON. Mr. Chairman, I rise today to express my strong support for H.R. 2780, which reauthorizes the general revenue sharing program.

This bill reauthorizes the program for an additional 5 years—an increase over the current 3-year authorization that will enable local governments to plan for the most effective efficient utilization of these funds. Furthermore, this bill contains the first increase the general revenue sharing program has received since 1976.

State and Local governments have been among the hardest hit victims of the recent recession, and are now projected to lag behind other sectors of the economy in recovery. These fiscal problems have taken place at a time of drastic Federal aid reductions, and have forced most States, counties, and municipalities to implement major service cutbacks and tax increases.

State and local budgets will continue to be under great strain over the next several years. I believe that reauthorization of general revenue sharing for a 5-year period is essential to prevent further cutbacks in State and local services and to provide State and local economies with a needed stimulus. I urge my colleagues to support this important legislation.●

Mr. DYSON. Mr. Chairman, today we must decide whether or not to reauthorize the 1972 State and Local Fiscal Assistance Act, widely known as general revenue sharing. During the past 5 years this program has provided nearly 40,000 local governments with $23 billion. The legislation we are now considering proposes to increase this by 9.9 percent, so that over the next 5 years local governments will receive $25.1 billion. This is a significant sum, and I appreciate the grave reservations many of my colleagues have expressed as they consider their vote. I am therefore thankful for this opportunity to address my colleagues' concerns and to rise in support of H.R. 2780.

Perhaps the most common criticism of the bill focuses on the proposed funding increase. This objection points out that the Federal Treasury is currently borrowing to meet its yearly obligations. We do not have, in short, any spare revenue to "share" with localities. While opponents do not suggest that we let revenue sharing lapse altogether, they insist that increasing the program's authority, even by the proposed one-time boost of $450 million, will merely increase the Federal deficit. This in turn, it is suggested, will increase interest rates and stifle the Nation's fragile economic recovery. This objection assumes that since the fiscal health of local governments rightly depends on increasing the activity and prosperity of the private sector, and not on the largess of the Federal Government, the funding increase would be "fiscally irresponsible."

Against this objection I point out that economic growth occurs precisely in the counties, municipalities, suburbs, and cities which are this country's marketplaces. It is here that we are recovering from the worst recession in 40 years. Economic growth brings increases in personal income, property values, and ultimately, local tax revenues. But it also brings additional and immediate demands for local public services. Without these services, growth is impossible. And though the recovery is indeed fragile, protecting it is best done by making the immediate investment in bridge and road repair, sewer extensions, mass transit systems, schools and other public services necessary to accommodate increased economic activity.

Without the contribution of Federal revenues, localities will either have to forgo these critical improvements or

increase property taxes. These taxes are not only regressive and inefficient mechanisms for raising revenue, they are not conducive to stimulating the economic growth for which we all hope. In short, local governments will be forced to discourage the very growth which will bring them lasting fiscal security.

The current funding level for revenue sharing was established in 1978. Since that time inflation has worn thin the budgets of most, if not all, local jurisdictions. The recession has diverted resources to increase humanitarian aid and relief, and delayed many long needed capital improvements. The funding increase proposed in H.R. 2780 will not replace the purchasing power lost to localities by the ravages of inflation. But it will help restore the fiscal security necessary to local government for budgetary planning. Where the recession is still acute, localities can better provide for the human needs of their citizens. Where the recovery is burgeoning, localities can plan their public services and capital improvements in such a way as to insure the market's vibrant growth.

Our public transportation network of bridges, highways, and mass transit systems—our public infrastructure in general—is in no condition to meet the demands of a prolonged recovery. The simplest, most efficient mechanism for providing the resources necessary to upgrade public capital is through the locally controlled budgets of local government. All they need is the active support of the Federal Government. This was the rationale behind the original passage of the 1972 act, and it is as true today as it was 11 years ago.

In Maryland's First Congressional District, for example, general revenue sharing has contributed an average of 3.8 percent of local government revenues. A survey of the uses to which the counties have put their allocations illustrates the local control and flexibility of the program. Caroline County put its $450,000 mostly to its "general fund." Cecil County spent its $838,700 for transportation improvement. Harford and Wicomico Counties accelerated their debt retirement. Kent County spent $369,300 for improving its health and education facilities.

Opponents who object to reauthorization on the grounds of budgetary restraint and responsibility invoke an argument which I take very seriously. I am by nature a fiscal conservative, and have adamantly supported recent efforts to contain the Federal deficit. But though well intentioned, the argument, as I have tried to point out, is economically misapplied in this instance. Regarding the political question of budgetary responsibility, I can point to the remarks of several State and local officeholders to substantiate my claim that revenue sharing is the surest mechanism for promoting local fiscal responsibility.

Mayor Elmer E. Horsey, of Chestertown, Md., for instance, has written requesting my continued support for keeping community development bloc grants separate from revenue-sharing funds. Both programs are vitally important to Chestertown, and Mayor Horsey is convinced the merger of these programs is not in his city's interest. The city of Cecilton, Mayor Harold Miller informs me, has found general-revenue-sharing funds indispensable for its water system improvements. Fully 8 percent of Cecilton's budget comes from GRS funds, and without these moneys, its water tower and other improvements could not have been financed. Mr. Allen L. Dennis, council president of the city of Cambridge, has informed me that GRS funds equal 22 cents per $100 of assessed valuation on the local property tax rate. The program is vital to Cambridge, and, as Mr. Dennis has pointed out, it would be "fiscally irresponsible" of us to reduce Federal personal income taxes and simultaneously force local governments to increase their local property tax rates.

With these considerations in mind, it seems shortsighted to view this bill as simply an ill-conceived increase in the Federal deficit. The program emphasizes local control and flexibility. By preserving the active partnership between local and Federal Government, it helps stabilize the conditions for economic recovery while avoiding the redtape of an intrusive Federal bureaucracy. It is a sound, perhaps the soundest, public investment we can make in our cities and counties.

I sincerely hope my colleagues will, after considering these comments, vote to support the bill.

I would also invite my colleagues to read some of the many letters I have received from elected officials throughout Maryland.

The letters follow:

COUNTY COMMISSIONERS,
La Plata, Md., July 5, 1983.

Hon. ROY P. DYSON,
Longworth House Office Building,
Washington, D.C.

DEAR CONGRESSMAN DYSON: Thank you for your letter of June 14, 1983, with regard to General Revenue Sharing.

As you well know, General Revenue Sharing funds are critical to this county. We use the funds to support our Sheriff's Department operations. Obviously, since we can't function without our Sheriff's Department, the property taxpayer would realize the burden of the loss of General Revenue Sharing.

I greatly appreciate your constant efforts to secure these funds for our residents, without your support we would be in a most difficult situation.

Sincerely,

ELEANOR F. CARRICO.

SHERIFF'S DEPARTMENT,
Cecil County, Md., June 27, 1983.

Hon. Roy P. Dyson,
Longworth House Office Building,
Washington, D.C.

DEAR MR. DYSON: The General Revenue Sharing Program which is due to expire this September 30 is of great concern to those of us in local government. Here in Cecil County, the Sheriff's Department is engaged in starting up not only a new, modern correctional facility but also a model program which we hope will be an example for state and county governments nationwide. In order for us to continue such a standard of excellence, it is necessary for bills such as HR 2780 to be passed by our federal government. This bill would not only correct the fact that funding has not kept up with inflation but also allow states to receive categorical grants which are so badly needed by some segments of our population.

Our "New Federalism" administration will probably continue to approve restricted revenue sharing programs, but those of us who have seen the benefits of legislation such as that proposed by HR 2780 must continue to support it whenever we can.

Yours very truly,

JOHN F. DEWITT,
Sheriff.

CITY OF HAVRE DE GRACE,
Havre de Grace, Md., June 28, 1983.

Hon. ROY P. DYSON,
Congress of the United States, House of Representatives, Washington, D.C.

DEAR ROY: Thank you for your very informative letter of June 14, 1983 concerning the General Revenue Sharing Program.

Small municipalities, such as Havre de Grace, Maryland, would be hard-pressed to balance annual budgets were it not for revenue sharing and Community Block Grant funds. We could not tax the citizens sufficiently to pay for the needed improvements to maintain a certain quality of life for our citizens.

Ten years or so ago I was appointed Co-Chairman of our initial Community Block Grant Committee. I worked with many interested citizens for years in securing needed funds for many projects in Havre de Grace. So, I'm very familiar with the benefits of this particular program.

As an elected City official, it is my duty to improve the conditions of my City that ultimately leads to a better way of life for its citizens. Sharing in the above funds is matter of factly a necessity and I would not want to see this potential funding for worthwhile community projects be lessened or combined. Therefore, please express my concern to this threat to the citizens of Havre de Grace and convey my support of H.R. 2780 to your colleagues in the House of Representatives.

Best personal regards.

Very truly yours,

PHILIP J. BARKER,
City Councilman.

HOUSE OF DELEGATES,
Annapolis, Md., June 28, 1983.

Hon. ROY DYSON,
Congress of the United States,
Washington, D.C.

DEAR ROY: Thank you for your letter concerning the General Revenue Sharing program which is scheduled to expire this September 30.

As you know, the General Revenue Sharing program is important to the St. Mary's County government in that it provides

monies to fund many of its vital programs such as health, education, police and social services. To eliminate such funding would have an adverse effect on St. Mary's County and would necessitate the County's having to increase the real estate tax rate in order to obtain the necessary funds to maintain the present level of services. In my opinion, an over-all study of government funding and financing policies is needed at this time particularly in view of all of the proposed program changes.

I strongly support your efforts on H.R. 2780. Kindly keep me advised as to the progress of this matter.

Wishing you much success and happiness, I am

Sincerely,

JOHN F. SLADE III.

THE COMMISSIONERS OF ABERDEEN,
Aberdeen, Md., June 17, 1983.

Hon. ROY DYSON,
Congress of the United States, House of Representatives, Washington, D.C.

DEAR CONGRESSMAN DYSON: The Commissioners of Aberdeen appreciate the posting on the status of Revenue Sharing. From all reports we have received, every one from the President to Congress, agrees that Revenue Sharing should be continued. We hasten to add our support to the continuation of this program.

It is no secret that most municipalities are working with very tight budgets so revenue sharing becomes more important than ever in keeping Cities and Towns in a fiscally responsible position. We urge you and your fellow representatives to work toward a five year reauthorization of revenue sharing and to work toward an increased amount. If there is anything further we can do to assist in finalizing this program favorably, please advise. In the meantime, our thanks for your efforts on our behalf.

Very truly yours,

RONALD KUPFERMAN,
President.

Mr. HORTON. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. BROOKS. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. Pursuant to the rule, the substitute committee amendment recommended by the Committee on Government Operations shall be considered as an original bill for the purpose of amendment under the 5-minute rule, and each section shall be considered as having been read.

The Clerk will designate section 1.

The text of section 1 is as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE

SECTION 1. This Act may be cited as the "State and Local Fiscal Assistance Amendments of 1983".

The CHAIRMAN. Are there any amendments to section 1?

If not, the Clerk will designate section 2.

The text of section 2 is as follows:

EXTENSION OF PROGRAM

SEC. 2. (a) Section 6701(a)(1) of title 31, United States Code, is amended to read as follows:

"(1) 'entitlement period' means each one-year period beginning on October 1 of 1981, 1982, 1983, 1984, 1985, 1986, and 1987.".

(b) Section 6711(a)(3) of such title is amended by striking out "1983" and inserting in lieu thereof "1988".

AMENDMENT OFFERED BY MR. HORTON

Mr. HORTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HORTON. Page 2, beginning on line 6, strike out all of section 2 through line 13 and insert in lieu thereof the following:

EXTENSION OF PROGRAM

SEC. 2. (a) Section 6701(a)(1) of title 31, United States Code, is amended to read as follows:

"(1) 'entitlement period' means each one-year period beginning on October 1 of 1981, 1982, 1983, 1984, and 1985.".

(b) Section 6711(a)(3) of such title is amended by striking out "1983" and inserting in lieu thereof "1986".

Mr. HORTON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Texas.

Mr. BROOKS. Mr. Chairman, I make the point of order that a quorum is not present.

The CHAIRMAN. Evidently a quorum is not present.

The Chair announces that pursuant to clause 2, rule XXIII, he will vacate proceedings under the call when a quorum of the Committee appears.

Members will record their presence by electronic device.

The call was taken by electronic device.

□ 1710

The CHAIRMAN. A quorum of the Committee of the Whole has not appeared.

The Chair announces that a regular quorum call will now commence.

Members who have not already responded under the noticed quorum call will have a minimum of 15 minutes to record their presence. The call will be taken by electronic device.

The call was taken by electronic device.

The following Members responded to their names:

[Roll No. 305]

□ 1730

The CHAIRMAN. Three hundred seventy-six Members have answered to their names, a quorum is present, and the Committee will resume its business.

(By unanimous consent, Mr. HORTON was allowed to proceed for an additional 5 minutes.)

The CHAIRMAN. The gentleman from New York (Mr. HORTON) is recognized for 10 minutes.

Mr. KOSTMAYER. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Pennsylvania.

Mr. KOSTMAYER. Mr. Chairman, I rise in support of H.R. 2780, the State and Local Fiscal Assistance Amendments Act of 1983. I want to commend my distinguished colleague from New York (Mr. WEISS) and the members of the Government Operations Committee for the fine work they did in bringing this important bill to the floor.

I have always been and continue to be a strong supporter of the Federal general revenue sharing program. As a former member of the Government Operations Committee, I know that revenue sharing is probably the single most direct Federal program to help our States and 39,000 local governments nationwide. In my State of Pennsylvania alone, over 2,600 local governments benefit from this important program.

Since the beginning of this year, local government officials from my district, which includes all of Bucks County and eastern Montgomery County, have voiced their strong support for the prompt reauthorization of general revenue sharing at adequate funding levels in order to avoid undue complications with the preparation of their municipal and township budgets.

Mr. Chairman, I would like to share with my colleagues excerpts from a recent letter that I received from the Pennsylvania Local Government Conference regarding the importance of revenue sharing. I am sure that the opinions of the Pennsylvania Conference are not unique and I urge my colleagues to reaffirm today our support of this program by voting for H.R. 2780.

PENNSYLVANIA LOCAL GOVERNMENT CONFERENCE,
Camp Hill, Pa., June 8, 1983.

Hon. PETER H. KOSTMAYER,
Pennsylvania Congressional Delegation, Cannon House Office Building, Washington, D.C.

DEAR CONGRESSMAN KOSTMAYER: In recent months the Pennsylvania Local Government Conference, consisting of the Pennsylvania State Association of Boroughs, the Pennsylvania League of Cities, the Pennsylvania State Association of County Commissioners, the Pennsylvania State Association of Township Commissioners, and the Pennsylvania State Association of Township Supervisors conducted a study of Revenue Sharing in Pennsylvania municipalities. The intent of the study was to assess the effects of the program in its current form and to determine what effect the termination or curtailment of the program would have on local taxes and services in the years ahead.

The booklet, "Revenue Sharing—Its Impact on Pennsylvania Local Government," documents the results of this study. The results indicate that General Revenue Sharing accounts for 16.7 percent of the average local budget; the average General Revenue Sharing payment to municipalities in Pennsylvania Congressional districts is $59,931, ranging from a low of $216 to a high of $14,011,523; if General Revenue Sharing funds were to be replaced by property taxes, these taxes would rise an average of 61.2 percent, and for 93.8 percent of the responding municipalities, Revenue Sharing funds are the only direct source of federal funds received.

The Pennsylvania Local Government Conference supports and endorses the renewal of the Revenue Sharing program, and would encourage that the results of this survey be used in the debate on renewal.

Sincerely,

JAY HIMES,
Chairman, Local Government Conference.

Mr. HORTON. Mr. Chairman, the amendment I am offering reduces the entitlement period from 5 to 3 years. While being quite straightforward, it is important to the financial integrity of this bill and to the ability of the Congress to effectively oversee the program. The committee bill reauthorizes the revenue-sharing program as an entitlement through September 1988, a period of 5 years. This is longer than any other previous reauthorization period adopted by the Congress and signed by the President.

My concern over this lengthy extension period is twofold. First, the intergovernmental system is ever changing, with its future well-being almost impossible to predict. None of us know now what the fiscal situation of State and local government might be even 2 or 3 years from now. This alone is reason enough not to go with a 5-year extension.

A case example of this occurred just 3 years ago, during the last reauthorization of this very program. At that time, State governments as a whole were running budget surpluses and in generally good financial condition. Because of this, the Congress removed their entitlement status, with the result that they have not been funded since. Yet, many State governments are now in extreme financial straits. The financial situation for State governments has, in 3 years, changed dramatically in ways that no one at that time could foresee. While the committee has chosen not to reactivate the States share as an entitlement, or on a countercyclical basis because of the severe budget constraints at the Federal level, the committee at least had the opportunity to consider doing so.

To lock up the formula and the funding level for 5 years effectively prevents Congress from using the vehicle of revenue sharing reauthorization to meet new problems and opportunities within the federal system. A 3-year reauthorization, on the other hand, would provide ample opportunity to review the program to be certain it is achieving its goals.

I am even more deeply concerned about another aspect of a 5-year entitlement. If it is allowed to stand, the Congress will be committing the Federal Treasury to the payment of some $26.5 billion. There would be nothing we could do about it. We would have to pay the money whether we wanted to or not. Now we all know why it is important for revenue sharing to be an entitlement, and I support its entitlement status. The least we should do is entitle these funds for as short a period of time as is reasonable. A 3-year extension is such a reasonable period and would commit the Federal Government to $10 billion less in entitlement spending than does a 5-year bill.

The recent midsession budget review projects Federal deficits in the $150 billion range for each of the upcoming 5 fiscal years. A large part of this problem is entitlement spending, to commit this and future Congresses to an additional $10 billion more in entitlement spending than is necessary would tie our hands in dealing with the problem of Federal spending which is a mistake.

The argument may well be made that a 5-year extension is needed to insure local governments of a certain level of revenue for a longer period of time. Unexpected interruptions in the level and flow of revenue-sharing dollars would, I agree, cause tremendous difficulty for local budgeting. Yet, that is why revenue sharing is an entitlement. The purpose of my amendment is to balance the need of local governments for an assured source of funds to the need of the Federal Government to balance its own budget. Limiting the entitlement status of revenue sharing to a 3-year period is an excellent way to do this.

Mr. Chairman, moving this program's reauthorization period back to the traditional 3-year period is fiscally

prudent, fair to future Congresses, and in no way wreaks havoc on local budgeting. I would add finally, that my amendment enjoys the whole-hearted support of the administration. I urge my colleagues to support the amendment.

□ 1740

I would like to point out that I received a letter from the Director of the Office of Management and Budget dated June 20 of this year in which he says "I am writing to advise you of the administration's serious objections to certain features."

Then he goes on to say that—

Under the extension of 5 years it would increase the entitlement portion from the current level of $4.6 billion annually to $5.3 billion for 5 years. The administration's proposal would extend it for 3 years.

In its present form it is a budget buster, says Mr. Stockman.

The bill would, in a single year, increase spending for general revenue sharing by 16 percent. It would result in fiscal years 1984–86 outlays that would exceed the administration's request by over $2.1 billion. Increases of this magnitude are totally inappropriate, especially in light of serious financial problems facing the Federal Government.

Then it goes on to point out that the Budget Director and other officials would recommend to the President a veto if it does have this 5-year period in it.

So I would urge that we reduce the period from 5 years to 3 years.

Mr. SKELTON. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I will be happy to yield to the gentleman from Missouri.

Mr. SKELTON. Mr. Chairman, as we continually reassess the various ways in which our taxpayers' money is spent, eliminating waste wherever we can, we must not forget to reward the programs and projects that are worthwhile and have a positive impact on our Nation's cities and counties. Without question, the revenue-sharing program deserves to be reauthorized.

I recently conducted a survey, talking with city and county clerks and mayors and county judges throughout my district, and discovered the pattern is that there is no pattern, except that everyone strongly favors the revenue-sharing program. Responses such as "Essential," and "We're all for it!" were typical answers when the clerks were questioned about revenue sharing.

What makes revenue sharing an attractive program for local communities is that local officials decide where and how the money is spent. What makes revenue sharing attractive for us in Washington is that vital community repairs and improvements are completed, while at the same time local services continue to expand. A sample of the projects funded through revenue sharing in Missouri's Fourth Congressional District include: street maintenance, bridge construction, park improvements, library upkeep, and new computer systems. Improvements and investments such as these are truly important to the health and well-being of our cities and towns. This influx of funds provides a necessary economic stimulus. It is unfortunate, but, these improvements are the ones that no one notices until the potholes form or the paint peels. We must continue to work to keep these programs alive.

Who knows better than community leaders what specific projects a community needs? In 1982, Lafayette County exemplified how effective the revenue-sharing program can be. Of the $131,588 received, county officials apportioned this money into a wide variety of areas, specifically: repairs to county buildings, the Extension Council of the University of Missouri, the Western Medical Health Center, and the local 4–H clubs. These funds, and the ways in which they are spent, offer substantial evidence of the benefits of this type of local control to the community.

For these reasons, I strongly support the revenue-sharing program. Such a no-strings-attached revenue source allows us to look out for the economic health of the cities and counties throughout our nation. The revenue-sharing program has earned our support, and I urge the Congress to reauthorize these vital funds.

Mr. JONES of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I am happy to yield to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. Mr. Chairman, I want to commend the gentleman for this amendment and rise in support of the amendment.

I recognize that the gentleman offers this amendment not as an enemy of revenue sharing but as a friend and supporter of revenue sharing. Around this body and back home in our speeches we rail against uncontrolled Federal spending and we rail against entitlement programs that are growing and creating a situation in which we cannot control the Federal budget.

The general revenue-sharing program is a capped entitlement program and we ought to show our willingness today to put some limitations on this entitlement program.

What we would be doing if we reject the gentleman's amendment is committing, by our vote today, to spend without any review over the next 5 years, to spend in excess of $26 billion. It makes sense to limit this commitment to a 3-year period.

General revenue sharing in each of its reauthorizations up to this point have been for periods of 3 years. Comparable programs such as the community development block grant, the UDAG program, the EDA program, are all authorized for 3-year periods. That gives the local communities the opportunity to plan ahead and yet it gives the Congress and the Federal fiscal policymakers an opportunity to review in a timely fashion how these programs are fitting into our overall economy.

Other programs, defense, education, food stamps, programs such as that, do not have this kind of 5-year authorization with a firm commitment to spend, and I do not believe we ought to be giving it to general revenue sharing.

We can talk about $200 billion deficits and we can rail against them but we have an opportunity today to put some controls on those so-called uncontrolled spendings.

I hope that the House will support the gentleman's amendment. I think it is a good amendment that improves the program.

Mr. HORTON. I thank the gentleman for his comments and I certainly appreciate his support for this amendment.

I would add to what the gentleman already said that I am a very strong supporter and have been a strong supporter for revenue sharing. I know that many of the public interest groups and many of the municipalities would like to have a 5-year program. But as the gentleman pointed out, and as I pointed out, for us to do that I think would be foolhardy.

It is an entitlement program and we are all familiar with what entitlement programs are. For us to put on the books 5-year entitlement programs now, at this level, I think would not be very prudent expecially in light of the fiscal restraint that we should be maintaining as far as this body in concerned.

I would also point out that the various municipalities have been able to live in the past under this 3-year authorization or entitlement program. So they are not unused to having the entitlement for a 3-year period of time.

So I think with all factors involved that it is more prudent for us to reduce the period from 5 years to 3 years.

I might say also, parenthetically, I will offer an amendment to bring the funding in line with the budget recommendations and the budget resolution that was adopted, which is approximately $450 million more than the $4.6 billion.

But it is important I think that we adopt this amendment and I urge my colleagues to adopt it.

The CHAIRMAN. The time of the gentleman from New York (Mr. HORTON) has expired.

(On request of Mr. LEVITAS and by unanimous consent Mr. HORTON was

allowed to proceed for 2 additional minutes.)

Mr. LEVITAS. Will the gentleman yield?

Mr. HORTON. I will be glad to yield to the gentleman from Georgia.

Mr. LEVITAS. I commend the gentleman on his amendment and on his statement.

I have been a very strong advocate of general revenue sharing. One of the most unpleasant experiences I have had in Congress was differing with my distinguished chairman on this subject by supporting revenue sharing in my first term as a Member here. But I do believe in it.

However, we have got to make the program sensible and reasonable and not just a greed bucket for local governments. I think for us to do anything other than adopt the gentleman's amendment would take this program from a reasonable, low-cost administration program into an uncontrollable giveaway program which would not be accountable to the Congress.

So I urge my colleagues, those of us who support revenue sharing, as well as those who do not support revenue sharing, to support the gentleman's amendment, and I would also hope that the gentleman will feel inclined to support my amendment which I will offer later on on the tit-for-tat provision with respect to State funding, if that should be authorized.

Mr. HORTON. I thank the gentleman.

Mr. BROOKS. Mr. Chairman, I move to strike the requisite number of words, and I rise in strong support of the amendment offered by my friend from New York, the distinguished ranking minority member of the Government Operations Committee, Mr. HORTON, which provides for a 3-year reauthorization of general revenue sharing rather than the 5-year extension included in the bill reported by the committee.

The committee's bill would reauthorize revenue sharing through fiscal year 1988. The Congressional Budget Office's baseline estimate of the aggregate Federal budget deficit over that 5-year period is $1.2 trillion, which is roughly equal to the current national debt that has taken nearly 200 years to accumulate. In light of these projections, it would be an act of fiscal irresponsibility for Congress to irrevocably commit the Federal Government to the expenditure of more than $26 billion for general revenue sharing over the next 5 years.

Just last week I received a "dear colleague" letter from the chairman, ranking minority member, and seven other members of the House Budget Committee asking my support for an amendment to the rehabilitation act amendments of 1983. While supporting this program, which provides rehabilitation assistance to handicapped individuals, the Budget Committee members were seriously concerned about expanding it as an entitlement program for the next 3 years. The letter said:

To put our concern in perspective, approximately three-quarters of Federal spending is uncontrollable by an annual budget and appropriations process. Entitlement and other mandatory programs constitute the bulk of that amount. The remaining one-quarter of Federal spending is the only portion which Congress controls through its annual appropriations process, and half of that amount is devoted to defense. As presently drafted, H.R. 3520 would increase the so-called uncontrollable portion of the budget by expanding an entitlement in the out-years.

Should we not be equally concerned about extending the entitlement in general revenue sharing for an additional 5 years? Do we not owe it to ourselves and our constitutents to take another look at this $5.3 billion per year expenditure before fiscal 1989?

Furthermore, if mayors and county commissioners are going to enjoy the luxury of spending revenue sharing funds, while Congress bears the responsibility for raising the money, local officials should be required to justify the continuation of this program more often than once every 5 years.

In conclusion, Mr. Chairman, Members should be aware that the administration adamantly opposes a 5-year extension of revenue sharing. Budget Director Stockman has advised the committee that he will recommend that the President veto any reauthorization of longer than 3 years.

I strongly urge my colleagues to support the gentleman's amendment.

□ 1750

Mr. WEISS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to the amendment offered by the gentleman from New York.

Three years, in my judgment, is too short an authorization for a program like revenue sharing which is intended to help local governments provide important public services. In the course of hearings, which the subcommittee held both here in Washington and across the country, the one concern expressed by the witnesses representing local governments was the need for stability and predictability in the revenue-sharing program.

Many State and local governments are moving toward a more rational approach to capital budgeting, one that emphasizes planning capital expenditures 5 years in advance.

This becomes very important in light of the need to finance billions of dollars worth of infrastructure replacement at the State and local level. The New York State Legislature, for example, is presently considering a bill which would require the State to assemble a 5-year plan for financing and scheduling capital construction projects. Consequently, the longer the authorization period of the revenue-sharing program, the more local and State governments will be able to tie Federal funds into their own investment plans and use those funds to leverage money from other sources.

Lengthening the authorization period will institutionalize a program which has served municipalities and, until 1981, the State as well. Since the program grants general purpose aid, it allows governments the flexibility to spend moneys where they see the most urgent need.

In fact, it is noteworthy that in submitting its New Federalism initiative to Congress, proposing that the entitlement portion of the community development block grant program be combined with revenue sharing, the administration itself recommended a 5-year extension of that program.

It seems to me that the 5-year reauthorization of revenue sharing is a practical and sensible timeframe, and I therefore urge defeat of the amendment offered by the gentleman from New York.

The CHAIRMAN. The time of the gentleman has expired.

(On request of Mr. HORTON and by unanimous consent, Mr. WEISS was allowed to proceed for 2 additional minutes.)

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I would be pleased to yield to the gentleman from New York.

Mr. HORTON. I thank the gentleman for yielding.

The letter the gentleman was referring to as to the administration position for extending the program for 5 years including merging revenue sharing and community development. It did not talk just to the question of just revenue sharing.

Mr. WEISS. Of course. And if the gentleman will allow me, the point that I am making is that simply because it is raised from 3 years to 5 years does not automatically make it wrong. As a matter of fact there is an advantage to having a 5-year program so that the communities can better plan ahead as to how they are going to be spending that money.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, the gentleman from New York has just made the case that was made before our subcommittee by many of the local communities that came before us.

Let me talk for a moment why I think that the fiscally responsible vote is for us to vote against this amendment and for a 5-year extension. We heard the distinguished chairman of the Budget Committee mention a few moments ago the problem of uncontrolled Federal spending. I think we all recognize that that is in fact a major problem that we face.

What the advantage of the entitlement program that we have before us here is that we do cap that entitlement. We do make some decisions about holding a steady level.

The longer you can hold that cap in place, the better chance we have of managing the budget in those outyears. Now, I think you have to decide what perspective you are coming at here.

If you believe that after the 3-year period that we are going to come back and lower the spending levels of the program, then you might agree with the gentlemen from Oklahoma and some of the other gentleman who have spoken on this amendment. The tendency, however, is to come back and raise the spending levels of the program. For example, in 1980, these exact arguments were made. Here we are 3 years later coming back and the bill that we have before us substantially raises the entitlement level. Would we not have been better off in 1980 to have capped the program at the present $4.6 billion level and at least have the next 2 years being at a lower spending level than is likely to happen in this particular program?

I would also say that if we really want to do something about addressing the issues the gentleman from New York, the gentleman from Texas, and the gentleman from Oklahoma raise, let us support the McCandless amendment when it comes up and cap the program at its present spending. He will offer an amendment to cap the program at $4.6 billion in spending. You combine that with a 5-year authorization and you can substantially lower the cost of this program over a period of time.

So, it seems to me that if we really want to do something about controlling one of the uncontrollables, let us do it for a 5-year period, cap it at $4.6 billion and save some real money. If you go for the 3-year extension, I fear what we will be doing is simply giving us an opportunity to come back in 3 more years and raise the spending level again.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman.

Mr. LEVITAS. I thank my colleague.

Mr. Chairman, as the gentleman knows, I disagree with him on this particular amendment. I was the author of the amendment that made revenue sharing an entitlement program and I did it in order to provide for predictability and certainty, so that the communities could use the money wisely and would not have to wonder from year-to-year how much would be made available.

On the other hand, a 3-year period is a reasonable period that we utilize for budget purposes.

Why 5 years? Why not 10 years or 7 or 15 or 13? Or why not make it like social security or medicare, indefinite? I think that if we are going to limit this program so we can reevaluate it from time to time the 3-year period, which is a standard period, within a budgetary cycle, and would cover at least 2 fiscal years of each local government, would be a more sensible place to draw the line.

Mr. WALKER. The gentleman will admit, having provided distinguished leadership on this program, that the 3-year period is not sacrosanct. In the early days we did in fact authorize the program for longer than 3-year periods.

□ 1800

And in fact during those periods of time, the program did not rise in cost as fast as it has under the 3-year authorization.

So it seems to me that we can make a good case, that one way of keeping costs down in the program is to have the period of time go a little bit longer. And that is all that the gentleman from New York is suggesting. And that is all the gentleman from Pennsylvania is suggesting.

Mr. JONES of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. I thank the gentleman for yielding.

I also disagree with the gentleman's argument and I do not see why general revenue sharing should be treated differently than community development block grant or UDAG or EDA, which have 3-year authorizations.

Just so that I understand the argument correctly, the gentleman from Pennsylvania is saying that he opposes the amendment so that you can do less for the cities if you support the Weiss position, is that it?

Mr. WALKER. The gentleman understands, I think, that the gentleman from New York has made the argument that the local governments have made, and, of course, they are interested in extending this out further. And I had said to the gentleman earlier that I thought that there was a conservative argument for it, too.

The gentleman from Pennsylvania is raising that more conservative argument which I thought spoke to the point raised by the gentleman earlier about uncontrolled Federal spending. I think this is a good way of controlling Federal spending a little bit. And if that happens to gel with the gentleman from New York's argument, well, that may be a happy coincidence.

Mr. JONES of Oklahoma. I just think this is an historic event here today.

Mr. LATTA. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the amendment.

Mr. Chairman, I have been attempting to follow the argument of the gentleman from Pennsylvania. And I find it very difficult to do so. He seems to be arguing it is cheaper to fund this program for 5 years than it is 3 years. I cannot quite follow that.

I can recall when this program started. I recall the then Secretary of the Treasury, John Connally, who supported the program, coming up to the Hill and lobbying me as a member of the Rules Committee on three separate occasions before he finally convinced me to vote for this program. And it came out by one vote. It was not an overwhelming vote in the Rules Committee. As a matter of fact, it was not overwhelming in the beginning in the committee chaired by the gentleman from Texas (Mr. BROOKS).

They sold me on this program by saying they were going to cut out some of these categorical grant programs and in lieu thereof come up with a program of revenue sharing without any strings attached for local government and our cities to spend as they wish.

What happened? They kept all of the categorical grant programs and now had revenue sharing as well.

So I was sold on this program in the first place by an argument which never came to pass. But I have supported it because they do spend the money more wisely at the local level than they do here at the Federal level.

But it just seems to me to commit ourselves for 5 years on this program, rather than 3, is a little bit ridiculous, when every time you go out there and read the wire service you find where somebody is saying something about, "the fear of high interest rates." And these high interest rates will come because the Federal Government is being forced to be out there borrowing and borrowing and borrowing more every single day and every single week. This cannot go on.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. LATTA. I yield to the gentleman from Texas.

Mr. BROOKS. I thank the gentleman for yielding.

To my distinguished friend even the Members who are for this bill, most of them realize that 3 years is enough. How greedy can you get?

Mr. LATTA. Mr. Chairman, if I may reclaim my time, the gentleman said that, I did not.

Let me say that we have not had a 5-year period for revenue sharing at any time yet. We have had 3 years. And I think that we ought to continue it on a 3-year basis, rather than a 5-year basis.

Mr. BEVILL. Mr. Chairman, I rise in support of H.R. 2780, State and Local Fiscal Assistance Amendments of 1983, which would extend general revenue-sharing payments by the Federal Government for 5 more years.

I have seen first hand the benefits which general revenue sharing has brought to communities across our country. In the Fourth District of Alabama, which I represent, countless projects, which would have been impossible even to envision because of a lack of local funding, are today in place, benefiting residents because revenue-sharing funds were made available.

Improved fire protection, street repairs, water system extensions, additional police protection, and many other municipal services have received assistance through this program.

The concept behind revenue sharing is a valid one. The local government officials have more direct knowledge of the needs of their communities than do Washington agencies. These funds can be put to immediate use to solve pressing local problems without the nightmare of bureaucratic redtape.

I continue to trust that America's local government officials have the ability and the desire to see that their communities receive every possible benefit from the tax dollars they receive and revenue sharing is an important source of funds to them.

I have been a consistent supporter of this fine program to return Federal revenue to county, city, and town governments, as well as States, under certain conditions, since the program was established in 1972.

I favored the reauthorization of this program in 1976 and again in 1980. And I am strongly supporting this year's amendments, which would continue it through 1988.

Included in the provisions of this new extension is a 16-percent increase over the 1983 level. This would compensate for the effects of inflation since the program was last reauthorized in 1980.

Unlike revenue sharing for county, city, and town governments, the State allocation would not be an entitlement, but would be an authorization, subject to the annual appropriations process here in the Congress. I am confident that if the national debt is sizably reduced, we can see fit to make these payments, totaling $2.3 billion for fiscal years 1984 to 1988, available to the various State governments.

An improvement has been made in current law that requires State governments to forgo an equal amount of Federal categorical assistance, should the Congress decide to appropriate the $2.3 billion annually to the various States.

Although the current bill continues the existing allocation formulas, provision is made for a general study of this aspect of the general revenue-sharing program.

The Treasury Department is also directed to study alternatives to personal income tax, which is currently being used to calculate the taxing capacity and taxing efforts of the States and local governments.

While the other body has a bill which would only extend this program for 3 years, and not provide a sufficient increase to compensate for the inflationary effect on payments, I am confident this House measure is far superior and will pass.

At this time I would also like to encourage my colleagues in the House to pass this measure by a sufficient margin which will indicate to the other body the strong support here in the House for the provisions of H.R. 2780.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. HORTON).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. HORTON. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 226, noes 202, not voting 5, as follows:

NOT VOTING—5

Hansen (ID)	Lott	Weaver
Heftel	Miller (CA)	

□ 1820

Messrs. DORGAN, WALGREN, ROGERS, PENNY, SWIFT, MARTIN of North Carolina, and SAWYER changed their votes from "aye" to "no."

Mr. HERTEL of Michigan changed his vote from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there any additional amendments to section 2?

If not, the Clerk will designate section 3.

The text of section 3 is as follows:

AUTHORIZATION OF APPROPRIATIONS FOR ENTITLEMENTS

SEC. 3. Section 6703(b)(2) of title 31, United States Code, is amended by striking out "$4,566,700,000" and inserting in lieu thereof "$5,297,333,000."

AMENDMENT OFFERED BY MR. HORTON

Mr. HORTON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. HORTON: Page 2, beginning on line 14, strike out all of section 3 through line 17 and insert in lieu thereof the following:

AUTHORIZATION OF APPROPRIATIONS FOR ENTITLEMENTS

SEC. 3. Section 6703(b)(2) of title 31, United States Code, is amended by striking out "$4,566,700,000" and inserting in lieu thereof "$5,016,700,000".

The CHAIRMAN. The gentleman from New York (Mr. HORTON) is recognized for 5 minutes in support of his amendment.

Mr. SOLARZ. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from New York.

Mr. SOLARZ. Mr. Chairman, during the budget debate this spring, I made, as one of my highest priorities, the adoption of an increase in funding for the revenue-sharing program, in my capacity both as a member of the House Budget Committee and as a member of the House-Senate conference on the fiscal year 1984 budget. As far as I am concerned, there are several compelling reasons for the continuation of this program which provides "no strings attached" dollars for the localities and, indirectly for State governments, as well.

Localities get money from three sources—local taxes, State aid, and Federal aid. Just as the recession and the Reagan tax cut have caused Federal revenues to decline, so have they adversely affected the fiscal condition of States and localities. Revenue sharing, in my judgment, represents the most effective and expedient approach by which we can provide a quick fiscal infusion for States and localities.

Periodically, groups such as the National Governor's Association or the National Conference of State Legislators provide Congress with a fiscal snapshot of State and city budgets. State budget balances, according to the National Governors Association, will reach an all-time low at the end of fiscal 1983. In fiscal 1983, the State balances are expected to total $345 million and, if Texas is excluded, the remaining 49 States would be in deficit. Almost every State in the Union has a constitutional requirement for a balanced budget; thus, unless States receive additional Federal aid, tax increases and further service cutbacks will be the order of the day. Already, NCSL reports, 24 States have enacted tax increases this year; 27 States have cut spending; 18 States have engaged in massive layoffs of State employees; and, many others have placed limits on personnel hiring.

In essence, State budgets are beyond the point of being snare tight—they are broken; cutbacks are occurring; services are being reduced, and the quality of our constituent's lives are being threatened. In my judgment, revenue sharing represents one of the most potent and appropriate forms of recession relief this Congress can produce.

There are enormous unmet needs in the land.

A recent Conference of Mayor's survey showed that health, employment, and senior citizen services are the human services most widely cut because of reductions in Federal aid. From fiscal year 1981 to fiscal year 1983, city expenditures for these programs fell by 52 percent, 68 percent, and 12 percent respectively. And the conference reports that its membership could only meet 43 percent of the demand for emergency services in fiscal year 1982. Cities and counties have had to reduce sharply spending for construction and maintenance of infrastructure, the economic life support systems of our Nation. In fact, construction spending by State and local governments fell 9.4 percent in 1981 and 7 percent in 1982. A further decline is projected this year. We cannot delay making the kinds of needed investments in our Nation's economic future which infrastructure spending represents. Once again, we find that general revenue sharing is one of the most efficacious means by which we can fund these kinds of projects.

Mr. Chairman, I congratulate again the chairman of the Government Operations Subcommittee on Intergovernmental Relations, the gentleman from New York (Mr. WEISS), who has proven himself to be a great friend of the urban areas of our Nation. This is an outstanding bill and I would urge my colleagues to give it their full support.

Mr. HORTON. Mr. Chairman, this is a very important amendment.

Mr. Chairman, the amendment I am offering is needed to bring this bill in line with the first concurrent resolution on the budget adopted by this Congress. I am offering this amendment on behalf of myself and Mr. JONES, chairman of the House Budget Committee. The Government Operations Committee reported out H.R. 2780 on May 11 of this year, in order to meet the Budget Act deadline on spending bills. At that time, only the House had completed action on the first budget resolution. In that House-passed budget resolution, there was with the proper budget function an allowance for an annual increase of $800 million. On this basis, the committee reported a bill under this budget ceiling and increased the program by $731 million per year for 5 years.

Since that time, action of the first budget resolution has been completed, and it allows for only a $450 million increase in the program. My amendment would reduce the increase in H.R. 2780 to that level in order to bring it in line with the budget resolution. In other words, my amendment would reduce the increase from $731 to $450 million, so there is an increase, but it is only the amount that is included in the budget resolution that was adopted.

The administration has stated in the strongest possible terms its opposition to any funding increase.

Following my amendment, the gentleman from California (Mr. MCCANDLESS) is going to offer an amendment to reduce my amendment to the present level of $4.6 billion.

A letter to myself from OMB Director Stockman, which I earlier entered into the RECORD, unequivocally stated that he and the President's other senior advisers would recommend the President not sign the bill with the funding increase.

Yet, local officials across the country are faced with a very difficult fiscal situation brought on by the combined effects of recession and inflation. They correctly note that the fuding level for the local share of revenue sharing has remained at $4.6 billion since 1976. Since that time, the real value of that 1976 dollar has declined nearly 50 percent.

The funding increase permitted in the first concurrent resolution on the

budget of $450 million per year in my judgment strikes a balance between these two positions. While not granting the increase that would be needed to fully compensate for the effects of inflation, it does provide for a very modest level of program growth.

I believe that my amendment meets, as best as possible, the competing interests of all interested parties and I urge Members to support my amendment.

Mr. JONES of Oklahoma. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I will be glad to yield to the gentleman from Oklahoma (Mr. JONES), the coauthor of the amendment.

□ 1830

Mr. JONES of Oklahoma. Mr. Chairman, I thank the gentleman for yielding.

I strongly urge that this amendment be adopted.

Mr. Chairman, on some other amendments that will be offered to this legislation, I may be speaking on them, but it will be from a personal perspective or as a Representative of the First District of Oklahoma.

On this particular amendment, I speak from an institutional perspective as chairman of the House Budget Committee.

The general revenue-sharing program that is brought to the floor is over the limits set in the budget resolution which the House and the Senate adopted just a few weeks ago. It is over by nearly $300 million.

This amendment, offered by the gentleman from New York and myself and others, will conform this legislation to the limits of the budget resolution.

This bill is a test of our willingness not just to make budget plans, but to implement them.

The CHAIRMAN. The time of the gentleman from New York (Mr. HORTON) has expired.

(By unanimous consent, Mr. HORTON was allowed to proceed for 2 additional minutes.)

Mr. HORTON. Mr. Chairman, I yield further to the gentleman from Oklahoma.

Mr. JONES of Oklahoma. But to implement them in concrete individual spending decisions. I think the House can be proud of the record we have established so far this year in that every attempt to brech the budget ceilings has been defeated. We held the line on the amendment to eliminate the reform in Federal pension programs. That was defeated.

The excesses in the supplemental appropriations bill were defeated.

The housing authorization, which was over the limit, was brought back under the budget ceilings.

This is another opportunity for us to show not just rhetoric, but concrete action that we are willing to live by a budget plan, live within the restrictions of those budget ceilings.

Mr. Chairman, I strongly urge that this amendment be adopted.

Mr. WEISS. Mr. Chairman, will the gentleman yield to me?

Mr. HORTON. I am glad to yield to the gentleman from New York.

Mr. WEISS. Mr. Chairman, I thank the gentleman for yielding to me.

I want to commend the gentleman and express my support of his amendment. Of course, there was no attempt to breach any budget ceilings. What the subcommittee and the committee did was to adopt the legislation initially within the framework and parameters of the first budget resolution as adopted by the House.

Since then, the budget resolution that was reported out of conference and adopted by the House was reduced to a $450 million increase, where as originally it was $800 million.

The amendment of the gentleman seeks to conform the bill to that existing figure and I support the gentleman in that effort.

Mr. HORTON. Mr. Chairman, I thank the gentleman for his support.

Mr. DONNELLY. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Massachusetts.

Mr. DONNELLY. Mr. Chairman, I thank the gentleman for yielding.

I would like to associate myself with the gentleman's remarks, the remarks of the chairman of the Budget Committee and the remarks of my good friend, the gentleman from New York, the chairman of the subcommittee.

I chair the Task Force on Entitlements, Indexing, and Uncontrollables on the House Budget Committee. In the 3 years that I have served on that committee, it does not take a lot of investigation to understand the enormity of the problem in the entitlement area.

The CHAIRMAN. The time of the gentleman from New York has again expired.

(At the request of Mr. DONNELLY, and by unanimous consent, Mr. HORTON was allowed to proceed for 2 additional minutes.)

Mr. DONNELLY. Mr. Chairman, will the gentleman yield further?

Mr. HORTON. I yield to the gentleman from Massachusetts.

Mr. DONNELLY. You need not serve on that committee very long to understand the enormity of the problem that we have in the entitlement area. In the decades of the seventies, from 1970 to 1980, entitlements have grown at a rate of over 450 percent.

From 1970 to 1982, the entitlement programs as a percentage of our total outlays have grown from about 30 to 50 percent.

Sooner or later this institution is going to have to deal with the enormity of that problem, the political reality of that problem.

Now, I understand very well the political reality of revenue sharing, but I think this is a test. It is a test of our willingness after all the speeches we give that it is so necessary for us to restrain Federal spending. This is one of the first tests that we have had since the passage of the budget resolution, whether this Congress has the will.

I congratulate my friend, the gentleman from New York, for presenting this amendment, and I congratulate my friend for supporting this amendment. I hope it is unanimously adopted.

AMENDMENT OFFERED BY MR. M'CANDLESS TO THE AMENDMENT OFFERED BY MR. HORTON

Mr. McCANDLESS. Mr. Chairman, I offer an amendment to the amendment.

The Clerk read as follows:

Amendment offered by Mr. MCCANDLESS to the amendment offered by Mr. HORTON: On line 4 of the matter proposed to be inserted by the amendment of the gentleman from New York, strike out "'$5,016,700,000'" and insert in lieu thereof "'$4,566,700,001'".

Mr. McCANDLESS. Mr. Chairman, the amendment I am offering would basically eliminate the increase in the entitlement portion of revenue sharing contained in the bill before us. H.R. 2780 increases local revenue sharing by $731 million per year for each of the 3 years of its authorization. My amendment provides for only a $1 annual increase in the program. This $1 increase is to satisfy some technical, parliamentary requirements of the House.

I must oppose this increase, or for that matter, any increase for two basic reasons. First, all of us are keenly aware of the enormous deficits we are now facing. The recent midseason budget review, conducted by the Office of Management and Budget, showed projected annual budget deficits in excess of $150 billion for the foreseeable future. For this Congress to add to that deficit by increasing the entitlement spending in this bill by over $3.6 billion is financially irresponsible. If we cannot hold the line on spending and vote down this increase, we will be giving a dark signal to the financial markets that we are unwilling to take the tough actions to bring down the deficit. In this way, we will be voting to guarantee higher interest rates and possibly retard the economic recovery now underway.

There is another consideration to vote down this large spending increase. The President's senior advisers have said in the sternest possible terms that if this bill is presented for the President's signature and it contains any funding increase, they will recommend to veto it. If that happens, we will have turmoil on our hands,

with local governments unable to act on their own budgets. In the end, we may see the demise of revenue sharing.

The best thing this House can do, both in terms of fiscal prudence and to insure the continuance of this important program, is to support my amendment and pass a bill with the present $4.6 billion funding level.

Mr. NELSON of Florida. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Florida.

Mr. NELSON of Florida. Mr. Chairman, I thank the gentleman for yielding.

I rise in support of the amendment of the gentleman from California. I do so full well realizing that a number of my mayors and city councilmen and county commissioners have called. The argument that I present to them is that the bill before us presents a 16-percent increase for general revenue sharing. Since the inception of this program over the last decade, we have seen a level of funding of $4.6 billion nationwide for this program.

I understand that local governments have less flexibility in raising revenue locally—the property taxes are relatively inelastic as a source of revenue. They have come to rely on revenue sharing as a source of revenue that is built into their budgets.

As a matter of fact, local governments are planning their budgets for next year and have counted on general revenue sharing of $4.6 billion, or the same amount that they received last year.

Now, it seems to me that we are at a question of setting financial priorities. We must draw the line. In the face of $200 billion deficits, and when the Federal budget is awash in red ink, we ought to draw that line.

In the alternative, were the amendment of the gentleman from California not to succeed, I would certainly support the amendment of the gentleman from New York and my chairman of the Budget Committee, the gentleman from Oklahoma, to keep it at the level of the budget resolution.

Mr. WEISS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I think we really ought to think a little bit about the basic concept of general revenue sharing as a program. It is not as if we in all of our largess as the Federal Government are giving people something that was the Federal Government's to begin with.

□ 1840

What we are doing is giving people back something which was theirs to begin with.

Need I remind this body that the revenues which we spend and expend come from people back in the localities? Since this program was adopted in 1972 and the localities were authorized to receive these entitlements there has been one single $200 million increase in 1976. The value of the program has eroded to the point where that $4.6 billion is in fact worth $1.9 billion in 1972 dollars.

There has been a 135-percent erosion in the value of that money.

What we attempted to do originally in the subcommittee and the committee was to provide for an increase to cover inflation since 1980 only, an amount of 16 percent, or $733 million.

The gentleman from New York (Mr. HORTON) in order to come within the framework of the budget resolution, is now moving to cut that back to $450 million, a 10-percent increase, almost reduced to half of the inflationary increase since 1980.

Since 1980 local governments have had their entitlements and their categorical programs cut back by estimates ranging from $13 to $40 billlion. Half of the cities in the United States had to cut their job forces in 1982. Nearly three-quarters of them had to raise taxes in 1982.

It is not as if you are talking about giving money to those who are living in luxury. What we are doing in this situation is not even keeping pace with inflation since 1980.

To adopt the amendment of the gentleman from California (Mr. MCCANDLESS) is in fact to demonstrate our total disregard of our people and our communities back home who are struggling to be able to provide basic services to their constituencies which are also our constituencies.

I would urge a defeat of the amendment offered by the gentleman from California.

Mr. WALKER. Mr. Chairman, I move to strike the requisite number of words and rise in favor of the McCandless amendment.

Mr. Chairman, we heard a lot of good arguments here a few minutes ago about why we need to do something about capping uncontrolled Federal spending. Here is a good place to place the cap.

We can place the cap right at the current funding level at $4.6 billion by adopting the McCandless amendment. It is the responsible route to go.

There is no doubt that the local governments that came in and appeared before our subcommittee made it quite clear that they would like the additional money. Sure they would. No doubt about it.

However, they also made it rather clear in most instances that they could survive on the present funding levels, that what they really wanted was reauthorization of this program and to continue the funding flow at something approximating present levels.

That is what we can do with the McCandless amendment. We can assure that we do not add on to the deficit, that we can assure that we continue this very worthwhile program, but we do it at a responsible funding level.

So I would hope that the Members would support the gentleman from California, Mr. MCCANDLESS, in his effort to limit the spending in the upcoming 3 fiscal years to $4.6 billion.

I yield back the balance of my time.

Mr. FRANK. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I understood the need for the amendment offered by the gentleman from New York, the ranking minority member of the committee, Mr. HORTON. I think it was a useful move and I hope the House will proceed to act on it.

But I think the additional amendment offered by the gentleman from California (Mr. MCCANDLESS) is a mistake. As the chairman of the subcommittee (Mr. WEISS) pointed out, the figure that we would be at, if the gentleman from New York's amendment were adopted unchanged, would be the budget figure. So it is a figure which we have been using in our estimates of the deficit.

The question then, it seems to me, is of the various and competing claims for Federal expenditure, how much do we think of those that are made by the people who live in our urban and rural government areas, because these are not funds which in my judgment go as gifts solely to the Government. They go I think to purchase services.

My own sense is, as I look at how money is spent by the various levels of government, that the local governments, the counties, the recipients of these revenue-sharing funds, spend them at least as well as we spend ours.

I know one is supposed to believe in the inherent superiority of whatever level of government one happens to be serving in at the moment, but I do not think objectively a case can be made that we spend the money so much more sensibly at the Federal Government level that it is somehow irresponsible to make this available to local government.

Indeed, at times like this I think local governments have done an important job, for instance, in trying to provide employment for a wide range of people and they provide a level of services. Local governments do not do the more interesting and controversial and exotic things. They do police service, they do fire service. They do sanitation. They do things about which there is a broad consensus.

Obviously we do not want to see money spent unnecessarily. But I think sometimes analogies are helpful.

Let us not think of this just as revenue-sharing programs. Let us think of it as something we would call the TIK program, or taxation in kind, in which

we would send back to local governments some revenues so that they would not engage in taxation at the local level.

Then I would simply propose that we let the TIK program grow at the same rate as the PIK program, or even that we let it grow at one-quarter of the rate of the PIK program.

My point is those who have been voting enormous amounts of money in a very short period of time to give people cotton so that they would not grow cotton, so that we can give them back the cotton that they did not grow in the first place, it seems a little bit hard on the cities and the people who are living in the cities, and the counties, and the people who live there to say that we are going to begrudge them the figure that was voted in the budget for police services, fire services, and other services.

I would agree with the gentleman from New York that we ought not to be exceeding the budget figure. But to say that there should be no increase at all in the amount of money that we provide out of the Federal taxation pot to help with the services that are provided locally seems to me unjustified.

The level of taxation is only one question. The other is the type of taxation.

As you look at the kind of taxes that are leveled in this society, I think the Federal income tax, with all of its problems, is still preferable from the standpoint of equity, efficiency, impact on the economy, to the kind of taxes that many local governments have to raise.

The question is: Are we prepared to be cooperative to the extent that the budget resolution proposed?

It is a relatively small increase that we are offering in the bill as voted out by the committee to the local governments. The amendment offered by the gentleman from California would say that the local governments do not get an extra penny, that other areas of the Federal Government will increase and increase and increase and increase, but we would not vote an extra penny of Federal taxes to help local communities with police services, fire services, education.

I will close with this. With all of the talk we have about helping education, and obviously money alone is not the answer, but neither is its absence, general revenue sharing, adequately funded with the minimal increase over the past years that this bill has, will in fact I think provide more money to help educate children than anything else that we are talking about doing this year.

So I hope the amendment of the gentleman from California will be defeated and the underlying amendment offered by the gentleman from New York will be before us.

Mr. SOLOMON. Mr. Chairman, I move to strike the requisite number of words and to speak for the amendment offered by the gentleman from California (Mr. MCCANDLESS).

The first thing I want to do is commend the gentleman from New York (Mr. HORTON) for the excellent job that he has done in bringing this bill to the floor, because the truth of the matter is revenue sharing is one of the finest Federal programs that we have ever had. It is truly a New Federalism program that President Reagan has been selling right from the very beginning of his administration when we talk about block grants with no strings attached. That is what it is.

I speak as a former town supervisor, as a former county legislator, a former State legislator, and the program is a good, working program.

Second, I want to commend the gentleman for offering his amendment to cut back on the increases to the level of the budget which passed this House.

But with all due respect to the gentleman from New York, we still are increasing spending by more than half a billion dollars over last year's level. Ladies and gentlemen, we just do not have that money.

When I was just a young boy I could recall reading about Everett Dirksen, the leader in the other body, saying that, "You know, we talk about a million here, a million there, and pretty soon we are talking about a lot of money." You know that we do not talk about millions here on this floor anymore. We talk in billions and billions and half billions, and this is another half billion increase.

I can recall back in 1980 when we debated at great length whether or not to continue State revenue sharing. At that time, I think there was one State that had a deficit and all of the rest of them, including New York State, where I come from, had surpluses of one kind or another.

At that time we decided because of the deficits that the Federal Government was running and because of the accrued deficit that we had built up over the years that we did not have any surplus to give to the States at that time, and we did away with it.

I do not think we ought to do away with local revenue sharing at the local levels because I think it is a valuable program. But the truth of the matter is we cannot afford to increase this by a half a billion dollars.

□ 1850

I hear people come in this well and they say well, you know you can blame these huge deficits on Ronald Reagan. Well, you know if it were up to Ronald Reagan we would cut spending and that would be the third leg of Reaganomics that we have not been able to cope with. Let us look at Reaganomics for a minute, because we do not hear about it anymore. We used to hear tirades on this side of the aisle every day until it started to work. Because all Reaganomics was just three things; it was cutting taxes and pumping money back into the private sector and into the pockets of the people so they could either spend it or save it and either way it was good, because if they spend it, it created demand for goods, which created jobs; if they saved it, it made investment capital available so that small businesses could thrive in this country and create jobs. You know cutting those taxes worked. Then cutting spending. We did, we did not cut back on any Federal programs; of all the 300 Federal programs all we did, back in 1981, was stem the growth of those programs and that worked. And the third leg of the Reaganomics was regulatory reform and we have lived up to that too, because whereas American business and industry used to be saddled with more than $100 billion in administrative redtape, we managed to reduce that Federal Register from a foot thick to about half of that and that means we have relieved business and industry of $25 billion of regulations that were unnecessary, duplicative, or that we just could not afford. So, the truth of the matter is if we want to see this recovery continue, we have to continue controlling the growth of spending. I represent a rural district in America, the district is 220 miles long, approximately 11,000 square miles, with hundreds of towns and villages and a lot of counties.

And I am willing to go back home and tell them, listen, I know you have a need for money but we cannot reduce the deficits as long as we keep adding a half billion dollars here and a billion dollars there to the uncontrollable deficits we already have and, ladies and gentlemen, that is what we have done with every single authorization and appropriation bill that has come before this House and will come before this House between now and September 30 regardless of that budget resolution which already calls for increases throughout the entire budget.

So, I appeal to you, stand up, you can talk to your people back home. Let us be fiscally responsible and let us make the third leg of Reaganomics work, controlling the growth of spending, then everybody in this country will prosper.

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of words.

Mr. Speaker, I was not going to speak on this amendment but in response to some of the other comments I would like to say a few words. I am a former city councilwoman and I know in my area and other areas around the

country the kinds of issues that people really relate to, issues that my friend from Massachusetts mentioned; that is the issue of safety. People were always asking for more police protection, for more fire protection in those areas.

These are the kinds of programs that relate to general revenue sharing. Our areas do not have enough of the resources to provide the necessities that our people need.

So no other program really provides as intimately and as specifically as the kinds of programs that evolve from revenue sharing.

And I think the American people want our tax dollars to be spent in those kinds of methods.

And I heard my friend, the previous speaker, just talk about where are we going to get half a billion dollars? Well, I can tell you where. Why do we not just go after some of the cost overruns in the Defense Department? I never hear too much about the cost overruns. One project that I recall mentioning on the floor last year was the helicopter project that had a cost overrun of $4.6 billion. Nine times more than the amendment of the gentleman from New York.

There are moneys available and there are areas where we can get the half billion dollars if we are reasonable. I honestly think, that the American people would rather have more police protection, more fire protection, than giving some lucrative defense contract to a large corporation or, indeed, a foreign country which is where 10 percent of the contracts for defense go to. This is something that relates to the average American. We ought to increase these funds. We ought to say, "Here are some funds that you can actually, visually, and specifically take advantage of" and this is why revenue sharing is so important to our local communities.

It seems to me, when one is here in Washington one loses sight of the immediate needs of the people back home. I hope we do not lose sight of what our American people's needs are. There is really a cry for more safety, more of the programs that our cities and our rural areas can give to their people. So, let us not cut them off, let us really try to give our people what they specifically want and that is what revenue sharing is all about.

And let us cut the budget, let us really get into balancing the budget. Let us cut down on the defense contracts that have cost overruns, let us say "you cannot spend more for weapons than they should cost" and let us cut down on giving all the tax breaks to the rich. That would really relieve our budgetary and deficit difficulties. We all know that.

So, let us not pretend that this revenue-sharing amendment, the original amendment is really responsible for the deficit that we have. The amendment by the gentleman from New York does not add to the budget resolution which we passed. It conforms to it.

Mr. MICHEL. Mr. Chairman, I move to strike the requisite number of words and I rise in support of the pending amendment.

Mr. Chairman, when revenue sharing was first initiated in this House there were proposals for both general revenue sharing and special revenue sharing. I supported the concept. I made the comment at the time, however, that we were building into the whole system an automatic lobbying effort from around the country, from State governments all the way down to the lowest level of government, on behalf of a perpetuation of the program. That is well and good. Now we are at the juncture, however, where we have to make a decision as to whether or not all these different levels of government are in better financial shape as a block than the Federal Government. And I submit today that the Federal Government is in a lot worse shape than every other level of government out there. And when township officials came to me earlier in the year asking whether or not revenue sharing would be extended, my judgment call was "Yes, it will be, but do not get too greedy and ask for too much because we have much more of a financial problem than you all do and we do not need to subject ourselves to a Presidential veto," or some other impediment to the program.

So, I urge support for the McCandless amendment, which would in essence continue the current level funding for the next 3 years.

We all know that many localities are having difficulties making ends meet. So are many States. But the one level of government having the most difficulty, by far in this regard is the Federal Government.

We are thus certainly in no position to be bailing out other levels of government. When we are facing deficits of upward of $200 billion ourselves. We are already seeing interest rates edging up again as a result of these deficits. If we continue to spend as if there is no end in sight, we will virtually guarantee continued high interest rates and an early end to economy recovery.

The States and localities are in the straits they are in today because of the recent recession. The best way to improve their financial condition is through continued economic recovery and lower interest rates.

We do the localities far more good by insuring continued economic recovery rather than by parceling out a few more goodies from the Federal gravy train.

The committee revenue sharing bill will increase Federal expenditures by $2.1 billion over the next 3 years. The congressional budget resolution level will result in increases of nearly $1.4 billion over that timeframe. Both increases are far too much.

When States and localities face a financial crunch, they find ways to cut spending, often to the bone. Why is it that we cannot do the same thing? We cannot even seem to limit spending to current levels.

It is time to get our house in order, just as the States and localities are getting their houses in order. The McCandless amendment would help us do that, and should be adopted. Failure to effectively restrain Federal spending and reduce these horrendous deficits will only lead to a repetition of our recent experience.

I trust that no one wants to go down that path again.

Mr. SLATTERY. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, since coming to this body several months ago, I have become convinced, that the No. 1 threat to the future of our country is the size of our national deficits. I would just point out that it seems as we progress in our deliberations that little is done to really approach the problem on the spending side. I know and I think the majority of the Members of this body know that if we are going to be serious in dealing with the deficit problem, at some point we are going to have to deal with not only the spending side but we are also going to have to deal with the revenue side. Tonight I think we have the opportunity to put about $450 million in the bank in our effort to deal with the spending side. I would also point out that as I traveled around my district the common comment that I received from locally elected officials was that they were not expecting more money, they were just asking how much less money they were going to receive.

□ 1900

I would submit to my colleagues that if we in fact are able to provide them with the same level of funding they received last year, they will be satisfied and understand that we all must contribute to the solution to our budget crisis.

Beyond that, I would say that the choices we have to make, if we are going to deal with the deficit problem, are not easy choices. They are indeed hard choices. And the choice this evening, I would submit, is not the choice between whether we increase revenue sharing, but rather, whether we are going to be able to take this $450 million and fund some of the desperately needed programs that we are going to have to deal with later on. Perhaps health insurance benefits for the unemployed. These are the kind of

tough choices we have to make. Where else can we cut to fund those programs we have to fund in this time of deep recession.

So, Mr. Chairman, I would strongly urge that my colleagues exercise this opportunity to put $450 million in the bank, so that it is available to meet our needs later on and at the same time reduce the desperate deficit situation that our country is facing.

Mr. BARTLETT. Mr. Chairman, I rise in support of the McCandless amendment.

Mr. LOWERY of California. Mr. Chairman, will the gentleman yield?

Mr. BARTLETT. I yield to the gentleman from California.

Mr. LOWERY of California. I thank my colleague from Texas for yielding.

I thank the gentleman from California for his amendment.

As a member of the committee and a former county supervisor from Riverside, California, I have just a couple of questions of clarification.

I understand that under current law local governments may spend funds for any purpose which is a permissible use of the government's own funds when its laws and the laws of its State as long as it corresponds to those requirements; is that correct?

Mr. McCANDLESS. Mr. Chairman, will the gentleman yield?

Mr. LOWERY of California. I yield to the gentleman from California.

Mr. McCANDLESS. I thank the gentleman for yielding.

In my 12 years in county government, that is correct.

Mr. LOWERY of California. So the funds are not required by law to be earmarked for any specific purpose.

Mr. McCANDLESS. That is correct.

Mr. LOWERY of California. Nor is there any predescribed or prescribed set percentage of funds received required to go for any specific purpose?

Mr. McCANDLESS. That is correct.

Mr. LOWERY of California. I thank the gentleman for this colloquy.

Mr. McCANDLESS. I thank the gentleman.

Mr. BARTLETT. Mr. Chairman, I rise in support of the McCandless amendment. I am not a member of the committee, but I am a former member of a city council. And I understand, as many do in this country, the effectiveness of general revenue sharing at the city and county levels. But I also understand the devastation of negative revenue sharing: The negative revenue sharing of double-digit inflation and interest rates that are so high that cities cannot sell their bonds in order to build their infrastructures.

I rise in support of the McCandless amendment, Mr. Chairman, because that would continue general revenue sharing at a level funding, at predictable funding. The fact is that the most generous revenue sharing this House could pass would be a stable Federal budget, and a Federal budget under control to eliminate the erosion that another Member spoke of, that erosion in spending power that is caused by inflation, and by interest rates, that during the late 1970's and early 1980's, were so high that cities could not operate and could not rebuild their infrastructures.

The point is, the most effective general revenue sharing we could pass is a balanced Federal budget. The further point, as the gentleman from California stated so eloquently, and I commend the gentleman, is that in fact an increase in revenue sharing is not likely to become law. And so for this House, for those of us who are for revenue sharing, we should vote for the McCandless amendment. And if we are against negative revenue sharing of inflation and interest rates that cripple cities far more than we can help them, we should vote for the McCandless amendment.

Mr. TOWNS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I think what we are really talking about here is not funding at the same level. Let us be honest. If we are talking about giving the same amount of money that they received in 1980, we are talking about a cut. We know that inflation has taken place. This committee had hearings across this country, the various county execs were saying that they were having a very difficult time. In 1980 the States did not have the problem that they have now. Almost every State in the United States has a deficit.

So it points out that they are struggling.

The money is being used to bring about more police, more firemen. We are talkng about safety. And to sit here in this room and act like we are not talking about people, we are talking about money that is going to be used to help people, I find that our priorities are upside down.

I am also concerned about budget cuts. I am also concerned about saving money. But I do not think this is the route to go. There are other things that we can do to cut the deficit.

As my colleague from Ohio mentioned earlier, talk about the Defense budget. That is an area you can go and get some of that money back. But we are not talking about that. We are talking about saving lives and helping people, then for some reason or another we talk very loosely about it. I would hope that you would give revenue sharing the same support that the Defense budget received.

I am hoping that we do not make the same mistake that we have made so many times in this House. We made a mistake early on and now we have a chance to correct it now, we have a chance to support the Horton amendment and I suggest that this is the route to go to make certain that municipal governments will be able to continue to function and the lives of people will not be put in jeopardy.

So I hope the Members in this House and everybody of good will will come forward and support the Horton amendment and not the McCandless amendment.

Mr. MAVROULES. Mr. Chairman, will the gentleman yield?

Mr. TOWNS. I yield to the gentleman from Massachusetts.

Mr. MAVROULES. I thank the gentleman for yielding.

I want to congratulate the gentleman on the statement he just made. I respect very much what the gentleman had to say on the other side of the aisle when one gentleman mentioned he had served in county government, the other member said he was a city counsellor. And I have the greatest respect for those who serve at that level of government. I also served as a mayor for six terms in a city of 50,000 people. And a known fact is that out of the 50 States, 42 States presently are now contemplating raising taxes to meet some of their problems on that level.

So I want to aline myself with the gentleman's statements that he has made and in support of the gentleman's statement.

Mr. TOWNS. I thank the gentleman.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. TOWNS. I yield to the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding.

Mr. Chairman, I, too, want to commend the gentleman for an excellent statement. And in regard to his comments about the Department of Defense and its funding, it is fascinating to note that here we are trying to get only a portion of the inflationary increase since 1980 and the argument is made that that is increasing the funding for revenue sharing.

When we hear of increases in the Department of Defense funding, however, it is not keyed to keeping pace with inflation. Instead we are told "This is only a 6 or 8 percent increase above inflation."

It seems to me that we ought to have some concern about how we deal with the lives of the people in our communities back home. If my colleagues have not noticed lately, things are getting tough back there.

I thank the gentleman.

Mr. BROOKS. Mr. Chairman, I move to strike the requisite number of words and I rise in strong support of the amendment.

Mr. Chairman, I support the amendment of my friend, the gentleman from California [Mr. McCANDLESS]. The amendment would return funding

for local governments from general revenue sharing to its current level of $4.567 billion per year. Not just a penny or two, that is a pretty good sum. I certainly would prefer a funding level for revenue sharing a little bit lower than $4.567 billion. About $4.567 billion lower would just suit me fine.

But if we are going to reauthorize this program, it does not seem too much to ask the local governments to get by on the same amount of windfall that they have been receiving for the past 7 fat years.

Sacrifices are being demanded of all segments of our society as the Federal Government attempts to put its budgetary house in order. We are asking our elderly to forgo cost-of-living increases. We are cutting back on social and health programs for the neediest of our citizens.

In the light of these fiscal realities, it does seem to me that our local governments could do their part by receiving only the $4.567 billion that they currently receive instead of a larger, even more unjustified amount.

I urge my colleagues to support this amendment.

Mr. LEVIN of Michigan. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment.

Mr. Chairman, some serious points have been raised here and I would like to address them briefly.

First of all, there has been reference to the budget and to the budget deficit. As has been emphasized here, this increase is included within the budget resolution passed by this House.

□ 1910

And I think that should be taken into account by everyone who votes on this matter, whether they were for or against the budget resolution.

The budget resolution provided for a deficit lower than that presented through the administration's budget.

Second, I would ask: Why renew it at its present level? Why not, if you want to cut the budget, have the courage of your convictions, if you want to cut it this way, and move to reduce it to $3.6 or to $2.6 billion.

Mr. McCANDLESS. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentleman from California.

Mr. McCANDLESS. Mr. Chairman, let me share with the gentleman a couple of thoughts, as a fellow who worked very hard in county government full time for 12 years.

All of the budgets have been put to bed in California currently, to the best of my knowledge—at least in my district they have—based upon the assumption that the Federal Government will fund the current program at the current level and that there would be no further cutbacks on that particular program.

There is no illusion of grandeur on the part of anyone in local government in the State of Califonria that the big brother on the Potomac is going to come up with another bag of gold over and above that that he already has.

So I leave that with you for whatever thought value it may have.

Mr. LEVIN of Michigan. Mr. Chairman, I appreciate the comment of the gentleman from California. As someone who was in county government for a few years, I understand that the budget process works that way. But then cut it not for this fiscal year, but the next, if this is not an important item. Say $4.6 billion this year and $3.6 next year.

I think the truth of the matter is that this is an important program. And all that this increased amount provides for is some reflection of inflation. All we will be doing is supporting local government in the next 3 years at the same level, in terms of real dollars, as in previous years—actually less, when you take into account inflation over the years.

The last point—and I think all of these have been raised seriously and deserve consideration—relates to the so-called negative revenue-sharing argument.

My colleague, the gentleman from Texas, has mentioned that, and I very much believe in his dedication to the importance of local government. But if you are going to compare deficits, it seems to me that it is only fair to take into account what has happended to State and local governments these last few years. We are not renewing revenue sharing in 1983 in the same circumstances as it was renewed several years ago. And that factor has been mentioned by several people earlier.

And let me just elaborate a bit: Of the 50 States, 47 are experiencing revenue shortfalls totaling $7.9 billion below their budget estimates. During 1982, 14 States raised the personal income taxes; 14 raised their sales taxes; 6 increased their corporate income taxes; 12 increased their motor fuel taxes, et cetera, et cetera.

So I would urge that we defeat this amendment. If we believe in the vibrancy and the importance of local government, we should put them at least next year and the 2 years thereafter in the same position, in terms of real dollars, as they have been the last few years, or at least something close to it. This is not a profligate sum we are suggesting, and I heartily urge all of my colleagues to vote in favor of this modest increase and in opposition to the amendment of the gentleman from California.

Mr. STAGGERS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I rise in opposition to this reduction of funding revenue sharing payments to local governments to the current level.

In West Virginia we are facing unemployment at more than 17 percent, so the local governments can ill afford the reduction at this time.

Also, I would like to point out that what revenue sharing does—at least in West Virginia—is to help to supplement existing programs. It does not go just for Federal programs, but it does help to supplement these programs. Also, it does allow for discretion at the local level, which I think is an important function.

Mr. Chairman, there can be no doubt that over the past 11 years revenue sharing has provided the local governments with critically needed funding. But still, over the same period—I know it has been pointed out here earlier—the purchasing power of the grants has decreased by 135 percent as a result of inflation. The increase that we are now considering will help to restore the purchasing power which has been lost since 1980, and I think that is also important at the local level.

Across West Virginia's Second Congressional District, with which I am most familiar, revenue sharing has continued to provide local governments with the means of insuring essential community services. For instance, Mr. Chairman, the law enforcement agencies funded with revenue sharing insure that my citizens are safer, the local health services made a reality by revenue sharing insure health care for those who would be otherwise unable to care for themselves. Also, Mr. Chairman, revenue sharing grants invested in human resources insure the well-being of the elderly of West Virginia, who, in the wake of the worst recession, will be able to take care of themselves.

So, Mr. Chairman, I do speak in opposition. I think that we do need to cooperate with the local governments. As a former State official, I know that that cooperation from Washington is very important.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. STAGGERS. I yield to the gentlewoman from Ohio.

Ms. OAKAR. Mr. Chairman, I want to commend the gentleman for his remarks. I feel the gentleman has poignantly related the problems in West Virginia, which really mirror the problems in so many areas of the country. I would like to just reiterate one point that the gentleman from Michigan just made, which I think bears repeating, that the amendment offered by the gentleman from New York [Mr. HORTON] does not exceed the budget

resolution. It is within the budget that we passed. So all the rhetoric about this exceeding funds, and so forth, is really not quite true. The gentleman's amendment does not exceed the budget resolution. What it does specifically is come up to the budget resolution. That is the spirit of why we passed the budget resolution.

Mr. STAGGERS. I thank the gentlewoman for her comments. I do think that is an important point, because it does go back to the budget resolution. I think that the importance of revenue sharing to the local communities, the rural communities, is a very important element.

Mr. LOTT. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I realize we are getting to the end of the debate on this amendment, and probably all that needs to be said has been said. But I would like to reiterate at least a couple of points.

First of all, as to myself, I was a reluctant supporter, in the beginning of revenue sharing. I was not sure it would work out. I thought there was some credibility to the argument that we did not have revenue to share from the Federal Government, and I just did not know how it would work when it got to the State and local level. But I have to confess that it has worked better than I thought it would. It is a good program, and I support it. I certainly like the idea that it is one of the few programs where whatever money we do send back home, it goes, basically, without strings, and the local people can have hearings and decide where this money is to go without direct instructions from the Federal Government.

However, I have heard a lot of gasps in this city, in the media and on both sides of the aisle about the deficit, the need to do something about it, but the only suggestion I hear in trying to really deal with the deficit is to cut it all out of defense. We cannot get it all out of defense. Nobody wants to cut any program. We do not want to cut education, we do not want to cut transportation, we do not want to cut water programs, we do not want to cut anything—we want to increase them.

In this instance, all this amendment says is: Let us just hold it at the level that it was funded last year.

As the gentleman from Texas, the chairman of the committee, so eloquently stated, we are talking about $4.567 billion here. It is not chickenfeed.

And I, too, have spoken to my elected officials, and they say, "Do not cut out revenue sharing." I respond, "It is not going to happen. But you may have it level funded." They say, "That is OK, we can live with that."

So here is an instance where the officials already recognize they may not get an increase. It is a minimal saving in a program that fundamentally is one we support. And I remind the Members that it was a Republican initiative that started this program. It is the type of program we like, but we cannot stand here and say we have got to cut other programs, we have got to deal with the deficits in these other areas and not be willing to do it minimally, just level funding, in a program that we like.

□ 1920

I urge my colleagues for a variety of reasons, not only because it is meritorious, but to avoid problems down the road, to support this level-funding amendment.

Mr. WALKER. Mr. Chairman, will the gentleman yield briefly?

Mr. LOTT. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Chairman, I just want to make the point that the Horton amendment, while it does come very close to being at the budget level, is slightly above the budget level. It is, in fact, $4 million more than the specific budget level, so the statement that was made that it is within the budget level, it is about $4 million more.

Mr. WISE. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Harking back to the remarks of the previous speaker from West Virginia, who I think eloquently stated the problems both in our State and in the third district, I would just like to add something.

I have heard some remarks about fat years for the States. I have heard something about no tax effort, something about how the States and local governments and country governments have not really been doing the work themselves and are not cutting the mustard.

I would just like to continue a little bit with what has been happening in West Virginia. For instance, we now stand as one of the States with the highest personal income taxes per thousand dollars of income of any State in the Nation. We are at least up to and usually excelling any of the taxes that people traditionally pay. Our State legislature in the last session enacted $155 million worth of new taxes.

The public employees in our State, and teachers, have not gotten a pay raise in 2 years. It is questionable whether they will get one next year. We now have public employees' salaries for teachers 48th in the country, for public employees 50th in the Nation.

So I say to you that we have a high tax effort and diminishing resources. Somebody said, "Well, you are not making enough of an effort." Well, it has been a hard time. Oh, and I forgot also the highest unemployment in the Nation, and while it is running 17 or 18 percent statewide, in 7 of my 14 counties that I represent it is now over 30 percent.

So I say revenue sharing and the very modest increase that this amendment would strip us of is desperately needed. A 135-percent increase in cost-of-living expenses in the past few years, and yet no increase in revenue sharing. Therefore, I would urge rejection of the gentleman's amendment.

Mr. WILLIAMS of Ohio. Mr. Chairman, will the gentleman yield?

Mr. WISE. I certainly yield to the gentleman from Ohio.

Mr. WILLIAMS of Ohio. I thank the gentleman for yielding.

Mr. Chairman, if the gentleman liked the proposed increase in revenue sharing, he is going to love the Williams amendment.

Mr. WISE. I really like that Williams amendment and am looking forward to speaking on that.

I would just like to finish one other part. I heard a while back someone say, "You do not hear much about Reaganomics on the other side of the aisle." I think I have just given you a nice recitation on Reaganomics. But I would just like to say I do not hear much about that balanced budget from the other side of the aisle.

So while we are talking about not hearing much about Reaganomics, I would like to hear why the budget is not balanced since you have gotten the spending cuts you needed, you have gotten the tax decreases that you desperately wanted, you held onto the third year of the tax cut. How come it ain't gravy, fellows?

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. WISE. I will be happy to yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding.

Mr. Chairman, I asked the gentleman to yield so a correction could be made here.

The figure that I cited earlier, evidently one figure was rounded off and the other figure was not. The Horton amendment does, in fact, come in right at the budget figure, and I did not want my previous statement to stand on the record.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. McCANDLESS) to the amendment offered by the gentleman from New York (Mr. HORTON).

The question was taken; and the Chairman announced that the ayes appeared to have.

RECORDED VOTE

Mr. WEISS. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 176, noes 248, not voting 9, as follows:

NOT VOTING—9

Bosco	Hansen (ID)	Weaver
Erlenborn	Heftel	Wilson
Garcia	Jeffords	Wright

□ 1940

Messrs. SKELTON, BATEMAN, ROWLAND, WORTLEY, FOLEY, PRICE and HANCE changed their votes from "aye" to "no."

Mr. DANIEL, Mr. JENKINS, Mrs. SCHROEDER, Mr. WIRTH, and Mr. BEILENSON changed their votes from "no" to "aye."

So the amendment to the amendment was rejected.

The result of the vote was announced as above recorded.

Mr. BROOKS. Mr. Chairman, I rise in support of the amendment to lower the funding level for revenue sharing to the figure contained in the first concurrent resolution on the budget. It goes without saying that a funding level of $5.017 billion, in my opinion, is still too high. It is still a substantial, unwarranted, and indefensible increase over the current funding level. Any increase is just more deficit spending. But, the funding level in the Horton amendment will at least show some degree of restraint on our part and will also show that we are attempting to stay within the guidelines that we as a Congress set for ourselves in adopting the budget resolution.

I urge support for this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from New York (Mr. HORTON).

The question was taken; and the Chairman announced that the ayes appeared to have it.

RECORDED VOTE

Mr. DE LA GARZA. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 381, noes 43, not voting 9, as follows:

NOT VOTING—9

Bosco	Heftel	Wilson
Erlenborn	Jeffords	Wright
Hansen (ID)	Weaver	Young (AK)

□ 2000

Messrs. GRAY, COYNE, DYMALLY, and DAVIS and Mrs. COLLINS changed their votes from "aye" to "no."

Messrs. TORRICELLI, RALPH M. HALL, GUARINI, and LEVINE of California changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. WILLIAMS OF OHIO

Mr. WILLIAMS of Ohio. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WILLIAMS of Ohio: Page 2, after line 17 insert the following new section (and redesignate the succeeding sections and references thereto accordingly):

ALLOCATION OF ADDITIONAL FUNDS

SEC. 4. (a) Section 6703(b) of such title is further amended by adding at the end thereof the following: "Any amount appropriated pursuant to paragraph (2) for any entitlement period in excess of $4,566,700,000 shall be available to pay entitlement amounts allocated to units of general local government for that period under section 6709(d)."

(b) Section 6709 of such title is amended by adding at the end thereof the following new subsection:

"(d)(1) In addition to the amount allocated to each unit of general local government under subsections (a), (b), and (c) of this section for an entitlement period, the Secretary shall allocate to each unit of general local government which is located in a county area which meets the requirements of paragraph (2) an amount which bears the same ratio to the amount made available for this subsection (under the last sentence of section 6703(b)) as—

(A) the product of (i) the unemployment rate of such county area, divided by the national average rate of unemployment for the most recent 12-month period preceding the allocation for which satisfactory data are available, multiplied by (ii) the amount allocated under subsections (a), (b), and (c) to such unit for that entitlement period, bears to

(B) the sum of the products determined under subparagraph (A) for all the units of general local government located in county areas which meet the requirements of paragraph (2).

"(2) For purposes of paragraph (1), a county area meets the requirements of this paragraph for an entitlement period if, for the most recent 12 months preceding the allocation for which satisfactory data are available, such county area had an average rate of unemployment equal to or in excess of the national average rate of unemployment for such 12 months, as determined in accordance with criteria used by the Bureau of Labor Statistics of the Department of Labor in defining individuals as unemployed.

"(3)(A) Notwithstanding paragraph (1)—

"(i) no unit of general local government shall receive an allocation under this subsection which exceeds the amount allocated to such unit under subsections (a), (b), and (c) of this section;

"(ii) no unit of general local government shall receive an allocation of more than 10 percent of the amount allocated under this subsection; and

"(iii) no unit of general local government shall receive an allocation under this subsection if the per capita income of the geographic area of such unit exceeds the per capita income of the State within which such unit is located by more than 25 percent;

but the allocations under this subsection shall not be subject to the other constraints on allocations contained in section 6712.

"(B) Any amounts which remain unallocated by reason of the requirements of this paragraph shall be allocated among the units of general local government which do not receive an allocation under this subsection by ratably increasing the amount of their allocations under subsections (a), (b), and (c).".

Mr. WILLIAMS of Ohio (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. WILLIAMS of Ohio. Mr. Chairman, we all know that many areas of our country are suffering from terribly high levels of unemployment. We are all concerned about the human suffering going on in these locations and I feel sure all are interested in doing something to help them.

Today with this amendment that I am offering, we have a chance to help. We can help our ailing cities and our Johnny Lunch Buckets, the average guy who cannot find work, we can do this by targeting some extra funds to areas of high unemployment.

Before I go any further, I want to make it clear that I plan to leave alone the revenue-sharing formula. I know how precious it is to many Members. Also I will propose nothing that would reduce any community's revenue-sharing payment.

My amendment would simply take the increase in the revenue-sharing entitlement fund, an increase that we have just seen set at $450 million a year, and allocate that money to those communities suffering from high unemployment. The greater the unemployment, the larger the share of funds the community would receive.

The $4.6 billion that has been the annual revenue-sharing level for each of the last 5 years would remain the same.

So my amendment would not reduce revenue-sharing payments to any jurisdiction. My amendment deals only with the new money, the $450 million that we have just added to the bill.

Under the amendment communities eligible to receive part of that $450 million are those communities located in counties which over the past year have had unemployment rates, equal to, or higher than, the national unemployment rate for the same period.

The amendment I propose is straightforward and simple. It would not reduce revenue-sharing payments to any jurisdiction.

It would, however, direct money to where it is needed most. And please note, that many of the communities that would be eligible for funds under my amendment will have probably lost population because of plant closings and unemployment, and therefore, will receive smaller shares from the normal revenue-sharing pie.

My amendment may just keep them where they were this year with regard to revenue-sharing payments.

Mr. MITCHELL. Mr. Chairman, will the gentleman yield?

Mr. WILLIAMS of Ohio. I yield to the gentleman from Maryland.

Mr. MITCHELL. I thank the gentleman for yielding.

I think the amendment has a great deal of appeal, but I had a chance to read it. The gentleman stated again on the floor, it would be targeted to those counties that have the highest rates of unemployment.

There are one or two cities around this Nation that are independent cities. My city of Baltimore is not a part of any county. How would we fare under this?

Mr. WILLIAMS of Ohio. The reason the county data is being used is because that is what is most available. Where there is city data available, I am sure the Treasury Department would use that.

Mr. MITCHELL. I certainly think the gentleman's amendment is fair. It is not touching any of the old money. It is only touching new money, that amount of money that is obviously not sufficient to make any great dent in the unemployment problem areas, but at least it signifies to me a willingness to continue to attack the problem of unemployment where it is concentrated.

And quite frankly, with the gentleman's explanation on cities, I would urge support of the amendment.

Mr. WILLIAMS of Ohio. I thank the gentleman for his support.

Mr. Chairman, I would conclude my statement by simply saying, I have heard many of my colleagues say what the gentleman from Maryland has just said on several occasions here in the well, decrying the lack of compassion in the bureaucracy for the folks downtown.

Here is an opportunity to show some compassion for those out of work, for the communities devastated by plant closings and high unemployment rates, unable to provide the services that they deserve—the folks who live in those communities deserve, because in most cases their revenue-sharing payments are cut. Because people are leaving their communities, based upon the formulas that we currently have set forth, their revenue-sharing moneys would be cut.

I ask my colleagues not to turn their backs on our Nation's unemployed. I am sure none of the Members want to do that. I urge the Members to remember their plight. I urge the Members to keep in mind the needs of Johnny Lunch Bucket, the guy out there looking for a job, who in many cases is having his local taxes raised because revenue-sharing moneys are cut from his hard-hit community.

I urge the Members' support for this amendment, which is designed to send Federal assistance where it is most needed. It makes no sense to me to pass domestic aid legislation without directing at least some of it to the part of the country where it is so badly needed.

□ 2010

Mr. BROOKS. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I rise in opposition to the amendment. While I have the highest regard for the gentleman from Ohio (Mr. WILLIAMS) in his interest in trying to assist those communities that are suffering the painful effects of high unemployment, I must oppose his amendment to allocate a portion of the revenue-sharing funds on the basis of unemployment rates.

The problem with this proposal is that unemployment data for units of government below the State level are notoriously unreliable. In fact, experts on unemployment statistics have characterized the data for smaller counties and local governments as simply "random numbers."

Mr. Chairman, allocating scarce Federal resources on the basis of random numbers would completely erode the already rather limited integrity of this ill-conceived program.

I would therefore urge my colleagues to oppose this amendment.

Mr. HORTON. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I certainly agree with the statements made by the chairman of the committee and agree with him that the gentleman from Ohio is trying to accomplish something to take care of a situation that exists in his State and in other States where there is high unemployment. This is also the case in my area. But the basic formula for revenue sharing is not designed to target funds toward a few areas where there are high economic and social needs. I would like to point out to the Members who just voted to provide for an additional $450 million over the $4.6 billion that that is the money that is being talked about here to be specifically targeted. So you would really have two programs—$450 million would be targeted toward the high unemployment areas, and those of you who voted expecting that your areas are going to be increased proportionately with the additional $450 million can just go back home and forget about it, because that money would be targeted for a purpose which is not designed to be in the revenue-sharing program.

Revenue sharing now is distributed on a formula basis. To do it with a special purpose would be different from what we have been doing, and you would be taking the new money that is allocated for revenue sharing and provide it for special targeted areas.

I might also say that there are other programs where this can now be done in community development block grants, UDAG, job assistance program. If there is a need for that, it ought to be done and especially targeted on that basis and not done through this particular bill.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from New York.

Mr. WEISS. I thank the gentleman for yielding to me, and I want to associate myself with his remarks.

Mr. Chairman, I think that there is a need for a specific program countercyclical in nature which is targeted exactly to the kinds of areas that the gentleman from Ohio speaks about. But to incorporate it into this revenue sharing legislation I think runs the risk of endangering this program while doing nothing at all for the countercyclical areas that need it.

When we were discussing this matter in committee, I told the gentleman and all my colleagues that we were in fact seeking to get information from the Commerce Department and the Treasury Department so that we could prepare a piece of countercyclical legislation. We are still in the process of doing that. We still have not gotten all of the data that we requested from Commerce. When we do, we will in fact introduce a specific piece of countercyclical legislation.

Mr. HORTON. I thank the gentleman. Mr. Chairman, the gentleman did inform me earlier, before we took up the bill in committee, that the subcommittee was going to look at countercyclical bills, and that they would handle them on a separate basis. But I think it would be a mistake on our part to adopt this amendment, and I urge that the Members oppose it.

Mr. WILLIAMS of Ohio. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Ohio.

Mr. WILLIAMS of Ohio. I think it is important to note once again that you are dealing with areas under the normal sharing factors that are used now. Those areas that have suffered plant closings are not going to get the money they got last year because of the exodus of people from those communities.

I, too, believe that everyone should get their fair share. I would love to

wait for countercyclical, and I will support the gentleman's bill; however, that will not correct the problems that are occurring with the loss of revenue sharing money. And that is what we are dealing with today.

All I want to do is keep them even. If they do not qualify with the high unemployment rates, then they will not get additional money. If they do, maybe we can keep them even.

Mr. HORTON. Just one point. There is now $450 million in the bill. If it is targeted differently, you are not going to get an increase for your communities.

I urge that the Members oppose the amendment.

Mr. KAZEN. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I take the well to ask my distinguished colleague, the gentleman from Texas, a couple of questions.

This money, as I understand it, is distributed by formula. Is part of that formula the amount of taxes that are raised by any community or any State?

Mr. BROOKS. Tax effort is considered as one of the factors. That is correct.

Mr. KAZEN. Tax effort. Is unemployment one of those factors?

Mr. BROOKS. No.

Mr. KAZEN. You see, Mr. Chairman, I am caught in this dilemma, as was debated during the IMF bill: Those of us who represent areas along the Mexican border, from Brownsville to San Diego, are caught in a bind. Our tax collections have gone down tremendously; our unemployment has gone way up. The statistics that we offer you are compiled by the Commerce Department. The Laredo metropolitan area in our State of Texas is one of the highest areas of unemployment in the United States, and we are one of the lowest tax-gathering portions of the Nation, simply because we have lost most of our income and so many people are unemployed, we do not have any income with which to pay taxes.

Now, our share of revenue sharing is going to go way down this year unless we can come up with some type of help. As far as I have been able to see, the gentleman from Ohio has been the only one to come forward with a partial solution. I am not in a position to change the formula, since I am not on the Committee; I do not have the personal expertise to be able to devise a certain formula for these sections of the country for which I am speaking without doing damage to the entire bill. I do not want to do damage to the entire bill, but I certainly, Mr. Chairman, would recommend to you that some thought be given to these areas of which I am speaking.

I just do not know at this stage of the game what else I can do except to support the gentleman from Ohio, in his amendment because it at least gives my district a little bit more than I would get under the provisions of this bill.

Mr. LATTA. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I yield to the gentleman from Ohio.

Mr. LATTA. Mr. Chairman, I want to commend the gentleman for the statement he has been making because he hits the nail right on the head.

As the gentleman from Ohio pointed out in offering this amendment, the formula itself works against areas like yours because they consider tax effort. And when you lose you tax base in certain of these communities, you suffer through revenue sharing.

Now, what the gentleman from Ohio is proposing is not to touch the money that you have been getting. It is only the extra money that is being put in this bill that is going to be touched and targeted to these high unemployment areas.

So it seems to me that if we wanted to do something about these areas of high unemployment, we should support the gentleman's amendment. I think the formula itself for general revenue sharing, the part that he is not touching, other to be looked at, in view of the experience where you have people moving out because there is no employment in those areas and not penalize those people living in those areas because of the formula itself.

So I commend the gentleman for his statement, and I also want to commend the gentleman from Ohio for offering the amendment because I know of no one who works any harder to put people back to work in his district than does the gentleman from Youngstown.

Mr. KAZEN. I appreciate the gentleman's contribution.

In connection with what the gentleman has said, the formula seems to help those people who do not need the help.

Mr. LATTA. That is right.

Mr. KAZEN. And it penalizes those sections of the country that cannot help themselves.

Mr. KASICH. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I yield to the gentleman from Ohio.

Mr. KASICH. It has come to my attention that in Youngstown alone we had a loss of 30,000 people from the city of Youngstown. And I would be willing to bet that if we were to examine that population that left that city, we would find that those people who were more mobile, who could afford to travel to other areas of the country to seek employment, are the ones who left, and those who were left in those communities were those people who were the least mobile, and that means those people who really need the services that are provided for with tax collections. But if you have people there who are older, who have no income, you are depleting the city's revenues and resources. And all we do here is simply to say $450 million in new dollars, not touching the $4.6 billion, but taking the $450 million new dollars, let us do something for those areas where we have experienced severe structural unemployment, where those jobs may never come back. We need to do something for those areas, and this is only one effort to do it.

The CHAIRMAN. The time of the gentleman from Texas (Mr. KAZEN) has expired.

(On request of Mr. BROOKS and by unanimous consent, Mr. KAZEN was allowed to proceed for 2 additional minutes.)

□ 2020

Mr. KASICH. Mr. Chairman, will the gentleman yield so I can finish this?

Mr. KAZEN. I yield to the gentleman from Ohio to finish his statement.

Mr. KASICH. I appreciate the gentleman yielding.

Mr. Chairman, let me say that during the discussion on New Federalism there was discussion in many circles about the need to pinpoint Federal money in areas where you are having severe structural unemployment problems. This simply is another effort, just like the jobs bill, where we tried to target money to areas of high unemployment. This is right along that line. We are not talking about changing the basic structure of revenue sharing, just the $450 million extra, and I commend the gentleman from Youngstown for offering the amendment.

Mr. BROOKS. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I will be delighted to yield to my colleague, the gentleman from Texas.

(On request of Mr. BROOKS and by unanimous consent, Mr. KAZEN was allowed to proceed for 1 additional minute.)

Mr. BROOKS. I thank the gentleman for yielding.

Mr. Chairman, to my beloved friend from Laredo, the tax effort is the total tax revenue divided by the personal income. If, as you say, the personal income in your district is down substantially, and the tax revenues are down substantially, the answer, when you divide it, might be the same, and your tax effort might not be cut. That is the factor that is applied in the formula. That is why this formula that they now have is probably the best that we have for giving away money

and for making Christmas come here in August rather than in December.

Mr. KAZEN. I will tell the gentleman that I agree with him. My per capita income, and I represent 3 of the lowest 10 counties in per capita income in the country, and I represent 4 of the highest unemployment counties in the country, and those that do not have the tax effort and income, because they just do not have the income, these are the people, and this is the type of district that I represent and that I am arguing for standing here in the well.

I am not trying to destroy your formula, I will say to my colleague from Texas. But I do want to find some way to help people who cannot help themselves.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. Yes; I would be delighted to yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I thank the gentleman for yielding.

Mr. Chairman, the argument we heard over here is one of the best arguments against the amendment. One of the reasons some communities have slightly less than the national average is because they had some mobile people who moved out. They abandoned the community. And now you are going to hold them to the same dollar level they got last year and not give them a cost-of-living increase.

That is an argument against this amendment. I want to tell you this, too: The statistics, as the gentleman from Texas said, that are being used are very inaccurate. Cities of large hard-core areas are not properly represented.

The CHAIRMAN. The time of the gentleman from Texas (Mr. PICKLE) has again expired.

(On request of Mr. SMITH of Iowa and by unanimous consent, Mr. KAZEN was allowed to proceed for 2 additional minutes.)

Mr. SMITH of Iowa. If the gentleman will yield further, cities that have large hardcore areas do not show up on the unemployment statistics as having high unemployment because there are so many people there who have never had a job. Largely, these statistics measure those who were lucky enough to have had jobs long enough to have accomplished getting on unemployment compensation when they were out of work. It discriminates against cities of large hardcore unemployment areas, and also against rural areas where we have so many people who have never had a job.

This would make this bill so discriminatory that it removes any excuse for a good many of us to support it from now on. It is no longer a national bill when you get into this kind of thing.

Mr. KAZEN. Let me just tell my colleague that I am speaking for my district. I have not had an outmigration from our cities. My people are not mobile, as they are in other parts of the country. They are still there. Their plight comes from the devaluation of the Mexican peso because close to 90 percent of our commerce was with Mexico.

Since IMF placed all those conditions on Mexico, and since the Mexican people cannot cross over to buy anything because of the devaluation of their money, we have had the largest number of bankruptcies that we have ever experienced in the history of south Texas. These are the people who are still living there. These are the people who must continue to have the services that every city must offer. We just do not have the tax base, we do not have the revenue. We have the high unemployment. We do not know how in the world to help ourselves, and I am here in the well pleading with my colleagues to please, give us just a little slice of this pie that we are slicing here today.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. KAZEN. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I thank the gentleman for yielding.

Mr. Chairman, I just want to point out to the gentleman that it is for that reason that we put $315 million in EDA, even though the administration asked nothing. That comes out of the subcommittee I happen to chair. That is the reason we put money into SBA. You do not have to bollix up every other program. We have programs that are specially designed to reach that kind of purpose, and I am supporting them.

The CHAIRMAN. The time of the gentleman from Texas (Mr. KAZEN) has again expired.

(By unanimous consent, Mr. KAZEN was allowed to proceed for 1 additional minute.)

Mr. KAZEN. I appreciate what the gentleman has done in his committee, but who in my district, what small business, is going to borrow money when they are no longer in business?

Mr. SMITH of Iowa. EDA is not that kind of a program. EDA goes to the city. You have development program, you have all kinds of programs in EDA. That is not the kind of a program we are talking about at all. It will go where it will help, where this will do very little to help, as a matter of fact.

Mr. KAZEN. If it were so, I do not know why I have been getting calls all day from my cities asking me to please do something to help them direct came at the money in this bill to them.

Mr. WISE. Mr. Chairman, I move to strike the requisite number of words, and I rise in support of the amendment.

Mr. Chairman, I rise in favor of the amendment offered by the gentleman from Ohio. I think it is an important amendment. As he has well pointed out, it does not reduce the amount that is presently going to any area. We are talking about approximately $450 million.

What can it mean? It can mean the difference in one of my counties, for instance, of whether or not there is a policeman out on the county roads at night. That is right. We have six deputies in one of my counties, and one of the hard-hit counties, with 30 percent unemployment; six deputies. The difference is whether or not there is coverage on a night shift. It makes a difference as to whether the town of Clendenin, which has an antiquated jail and is the only holding facility for 25 miles in any direction, actually is able to hold prisoners anymore. It makes a difference as to whether there are some basic services being offered.

I think it is important to recognize what this does. It does not reduce the money that you are presently getting. Second, it deals with the basic problem that the gentleman from Texas discussed and which many of us face in our counties.

We have diminishing resources. We have a declining tax base. At a time in the communities when they need help the most, we have the least ability to respond.

This amendment by the gentleman from Ohio addresses that and says we will give you a little more help. That is what unemployment is all about. It makes you weak. It is a debilitating affliction. This simply says we will give those areas a special recognition; not much recognition, but we will give them enough and perhaps that will help some of them.

I know in the 14 counties I represent, spread over 200-some miles, it could help a lot. I urge adoption of the gentleman's amendment.

Mr. VOLKMER. Mr. Chairman, will the gentleman yield?

Mr. WISE. Certainly. I would be glad to yield to the gentleman from Missouri.

Mr. VOLKMER. I thank the gentleman for yielding.

If you cannot answer my problem, perhaps the gentleman who sponsored the amendment can.

Mr. Chairman, looking over the amendment, I am just curious as to how you allocate the funds, the $450 million, between those areas of local government who do qualify because of high unemployment.

Mr. WISE. I will yield to the gentleman from Ohio (Mr. WILLIAMS) for a response.

□ 2030

Mr. WILLIAMS of Ohio. It would be based upon unemployment data, county by county across the country, using county figures.

Mr. VOLKMER. On the percentage of unemployment?

Mr. WILLIAMS of Ohio. Yes, anybody equal to the national average or above. The factor that would be used would be a weighted factor. For example, if you are suffering a 15-percent unemployment, you would divide the national average, which is 10, into that and come up with a weighted factor of 1.5 If you are 17 percent, you would have a factor of 1.7.

You would take every county that is eligible that is equal or over the national average and determine who they are and set them aside to divide up the $450 million. Then you would use the weighted factor, which in essence says that if you are suffering large unemployment, you are going to get a larger portion of the $450 million.

Mr. VOLKMER. Well, I still do not understand one factor in it, and that factor is, where does the population factor come in?

Mr. WILLIAMS of Ohio. That formular is the orignial formula for the $4.6 billion population tax base.

Mr. VOLKMER. I know, but where does that come in the gentleman's formula?

Mr. WILLIAMS of Ohio. It does not.

Mr. VOLKMER. It is only allocated, then, on percentage of unemployment over and above the weighted national average?

Mr. WILLIAMS of Ohio. That is correct. But we are taking only the $450 million.

Mr. VOLKMER. If is have a unit of local govenment, one that has 15-percent unemployment and has a 10,000 population, and then I have another unit of local government that has 500,000 population with 15 percent, then I get the same amount of money for the 10,000 as I do for the 500,000?

Mr. WILLIAMS of Ohio. It is multiplied by the amount of revenue sharing that they are currently getting. They cannot get more than that.

I am sorry; I did not understand the gentleman, so that the population factor does figure.

Mr. VOLKMER. It is multiplied by the amount that you get under the existing formula?

Mr. WILLIAMS of Ohio. That is right, computed against the current share they are getting under the $4.6 billion.

Mr. VOLKMER. I still question then whether the gentleman's formula will actually work when we get down to the $450 million.

Mr. WILLIAMS of Ohio. It will work, because we are dealing strictly with unemployment and the other factor. I misunderstood the gentleman's question. I did not answer properly.

The population factor does apply in the current share that an eligible entity is receiving and it does apply.

Mr. VOLKMER. But if you multiply it against what they are presently receiving to add to, that does not necessarily arrive at $450 million. It could be more or less.

Mr. WILLIAMS of Ohio. If the gentleman wants, I will try to answer that with this statement.

You multiply the qualifying community's normal revenue sharing payment by the weighted factor of the county in which they are located, if you are talking about a city of 10,000 or 50,000. You total those products.

The CHAIRMAN. The time of the gentleman from West Virginia has expired.

(At the request of Mr. WILLIAMS of Ohio, and by unanimous consent, Mr. WISE was allowed to proceed for 1 additional minute.)

Mr. WILLIAMS of Ohio. Mr. Chairman, will the gentleman yield further?

Mr. WISE. I yield.

Mr. WILLIAMS of Ohio. You total those two products, compute each eligible community's percentage share of that total; then you give each qualifying community the same percentage share of the $450 million that they would get when you total those products.

Mr. DE LA GARZA. Mr. Chairman, I move to strike the requisite number of words. I rise in support of the Williams amendment.

Mr. Chairman, I do so to bring out a couple of factors.

First, one with which I am concerned and makes me feel that maybe the House would need to remind itself of the conception of this legislation. I did not support the first revenue sharing legislation for the same reason that now my distinguished colleague, the gentleman from Texas, the chairman, and the distinguished ranking minority member are opposing the amendment.

I said then that it was inequitable, that we were only going to help those that already had and did not need.

I remember the chairman then answering that question that, yes, it was geared to those that were efficient, to those that were productive, to those that got more taxes from their populace.

I think now the gentleman from Ohio is bringing some degree of equity and justice. Call it another program, OK. This is the vehicle we have before us and more studies or arguing that you are not going to get accurate figures, I think that argument we should not even discuss.

Let me tell you what the accurate figures could be. The members of the committee are concerned with what is going to happen to the $450 million. I will tell you what is going to happen if we do not adopt this amendment. It will be split between Montgomery County, Md., and Fairfax County, Va. That is where all the $450 million could go, because those are the two highest per capita income counties in the country. Those are the two highest tax collection counties in the country and that is where your $450 million is going, to the two highest income counties in the country.

Mr. WOLF. Mr. Chairman, will the gentleman yield?

Mr. DE LA GARZA. I yield very briefly.

Mr. WOLF. We will accept the money tonight. I thank the gentleman.

Mr. DE LA GARZA. The gentleman agrees with me.

The two highest areas of unemployment that need to be targeted are the inner cities, the large cities, and the rural areas, this is where you have the high unemployment.

I see nothing wrong with adding a little degree of equity to this legislation, to quote the chairman of the committee. I see nothing wrong to add legitimacy to this legislation and bring a little equity and a little justice.

Unless you want to split it with a very few rich counties, I think the best thing we could do at this point is to support the amendment of the gentleman from Ohio, because this added money could just go to two or three counties, really. Otherwise, we will not be helping those who need it at this time.

Ms. OAKAR. Mr. Chairman, I move to strike the requisite number of words. I support the amendment of the gentleman from Ohio.

I just want to point out two quick things. One is that I agree with the chairman of the committee, my good friend and one of the great leaders of this House, when he says that unemployment figures are often wrong. That is very true. They are often wrong and they are usually higher in high unemployment areas than the Department of Labor statistics.

Another point I would like to make is that a lot of times we hear from our colleagues who say, "You know, my State does not statistically show that we have high unemployment, but my specific area has high unemployment, and yet unemployment compensation and programs of that nature do not really trigger properly for my specific county."

The great thing about this amendment is that it is targeted very specifically and it does not use the kind of formulas, for example, that we use for unemployment compensation.

So for those of you who really feel strongly that while your State might not have the national unemployment

figures that your area does, this is the perfect amendment for you to support.

I want to commend my colleague, the gentleman from Ohio, and one of our minority leaders, the gentleman from Ohio (Mr. LATTA) for his statement and others. Their statements were excellent.

For those of you who may not be affected by this amendment, my appeal would be to think of the national interest and to think in terms of those people who are suffering and are in great pain. I hope we can get beyond the provincial as well. I urge support of this amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Ohio (Mr. WILLIAMS).

The question was taken; and the Chairman announced that the noes appeared to have it.

RECORDED VOTE

Mr. WILLIAMS of Ohio. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 154, noes 259, not voting 20, as follows:

[Roll No. 309]

□ 2050

Messrs. NICHOLS, PERKINS, BEVILL, and AUCOIN changed their votes from "no" to "aye."

So the amendment was rejected.

The result of the vote was announced as above recorded.

The CHAIRMAN. Are there any additional amendments to section 3?

AMENDMENT OFFERED BY MR. WALKER

Mr. WALKER. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. WALKER: Page 2, after line 17, insert the following new section (and redesignate the succeeding sections and references thereto accordingly):

WAIVER OF WAGE RATE RESTRICTIONS TO INCREASE EMPLOYMENT

SEC. 4. Section 6704(a) of title 31, United States Code, is amended by adding at the end thereof the following: "The Secretary may waive the requirements of paragraph (4) or (5), or both, if a State government or unit of general local government demonstrates that such waiver will enable it to substantially increase the level of employment which it can support with funds made available under this chapter.".

PARLIAMENTARY INQUIRY

Mr. LEVITAS (during the reading). Mr. Chairman, I have a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. LEVITAS. Would the Chairman explain whether the Clerk is reporting an amendment or is reading for amendment? I cannot hear.

The CHAIRMAN. The Clerk is reporting the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The Clerk will read.

The Clerk continued the reading of the amendment.

Mr. WALKER (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALKER. Mr. Chairman, the amendment I am offering will provide an opportunity for the revenue-sharing program to help put some people to work.

My amendment will accomplish this by establishing a waiver procedure for the Davis-Bacon provisions contained in the revenue-sharing statute. I am not trying to break any new legislative ground. I am not mounting any kind of an all-out attack on the Davis-Bacon provisions. I am trying to put people to work and I am trying to reduce the unemployment lines.

Briefly I want to explain my amendment and urge that it be passed. Under my proposal recipients of revenue-sharing funds could apply for a waiver of Davis-Bacon requirements

and related prevailing wage provisions of the revenue-sharing statute if the recipients can show that a waiver will substantially increase the level of employment generated by projects in which the funds are used. I want to stress that last part of my amendment first: A waiver of Davis-Bacon provisions could only be granted if the applicant effectively proves that doing so will result in substantially more people at work on a particular project.

In our subcommittee hearings we heard rather incredible testimony where the federally determined Davis-Bacon prevailing wage was $14 an hour for a skilled construction worker while the actual wage paid on a non-Federal project was half of that or $7 an hour.

□ 2100

We also heard testimony to the effect that local officials avoid using revenue-sharing funds for construction projects so that they will not have to deal with the expense of complying with Davis-Bacon.

The conclusion is obvious. Fewer workers are being hired as a result of those Davis-Bacon provisions that are contained in the Revenue Sharing Act. Frankly, in some communities, no construction workers are being hired because of those requirements and that disturbs me greatly.

In 1979, the GAO made the following recommendations to Congress. First:

The Congress should repeal the Davis-Bacon Act.

And Second:

Congress should repeal the provisions in 77 related statutes which involve federally assisted construction projects and which require that wages paid to contractor employees be not lower than those determined by the Secretary of Labor to prevail in the locality, in accordance with the Davis-Bacon Act.

I must emphasize that my amendment does not seek in any way, shape, or form, to repeal the Davis-Bacon provisions in the Revenue Sharing Act, despite the GAO's recommendation. I only want to provide for a waiver of the requirement. And the waiver would be optional and it would be approved only if significantly more jobs were available as a result of that waiver. Numerous local officials who came before our subcommittee testified that they thought this amendment was a good idea, that it would in fact bring about more use of revenue-sharing funds for construction related projects.

Recently, the Advisory Commission on Intergovernmental Relations circulated the final chapter of their study on regulatory federalism. ACIR recommends modification or elimination of crosscutting Federal requirements, including Davis-Bacon.

In conclusion, I want to reiterate the emphasis of my amendment.

The focus is on jobs. A Davis-Bacon waiver would only be sought and granted if it put more people to work.

I urge the House to adopt this amendment and go on record in favor of jobs instead of special interest power. We know that special interests are perfectly willing to deny Americans jobs in order to protect their own perks.

This committee should not be a party to that kind of callous, indefensive wielding of power. We should be willing to support more employment for the people of this country even in the face of the demands of the power brokers.

My amendment means more jobs, and more jobs should be our highest priority as we consider this legislation.

Mr. GEKAS. Mr. Chairman, would the gentleman yield?

Mr. WALKER. I yield to the gentleman from Pennsylvania.

Mr. GEKAS. I thank the gentleman for yielding.

One thing that the gentleman spoke about piques my interest and I would like to ask the gentleman. Suppose a community or a county commissioner's group decided, as a result of the gentleman's amendment, if it should pass, that it was going to enter into a construction type of project, rather than the kind that they had been considering in the past. Would that in itself alone be able to allow them to certify that more jobs would be created under the gentleman's criteria?

Mr. WALKER. They would have to demonstrate that by waiving Davis-Bacon in the course of that construction that they could in fact provide more work. And in making that kind of a statement to the Secretary, he could then grant them the waiver if they could show that substantially more jobs would be created. But just the idea of instituting a construction project would not be something that in and of itself would result in a grant of a waiver.

Mr. GEKAS. I thank the gentleman.

Mr. BROOKS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, I oppose this amendment. The Davis-Bacon Act and similar provisions of other laws represent a statement of Federal policy which is applicable across the board to the expenditure of Federal funds. As long as that policy stands, it is appropriate that it should be applicable to revenue sharing just as it is to other programs. If that policy is to be changed, it should be done on a comprehensive basis rather than piecemeal in legislation dealing with individual programs such as general revenue sharing. A similar amendment was offered in the committee markup where it was soundly rejected. I urge my colleagues to reject it now as well.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Pennsylvania (Mr. WALKER).

The question was taken; and the Chairman announced that the noes appeared to have it.

Mr. WALKER. Mr. Chairman, I demand a recorded vote.

A recorded vote was refused.

So the amendment was rejected.

Mr. BROOKS. Mr. Chairman, it is getting late and we have been working on this wonderful, wonderful bill since 4:20. And the Speaker wants us to finish it tonight. I think we should finish it tonight. To implement and encourage that culmination of this great effort to bring Christmas early, I ask unanimous consent that the remainder of the bill be printed in the RECORD and open to amendment at any point.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The text of the remainder of the bill is as follows:

ELIMINATION OF CATEGORICAL GRANT REFUND REQUIREMENT

SEC. 4. Section 6705 of title 31, United States Code, is amended by striking out everything after the first sentence thereof.

ELIMINATION OF SPECIAL PROVISIONS RELATING TO LOUISIANA SHERIFFS

SEC. 5. (a) Chapter 67 of title 31, United States Code, is amended by striking out section 6710.

(b)(1) The chapter analysis of chapter 67 of such title is amended by striking out the item pertaining to section 6710.

(2) Section 6701(a)(5) of such title is amended—

(A) by inserting "and" at the end of subparagraph (A);

(B) by striking out "; and" at the end of subparagraph (B) and inserting in lieu thereof a period; and

(C) by striking out subparagraph (C).

(3) Section 6703(b)(2) of such title is amended by striking out "6708-6710" and inserting in lieu thereof "6708 and 6709".

(4) Section 6707(a)(2) of such title is amended by striking out "6708-6710" and inserting in lieu thereof "6708 and 6709".

(5) Section 6712(b) of such title is amended by striking out paragraph (4) thereof.

ADJUSTING DEFINITION OF MASSACHUSETTS TAX EFFORT

SEC. 6. Section 6713 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(d)(1) For the purposes of allocating amounts under sections 6708 and 6709 among units of general local government within the Commonwealth of Massachusetts for the entitlement period beginning October 1, 1983, the adjusted taxes of those governments shall include property taxes levied for the Commonwealth's 1982 fiscal year and recognized as fiscal year 1982 receipts pursuant to Massachusetts General Laws, chapter 59, sections 21 and 23, and chapter 44, sections 35 through 46.

"(2) No tax collections credited to any unit of general local government under this

subsection for fiscal year 1982 shall be credited to that unit of general local government for any other fiscal year.".

REQUIREMENT FOR AUDITS FOR EACH FISCAL PERIOD

SEC. 7. (a) Section 6723(a) of title 31, United States Code, is amended—

(1) by striking out "expecting to receive" in the first sentence of paragraph (1) and inserting in lieu thereof "which receives";

(2) by striking out "at least once every 3 years in such sentence;

(3) by inserting after such sentence the following: "Such audit shall be made annually except that, if the government operates on a biennial fiscal period, such audit shall be made biennially but shall cover the financial statement or statements for, and compliance with the requirements of this chapter during, both years within such period.";

(4) by striking out "auditing standards" in the last sentence of such paragraph and inserting in lieu thereof "government auditing standards issued by the Comptroller General of the United States"; and

(5) by striking out the second sentence of paragraph (2).

(b) Section 6723(b) of such title is amended to read as follows:

"(b) Not later than thirty days following completion of the audit, the government shall submit a copy of the audit report to the Secretary and the audit report shall be made available for public inspection. This availability shall be publicized in such a manner as to encourage and facilitate such inspection.".

(c) Section 6723(c) of such title is amended to read as follows:

"(c) Under regulations of the Secretary of the Treasury, the Secretary may waive the requirement of subsection (a)(1) of this section for a State government or unit of general local government for a fiscal year if the Secretary decides that the financial statements of that government for such year cannot be audited, and the government shows substantial progress in making the statements auditable."

(d)(1) Section 6723 of such title is further amended by striking out subsection (d) and by redesignating subsections (e), (f), and (g) as subsections (d), (e), and (f), respectively.

(2) Section 6724(a)(2)(B) of such title is ameded by striking out "6723 (a)-(e) and (g)"; and inserting in lieu thereof "6723 (a)-(d) and (f)".

TECHNICAL AMENDMENTS

SEC. 8. (a)(1) Section 6701(c) of title 31, United States Code, is amended by striking out the last sentence and inserting in lieu thereof the following: "Except as provided in regulations prescribed by the Secretary of the Treasury, the Secretary shall make data computations based on the ratio of the estimated population of the part to the population of the entire unit of general local government.".

"(2) Section 6701(d) is amended by inserting "annexation," after "constitutional change,".

"(3) Section 6701(e)(2) is amended by striking out "having one unit of general local government" and inserting in lieu thereof "and the sole unit of general local government in the area".

"(b) Section 6704(a) of such title is amended—

(1) by inserting "under this chapter" before the semicolon at the end of paragraph (1);

(2) by striking out "received under" in paragraph (3) and inserting in lieu thereof "so received in accordance with";

(3) by striking out "consistent" in paragraph (5) and inserting in lieu thereof "in accordance";

(4) by striking out "section 6723(b)" in paragraph (7) and inserting in lieu thereof "section 6723(f)";

(5) by striking out "and" at the end of such paragraph (7);

(6) by striking out the period at the end of paragraph (8) and inserting in lieu thereof a semicolon; and

(7) by inserting after such paragraph the following new paragraphs:

"(9) the government will comply with section 6714 of this title; and

"(10) the government will comply with section 6723 of this title,".

(c) Section 6707 of such title is amended—

(1) by striking out the second sentence of subsection (c)(5); and

(2) by adding at the end of such section the following new subsection:

"(e) For purposes of this section, 'urbanized population' shall be determined on the basis used by the Bureau of the Census for general statistical purposes.".

"(d)(1) Section 6708(a)(2)(A) is amended by inserting "(as determined under section 6709(a)(2)(A))" after "adjusted taxes".

(2) Section 6712(a)(2)(A)) is amended by inserting "(as determined under section 6709(a)(2)(A))" after "adjusted taxes".

"(e) Section 6713(a) of such title is amended by inserting "before the beginning of the entitlement period" immediately after "Secretary of Commerce".

"(f) Section 6716 is amended by striking out "when" in subsections (a) and (b) and inserting in lieu thereof "if".

"(g) Section 6716(c)(1) is amended by inserting before the period at the end the following: "with respect to which the allegation of discrimination is made".

"(h) Section 6717 is amended—

"(1) by striking out "a part" in subsection (b)(3) and inserting in lieu thereof "any part";

"(2) by striking out "except when" in subsection (c) and inserting in lieu thereof "unless";

"(3) by striking out "When" in such subsection and inserting in lieu thereof "If"; and

(4) by inserting "of discrimination" after "The holding" in subsection (e).

(i) Section 6718(b) is amended by striking out "about" and inserting in lieu thereof "based on".

STUDY OF REPRESENTATIVE TAX SYSTEM

SEC. 9. (a) The Secretary of the Treasury, in consultation with the Secretary of Commerce, the Comptroller General of the United States, and the Advisory Commission on Intergovernmental Relations, shall—

(1) study and develop the use of the representative tax system for purposes of allocation under chapter 67 of title 31, United States Code;

(2) conduct a study of alternatives to the use of personal income as a measure of the fiscal capacity of State governments and units of general local government, for purpose of allocation under chapter 67 of title 31, United States Code; and

(3) conduct a study of existing formulas used to allocate Federal funds or to determine eligibility for receipt of Federal funds.

(b) The Secretary of Commerce shall determine, specify, and collect whatever data and statistical estimates are necessary to develop the system described in subsection (a)(1).

(c) The Secretary of the Treasury shall also consult with the Secretary of Labor with respect to the study required by subsection (a)(3) and such study shall include an analysis of the mathematical form of the formulas, the data and statistics used to implement the formulas, and the management of the formulas by Federal agencies.

(d)(1) The Secretary of the Treasury shall submit to Congress a report on the findings of the studies required under subsections (a)(1) and (2), including any recommendations for legislation, not later than two years after the date of enactment of this Act.

(2) Not later than two years after the date of enactment of this Act, the Secretary shall submit to Congress a report on the findings of the study required by subsection (a)(3), together with his recommendations for the improvement of the structure and the management of those formulas.

EFFECTIVE DATE

SEC. 10. (a) Except as provided in subsection (b), the amendments made by this Act shall apply to entitlement periods (as such term is defined in section 6701(a)(1) of title 31, United States Code) beginning on or after October 1, 1983.

(b) The amendments made by section 7 shall apply with respect to any fiscal year (or period) of any State government or unit of general local government beginning on or after October 1, 1983.

Mr. BROOKS. Mr. Chairman, we have about four major amendments. I have one that is not very major.

Mr. Chairman, I ask unanimous consent that consideration of the bill and all amendments thereto be concluded at 10 o'clock.

The CHAIRMAN. Is there objection to the request of the gentleman from Texas?

There was no objection.

The CHAIRMAN. Are there amendments to section 3?

The Chair will inform the Committee that due to the unanimous-consent request just made by the gentleman from Texas (Mr. BROOKS), the bill is now open to amendment at any point, section 3 through the remainder of the bill.

AMENDMENT OFFERED BY MR. M'CANDLESS

Mr. McCANDLESS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. McCANDLESS: Page 2, beginning on line 18, strike out section 4 through line 22 and insert in lieu thereof the following:

ELIMINATION OF STATE SHARE

SEC. 4. Section 6703(b)(1) of title 31, United States Code, is amended by inserting after "each entitlement period" the following: "beginning before October 1, 1983".

□ 2110

Mr. McCANDLESS. Mr. Chairman, my amendment eliminates authorization in the bill for the States' share of revenue sharing. As written, H.R. 2780 continues States eligibility subject to appropriation.

Frankly, I see no need to continue the charade. Revenue-sharing funds for the States have not been appropriated since 1980, and I honestly doubt that our budget will allow appropriation in the next 3 years. Let us be honest with the Governors and State legislators and tell them there will be no State share by entitlement or through the appropriations process. It has been the will of Congress; let us recognize it by passing this amendment.

I would be remiss if I did not argue that my proposal is a "budget-sensitive" amendment. H.R. 2780 authorizes $2.3 billion for the States subject to appropriation. Suppose our colleagues call our bluff and the money is appropriated. Are we ready to share the responsibility?

It is our responsibility to establish priorities. We simply cannot afford to give money to everyone. If we are serious about reducing the deficit and containing inflation, we can ill afford spending money we do not have.

I suggest it is prudent to provide funding directly to local governments where it can be used most efficiently and with maximum participation by taxpayers. I urge my colleagues to reject State participation in any form.

Mr. BROOKS. Mr. Chairman, I rise in support of the gentleman's amendment.

Mr. Chairman, I rise in support of this amendment to eliminate the authorization for revenue sharing payments to State governments.

In reauthorizing general revenue sharing in 1980, Congress eliminated the state share entirely for fiscal year 1981, and made payments to State governments subject to the appropriations process for fiscal years 1982 and 1983. This judicious act of budgetary restraint was taken with the knowledge that while the Federal Government was facing a fiscal year 1981 budget deficit of nearly $60 billion, most States enjoyed the luxury of budget surpluses.

Supporters of retaining the State share authorization argue that while the States may have been in good fiscal shape in 1980, many have since fallen on hard times and are, therefore, desperately in need of revenue sharing funds. But we cannot ignore the even more serious deterioration of the Federal Government's financial condition.

Restricting State government participation in the General revenue-sharing program made good economic sense when the Federal budget deficit stood at $60 billion per year, and eliminating the State share authorization entirely makes even better sense as annual deficits spiral up to the $200 billion level.

Finally, in recent years the States have continually insisted that the Federal Government put its fiscal house in order. In fact, 35 State legislatures have adopted resolutions calling for a constitutional amendment to require a balanced Federal budget. Eliminating the State share of general revenue sharing represents a relatively small, but important, step toward achieving the goal of a balanced budget, and I urge an affirmative vote on this amendment.

Mr. WEISS. Mr. Chairman, I move to strike the requisite number of words, and I rise in opposition to the amendment.

Mr. Chairman, the reason that there were no moneys appropriated was because the amendment that was adopted in 1980, in addition to authorizing the State's portion of an authorized basis rather than entitlement, also included the provision of the gentleman from Georgia (Mr. LEVITAS), which said that even if money were appropriated by the Congress, the States, in order to take that money down, had to turn in dollar for dollar money from their categorical grant programs. Of course, no State, at a time when their programs were being cut to smithereens, would apply for revenue-sharing money under those conditions.

I should also point out that since the last new authorization in 1980, when you could say that the States were flush, at least they were running a mild surplus, have almost all of them reached crisis proportions. Twenty-one of them now are running a budget deficit. Eight States raised their individual income taxes during the last 2 years. Thirteen States raised their sales taxes. And other taxes have been adopted by 27 other States. We are not giving money to the States by this provision. All that we are saying is that there should be an authorization so that if the Appropriations Committee at the appropriate time decides that there are good and valid reasons to provide funding, in fact it would be permissible to do so.

I think that the amendment ought to be defeated so that the States could have a shot at getting those moneys that the Appropriations Committee felt it was appropriate and Congress then voted for the funding.

Mr. HORTON. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I yield to the gentleman from New York.

Mr. HORTON. I would like to associate myself with the gentleman's views, and I rise also in opposition to the amendment.

The CHAIRMAN. The question is on the amendment offered by the gentleman from California (Mr. MCCANDLESS).

The question was taken; and on a division (demanded by Mr. MCCANDLESS) there were—ayes 42, noes 43.

RECORDED VOTE

Mr. McCANDLESS. Mr. Chairman, I demand a recorded vote.

The CHAIRMAN. Was the gentleman seeking recognition at the time of the announcement of the vote?

Mr. McCANDLESS. Yes, Mr. Chairman.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 218, noes 193, not voting 22 as follows:

[Roll No. 310]

Mr. GEJDENSON and Mr. MARKEY changed their votes from "aye" to "no."

Mr. CLARKE and Mr. COLEMAN of Missouri changed their votes from "no" to "aye."

So the amendment was agreed to.

The result of the vote was announced as above recorded.

AMENDMENT OFFERED BY MR. BROOKS

Mr. BROOKS. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. BROOKS: Page 3, beginning on line 1, strike out all of section 5 through line 20 and redesignate the succeeding sections and references thereto accordingly.

Mr. BROOKS. Mr. Chairman, the amendment I am offering would restore the special allocation of general revenue-sharing funds for Louisiana sheriffs. Our friends from the Pelican State, the State of my birth, make the argument that sheriffs in Louisiana have special duties and functions that make them a special case in terms of revenue-sharing fund allocations. Our friends from Louisiana make this argument very effectively, because every time funding for the sheriffs is taken out, it manages to reappear in the revenue sharing authorization by the time the bill is enacted. I predict that no matter what happens with this amendment, this will be the case if revenue sharing is reenacted this year. Therefore, I think we in the House ought to spare ourselves the futile exercise of deleting Louisiana sheriffs since the end result will be their inclusion. I urge support for the amendment.

Mr. LEVITAS. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to my distinguished friend, the gentleman from Georgia.

Mr. LEVITAS. Mr. Chairman, I thank the gentleman for yielding.

Mr. Chairman, I was simply going to seek recognition to say that the amendment which I had printed in the RECORD relating to the States' share under the tit-for-tat amendment will not be offered in light of the vote on the last amendment, which I voted for; however, I say this in order to get the attention of the chairman of the subcommittee and the full committee that in the event the other body should retain the States' share of revenue sharing for purposes of conference, I would expect that the tit-for-tat grant tradeoff would be considered as a compromise position between the House position and the other body's position in the event this gets to conference on that issue. In other words I will oppose any conference position that simply retains the State share of the program without a grant trading position as exists in the present law.

I thank the gentleman from Texas for yielding in connection with his amendment, with the pistol of the Senator from Louisiana held closely to our heads.

Mr. WEISS. Mr. Chairman, I rise in opposition to the amendment.

Mr. Chairman, I oppose this amendment, not because I have anything personal against the sheriffs of Louisiana. From what I am told about them, they really are exceedingly fine public servants.

The difficulty is that as distinguished from the other recipients of revenue-sharing funds, who are general purpose governments, the Louisiana sheriffs are special purpose units of governments. They are not alone in performing some functions that municipalities or counties or localities in other places perform. There is no reason for them to be included in this legislation at all and, indeed, this House has never on its own voted to include them in. What has happened invariably is that when we have gotten to conference and the senior Senator from Louisiana, who used to be chairman of the Finance Committee, would get us in that conference, the basis for adoption of revenue sharing was inclusion of the Louisiana sheriffs. That may once again confront us, although the situation is different this year; however, it seems to me that it ought not to be this body which undercuts the legitimacy of the revenue-sharing program.

I know that my distinguished chairman has only the best interests of this House and of the revenue-sharing bill at heart; but I would urge nonetheless that we defeat his proposed amendment.

Mr. BREAUX. Mr. Chairman, will the gentleman yield?

Mr. WEISS. I am pleased to yield to my friend, the gentleman from Louisiana.

Mr. BREAUX. Mr. Chairman, I thank the gentleman for yielding.

I would just say for the Members who are wondering about why we are so confused in this situation in Louisiana, the amendment does not give the State of Louisiana a nickel more than it would normally get. It just allows the State to divide their shares and name the sheriffs in Louisiana as one of the direct recipients. The sheriffs in Louisiana are different in the way they are elected and they are different in the way they get their funding to run their offices. The only thing the amendment does is to allow them to be named as a recipient. It does not give the State any more money at all.

□ 2140

The CHAIRMAN. The question is on the amendment offered by the gentleman from Texas (Mr. BROOKS).

The amendment was agreed to.

AMENDMENTS OFFERED BY MR. LEVIN OF MICHIGAN

Mr. LEVIN of Michigan. Mr. Chairman, I offer two amendments, and I ask unanimous consent that they be considered en bloc.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

The CHAIRMAN. The Clerk will report the amendments.

The Clerk read as follows:

Amendments offered by Mr. LEVIN of Michigan: Page 2, after line 22, insert the

following new section (and redesignate the succeeding sections and references thereto accordingly):

COMPUTATIONS OF ENTITLEMENT USING REPRESENTATIVE TAX SYSTEM

SEC. 5. Section 6707 of title 31, United States Code, is amended—

(1) by striking out subparagraph (B) of subsection (b)(2) and inserting in lieu thereof the following:

"(B) the fiscal capacity of the State and of all units of general local government located in such State, as determined by the Secretary by means of the representative tax system developed pursuant to subsection (f).";

(2) by striking out subparagraphs (A) and (B) of subsection (b)(3) and inserting in lieu thereof the following:

"(A) the numerator is the per capita fiscal capacity of the United States, as determined by the Secretary by means of the representative tax system developed pursuant to subsection (f); and

"(B) the denominator is the per capita fiscal capacity of the State, as determined by the Secretary by such means.";

(3) by striking out clauses (i) and (ii) of subsection (c)(2)(A) and inserting in lieu thereof the following:

"(i) the numerator is the per capita fiscal capacity of the United States, as determined by the Secretary by means of the representative tax system developed pursuant to subsection (f); and

"(ii) the denominator is the per capita fiscal capacity of the State, as determined by the Secretary by such means, bears to"; and

(4) by adding at the end thereof the following new subsections:

"(e) The amount allocated to any State under this subsection (b) or (c) of this section as a consequence of the amendments made by section 5 of the State and Local Fiscal Assistance Amendments of 1983 shall not exceed by more than 10 percent the amount which would be allocated to such State if such amendments had not been enacted.

"(f)(1) The term 'representative tax system' means a method of determining the fiscal capacity of a government by estimating the amount of revenue that such government would raise if it applied a national uniform set of tax rates to a specified set of tax bases.

"(2) The Secretary, inconsultation with the Secretary of Commerce, the Secretary of the Interior, the Comptroller General of the United States, and the Advisory Commission on Intergovernmental Relations, shall develop a representative tax system similar to the representative tax system described in the March 1982 report of such Commission entitled 'Tax Capacity of the Fifty States: Methodology and Estimates'. The Secretary of Commerce shall collect whatever data and statistical estimates are necessary to develop and implement such a system.

"(3) When the Secretary has developed a representative tax system under subparagraph (2), or proposes to amend such system, the Secretary shall, in accordance with the provision of section 553 of title 5, United States Code, provide public notice of such system or amendment and an opportunity to interested persons to comment on such system or amendment. A report on such system or amendment shall be submitted to the Committee on Finance of the Senate and the Committee on Government Operations of the House of Representatives as soon as practicable after the period for receiving comments from interested persons has ended.

"(4) After compliance with the requirements of subparagraph (3), a representative tax system developed under subparagraph (2), and any amendment made to such system, shall take effect not sooner than 45 days after publication in final form in the Federal Register and concurrent transmittal to each House of Congress.

"(5) Until the Secretary has developed a representative tax system under subparagraph (2), the Secretary shall use the representative tax system and data provided in the most recently revised version of the March 1982 report described in subparagraph (2).".

Page 8, beginning on line 5, strike out all of section 9 through line 14 on page 10 and redesignate the succeeding section accordingly.

Page 9, strike out lines 10 through 12, and on lines 13 and 18, redesignate paragraphs (2) and (3) as paragraphs (1) and (2), respectively.

Page 9, strike out lines 21 through 23, and on line 24, redesignate subsection (c) as subsection (b).

Page 10, line 1, strike out "subsection (a)(3)" and insert in lieu thereof "subsection (a)(1)"; on line 7, strike out "subsections (a)(1) and (2)" and insert in lieu thereof "subsection (a)(1)"; and on line 12, strike out "subsection (a)(3)" and insert in lieu thereof "subsection (a)(2)".

Mr. LEVIN of Michigan (during the reading). Mr. Chairman, I ask unanimous consent that the amendments be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. LEVIN of Michigan. Mr. Chairman, I have tried to circulate this amendment broadly. It has been printed in the RECORD and we have circularized information regarding it.

There presently is an inequity in the revenue-sharing system. It relates to how tax effort and tax capacity are calculated.

As we know, there is a three-part and there is a five-part formula. Both of them contain reference to tax effort and to tax capacity.

The problem is that while in determining tax effort all of the resources of a State are considered in calculating what revenues are raised from those resources, when it comes to tax capacity the only thing considered is personal income.

Several years ago this Congress, this Congress asked the GAO to take a look at the personal income bases in these formulas. Let me read briefly what they said. "We have already studied this matter."

The GAO said "Residents' personal income, however, is an incomplete measure of tax capacity. It only measures income at the point it is received in the form of wages, salaries, et cetera. Income is also taxed through severance, commercial industrial property or sales tax where it is produced or used for consumption."

This is a complex amendment. It involves a simple and important principle but it has effect.

Let me, if I might, continue to discuss it in terms of the GAO report.

It continued "Another drawback of personal income is its inability to reflect the diversity of revenue sources within a State."

So what is proposed instead of the use of personal income alone as a determination of tax capacity, what is proposed in this amendment is to use the RTS, representative tax system, that has been worked on for 20 years.

What is would do would be to use 26 different bases to determine how a State taxes itself, determine national average, and then apply that national average to the bases within the State.

In a word, what is included in tax efforts, members of the committee, should also be included in determining tax effort. It is really that simple.

Let me say a word about a few other aspects of this.

Is this a regional proposal? The answer is "No."

The major gainers under this approach would include Alabama, Arizona, Georgia, Michigan, New York, Tennessee, North Carolina, Pennsylvania, Rhode Island, and Wisconsin.

Mr. EDGAR. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentleman from Pennsylvania.

Mr. EDGAR. I would like to commend the gentleman in the well for his amendment and indicate that the gentleman in the well has shared with the gentleman from Pennsylvania some specific analyses of the States that he has outlined that in fact are gainers under the formula the gentleman is offering.

I think those who are supportive of an earlier amendment on targeting to areas of economic distress by unemployment should also be interested in targeting the revenue sharing funds to those areas of need.

I think the gentleman's amendment provides that targeting mechanism and I urge my colleagues to support the gentleman's amendment and I urge them also to listen carefully to what the formula does.

It is a late hour. It is a late time to be bringing this amendment up. But I think the gentleman from Michigan offers an amendment that should be supported across the House floor, and I commend the gentleman for his efforts.

Mr. Chairman, I rise in strong support of the Levin amendment to H.R. 2780, the general revenue sharing reauthorization bill. I think the gentleman from Michigan has shown real leadership in putting together an amendment which would insure a

fairer and more equitable allocation of revenue sharing funds among the States.

There can be little doubt that general revenue sharing has become the most important Federal program of direct aid to localities. Since 1972, the GRS program has distributed billions of dollars to 39,000 State and local governments, for almost every reasonable government purpose. To a good portion of these governments, this means that GRS moneys are used for education and capital infrastructure improvements, while social services for the elderly, the sick and the indigent rank high on the list of prominent uses by other areas.

And even though the rate of inflation has eroded the value of revenue sharing dollars, decreasing by about 50 percent since 1976, these payments play a vital role to the localities which are charged with providing these services. Indeed, it can be argued that many local governments find revenue sharing moneys more essential than ever before.

There is simply no doubt that should we in Congress fail to renew the program, there would be immediate and severe layoffs and hiring freezes, cutbacks in services, escalating taxes and delayed capital projects.

The general revenue sharing program that we have before us today also includes 2 very important targeting principles. The first is that the Federal Government—especially, in time of tight budgets—ought to assist those governments with low relative fiscal capacity to meet the needs of their citizens. Taking tax capacity into account gives recognition to the fact that fiscally poor States would have to impose a much heavier tax burden on their citizens than would fiscally rich States providing similar benefits to their needy population. The second principle is that the Federal Government ought to provide more reveunue sharing aid to those States which provide their citizens public services from their own revenue sources.

But these principles have been "biased", in recent years, by the measures of tax capacity and tax effort used in the general revenue sharing interstate formulas. The tax capacity factor used personal income as a proxy for evaluating a State's ability to raise revenues. The theory behind using personal income is that taxes are eventually paid out of personal income, so the higher the personal income level of a State, the more revenue that State can raise. However, this is only part of the picture. There are several State taxes which are not paid out of the personal income of residents of that State.

For example, some States apply a severance tax to natural resources extracted from the State. This tax is usually passed on the consumers, but those consumers do not necessarily reside in the State which imposed the severance tax. Other examples of taxes which do not necessarily fall on the personal income of the residents of a State include sales and entertainment taxes paid by tourists, value-added taxes paid by consumers of goods manufactured in other States, and corporate income taxes.

The current system, which uses only personal income as a measure of tax capacity, understates the ability of some States to raise revenue. These States can and do raise money in ways not measured by the current system.

In addition, the current tax effort measure used in the general revenue sharing program—defined as the total taxes collected in State divided by the State's capacity— also has drawn increasing criticism in past years because it uses income as a measure of a State's tax capacity. Distortions are particularly great for the energy producing and tourism—rich States.

To overcome these deficiencies, the Advisory Commission on Intergovernmental relations developed another measure for tax capacity—and, thereby, tax effort—by estimating the amount of revenue the state-local system would have generated had it made use of all its taxable resources. According to the General Accounting Office (GAO), this representative tax system (RTS) approach is superior to personal income as an indicator of tax capacity because it reflects the major revenue sources available to State and local governments."

The primary advantage of the representative tax system is that it addresses all regional comparative advantages, such as corporate, mineral, sales, or farm wealth, as well as residential property values. Indeed, the Levin amendment would help States in all regions of the country—East, Midwest, South, and West.

In conclusion, I would like to commend the gentleman from Michigan for offering this important amendment and hope you join me in supporting his amendment to H.R. 2780.

Mr. LEVIN of Michigan. I thank the gentleman.

Let me conclude because others want to speak.

The CHAIRMAN. The time of the gentleman from Michigan (Mr. LEVIN) has expired.

(On request of Mr. EDGAR and by unanimous consent Mr. LEVIN of Michigan was allowed to proceed for 3 additional minutes.)

Mr. LEVIN of Michigan. There is the argument that all right, it is unjust. There is the argument that all right, it is used in Canada and we know how it works there. But let us wait until next year.

We would have to wait until 3 years from now. This is an unjust system. It has been studied.

The time for this body and the 350 or so Members whose States would gain by equity, it is the time for all of us to join together and once and for all end an unjust formula and insert a well-studied proposal, the RTS, in lieu of it.

I urge support of all of us in favor of this amendment.

Mr. OBERSTAR. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentleman from Minnesota.

Mr. OBERSTAR. I want to rise in strong support of the gentleman's amendment. It makes good sense. It is a balanced approach, a far better approach, than the system included in the bill now which deals only with personal or per capita income as a basis for one of the factors in revenue sharing; whereas the representative tax system would include all potential sources of tax revenue for a State. That would mean including corporate taxes, sales taxes, property tax, energy severance taxes. That is important because that is one of those taxes that energy rich States export to consumer States.

By including all of these factors into the tax aspect of the revenue-sharing formula we would be developing a fair and a representative basis for distributing the revenue-sharing funds.

I urge the support of the Members for the Levin amendment.

Mr. WOLPE. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentleman from Michigan.

Mr. WOLPE. I thank the gentleman for yielding.

I want to join in commending the gentleman in the well for introducing this amendment. I urge my colleagues to take a very close look at it.

I urge my colleagues to take a very close look at the State-by-State analysis of the impact of the Levin amendment on the distribution of revenue sharing dollars.

The revenue sharing formula takes as a given the notion that States should be rewarded on the basis of their tax effort. The present problem with the present formula is that its measure of tax effort and its measure of tax capacity is an unfair one. It does not really measure the total resources available to a given State in the taxation that is imposed by that State.

What this measurement does is to build in all of the available resources available to a State so that it will offer a more fair distribution of the Federal revenue sharing dollars.

It should be noted that when we decontrolled the price of oil in this country certain States that had the energy resources experienced a huge increase in revenues and, as a consequence of that increase in revenue, those States

ended up with a higher percentage rather than a lower percentage of Federal revenue sharing dollars at the expense of energy consuming States throughout the country.

□ 2150

At the expense of energy consuming States throughout the country.

Ms. OAKAR. Mr. Speaker, I ask unanimous consent that the gentleman from Michigan be given 2 additional minutes.

Mr. GRAMM. Reserving the right to object.

Ms. OAKAR. One additional minute.

Mr. GRAMM. Mr. Chairman, we have now under the unanimous-consent request only 10 minutes.

I would like to inquire as to how the Chair proposes that we divide that 10 minutes up to be assured that those who oppose the amendment have similar time to those who have spoken on its behalf.

The CHAIRMAN. The next Member to be recognized will be one who rises in opposition to the amendment

Ms. OAKAR. I ask unanimous consent that the gentleman be allowed to proceed.

The CHAIRMAN. For how many additional minutes?

Ms. OAKAR. For 1 additional minute.

The CHAIRMAN. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Ms. OAKAR. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentlewoman from Ohio.

Ms. OAKAR. I thank the gentleman for yielding.

Mr. Chairman, I feel this is one of the most thoughtful amendments ever offered concerning this bill.

It is very unfortunate that it is so late because somehow I do not get the feeling that all of us are willing to really absorb the impact of what the gentleman's formula is all about, which is really a corrective formula.

I just urge my colleagues to really try to analyze what the gentleman from Michigan is trying to do, which is eminently fair. I hope we pass the gentleman's amendment. I am only sorry that is offered at this hour, that he was not able to offer it sooner, because I think if we had a chance to study it, there is no question that it should pass.

I am hoping we will be in a position to pass it even at this late hour.

Mr. CLINGER. Mr. Chairman, will the gentleman yield?

Mr. LEVIN of Michigan. I yield to the gentleman from Pennsylvania.

Mr. CLINGER. I thank the gentleman for yielding.

Mr. Chairman, I would like to associate myself with this amendment, I think it is an excellent amendment because it does represent a move toward fairness in changing the basis on which we decide what the share should be.

Mr. Chairman, I rise in support of the amendment to H.R. 2780 offered by the gentleman from Michigan (Mr. LEVIN). This amendment seeks to include a fairer, more equitable definition of the tax capacity and tax effort of States in the formulas for distribution of general revenue-sharing funds. Under the formulas used during the previous authorization periods, distribution of revenue-sharing dollars has been linked to the tax capacity, or ability to generate revenue, of the States. The capacity, or tax base, has then been compared to the revenues actually raised in the particular State. The ratio of capacity to revenue is used to measure the tax effort of the State, or how heavy the State tax burden is on the residents of that State. These formulas were designed to provide for a fair distribution of Federal dollars to needy States and localities across the Nation. They have worked well, providing much needed funds to communities with far less ability to raise revenues than the Federal Government.

The formulas for distribution of funds are complex and this amendment does not seek to change them. What this amendment does is to provide for a clearer picture of tax capacity so that the formulas can work better in directing revenue-sharing funds to governmental units who are meeting their own revenue raising responsibilities. Currently, tax capacity of a State is measured by the total personal income of that State on the theory that taxes will be paid out of personal income and therefore State revenues are intrinsically linked to them. This measure, however, presents only a portion of the revenue picture. Many States rely on severance taxes on natural resources as a major revenue raising tool. Others rely heavily on sales taxes, value-added taxes, entertainment taxes and corporate income taxes, all not necessarily linked to personal income. The represenative tax system, offered in this amendment, would take into account all of the possible revenue raising tools used by a State in computing tax capacity and in turn, tax effort. By doing so the data base of revenue sharing formulas is expanded and a more accurate reading of States' revenue raising initiatives is possible. This adjustment will correct the problem of underestimating a State's tax capacity which is the natural result from looking only at personal income in determining that capacity.

Mr. Chairman, there has been some criticism of this method of computing tax capacity and effort focusing on the possibility that some States may receive a smaller share of revenue sharing moneys should this system be adopted. In point of fact, the Commonwealth of Pennsylvania will increase its share of funds by 0.42 percent under the representative tax system and 40 other States will receive more funds or a larger share under H.R. 2780 if this amendment is adopted. It is true that nine States will receive less funding if this amendment is adopted, but the States gaining the most from implementation of the representative tax system are those whose tax capacity has been most severely overstated in the past or whose tax effort has been most severely understated. On balance, Mr. Chairman, this amendment would benefit most States in the Nation by presenting a truer indicator of their fiscal health and thus allowing for a more responsible, more equitable distribution of Federal revenue sharing funds.

In enacting this legislation before us today, we in Congress bear a great responsibility. If general revenue sharing is to be available to all States in the Union, we must do our best to insure a fair distribution of funds. This amendment makes an adjustment in definitions relating to the distribution of revenue sharing funds which provides for a more accurate and equitable allocation of Federal money. It is an opportunity for Congress to meet its responsibility to safeguard taxpayer dollars and I urge my colleagues to take the opportunity and adopt the amendment.

Mr. BROOKS. Mr. Chairman, I move to strike the last word, and I rise in opposition to the amendments.

Mr. Chairman, although the proposal by the gentleman from Michigan is interesting, I must oppose including this approach in the revenue-sharing program at this time. Those of us who have lived with revenue sharing over the past decade know that when you change just one element of the complex allocation formulas, you may end up with rather surprising—and unintended—results.

Mr. Chairman, during its consideration of H.R. 2780, the committee carefully examined the representative tax system approach proposed in this amendment. The committee concluded that since the proposed change would represent a rather dramatic revision of the current allocation formulas, further analysis of this method is necessary.

H.R. 2780 therefore directs that the Secretary of the Treasury, in consultation with the Secretary of Commerce, the Comptroller General, and the Advisory Commission on Intergovernmental Relations, to study and develop the representative tax system for possible use in the revenue-sharing allocation formulas. The Secretary is required to submit a report to Congress on his findings and recommendations

within 2 years. The information would thus be available for considering formula changes at a later date.

Mr. Chairman, I believe that the committee has proposed a thoughtful and prudent approach to an extremely complex issue. I would also point out that the National League of Cities and the National Association of Counties—two organizations representing thousands of local governments that would be affected by this amendment—have advised the committee that they adamantly oppose any formula changes at this time. Both endorse the committee's proposal for further analysis of this issue.

I therefore urge my colleagues to oppose the gentleman's amendment.

Mr. RICHARDSON. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to my friend, the gentleman from New Mexico.

Mr. RICHARDSON. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the Levin amendment.

The Western Governors' Policy Office (Westpo) is strongly opposed to the representative tax system (RTS). Congressman LEVIN'S amendment to H.R. 2780 would incorporate the RTS into the general revenue sharing allocation formula. Opposition to the Levin amendment is based on the following points:

During its deliberations on H.R. 2780, the House Government Operations Committee rejected a similar proposal. The committee realized that many complex fiscal interrelationships are at stake and directed further study of the possible use of an RTS measure in the general revenue sharing formula.

Although the staff of the Advisory Commission on Intergovernmental Relations has undertaken extensive studies of the RTS, the Commission itself has not formally endorsed the concept as an alternative to the current general revenue sharing formula. The National Governors Association (NGA) has likewise declined to endorse the RTS concept.

Under the current $4.6 billion authorization level the Levin amendment would reduce the amount of general revenue sharing funds received by 11 of the 13 Westpo States. These reductions will create hardships for States which have already planned budgets for the coming fiscal year based on current formula allocations.

EFFECTS OF LEVIN AMENDMENT ON WESTPO STATES

[In millions of dollars]

	Current general revenue sharing formula	Levin amendment
Alaska	37.0	21.0
Arizona	55.1	61.2
Colorado	51.8	51.6
Idaho	18.6	17.3

EFFECTS OF LEVIN AMENDMENT ON WESTPO STATES—Continued

[In millions of dollars]

	Current general revenue sharing formula	Levin amendment
Montana	18.7	13.1
Nebraska	28.5	27.7
Nevada	13.9	12.7
New Mexico	36.8	21.9
North Dakota	13.9	9.4
South Dakota	15.8	12.0
Utah	34.6	32.7
Washington	66.9	70.6
Wyoming	11.6	6.4
Total	403.2	357.6

Note: Assumes current authorization level of $4.566 billion.

Mr. WEISS. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from New York.

Mr. WEISS. I thank my chairman for yielding.

I simply want to state that I would be sorely tempted to support this amendment because my State would benefit to a greater extent than any other State if this amendment were adopted.

The difficulty is—and I hope it has not escaped my colleagues—the revenue sharing program is not that universally loved. We lost a couple of significant amendments today. I think that the adoption of this amendment could in fact endanger the continuation of the revenue sharing program. I would much rather build toward adoption of it than just precipitously throw it on the floor at this point and drop it.

Mr. WISE. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from West Virginia.

Mr. WISE. I thank the gentleman for yielding.

Mr. Chairman, I also rise in opposition. I point out this formula they propose to change is based heavily on energy taxes. They say somehow we are exporting, because we produce coal, taxes.

I come from the State with the highest unemployment in the Nation. If you think we are exporting those taxes what about the shoes from the Northeast, the lumber from the Northwest—those costs get passed on.

I ask you to look at our depleted reserves, the damage, the reclamation that must be done, and realize this formula is quite radical and dangerous and greatly changes the allocation, and at this late hour of the night we ought not to change something so significant.

Mr. WILLIAMS of Montana. Mr. Chairman, will the gentleman yield?

Mr. BROOKS. I yield to the gentleman from Montana.

Mr. WILLIAMS of Montana. I thank the gentleman for yielding.

Mr. Chairman, I rise in opposition to the gentleman's amendment. The amendment is not a simple manipulation of Federal revenue sharing formulas. Rather, it is a dramatic refashioning, a transformation of the Federal consideration of equitable distribution of revenue sharing dollars.

The amendment embodies a notion referred to as the "representative tax system". That system is one attempt, a flawed effort to develop an equitable allocation system by determining a State's fiscal capacity. Perhaps such capacity needs to be both understood and measured. This amendment, on this bill, is not the proper vehicle for such a broad and sweeping change in Federal policy.

The Members of this House would be making a major mistake in accepting this metamorphasis in public policy.

Mr. Chairman, although I do not support this amendment, I am in strong support of the legislation.

After having been among the hardest-hit victims of the recent recession, State and local governments are now projected to lag behind other sectors of the economy in recovery. To promote economic growth and relieve the great fiscal pressure not weighing on America's cities and counties, Congress should reauthorize general revenue sharing at the $5.02 billion level agreed on in the budget resolution. That level represents a $450 million—or less than 10 percent—increase in the program, which has not been increased since 1976.

States and localities are in the midst of their most severe fiscal crisis since the Great Depression. A recession-induced fall in tax collections combined with steep reductions in Federal aid has forced most States, counties, and municipalities to implement major service cutbacks and tax increases.

Evidence of the fiscal crisis and its effects is seen in the reduction of State and local government expenditure for human services and infrastructure repair.

At a time when demands for services are at record levels, States and localities are being forced to cut their work forces. Over 400,000 State and local government jobs have been lost in 3 years, according to the Bureau of Labor Statistics. Previous economic downturns were usually moderated by increased State and local spending and employment. This time, however, the State and local public sector was hit even harder than the private sector. In large part, this accounts for why the current recession is so severe. In 1982, State and local employment fell by 1.5 percent, while national employment was down by only 0.9 percent.

The Reagan administration's spending reductions have come disproportionately out of State and local gov-

ernment aid, which will be down $24 billion in 1984 as a result of the cumulation of Federal cuts. State aid to local governments is also being cut back as States attempt to balance their budgets. Eighty-eight percent of the cities contacted in a Joint Economic Committee survey expected decreases in State aid.

At the same time, cities and counties have had to raise property taxes and user fees, a choice viewed with extreme disfavor by local citizens, who in return for the increase receive fewer services.

Inflation has reduced the benefits of GRS. Local revenue sharing has not been increased since fiscal year 1977, even though the cost of living has increased by over 60 percent since then. The rise in the cost of living will surely increase by more than 10 percent over the 5-year authorization of this bill, causing a further decline in the real value of the program, despite the less then 10-percent increase.

State and local budgets will continue to be under great strain over the next several years. Consequently, reauthorization of general revenue sharing, with less than a 10-percent increase in funding, is essential to prevent further cutbacks in State and local human services and infrastructure investment. In addition, the stimulus which GRS provides to State and local economies throughout the country will help insure that the national recovery is balanced and sustained.

I urge my colleagues to pass this bill and defeat all amendments except one, which will conform the authorization to the level of the first budget resolution.

Mr. HORTON. Mr. Chairman, I move to strike the requisite number of words and I rise in opposition to the amendment. I will be very short.

I want to make some points. The first point is that there is a need for changing the formula. But it ought to be studied. It has not been studied.

This bill does provide for a study to be made by the subcommittee.

Second—and I think this is a very important point—whenever you change the piece of pie, because that is what you are doing, you are dividing up $4.6 billion plus $450 million into approximately 39,000 pieces. When you divide it somebody is going to lose if somebody picks up.

The other point is that this amendment permits many of the changes in the formula to be made by the executive branch so they can design the changes. And I think for that reason alone we ought not to adopt this amendment.

Mr. BARTLETT. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Texas.

Mr. BARTLETT. I thank the gentleman for yielding.

Mr. Chairman, I would ask the gentleman if he is aware in addition to the two organizations the chairman from Texas cited in opposition to this, the National League of Cities and National Association of Counties, that in addition the American Federation of State, County, & Municipal Employees, the public employee divisions of the AFL-CIO and National Association of Towns & Townships are also opposed to this formula change.

Mr. CRAIG. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I thank the gentleman for his contribution.

I yield to the gentleman from Idaho (Mr. CRAIG).

Mr. CRAIG. I thank the gentleman from New York.

Mr. Chairman, I wish to associate myself with his remarks and warn all of the Members in the House at this late hour to be attempting to address a major, and I repeat, a major formula change at this time without looking at the provisions of this legislation which, in itself, requests a thorough examination of that formula, is, at best, very complicated, recognizing that our national associations that are the beneficiaries of this type of legislation have asked that we examine it under the full light of a thorough investigation.

Mr. MACKAY. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentleman from Florida.

Mr. MACKAY. I thank the gentleman.

I would like to make the point that there are other issues besides the representative tax system.

The fact of the matter is there have been other changes in the revenue sharing since the original formula was adopted. TRS does not take into account user fees. There are major States like California which would be penalized because they do not show up as making a tax effort when in fact they are relying on user fees because of proposition 13. That is another reason.

□ 2200

Ms. KAPTUR. Mr. Chairman, will the gentleman yield?

Mr. HORTON. I yield to the gentlewoman from Ohio.

Ms. KAPTUR. I thank the gentleman for yielding.

I would just like to point out to the gentleman about this child that was brought up from the committee that, in fact, this issue has been studied to death. The Advisory Commission on Intergovernmental Relations has studied this for the last 20 years and recommends the change to the RTS formula, the Levin amendment. In addition to that, the General Accounting Office recommends the change.

Mr. HORTON. I thank the gentlewoman.

Mr. Chairman, I oppose the amendment and urge my colleagues to defeat it.

● Mr. LAFALCE. Mr. Chairman, I rise in support of the amendment to H.R. 2780 being offered by our colleague from Michigan (Mr. LEVIN).

The amendment would correct a glaring inequity in the general revenue sharing, GRS, allocation formulas by substituting the representative tax system, RTS, measure of tax effort for the current system which simply divides a State's total personal income by the total revenue raised by the State to derive a surrogate measure for State tax effort.

I would like to address one problem that will be resolved by the amendment: the inclusion of severance tax revenues in the measure of State tax effort.

Mr. Chairman, every consumer of oil and natural gas contributes to the severance tax collections of the energy producing States. For the purposes of this debate, I will assume that the energy producing States have a legitimate claim to such tax revenues. After all, their supplies of oil and natural gas are being depleted, and the energy producing States need—much like the oil companies need the depletion allowance—another assumption for debate purposes only—severance taxes as a buffer for when the wells run dry.

Assuming this point, Mr. Chairman, nonetheless, I would suggest that what the energy producing States neither need nor deserve is to fully count their severance tax collections—taxes that are paid by consumers throughout the country—as part of their State tax effort.

Under the present system, consumers throughout the country are contributing directly to the coffers of the energy producing States, through severance taxes that are passed through to consumers, and indirectly, as these severance tax payments contribute to the energy producing States' tax efforts thereby increasing their GRA entitlements.

Mr. Chairman, State tax effort was included in the GRS formulas to insure that GRS dollars would flow more freely to States as their ability to raise revenues on their own decreased. Congress recognized that States with poor populations and States that taxed their residents heavily in order to provide needed services should be treated more favorably in the distribution of revenue sharing dollars. Accordingly, the 5-factor GRS formula allocates 17 percent of total revenue sharing dollars on the basis of State tax effort, while the 3-factor GRS formula weighs State tax effort equally with population and relative

income to determine the distribution of GRS dollars among the States.

Congress noble goal of providing additional revenues to poor and needy States has been distorted by our failure to devise a measurement of State tax effort that reflects our substantive concerns. The out-of-State revenues raised through severance taxes distort the allocation of revenue sharing dollars. The Treasury Department had estimated that $36 million in GRS dollars will be transferred to the energy producing States from the energy consuming States from fiscal year 1980 to fiscal year 1985 due to increased severance tax collections.

I should point out to my colleagues that natural gas deregulation legislation reported by the Senate Energy Committee, which decontrols all natural gas including old gas, will certainly exacerbate the problem. The administration's earlier decision to decontrol domestic oil prices and the action taken by the Senate Energy Committee, if supported by the full Congress, will add billions of dollars to the budgets of the energy producing States through increased severance tax collections, and millions more through transfers within the GRS program.

The amendment being offered by the gentleman from Michigan, Mr. LEVIN, which I urge all my colleagues from the energy consuming States to support, will correct this imbalance as it regards GRS funds by substituting a measure of State tax effort that more equitably takes into account all potential sources of State revenue rather than only one, that being personal income.

The RTS measure has been devised by the Advisory Commission on Intergovernmental Relations, a bipartisan commission with representatives from all regions of the country. I believe that it is fair, and, more importantly, its incorporation into the GRS program will restore congressional intent as regards the measurement of tax effort.

The bill before us requires a 2-year study of the RTS system and other alternative measures. This is indeed commendable, but I do not believe that we need another 2-year study. If we need one, let us put the RTS system in place and mandate a study of its operation.

I for one am tired of waiting for a resolution to this problem. Remember that the 2-year study required by the bill will, in all likelihood, not be implemented until the GRS program is up for renewal—5 years from now—if it is implemented at all.

I urge my colleagues to support this amendment.●

Mr. GLICKMAN. Mr. Chairman, it strikes me that with a Federal deficit of nearly $200 billion this year, there is very little revenue indeed to share with the States or anyone else. Accordingly, I will vote against final passage of the revenue sharing bill before us, in the symbolic effort to try to reduce the deficit.

The CHAIRMAN. All time has expired.

The question is on the amendments offered by the gentleman from Michigan (Mr. LEVIN).

The question was taken; and a division (demanded by Mr. LEVIN of Michigan) there were—ayes 54, noes 98.

RECORDED VOTE

Mr. LEVIN of Michigan. Mr. Chairman, I demand a recorded vote.

A recorded vote was ordered.

The vote was taken by electronic device, and there were—ayes 192, noes 220, not voting 21, as follows:

[Roll No. 311]

□ 2210

Mr. MINETA and Mr. GARCIA changed their votes from "aye" to "no."

Messrs. STOKES, PORTER, DANIEL B. CRANE, RUDD, and

KASTENMEIER changed their votes from "no" to "aye."

So the amendments were rejected.

The result of the vote was announced as above recorded.

□ 2220

The CHAIRMAN. Are there any other amendments?

The question, then, is on the committee amendment in the nature of a substitute, as amended.

The committee amendment in the nature of a substitute, as amended, was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. SWIFT, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 2780) to extend and amend the provisions of title 31, United States Code, relating to the general revenue sharing program, pursuant to House Resolution 285, he reported the bill back to the House with an amendment adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment to the committee amendment in the nature of a substitute adopted by the Committee of the Whole? If not, the question is on the amendment.

The amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was so ordered to be engrossed and read a third time, and was read the third time.

MOTION TO RECOMMIT OFFERED BY MR. DANNEMEYER

Mr. DANNEMEYER. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. DANNEMEYER. I am opposed to this bill, Mr. Speaker, for a very simple reason. We do not have any revenue to share, only a deficit. If it were not so serious, it would be funny.

Mr. SPEAKER. The Clerk will report the motion to recomit.

The Clerk read as follows:

Mr. DANNEMEYER moves to recommit the bill, H.R. 2780, to the Committee on Government Operations.

The SPEAKER. Without objection, the previous question is ordered on the motion to recommit.

There was no objection.

The SPEAKER. The question is on the motion to recommit.

The motion to recommit was rejected.

The SPEAKER. The question is on the passage of the bill.

The question was taken; and the Speaker announced that the ayes appeared to have it.

Mr. HORTON. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 381, nays 35, answered "present" 1, not voting 16, as follows:

[Roll No. 312]

□ 2230

The Clerk announced the following pair:

On this vote:

Mr. Rose for, with Mr. Stenholm against.

Mr. STENHOLM. Mr. Speaker, I have a live pair with the gentleman from North Carolina (Mr. ROSE). If he had been present, he would have voted "yea." I voted "present."

The SPEAKER pro tempore. How would the gentleman have voted?

Mr. STENHOLM. I would have voted "nay."

So the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

□ 2240

AUTHORIZING THE CLERK TO MAKE CORRECTIONS IN ENROLLMENT OF H.R. 2780, STATE AND LOCAL FISCAL ASSISTANCE AMENDMENTS OF 1983

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that, in the engrossment of the bill, the Clerk be authorized to correct section numbers, punctuation, and cross references, and to make such other technical and conforming changes as it may be necessary to reflect the actions of the House in amending the bill, H.R. 2780.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

GENERAL LEAVE

Mr. BROOKS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous material on H.R. 2780, the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Texas?

There was no objection.

REMOVAL OF NAME OF MEMBER AS COSPONSOR OF HOUSE JOINT RESOLUTION 1

Mr. KOLTER. Mr. Speaker, I ask unanimous consent that my name be removed from the list of cosponsors of House Joint Resolution 1.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMMUNICATION FROM THE CHIEF OF POLICE OF THE U.S. CAPITOL POLICE

The SPEAKER pro tempore laid before the House the following communication from the Chief of Police of the U.S. Capitol Police:

U.S. CAPITOL POLICE,
OFFICE OF THE CHIEF,
Washington, D.C., August 2, 1983.

Hon. THOMAS P. O'NEILL, Jr.,
Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: This is to inform you, pursuant to the provision of House Rule L (50), that Allen P. Bowers, Inspector, U.S. Capitol Police, has received a subpoena from the Circuit Court for Montgomery County, Maryland. In the matter of *State of Maryland vs. Louis Stokes,* Case Number 31329 Criminal.

After consulting with counsel, I have determined that compliance with the subpoena is consistent with the privileges and rights of the House.

Sincerely,

JAMES M. POWELL,
Chief of Police.

THE POLITICAL TAX CREDIT REFORM ACT OF 1983

(Mr. McHUGH asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. McHUGH. Mr. Speaker, on behalf of myself and Representatives CONABLE, UDALL, JENKINS, TAUKE, and PURSELL, I am today introducing the Political Tax Credit Reform Act of 1983.

The Political Tax Credit Reform Act is designed to lessen the dependence of congressional candidates on special interest PAC money by making it easier to raise a larger share of campaign funds in the form of small contributions from individuals in the candidate's home State.

The proposal would also strengthen political parties.

The law currently provides for a 50-percent credit on virtually any type of political contribution up to a maximum of $50 for an individual and $100 for a joint return.

Our bill would convert the current credit into two separate and more focused credits, as follows:

First. A credit for contributions to House and Senate candidates under which contributors would receive full credit up to a maximum of $50 for an individual and $100 for a joint return; and

Second. A credit for contributions to political party committees under which contributors would receive half credit, also to a maximum of $50 for an individual and $100 for a joint return.

The full credit for contributions to congressional candidates would only apply to contributions for the candidate's home State.

In order to control the revenue loss, the credit would be eliminated entirely for all other entities—specifically, political action committees (PAC's), newsletter funds, and Presidential, State, and local candidates. The credit for contributions to these entities accounts for better than 40 percent of the revenue loss attributable to the current tax credit.

There are specific reasons for eliminating the credit with respect to the above entities which are addressed in the fact sheet I will attach at the end of my statement. However, with respect to eliminating the credit with respect to PAC's, I would like to note that providing a tax credit for contributions to PAC's is tantamount to providing them with a Government subsidy. We believe there is no justification for the Government to be subsidizing groups whose main purpose is to lobby Members of Congress and Government officials in behalf of their particular interest.

In addition to eliminating the above entities, the bill also contains provisions to insure that the revenue loss in future years does not exceed the current revenue loss from the tax credit. This is accomplished by providing that if the combined revenue loss from the two credits in any 2-year period exceeds the revenue loss from the current credit for the years 1981 and 1982, both credits shall be suspended until Congress passes legislation making whatever adjustments are necessary to ensure that the revenue loss in the subsequent 2-year period does not exceed the amount specified in the law.

Thus, our proposal will be entirely revenue neutral. In other words, it will not cost a penny more than the current tax credit.

Mr. Speaker, the current tax credit has not worked effectively as a stimulus to small giver contributions for two reasons: First, competition—the current credit applies to all political contributions at every level of government; and second, insufficient benefit to the contributors. Fundraising experts assert that a 50-percent credit is not a sufficient inducement to attract contributions. However, all those who make a contribution take advantage of the tax credit when they file their tax returns. Thus, the 50-percent credit costs millions, but it is not doing the job it was intended to do.

A full 100-percent credit, on the other hand, would have major impact, increasing both the amount and the number of small contributions because people could get back the full amount of their contribution. This would make it cost efficient for candidates to place more emphasis on raising small contributions from the grassroots and less on raising contributions from out-of-State special interests.

This dependence has significant ramifications for the legislative process because, as we all know, incumbents are far more dependent on PAC money than are nonincumbent candidates. For example, the 750 general election candidates who filed reports with the FEC for 1982 election activity reported that 32 percent of their funds came from political action committees. However, nonincumbent candidates received only 24 percent of their funds from PAC's, while incumbents received 38 percent of their money from PAC's.

Moreover, incumbents received twice as much PAC money as did nonincumbent candidates—$107,000 to $51,000. It should be emphasized that these are the average amounts for all candidates. The average amounts for candidates in so-called marginal races are

nearly double the averages for all candidates.

Our proposal will allow Members to reduce this dependency on PAC money by making it easier for them to raise campaign funds from an alternative source of funding—the residents of their own States and districts. This will not only enable candidates to raise larger amounts from current small-contribution givers, it will also increase the number of people participating in the political process by contributing to the candidate of their choice.

It should be emphasized that the current 50-percent tax credit is not working effectively as a stimulus to small-giver contributions and that only a full 100-percent credit can provide the kind of incentive that is needed to enable congressional candidates to lessen their dependency on PAC money.

Mr. Speaker, as Congressman CONABLE noted when he and I testified before the House Administration Task Force on Elections, our bill is not a comprehensive proposal—nor was it intended to be. It addresses only one of the major problems that need to be dealt with in the area of election law reform: dependence on PAC money and the lack of alternative funding.

Basically, our proposal is an effort to make some modest progress at a time when most observers believe it is unlikely we can pass any kind of bill dealing with the problems of campaign finance this Congress. We disagree. We believe the Political Tax Credit Act of 1983 is enactable for the following reasons:

It is nonpartisan in that neither party would benefit over the other. The main beneficiaries would be the institution of the Congress and the American people;

It is a reasonable approach that simply modifies a law that is already in existence;

It involves no bureacracy or regulatory complexities;

It will not cost any more than the current tax credit;

It is responsive to widespread public concern regarding the role of special interest PAC money in our elections;

It will reduce candidate dependence on PAC money by providing an alternative source of funding;

It will eliminate what is, in effect, an unwarranted Government subsidy to groups whose main function is to lobby in behalf of their special interest;

It will stengthen political parties by eliminating competition from candidate fundraising and by giving parties an advantage over PAC fundraising; and,

It will increase citizen participation in the political process by making it easier for the average person to make a contribution.

Following is a factsheet on the Political Tax Credit Reform Act of 1983:

FACTSHEET—THE POLITICAL TAX CREDIT REFORM ACT OF 1983

SUMMARY

(1) Converts the current tax credit into two separate credits as follows:

A credit for contributions to House and Senate candidates under which contributors from the candidate's home state would receive full credit up to a maximum of $50 for an individual ($100 for a joint return), and

A credit for contributions to political party committees under which contributors would receive half credit, also up to a maximum of $50 for a individual ($100 for a joint return).

(2) Eliminates the tax credit entirely for contributions to state and local candidates, presidential candidates, newsletter funds and political action committees (PACs). These entities account for more than 40% of the total revenue loss attributable to the current tax credit.

(3) Controls revenue loss by providing that if the combined revenue loss from the two credits in any two-year period exceeds the revenue loss from the current credit for the years 1981 and 1982, both credits shall be suspended until Congress passes legislation making whatever adjustments are necessary to insure that the revenue loss in the subsequent two-year period does not exceed the limit specified in the law. To assure more accurate data regarding the amount of revenue loss each year, candidates and committees would be required to report the aggregate amount of all contributions of $50 or less and the first $50 of all large contributions.

Revenue loss is also controlled by requiring candidates to remit to the Treasury after each election all unobligated funds in excess of $50,000, but not more than they raised in credit-eligible contributions. Thus a candidate who currently has a big fund reserve would not be required to turn it over to the Treasury. The provision would simply prevent such a candidate from using the credit to increase his campaign fund reserve. Similarly, it would prevent safe seat candidates from using the credit to build up a big campaign fund surplus.

ANNUAL REVENUE LOSS

Following is the year by year revenue loss attributable to the tax credit and deduction on political contributions as estimated by the Internal Revenue Service and the Joint Tax Committee. The deduction was abolished in 1978.

[in millions]

1973	$29
1974	38
1975	57
1976	82
1977	96
1978	139
1979	194
1980	269
1981	263
1982	[1] 294

[1] Preliminary estimate.

HOME STATE CONTRIBUTOR RESTRICTION

The restriction that the 100 percent credit applies only to contributions from the candidate's home state serves two purposes: (1) It places emphasis on the concept that the new credit is a grassroots alternative to special interest PAC money from Washington and other parts of the country, and (2) it prevents direct mailers and high visibility candidates from exploiting the new credit with national mass mail appeals.

IMPACT OF 100 PERCENT TAX CREDIT

The current tax credit has not worked effectively as a stimulus to small-giver contributions for two reasons: (1) Competition; the current credit applies to all political contributions at every level of government, and (2) Insufficient benefit to contributors; most fundraisers assert that the 50 percent credit is not a sufficient inducement to attract contributions. Nonetheless, everyone who makes a contribution takes advantage of the tax credit when they are making out their tax returns. Thus, the 50 percent credit costs millions, but it is not doing the job it was intended to do.

A full (100 percent) credit, on the other hand, would have major impact increasing both the amount and the number of small contributions because people could get back the full amount of their contribution. This, in turn, would make it cost-efficient for candidates to place more emphasis on raising small contributions from the grassroots and less on raising PAC contributions from out-of-state special interests.

ELIMINATION OF TAX CREDIT FOR CONTRIBUTIONS TO PAC'S, NEWSLETTER FUNDS, AND PRESIDENTIAL, STATE AND LOCAL CANDIDATES

PAC's—Most PACs represent a particular special interest. Thus a tax credit for contributions to the PAC is in effect, a government subsidy to that special interest. There is no justification for the government to subsidize groups whose main purpose is to lobby Members of Congress and government officials to influence legislation and government decisions in behalf of their particular interest.

Newsletter Funds—Newsletter accounts are no longer permitted for Members of Congress, thus it is assumed that the only ones which exist today are maintained by state legislators. There is no reason to allow a federal tax credit for contributions to such accounts.

Presidential Candidates—The tax credit is least useful with respect to Presidential candidates since people pay attention to presidential politics, tend to develop a definite preference for a particular candidate, and therefore need no special inducement to help the candidate of their choice. In addition, Presidential candidates receive federal support in the primaries via matching of contributions up to $250 and are totally financed with public funds in the general election.

State and Local Candidates—At least 18 states provide a tax credit or a tax deduction for contributions to state and local candidates while 9 states prove direct public financing assistance to state and local candidates. It is reasonable to expect that additional states would begin providing such assistance if the federal tax credit were limited soley to congressional candidates and political party committees. It should also be noted that unlike candidates for federal office, state and local candidates may legally accept corporate funds in 30 states and union funds in 43 states.

EL PASO HERALD-POST "SPECIAL REPORT: THE BORDER"

(Mr. COLEMAN of Texas asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. COLEMAN of Texas. Mr. Speaker, today I am submitting for the CONGRESSIONAL RECORD the first of a remarkable series of articles by the El Paso Herald-Post, one of the finest newspapers in the country. The Herald-Post has begun this series called "Special Report: The Border/Reporte Especiale: La Frontera" to examine the unique way of life on the United States-Mexico border, and to underscore the special problems that our unique geographical situation presents.

This first report that I am submitting concerns an issue that we in Congress will soon face: The immigration issue and the upcoming consideration of the Simpson-Mazzoli bill. Joe Olvera, a reporter for the Herald-Post, recently traveled deep into Mexico and posed as an illegal alien, paying to have himself smuggled across the border. The reason? To tell a side of the illegal aliens story that seldom gets told—to tell what life is like for the aliens and for the families they leave behind.

Since having an accurate view of the unique way of life on the border is essential to understanding the forces behind the immigration issue, I will continue to make my colleagues aware of this unique way of life on the border through efforts such as that of the El Paso Herald-Post.

The article is as follows:

[From the El Paso Herald Post]

A REPORTERS ODYSSEY: "I WANTED TO FIND OUT WHAT ALIENS GO THROUGH"

(By Joe Olvera)

FROM MEXICO CITY TO LOS ANGELES.—The Mexican soldier's rifle was slung low, held in his hand as he walked onto the bus.

He had a look of pure power.

He stared at me. I was wearing my Mazatlan baseball cap. My size stopped him for a moment. I looked into his eyes—unflinching.

For a full minute we stared into each other's eyes. Suddenly, a slight movement by another passenger caused him to look away—both of us saved face. He turned to me one more time, as if to say, "Perhaps we will meet again."

He walked off the bus, his stride one of pride, of confidence. I heaved a sigh of relief.

Fellow passengers turned to look at me, wondering why the soldier chose me for the confrontation. I wondered, too.

This was not to be my last anxious moment on my trip from Mexico City to America.

My plan was to be smuggled into the United States, posing as one of the millions of Mexicans and other Central Americans who make the same journey.

Although there is no way I can compare what I did—an investigative trip—to the life-and-death experiences of the others, I wanted to find our firsthand what illegal aliens go through.

What I found out is that there are dangers, but it is easy to make it across the border.

It is easy because a person determined to enter the country does not surrender to failure.

If he or she is caught on the first try, another attempt is made, and another, until the attempt is successful.

However the road starts out for an Hispanic, it is not an easy one.

I started out in Mexico City after learning that most people make it on their own to Tijuana, Ciudad Juarez or some other border city.

Once they arrive at their destination, they make contact with a smuggler who will take them across.

Many of them, however, already have an established pattern for crossing—one that does not include smugglers.

Armed with this information, I decided to take my chances on the road.

From the time I boarded my Tres Estrellas de Oro Express Bus, in Mexico City at noon on June 21, until I met a friend in California some 60 hours later, my true identity was known only to me.

I settled down into my smallish seat, excited and nervous at the prospect of being on the dangerous, two lane, Mexican highways for a two-day journey.

I was headed for Tijuana, more than 2,000 miles away.

The small bus seat bent my tall 6-foot-2-inch frame in a most uncomfortable manner.

We traversed through mountainous country, with hairpin curves taken at high speed by our fearless Mexican driver.

After eight hours, we finally pulled into the open air madness that is the Guadalajara Bus Depot.

After Guadalajara, the villages passed like a blur—Pachuca, Queretaro, Irapuato, Tepic, San Ignacio, Guamuchil, Navojoa. I was already exhausted, and we still had countless hours to go before reaching Tijuana.

As it was, riding on that bus brought me a streak of luck that made my crossing into the United States an easy affair.

Traveling on a crowded bus with 25 people (17 of them intending to get into the U.S. illegally) can be a heady experience.

During those moments when I was awake and my head not nodding off into sweet slumber, I overheard people making plans with one another on what they would do once they were in the states. There was no fear among them that they would be overheard since it was assumed that all, or most, of us were Mexicans.

I learned also that Mexico has its own problems with immigration. At three locations along the way, the bus was pulled over by Mexican immigration authorities.

We were all advised by the driver to prepare our identification papers. On one of these stops, an officious-looking man got on board and demanded an I.D. from all of us.

I didn't want the others to know that I was a U.S. citizen, so before the bus stopped, I moved to the rear where there were some empty seats.

I pulled out my Texas driver's license. Other people pulled out what forms of I.D. they had.

"Americano?" the immigration officer asked me quietly. I nodded and he walked away.

Some of those with no I.D.'s were asked—not politely—to get off the bus.

Suspecting that they were not Mexicans but were, rather, from South America, the authorities intended to question these people.

People of El Salvador, that battle-torn nation, are persona-non-grata in Mexico.

They create as many problems for Mexican authorities and social services as, some people claim, Mexicans create in the United States.

Those without I.D. are asked questions about Mexican life and customs.

Two women who looked for all the world like Indians from Oaxaca (which they were), were asked if they knew how to make tortillas.

They were laughing about it later on the bus, because they said their anxiety made them forget the recipe they had used all their lives.

The man who was seated beside me, hereafter known as el Guero, told me he was positive one of the men asked to deboard was Salvadoreno.

Later, after the Salvadoreno had been allowed back on the bus, I discovered that he did not have a Mexican accent. He said that he was going to the United States, but he never told me his nationality.

He also told me he had bribed the official with 500 pesos. But, "500 pesos is nothing," said el Guero. However, I could tell that 500 pesos was more than the man could afford.

Two more check points, each with greedy immigration officers, awaited him.

After one day of traveling with el Guero, I told him that I too wanted to go into the United States. I told him that I did not know how I was going to do it, that I hoped to pick up a smuggler, or vice-versa, but that I just did not know how the system worked.

As luck would have it, Guero offered to help me get across.

Guero explained to me that his brother would be picking him up in Tijuana. He said that he was sure his brother would be glad to smuggle me into the United States, because that was the way Guero, and other family members came to America.

Actually, Guero said, he had been smuggled into the United States via Tijuana many times in the past five years and he had never been caught.

His brother, he said, had a specially equipped car with hydraulic lifts in the rear that would escape the suspicion caused by a too-low trunk.

His brother always had big cars, Guero said, and I could, no doubt, fit well in the car trunk with him. Would I be willing to take the risk?

"Yes!" I answered reluctantly, and nervously. I thanked Guero for his offer.

Guero said that his brother was a resident alien in the United States, and that he could go back and forth to Mexico without any problem.

Guero assured me that aside from my getting cramps in my legs the trip across would be a smooth one, as it had always been for him.

Guero was right.

I finally met Guero's brother after waiting at the Tijuana Bus Terminal for a nervously long time. His only remark was about how tall I was. He said my legs would be very sore from being locked up in the trunk for possibly more than one hour.

I spoke as little as possible, since I did not want Guero's brother to detect my U.S. Chicano accent.

When Guero and I climbed into the car trunk, I had an ominous feeling we would be discovered.

But, there was no way out of it by then.

Guero had told his brother that I was from San Nicolas in the state of Jalisco. There was no time to engage in a long discussion with Guero's brother, so he accepted me at face value.

As the car's trunk slammed down on us, my heart was beating very rapidly. I had

caught a cold on the bus trip from Mexico City.

I was tired, smelly, and my legs were already numb from the long bus trip.

Guero told me to hold a handkerchief to my nose and to blow into it periodically to avoid my sneezing or coughing at the checkpoint.

Guero and I talked softly as the car made its way smoothly to the border. I was scared and nervous to be lying there, not knowing what was happening outside.

We tried to be as quiet as possible. I could sense that Guero was nervous too.

I was a pollo, literally in Spanish, a baby chick. So was Guero. Though he made the trip several times, each crossing is like the first one.

After being on the road for what seemed like an eternity, we felt the car moving and stopping at shorter intervals.

"Ya estamos en el puente (we're at the bridge)," whispered Guero to me.

I knew we had arrived at the point-of-entry, and my apprehension increased. My legs were bent and cramped so that I longed to stretch them.

Guero was a small man, so he was more comfortable than me, but I could see that his frame also was bent in the cramped quarters. A small light had given some solace, but at the approach to the bridge, Guero had flicked it off.

We cold breathe easy enough, but my nervousness made me gasp for air. We heard muffled sounds outside the car; someone was opening a door, and then, closing it.

I sensed that it was our turn at the checkpoint.

I held my breath. The car's trunk was carpeted and clean; Guero shook, and I did too.

Even though I am a U.S. citizen, I was breaking the law. By not entering through a checkpoint and declaring my citizenship, I was entering the country illegally.

Our car began moving again. This time I could sense that it was picking up speed, and soon we were flowing smoothly at a good rate of speed.

Guero shouted out in glee, and pumped my hand.

"Ya la hicimos," he said, telling me that we had made it. I breathed a sigh of relief. I was glad I didn't have to do this frequently.

After driving for a while longer, Guero's brother opened the trunk. Guero jumped out and pumped his brother's hand. I got up slowly, disentangled my legs and tried to climb out of the car trunk.

Guero came over to help me. It took me a while to get the blood circulating.

I was still nervous and shaking from the experience. Guero and I climbed into the back seat. We both had huge grins on our faces.

The Anglo woman, who had driven the car past the checkpoint, was telling Guero's brother, in English, that she wished he would find a better way to bring his family to the United States.

"This sort of thing is getting on my nerves," the woman said. "You know we're breaking the law."

"Nah," said Guero's brother. "Don't worry, they'll never catch us. Besides, if you won't help me, I'll find someone who will."

"Never mind," she said. A tone of resignation crept into her voice.

I just kept quiet, not letting on that I knew any English. For all they knew, I was from San Nicolas.

Guero didn't speak any English, so he just gazed out the window while his brother and his friend talked, argued, and made up.

I, of course, understood every word, amused by the fact that they were speaking about me. She complained about the fact that by crossing me to the United States, that they were officially smugglers.

She said that they had crossed that thin barrier, which separates smugglers from ordinary people who only bring their relatives to the United States.

She was complaining too about the fact that some smugglers charge as much as $350 and that he had never mentioned any price to me.

He answered that if he had quoted me a price, that meant they really were smugglers. He didn't want to cross that line at all, he said to her.

"He's my brother's friend, and that's all that matters to me," he said.

I silently thanked him for what he had said and later paid him $100. I liked Guero's brother, for his courage and daring.

When Guero's brother asked me where I wanted to go, I told him the Greyhound station in Los Angeles, in as Mexican an accent as I could muster (rolling my r's in the English pronunciation).

After I nodded off and dozed for brief, but welcome, periods of time, Guero's brother pulled into the station.

I thanked Guero's brother, gave Guero a Mexican abrazo, waved goodbye at the Anglo woman, and walked into the Greyhound station. My mission was complete.

All that remained was for me to go to Chicago, where my assignment would take me on the final leg.

I settled back to take in the American scenery, and prepared myself for working in Chicago.

This time, there would be no soldiers at any checkpoints. No officers of any kind interrupted our trip to the city at the foot of Lake Michigan.

DREAM FIZZLES—ILLEGALS DISCOVER ABUSE, LOW WAGES IN CHICAGO

(By Joe Olvera)

CHICAGO.—"All arbol callido todos le quieren sacar lena," (Everyone wants wood from a fallen tree) says Daniel Vargas.

Vargas, of El Salvador, is but one of a quarter million "fallen trees" in Chicago.

They are illegal Hispanics—from El Salvador, Nicaragua. Guatemala, Colombia and Peru. Most, of course, are from Mexico. They flee political violence and economic ruin in search of fortune and a better life. But what they find is not much better than what they leave behind.

Most of their "wood" is taken by American employers who pay them less than minimum wage; by landlords who charge them high rents in substandard housing; by bribe-hungry Mexican immigration officials, and by smugglers who take every thing they have to deliver them to their final destination.

Donato R. works at a restaurant. He said that he is paid only $2 an hour, but that the owner keeps telling him he is earning the minimum wage.

"I know better," said Donato, "There have been times when I've put in many hours of overtime, and yet, my paycheck continues being small.

"But what can I do? I need to work. If I complain, I get fired. If I get fired, my family in Mexico will not eat. I have to swallow my pride and accept their abuse, and their dishonesty."

Donato is an illegal Mexican who has lived in the Chicago area for two years. He lives in the outskirts of Chicago in a room which he shares with five other men.

The room rents for $205 per month, and has nothing in the form of luxuries. The floors are hard, and the room is in a state of perpetual bachelor's disarray.

Dirty mattresses, dirty sheets and dirty bedspreads decorate a variety of sleeping accommodations. The building is old, and decrepit, and their slumlord doesn't care.

The room is a grimy green with walls decorated by the pinup posters of sexy women found in the pages of Alarma and other Mexican girlie magazines.

A small-framed portrait of La Virgen de Guadalupe also decorates one side of the room.

Their social life consists of having a few beers in lounges where violence and anger predominate. Not much is left from their paycheck once they send money home to families in Mexico.

Not much is left from their dreams either. The American dream for Donato and his roommates has fizzled out. Donato hopes to return to Mexico in November. His roommates, however, are determined to stay here and to survive.

Donato came to this country in April 1981. Basically, he and his five roommates all have the same story.

Donato first came across the border in Tijuana illegally, with 12 men in a large, late model Dodge. He said that he got caught his first time around, and was sent back to Tijuana.

"The next day the coyote smuggled us in again," he said. "This time, there were only seven of us in a station wagon. Once I got to Los Angeles, I took the train, the LA Express to Chicago."

Donato said that it cost him $550 to be delivered from Tijuana to Chicago by the smuggler.

"I paid him when I got to Chicago, three days after we had left Tijuana," he said. "I did not feel any great thrill at seeing Chicago, but I was happy to see my wife who was already here to meet me."

Donato and his wife worked together at a plastics manufacturing plant, but eventually, she returned to Mexico, because she missed their five children. Now, Donato longs for the day when he can rejoin his family, he said.

Donato, like many illegal Hispanics in Chicago, works a variety of jobs, at a variety of locations. He presently works in a Chicago suburb known as Morton Grove, a small community of some 23,000 people.

Vargas came to the United States illegally from El Salvador by himself. His wife followed him six months later.

He left, not because he had any political problems in the war-torn country, but because he worried for the future of his children.

"I've always been a hard worker, always tried to support my family," said Vargas. "I was worried about my sons, they were starting to form alliances with the rebels. I didn't want my sons murdered like so many others.

"Getting through Mexico to the United States was extremely difficult, because Mexican authorities abuse us even worse than U.S. authorities. I had to pay so many bribes that I arrived in the United States penniless."

After working his way through Tucson, he found a church group that helped him to Chicago.

"We are very thankful to all the churches which helped us along the way. God's hand was guiding us."

Nearly all of the illegal Hispanics arrive in Chicago with their pockets empty, but their heads full of stories about the riches of America.

Now they are in America.

Cesarina Dominguez, a social worker with Chicago's Department of Human Services, said the situation with illegals is "sad," because they are taken advantage of.

"The exploitation level is incredible. Men and women are often stripped of their dignity, the only thing that can keep them going," she said.

Arnulfo M. came to Chicago from Puebla, Mexico, five years ago, and he said he plans to return to Mexico in November and "never return" to the United States.

"There are many problems between blacks and Hispanics," said Arnulfo M. "Two Hispanics were recently beaten to death by blacks in this area (Pilsen-Little Village). Since Harold Washington was elected mayor, it has been rougher on us Hispanics."

The Hispanic new to the United States goes through a tremendous emotional shock. They must jump rapidly and adjust rapidly from one set of values to another.

Julio Montoya is a *Salvadoreno* who first came to this country illegally in 1970. He is now a naturalized citizen, working as a journalist for *La Raza* and other Spanish language weeklies in Chicago.

He said there is an underground network that helps illegal Mexicans adjust to living in Chicago, but people from El Salvador don't get "as much help" as Mexicans.

"Before I got my legal papers, I lived the fear and the uncertainty that an illegal lives here," said Montoya.

"There is the pressure of not speaking or reading English, there is the pressure of not understanding the cultural traditions.

"Some things are changing; for instance, the image that Mexicans are the only illegals in Chicago is wrong.

"Mexicans do constitute the majority of illegals, at some 60 percent of that population." He added that Salvadorans are now coming to the United States in greater numbers.

He estimated there are more than 250,000 illegals in Chicago. Of these, 60 percent are Mexican, 10 percent are *Salvadorenos*, and the rest consist of *Guatamaltecos, Colombianos, Peruvianos*, and *Nicaraguenses*.

"In my country, we live between life and death; life is worthless; the risk in coming to the United States is minimal compared to the risk of remaining in El Salvador," he said.

"Still," Montoya said, "You know what? If I were given the chance to return to a peaceful El Salvador, I wouldn't hesitate for a minute. I'm an unwanted stranger in the United States, even though I'm already a citizen.

"But, I love El Salvador. I love my country. I would not hesitate to choose El Salvador over the United States."

MIGRANTS LOOK TO U.S. FOR SALVATION

(By Joe Olvera)

SAN NICOLAS, JALISCO, MEXICO. At times, during the American growing season, the cattle outnumber the people walking on these cobblestone streets.

This village of about 1,000 people is like many others in the Mexican interior. Nearly every man and woman migrates to the United States illegally to work the fields of American farms. The streets are empty in the summer, full in the winter.

Those who have worked as migrant farm workers "are readily identifiable," said Guillermo Llamas, who used to live in San Nicolas but now lives in Guadalajara, some 25 miles away.

"They leave wearing *guaraches* (sandals) and they return wearing wing-tips. There is not one man in San Nicolas who has not illegally entered the United States to work," Llamas said.

Many Mexicans still view the United States as the land of opportunity, where dollars can be swept up off the streets by hard-working field hands who can then return to Mexico with riches to spend.

But as often as not, the streets of San Nicolas greet a man returning from the United States with broken dreams and a broken family.

Mexican farm workers are fleeing the interior because of a severe drought that is crushing more than 8 out of every 10 acres of farmland. In their trips to the vineyards of California or farms of New Mexico, Arizona and Texas, they encounter many difficulties, such as immigration officers and competition for work.

The problems when they return home might be even worse. The long-term family separations often lead to divorce.

Antonia Amezcua, a San Nicolas housewife who hasn't seen her husband in five years, said the burden of illegal aliens falls heaviest on those who remain in Mexico.

"Many times, too many times, families are left broken, without a father to offer a strong hand and discipline the children who tend to go astray once the father is missing," Mrs. Amezcua said.

"When and if the father returns, maintaining or re-establishing a firm hand is difficult because by then the children, especially the boys, have established survival life patterns of their own."

Alienated because he has lost control of his family's destiny, the father has two choices, Mrs. Amezcua said.

He can stay home and re-establish his dominant role as the head of the family, although this means he must find work in Mexico and struggle for a living at very poor wages.

Or he can "save face" by returning to the states, working hard and sending money home, which is what has happened in her case.

"This is what the children want him to do anyway," said Mrs. Amerzcua. "They like the living which their father's U.S. dollars provide in Mexico.

"The surprising thing is that there is a general acceptance of this new pattern," she said.

"Mexican families used to stay together through very tough times. Now, it just seems easier to break up.

"The main thing now is for the husband to be able to provide for the family—whatever that takes, and however far that takes him."

Llamas, who runs a Guadalajara business, said his father used to work the U.S. fields, illegally at first, but then legally. Llamas was once a migrant farm worker, but no more. He's made enough American money and chooses to live in Mexico.

Even though his father was missed during his trips to the United States, he used the money wisely. Llamas said his father insisted on a full education for all his children, so that they would not have the difficult life he had.

"My father has always been a mule when it comes to working hard," said Llamas, 34. "Fortunately, he instilled that love to work in all of us."

Llamas has had enough of working for low pay in U.S. fields and is trying to make it in his own country. He recently opened, with two partners, a firm that sells electronics equipment to construction companies in Guadalajara.

He earned a degree in electrical engineering from the University of Guadalajara. Even though he has a permit to live legally in the United States, Llamas said he has no desire to move.

"The situation is very difficult for Mexicans in the United States. I tried to find employment as an electrician, but nobody would hire me. All the better jobs go to U.S. citizens.

"I had grown tired of working the fields, so I quit the United States and returned to Mexico. I'm determined to make it here. I want to make it here. This is my country."

Llamas said that most of the people who migrate to the United States are those without any resources or with very low employment skills.

"Most of the people who go to the United States are people who are not even prepared to work in Mexico, let alone the United States," he said.

"These people have such a hard time in Mexico that they look to the United States as their salvation. If they do manage to find work in Mexico it usually means performing the most menial of jobs."

Gerardo Buenrostro, 19, is one such man. He was in San Nicolas, having recently arrived from the states where he worked "the grapes."

He said that this had been his second trip to the United States, and that it certainly would not be his last.

"The first time I went into the United States illegally, I was caught by *la migra* (the Border Patrol)," Buenrostro said. "I had paid $350 to a *pollero* (smuggler) to take me across the border in Tijuana."

Buenrostro said usually he would not have lost that money, but since the *pollero* had already done his job—getting him to Los Angeles—he paid the money.

After getting caught the first time, he succeeded on his second attempt, and made it to the Napa Valley grape vineyards in California.

"I was only in Napa for four months, when the migra pulled a raid at the farm I was working in in Santa Rosa," he said.

"They came in with two vans, and went from row to row picking us out from the legal ones. They caught 15 of us men. It was early, around 9 a.m., they took us to Tijuana."

On his second successful trip, Buenrostro walked for five hours through the hills near San Diego. The coyote (smuggler) "brought us food and water, and generally was very helpful. We finally went from San Clemente to Los Angeles in a large van. Once we arrived in Los Angeles, it was every man to himself. The coyote had already done his job."

Another attempt, Buenrostro went across in the trunk of a car with four other men.

Buenrostro said that he loved the United States. The first time he was in the United States, he managed to send $2,500 to his family in Mexico.

This time he earned less, $1,000, but the dollar is worth more in Mexico now.

He also said that since he had been caught in the raid, he had not been paid by his em-

ployer, but that his two brothers, one of whom is a legal resident, in Napa would see to it that he received his pay.

Buenrostro said that he truly likes the United States, but that he still prefers to live in Mexico.

"Maybe some day I will make enough money to buy myself some land, or a business," he said. "Until that day comes, I will still go to the United States to work. It's great over there."

But while some Mexicans see the United States as a land of opportunity, others see it as a land of opportunists.

Miguel Acosta, an official with the Department of Agriculture in Mexico City, said that the United States is like a "cancer," which preys on the innocents in Mexico.

"Don't sit there and tell me that the United States does not benefit from the labor of Mexicans," said Acosta.

"The United States has grown rich and is a great country because of Mexicans who built that nation."

Patricia Mendiola, a communications specialist in the Mexican Department of Agriculture, said the idea U.S. streets are paved with gold leads to grief for many Mexicans.

"People don't realize that the cost of living is so much higher in the states, and that those few dollars they will earn will barely provide a subsistence," Miss Mendiola said.

Julia Palacios, a sociologist who teaches at the *Universidad Ibero*-Americana in Mexico City, has made a study of the problems faced by illegal immigrants.

"There are so many different types of immigrants," she said. "Some of them don't have any financial problems. They just go to the United States for the adventure and the excitement."

Mrs. Palacios said more than 80 percent of illegal farm workers return to Mexico when there is no more work.

RESULTS OF TEXAS 10TH DISTRICT QUESTIONNAIRE

(Mr. PICKLE asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. PICKLE. Mr. Speaker, I am releasing the results of a questionnaire put out by my office soliciting the opinions of the residents of the 10th Congressional District on a wide array of national issues.

The questionnaire was mailed to postal patrons (households) in the 10th Congressional District in early June. So far, I have received approximately 16,000 responses from constituents.

While the results are probably not as reliable as a more scientific survey, the sample is large enough to give me some feel for how the folks in the 10th District are thinking.

On defense spending, I think it is significant that 68.6 percent of the people responding think that an increase in defense spending is needed. Although people are divided on how much it should be increased, there appears to be general consensus that we must do something to counter Soviet advances. Along this line, I think it is noteworthy that only 12.2 percent of those responding think the United States has any advantage over the Soviets, while 44.1 percent think the Soviets have the advantage and 43.6 percent believe both powers are roughly equivalent. On specific weapons systems, repondents support development of the MX missile by a narrow margin of 48.4 to 42.7 percent. However, they favor construction of a new long-range bomber by a wider margin of 58.5 to 31.4 percent.

On Central America, people responding to the survey believe—by a margin of 67.8 to 25.8—that the presence of a Marxist government in Central America poses a security threat to the region. But, interestingly, they appear to be less certain how to respond to the threat. By a margin of 50.7 to 42.8 those responding oppose continuation of military aid to El Salvador. Yet, by a margin of 47.3 to 44.9 they favor the use of covert activities to destabilize unfriendly governments, that is, like Nicaragua.

On domestic issues, respondents are divided fairly evenly in their assessment of cuts to Federal assistance programs in the past 2 years; 39.7 percent said they were too much; 23 percent said they were too little; and 37.3 percent thought they were about right. Still, when asked whether spending for specific Federal assistance programs should be reduced or increased, there was much more sentiment for reducing spending. Of the Federal assistance programs that respondents thought should be reduced, the food stamp program was mentioned most, followed by legal services for the poor.

This seems to reflect a common perception that the Government spends too much on social welfare programs. Still, when asked how they would balance the budget most people said, in an apparent contradiction, they would cut defense spending. Ironically, the option picked by the fewest respondents was to reduce assistance to the poor, elderly, and disabled. The second most frequently mentioned solution was to delay or cap the third-year tax cut.

On an issue of particular interest to me, 69 percent of the respondents favored the change in the retirement age for full social security benefits to 67 by the year 2027. This change is the result of an amendment I offered during consideration of the social security bailout bill earlier this year.

On other issues, respondents favored passage of the equal rights amendment, which has been reintroduced in Congress, by a narrow 47.7 to 45.1 percent margin. Those answering the questionnaire favored a ceiling on campaign spending by political action committees in congressional campaigns by an overwhelming margin of 82.3 to 11.5 percent. Respondents oppose tutition tax credits by a margin 60.3 to 36.5 percent. Respondents favored a constitutional amendment to permit prayer in public schools by a margin of 54.9 to 39.1 percent. They oppose a constitutional amendment to prohibit all abortions by 79.7 to 16.6 percent. Levying fines against employers who knowingly hire illegal aliens is favored by 75 to 20.3 percent. However, granting permanent residency to illegal aliens residing in this country prior to January 1, 1981 is opposed by 62.4 to 29.9 percent.

On other issues, the decontrol of natural gas is favored by a margin of 55.4 to 29.7 percent. A lower minimum wage for teenagers is favored by a margin of 63.5 to 33.2 percent. Easing environmental controls on industry is opposed by a margin of 75.5 to 21.9 percent. Respondents are divided almost evenly on Japanese imports; 46.3 percent favor them, 47.3 percent oppose them.

Mr. Speaker, a question-by-question breakdown of answers given to my 10th District questionnaire for the benefit of my colleagues follows.

Results of 10th District Questionnaire

	Percent
1. Which of the following levels of defense spending could you support?	
A. 4 percent increase—(House recommendation)	21.5
B. 6 percent increase—(Senate recommendation)	21.5
C. 10 percent increase—(Administration proposal)	25.6
D. No Increase	17.8
E. Decrease	13.7
2. Do you support development of the MX missile?	
Yes	48.4
No	42.7
No opinion	8.7
3. Do you favor the construction of a new long range bomber to replace the B-52?	
Yes	58.5
No	31.4
No opinion	10.0
4. In your opinion, which of the following statements best characterizes the nuclear balance between the Soviet Union and the United States?	
A. Soviet Union has slight advantage	26.6
B. United States has slight edge	8.9
C. Both powers roughly equivalent	43.6
D. United States has big advantage	3.3
E. Soviets have big advantage	17.5
5. Do you favor continuation of military aid to El Salvador?	
Yes	42.8
No	50.7
No opinion	6.5
6. Do you favor the use of covert activities by the United States to destablilize unfriendly governments (i.e. CIA involvement in Nicaragua)?	
Yes	47.3
No	44.9
No opinion	7.9

7. Do you feel that the presence of a Marxist government in Nicaragua poses a security threat to the United States and other governments in the region, including Mexico?

Yes	67.8
No	25.8
No opinion	6.4

8. Do you favor greater Congressional involvement in the formulation of foreign policy?

Yes	51.8
No	39.0
No opinion	9.8

9. Do you favor levying fines against employers who knowingly hire illegal aliens?

Yes	75.0
No	20.3
No opinion	4.7

10. Do you favor granting permanent residency to illegal aliens who have resided in the United States prior to Jan. 1, 1981?

Yes	20.0
No	62.4
No opinion	7.7

11. In the past two years, the Congress has reduced expenditures for a number of the major federal assistance programs that aid the poor, disabled and the elderly? In general, do yo feel these cuts have been:

Too much	39.7
Too little	23.0
About right	37.3

12. For which of the following federal assistance programs, should spending be reduced?

	Number
A. Aid to Families with Dependent Children	619
B. Child Nutrition Programs	297
C. Food Stamps	1,066
D. Low Income Energy Assistance	613
E. Medicaid	354
F. Supplemental Security Insurance	624
G. Legal Aid	888
H. Education grants to low-income students	643
I. Housing	641
J. None	530

13. For which of the following federal assistance programs, should spending be increased?

A. Aid to Families with Dependent Children	384
B. Child Nutrition Programs	571
C. Food Stamps	195
D. Low Income Energy Assistance	308
E. Medicaid	491
F. Supplemental Security Insurance	275
G. Legal Aid	273
H. Education grants to low-income students	498
I. Housing	312
J. None	870

14. The Social Security bill just signed by the President addresses the long-term solvency of the Social Security system by gradually increasing the retirement age for full benefits to 67 by the year 2027. It makes no changes before the year 2000 and maintains the right to retire at age 62 at a lower amount.

A. Do you agree with this change?

	Percent
Yes	69.0
No	23.2
No opinion	7.9

B. Do you think that Congress, in conjunction with this change in full retirement, should provide an occupational disability for individuals who still must retire early for health reasons? (The Social Security bill calls for recommendations to be presented to Congress for such a program.)

Yes	72.1
No	18.8
No opinion	9.1

15. The Equal Rights Amendment has been reintroduced in Congress. Do you favor passage of the ERA?

Yes	47.7
No	45.1
No opinion	7.2

16. Do you favor easing of environmental controls on industry?

Yes	21.9
No	75.5
No opinion	2.6

17. Should we impose trade restrictions on Japanese imports?

Yes	46.3
No	47.3
No opinion	6.5

18. Do you favor a Constitutional Amendment to prohibit all abortions?

Yes	16.6
No	79.7
No opinion	3.7

19. Do you favor a Constitutional Amendment to permit prayer in public schools?

Yes	54.9
No	39.1
No opinion	5.9

20. Do you favor a lower minimum wage for teenagers?

Yes	63.5
No	33.2
No opinion	3.3

21. Do you favor decontrol of natural gas?

Yes	55.4
No	29.7
No opinion	14.9

22. Do you favor tuition tax credits for parents who send their children to private schools?

Yes	36.5
No	60.3
No opinion	3.2

23. Do you favor a ceiling on the amount of political action committee (PAC) funds that can be used in Congressional elections?

Yes	82.3
No	11.5
No opinion	6.2

24. Current projections indicate the Medicare trust fund will experience financial shortfalls before the end of the decade. How would you deal with this problem?

	Number
A. Fund Medicare from general revenues	415
B. Increase payroll taxes	141
C. Increase deductibles and co-insurance payments	329
D. Put further limitations on payments to hospitals and physicians	832
E. Restrict coverage of certain benefits	396
F. Replace Medicare with National Health Insurance	615
G. None of the above	112
H. No opinion	140

25. Agricultural extension, price supports and loan programs should be:

	Percent
A. Continued because they stabilize the farm economy and open up new markets for products	39.1
B. Discontinued because they cost too much and violate supply and demand economics	47.0
C. No opinion	13.8

26. The 1984 federal budget deficit is projected to be $170–$180 billion. How should the federal government reduce the deficit?

	Number
A. Reduce defense spending	868
B. Generate new revenue with new or higher taxes	443
C. Reduce spending for entitlements	551
D. Reduce assistance to poor, elderly, disabled	334
E. Defer or cap third-year tax cut	694
F. All of the above	99
G. None of the above	204

KENNETH HEATH—PREEMINENT AGRICULTURAL AND CIVIC LEADER IN SOUTHEAST MISSOURI

(Mr. EMERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. EMERSON. Mr. Speaker, it is with deep sadness that I rise today to inform my colleagues of the loss of one of southeast Missouri's preeminent agricultural and civic leaders, my friend Kenneth R. Heath of Dogwood, Mo. Kenny was killed on his farm in a mishap on July 18.

Mr. Speaker, as I am sure everyone who serves in an elected office feels, one of the most rewarding experiences a public servant has is the opportunity to meet people, make new friends and come to know well those folks who make up the vital fabric of our districts, States, and country. It was during my first campaign to serve in the House that I came to know Kenny. He was always ready to offer his friendship, advice and counsel to facilitate sound agricultural policies, a better community, a better State and

country; indeed, a better world. That is the kind of man Kenny was and that is the way he lived his life, with everyone with whom he came into contact.

I will not go into the many organizations and public service groups Kenny lent his help to, because they are mentioned in the article accompanying these remarks in the CONGRESSIONAL RECORD. I just want to say that Kenny was a fine man and able leader who left things in a better condition than he found them. His energy, concern and commitment to the service of his fellow men can never be totally replaced.

I am certain that all Members join me in sending our heartfelt condolences to Kenny's wife Nancy, his children, his mother and sisters.

[From the Daily Standard (Sikeston, Mo.), July 19, 1983]

BY ELECTRICAL SHOCK: FARMER DIES IN ACCIDENT

EAST PRAIRIE.—Kenneth Ray Heath, 44, of East Prairie Route One, a prominent landowner, farmer and curator of the University of Missouri-Columbia, was killed sometime between 5 p.m. and 6 p.m. Monday on his farm in the Dogwood community.

Mississippi County Coroner Elgin McMikle, called to the scene about 8 p.m. Monday, said today death was accidental and Heath was killed instantly by electrical shock from 440 current.

Heath reportedly had gone back in the field, about three quarters of a mile west of the Dogwood store, to check an irrigation system which had ceased functioning. He evidently was working on the pump, powered by 440 current, as he had a screwdriver in his hand when found lying face down. Water was standing around the pump area and the ground was very wet, according to Sheriff Avery Hutcheson, who also investigated the death.

An employee on the Heath farm, Earl Bryant, went to check on Heath when he failed to respond to the farm radio. Bryant went to the field to locate and assist Heath and found the body near the irrigation system.

Commenting the death was "due to a human error," the coroner said Heath's hands and the left side of his chest was burned from the electrical shock.

Active in farming in the Dogwood community, Heath was appointed to the University of Missouri Board of Curators by Gov. Bond in January for a six-year term. He was a board member of Citizens Bank in Charleston, board member and part-owner of Dogwood Store and Oil Co. and a member of the Foresight Panel of "Missouri Ruralist."

He was presented the University of Missouri Citation of Merit Award and the State Extension Farm Management Award in 1981 and had been named Outstanding Young Farmer by the Sikestone and East Prairie Jaycees.

Other activities include being a member of the University of Missouri's State Extension Advisory Committee, a member and past president of the College of Agricultural Alumni Board; and a member of the Search Commitee for Associate Dean of Agricultural Extension in 1981-82.

Heath has been active in Farm Bureau, serving as chairman of the 10th Congressional District Farmer's Action Committee for four years, State Young People's Program chairman from 1963-64 and was a past Mississippi County board member and president of Farm Bureau.

A 1960 graduate of the University of Missouri with a major in soils, Heath was a member of the East Prairie R-2 School District, Dogwood United Methodist Church and Sunday School superintendent, a 32 degree Mason; past chairman of the Mississippi County Soil Conservation Service and participated in a delegation sponsored by the State Department of Agriculture which toured farm operations in Western Europe and Russia.

Born Sept. 26, 1938, son of Margaret Hurley Heath, who survives of the Dogwood community, and the late Noah Sylvester Heath, he had lived in Mississippi County all his life.

On Jan. 21, 1965 he married Nancy Gail Matthes, who survives.

In addition to his wife and mother, surviving are: one daughter, Emily Margaret Heath of the home; two sons, Brian Ray Heath and Alan Corey Heath of the home: and two sisters, Mrs. Bill (Margie) Arington of the Dogwood community and Brenda Morris of Fort Lauderdale, Fla.

One Sister, Martha Faye Heath, preceded him in death.

Friends may call after 6:30 p.m. today at Shelby Funeral Home in East Prairie, where Masonic rites will be conducted at 8 p.m. today.

Funeral services will be conducted at 3 p.m. Wednesday in the funeral home with the Revs. Floy V. Brower and Harold Norton officiating.

Burial will follow in Dogwood Cemetery.

[From the Charleston (Mo.), Enterprise-Courier July 21, 1983]

Missouri University Curator Kenneth R. Heath, 44, of the Dogwood Community, was electrocuted late Monday afternoon while working on an irrigation pivot system on his farm.

The Mississippi County agribusinessman, civic leader and bank director was appointed to a six-year term on the University of Missouri Board of Curators by Governor Christopher Bond in January of this year. The Curators are the governing body for the four-campus Missouri University system.

Coroner Elgin McMikle ruled the death accidental.

Heath was a lifelong resident of Mississippi County and graduated from East Prairie High School in 1956. He received his B.S. in Agriculture from the University of Missouri-Columbia in 1960.

Active in civic affairs for many years, Heath was a member of the East Prairie R-2 School District Board of Education, a member of the State Extension Advisory Committee, and served on the board of directors of the Citizens Bank of Charleston. He was also active in the ag alumni organization of the University of Missouri.

He had served as chairman of the Mississippi County Soil and Water Conservation Board of Supervisors, was a member of the Mississippi County Airport Commission and the Mississippi County Extension Council.

A resident of the Dogwood community, Heath farmed land in Mississippi and New Madrid counties and was a co-owner of the Dogwood Store and Oil Co.

In 1981, Heath received the State Extension Farm Management Award and the University of Missouri Citation of Merit Award.

Heath was born Sept. 26, 1938 in the Dogwood community to Mrs. Margaret Hurley Heath and the late Noah Sylvester Heath. On Jan. 21, 1965, he married Nancy Gail Matthes, who survives.

In addition to his wife and mother, he is survived by two sons, Brian Ray Heath and Alan Corey Heath, and one daughter, Emily Margaret Heath, all of the home; and two sisters, Mrs. Bill (Margie) Arington of Dogwood and Brenda Morris of Ft. Lauderdale, Fla.

He was preceded in death by his father and one sister, Martha Faye Heath.

In lieu of flowers, the family requests that a scholarship fund be established in Mr. Heath's memory.

FARM POLICY

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Kansas (Mr. GLICKMAN), is recognized for 30 minutes.

Mr. GLICKMAN. Mr. Speaker, I take the floor of the House today to talk about farm policy. It strikes me that no time since I have been in Congress has the issue of farm policy been more chaotic than it is right now.

At no time since I have been in Congress for 6½ years has there been a crisis of decisionmaking both at the Federal level as well as the private level and the State level, both at the legislative level as well as the administrative level.

Nobody really knows what to do about farm programs. That means both grain programs, livestock programs, as well as some of the other commodity programs we have such as sugar and dairy. And the public policy choices are just about nil.

But let me talk about what we have right now on farm policy and farm programs.

The main program we have to deal with is the PIK program, payment-in-kind. In my judgment that program has failed in every respect.

It was balleyhooed as a free program or next to free program, but the estimates now are that PIK may cost as much as $21 billion this year.

In spite of huge levels of participation, as much as 18 percent of the wheat acreage in the country was enrolled, the stock reductions will be minimal. Only about 8 percent for wheat.

So for about $21 billion we have got virtually about the same amount of reductions as we had received the previous year.

Farm income may actually fall again this year as huge PIK supplies depress the cash markets. The only moderation may be due to somewhat lower costs of production this year and granted the recent announcement of grain sales to the Soviet Union may help to a certain degree.

Of greatest concern to farmers throughout this entire country is that the management and administration of the program has been and continues to be a nightmare and may be driv-

ing up the costs of the program, thus decreasing its ability to bolster the economy.

Mr. Speaker, in last week's Business Week magazine, the edition dated August 8, 1983, there was an article entitled "How PIK Is Poisoning Farm Policy."

One of the things I worry about as a Member of Congress from an agricultural producing State is that for the first time we are beginning to see a disintegration, a breaking apart of the farm coalitions that have for years put together farm bills in this place, primarily because of negative feelings about the PIK program.

I think it is worthwhile reading a couple of sections from that Business Week article. I quote:

Only last winter farmers tugged at the Nation's heartstrings as they battled depressed crop prices and massive debt to avert the bankruptcy auction gavel.

Today, in an abrupt reversal of sentiment, farmers are the target of scorn—now nowhere more than in the rural communities where they market their grain and bank their profits. From the main streets of the Midwest to the corridors of the Capitol, the realization is taking hold that farmers have wrangled the largest and perhaps least effective Federal bailout ever, the $12 billion payment-in-kind program, or PIK.

The mounting budgetary costs and apparent ineffectiveness of PIK and other farm programs are creating a powerful political backlash. But farm interests are bitterly split over how to contain the costs of agricultural supports and deal with the farm sector's fundamental problem of overcapacity. That split is paralyzing policymaking and it threatens to undermine efforts by the Reagan administration to overhaul the Government's farm programs.

That is the end of the article, Mr. Speaker.

I think that the PIK program is doing more than undermining the efforts of the administration. I think that the PIK program is jeopardizing the fragile coalition that has made agricultural policy for about a century.

Now it looks to me as if we lack a firm policy for the future. I believe that the administration continues to use farm policy as a budget balancer without regard for its implications for farm programs.

The way the announcement of the 1984 wheat program has been handled shows no regard for farmers. The administration has withheld details of the program even at this stage as a political bargaining chip for its too little, too late proposal to freeze target prices.

□ 2250

Also its announcement last Friday of further details conflict on target price freeze legislation only worsens the situation created earlier.

And in spite, over the last week, of action involving Soviet grain sale agreements, foreign sales will be hurt dramatically over the last 18 months from the use of farm trade to leverage other matters.

For example, inaction until lately on the Chinese textiles matter has cost hundreds of millions of dollars because the administration has failed to set a course promoting farm exports irrespective of other matters and has in fact contradicted its espoused support of free trade by clamping down on imports, thus costing American farmers their largest market.

The administration has played cat and mouse with the Soviet Union ever since taking office and has made positive signals only twice, both politically motivated; once last year a few weeks before the mid-term elections and just last week to shore up farm belt support as the President decides to run for reelection and sell further cuts in other domestic programs.

It is incumbent upon me to come down here and more than criticize. We have a giant farm program costing many, many billions of dollars, depressed farm prices.

I myself felt PIK at the time was at least a way to go out of doldrums of the 1981 farm bill. But it has not worked very well. So, we need to look toward the sound future. One of the things that disturbs me is the absolute emptiness of policymaking on farm programs almost anywhere in this country. The kind of thinking that goes on in America on scientific policy trade and export policy, economic policy is not found in agricultural policy. There are no agricultural think tanks in America.

We do not see the existing think tanks like Brookings, American Enterprise Institute, Hoover Institution, and the whole assortment of folks throughout America who think about policy are not even touching or talking about agricultural land policy.

Even our land grant institutions which have done such a dramatic and wonderful job of increasing agricultural productivity, on the whole do not do very much in trying to develop agricultural policy for the next few decades.

The alternative is a great disaster for American agriculture; fewer and fewer farmers, more and more bankruptcies, a situation which will build on itself and keep general economic recovery from emerging.

Let us look at what we can do. In the area of farm exports we can establish a firm policy on farm export and on circumstances to use concessional financing. We can establish greater and more stable bilateral trade agreements with countries all over the world. But we have to realize that exports alone will not improve the situation dramatically. So, we have to look at the situation of management.

We are too productive, produce too many crops particularly in the grains area and something must be done to reduce that production or else we will see prices continue to plummet down to zero and maybe in 30 years the fittest will survive, but lots of folks, lots of towns, lots of parts of America will go bankrupt in the process.

The current policies have failed, acreage reduction, set-asides, PIK, none have worked to reduce the real problem which are huge oversized-crops.

Now is the time to begin serious consideration to alternatives to the current policy to restructure supply controls and such alternatives could include mandatory production controls, which I think the farmers in America should decide for themselves. The alternatives could involve bushel allotments as opposed to acreage allotments, because you do not eat acres, you do not consume acres and for years that is the way we have reduced production in America when in fact perhaps we ought to be looking at the issue of reducing the total amount of bushels produced.

But I guess I come down to this House because I have seen a dirth of discussion from Members from agricultural producing areas responding to the great outcry that we see in the press and in the national discussions on the PIK program.

It is expensive, it is not working to rebuild an agricultural future for farmers. There must be better ways. And I guess my point today is that during the next 3 months it is incumbent upon all of us in America, not just farm-producing legislators but folks throughout America, farmers themselves, people in institutions of higher learning, to begin thinking much more carefully about what we want our farm picture to look like in the next 20 years.

I would close by reminding my colleagues that our natural resource base is the heart of America's strength. And as it begins to deteriorate, as it has been for the last 10 or 15 years, we have seen the strength of America's economy begin to deteriorate further.

I am a Member from an agricultural State but from an Urban area of that agricultural State and I have come to realize the significance of a sound, strong, future-oriented farm economy to a healthy America.

It seems to me we are at the watershed of agricultural policies. Unless we can make dramatic changes in our farm policies over the next 2 or 3 years we may see a disastrous catastrophe happen in the production of food and fiber in America.

● Mr. DASCHLE. Mr. Speaker, I am joining with my colleagues this evening to examine our agricultural policies and the current stewardship of our basic agricultural programs by the Department of Agriculture.

The tenure of John Block as the Secretary of Agriculture may be re-

membered most in future years for the payment-in-kind (PIK) program. Although land diversion programs have been utilized since the 1930's, the scale of the PIK program has assured it will not be ignored nor forgotten in the near or more distant future.

Monumental in many respects, the payment-in-kind program is also a monument to the mismanagement of the Nation's most basic farm programs by the Department of Agriculture. The size and cost of the PIK program, which have assured its place in history, are also a direct reflection of the degree of farm program mismanagement which necessitated the creation of the PIK program.

According to the Department of Agriculture, the PIK program was needed because of large global supplies of agricultural commodities, the global recession, the strong U.S. dollars, and the financial plight of importing nations. In particular, the Agriculture Department cited record world production of grains, oilseeds, and cotton in 1981–82 and record world crops of grains and oilseeds again in 1982–83, world consumption of feedgrains had not increased since 1978–79 and world consumption of wheat had not increased since 1979–80, the value of the U.S. dollar compared to other currencies had risen to the highest level in 13 years which increased the cost of U.S. farm commodities purchased by foreign buyers and depressed farm export sales, and the global economic recession reduced the ability of importing nations to purchase U.S. farm production.

These conditions, cited by the Agriculture Department to explain the need for creating the PIK program, did not arrive unannounced 1 day late in 1982 on the doorstep of the Department of Agriculture. The loss of $2.2 billion in farm exports because of the impact of the value of the U.S. dollar, for example, had been estimated on March 3, 1982, by the Department of Agriculture. These conditions were no surprise, but are instead an admission of major mismanagement of the Nation's farm programs by the Department of Agriculture.

As a direct consequence of this mismanagement, the cost of farm price support programs has increased dramatically from $4 billion in 1981, only 2 years ago, to $21.8 billion this year according to the administration's most recent forecast. A stated objective of the PIK program is "to promote a farm income while at the same time reducing costs to the Federal Government and, thus, to U.S. taxpayers." As a result of farm program mismanagement, the cost of farm price support programs has soared, but according to current estimates, no improvement in farm income has occurred. In fact, farm prices are falling and in June the national farm parity price fell to 56 percent equaling the 50-year low suffered in January and February of 1982.

As the consequences of farm program mismanagement have become apparent even to the Department of Agriculture, there have been increasing efforts to divert attention away from the failed management of our Nation's basic farm programs and to focus attention on future farm policy. The debate on future farm policy sought by the administration has begun and the cost of consequences of program mismanagement are central to that debate.●

● Mr. SKELTON. Mr. Speaker, leading agricultural economists and farm organization representatives, including two from the University of Missouri, testified recently at a House Government Operations Subcommittee hearing and charged that mismanagement by the U.S. Department of Agriculture in early 1982 contributed to lower farm income at the same time that the taxpayer cost for administering farm programs increased.

Dr. Abner Womack told the subcommittee that a paid diversion program for 1982 would have increased farmers' incomes for 1982 and would have reduced price-depressing surpluses. Dr. Harold Breimyer concurred, testifying that if the Department of Agriculture had instituted an aggressive paid diversion in early 1982, not only would prices have been higher for farmers and Government payments less for taxpayers, but little or no payment-in-kind program would have been needed in 1983. He laid most of the blame on Office of Management and Budget Director David Stockman's approach to agricultural problems, calling them "penny wise and not merely pound foolish, but billion dollar foolish."

In early 1982, I spoke to this body and called for a comprehensive farm program, including, among other things, a proper diversion program and increased agricultural exports. The House passed legislation incorporating these provisions, but it was never enacted into law. Thus, in 1982, we saw agricultural exports actually decrease as burdensome grain surpluses piled up.

Finally, the administration responded in 1983 with payment-in-kind, or PIK, program. This program has been helpful, and has undoubtedly saved many farmers from bankruptcy. But it has had its drawbacks. It has hurt the business of small agricultural suppliers, such as farm equipment dealers and those who sell fertilizer and seed. And, because the program was drawn up in haste, there have been administrative headaches. I have received reports of long delays in PIK payments being made, and of farmers receiving the wrong class or grade of grain. Newspaper reports have focused on payments worth more than a million dollars to large corporate farms.

These problems, plus the cost of the program, indicate that PIK can only be a short-term solution to farm financial problems. In my opinion, there will be no substantial, long-term improvement in the farm economy until we reverse the current downward trend in agricultural exports, expand the market for our farm products and bring interest rates down to a reasonable level.●

ALTERNATIVE BUDGET

The SPEAKER pro tempore. Under a previous order of the House the gentleman from California (Mr. DANNEMEYER) is recognized for 30 minutes.

Mr. DANNEMEYER. Mr. Speaker, it is not too difficult to lapse into a state of mild euphoria over the seemingly endless gush of optimistic news over the past several weeks. Reports the GNP had risen over 8 percent in the second quarter had many economic forecasters, both private and in Government, falling over themselves in unrestrained astonishment that their own predictions were about half that figure. It seems now everybody sees the rainbow.

The problem is that we are not necessarily assured of finding a pot of gold at the end of that rainbow. The July economic news notes published by the National Association of Home Builders gives us a clue. Based on the way the financial markets have been behaving it is difficult to see how the housing recovery can maintain its momentum for more than a few months. Even worse we may have another bust in 1985 as a result of the almost certain collision in the capital markets when demands for private capital clash with Government borrowing.

Government borrowing, borrowing necessitated by budget deficits of such magnitude that most people cannot comprehend the numbers. The message to Congress ought to be clear enough, "cut spending now or face the inevitable tide when the 34th State calls for the convening of a Constitutional Convention to require a balanced budget." Not more than a half hour ago this House saw adopted a reauthorization of revenue sharing for cities and counties and States around this country.

In concept it was an excellent proposal, starting in the early part of the 1970's to give revenue by the Federal Government without strings and as a reduction for this new revenue sharing we would reduce on an allocated basis certain categorical aid programs.

It was intended it would be a net push to the Federal taxpayer. It has not worked out that way. And we saw the result of the vote. Once something gets started it is almost impossible to

stop it, even though we have no revenue to share.

Over the course of the past several weeks this Member from California has taken these special orders to bring to the Members' attention the fact that we can, if we have the will in this House, adopt a budget proposal that can substantially reduce the deficit that we are now facing in this country; namely, estimated to be $200 billion for fiscal year 1984, the fiscal year that will start on October 1 of this year.
